● Mr. PARRIS. Mr. Speaker, in the very near future, the President's bipartisan commission on the future of social security will deliver its report to the Congress. While it appears unlikely that this important issue will be taken up for consideration by the lameduck session of the 97th Congress, it will certainly be considered by the incoming 98th Congress.

During the midterm elections, many politicians sought to gain political advantage by using the social security issue as a means to frighten their constituents into supporting their candidacies. The time has come for an end to partisan speechmaking and a beginning toward seeking meaningful solutions to the problem of future funding of benefits given the dwindling base from which the fund can be supported.

While I do not support the merger of social security with the civil service retirement system, I do recognize the need for structural changes in the benefit formula and the tax rate. I do not pretend to know exactly which combination of factors will produce solvency for the social security system, but I am prepared to review the options presented to the Congress and to work for the program which will insure the continuation of this vital program while

distributing the burden for its funding equitably among our Nation's citizens.

A recent interesting article on the subject of social security appeared in the November 8, 1982, issue of U.S. News and World Report which I commend to my colleagues for their information and review.

The article follows:

[From U.S. News and World Report, Nov. 8, 1982]

ZERO HOUR FOR SOCIAL SECURITY

(By Marvin Stone)

Politicians have been finding that any mention of steps to rescue Social Security, as Senator Bob Dole says, is "like talking about the plague." Now, with the election campaigns over, facts must be faced. Something will be done, and few will like it; but if nothing were done, we would like it even less.

In short term, the system could go bankrupt without some new action. In the long term, so few workers would be supporting so many retired people that an ugly confrontation could result.

Till the end of this year, old-age checks can be kept flowing by borrowing billions from the disability-benefit and health-insurance trust funds to supplement tax payments coming in for Old-Age and Survivors Insurance. If that borrowing authority is not renewed, too little will be in hand by the middle of 1983 to make monthly mailings to the retired. If it is renewed, all three funds will go broke in 1984. There's got to be another way.

Suggesting a solution is the business of National Commission on Social Security Reform. Soon the commission will take this political hot potato off the back burner and serve up its recommendation to Congress. That will be a choice or combination of changes that nobody wants but everybody must weigh.

Social Security's short-term needs may be met by speeding up the scheduled increases in payroll taxes, pruning benefits of future retirees, lowering cost-of-living adjustments, drafting federal workers into the system, contributing cash out of the general revenues, increasing and earmarking excise taxes and/or making some part of the benefits subject to the federal income tax. This last step naturally is poison to politicians, but it does recommend itself in one way: Normal operation of the tax law would spare the very poor who have little income from other sources.

The confrontation after the year 2000 is on a different order. It grows out of the maturing of the country, its people and its institutions—an inexorable and somewhat frightening process. In 1950, fifteen years after the creation of Social Security, more than 16 workers were paying taxes into the system's coffers for every retired person who was drawing benefits, and it seemed as if the trust fund would stay in surplus forever.

It took a long time, but that had to change. Bigger and bigger numbers retired. The life span lengthened: Life expectancy after 65 increased substantially, and that meant more people living to draw benefits. Today, the ratio of taxable workers to retired beneficiaries is only a little over 3 to 1. By the year 2025, which many Americans now employed will live to see, there will be only approximately 2 workers for every beneficiary. Workers might rebel. The result could be an unpleasant scene, requiring painful, even catastrophic, readjustments. Better that the changes be planned in advance.

Some of the measures discussed to preserve Social Security over the next few years could come into the picture also for the longer run, but the most promising long-range suggestion is to put off retirement under the plan to a later age—perhaps, eventually, 68.

This idea has been around for a while, but the commission, in its preliminary studies, has supplied a rationale and outlined a tentative formula for phasing in the new retirement dates by a few months each year.

Because Americans' life expectancy at 65 has increased by more than three years since the program began, advocates of longer careers believe such a solution is justified. And, aware that people need time to plan their lives, they do not propose to have the shift begin till A.D. 1990 or 2000.

But a decision on the future of Social Security must not be put off until a moment of desperation, when hostility, failure and distress may result. If legislators cannot, as seems likely, find time for it in the coming special session, then the new Congress in January must make ready for early action.●

HONORING REDLANDS UNIVERSITY

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LEWIS. Mr. Speaker, this year marks the 75th anniversary of one of California's leading universities, the University of Redlands located in Redlands, Calif. I would like to take this opportunity to join with the graduates, students, faculty, and administrators in honoring this fine institution today.

Chartered on November 25, 1907, the University of Redlands admitted its first students in September 1909. The story of the University of Redlands is the story of an institution much changed from its founding and yet in spirit unchanged from its original commitment to educate not only the mind but also the heart.

The University of Redlands was born out of the devastation of the San Francisco earthquake when the Rev. Jasper Newton Field decided to move his Baptist college from the crumbled city to Redlands. There, the college has been nurtured and has matured into one of California's leading universities.

In 1909 9 professors and 52 students made the school a reality in the midst of the construction of the administration building. A graduating class of four, including President Field's daughter, proudly accepted their diplomas in June.

Traditions began with important links which are presently shared by members of the university and community today. The "R" in the local mountains was created by energetic undergraduates in 1913-14. The Zanja Fiesta became an annual musical extravaganza. A school newspaper, fraternities and sororities, athletics and campus life began to coalesce. Most significant was the commitment to the liberal arts tradition and to the education of students who would be sent forth to do good and undertake service to improve their world.

Victor Leroy Duke, a member of the original faculty and a man of vision, guided the university during the 1920's. He and the trustees rejoiced in the Rockefeller Foundation grant which enabled great strides to be made academically. More dormitories were added to the residential campus, additional classrooms were built, a handsome Memorial Chapel now anchored the north end of the quad, and the University of Redlands was unequivocably adopted.

The thirties brought a close campus rapport under the administration of President Clarence Howe Thurber. Thurber brought with him the air of the cosmopolitan East, a highly charged academic commitment, and a determination to make Redlands' students "learners." The depths of the depression were reached in 1936, and it proved that Redlands was no Camelot either. Thurber resigned and the university was vying within itself for a sense of direction.

Elam J. Anderson became president of the University of Redlands until his sudden death in 1944. World War II profoundly changed the university. With the building of a new commons and the coming of a new president, George H. Armacost, a new phase of university life began. It was a time of continuity, new social life developments, a vigorous building campaign, and an increase in the endowment. Those post-World War II years saw veterans returning as students and the dorms nearly bursting their seams.

President Armacost concluded 25 years of service retiring in 1965. During his tenure enrollments were up, the pool of students high, government money for higher education plentiful. As a result, academic achievement, sporting achievements, and student living innovations excelled at a high pace.

Certain innovations from the 1960's provided positive experiences for Redlands. Excellence in scientific programs, firm commitment to liberal arts, and the advantages of foreign resident programs. A new college for returning of older students was begun.

The end of the 1970's brought about intense discussions and a firm resolve to secure the university's future and keep undiminished its purpose of liberal arts education with quality.

Following the resignation of Dr. Eugene E. Dawson as president in 1978, the new—and current—President Douglas R. Moore inherited an institu-

tion vulnerable to the challenges afflicting all private higher education: less money, higher costs, fewer students. At present the strength of the campus, the ongoing growth of its programs and outreach, the quality of its students and its higher enrollment is the answer that the university community gave to the priorities of President Moore.

The 75th anniversary speaks of achievements and of work and of efforts to care for, guide, and exert love for an institution. Its original resolve remains bright: to serve the mind and heart.

Mr. Speaker, it is an honor and a privilege to commend the University of Redlands to the House of Representatives for not only its past achievements, but for future limitless possibilities in the educational forum.●

THE TROUBLED TANK

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. CLAY. Mr. Speaker, the issue of extravagance in the military continues. It is apparent that we are not getting maximum benefit in terms of the taxpayers' dollars expended for the Defense Department. I have had occasion to address this matter a number of times in regard to shortfalls, mismanagement, and sheer waste in defense spending. The time has come to tackle this matter head on and to make certain that we do not allow this type of waste to continue.

Insofar as the litany of sorrows is concerned, the M-1 tank is a classic example of incompetence and costly expenditures in the military.

I would like to share with my colleagues, a recent editorial, "The Troubled Tank" which appeared in the New York Times. This article provides a graphic account of military extravagance.

The article follows:

[From the New York Times, Oct. 22, 1982]

THE TROUBLED TANK

The Army's new tank, the M-1, is the centerpiece of efforts to improve the United States' conventional forces. Yet this critical weapon appears to have severe problems and despite the Army's constant assurances, the success of the $19 billion program is far from certain.

The M-1 is the Army's third attempt to build a new tank, its two predecessors having being canceled by Congress as too costly and too complex. The Army's own tests of the M-1, made public by the Project on Defense Procurement, reveal a disturbingly similar pattern.

The versions tested last fall proved so delicate as to require six times the maintenance of the Army's present main battle tank, the M-60. As a test of durability, half the M-1's are supposed to be able to travel 4,000 miles without major breakdown in the power train. But only 15 percent did so in last year's operational tests, a decrease from 47 percent in 1979. The Army says the problems have been corrected, but recently new durability tests were suspended after all five tanks taking part broke down.

Even if the M-1's persistent glitches can be fixed, critics consider the tank to have fundamental design errors. Chief among these is the choice of a gas turbine engine. The M-1 uses twice as much fuel as the diesel-driven M-60, is sensitive to dust and gives off intense heat that will attract infrared-seeking missiles and emblazon its position on the thermal viewing devices of Soviet tanks. No other tank in the world has a jet engine; why the M-1? The Army gambles that it will be hardier and easier to fix.

The M-1 is protected by a novel armor designed to keep out the "shaped charge" fired by infantrymen. But this Chobham armor is so bulky that it is used only on the front half. The rear is more thinly armored than the M-60. Also, Chobham armor does not always defeat the standard kinetic-energy round used by tanks against one another, yet the M-1's designers take an extraordinary risk, that of storing its ammunition above the line between hull and turret, just where most hits are scored.

Ironically, the best feature of the M-1 is its 105-millimeter cannon, identical to that on the M-60. Yet the complex electronics added to the gun seem in some instances to degrade its performance and are often switched off by the crew.

Without doubt the M-1 is a hot-rod tank—it can cruise at 45 miles an hour and has wonderful suspension. But on present evidence it is in many ways a less effective weapon than the M-60, designed more than 20 years ago. During the war in Lebanon Israeli M-60's, cheaply but thoroughly modified, were highly successful against Syria's Soviet T-72's. Would the M-1 have performed as well? In last year's tests, half the tanks dropped out of action in five days from mechanical failures alone.

Soviet tanks evolve in gradual, risk-avoiding steps. The M-1 seems a more radical leap than the U.S. Army can comfortably manage. Its complexity has driven costs to a remarkable $2.6 million per tank and has made manufacture so difficult that the United States can produce fewer new tanks than even inefficient Soviet industry.

Congress has wisely kept under development the diesel engine originally proposed by General Motors. Substituting that for the Chrysler-version gas turbine would cause little real delay and greatly improve reliability. Meanwhile, a new tank needs to be designed—and not the preposterous turretless version of the M-1 that the tank bureaucracy contemplates. A simpler, cost-effective weapon should be shaped by users and tacticians instead of a bureaucratic process in which requirements are piled on, never deleted, until a fighting vehicle becomes a suffering behemoth.●

IS IT TIME FOR A NEW JOLT TO SPUR EDUCATION?

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SIMON. Mr. Speaker, Mike Bowler, an editorial writer for the Paducah Evening Sun, has written an editorial piece commenting on where we are 25 years after sputnik in the field of education.

The implication of his article is clear: That if the Nation is not to fall behind, it has to pay more attention to education.

And I concur with that conclusion completely.

I urge my colleagues to read the article.

IS IT TIME FOR A NEW JOLT TO SPUR EDUCATION?

"The message which this little ball carries to Americans, if they but stop and listen, is that in the last one-half of the Twentieth Century . . . nothing is as important as the trained and educated mind."—Chancellor Franklin D. Murphy of the University of Kansas, commenting on the launching of Sputnik, 25 years ago tomorrow.

(By Mike Bowler)

Sputnik changed the face of American education as perhaps no other event in the Twentieth Century. Seen as a threat to national security, Iskustvennyi Sputnik Zemli—"artificial traveler around the earth"—spurred a massive federal effort to improve education in mathematics, science and foreign langauges.

Today, most observers believe a similar crisis is at hand. The statistics bear them out. But while the crisis may be similar, the times have changed.

In the first days, no one made the connection with a failing U.S. education system. There was worry about America's defense posture, about Sputnik's potential for spying, about when and where it would land.

Then it began to sink in. On October 7, three days after Sputnik was launched, G. Mennan Williams, the governor of Michigan, said Sputnik "reminds us uncomfortably that Soviet education has for some years turned out twice as many engineers and scientists as have we."

Others quickly got on the bandwagon. Statistics spewed forth: A third of all high school students qualified for college failed to continue their education because of lack of funds. The proportion of top-quality faculty members was declining. Less than 15 percent of public high school students were studying a foreign language.

President Eisenhower and others who opposed a large federal presence in education began to see scientific illiteracy as a threat to national security. Congress sifted through a bundle of aid-to-education bills—some 150 in all—and enacted the National Defense Education Act of 1958, a compact, 25-page document (including a loyalty oath requirement) that clearly placed the federal government as a partner in education.

By the time Neil Armstrong walked on the moon 11 years later, 1.5 million men and women had gone to college under NDEA's Title II National Student Loan Program. Title III, originally written to strengthen elementary and secondary instruction in science, had been broadened to include 50-50 matching grants to the states covering a wide range of subjects.

The Title IV graduate fellowship program had enabled more than 15,000 students to complete doctoral degrees. Thousands of teachers had gone to NDEA summer workshops. And so on. The NDEA had invested

some $3 billion in American education by the time of the moon walk.

Scientific research and a rewriting of much of the nation's public school curriculum also were prompted by Sputnik. To build up scientific and engineering manpower, the National Science Foundation eventually sponsored 53 curriculum projects. A new curriculum in physics was soon followed by mathematics, chemistry, biology and the social sciences.

Not all were successful, but the Biological Sciences Curriculum Study, the only reform project still alive, revolutionized the teaching of high school biology. Students no longer memorized biological facts systematically. They considered the *process* of life's development, and they got a heavy dose of evolutionary theory, which BSCS called the "warp and woof" of modern biology. "There isn't a textbook that isn't influenced by BSCS," says William V. Meyer, a former director.

But this 25th anniversary of Sputnik is marked by irony. A number of factors in the 1970s—the change in federal emphasis to the war on poverty, television, grade inflation, the emphasis on "relevance" over basics, the political right's trampling of some of the more daring curriculum reforms, and now the federal retreat from aid to education in general—either singly or in combination put the nation back to Square 1.

The American Association for the Advancement of Science complains: "even now too few Americans have the science or mathematics grounding to keep America in the forefront technologically and economically." There is a scarcity of trained personnel in several scientific fields. Only one junior or senior in 14 takes physics. Much of the laboratory equipment in colleges and uiversities is obsolete or worn out. College and university research suffers.

At the root of the problem is a severe shortage of qualified science and mathematics teachers. Last year a survey of state science supervisors found a shortage of high school chemistry teachers in 38 states, a shortage of math teachers in 43 states and a shortage of physics teachers in 42 states.

Last spring, only 17 new mathematics teachers graduated in Maryland, and eight went into teaching. There is a related but no less bleak statistic: Scholastic Aptitude Test scores of would-be teachers are lower on the average than those of almost all other college-bound students.

The status of science and mathematics teaching is so critical because, even by optimistic estimation, it will take a decade or more to reverse the trend. Meanwhile, proposals to attract students to math and science teaching by giving them extra pay run into fierce opposition from teachers' unions.

"Of course, we could solve the problem by next Monday if we really wanted to," says Stephen Willolughby, president of the National Council of Teachers of Mathematics. "All we have to do is double all teachers' salaries—not just mathematics teachers. It would take $30 billion to $40 billion and is probably politically not feasible, but it's a drop in the bucket compared to what we spend on defense.

"The problem isn't a shortage of people willing and able to do the job. It's a shortage of math teachers, and it's chronic shortage. Only in 1969 were there as many teachers as there were jobs. We've always experienced a drain of math teachers to higher paying jobs outside of education."

Steven Muller, president of Johns Hopkins University, agrees. "The quality of the public schools has deteriorated substantially over the past two decades," he says, "and the best evidence is what teachers are paid. There's a sad irony here. That is that we're getting more than our money's worth."

Terrel H. Bell was a new superintendent in Ogden, Utah, when Sputnik was launched. Today he is Secretary of Education. He does not deny that there are "serious and urgent" problems with American education, but neither does he promise a new NDEA.

"We can't afford it with the economy we have now," he says in an interview.

Secretary Bell is not without solutions. Schools could simply dictate more study of science and math, or they could put an end to the single salary schedule for teachers, paving the way for rewarding those in science, math and foreign languages. More attention could be paid to gifted students. Colleges could make entrance exams more stringent. Teachers could be rewarded for not becoming administrators. "There are many things that could be done immediately, if only local boards and teachers would do them."

And if they cost money, who will pay? "The place where I'd like to see more initiative is the state legislatures. That's where the responsibility rests. Legislatures ought to take education more seriously than they do. Education ought to be as important to the states as defense is to the federal government."

Everyone says another Sputnik jolt is in order, but no one can predict what form one might take. Perhaps, Dr. Muller and others suggest, what has happened has been more subtle. "Sputnik gave us a benign jolt," Dr. Muller says. "It gave us pause without giving us critical injury."

In 1982 perhaps real damage has been done. Dr. Muller cites the U.S. failure to meet the "Japanese challenge" in technology and the "virtual collapse" of the domestic auto and steel industries. (Unlike the U.S., secondary education in Japan is heavily weighted toward science and math, and Japanese colleges grant four times the U.S. number of baccalaureate degrees in engineering and eight times the number of advanced engineering degrees.)

Jolt or no jolt, there are plenty of plans afoot. An "American Defense Education Act," a modern version of the discarded NDEA, was introduced in Congress in June. In early September, three senators introduced legislation that would devote $400 million to training in mathematics, science and foreign language.

There are also more far-reaching proposals, such as Boston University President John Silber's "GI Bill in reverse," which would make federal funds available prospectively to those who promise to become doctors, nurses, scientists or teachers. Dr. Muller says he personally prefers a combining of voluntary national service, not restricted to the military, with a "reborn GI Bill."

Most observers believe the way to the Reagan administration's heart is through national defense, just as it was the way to another Republican administration's heart a quarter of a century ago. But Dr. Bell offers no hope that the administration will support bills that cost money—and almost all of them do.

"This administration ought to be willing to make the necessary changes," says the mathematics council's Dr. Willoughby. "If they're really interested in the long-term defense of the country, and they say they are, then clearly the way to keep the national defense strong is through better education."●

GEORGIA'S SMALL BUSINESS DEVELOPMENT CENTER

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MITCHELL of Maryland. Mr. Speaker, I wish to commend the magnanimous efforts of Dr. Fred C. Davison, president of the University of Georgia, and Dr. William C. Flewellen, Jr., professor of business and industrial development at the University of Georgia. These individuals have tirelessly worked to improve the availability of the university's small business development center (SBDC) to the State's small and minority businesses.

In the age of huge conglomerates and transnational corporations, Dr. Davison and Dr. Flewellen have remembered the essential role small businesses play in the Nation's overall economic health. We must realize the small and minority businessses account for almost half of the Nation's private gross national product. Small businesses are the primary sources for new private sector employment and account for 50 percent of all major innovations. Finally, the small business sector is the most competitive segment of the economy at a time when the free market is more highly regarded in theory than in practice.

The University of Georgia's SBDC will inject vitality into the small business community by providing counseling, continuing education, and applied research services. In addition, Georgia's small businesses will benefit from the university's technological breakthroughs by way of the SBDC. For instance, the University of Georgia is in the forefront of research concerning the conversion of biomass into food, fiber, chemicals, fuel for fermentation, and energy. The SBDC will insure that once patents for these conversion processes exists, they will be available to the State's small businesses. Consequently, Georgia will contain a number of profitable enterprises which provide marketable services for the expanding needs of the world population.

It has been estimated that the SBDC, through its 10 district offices, is in a position to assist the 120,000 businesses in Georgia. In 1982-83, for example, the SBDC will assist 4,000 businesses with counseling services and 13,500 with short courses. I believe these statistics are a clear indication of the almost boundless potential of the SBDC to assist Georgia's small businesses. Clearly, the University of Georgia's SBDC, under the judicious

guidance of Dr. Davison and Dr. Flewellen, will assist small businesses in their attempts to stay afloat on the precarious economic waves that Reaganomics has created.

THE UNIVERSITY OF GEORGIA,
Athens, Ga., October 14, 1982.

Hon. PARREN J. MITCHELL,
U.S. House of Representatives,
Rayburn Building,
Washington, D.C.

DEAR PARREN: When Dr. Fred Davison, President of the University of Georgia, and I visited with you last month, you requested a brief written statement about the prominent role within the University that has been given the Small Business Development Center at the University of Georgia so that you could read the statement into the Congressional Record.

I am looking forward to working with you to improve the status of small business in the U.S. and to working toward better small business relations with the African nations.

Sincerely yours,

W. C. FLEWELLEN, JR.,
University Professor of
Business & Industrial Devlopment.●

PHARMACY ROBBERY STATISTICS

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ROUSSELOT. Mr. Speaker, I would like to take this opportunity to point out that 186 Members of the House have joined as cosponsors—as I have done—to legislation (H.R. 2034) introduced by Representative HENRY HYDE, which would make the armed robbery or attempted armed robbery of controlled substances from a pharmacy a Federal offense.

Counting this overwhelming cosponsorship and other separate bill introductions that are almost identical to Mr. HYDE'S proposal, there are more that 200 House Members who are on record in favor of seeking a greatly needed change in the law to combat a national epidemic of crimes against drugstores and the ugly byproduct of death and violence that accompanies theft by force. In addition, it is my understanding that a majority of the Senate has also sponsored companion bills.

In view of this broad base of support in both Chambers for pharmacy robbery legislation, it is my hope that the House and Senate leadership will give all due consideration to schedule one of these pending measures during the special session since crimes against our Nation's community pharmacies have been escalating at an alarming rate. The most recent statistics from the Drug Enforcement Administration (DEA) show that there were 1,908 such armed robberies in 1981 involving a staggering total of more than 4.8 million dosage units of controlled substances. The estimated street value of these narcotics would very easily exceed $250 million.

The DEA drugstore robbery statistics represent an increase of 160 percent in the number of robberies between 1973 and 1981. During this 8-year period some 11,786 drugstores became targets for the criminal element, and according to the Justice Department, 1 out of every 5 of these armed robberies results in either serious injury or death.

Finally, I would like to express my concern for remarks that were recently printed in the Washington Post Sunday Magazine on November 7, 1982, in which a colleague was quoted as saying that the pharmacy crime matter was an issue that had been invented by a lobbyist representing pharmacies in order to justify his job. Certainly the statistics I have referred to that have been compiled by the DEA and the DOJ prove just the opposite. I think that the pharmacy organizations and individual pharmacists should be commended for bringing this matter to our attention because this particular crime problem is growing as our Federal law enforcement agencies have become more effective in tightening the reins against illicit drug traffic. With the Reagan administration waging an all-out war against traffickers, addicts, and criminals, I believe that the Congress also has an obligation to crack down on crime and find some form of protective relief for pharmacists. These health-care professionals are providing an important service to our communities by dispensing drugs that cure illnesses and relieve pain, but pharmacists are also being victimized and killed because they stock and dispense certain medications that can command astronomical street prices.

Although the Hyde bill or Senator THURMOND'S proposal (S. 2572) may not be the entire answer that we seek to remedy the problem, I feel that the provisions contained in these measures calling for more stringent penalties and sentencing are appropriate for debate. It is my hope that the House Judiciary Committee will find time in its demanding schedule to review this entire matter, since the violence and the diversion of dangerous drugs is an important issue worthy of congressional attention.●

THE YEAR OF THE ST. LOUIS CARDINALS: A TRIBUTE

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. CLAY. Mr. Speaker, the extraordinary athletic wizardry and flawless ability of our beloved St. Louis Cardinals in capturing the 1982 World Series have brought great fame and recognition to our beloved St. Louis.

All of us were thrilled by their tenacity, drive, stamina, and "Never Say Die" attitude as they came from behind to decisively defeat the Milwaukee Brewers.

The 1982 St. Louis Cardinals represent profiles in courage. They possess remarkable talent and serve as exemplars for all residents of St. Louis. Their talented play, high resolve, splendid sportsmanship, and infectious spirit of bonhomie continued long after the final play. Each citizen of St. Louis and Missouri can take justifiable pride in their enduring accomplishments.

Mr. Speaker, I, too, am proud to congratulate an unusual group of Red Birds: The St. Louis Cardinals. They are a class group and they have etched an indelible athletic record that sustains and inspires the world. Truly, they are world champions, and I exemplify the spirit and thought of every Missourian in saying: "We are most proud of you Cardinals, and you have given us a rich legacy to treasure in years to come." Congratulations.●

THE RETIREMENT OF JUDGE HAROLD H. BOBIER

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. KILDEE. Mr. Speaker, on October 11 the legal community and numerous citizens in Genesee County, Mich., held a reception to honor Harold H. Bobier, who was retiring after a distinguished career completed by 11 years as Federal bankruptcy judge for the U.S. District Court for Michigan's Eastern District. I was pleased to participate in that event honoring Judge Bobier and would like to share here the highlights of his career.

Judge Bobier's career was marked by accomplishment first in the business community and then in the legal profession, as well as by his great contributions of service to the public. At his retirement, he had been a member of the board of trustees of the Flint Osteopathic Hospital for more than 30 years, exemplifying his strong commitment to public service. He also served on the Dye School Board for 14 years, 11 as president, and was a former director of Goodwill Industries, Flint Civitan Club, and the Visiting Nurses Association.

He lived in Flint for most of his life, arriving there in 1919. He worked in the automobile factories of Flint and Pontiac in his youth, and then helped organize the Pure Seal Dairy, Inc., in

1938. He was president of the dairy at the time of its sale in 1958.

Judge Bobier studied law under a proctorship beginning in 1936 and he passed the Michigan Bar in 1943. He was in private practice in Flint from 1943 until 1961, when he was appointed to the bankruptcy court. Throughout his career of both private practice and as a Federal bankruptcy judge he was active in numerous legal organizations, holding a great many leadership positions at the local, State, and national levels. He was a member of the Fellows of the American Bar Foundation and served on the seminar staff of the National Conference of Bankruptcy Judges.●

PATRIOTISM

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FISH. Mr. Speaker, on July 4, 1982, a young woman from Cornwall, N.Y., part of my new congressional district, was the main speaker during the flag ceremony following the July 4 parade. Miss Merritt, who is now in her freshman year at Cornell University, was secretary of the Independence Day Committee and demonstrates by her work and her words the commitment to the American spirit that is being revitalized throughout the United States.

Susan Merritt is an exceptional young woman. She graduated first in her class at Cornwall Central High School, was a national merit finalist, president of the national honor society, captain of the track team, and vice president of the Cornwall youth council. Miss Merritt also showed her community spirit by becoming an integral part of the July 4 planning and ceremonies.

I was quite impressed with the depth of feeling in her speech, and I would like to share Susan Merritt's words with my colleagues as a reminder that the American spirit remains strong in our young people, the real strength and future of America.

FLAG CEREMONY, JULY 4, 1982, CORNWALL, N.Y.

(By Susan Merritt)

As I was thinking over ways to express my feelings as well as those of the July 4th Committee, I came across the word patriotism. My first thoughts upon hearing that word are quite different than those of my parents' generation or my grandparents' generation. I wondered why they should be different. All three generations were born in America, and we have all lived within a few miles of Cornwall. Our history and values are also very similar. The difference is war; uniting against a common enemy. I have never been touched by the patriotism which is spawned in aggression and I have never seen my rights threatened. I hope to God that I never do. Thus, patriotism is a word seldom used by young people because it has not yet been experienced. However, there certainly are other ways to build patriotic feelings: one is direct threat and another is peacetime celebration. Festivities like those of today are aimed at having a lot of fun, but also at strengthening our patriotism and showing the younger generation how fortunate we are to be Americans.

I know that most of you have heard that sentence before; "You don't know how lucky you are to . . ." Fill in whatever comes next; have a job, have food on the table, go to school, etc. But the truth is that luck plays no part in those and other privileges. The men and women who fought for those rights over 200 years ago did not say to themselves, "I hope we get lucky this time!" They paid the price so that we could be privileged, not lucky.

One of the greatest privileges we can exercise is freedom of choice. My classmates and I have just made one of the most vital choices of our lives. The question was, "Do I get a job, do I get married, or do I go to college?" The decision was difficult, but the important thing is that our country allows the choice to be ours. Many times our right to choose the course of our own lives is taken for granted. Personal preference on smaller issues and majority vote on larger issues has been the norm in all our lifetimes, but in many societies it is not. Our lives were given to us at birth, but our freedom was earned on this date at the birth of our nation.

The young have the same freedoms as adults, though they are the first to say that they don't. Freedom of speech was recently exercised by young people when they made their feelings known about the Village Bench Law. They spoke and the right people listened. How many times have we stood in front of the TV so that our little brother or sister could not see, and answered their cries with, "It's a free country, I can stand wherever I want." Well, the argument works, but in this case it has been misused. Our freedoms of choice, speech, religion, and the press imply responsibility. The responsibility to protect these same rights for others. A child does indeed have the right to stand wherever he likes, provided that, in doing so, he does not infringe upon the right of the other child to watch television. Freedoms cannot exist without the responsibility to use them well.

This weekend's events are aimed primarily at creating a revival of old-time spirit. We are trying to reach as many people as possible with the theme God and Country. For the young, we hope to persuade them to think seriously. I know that old-time spirit does not mean very much to kids, but it has to begin somewhere. Celebrations such as this one help a great deal, but the spirit starts by thinking.

The huge parade we have just seen is proof that the town and village can unite and accomplish great things together. It is this unity which the Independence Day Committee has worked to achieve. Our nation came together in much the same way in 1776, and the results were equally laudable.●

THE RETIREMENT OF JEROME H. BERENSON

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the retirement of the presiding judge of the Ventura County Superior Court, Jerome H. Berenson.

Jerome H. Berenson was born May 13, 1914 at Salida, Colo. In 1920 his family moved to California and settled in the San Diego area. He attended public school in La Jolla, Calif., and thereafter attended the University of California at Berkeley where he received his undergraduate degree in 1935 and his law degree from Boalt Hall School of Law in 1938. He was admitted to the bar on November 1, 1938.

In 1939, Berenson returned to his family home in San Diego and served as assistant public attorney in that area. In 1942, with the world at war, he joined the U.S. Navy and served until 1946, retiring with the rank of lieutenant commander.

After the war, he settled in Oxnard where he entered practice with Ben Nordman in 1947. He remained in practice until 1962 when he was appointed to the Ventura County superior court bench by then Gov. Edmund G. Brown, taking office November 1, 1962.

Following appointment in 1962, Judge Berenson was elected to his office in 1964 and reelected in 1970 and 1976. During 15 of the 20 years Judge Berenson has served on the superior court, he has been the presiding judge (longer than any other judge in California sitting in a multijudge court).

Judge Berenson is presently the senior member of the court in terms of the number of years of service on the bench. He has been presiding judge and a member of the appellate department for 5 years and has been the presiding judge of the juvenile court for 7 years.

In 1976, Judge Berenson was appointed by Chief Justice Donald Wright, of the California Supreme Court, to head the sentencing practices advisory committee to formulate criteria for the implementation of the new determinant sentencing law.

Judge Berenson is the past president of the Ventura County Board of Education, the Ventura County Bar Association and the Ventura County Council of Navy League of the United States.

On October 1, 1947, Jerome Berenson married Carolyn Straus and currently resides with his wife of 35 years in the city of Oxnard. The Berensons

have two grown sons, Jeffrey and Craig.

Jerry Berenson is an outstanding, courageous jurist, an excellent lawyer and a very good friend. I ask my colleagues to join me in congratulating him on his career and wishing him the best in the future.●

SOVIETS' NUCLEAR BUILDUP CONTRADICTS TALK OF PEACE

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BEREUTER. Mr. Speaker, as we return to finish the business of the 97th Congress, I would like to call to the attention of my colleagues a short editorial which was published in the Omaha World Herald on October 25, 1982. The commentary provides a sharp insight into several aspects of the current nuclear freeze movement, and is reprinted below:

The article follows:

[From the Omaha World Herald, Oct. 25, 1982]

SOVIETS' NUCLEAR BUILDUP CONTRADICTS TALK OF PEACE

President Reagan and Sen. Jeremiah Denton, Ala., earlier this month found themselves charged with McCarthyism, or "guilt by association," in connection with statements each made about the nuclear freeze movement.

Denton irritated some of his Senate colleagues during debate on a "Peace Day" resolution supported by several wives of senators. He called the proposal a "sucker deal" and suggested that the organizers, either consciously or unconsciously, were doing the work of the Soviet KGB.

Reagan, several days later, infuriated advocates of a nuclear freeze by saying that the freeze movement was being "manipulated" by "some who want the weakening of America."

There is no evidence that the nuclear freeze movement in this country is inspired or manipulated by Communists.

On the other hand, it would have been fair and accurate for Reagan or Denton to note that the call for a nuclear freeze is consistent with the Kremlin's goals.

The point can be made—without impugning the motives of the anti-nuclear people—that the Soviets oppose the modernization of the U.S. nuclear deterrent and that a freeze would have the same effect.

The Soviet's pro-freeze position is transparently self-serving. The Kremlin continues to trumpet the theme that the United States is responsible for an "arms race." But the dramatic buildup of Soviet armaments that has upset the nuclear balance in recent years is ignored.

While leading the applause for a freeze and for anti-U.S. demonstrations in recent months, the Soviets have ruthlessly suppressed a Russian peace organization that had the temerity to organize in Moscow without government sponsorship.

One of the organizers said the group was formed because all other Soviet peace groups "reflect only the government point of view." The group called upon the Soviet Union, as well as the United States, to halt nuclear testing and to seek a reduction in tensions.

For this offense, members of the group were arrested, harassed and isolated from a group of government-sanctioned peace marchers from Scandinavia who had been given permission to enter the Soviet Union.●

AFTER LEBANON: AN OPPORTUNITY FOR PEACE

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BINGHAM. Mr. Speaker, I would like to share with you and my colleagues an insightful speech on the Middle East made recently by our distinguished colleague from New York, BENJAMIN ROSENTHAL. The occasion for his speech was the biannual national board conference in New York City of Women's American ORT (Organization for Rehabilitation through Training).

ORT has often been called the charity to end all charity because of its policy of teaching people skills so they can stand on their own feet. Since 1880. In Czarist Russia, ORT has built a worldwide network of 800 vocational and technical schools on five continents which has helped more than 2 million people of all colors and creeds to become independent, productive citizens.

In speaking to this prominent organization, Representative ROSENTHAL presented some interesting reflections on recent events in Lebanon which I feel are deserving of wider dissemination:

I am particularly honored to be speaking before you today at your Biannual National Board Conference. For over a century ORT has been helping the Jewish people. And, since the birth of Israel, you have diligently contributed to the growth and prosperity of Israeli society. By your dedication you have assumed a special place in her future.

You have heard from many wise men and women over the years—scholars, spiritual leaders, statesmen. All of them, as all of us, have participated in the great conversation which is so much a part of our history and practice as Jews. I am honored to be among their number, and here with you now.

I speak today as a member of the U.S. Congress, as a senior member of the House Foreign Affairs Committee, and as someone whose principle mission for twenty years has been to stand for the interests of Israel and to mobilize support for that nation in the councils of American government. No duty has been more important, more demanding, and more complex.

What I can share with you from my own specific vantage point in Congress is the general sense of the landscape after Lebanon—the atmosphere and mood in Washington against which we must all measure our present and future purpose. It is an atmosphere that contains much speculation but little information. There has been all too much sensationalism and simplification of events. The media have presented us more with the spectacle of conflict than the search for meaning. But clearly the stakes of this historical moment are high indeed. And so, I would say, it is time for the passion and fury of recent months to quiet, and yield to sober reflection and judgment. It really is time to think.

I can tell you, first of all, that no event in Israel's history has affected public and congressional opinion more intensely than the conflict in Lebanon. To be honest, I must also say that the effect in the short run has been negative. In the short run, I'm not measuring this in public opinion polls, though they confirm it. I have in mind scores of personal conversations with trusted friends and colleagues—informal and genuinely candid exchanges in the halls of Congress, as we talk together in relative privacy. It's been very hard. Old friends have been shaken, potential allies put off. Again and again, I found it necessary to urge colleagues to wait, to reflect, to look at the larger picture, to consider the long-run.

However, as two factors emerge from the fog of sensationalism, I fully expect that the mood in Congress will shift. First is the extraordinary and exemplary behavior of the people of Israel. Their soul-searching, their honesty, their passion for justice, and their willingness to draw meaning from the painful events—all have reinforced our common ethical and democratic values. In their willingness to ask hard questions of themselves, the Israeli people have reminded Americans of what is best in ourselves, and in shared political and moral legacy.

Insofar as all of us have participated in that process—Jews all around the world—I think we have reason to be proud. It hasn't been easy. All of you know this, from experiences in your own communities, with your own friends and associates. But it is a processs that has strengthened us, and we will look back on this period as one of deepened understanding and moral resolve. In this, the people of Israel, once again, have made a statement to the world—one, perhaps all of us here today should acknowledge and affirm.

To this reaffirmation of the morality of the Israeli people, we must add the new geopolitical realities of the region brought about by recent events. The northern borders of Israel are now secure from relentless terrorism. There is peace and stability for the tens of thousands who have lived so long with the fear of death. The army of terrorism—the PLO—has itself been routed and split apart. So, too, the weakness of the rejectionist Arab states and their failure to enlist others in their cause has been dramatically exposed. Fanaticism in the Arab world has proven to be a vehicle for suicide. The Soviet Union has been discredited as a protector of the Arab bloc. A stable and peaceful Lebanon—once merely a pipe dream—is now at least a possibility. And finally, perhaps most important, Israel has secured a genuine opportunity to conduct peaceful negotiations from a position of strength.

Here the picture is more difficult to read. I believe that present circumstances present a relatively unique occasion for diplomatic progress. But I think it would be a mistake to ignore the complexity of the moment, and the difficulties which lie before us.

Clearly, after Lebanon, the way of war has never seemed less promising to thoughtful, moderate Arabs. But they will only come forward if they are encouraged to do so—not with false promises and gestures—

but with tough-minded actions by the United States to make clear the potential rewards of peace and the consequences of failure.

And what of Israel? While the ultimate decision lies with israel, her friends can, and should, contribute to the dialogue with a vigorous assessment of the choices. This is both proper and productive and a source of strength—not of division.

I do not believe that it is ultimately in Israel's interests to rest with the status quo. I think it is in her interests to build through aggressive diplomacy upon what has been achieved through painful conflict. Camp David proved that.

There are those—and they have, as always, considerable influence in official Washington—who see negotiations primarily as a means to court the oil-producing Arab nations, not to bring about a just peace. Israelis and their friends are not wrong to be suspicious of calls for negotiations coming from such quarters. And I can assure you that we who stand for Israel in Congress will be outspoken when such peace plans are discussed with us, formally and in private.

For American Jews this approach adds yet another dimension of complexity. How do we see our role, caught between different degrees of allegiances, in the midst of an enormously complex situation?

The present job of the American Jewish community, it seems to me, is twofold. We must stand united in our unswerving support for the state of Israel itself. And we must keep the American government principled and honest in its role as Middle East negotiator.

That means saying Yes to Camp David, but No to the participation therein of the PLO. That means saying Yes to conciliation, but no to any effort which does not begin with Arab recognition of Israel's right to exist—a simple recognition of reality, and not some diplomatic concession to be rewarded in kind.

And it means saying Yes to the Reagan Administration's desire to advance the process of peace, but No to any effort to write the script of a settlement in advance.

I take a dim view, for example, of efforts to tell Israel what her borders ought to be, or wherein her security truly lies. And I take a dim view of welcoming an Arab delegation with pomp and geniality, while the Administration prepares for the visit of Prime Minister Begin by leaking stories of its intention to reprimand him. This is not the course of peace, and we must be forthright in saying so.

Matters like these make all the more clear how important the U.S. Congress is to the future of Israel. When the history of this period is written, I believe the importance of Congressional independence will be even more clear.

Again and again, congressional action has been necessary when the Executive branch has tilted toward Arab nations. I have had to help initiate such action all too often in my twenty years of service and activity on the Foreign Affairs Committee.

In 1967, we had to pressure President Johnson to speed up deliveries of Phantom jets to Israel. A year later, we had to push President Nixon to make good on a similar sale. In 1975, President Ford ordered a punitive "reappraisal" of relations with Israel, which was not terminated until Congress expressed its clear displeasure. That same year, we had to fight the sale of Hawk missiles to Jordan. In 1977, we had to attack President Carter's proposal to convene a peace conference jointly with the Russians. And you all remember the bitter fight over the sale of AWACs to Saudi Arabia.

The U.S. Congress must be a watchdog for the interests of Israel in any peace process initiated by the U.S. government. And the job of organizations like yours, quite frankly, is to make sure the watchdog is awake.

In coming months, I think such action will be critical. There are too many signs that the administration feels peace in the Middle East requires pressure on Israel. It won't work, and it's not just. Initiative must now come from moderate Arab leaders, recognizing their own self-interest and the clear facts of life in the region. We are at a point—and I say this with great respect for the difficulties—where Arab leaders and people must make a decision of their own, A decision about their own history, their own future, their own identity. The rest of us—Israelis, Americans, Jews—can respect that decision, and make it clear that the course of genuine reconciliation will be rewarded.

The challenge, then, is to be both tough and patient, smart and open. We must be tough about any effort to impose peace, but patient with the process itself. We must be smart in judging how best to conduct negotiations, but we must be open in appreciating the difficulties facing moderate Arab leaders. They face no small task. Everyone saw what it meant for Anwar Sadat.

So too, we must be patient and open with ourselves. Recent events have shown us that even the most painful episodes can be shared and pondered without in any way weakening our essential commitment to Israel. This is an important lesson. There is no reason why it cannnot be applied to the great debate which must now begin over terms for peace in the Middle East.

For my part, I want to assure you that Israel's friends in Congress will remain vigilant. No major initiative, no policy decision, no diplomatic effort will be made without our participation. And, in turn, we will take no steps ourselves without talking to people like you, whose strength and wisdom is so much a source of our own. We have not come this far, and gone through this much, to allow Israel's security to be compromised by America's diplomacy. I am convinced that this will ultimately promote, not prevent, the chances for peace in the Middle East.

To all of you, meanwhile, my thanks for myself and for may colleagues in Congress. I cannot tell you how important it is to know that you are here—active and committed and thoughtful—and how important it is to all of us that you continue your good and hard work.●

TRIBUTE TO MARY MASON

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FOGLIETTA. Mr. Speaker, I would like to enter into the RECORD a copy of a statement I made at a recent dinner honoring Mary Mason, a fellow Philadelphian and an outstanding journalist.

Whereas Mary Mason is celebrating twenty-five years of broadcasting and community service;

Whereas she has been an asset to her community, by working to build strong families and proud neighborhoods;

Whereas she has been an inspiration to young people throughout Philadelphia by advocating the truth and by fighting injustice;

Whereas Ms. Mason enjoys an excellent national reputation for fairness and high quality in broadcasting; and

Whereas she has freely given of her time, her energy, and her personal resources to help others: Now, therefore do I

Commend Mary Mason before the United States House of Representatives, in recognition of her outstanding work and the shining example she has set for her fellow Philadelphians and all Americans.●

A TRIBUTE TO GORDON D. SCHABER

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MATSUI. Mr. Speaker, it is my honor and my pleasure to officially recognize the outstanding contributions of one of America's finest legal educators, Gordon D. Schaber, who has completed 25 years of leadership as dean of the McGeorge School of Law, University of the Pacific, in Sacramento, Calif.

When he began his tenure in 1957, Gordon Schaber was the youngest dean of a law school in the United States. He is now senior in years of service to any other current law school dean in our country.

Dean Schaber has pursued a distinguished and many-faceted career in his profession. After receiving his law degree from the Hastings College of Law in San Francisco, he was in private practice as a partner in the firm of Schaber & Cecchettini in Sacramento from 1953 to 1965. From 1965 to 1969, he was presiding judge of the Sacramento County Superior Court. And in 1970, after serving part time as dean and professor of the McGeorge School of Law for 13 years, he retired as presiding judge to devote full time to the school.

Complementing Dean Schaber's professional activities has been his service with over 40 boards, commissions, foundations, and committees at the city, county, State, National, and international levels. He is currently serving as chairman of the section of legal education and admissions to the bar of the American Bar Association.

Standing as a testimonial to the quality of service Dean Schaber has rendered to McGeorge Law School is the distinguished faculty he has attracted to the institution in his quarter century of service. Teaching at McGeorge are 50 full-time and about the same number of adjunct faculty members drawn from the local bench and bar. The school now boasts of

almost 4,000 graduates, a great many of whom have been educated during Dean Schaber's tenure.

On October 28, 1982, Gordon Schaber was honored with a silver anniversary testimonial dinner, organized by an appreciative Sacramento community. He was also honored by a resolution adopted by the California Senate and Assembly.

I am sure that all Members of this Congress will join me in paying further tribute to one of America's truly outstanding legal educators, Dean Gordon D. Schaber.●

PRIVATE VERSUS PUBLIC AGAIN, SLOPPILY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SIMON. Mr. Speaker, Albert Shanker, president of the American Federation of Teachers, has a weekly column in the New York Times, a column which is paid for by the Federation of Teachers. But unlike most advertising, it is frequently thoughtful and worth reading with care.

Recently, he had a column in response to an article in the New Republic that said some things that need to be said.

I urge my colleagues to read his column.

WHERE WE STAND

(By Albert Shanker, President, American Federation of Teachers)

Coleman Revisited, With a New Twist

PRIVATE VERSUS PUBLIC AGAIN, SLOPPILY

A large part of the problems facing our public schools comes from sloppy thinking, reporting and writing in the press. The latest example is in one of our nation's best weekly magazines, The New Republic. The November 1 cover story is "Lessons for the Public Schools," by Phil Keisling. Inside the magazine the title is "How To Save The Public Schools," and it turns out to be a review of a somewhat updated version of the discredited Coleman report on private and public high school achievement which first received public attention a year ago.

The Coleman report claimed that students in private schools, even though such schools pay their teachers less and often have larger class sizes, achieve more. Keisling cites the vast body of professional rejection of the Coleman report, including the judgment of Professor Arthur S. Goldberger of the University of Wisconsin that the report "reeked of incompetence and irresponsibility." Keisling also notes that "Coleman doesn't fully account for the effect on a child's achievement of having parents who care enough about education to begin with that they're willing to pay private school tuition." And he points out that Coleman's major conclusions do not show the superiority of private schools but, rather, that those private and public schools which give rigorous courses, require homework, enforce discipline and emphasize academnic subjects produce students who are better in academic areas—a conclusion which is as close to the obvious as one could get.

You would think that, at this point, Keisling would press for most public schools to change in the ways indicated in order to improve student achievement, and he certainly does this. But he also has an additional agenda of his own.

He criticizes the Democrats for stressing two items in their program—opposition to tuition tax credits and greatly increased spending for education. He agrees that tuition tax credits are bad, but he says that we've already increased spending tremendously without improving quality—an opinion which flies in the face of clear evidence showing that the prime targets of federal spending on education, disadvantaged children, have profited handsomely from this attention.

He places blame for educational failure in the public schools on the quality of America's 2.2 million teachers. He points to the inability of teacher training institutions to attract more gifted college students, and he also notes the fact that many talented women who in the past became teachers are no longer entering teaching because they have many other opportunities open to them. Ironically, the very same Keisling who a few lines earlier argues against increasing expenditures for education, here suggests the opposite—paying teachers more. He says: "Something is seriously amiss when a society gives more financial reward to those who hunch over a convoluted legal brief, in search of some new obstructionist tactic to use in an obscure contract dispute, than to those who teach a child to appreciate the eloquence of the written word or the elegance of mathematics." The priorities are right but the thinking is muddled. You can't reward teachers better and thereby attract better teachers unless you upgrade spending—not vastly decrease it as the Reagan Administration has done.

He says big culprits in educational failure are tenure systems and the existence of strong unions. Keisling here perpetuates the myth that it's all but impossible to fire tenured teachers, citing as "evidence" the information that in the last six years, "Philadelphia has dismissed only 24 of its 13,000 teachers." Private schools are better, Keisling suggests, because they can get rid of poor teachers. What's wrong with this? Simply that he has no evidence at all. The Philadelphia figure is phony. He's talking about 24 teachers who decided to fight their dismissal—not about the hundreds who, warned by the principal, left of their own accord . . . or the hundreds who, unable to control a class of 30 or more pupils or overcome by the stress of several years of teaching, opted out. Also, Keisling has no evidence that private schools dismiss teachers with any greater frequency than public schools. In fact, some teachers who are unable to make it in public schools succeed and stay in private schools where they don't have to deal with students who are tough discipline problems.

It always amazes me how those who attack teacher tenure and teacher unions fail to tell us how wonderful the teachers are and how marvelous the student achievement is in states where there are no tenure provisions or strong unions. Have schools been better, for example, in Texas, where there is no tenure and where collective bargaining is just beginning, than in New York? Or California? Again, the evidence doesn't support the conclusion Keisling reaches.

He also blames layoff by seniority for the public schools' deficiencies. But he doesn't suggest another system which would not further damage teacher morale—and make it even more difficult to hire good new teachers. With teacher layoffs a fact of life all around the country every year, who will enter teaching unless down the line, after the career investment has been made, there is some reason to feel secure?

Keisling would have done better to stick to the agenda the research—Coleman's and others'—suggests. We have to get back to a rigorous academic program and enforce discipline. (Keisling correctly points out that it takes only "a few disruptive students to poison the learning atmosphere for everyone" and suggests that many such students "should be removed from regular classrooms so that teachers can focus their energies on students who've shown a willingness to learn.") And, if we have adequate salary incentives to attract good people, test teachers before they're hired, appoint management with the guts to weed out those who, even with help, don't shape up during the probationary period—we'll have the staff Keisling wants. Tenure, seniority and strong unions aren't the obstacles. What's been going on is a failure of will.●

IN RECOGNITION OF TIM MEISTER, LIMA, OHIO

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. OXLEY. Mr. Speaker, in these times when it seems that so much news is bad, I would like to share with my colleagues a good news incident which occurred in October in the Fourth District that I represent. It is the story of a heroic and successful effort to rescue the life of a small boy.

During dinner one night, 2½-year-old Danial Spence began choking on a piece of chicken. First aid administered by the child's parents, Gale and Anthony Spence, proved unsuccessful as Danial stopped breathing completely, turned black, and went into convulsions. By this time, having reached the early stages of panic, Mrs. Spence rushed her child outdoors in the desperate hope that fresh air would alleviate Danial's condition or that someone would appear who could miraculously save Danial's life.

As she stood on the street, clutching her child and screaming for help, more than a dozen cars drove by, occasionally honking their horns, but offering no help. Finally, a passing driver, Tim Meister, recognized the severity of the situation and performed the miracle Mrs. Spence had hoped for. Almost before Mrs. Spence realized what was happening, Tim managed to dislodge the bone in Danial's throat and Danial began breathing again. Almost simultaneously, an ambulance appeared at the scene, but Mrs. Spence's "knight in shining armor" had disappeared. Mrs. Spence later learned through a

relative of Tim's that it was he who had saved Danial's life.

Tim Meister is truly an individual worth of commendation. He is a person who cares about others, even strangers to him, enough to become involved in their lives. Had he not stopped to help Mrs. Spence, Danial would certainly have choked to death. Mrs. Spence is exceedingly grateful and thankful for Tim's willingness to help. "There should be more people like him in the world," she commented. "I don't know how many cars went by honking horns. He was the only one who stopped and cared enough to help."

It is important to recognize Tim as one whose horizons extend beyond his own personal interests. I admire him greatly for his courage, understanding, and willingness to become involved. I know my colleagues will be proud to join with the Spences and me in expressing our respect and gratitude to Tim Meister of Lima, Ohio.●

INTEREST AND DIVIDEND WITHHOLDING IS BAD LAW

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. D'AMOURS. Mr. Speaker, during the weeks that this Chamber has stood in recess, private citizens have continued to debate the desirability of requiring financial institutions and others to withhold the Federal tax due on interest and dividends. I am pleased to see that the withholding issue is receiving great attention in private sector debates, where true experts and objectively assessing the merits of withholding.

I would like to bring to the attention of my colleagues the views of one expert in the operations of our Nation's credit unions: John J. Hutchinson. Mr. Hutchinson, who is the president of the National Association of Federal Credit Unions (NAFCU), is also manager of Hamilton Standard Federal Credit Union in Windsor Locks, Conn. In his dual capacity as president of a national organization and also as manager of a moderate-sized credit union, Mr. Hutchinson is in the unique position to be able to address not only the public policy reasons to repeal withholding, but also the day-to-day operational reasons why withholding should be repealed.

I ask that a letter from Mr. Hutchinson, which appeared in the New York Times of November 16, be inserted at this point.

LETTERS: INTEREST AND DIVIDEND WITHHOLDING IS BAD LAW

WASHINGTON, *November 9, 1982.*

To the Editor:

On behalf of the National Association of Federal Credit Unions, I must strongly disagree with your Nov. 9 editorial "Withholding, in the Public Interest." Withholding of the taxes owed on interest and dividend income is not in the public interest. It is bad law and will penalize individuals who wish to save.

You state that withholding is "not a new tax." It will indeed be a new tax for a large segment of the taxpaying public.

About 75 percent of all individuals filing Federal tax returns receive refunds. Through over-withholding on their wages, these people already have the taxes due on their interest and dividend payments set aside. For them, withholding is a new tax. Also, the government will be getting an interest-free loan for several months at the expense of individuals, who will lose the benefits of compounding for some of the interest or dividends due on their accounts.

You correctly note that "the exemptions will create their own problems." The exemption system as provided under the act will be complicated and costly. It is optional, and many small financial institutions may be unable to offer exemptions because of cost burdens. In addition, it will not be easy to explain the exemption system to qualifying individuals, who will be required to file an exemption certificate with each institution from which they receive interest or dividends.

You indicate that withholding of taxes on interest and dividends will help balance the budget, but the revenue from withholding will not be as great as has been predicted.

During the debate on the 1982 tax act, the Administration argued that withholding will bring in $4 billion in fiscal year 1983: However, this figure ignores both the exemption system and the delay in the start-up date (to July 1, 1983). As a vast number of accounts credit interest or dividends quarterly, the delay in the effective date means that for many accounts withholding will not start until the beginning of fiscal year 1984.

Furthermore, the cost to financial institutions of implementing the withholding program may well exceed the added revenues. And that cost will of necessity be passed on to savers and borrowers. This is particularly true for credit unions, which are cooperative, member-owned institutions. Thus, their members may in effect be subjected to double taxation.

You maintain that "blatant evasion undermines the whole tax system." I could not agree more. However, let's look at who is evading.

The Internal Revenue Service confirms that there is a 96.7 percent voluntary compliance rate for the reporting of taxes owed on interest and dividends from financial institution accounts and stock holdings. Financial institutions report interest and dividend income paid out to account holders on Form 1099. However, the Treasury does not have such a reporting system for the bonds, notes, etc., that it sells, and reporting compliance is much lower for holders of these obligations.

In response to your question "What substitute would the repealers propose to keep the Federal deficit from growing even larger?" we recommend that Congress require the Treasury to report to the I.R.S. the interest paid on its obligations and to send copies of the reports to the individuals receiving the payments, as financial institutions are required to do.

Financial institutions, including credit unions, are eager to do their part to support our American system and to help get the economy back on its feet, but a costly withholding system that will not accomplish its objectives is not the answer.

JOHN J. HUTCHINSON,
President, National Association Of Federal Credit Unions.

Mr. Speaker, I applaud Mr. Hutchinson for the responsible manner in which he addresses the issue of withholding. As my colleagues know, I fully agree with the National Association of Federal Credit Unions that "withholding of the taxes owed on interest and dividend income is not in the public interest. It is bad law and will penalize individuals who wish to save."

Withholding on interest and dividend income is not the answer to America's financial problems. In fact, it is a classic example of "overkill." There are simpler ways of addressing the issue of tax evaders than the imposition of withholding. I urge my colleagues to commit themselves to a reexamination of this controversial issue. Any Members wishing to join with me and 66 other Members of this body in calling for the repeal of withholding on interest and dividends are invited to cosponsor H.R. 7108.●

LEGISLATION TO ESTABLISH A COMMISSION ON THE BICENTENNIAL OF THE CONSTITUTION

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. CONTE. Mr. Speaker, I am today introducing legislation to provide for the establishment of a Commission on the Bicentennial of the Constitution. The Senate passed a similar bill in the closing hours of the session that ended October first.

September 17, 1987, will mark the 200th anniversary of an important day in the world's history—the bicentennial of the day the Constitutional Convention adopted our Constitution. This bill would establish a Commission to plan appropriate celebrations for, and study events leading to, the ratification of the Constitution.

This important date is less than 5 years away. In order for any commission to fully study the important events leading up to the Constitution's ratification—the Mount Vernon Convention, for example—we need to pass this bill now, in the lameduck session. Sometimes, I think, we tend to forget the importance of this date. Our Nation's real birthday is September 17. July 4, 1776, was the date the Declaration of Independence was signed, and who can ever forget those eloquent challenges: "We hold these truths to be self-evident: That all men are created equal, that they are endowed by their creator with certain unalienable

rights, and that among these are life, liberty, and the pursuit of happiness."

Thus, the Declaration provided the end goal of what 13 separate and distinct Colonies would and should become. The Constitution provided the means to achieve those goals. Two hundred years from when that document was signed, we should be able to have the resources and the abilities to see how far we have come to achieve those purposes. This Commission will provide those resources and abilities to do that.

On the Centennial of the Constitution, President Grover Cleveland said:

If the American People are true to their sacred trust, another centennial day will come, and millions yet unborn will inquire concerning our stewardship and the safety of their Constitution. God grant that they may find it unimpaired, and as we rejoice today in the patriotism and devotion of those who lived 100 years ago, so may those who follow us rejoice in our fidelity and love for Constitutional liberty.

Let us start now to live up to the sacred trust Grover Cleveland spoke of in 1887. Let us pledge that millions of Americans yet unborn will celebrate the tricentennial of this historic document that gives hope and faith to all of the world. Let us begin now to plan for 1987, and for those yet to come. I urge my colleagues to cosponsor this bill, and help to get it passed in the 97th Congress.●

COLONEL ROSS DAVIDSON, HONORARY CONGRESSMAN

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MATSUI. Mr. Speaker, I am pleased today to recognize the many achievements of one of Sacramento County, Calif.'s most accomplished citizens, Mr. Ross Davidson of Carmichael, a retired U.S. Air Force colonel.

To compliment a host of other "honorary" titles that have been bestowed on Colonel Davidson, it is my pleasure to designate him as Honorary Congressman from Carmichael.

Now a successful real estate developer in our community, Colonel Davidson served with the Air Force in a career that spanned 28 years and three wars. He commanded several tactical units, including Sacramento's only combat unit in southeast Asia during the Vietnam war, where his performance won him many honors, including the coveted Legion of Merit. During his career, he received 49 U.S. and foreign awards and decorations.

During his service as a combat pilot in both World War II and Vietnam, Colonel Davidson flew 87 missions, having his aircraft damaged by enemy fire during 30 of those missions.

This designated Sacramento County citizen served 6 years in exploration of the North Polar Basin, and, along with Admiral Byrd and Admiral Peary, is a member of the world renowned Explorers Club. As deputy joint services project officer for the distant early warning line (Dewline), he was in charge of constructing and testing a $1 billion chain of radar stations across 3,000 miles of Arctic wasteland, from Alaska to Greenland, an undertaking previously considered impossible.

While stationed at Mather and McClellan Air Force Bases in the Sacramento area and after his retirement, he has served on many governmental and civic boards and commissions, at the city, county, and State level. He has been president of two State advisory commissions and the Carmichael Chamber of Commerce.

He was the first honorary mayor of Carmichael, serving six terms, and now holds the title, honorary mayor emeritus in perpetuity. His other honorary titles include: honorary district governor of Carmichael—by the Sacramento Board of Supervisors—honorary judge for the State of California; honorary fire chief of Carmichael; honorary Sacramento County deputy sheriff; honorary watermaster of the Carmichael Water District; and honorary superior court judge for the county of Sacramento. He has also been honored in resolutions by the California State Senate and the Sacramento County Board.

In consideration of his outstanding service to his community, State, and Nation, I hereby designate Col. Ross Davidson as honorary Congressman from Carmichael.●

THE RETIREMENT OF DR. JOSEPH SHELTON COPE, M.D.

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SKELTON. Mr. Speaker, on Friday, November 5, 1982, Dr. Joseph Shelton Cope, M.D., retired and ended a career of 50 years of serving people in west-central Missouri.

Dr. Cope's record of service to his country and his community is one we all should strive to emulate. He received his doctorate during the Depression of the 1930's. His academic achievement earned him cum laude honors as he finished sixth in his class. He began his career of service by working in the Civilian Conservation Corps as a medical service director.

Dr. Cope also served in this country's Armed Forces. He joined the Army Reserve in 1933 and was called to active duty in 1942.

In the years since World War II, Dr. Cope has practiced his profession in a distinguished manner. He has worked in several medical organizations including the American Medical Association and the Missouri State Medical Association. He is a fellow of the American College of Surgeons, a founding member of the Southwest Surgical Congress, a member of the Missouri State Surgical Association, and has served on the State Board of Registration for the Healing Arts. He also served recently as vice president of the Missouri State Medical Association.

With all of the honor and acclaim which has come to him through the years, it is particularly noteworthy that in a recent interview Dr. Cope stated, "My greatest honor has been to be able to take care of people who need help with the realization that I have been helpful to someone whether they can pay for my services or not."

It is my pleasure, Mr. Speaker, to join the people of Lexington in wishing Dr. Cope a long, beneficial retirement. He has served us well.●

THE GREEN MOVEMENT

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. YOUNG of Alaska. Mr. Speaker, as we convene for this short session of Congress, the plight of the unemployed worker in America is on all of our minds. Many of the solutions that have been mentioned deal with the construction of new transportation infrastructure and the maintenance of decaying existing roads and bridges. I urge my colleagues to remember that the cement and the reinforcement rods and the metal for the bridges are all products of one indispensable industry—an industry suffering today not only with the burden of a recession, but further weakened by constant attempts to shut it down by a group of Americans apparently unconcerned with the American worker. I speak of the professional environmental community in the United States.

This group has consistently mouthed concern for the poor and the economically displaced in this country, while seeking to thwart development that would better the lives of those who are at the bottom of the economic ladder. They forget that the business interests they continue to degrade are the very institutions that employ people, and allow people to better their lot in one of the last places on Earth that still allows upward mobility.

They are antimining, antipersonal automobile, antiwater projects, antinuclear power, antioil and gas drilling, anticoal, and quite frankly, antihuman. They forget that God has granted this Nation a wealth of natural resources and a system that allows

people to better themselves through their own hard work. He did not intend for us to deny ourselves the wealth of our land or of our brains, yet today these groups do exactly that, by rejecting the science of geology and substituting Lysenkoism that not only rejects science, but does so at the cost of thousands of American jobs in productive enterprises. To think that a relatively small group of Americans would place a higher price on having their own playgrounds on the public lands at the expense of the economically displaced in America is unconscionable to me, and I will continue to work with the conservationists in America to reject the economic stagnation and "small is beautiful" notions of these preservationists.

I would like to insert into the RECORD a copy of a recent paper written on the "Greens" in Europe and the United States by J. Allen Overton, president of the American Mining Congress. Mr. Speaker, we cannot have jobs if we do not develop our resources.

[From the Mining Congress Journal, November 1982]

THE GREEN MOVEMENT

(By J. Allen Overton, Jr., President, American Mining Congress)

The so-called Green Movement has been on the upsurge in Northern Europe and reached its apogee to date in the recent elections in the West German state of Hesse, when it displaced the Free Democrats as the third largest party behind the two traditional leaders. If the trend continues there and elsewhere, it could portend real instability in the governance of nations.

Those whom the Europeans call the Greens began very much like the early environmentalists in the United States, and they echoed the same calls for a new dedication to ecological responsibility, which was laudable in its aims and admittedly overdue. The movement has evolved, however, into what *The Economist* recently described as a "misty mixture of anti-nuclearism, anti-growth environmentalism and incipient neutralism."

The same tendency, unfortunately, is increasingly evident in this country and could produce a bad skewing of social and economic policies and the conduct of foreign affairs.

It is ironic and tragic that the same people who preach no-growth economics also proclaim their solicitude for the underprivileged and the need for a more congenial society. They speak of creating more and better jobs, humanizing the workplace, using new technologies to render life and labor more pleasant, building schools and hospitals and decent housing, and rebuilding the dilapidated parts of the nation's infrastructure.

How, one must ask, are these things to be done, if we establish a public policy of permanent stagnation? Most assuredly they will never be achieved without an abundance of minerals, yet the Greens of this country are implacable in their hostility to the mining industry.

Likewise, they affirm a fierce attachment to individual rights and political freedoms, but they have a nonchalant disregard of the national security posture needed to defend them and a naive faith in the goodwill of America's adversaries. Consequently, the Greens feel safe and comfortable in denouncing the industrial might, military arsenal and minerals development of the nation, which are the very things that allow them to be safe and comfortable.

The sham of all this should be readily apparent, but the movement evokes warm support from the many people who yearn for simple answers in a complicated age. Moreover, it draws on enormous resources.

First, there is money, which has aptly been called "the mother's milk of politics." The myth is still fostered that the environmentalists are a ragged little band working out of storefronts, while corporations ladle out funds from fat war chests. The facts are quite different.

Many corporations are on the financial ropes today. On the other hand, a recent article in Fortune lists 14 organizations under the heading "The Green Lobby" and shows them to have aggregate budgets this year of $92 million. Obviously lucre isn't considered filthy in the right hands.

These organizations are headed by full-time professionals who are highly skilled at raising money by appealing to people's best instincts and worst fears. Indeed, they have to be skilled at it, if they are to pay their own salaries.

Next there are people. The groups listed in Fortune have a combined membership of nearly 5½ million, highly organized and orchestrated in a network that stretches across the country and covers rural, suburban and metropolitan communities. They are devoted to their cause and diligent in advancing it, as was shown not long ago when one congressman felt the need to buttress his re-election campaign. A call for help immediately brought out 150 environmentalists to walk door to door buttonholing the voters.

These are people who vote, volunteer and push their friends to do the same. When one considers that the turnout at the polls in nonpresidential elections has dropped to nearly one-third of the eligible electorate (much less in many crucial primaries), it becomes clear that the movement exercises tremendous political clout, and the Greens are basically a one-issue pressure group that is unforgiving in applying its own strict litmus test to determine its friends and foes.

Finally, the leaders of the movement are adept in the arts of polemics and proganda. They can be shrill and strident with denunciations and seductive with appeals, invariably managing to draw issues and choices in the most stark black and white terms. They are clever with slogans and oversimplifications and superb when it comes to manipulating the media.

A visual medium like television suits their purposes well, because it lends itself to vivid dramatizations and arguments that can be encapsulated in a 40-second film clip. Industries such as mining are hard put to respond, because often the responsible reply involves scientific studies, engineering data, economic analyses, statistical compilations, technological explanations and other things that are considered too dull or lengthy for the evening news.

The mining industry, among others, has no easy way to counter the Green Movement. I certainly have no magic formula to suggest, but can only reiterate the frequent plea that we stir ourselves to political activism and work harder at promoting public enlightenment.●

DENSEPACK—MOVING TARGET FOR ARMS CONTROL

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MARKEY. Mr. Speaker, the Reagan administration's decision to base the MX missile in the Densepack basing mode marks the greatest leap into the unknown this administration has yet taken with nuclear weapons.

In effect, the administration has decided to spend $26 billion on a basing scheme that rests on the theory of fratricide and the thin hope that the Soviets will not overcome it any time soon. I commend to my colleagues an article by R. Jeffrey Smith from the October 1982 issue of Arms Control Today. As Mr. Smith notes, it is only a matter of time before the Soviets would develop a way to overcome Densepack. Consequently, the Densepack deployment will only start a new round of the action-reaction arms race between the United States and the Soviet Union.

It is now incumbent on the Congress to reject Densepack because, first, it does not solve the problem of ICBM vulnerability, second, the Densepack deployment merely heats up the arms race and third, the MX missile itself is a first-strike weapon that contributes nothing to the retaliatory capacity of this country.

Mr. Smith's article follows:

[From Arms Control Today, October 1982]

DENSE PACK—MOVING TARGET FOR ARMS CONTROL

(By R. Jeffrey Smith)

To those who have followed all but the latest developments in the debate on the MX nuclear missile, President Reagan's forthcoming decision in favor of a basing mode known as Dense Pack may seem ridiculous. Since the late 1970's, a central justification for the MX has been the need to ensure that land-based missiles can be protected from Soviet attack. Yet it is impossible to know if the MX, deployed in Dense Pack basing, will be secure from attack.

The requirement for missile invulnerability arose from concern among some weapons experts over increased Soviet missile accuracy, which would supposedly permit the destruction of the existing Minuteman missile force in a Soviet first strike. Dense Pack is the latest in a long string of ideas conceived to address this problem. Superficially, it is an attractively simple idea. One hundred MX missiles will be deployed in 100 silos. The silos will be spaced less than 2000 feet apart, so as to increase the likelihood of so-called warhead fratricide—the tendency of one warhead to destroy or deflect another when it detonates, through the release of radiation, the production of intense pressures, or the elevation of dust and debris.

Fratricide can be avoided if the attacking warheads are timed to detonate within milliseconds of one another, a technical demand that U.S. weapons experts say the Soviets will be unable to meet for many years. It

can also be avoided through the use of only a few extremely high yield warheads capable of destroying more than one silo each. But U.S. weapons experts say that Dense Pack silos can be constructed so as to survive the effects of all but direct hits. The steel exteriors will be made to deform in response to short-term pressure peaks. Power cells and communications may be protected. Enormous amounts of sand and porous concrete will be used as shock absorbers, and a cap of earth or water may be used atop each silo opening.

There are, however, several other potential ways of defeating Dense Pack. One possibility, which the Soviets could attempt by the early 1990's, is to attack with low yield maneuvering warheads capable of pinpoint accuracy. The Air Force says that these would be vulnerable to countermeasures such as electronic jamming or a simple form of silo defense, which the United States could deploy by then.

An even better alternative, also possible in the early 1990's, is for the Soviets to use warheads that penetrate the earth or land softly on the surface. Earth penetrators avoid fratricide by simply burrowing into the earth before detonating, a tactic that minimizes the dispersal of radiation. Soft landers act as surface mines. They can be fused to detonate simultaneously, before any U.S. missiles are launched, or singly, at the moment each missile is launched. The Air Force maintains that soft landers and earth penetrators could be destroyed by a ballistic missile defense, because they must be launched in clumps and must slow considerably after reentering the earth's atmosphere. One weapons official seriously insists that earth penetrators can also be defeated by rolling tremendous boulders into the space between each silo, inhibiting penetration.

A final strategy available to the Soviets is the detonation of many warheads in a rapid sequence over the Dense Pack missile field, which would generate such a storm of radiation and blast effects that the MX could not survive after launch. It would then be feasible to drop warheads onto, say, every third silo, so that fratricide is diminished. The high-altitude detonations, or "pin-down," could be maintained until all of the MX are destroyed. Kent Johnson, a physicist at Lawrence Livermore National Laboratory, recently served on a Defense Department panel that analyzed "pin-down" and other attack strategies. He points out that a "pin-down" may not be in the Soviet Union's best interests, because it would require the use of many weapons and result in the destruction of only a portion of the U.S. arsenal. He notes that "there is no way of breaking the pin-down," short of disrupting the attack with a ballistic missile defense or a similar pin of Soviet silos by missiles launched from U.S. submarines. This is a remarkable suggestion, because the Air Force has previously claimed that each leg of the U.S. strategic triad must be capable of surviving on its own, and that submarines could not be depended on for quick retaliation against a Soviet attack.

The most optimistic outcome of these estimates is that some—but not all—of the MX in Dense Pack silos would survive for an hour or two. Eventually, all missiles that are not launched promptly will perish. Even this temporary survivability depends on a set of theoretical assumptions. The first of these has to do with the magnitude of fratricide. Two warheads have never been detonated simultaneously above ground, so U.S. estimates are based entirely on computer models. The second has to do with the speed with which the Soviets can deploy threatening means of attack. Soviet technical progress can be forecast with some assurance, but the United States has been wrong in its estimates before. A third assumption is the speed with which the United States can deploy countermeasures, which depend on new inventions in difficult areas. For example, some form of ballistic missile defense will be essential to the survival of Dense Pack within a decade. Major General Stewart Meyer, a former director of the Army's BMD program, believes that construction of a successful defense will be enormously difficult because of the inherent expense and vulnerability of the radars on which such a system depends. Another assumption is that the silos will actually withstand high yield explosions. Eugene Sevin, a top scientist at the Defense Nuclear Agency, believes that the requisite silo hardening "is probably workable." But he cautions that realistic tests of a superhard silo will be impossible. He says that any decision on Dense Pack will be "highly judgmental."

The Air Force response to this uncertainty is to emphasize the flexibility of Dense Pack: more silos can eventually be constructed to deceive Soviet targeters. A missile defense can be constructed in 1989 if necessary, Air Force officials say. Only two conclusions seem possible amidst such speculation: first, that construction of a Dense Pack will draw the United States and the Soviet Union into a new spiraling arms race, as one side reacts and the other attempts to anticipate the reaction; and second, tensions could develop at any point if the United States stumbles and the Soviets advance.

All of the uncertainties extend to the diplomatic arena as well. Dense Pack may violate provisions in the unratified SALT II treaty barring the construction of new missile silos. But the Administration intends to assert that the silos are not silos at all, but merely missile shelters, or temporary resting places for missiles that are inherently mobile. The Soviets will protest, with good reason. No one knows how this dispute will affect the ongoing START negotiations. Similarly, deployment of a missile defense will violate provisions in SALT I requiring it to be located either at Grand Forks, N.D., or Washington, D.C. The Air Force is optimistic that the Soviets will agree to an amendment transferring the permissible missile defense from Grand Forks to the Dense Pack location, wherever it may be. No one can predict what concessions the Soviets will seek in return.

Why is the Administration willing to spend $25 billion (in constant dollars, not including missile defense costs) on a system of uncertain political or strategic value? The answer is that, despite a contrary public impression, the Pentagon believes the MX is valuable even if these predictions are all wrong—even if the MX cannot survive in Dense Pack basing. This becomes evident from a close study of congressional testimony on the MX.

In 1976, for example, members of Congress asked Pentagon officials if concern for the vulnerability of existing ICBMs was the primary factor pacing MX development. No, the Pentagon said. The primary pacing factor was the increasing invulnerability of Soviet targets, a circumstance that could best be addressed by the MX's increased accuracy. The missile is, in short, necessary for the United States to destroy hardened Soviet targets—a mission of dubious importance if the United States is interested only in retaliation. Verne Orr, the current Air Force Secretary, is unabashed in this regard. "Today, in the ballistic missile age of nuclear weaponry and in the absence of an effective ABM system, the 'only' defence against nuclear attack is a strong offense," he wrote recently in Air Force magazine.

In a slightly different vein, General Lewis Allen, the former Air Force Chief of Staff, testified last year that invulnerability was a needless requirement for MX that constructing a vulnerable target was sufficient to advance U.S. interests. "If the system required the Soviets to disarm themselves [by expending attacking warheads] then that system did the job we wanted it to do," Allen said with reference to previous MX basing plans. "That is, it changed the balance in such a way that the Soviets could no longer face us with this great superiority of ICBMs." It is apparently not worrisome that a successful Soviet attack could make $25 billion go up in smoke. What Allen seeks is a nuclear sponge to soak up Soviet warheads, solely to redress an alleged imbalance in the number and lethality of weapons held by the Soviets and the United States.

This view is widely shared in Washington, and is gaining wide support in the Congress. Representative Samual Stratton, a Democrat from New York, was instrumental recently in getting the House to approve production of the first five MX missiles, despite the lack of any assurance that they can be protected from attack. Stratton, who chairs a subcommittee on military nuclear systems, said on the House floor that "the statement is frequently being made that we do not have an invulnerable method of basing, and therefore we somehow have to wait until the Pentagon can develop an invulnerable method of basing. I think we have gotten a little too dependent on our scientists. . . . If we are going to insist on absolute perfection in the basing modes of our missiles we are asking the impossible . . . . I think we ought to disabuse ourselves of the idea that we have to have something invulnerable when it comes to MX."

Stratton wants the MX mainly because the existing U.S. ICBM—the Minuteman—is dwarfed in size by existing Soviet missiles. Before the recent House vote, he arranged for models of these missiles to be placed outside the chamber. "I say to the members, particularly those who are not here in the chamber, before you vote, do not vote until you go out in the Speaker's lobby and take a look once again at those Soviet missiles," he said. "That is a true image of the relative sizes of our two missiles, and what we are talking about is providing an adequate defense against the Soviet SS-18, the SS-17, and the SS-19." The size of the MX, in and of itself, is justification for its deployment, to Stratton's way of thinking. If the Soviets have big missiles, we must have them too, even if they are vulnberable to attack.

Key officials at the White House also believe the missile is valuable if it cannot survive. William Clark, the President's national security adviser, stated last May that the modernization of land-based strategic forces "is too important to allow the risk of technical, environmental, or arms-control debates to delay the introduction of the missile into the force." Similarly, Thomas Reed, a former Air Force Secretary who serves on the National Security Council, stated in June that "the President views the production of a new, larger, more accurate, and more easily maintained ICBM, with the earliest possible introduction into the oper-

ational force, as absolutely essential . . . we must have a steady, ongoing ICBM program without turbulence." Turbulence, in Reed's view, is created by excessive concern about the ability of the MX to survive a Soviet assault. Both Clark and Reed have stated that MX basing in existing, highly vulnerable silos is acceptable if secure basing cannot be found.

Critics of the MX will learn this December that Dense Pack is an elusive target. There are grave uncertainties about its ability to provide sufficient protection. But this is not really a fruitful topic of debate, as the Pentagon and the White House do not really care about missile invulnerability. The MX is no longer thought of as a solution to the problem of decreased Minuteman survivability, if it ever was. There are other, darker reasons for its construction, the most important being the capability it gives the United States to fight a nuclear war.

This is what the arms control community must explore with the public between now and the day of the President's announcement. It is going to be an uphill battle.●

ELEANOR ROBLES MONTANO HONORED BY THE WILMINGTON CHAMBER OF COMMERCE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ANDERSON. Mr. Speaker, it is with distinct pleasure that I take this opportunity to pay tribute to Eleanor Robles Montano, who is being honored by the Wilmington Chamber of Commerce on December 1. Indeed, Eleanor's many accomplishments and contributions to the area have made her worthy of such an honor.

Eleanor was born in Long Beach, Calif., and was educated both there and in neighboring Wilmington. After graduating from Phineas Banning High School in Wilmington, she began her service to the community by working in St. Mary's Hospital in Long Beach for 2 years. Later, she married Emilio Montano and began raising her family of five children. Eleanor and Emilio are also foster parents to seven boys.

During these years, Eleanor began a hobby which has grown into what is today a successful business: cake decorating. Not only does Eleanor teach cake decorating, but she also serves as a judge for cake shows every year. She attended Bixby Knolls Park School and Edith Gates School of Cake Decorating, as well as taking graduate courses on cake decorating from Mexican, Australian, English, and South African masters. Related to her interest in this field, Eleanor is a member of the Sweet Arts Cake Club, the Retail Bakers of America, the California Cake Club, and the Fancy Frosters Cake Club, of which she is a past president.

Aside from her interest in cake decorating, Eleanor Montano has done extensive work in her community. Among her many activities, she is a member of the Harbor Community Police Task Force, the board of directors for the Boys Club of Wilmington, the Harbor Area Police Community Council, and the Wilmington Chamber of Commerce, of which she was program chairman and ways and means chairman. She is a member of three PTA's. Eleanor is a former vice president and is now president of the Los Angeles Police Department LITES, as well as being vice president and program chairman of the community support program. In this capacity, Eleanor has presented programs which have been televised and include such topics as "Gangs and What Is Being Done About Them," "Senior Citizen Rip-Offs" and "Crusade Against Crime in the Schools."

Quite deservedly, Eleanor was named Wilmington's Citizen of the Year in 1980, and is Wilmington's 1982 outgoing honorary mayor.

But to merely list Eleanor's activities would not do justice to her truly outstanding and tireless dedication to her community. My wife, Lee, and I have known Eleanor for many years, and we can only wonder how she finds enough hours in a day to contribute so much to both her community and her family. Indeed, Eleanor Montano is a truly remarkable woman.

Mr. Speaker, in light of Eleanor Montano's outstanding and continuing contributions to her community. I know you and my colleagues will join me in paying tribute to this most deserving and distinguished woman. My wife, Lee, joins me in wishing Eleanor Robles Montano, her husband Emilio, and their five children, Ricardo, Marina, Loretta, Mario, and Jaime only the best in the years ahead.●

TAYLOR'S FUTURE AT STAKE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. FORD of Michigan. Mr. Speaker, I very much want to bring to my colleagues' attention the challenge facing the residents of my hometown, Taylor, Mich. Like last year at this time, my constituents must choose whether to pass a millage and keep their schools open for the full academic year or put their 14,300 students' fugures in jeopardy and put the plans of their graduating seniors in limbo.

Last year, the Taylor schools made national headlines with their plight. Many of the doomsayers predicted that Taylor residents, already suffering from the ravages of the highest unemployment in the Nation, severe inflation, and far-reaching State budget cuts would turn thumbs down on the millage proposal. But I am extremely proud that my constituents met that challenge and set a precedent for several other Michigan school districts encountering similar fiscal dilemmas.

Many of the same factors which constituted last year's critical millage scenario remain: a sound economic prediction that the State will face a significant shortfall in revenue during this fiscal year; the constitutional requirement for a balanced budget; and the contention by the Governor, speaker of the house, senate majority leader, and the minority leaders of both houses in the State legislature that there will be no "bailout" for suffering local school districts.

And, our respected Attorney General, Frank Kelley, stands by his statement of last year:

. . . the financial fate of the local school district is in the hands of local voters.

The Michigan Constitution does not impose a duty on the Michigan Legislature to appropriate additional State funds to those school districts where the electors have refused to approve property tax limitation increases for school operating purposes. It is a mistake for anyone to believe that the State has funds available for aid to school districts which run out of funds.

Unless the 5.4 mills are renewed, the schools will be closed by April. Our community cannot afford to let its children have any less education and opportunity than other cities in Wayne County or the State. Our reputation as a quality place to live, do business and raise one's family cannot withstand the defeat of this millage and the subsequent closing of schools.

Michigan's long-time respected tradition of local control must be maintained. It is a policy I fought for as a young attorney for the then-Taylor Township schools, as a delegate to the State constitutional convention, as a State senator, and one I am committed to as a senior, ranking member of the House Education and Labor Committee in the U.S. House of Representatives.

The December 6 millage vote gives the Taylor voters another opportunity to maintain and enrich this important commitment to "local control." It gives them the prerogative of insuring that their children and my grandchildren receive the same chance for a successful future that we had. I strongly believe that the voters cannot afford to shut the school doors and rob their children of just 1 year of education. It could very well mean the difference between success or failure in many students' educational careers or even lifetime success.

When Taylor residents went to the polls last year, many questioned the viability of their school district. Since then, with the strong support and expert assistance of State Superintendent of Public Instruction Phillip

E. Runkel and his staff, the Taylor schools have made significant improvements in many practices. And, in that very thorough report, the State department staff found several "good things happening" in the Taylor schools.

Undeniably, the passage of the millage makes good sense for the future of our children, but it also makes good economic sense. If the millage is not approved, Taylor could well be the only municipality in the entire State without public schools. The dire consequences this would have on home values, and on the ability of our mayor and city council to retain and attract business would be devastating. The issues are clear. It is now up to the voters to decide the future of our children and our community.●

MX MISSILE

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. AuCOIN. Mr. Speaker, if war is peace, if an arms race is arms control, then the President is right that the MX missile is a "peacekeeper." But none of those things is true, and the President is reckless and wrong.

The MX missile shatters the informal agreement of the superpowers to abide by the terms of the SALT II Treaty. It depends on a basing system that no one knows will work. It may cause the abrogation of the ABM treaties. It will cost billions upon billions of dollars when the economy is staggering under a $200 billion deficit and millions are out of work. It escalates the arms race when a huge majority of Americans in nine States voted on November 2 for a mutual, verifiable nuclear weapons freeze.

The President's speech on November 22 should offend all Americans for its oversimplifications. The President tried to make it seem that U.S. defenses are inferior to the Soviet Union's. But even members of the Joint Chiefs of Staff have said they would not trade America's defenses for the Soviet Union's.

The Soviet Government is in transition—a priceless opportunity for the United Staes. But there was absolutely nothing in the President's speech that gave an opening that would exploit this opportunity for peace.

Thus, it was a dangerous speech and the MX decision is a dangerous decision. Now there will be a furious battle in Congress over the MX. It will be close because despite overwhelming opposition across the country, no President has ever been denied a major weapon he sought. It is imperative that we do so now.

I will be among those in Congress who will fight the MX missile. Everyone who supported and voted for the nuclear weapons freeze must now focus their energies on stopping the funding of this unnecessary, costly, and reckless weapon.●

HONORING EVON CODY

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. PASHAYAN. Mr. Speaker, I should like to call to the attention of my colleagues that on December 11, Mr. Evon Cody will end nearly three decades of public service in Kings County, Calif.

Born and raised in Kings County, Evon began his public service as a member of the Kings County Planning Commission. He was elected to the board of supervisors in June 1954 and has served continuously since then.

Evon has been most active as a member of the board, serving as president of the San Joaquin Valley Supervisors Association, and as a director for the California Supervisors Association. Since 1975 he has served on the Governor's Employment Services Board.

His public service has included the Kings County Red Cross, State Tuberculosis Association, Salvation Army Board, YMCA, Outreach Boy's Ranch, Community Hospital, Kings County Symphony and Art League, as well as numerous other charitable organizations. Additionally, Evon has been very active in both the Kings County Farm Bureau and Navy League and has served as lieutenant governor of the Kiwanis Club International.

During Evon's tenure as supervisor, he was actively engaged in the development of the greenbelt concept, which protects the integrity of the Lemoore Naval Air Station, the development of the county park system, and, as an expression of his concern for orderly development, was a strong supporter of a general plan that protects both the urban and rural interests of the county.

Also, Evon has been a strong supporter of city-county cooperation, evidenced by consolidation of library and fire services and numerous other agreements with the various cities that resulted in providing a more efficient delivery of specific services.

Evon was instrumental in assuring that Kings County's space requirements were met well into the future. The county's space needs will be met for many years to come with the development of a government center in Hanford, as well as government centers in Corcoran, Avenal, and Lemoore. He played an active role in modernizing the fire department from the standpoint of both facilities and equipment.

Evon and his wife Marie have been married 48 years. They have two children, Carol and Robin, and two grandchildren.●

THE DEATH OF JOHN WILLIAM CARTER

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. SKELTON. Mr. Speaker, recently, I was saddened to learn of the death of a long-time acquaintance in my hometown. John William Carter died Sunday, October 31 in Lexington, Mo.

Mr. Carter was a respected member of his community. He had served for years as an instructor and administrator in a local school. He was an active member of his church and of the Masons. He served as a trustee of the Forest Grove Cemetery. The community has benefited from the life of Mr. Carter and shares the loss of his passing with his wife and daughter.●

HONORING MRS. SUNNY RABENSTOCK

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LEWIS. Mr. Speaker, the 370,000 women of Hadassah are solely responsible for the Hadassah Medical Organization and the Hadassah hospitals in Israel. Diligently supporting the national organization, the Arrowhead Chapter of Hadassah has, with great pride, provided needed equipment in Hadassah hospitals. Annually, the Arrowhead Chapter honors a woman whose contribution to the organization has been particularly outstanding. This year, I would like to join with the Arrowhead Chapter of Hadassah, and honor Sunny Rabenstock for her tireless efforts on behalf of the people of Israel and for her selfless service to her community.

Sunny has been instrumental in the success enjoyed by Hadassah. At the local level, she has served for many years as a board member, as well as serving as chapter president for 2 years. In addition, she was secretary of the Southern California Regional Board.

An active member of her community, Sunny has demonstrated extensive capabilities as a member of the San Bernardino Unified School District Budget Committee, and as a senior counselor at Juvenile Hall. She has been president of the Jewish War Veterans' Auxiliary, president of the Sisterhood of Congregation Emanu-El,

and has served as a member of the Temple's board of directors and secretary of the congregation as well.

An achiever in the best sense of the word, Sunny received her B.A. in education from Brooklyn College and her law degree from Brooklyn Law School. She later practiced law in New York City. Sunny is currently a legal assistant.

Sunny and her husband, Norman, reside with their children, Steven and Robin, in San Bernardino, Calif.

Mr. Speaker, it is with great pride and admiration that I recognize and commend Sunny Rabenstock to the House of Representatives.●

HARRY E. FIGGIE, JR.—SUCCESS SHARED

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MOTTL. Mr. Speaker, there are many elements in a success story, but one main theme can be read clearly. To be truly successful, one must share the experience. Harry E. Figgie is a man with much to share for he is a success in every sense of the word.

In 1964 Harry, a fifth generation Clevelander, took charge of the small automatic sprinkler firm. Under his guidance, the company has evolved into Figgie International, formerly A-T-O Inc., a company boasting over $750 million in sales last year and made up of over 30 divisions including such familiar names as Rawlings Sporting Goods and American La-France. Harry is currently Chairman and Chief Executive officer of the company that bears his name as well as member of the board of directors of the Western Union Corp., a position he has held since 1966.

Harry Figgie is also man of education, which is perhaps why he has chosen this medium to share his knowledge and experience. Harry holds a degree in metallurgical engineering from Case Institute of Technology which he received after a stint in the infantry in World War II, an M.B.A. from Harvard Business School, and both a J.D. law degree from Cleveland Marshall Law School and a master's degree in industrial engineering from Case which he completed at night, while working full time.

Harry holds two honorary degrees. One is from Garfield Senior College and the other is from the American College of Switzerland for his commitment to economic education and free enterprise. This commitment to economic education is clear and comes at a time when such information is sorely needed.

He extends his knowledge and experience to others through lectures to graduate students at Harvard, Northwestern, the University of Virginia, and Case Western Reserve and through economic education programs for teachers. The teaching programs, which Harry was instrumental in creating, are extensive. Over 330 teachers from across the country have been trained in the last 5 years with the help of Figgie International.

Mr. Speaker, Members of the House, I ask you to join with me in paying tribute and thanks to Harry E. Figgie, Jr., a successful man sharing that success with his country.●

THE CONGRESSIONAL SALARY FREEZE ACT OF 1982

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LANTOS. Mr. Speaker, unless we take decisive action during these closing days of the 97th Congress, Members of the House and the Senate will receive an automatic pay raise starting in January 1983.

With the current severe recession we are experiencing throughout our country, it would be unconscionable for Congress to provide itself with a pay increase. With unemployment lines as long as those during the Great Depression, I find it unacceptable for Congress to raise its own salary.

Our energies should be focused on getting the economy back to full health again, rather than on concern for our own compensation.

It is in this spirit that today I have introduced the Congressional Salary Freeze Act of 1982. This legislation would hold the rate of salary payable to Members of Congress at current levels. Americans in all walks of life have agreed to wage freezes and pay cuts; in all fairness, Congress should do the same.●

THE NEW ENGLAND COUNCIL, INC., HONORS F. EUGENE PURCELL, CHAIRMAN OF THE WASHINGTON GROUP

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MOFFETT. Mr. Speaker, the New England Council, Inc., a regional trade association which represents 1,200 companies in the region employing over a million employees, is honoring Mr. F. Eugene Purcell for his outstanding service as the chairman of the council's Washington group, a committee of Washington based business executives of New England companies.

Gene serves as senior vice president, public affairs, for Lone Star Industries, which is based in Connecticut and is one of the largest manufacturers and distributors of concrete and cement products in the country. He joined the company in 1971 as vice president and assistant to the president, becoming vice president—corporate affairs in 1973. In his present position, to which he was appointed in 1978, he is responsible for corporate communications, office administration, and employee and labor relations.

A native of Las Vegas, N. Mex., Gene Purcell earned his bachelor of science and master of science from New Mexico Highlands University and a juris doctors degree from the University of Baltimore. He served in the military from 1951 to 1954 and currently holds a reserve commission as captain in the U.S. Air Force Reserve.

Active in industry affairs, Mr. Purcell serves on the board of directors of the Public Affairs Council and is a member of the Washington Affairs Committee of the Portland Cement Association. He has also served as trustee for the Connecticut Public Expenditures Council.

Since Gene Purcell was highly instrumental in the success of opening the council's Washington office and establishing the Washington Group, a brief description of these activities gives some idea of Gene's efforts and energies on behalf of the council's Washington office. The following is an excerpt from the November issue of the Council Report.

One year ago the New England Council, Inc. opened the doors of its Washington Office with an ambitious goal: to bring the concerns and legislative needs of the Council's 1,200 member business interests to prominence in the Capital.

A year later the Council's Washington base of operations has achieved major success on several fronts, but chiefly as a strong link between the region's business leaders, who forge Council policies, and Congressional and White House leaders, who form national policy.

Opportunities for dialogue, debate and influential exchange are numerous for Council members acutely aware of the need to meet with their lawmakers in Washington as well as at home.

In addition to increased individual contact with Congressional offices, the Washington Office, under the direction of Jeanne Campbell, Vice President, who formerly served in both leadership and New England Congressional offices, provided several forums for Council members to maximize their government relations and public affairs efforts.

The Washington Group is a linchpin in the critical process that allows Council policies to play a dynamic part in the legislative process. The Washington Group is representative of the Council's broad base of support from a wide business and industrial spectrum.

Washington Group participants, whose number is necessarily limited, meet quarterly to coordinate lobbying efforts on behalf of Council positions, share legislative intelli-

gence, spot bills key to the region, and assess their chances for passage. The Group, a Washington reflection of the strength of The Council as a coalition, caps each business meeting with a reception and dinner, inviting a member of the New England delegation to meet one-on-one with Council members and address The Group off the record. Guests to date include Senator Warren Rudman and Congressmen Jim Shannon, Dave Emery and Joe Moakley, all of whom shared timely and valuable perspectives on legislation decisive to the region's economy.

The Council entered its second year in a new D.C. location. In August, of 1982 The Council set up shop in Suite 510, 1800 Massachusetts Avenue, N.W., within the law offices of Herrick & Smith, a leading New England law firm. Herrick & Smith, will assist The Council in identifying and analyzing national and local legislative issues important to the business community.

With The Council providing a continuing Washington presence, business can parlay its past—as a preeminent region where both politics and commerce began—and position its future—as a strong, rich and textured region that offers substantial rewards to those who live and work in New England.

Mr. Speaker, I bring Gene Purcell's efforts to the attention of my colleagues and commend the council for honoring his work as chairman of the Washington Group.●

MISS PORT OF LOS ANGELES—1981-82

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ANDERSON. Mr. Speaker, today I would like to honor someone who has done a fine job of representing the Port of Los Angeles for the past year—lovely Marlise Ricardos, Miss Port of Los Angeles 1981-82.

Miss Ricardos, born and raised in San Pedro, graduated from San Pedro High School in 1979. At the Miss Port of Los Angeles Pageant on October 10, 1981, Miss Ricardos was chosen to represent the port as the new Miss Port of Los Angeles, a title she has held for the past year. Miss Ricardos never failed to live up to the busy pace of her new role, and, indeed, brought her own unique personality and excitement to the job.

Beginning with the 1981-82 harbor holidays, where she was officially introduced as the new Miss Port of Los Angeles, Miss Ricardos was kept very busy attending many dinners and other events. Her first official appearances as Miss Port were in the 1981 San Pedro Christmas Parade and in the grand marshall's boat in the Harbor Christmas Afloat. Later, she represented the Port of Los Angeles by riding on a float at the 1982 Rose Parade, and was a contestant in the 1982 Miss California Pageant.

The celebration of anniversaries also kept Marlise Ricardos in the public eye. In a reception aboard the *Sea Princess* during her maiden voyage, Miss Ricardos helped celebrate Matson Lines' 100 years of service. The Port of Los Angeles' 75th anniversary, held at the American President Lines terminals provided another opportunity for Miss Ricardos to assist in the festivities.

Miss Ricardos is currently majoring in drama at U.S.C.'s School of Performing Arts, and recently appeared in a production of "Grease." I applaud the initiative and hard work of this talented young woman, and, with my wife Lee, wish Marlise Ricardos all the best in pursuing her chosen career.●

CZECHOSLOVAK SOCIETY HOLDS WORLD CONGRESS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. GAYDOS. Mr. Speaker, during the recent recess, the University of Pittsburgh, Pittsburgh, Pa., was the site of a most impressive convocation of scholars, artists, musicians, and writers.

It was the 11th world congress of the Czechoslovak Society of Arts and Sciences and was held over the weekend of October 28-31.

The society is a nonpartisan, nonprofit organization of 1,600 members, dedicated to the principles of free search for truth and knowledge and the free dissemination of ideas. They come from the ranks of refugees who fled Czechoslovakia after the Nazi occupation in 1939, the Communist coup in 1948 and the invasion of the Warsaw pact powers in 1968.

The organization of these intellectuals and professional people began in 1958 under the leadership of the late Prof. Vaclav Hlavaty, a mathematician at the University of Indiana, and Dr. Jaroslav Nemec of the National Library of Medicine.

Bound by the common purpose of advancing Czechoslovak culture, research, and scholarship in an atmosphere of freedom, the Society held its first congress in April 1962, here in Washington, D.C.

Since then, the society has met biannually throughout the United States with interim congresses at Switzerland, Canada, and Los Angeles, Calif.

It has made its presence known throughout the world. In the West, its establishment has been welcomed and supported over the past 24 years. However, comments in the controlled press of Czechoslovakia range from outright condemnation to reluctant acknowledgement of its significance.

The society has local chapters scattered throughout the United States and abroad. Its members teach at approximately 100 colleges and universities in the United States, Canada, and Western Europe.

From its inception, the Czechoslovak Society of Arts and Sciences has maintained its nonpolitical character, refusing to become an instrument of the so-called cold war. Its membership is opposed to any totalitarian ideology of either the left or the right, being fully aware that culture and freedom are inseparable.

Mr. Speaker, I deem it appropriate and proper to insert into the CONGRESSIONAL RECORD this recognition of the Czechoslovak Society of Arts and Sciences for the attention of my colleagues.●

NORTHRIDGE ALL-STAR GIRLS ROSTER

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Ms. FIEDLER. Mr. Speaker, it has come to my attention and I would like to bring it to the attention of the Members of the House, that the Senior Girls All Stars, who won the State championship, come from my hometown.

I believe these young women and their coaches and parents deserve the recognition of the Congress. Therefore, I am today placing in our official RECORD their names and their record.

NORTHRIDGE ALL-STAR GIRLS ROSTER

Kim Bernstein, catcher.
Joanne DeFrisco, center field.
Chrissy DeSantis, 3rd base.
Rochelle Dicker, 1st base.
Amy Himber, pitcher.
Jennifer Goodman, pitcher and 1st base.
Carina Katurich, pitcher.
Carol MacGregor, out field.
Sandra Martin, pitcher.
Stephanie Rimington, 2nd base.
Renee Rosenbaum, out field.
Karen Secky, short stop.
Stacy Tobias, out field.
Christine Valentini, left field and short stop.
Manager, Bill Peel.
Coaches—Reggie Peel, Jon Goodman, Cheryl McDonald, Jerry Slaton, Spiro Chialtas.
Scores:
Sectional in Venice—Northridge vs.:
Glendale, lost 6-5.
North Venice, won 13-2.
San Valley, won 12-7.
Glendale, won 8-2.
Glendale, won 9-6.
Divisional in Hawthorne—Northridge vs.:
Temple City, won 4-1.
Wiseburn, won 15-12.
Wiseburn, won 3-1.
Western Regional in Pittsburg, Calif.—Northridge vs.:
Rose City, lost 8-2.
Sunnyside, won 7-5.
Red Bluff, won 9-5.
Rose City, lost 12-3.

I am proud of what these young women have accomplished and wish them the best of luck in the coming season.●

A GREAT DAY FOR BARRE

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. BOLAND. Mr. Speaker, on October 23, 1982, the citizens of Barre, Mass., dedicated their town hall.

This event was especially signficant because on January 6, 1981, the town hall was seriously damaged by fire. The fire presented the people of Barre with the considerable challenge of rebuilding their town hall. It was a challenge to which they responded with the kind of effort and commitment that has characterized Barre since its inception. The town hall reconstruction project became a matter of civic pride, and the results are certainly worthy of pride. The town hall has been beautifully and painstakingly returned to its status as an historic site. It stands as not only the focus of the town's civic attention, but as a monument to the love of its people for their community.

Mr. Speaker, I want to congratulate Town Hall Rebuilding Committee Chairman Gerard Gariepy, the members of his committee, and the people of Barre on their achievement. I also want to include at this point in the RECORD an article from the Barre Gazette which details the rebuilding effort.

[From the Barre Gazette, Oct. 20, 1982]

FROM THE ASHES A MASTERPIECE IS HEWN

(By Dorothy Banks)

When the Town Hall burned in January of 1981 no one realized what the months ahead would involve or who would be involved in the reconstruction. The focus of this article will be on the reconstruction and those involved, especially on two men whose part in the rebuilding of this structure was crucial to bringing Barre's Town house back to the stately historic site it once was and thanks to them, now is.

David Robinson was first brought to our attention though the Town Hall Rebuilding Committee Chairman Gerard Gariepy. Gerry gave me a tour of the Town Hall as work was progressing this summer.

"He's a real take charge guy," said Gerry of Dave as we went inside. He had to order special wide-pine boards of the wainscoting which runs two feet up the wall in every room. They were beaded too, for the period look of the 1800's which Robinson was effectively recreating. The wainscoting in the Grange Hall on the upper floor had to be completely replaced whereas downstairs it had been hidden by panelling and was thus painstakingly refurbished.

Gerry praised Dave repeatedly for his attention to detail, and as we continued to tour the rest of the building right up to the massive timbers in the roof and cupola I began to get a sense of the men who were behind it all.

Shortly thereafter I repeated the tour with Dave Robinson, a handsome man of 28 years, six feet tall and curly blond hair and a mustache and beard tinged with red. He is a rugged and proud man but not at all boastful. He had agreed to do a job and put his skill and attention to every phase of it.

Dave was appointed verbally through the selectmen with the agreement of Utica Insurance as the general contractor to oversee all phases of the reconstruction of the Town Hall. In fact the insurance company was the actual general contractor. To clear any doubt as to money involved Dave was paid an hourly rate. There was "no gravy involved," commented Dave's brother, William Robinson whose own involvement I'll touch on later. "Contractor's usually get 5 percent," he continued. "Dave got nothing." And that's how he wanted it.

When Dave took on the job he and his brother Bill who, for clarification's sake was appointed clerk of the works by the insurance company, sat down and studied the blueprints. They then had to talk bids with different companies and they went to extremes to come up with the best deal they could for the town.

"A lot of people donated to the whole thing," Dave said. And by this he meant time and materials as well as effort. He mentioned Tommy Thompson of Manufacturer's Millwork in Auburn who had the oak floors brought in from Arkansas at his own expense. He praised his father, J. Warner Robinson of Hardwick who had made the "circle in a square" design, two of which are on the top of each side of every door casing. At first he had made 12 and Dave told him he needed two dozen more. Dave soon had two dozen more and no money was involved.

"My brother has donated more than anyone," Dave said. "Bill has gone to extremes to get wholesale prices (for materials) and he never took a commission."

Bill, who owns W. R. Robinson Lumber Co. in Barre, is, like his younger brother, handsome and rugged and a man of unquestionable values. He simplifies his involvement in the reconstruction by saying "I felt bad when the building burned, . . . but once I said I would do something," he adds unquestionably, "I did."

So with these two men behind it all the process of reconstruction began—

On May 4, 1981 the cupola was lowered to the sidewalk in front of the Town Hall.

"It was a scary situation," Bill Robinson recalled when he and Dave learned that the cupola was going to be taken down. No actual measurements had been taken, only estimates had been written down by the architects, Millete & Hovsepian of Worcester and those were done by looking at a photo. So Bill and Dave got together the night before the cupola was removed and Dave went up and took his own measurements on little scraps of paper. It was through these measurements that the cupola base was repaired and it is to the Robinson's credit that those measurements were taken. It was learned later that the measurements the architectural firm had taken were wrong as a result of the distortion being taken from a photo. They were 13 feet short in height. The roof of the Town Hall would have been incorrect too. Dave wisely chose also to follow his own detailed sketches of the molding and pitch of the roof line.

When Leo's Construction Co. of Webster finished their job of removing the debris, the Robinsons' job had long since begun. Plans were underway.

The roof and cupola base were carefully designed with massive beams for supports. Bill Robinson had donated these. This type of construction used througout the building was called mortice and tennon. Once a common form of building technique used in the 19th century, the timbers interlock the wood by exact cuts of each piece which then allows one piece to fit snugly into the other, similar to post and beam construction.

Work continued throughout the summer.

Howard Hastings, another local artisan applied his exact carpentry craft to the cupola and the clock. Robert "Bob" Bentley was in charge of having the clock repaired and both did their jobs well. Howard told me that the cupola was not that badly damaged. His main task came in refurbishing the clock. He says that he got his ideas on the new clock faces and the louvres beneath by looking at other clocks in the towns of Petersham, Hubbardston and Templeton.

He decided on pine boards for the face of the clock, again donated by Bill Robinson. The faces needed a long-lasting covering . "The best way to do it," Howard said, "was to use painted crushed black glass called smaltz." Although it was time-consuming and more expensive, "It is cost effective in the long run," Howard indicated as it can't fade. He noted that one sign painter in Worcester was the only source he could find. With other dealers Howard recalled them saying, " 'Oh, Yeah, I remember using that 20 years or so ago.' "

The numbers on the clock were made of anodized aluminum and were made in the shop of Barre's selectman Earl N. Sample. Earl donated the use of the machinery and tools needed. The ones using them to complete the careful job of balancing the hands were Alan Dextradeur and Charles Payne. Valerie Dextradeur, Nancy Thorng and Betsy Clarkson were the ones who handfiled and de-burred the Roman numerals for the clock to make them smooth. Earl also donated the stainless steel pulley and bracket for the flag pole "and, after considerable thought managed to find a suitable 'ball fixture' for the very top of the flag pole." I understand Earl was quite flushed after this accomplishment.

The clock was donated to the town from the First Parish Community Church during the Barre Bicentennial and the church trustees have maintained the clock, have paid for its repair and will continue to pay for its maintenance.

The cupola, while grounded, got a new copper roof and Bill Robinson here is quick to praise Utica Insurance. "Just because the insurance company picked up the tab doesn't mean we needed frills," Robinson stated. "The insurance company treated the town real well," he continued. Utica gave the town the go ahead on the copper roof, air-conditioning for the offices downstairs, and the hardwood floors on the first floor rather than inlaid. "The insurance company treated the town fairly and I'd like more people to realize that," Bill concluded.

John Paulson, Assistant Secretary of Property Claims for Utica Nationwide returned the compliment in a phone conversation in August and directed one himself towards the elder Robinson. "I think the town of Barre is lucky to have a Bill Robinson." He noted the unusual circumstances of the townspeople wanting to get involved. He added that with Bill there was "no hassle. He always had the interest of the town first," Paulson said. "We (Utica) gave so much because we got a fair shake with Bill cutting the costs," he concluded.

Paulson, who has 25 years experience in claims, estimated that because of Bill and

Dave's diligence in getting the best for the least, Utica realized a savings of between $150,000 to $175,000. (Although a few bills are still outstanding the cost of rebuilding, according to Paulson, is slightly in excess $405,000.) I would mention at this point that both Dave and Selectman Chairman J. Howard Thompson had both given me a rough figure of savings that they thought was about $20,000. Their modest figure only reinsures the knowledge that it was dedicated men who brought the town hall back to its modern stature in an old-fashioned motif.

Thus as progress visibly continued throughout the summer on the outside, progress within was also taking shape.

The offices downstairs were completely renovated first with Town Clerk Alice Orszulak and Tax Collector Alice Heyes delighted to be back in their old place again by mid-summer. As those offices were modernized the real intricate part of bringing the rest of the building into an 1800 design was going on.

Robert "Bob" Duval handled the plumbing and effectively so. Bob said the most difficult part of his job was breaking up and removing the concrete floor to get to the old pipes. He and his son, Bob A. Duval, and son-in-law Jeff Mitchell, accomplished this through use of a jackhammer.

On all levels of the Town House the plumbing is now brand new.

As mentioned before the wainscoting was carefully restored. The doorcasings needed to be replaced and G&H Woodworking of Worcester was able to do the fluted design needed to bring them back to their original form. They also reproduced the moldings for both the interior and exterior of the building throughout. Dave noted that there were 13 layers of paint on the inside moldings that had to be removed.

The doors themselves that needed replacement were made in Dave's shop by one of his carpenters, Diony Van Gerven. The two inside doors of the Town Hall leading into the auditorium are especially noteworthy as Dave took the time to see that these gracefully curved doors were repaired exactly. It would have been much simpler to put standard straight doors in, but again Dave's concern for detail would not allow him to make that sacrifice.

The front entrances to the left and right of the main doors both had to be replaced and the craftsmanship in each is remarkable. Each door is made up of 115 pieces. 115! The mortice and tennon technique is used here, too, on these raised-panel doors.

The light fixtures were taken from the Henry Woods Building and installed. These copper-toned fixtures had been in storage in the Henry Woods Building for some time. Dave said that John LaPierre, the electrician was "easy to work with." You might want to note that the wall-plates for the sockets also match the paint color in each main room, impressing again the care to detail that was given.

The curving staircases, one that had been used and now another that has been made usable on the opposite side of each front entryway, were both heavily damaged by rain. Dave preserved what he could and made new treads where necessary. The finished staircases with their rich wood banisters and shining wood steps are beautifully done.

Dave had a crew working with him that appeared as devoted to this particular job as Gerry Gariepy indicated when he said, "Dave's made sure everyone put their heart into it."

Doug Morrison a painting contractor of North Brookfield was always cheerful, always busy when I stopped by periodically to see the progress inside. "Doug has done a tremendous job," said Dave in high praise. Doug saw to it that the painting was done to Dave's specifications if Dave wasn't there to oversee it himself.

The tremendous efforts of everyone involved should be appreciated all the more when one realizes all the things that could have gone wrong had not each and every individual made the effort to cooperate. It was a combination of care, cooperation and dedication to a common goal that has brought Barre's Town Hall back to the masterpiece that it is. Had the Robinsons not been the moving force behind it all, the outcome might have been different. The outcome is that the Rededication of the Barre Town Hall will take place October 23, 1982, one year and ten months after the fire.●

HOSPITAL OFFICIAL TO RETIRE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. YATRON. Mr. Speaker, I want to take this opportunity to pay tribute to Mr. James C. Kirk, president and chief executive officer of the Pottsville Hospital and Warne Clinic, located in Pottsville, Pa. Mr. Kirk will retire on January 1, 1983, after 35 years of dedicated service to the hospital and the community.

Mr. Kirk was appointed administrator of the Pottsville Hospital in 1948. He has been an outstanding citizen whose contributions to the institution and the community are immeasurable.

Before coming to Pottsville, Mr. Kirk was the assistant superintendent of the Perth Amboy General Hospital in New Jersey. Prior to serving at Perth Amboy, he was an accountant for Jones & Laughlin Steel Co. in Pittsburgh and the Crucible Steel Co. of America in Jersey City.

As the administrator of the Pottsville Hospital, he was responsible for guiding the institution through several major building projects which increased the hospital's size from 150 to 266 beds, making the Pottsville Hospital and Warne Clinic the largest hospital in Schuylkill County. In addition to the hospital expansion projects, a new school of nursing building was constructed in the midsixties.

Mr. Kirk, a native of Port Carbon, Pa., received his education at the Carnegie Institute of Technology in Pittsburgh. He is a member of the American Hospital Association, the Hospital Association of Pennsylvania, and the Health Systems Agency of Northeastern Pennsylvania. He was also a member of the Commonwealth of Pennsylvania's State Welfare Board.

Mr. Kirk is a man of many accomplishments which have benefited thousands of people, not only in Schuylkill County, but throughout Pennsylvania. Without a doubt, the Pottsville Hospital and Warne Clinic will be losing a man with exceptional talent, skill, and ability.

Mr. Speaker, it gives me great pleasure to honor this fine American before my House colleagues. Mr. Kirk was a true humanitarian with a complete devotion to providing the best possible health care for the citizens of Schuylkill County.●

NATIONAL PARK VISITOR FACILITIES FUND ACT

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. LUJAN. Mr. Speaker, I am pleased to introduce today legislation that will provide a viable means to solve the problems with overnight visitor facilities in our national parks for which the Government has nonroutine maintenance and rehabilitation responsibilities.

Of the approximately 16,000 buildings in national park areas, there are some 1,000 Government-owned facilities which are used for overnight accommodations of visitors and support services and in which there are no outstanding possessory interests by a concessioner. These tend to be small cabins and related facilities used by visitors seeking clean, comfortable, and safe accommodations during their park visit. Unfortunately, the rehabilitation of these facilities has often been neglected in the press of more comprehensive park plans for construction and repair, which generally focus on larger structures. Delay of necessary rehabilitation and repair has resulted in many of these small visitor facilities deteriorating to the point that they do not meet minimum health and safety standards. This bill will provide the financial, practical, and expeditious means to accomplish the needed rehabilitation to these Government-owned cabins, motels, and food facilities.

This legislation is the counterpart to S. 2715, which was introduced by Senator WALLOP in July. The Senate Subcommittee on Public Lands and Reserved Water of the Committee on Energy and Natural Resources held hearings on this bill on July 30, 1982. In testimony, the bill received strong support from all witnesses, including the Department of the Interior, the National Park Service, the National Park Foundation, the National Parks and Conservation Association, and the

Conference of National Park Concessioners. The legislation would permit the combination of revenues generated from franchise fees paid by operators in the national parks, along with private contributions and management resources to upgrade the quality of national park overnight visitor accommodations. Under the bill, revenues received from concessioners' franchise fees, authorized by section 3 of the act of August 25, 1916, would be paid into a special fund, the National Park Visitor Facilities Fund, in the Treasury. The Department of the Interior estimates that revenues from concessions franchise fees would average approximately $5 million per year. My bill would authorize this amount to be paid into the fund annually. The bill would authorize annual appropriation in this amount from the fund for grants to the foundation, with an additional appropriation authorization of up to $1 million to be available for matching, dollar for dollar, both cash and material contributions donated to the Foundation by private citizens and corporations for restoration and repair of visitor facilities. The building program would be paid for by appropriations from the Visitor Facilities Fund to the National Park Service for grants to the National Park Foundation, which would manage the program. The foundation is a federally chartered nonprofit instrumentality authorized, in the action of December 18, 1967 (Public Law 90-209), to accept and administer gifts for the benefit of the national park system. The range of projects considered shall include the construction and rehabilitation of overnight visitor accommodations and related facilities, as well as the relocation of existing facilities to other locations within the park, or the removal of structures from the park entirely.

The National Park Foundation has established a strong record of support for the National Park Service. It has a highly qualified board of private-sector individuals who can assure the competent and effective management of this project, as well as being able to attract contributions of both cash and materials. The foundation's sole function as to concessions would be to contract privately for the actual "bricks and mortar" repairs and construction of facilities according to needs identified by the National Park Service. Improvements made by the foundation would become the property of the Federal Government.

I strongly recommend enactment of this bill, which provides an energetic and imaginative joint Government/private-sector approach to a narrowly focused, but difficult problem in our parks.●

WALTER J. SEMPROCH—ENTREPRENEUR EXTRAORDINAIRE

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MOTTL. Mr. Speaker, today I would like to call your attention to the accomplishments of a Clevelander who is a prominent example of individual success, Mr. Walter J. Semproch.

Walter has owned and managed Broglio's restaurant in Independence, Ohio, since 1961. As is the case with any well-run business, Broglio's has become famous throughout the community for the quality and service provided by Walter Semproch. He has earned this exemplary position by virtue of his own dedicated efforts, and his entrepreneurial spirit.

Walter is a self-taught businessman. He was born on the southeast side of Cleveland 65 years ago. Walter attended Sacred Heart of Jesus Elementary School, and graduated from South High School in 1936. While at South High, Walter worked part time for Fisher Foods.

In 1936 Walter was employed as an "all-around" man for Kaase Bakery, his first full-time job. He worked his way from a position in the bakery plant to sales supervisor, then to sales manager. Walter went to work for Broglio's in 1954, fulfilling their need for a manager. He invested his own money—as well as a great deal of his time and energy—in the restaurant. Walter bought a quarter of the stock in 1956, and gradually acquired the remainder over the next 5 years. Since then, Broglio's revenues have reached well over a million dollars, thanks to his dedication and perseverence.

In addition to these successes, Walter Semproch is active in many community organizations in Greater Cleveland. These include the Marymount Hospital advisory board, the Cleveland Polish Society, the Sports Media Association, and, in keeping with his life's work, the Northeast Ohio Restaurant Association.

Mr. Speaker, my colleagues in the House, please join me in the extension of this gesture to Walter J. Semproch. His hard work has made him an eminent member of his community, and a man we should be proud to honor.●

THE 64TH ANNIVERSARY OF THE INDEPENDENCE OF POLAND

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ANNUNZIO. Mr. Speaker, on November 11, 1918, the courageous people of Poland declared their independence, and reasserted the nation's right to live in freedom and human dignity after more than a century of enslavement.

The history of Poland and its people has been one of both triumphs and tyranny. Although one of the first democratic constitutions known to the world was established in Poland, unfortunately shortly thereafter, the Polish people saw their homeland invaded by three of the country's powerful neighboring nations. These nations exploited and brutalized the newly conquered Polish territory until 1918, and they responded with terrible repressive measures whenever the Polish people made gallant efforts to achieve self-government and to preserve their cultural heritage.

After World War I, however, the signing of the Treaty of Versailles enabled the Poles to reassert their own national destiny, and to freely develop their national, religious, and cultural institutions without foreign interference. Sadly, this glorious revival of freedom lasted only for one generation. In 1939, Poland became a victim of Nazi aggression, and her people were subjected not only to another foreign occupation, but also to the most extreme savagery, racial persecution, and brutal enslavement. Although 1945 marked the end of this Nazi oppression, the Polish people were forced to submit to a new tyranny in the form of the communism imposed with force by the Red Army.

Today, the Communists continue to be ruthless in their attempts to wipe out the culture and religious heritage of the Polish people. Nevertheless, they have been unable to completely crush the spirit of the Poles, and their desire for human rights, human dignity, and liberty. These dedicated men and women of Poland, who daily must face a dismal existence under the tyranny and oppression of the Communists, continue their fight against overwhelming odds in an effort to achieve self-determination.

Mr. Speaker, I am proud to join Americans of Polish descent in the 11th District of Illinois which I am honored to represent, in Chicago, and throughout the country as they commemorate the 64th anniversary of the independence of Poland, and I join them in their hopes and prayers for the success of the Polish people to one day overcome their Communist oppressors, and live in freedom in their own beloved country.●

BUSINESS LEADERS SAY "CHANGE THE COURSE"

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. MILLER of California. Mr. Speaker, the voters of this country sent a strong signal to the Congress and to the administration to alter the disastrous course of Reaganomics. Since the election, nearly every economic indicator has worsened still further, and the prospects for any significant, long-term improvement of the economy has become even bleaker.

It is perhaps understandable that the architects of Reaganomics resist the calls for change when they are made by those of us who decried the strategy when it was first proposed. Now, however, even some of our country's most prominent business leaders are viewing the strict supply-side, Reaganomics course as the "voodoo economics" originally described by George Bush in 1980.

Both supporters and critics of Reaganomics would do well to read the following two articles, both by men who are hardly known as hostile to the interests of business. The first, by John Wilson, traces both the original flaws in the theory underlying Reaganomics as well as its abysmal performance in practice. It should be noted that Mr. Wilson is the senior vice president and chief economist of the Bank of America.

The second article is by publisher Malcolm Forbes, who calls for major changes in spending and defense policies as essential to a reduction in President Reagan's record-shattering deficits.

(The articles follow:)

CAN REAGANOMICS BE SALVAGED?

WE MUST INVEST IN OUR FUTURE

(By John Oliver Wilson, Delivered at the Town Hall of California, Los Angeles, Calif., Sept. 16, 1982)

Only eighteen months ago Reaganomics was born. It was an historic moment in our nation's history. Who can forget the dramatics of the event as it was broadcast live on nationwide television.

The date was February 18, 1981. President Ronald Reagan entered the packed Chamber of the House of Representatives to a thunderous standing ovation. As the Members of Congress gathered to hear the new President lay out the details of his economic program, expectations were high, for rumors had been growing that this new program would represent a dramatic departure from the past.

After first cautioning that "we can no longer procrastinate and hope that things will get better . . . they will not" the President went on to propose "a comprehensive four-point program."

It is a program, the President explained, that: First, is aimed at reducing the growth in government spending: second, reforming and eliminating regulations which are unnecessary and unproductive: third, encouraging a consistent monetary policy that reduces inflation: and fourth, reduces taxes.

It was the proposal to reduce taxes that became the most important part of the economic program. In his proposals for tax reductions, the President was far from conservative. Tax rates were to be cut by 30 percent. Tax revenues were to be reduced by $44 billion in 1982 and eventually result in a $500 billion reduction over the next five years. Never before in the history of the nation had a President proposed reducing taxes by so much for such a long period of time.

Drawing upon his prodigious abilities to communicate, and demonstrating an unexpected flair for playing the rough and tumble game of political arm-twisting in Washington, President Reagan moved quickly toward a vote in Congress on his tax bill. On July 29, 1981, after a mere seven hours of debate, the Prsident won a landslide victory.

As the newspapers reported: "In 190 days President Reagan has not only wrought a dramatic conservative shift in the nation's economic policies and the role of the Federal Government in American life but he also swept to a political mastery of Congress not seen since Lyndon B. Johnson."

It was now official. The accepted economic policy for the nation was christened: Supply-side economics. This new set of policies was expected to produce tremendous results. For 1982 projections were for an economy that would grow at a positive 5 percent real rate. Inflation would decline significantly, and the budget defict would be a mere $45 billion. By 1984 the budget was to be totally in balance.

It seemed almost too good to be true. Massive tax reductions would stimulate such strong economic growth that sufficient tax revenues would be generated to balance the budget.

As all of us are only too painfully aware, this economic utopia has not occurred. There is little prospect that it will.

Rather than the economy expanding at a vigorous 5 percent, we find it declining at a negative 1.5 percent rate. Rather than a mere $45 billion deficit, we are faced with a massive $150 billion deficit. Rather than basking in economic euphoria, we are caught in the throes of the most serious economic recession in fifty years.

We clutch for every small indicator of economic improvement, knowing that unless we are on the verge of a protracted recession, or a depression, the economy should recover. There exist numerous self-corrective forces within our economy that act to turn a recession around. These forces are very powerful. A slowdown in inventory disinvestment and continued consumer spending are the most certain forces that typically act to turn around a recession. And it is just these forces that are operating today to give us what economic strength that we have.

However it is a weak economic recovery at best: The weakest economic recovery in our entire postwar history!

The seriousness of our current economic situation cannot be underestimated. In the economic debris of this recession we will be left with a frightening legacy: The highest unemployment rate since 1941 . . . the largest number of business bankruptices since 1932 . . . the weakest recovery in business investment in forty years.

There is the very real possibility that such debris will simply overwhelm the expected economic recovery, and we will face a continued and prolonged economic recession.

In the President's own words, "we can no longer procrastinate and hope that things will get better."

Why is the economy in such dire straits? What happened to turn the euphoria of the Regan economic program into pessimism?

Let us look at these questions. Specifically, let us look at two major issues: First, why has supply-side economics failed? And second, what can be done to salvage Reaganomics?

I separate Reaganomics from supply-side economics, for there are strong indications that the President is no longer wedded to his initial supply-side beliefs. Even more important, if Reaganomics is to survive, it must be separated from those beliefs.

Supply-side economics as advocated in the early days of the Reagan Administration has come apart for several reasons:

One: Overly optimistic assumptions were made regarding the role of expectations in our economy.

Two: The clash between expansionary fiscal policy and tight monetary policy, and the resultant rise in interest rates, was underestimated.

Three: The main engine for economic growth was assumed to be business investment; however, the impact on investment of high interest rates, a recession, and basic structural change was ignored.

Four: The impact of disinflation on the financial position of corporations was not taken into account.

Now, let's examine these reasons for the failure of supply-side economics in more detail.

First, overly optimistic assumptions were made regarding the role of expectations in our economy.

The role of expectations in our economy has become a major topic among economists in recent years. It is well known that past rates of inflation help form expectations about future rates of inflation. And it is generally felt that changes in economic policies have a significant impact on economic behavior. But what is not known is how fast inflationary expectations change and economic behavior is altered. The supply-side economists of the Reagan Administration assumed a very rapid response.

It was assumed that there would be a very rapid reaction to the announced economic policies of the new Administration.

Inflation would decline from then existing levels of 11 percent to 6 percent or less within a matter of months.

Business investment would be strongly stimulated by the mere passage of the economic program, long before the actual economic incentives had time to take effect.

Workers and consumers would begin to respond immediately to the new tax incentives designed to encourage greater work effort and a higher level of savings.

So strong would be the response to the new economic program that the Administration projected economic growth rising to 5 percent and inflation declining to 6 percent for 1982, while most private sector economists, using more conservative and traditional assumptions on the role of expectations, projected growth at 2.5 percent and inflation of 8 percent for the year.

In retrospect, it is clear that the Administration was much too optimistic in estimating the impact of expectations.

The second reason for the failure of supply-side economics was the clash between expansionary fiscal policy and tight monetary policy.

Once the President had signed into law his historic tax cut program, he set out to prepare his first budget. This was the budget that was presented to Congress in January, 1982. It was here that serious problems began to surface.

The President proposed massive increases in defense spending, $44 billion in FY 1983 alone, and against the strong recommendation of his advisers, he refused to accept sufficient tax increases to attain a more reasonable budget balance. Having run out of areas where social programs could be reduced, the Administration was faced with a budget deficit of $150 billion in 1982. And rather than achieve a balanced budget by 1984, the deficit was projected to continue to be $150 billion.

Such stong fiscal stimulus, unprecedented in our entire history, left the Federal Reserve Bank with no choice but to pursue a restrictive monetary policy. The result was an increase in interest rates. After having dropped by 600 basis points in the aftermath of the initial Reagan euphoria, short term rates soared by 400 basis points between December, 1981, and February 1982. This was the period when the financial markets clearly perceived the true implications of the Reagan economic program.

As we know, interest rates have remained stuck at these high levels until July of this year, even though inflation was significantly declining and the economy was plunged into a serious recession. The markets simply were unwilling to move until the Administration faced up to the reality of their proposed budget deficits, and the Administration showed no signs of compromise as they engaged in a head-to-head confrontation with Congress.

It was only after the seriousness of the recession was finally acknowledged, and the intractableness of the financial markets was understood, that the Administration and Congress reached agreement on a proposed tax increase. But by then, the damage to the economy, and supply-side economics, had been done.

The third reason for the failure of supply-side economics was the assumption that business investment would provide the main source of renewed growth.

Unfortunately, rather than increasing, business investment declined. Little investment occurred when interest rates surged upward. Then when the recession occurred, and idle capacity began to develop, there was no need for new investment. But more important, business is faced with an uncertain future; a future of massive structural change and intense competition.

There have been few times in our history when our basic industries have gone through such significant change. My own business, the financial industry, for instance, faces the most dramatic change in over 50 years. We face intense competition from abroad as foreign banks enter American markets in increasing numbers. At the same time such nonbanking institutions as Sears, Merrill Lynch and others are broadening into financial services. Our costs have increased manyfold as we now pay market rates of interest for our source of funds. The risks of the banking business have grown substantially.

What is true of the banking industry is also true for airlines, automobiles, steel, computers, construction, agriculture, and aerospace.

At a time of such massive structural change in nearly all of our most basic and important industries, it was rather naive of the supply-side economic plan to place so much emphasis on a strong renewal of business investment.

The fourth area where the Administration miscalculated was in the impact of disinflation on the financial position of corporations.

During the past decade of high inflation, American corporations greatly altered their behavior. Debt financing was substituted for equity financing. Short-term debt was substituted for long-term debt. Capital investments were made assuming continued high inflation. Expectations about future income and profits were increased. Above all, borrowing was greatly expanded. All of these changes were normal reactions to a high inflation era. However, these actions created tremendous problems for all of us when disinflation occurred in 1982.

With the decline in inflation, the prices of products also dropped. Furthermore, many of your industries were locked into labor contracts where the cost of labor declined less rapidly than prices, and debt obligations where interest rates remained high. Consequently your business firms have been faced with declining prices but continued high cost for labor, interest payments on debt, and other fixed costs. The result has been a tremendous squeeze on corporate profits.

To counter this profit squeeze, firms have been scaling back on their investment plans. They have greatly cut all controllable expenses and delayed research and development activities. At the same time they were forced to continue borrowing at high interest rates in order to survive.

When the history of the 1982 recession is written, the most unusual occurrence will probably be the impact of disinflation on corporate financial strength. And this impact was almost totally excluded from consideration in the Reagan economic program.

Having discussed what has brought about the failure of supply-side economics, we now turn to the more interesting—and relevant—question of what can be done. Can Reaganomics be salvaged?

My answer is yes, for the Administration has many pluses working for it.

The first plus is the American economy. Our economy is still by far the largest in the world, accounting for one-quarter of the total gross national product of the global economy. This means that our markets are large and rich. We still offer the greatest economic opportunity for any manufacturer or entrepreneur in the world, whether that individual be American, Japanese or French.

The second plus is that we have absorbed the postwar baby boom into our labor force, thus we no longer face this problem that slowed down our productivity growth during the nineteen-seventies.

The third plus is that we have completed much of our investment in cleaning up our environment, another source of slower growth in productivity. We can maintain our commitment to a clean environment with far less resources than in the past, and now allocate those resources to other areas.

The fourth plus is the fact that the OPEC shock, which ushered in the era of high energy costs, is behind us, and we are well on our way towards adjusting to a more energy efficient future.

These pluses are so strong that the decade of the nineteen-eighties holds out the promise of potential growth rates in productivity that are two to three times that of the past decade.

However, to realize this potential growth we must alter our current economic policies. Specifically, these policies must be designed to expand investment in America's future.

This may seem a strange recommendation to make since the Reagan economic program was largely sold to business and to the public on its ability to increase productive investment. Indeed it was viewed as the most pro-business economic program in many years.

Unfortunately, it has put American business in their most precarious financial position in fifty years. It has stifled private investment. It has slashed public investment in housing, education, research and development, alternative energy sources, and public transportation. It is jeopardizing our future.

What needs to be done?

The first policy change would be to reduce the expected budget deficits. No one would suggest that we should attempt to balance the budget this year. To do so would only plunge the economy into a depression. Nor it may not be possible, or even desirable, to reach a budget balance in the foreseeable future. But to consciously undertake policies that are designed to produce budget deficits of $100 to $150 billion from not until at least 1985, long after the economy will presumably be recovered from this recession, is to ask for trouble.

The second policy change would be to achieve greater balance between fiscal policy and monetary policy.

Smaller budget deficits are essential to achieving this balance. Once the proposed budget deficits are attained, the FED will be in a position to moderately ease on the growth of the monetary base without endangering our long-run commitment to fighting inflation.

Currently, the FED is attempting to expand the money supply, but with large budget deficits this is a risky undertaking. It is only because of the weakness of the economy that the FED is able to ease to the extent it has without setting off renewed inflationary expectations and higher interest rates.

The third policy change is to reduce proposed increases in defense spending.

The Reagan budget proposes to increase federal government outlays by $322 billion between 1981 and 1987. Two-thirds of this increase is earmarked for defense! Two out of every three additional dollars spent by the government between now and 1987 will go to defense. (The remaining amount is slated for social security and medicare-medicaid.)

The defense establishment and the elderly will receive every single dollar of proposed budget increases for the next six years. There will be no increases for research and development . . . no increases for education . . . none for energy, public transportation, natural resources, and housing.

It will be impossible to achieve a more balanced budget without reductions in the $204 billion increase planned for defense. We simple do not have enough social programs left to be cut. Nor will procedural reforms, such as constitutional amendments to require a balanced budget or changes in the budget procedure, solve the problem. The solution requires some difficult political decisions on budget priorities; which leads me to my final proposal for change.

The fourth policy change is to increase both private and public investment.

Almost all of the emphasis in the current economic policy debate has focused on private investment. But private investment, by

itself, will be insufficient to do the job. We need stronger and better public investment as well.

Unfortunately this is the area that has received the sharpest budget reductions. If we examine proposed budget outlays for the next five years in terms of four major categories; Defense, income security and health, general government operating expenditures, and public investment, we find that the only area where large reductions are proposed is public investment.

Defense is slated to increase from 24 percent of our budget in 1981 to 37 percent in 1987. Income transfer programs such as social security, medicaid and medicare will remain constant at 47 percent of the total. The cost of operating government, including interest on the debt, will remain constant at around 15 percent of the total. But public investment will decline from 16 percent of the budget outlays in 1981 to just 6 percent in 1987. We will reduce outlays on public investment by nearly one-half.

This is a high cost to pay.

At a time when our major competitors—the Japanese, Germans, French and other industrialized nations—are increasing their public investment, we are reducing ours. At a time when they have programs for strengthening their industrial base, we have none. We need more investment in research and technology, new developments in energy and computers and a better educated labor force—not less.

We must face the fact that for the overall economic health and security of this nation, we must take a careful look at our expenditure priorities. We must achieve a better balance between fiscal policy and monetary policy. We must increase both our private and public investment: We must invest in our future.

While these policy changes are not politically popular, Congress and the White House have no choice. If our political leaders do their job, and we voters support them in their task, I am confident that Reaganomics will survive. But more important than Reaganomics, I am confident that our economy will survive.

Thank you.

[From Forbes Magazine, Dec. 6, 1982]

FACT AND COMMENT

(By Malcolm S. Forbes, editor-in-chief)

SOMEONE HAS TO GIVE, AND THAT SOMEONE IS THE PRESIDENT

There's just no way the Congress can, should or will go along with an Administration budget that projects a $200 billion deficit. The Administration would be nuts to submit such a folly.

If the White House does, the Congress—principally the House's substantial Democratic majority—will write its own budget. The President will veto it. This shoot-out will bloody not just the Administration, the Congress, the Republicans and the Democrats, but—of far greater consequence—will abort our struggling economic recovery.

The defense budget is going to be cut appreciably. And should be. It's utter foolishness for the Secretary of Defense & Spending & Travel, Cap the Butterknife to throw a fit when Budget's Stockman asks him for his order of priorities on cuts in weapon systems. (For the foremost candidate for such, see below.) Cuts are going to be made and one would think that Secretary Weinberger would want to have some input instead of an output of tantrums.

Then there's going to be either a rescinding of the programmed additional income tax cut or the imposition of additional taxes. Or some of both, billions more in cuts in federal, social and welfare programs? Forget it. Neither the lame duck Congress nor the new one will do anything but a nick here and a nick there.

Until the economy's flourishing again, the President has to tack to make progress against the economic and political winds beating hard against the Administration's basically sound thrust.

ONLY A DUNCE COULD PACK SUCH DENSITY BETWEEN TWO EARS

It may seem beyond believing, but the Defense Department really is proposing to base the controversial, unfathomably expensive MX missile in a cluster of silos about 1,800 feet from each other. One hundred of them. The idea?

The Soviets would aim so many missiles at this cluster that they'd bang into each other and explode before any hit the target. Yup, it's actually what they're proposing.

"Dense pack," it's called. A dunce pack they are.●

WHAT THE WAR IN LEBANON AND THE FALKLANDS TELLS US ABOUT OURSELVES

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. GINGRICH. Mr. Speaker, the wars in Lebanon and the Falklands provoked a flurry of articles on "lessons learned."

The article below by William S. Lind is another, but one with a difference.

Lind looked not only at the questions of what and why events unfolded as they did, but also at why our official institutions interpreted events as they did.

It is this perspective that makes Mr. Lind's essay unique, for the greatest lesson of those two wars is what they tell us about ourselves.

I urge my colleagues to read Bill Lind's fine essay.

SIMPLE TANKS WOULD SUFFICE

(By William S. Lind)

Thanks largely to the threat of nuclear weapons, major powers do not fight many conventional wars anymore. This is a development for which we should be very grateful, but it represents a problem for our military planners and strategists, for whom war is the only genuine opportunity to learn from experience. Since World War II, entire weapons systems have been developed, put into service, and retired as obsolete, without their builders ever knowing if they would have worked in an actual battle.

So the wars that erupted last spring in the Falklands and the Middle East—whatever their political necessity or impact—had special significance in the current debate between the Pentagon and the "military reform" movement. In the press, this fight is usually portrayed as a battle between proponents of sophisticated, high-technology weapons and advocates of cheap, low-technology weapons, but this is an oversimplification.

The first principle for military reformers is one of tactics: the importance of innovation and agility—what is called "maneuver warfare"—as opposed to the ponderous, inflexible style of "attrition warfare" favored by much of our military establishment. Reformers like weapons that lend themselves to this maneuver style of warfare, and they point out that complex weapons that look good on paper don't necessarily work in the dust and chaos of battle. As a result, they argue, our defense dollars would be better spent buying a lot of relatively simple weapons rather than a few expensive, complicated weapons.

Which side of this debate did the experience of real wars in the Falklands and the Middle East support? If you read the newspapers, you might have concluded that the Pentagon had won a stunning victory. American military officials have been particularly eager to take credit for Israel's success in Lebanon. "Pentagon chiefs boast that real wars justify fancy hardware," began an account in the Wall Street Journal. The Washington Post reported that "interviews in the Pentagon suggest the outcome thus far in Lebanon supports the view that the more sophisticated weapons are worth the extra price." Gen. David C. Jones, the retiring chairman of the Joint Chiefs of Staff, allowed that "It should put to rest the argument of our equipment being too complicated."

Where these the real lessons of the Falklands and Lebanon wars? The facts aren't all in, but the ones that are suggest not.

Take Lebanon first. Whatever else the Israeli action was, at a tactical and operational level it has, as of this writing, been brillant. The Israelis used surprise, speed, and unorthodox tactics (such as amphibious landings of mechanized forces) to shatter the enemy's cohesion, in a style of warfare reminiscent of the German blitzkrieg through France in 1940. Israel's success points up the importance for combat of tactics, of daring leaders, of an army that is agile and innovative. This is precisely the maneuver style of warfare American forces have generally been unwilling or unable to emulate. (The failed Iran rescue mission was the most striking recent example of American inflexibility. With only five of the six helicopters required by their "plan," our commanders couldn't do anything except call the whole effort off.)

But looking at Lebanon the Pentagon didn't see tactics, only hardware. Even in that department, its claims to vindication are dubious. After Israel demolished Syria's Russian-built SA-6 antiaircraft missile batteries, for example, there was considerable boasting about how newfangled American weapons had defeated the Soviet missiles. "Where are the low-tech boys now?" cackled one air force officer to the press.

However, while information is still sketchy, the key to the Israeli success is more likely to have been tactics than technology. According to most reports, the Israelis destroyed the SA-6s with missiles that home in on radar after using drones—pilotless airplanes—to lure the Syrians into turning their radar on. Israel probably used American Shrike or Harm missiles—nothing new or particularly fancy. We have had them since 1967, and Israel used lots of them in the 1973 war.

The Pentagon and press have also boasted about the performance of the costly ($25 million apiece) F-15 jet fighter ("flying electronic marvels," said Newsweek). Yet the gun-camera films available to date from air-to-air combat over Lebanon are from Israeli F-16s—the simpler, cheaper U.S. fighter—

not from the complex F-15s. Nor do our generals like to point out that the Israeli airplanes outnumbered their Syrian opponents, probably by about three to two. So the Lebanon experience certainly doesn't support the Pentagon's crucial prediction that a few high-tech planes can defeat a swarm of less advanced aircraft—precisely the situation our F-15s would find themselves in if they ever took on the Russians. Finally, the real decider in the air over Lebanon was, as usual, pilot skill. You could probably safely bet that even if the Israeli and Syrian air forces traded planes, the Israelis would still triumph.

The military establishment's post-Lebanon rush to take credit for its favorite weapons was reminiscent of one of the canards that emerged from the 1973 war. For several years after that war, it was claimed that the complex, radar-guided, air-to-air Sparrow missile, the raison d'être of the F-15, had been responsible for about a third of the Arab aircraft shot down. Then Israeli General Hod let out the full story: lots of Sparrows were fired, but their performance had been abysmal. The Israelis credited them with between zero and one kill.

In the latest Middle East war, as in the last (and in the Falklands), the missile that did work was the infrared-seeking Sidewinder. This is not such a complicated weapon. And because it steers itself without radar it can be launched from relatively simple jets—like the F-16's or Britain's now famous Harriers—that don't possess an F-15's expensive on-board radar system. Military reformers have consistently supported the Sidewinder for precisely that reason, while the Pentagon has pushed the Sparrow, which costs over ten times as much per missile.

Another widely touted winner in the Lebanon war was the American-built E-2C Hawkeye surveillance aircraft. Press reports speculated that Israeli Hawkeyes must have picked up Syrian planes as they taxied down their runways for takeoff. These reports strain credulity, however, given the Hawkeye's previously poor showing at picking out planes over land (as opposed to over water)—unless the Israelis somehow modified the planes to help them distinguish low-flying aircraft from "ground clutter."

In fact, the Israelis frequently alter the weapons we sell them, perhaps because, unlike the planners in the Pentagon, they know their own survival will more than likely depend on whether the weapons work. They designed their own tank, the Merkava, rather than buy the fragile, gas-guzzling $2.7 million Abrams M-1 tank that our own GIs are being equipped with.

Finally, you may have noticed in the TV news shots how Israeli troops in their American-built armored personnel carriers have not really been in them but on them, riding on the outside or hanging out the hatches. Our own troops did the same in Vietnam. Why? Because if the carrier hits a mine when the troops are "buttoned up" inside, as the designers say they should be, they all die, If they are inside when the carrier is hit by one of the many light antitank weapons found on modern battlefields, they burn to death, because the aluminum hull vaporizes and burns. The U.S. Army is now buying a new personnel carrier, the Bradley Fighting Vehicle. It costs eight times as much as the current carrier. Again, everybody is expected to ride inside. Again, the hull is aluminum.

The "lessons" the Pentagon has drawn from the Falklands have been equally perverse. Here the central issue is big aircraft carriers versus small ones. The fact is that the Argentine air force, operating at the extreme limits of its range and using mostly old-fashioned "iron bombs" rather than fancy guided missiles, sent four modern British warships to the bottom. This should, logically, trouble the U.S. Navy, whose entire surface fleet is currently dependent on just over a dozen ships, in the form of its large, nuclear-powered carriers.

In the same war, Britain's smaller carriers, *Invincible* and *Hermes*, acquitted themselves well. They were able to continue operations in bad weather conditiions and (if scattered reports are correct) after sustaining damage—two things only big carriers were supposed to be able to do, according to Pentagon dogma. Britain's vertical-takeoff Harrier jets—favored by reformers largely because they can take off from the decks of small carriers as well as from rudimentary landing strips—held their own in the Falkland skies against Argentina's faster Mirages.

Despite these events, Secretary of Defense Caspar Weinberger quickly announced that there had been no "brand-new lessons" from the Falklands fighting, even suggesting that "there has been a strengthening of the case for large carriers." Adm. Thomas B. Hayward, the chief of naval operations, agreed. With a hubris that one expects the gods have duly noted, Hayward proclaimed that American technology and tactical know-how would surely prevent any "two-bit navy around the globe with a handful of missiles" from sinking our ships.

The Pentagon's main argument was that big nuclear carriers like the U.S.S. *Nimitz* can carry long-range reconnaissance aircraft, which the smaller British carriers could not. In theory, such aircraft can spot enemy ships and aircraft before they get close enough to launch any Exocet-type missiles. Argentine planes, bragged Secretary of the Navy John Lehman, "never would have come close to a U.S. carrier task force."

But that is wildly overestimating the ability of reconnaissance planes—or any of the navy's other elaborate antimissile defenses, like the new $1.1 billion Aegis cruiser—to protect our precious carriers. In exercise after exercise, "enemy" planes, submarines, and missiles have been able to find holes in these defenses and clobber the carriers.

No, if there is one thing to be learned from the South Atlantic war, it is probably that all surface warships are now vulnerable to attack from both air and sea. It follows that we should try to distribute our navy's offensive power over as many ships as possible, to minimize the chance that a single successful attack would cost us an entire battle. The issue is not, as Secretary Lehman suggests, whether the British would rather have had the *Nimitz* or the *Invincible* off the Falklands. For the price of one *Nimitz*, we could buy six or seven *Invincibles*.

The vulnerability of surface ships is not a recent revelation. In that sense, Secretary Weinberger is right to the extent that he suggests there were no "brand-new" Falklands lessons. The first warship to fall victim to a modern antiship guided missile, the Israeli destroyer *Elath*, went down in 1967, and the evidence has been mounting ever since.

Has the Pentagon consciously deceived the public? I don't think so. There is a scarier probability: that Messrs. Weinberger et al. actually think what they say they think. The most fundamental problem we face, then, may not be high-tech versus low-tech, or big versus small, but the sorry state of our military thinking in general. We seem to tolerate a quality of analysis in our military that would never be tolerated in, say, medicine, where a large number of lives are also at stake.

Part of the problem is sheer ignorance. Understanding warfare requires, above all, a grasp of military history. It is not going too far to suggest, for example, that neither the British ground victory in the Falklands nor the Israeli success in Lebanon can be understood without an understanding of the revolution in German infantry tactics during World War I, where modern maneuver warfare started. Yet our military schools and colleges teach little history. With no historical context in which to place new events, our experts sometimes cannot understand even that which they can see.

The largest part of the problem, however, is the institutional setting in which military thinking occurs. Virtually all components of our armed services are large bureaucracies, and the process of selecting a new weapon, or planning a mission, is one of brokering and logrolling: "If my shop lets yours get that assignment [or mission, or weapon], then mine gets this other one in return." The focus in such a brokering process is not external—on the enemy—but internal—on how to come up with something that everybody in the bureaucracy can live with.

This internal political process is stressful, intricate, and time-consuming. Changing a decision means going "back into the tank," back into the endless meetings, the hairpulling and -splitting, the threats to careers if some interests don't "get their share." No one wants to alter a compromise, once arrived at, even though the external world is changing all the time (as it changed when the *Elath* was sunk). So there is an inevitable tendency to juggle, misstate, or ignore the external world, to obviate the need for change.

Big carriers offer something for every branch of the bureaucracy—comfy flagships for admirals, planes for naval aviators, nuclear power plants for Admiral Rickover's old shop. And for the navy, over the past three decades, the large aircraft carrier has been the Procrustean bed for which reality is cut or stretched to fit. An unwritten rule in the navy's war games prohibits an American carrier from being declared sunk. Thomas Etzold, a professor of strategy at the Naval War College, has reported that "In more than five years of experience as an umpire and adviser in high-level war games, I have witnessed the unwillingness of senior naval officers to permit carriers to be sunk, even when taken under overwhelming attack."

Real threats are simply ignored. The Russian navy is primarily a submarine navy—the Soviets have only about thirty major surface ships armed with antiship missiles. They have almost 300 subs. In a hearing early last year, Admiral Hayward admitted that "There is no commander afloat today who would consider the use of the aircraft carrier as the principal weapon to go after submarines, large or small." In other words, no one in the U.S. Navy would apparently suggest using carriers to fight the main element of the Russian navy.

In many respects one of the military forces that fought in last spring's real-life battles closely resembled our own. Divided into dickering branches, cursed by a rigid bureaucratic chain of command, brimming

with false confidence in its own abilities, incapable of quick maneuver or innovative strategy, it had adequate weapons but didn't know how best to use them, and it was quickly overwhelmed by a smaller, more skilled force. As one American commentator said after the valiant defenders of the Malvinas collapsed in a heap: "Don't laugh. We are also Argentines."●

LATVIAN INDEPENDENCE DAY

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 29, 1982

● Mr. ANNUNZIO. Mr. Speaker, on November 18, Latvians throughout the world celebrated the 64th anniversary of the creation of the modern Republic of Latvia, and on Sunday, November 14 of this year, a commemorative program in observance of this event was held in the Taft High School auditorium, sponsored by the United Latvian Association of Chicago, which is under the able leadership of Ilmars Bergmanis, chairman.

Although the Communists continue in their attempt to destroy the heritage and culture of the Latvian people, the Soviets have been unable to crush the spirit of Latvians and their determination to live in a free Latvia. Excerpts follow from the report on the Implementation of the Helsinki Final Act in Soviet Occupied Latvia: 1982, prepared by the World Federation of Free Latvians, which describe recent acts of brutality by the Soviets against the Latvians.

Excerpts from the report follow:

SOVIET GOVERNMENT'S POLICIES IN THE BALTIC STATES: A PROGRAM OF TERRORISM

State Terrorism in the Baltic States is Increasing and Methods Used by the KGB are Becoming More Brutal.

* * * The development and extent of individual persecutions is as follows:

1. Political prisoners previously sentenced to long-term imprisonment are still confined to Soviet prison camps.

2. Innumerable civil and human rights activists still are being held in special psychiatric institutions.

3. Show-trials are staged, where the advocates of civil and human rights are imprisoned or placed in special psychiatric institutions.

4. There is a noticeable increase in the number of assaults directed against those people who have voiced opposition to Soviet policies. Some have been murdered by "unknown assailants."

5. Arbitrary acts of terrorism are being committed against former political prisoners and other persons in disagreement with the regime.

6. Simultaneously, propaganda campaigns are being carried out more frequently in the mass media in order to intimidate the general populace.

In spite of the intensification of political terror and the brutality of KGB operatives, opposition is increasing within the population, especially among the younger people.

I

Notwithstanding diverse appeals and petitions to the Soviet Government, to the United Nations Committee of Human Rights, to the CSCE Followup Conference in Madrid and to other international authorities, political prisoners from Estonia, Latvia and Lithuania, sentenced to long-term imprisonment still are incarcerated in Soviet prison camps. No leniency towards human rights activists has been shown by the Soviet Government. Frequently the state of health of these prisoners is alarming, a condition aggravated by the fact that medical assistance from abroad is prohibited by the Soviet authorities. Some of these prisoners are:

	Sentenced in—	Term of imprisonment (years)
* * * * *		
Latvians:		
Andrejs Pūce	1973	15
Ivars Grabāns	1967	15
Žanis Skudra	1978	12
Richard Špalinš	1979	7
Juris Bōmeistars	1981	15
Dainis Lismanis	1981	10
* * * * *		

In most of the cases mentioned above, the completed prison term is followed by several years of internal exile.

* * * * *

Recently, there has been an increase in the number of show trials being staged in all three Baltic States and many civil and human rights advocates are being sentenced to long prison terms. In Latvia activists from diverse groups have been brought to trial and received harsh sentences.

Those sentenced frequently have been immediately subject to enforced psychiatric treatment. The following are but a few examples:

	Sentenced in–	Type of sentence
* * * * *		
Latvians:		
Juris Bōmeisters	1981	15 years imprisonment.
Teovils Kuma	1980	3 years imprisonment followed by internment in a psychiatric hospital.
Dainis Lismanis	1981	10 years imprisonment.
Juris Vinkelis	1982	2 years imprisonment.
Alfreds Zarins	1981	3 years imprisonment.
* * * * *		

There is an alarming increase in terrorist activities carried out by "unknown assailants" against the clergy, the defenders of civil rights and other dissidents in the occupied Baltic States. By eliminating some people and interning others in psychiatric institutions, the authorities are relieved of the complicated task of organizing the scarcely plausible and often embarassing show-trials. Generally the victim is taken by surprise, and the relatives are pressured to acquiesce. Some of the more recent incidents are:

* * * * *

On August 19, 1980, the body of Latvian Catholic priest Andrejs Turlajs was discovered in a lake;

On December 13, 1980, the Latvian Peteris Samtins, a stage worker at Riga Dailes-Theater, was assaulted by two militiamen in uniform. A few days later his corpse was recovered from the river Daugava and relatives were told that he had committed suicide. They were made to understand that further queries into the matter would be undesirable;

In the summer of 1981 the Latvian, Janis Vitolins, was found dead in Rīga prison OC-78-7. Shortly before his imprisonment he had tried, in vain, to gain entrance into the United States Embassy in Moscow;

In the summer of 1981 a Latvian teenager was killed, again in prison OC-78-7 in Rīga. He and three friends had been imprisoned at the beginning of the year because of their involvement in the duplication of a forbidden history book on the mass deportations carried out by the Soviet regime in Latvia;

Acts of terrorism, such as assassinations, administration of drugs or overt physical assaults are being carried out in order to intimidate persons undesirable to the regime, in particular, and the population, in general:

* * * * *

In October 1980 the Latvian, Pēteris Tomsons, a Public Controller was tortured in the militia station in Rīga, insidiously treated with drugs and upon release, beaten up in broad daylight. In his capacity as Public Controller, he had disclosed widespread improprieties and graft in the food distribution system of his district and had reported this to the District Attorney;

In August 1981, an attempt was made to assassinate former Latvian political prisoner, Māris Tilgals. At an intersection "unknown assailants" shoved him against the red light, into the path of an approaching vehicle. Because of his youthful dexterity, and the driver's presence of mind, Tilgals managed to survive;

During the entire year of 1981 the Latvian, Ģederts Melngailis, periodically was assaulted publicly and it has been made known to him that further acts of terror will follow. He is a practicing Christian and attended academic courses of the Evangelical Church in Rīga in 1974-75;

In January 1982 an attempt was made in Rīga to run down the former Latvian political prisoner, Maigonis Rāviņš, with a snowplough. Alerted by shouts from passers-by, he was barely able to save himself.

ADDENDUM

Since this report was prepared, the World Federation of Free Latvians has received additional information regarding terror and human rights violations by the Soviet government—

Augusts Žilvinskis, a Catholic priest of the Svente parish, missing since December 1981, was found murdered in a forest near Grīva on May 7, 1982.

On December 21, 1981 Ieva Biševaja, a Latvian Seventh Day Adventist, was sentenced to a year and a half of hard labor for mailing religious literature.

On November 18, 1981, Latvian Independence Day, several teenagers displaying the outlawed national flag were arrested. One of

those arrested was Igors Āuravskis, 17 years old. His fate is not currently known.

Another teenager Haralds Burnickis (17 years old) has been continuously terrorized by the KGB until he became severely depressed and was placed in a psychiatric clinic.

At a Latvian high school in Ilğuciems (Public High School #54, Baltaja iela 22) KGB agents examined student handwritings in order to discover the author of handwritten political proclamations.

Mr. Speaker, many Latvians have emigrated to the United States over the past several decades because of the brutal oppression and tyranny of the Communists. They have brought their hopes of freedom to our shores, and have contributed to the greatness of our country. I am pleased to join Latvian Americans in the 11th District which I am honored to represent, and Latvian Americans all over this country in their desire that the people of Latvia will again achieve self-determination and live in freedom and human dignity in their beloved homeland.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, November 30, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 1

10:00 a.m.
Energy and Natural Resources
To hold hearings on the nominations of Donald P. Hodel, of Oregon, to be Secretary of Energy, and Martha O. Hesse, of Illinois, to be Assistant Secretary of Energy for Management and Administration.
3110 Dirksen Building

Environment and Public Works
To hold hearings on infrastructure job opportunities.
4200 Dirksen Building

Foreign Relations
To hold hearings on the current situation in Lebanon.
4221 Dirksen Building

Joint Economic
Closed briefing on the allocation of resources to the Soviet Union and China.
5110 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

Small Business
To hold joint hearings with the House Committee on Small Business to review government findings of the Securities and Exchange Commission business forum on small business capital formation.
2359A Rayburn Building

DECEMBER 2

9:30 a.m.
Rules and Administration
To hold hearings on Senate Concurrent Resolution 32 and House Concurrent Resolution 153, measures authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol.
301 Russell Building

10:00 a.m.
Judiciary
Agency Administration Subcommittee
To resume oversight hearings on the indemnification of and contributions to government contractors.
2228 Dirksen Building

2:00 p.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1983 for the Departments of Labor, Health and Human Services, and Education.
1114 Dirksen Building

DECEMBER 3

9:30 a.m.
Commerce, Science, and Transportation
To hold joint hearings with the Committee on the Judiciary on H.R. 5949, proposed Cable Copyright Act.
235 Russell Building

Judiciary
To hold joint hearings with the Committee on Commerce, Science, and Transportation on H.R. 5949, proposed Cable Copyright Act.
235 Russell Building

Joint Economic
To hold hearings on the employment/unemployment situation for November.
2128 Rayburn Building

10:30 a.m.
Foreign Relations
To hold hearings on the nomination of John H. Holdridge, of Maryland, to be Ambassador to the Republic of Indonesia.
4221 Dirksen Building

DECEMBER 6

2:00 p.m.
Foreign Relations
To hold hearings on the nominations of Lev E. Dobriansky, of Virginia, to be Ambassador to the Commonwealth of the Bahamas, Samuel F. Hart, of Virginia, to be Ambassador to Ecuador, and Victor Blanco, of California, to be a Member of the Board of Directors of the Inter-American Foundation.
4221 Dirksen Building

DECEMBER 7

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider proposed amendments to S. 2432, authorizing funds for fiscal years 1983 and 1984 for programs of the Solid Waste Disposal Act and Resource Conservation and Recovery Act (pending on Senate calendar), and other pending business matters.
4200 Dirksen Building

Finance
Energy and Agricultural Taxation Subcommittee
To hold hearings on S. 1911 and S. 2642, bills providing for the establishment of reserves for surface mining land reclamation expenses and for the deduction of amounts added to such reserves.
2221 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

DECEMBER 8

9:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
235 Russell Building

10:00 a.m.
Armed Services
To hold open and closed hearings on the MX missile and associated Presidential basing decisions.
1318 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on the nomination of George W. Douglas, of Texas, to be a Federal Trade Commissioner.
235 Russell Building

Rules and Administration
To hold hearings on computer and communications systems for the U.S. Senate.
301 Russell Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

DECEMBER 9

9:30 a.m.
Rules and Administration
Business meeting, to consider pending legislative and administrative business.
301 Russell Building

10:00 a.m.
Judiciary
Separation of Powers Subcommittee
To hold hearings on judicial leniency.
5110 Dirksen Building

Judiciary
Agency Administration Subcommittee
To hold oversight hearings on the implementation of the Equal Access to Justice Act (Public Law 96-481).
2228 Dirksen Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

DECEMBER 10

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Household Goods Transportation Act (Public Law 96-454).
235 Russell Building

Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 2503, S. 2680, S. 2681, and S. 2824, bills providing for the reinstatement of certain oil and gas leases.
3110 Dirksen Building

Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 2856, increasing the penalties for the sexual exploitation of children.
2228 Dirksen Building

DECEMBER 13

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government payments and the potential for fraud.
3302 Dirksen Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

DECEMBER 14

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the report of banking regulators regarding the Penn Square National Bank in Oklahoma.
5302 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Motor Carrier Act (Public Law 96-296).
235 Russell Building

DECEMBER 15

9:30 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government debt collection procedures.
5302 Dirksen Building

Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building

DECEMBER 16

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To continue oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building

Small Business
To hold oversight hearings on the small business investment companies (SBIC) program of the Small Business Administration.
424 Russell Building

10:00 a.m.
Select on Intelligence
Budget Authorization Subcommittee
Closed meeting on budget matters relating to intelligence activities.
S-407, Capitol

SENATE—*Tuesday, November 30, 1982*

The Senate met at 2 p.m. and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Lord God of hosts, father of Abraham, Isaac, and Jacob, of our Lord Jesus Christ and the apostles, sovereign Lord of history—worthy art Thou to receive glory and honor and praise. Be present in this place today, as well as in the offices and homes of the Senators. Help us to be aware of Thy presence and of our accountability to Thee and to the people. Guide the leadership as the agenda for this session evolves—give discernment and agreement—deliver from the tyranny of the urgent so that the really important may be accomplished. May the Senators' achievements during this session vitiate the cynicism about the selfishness of politicians.

We pray for the President of the United States in his strategic visit with our Latin American friends. Keep him in health and strength, anoint him with Godly wisdom, prosper his efforts and enable his safe return home. In the name of Him who "upholds all things by the word of His power." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I believe there is an order, is there not, for dispensing with the reading of the Journal, that no resolutions may come over under the rule, and that the call of the calendar shall be dispensed with.

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. The next order of business then, Mr. President, is the recognition of the two leaders under the standing order; is that correct?

The PRESIDENT pro tempore. The Senator is correct.

TELEVISED PROCEEDINGS

Mr. BAKER. Mr. President, 82 years ago today, just moments before his death, Oscar Wilde looked up from his bed at his room's wallpaper and remarked, "Well, one of us had to go."

I can assure my colleagues that I offer no such wisdom or insight this afternoon, but I would like to follow up on a series of conversations that took place on the Senate floor yesterday.

Shortly after my announcement that it was my intention to make time in this lameduck session for deliberation on a resolution calling for television and radio coverage of Senate proceedings, several Members indicated to me that they did not believe that we would have time to debate such an issue because there were more important issues to consider.

I wish to state today, as I did yesterday, that I am fully aware of the measures which the Senate must act on in the next few weeks, and that at no time would I ask the Senate to postpone a matter of importance to move to Senate Resolution 20. But on the other hand, I view the issue of televised proceedings as a most important issue that will affect citizens across the country by giving them the opportunity to observe the Senate in action. This resolution has been on the Senate agenda for close to 2 years, and it is both my hope and expectation that something will be able to be worked out to facilitate this provision in the next few weeks.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there are three special orders today in favor of the Senator from Pennsylvania (Mr. SPECTER), the Senator from Michigan (Mr. LEVIN), and the Senator from Georgia (Mr. MATTINGLY).

At the conclusion of their time there will be a period for the transaction of routine morning business to extend for not longer than 1 hour in which Senators may speak for not more than 5 minutes each.

At the close of morning business, whenever that may be, it is the present intention of the leadership on this side to ask the Senate to proceed to the consideration of S. 995, Calendar Order No. 511, antitrust contributions. It is my hope that we can do that by agreement; if not, it will be my intention to make a motion to that effect.

Mr. President, I have no further requirement for my time under the standing order, and I am prepared to yield time to any Senator seeking recognition.

I see no Senator on this side seeking recognition. I offer my remaining time to the minority leader if he has use for it.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader and I accept his generous proposal. If he should wish any of the time back he may, of course, have it.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. LUGAR). The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may introduce a resolution at this time as though in morning business and ask that it be printed in the RECORD and appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE CONCURRENT RESOLUTION 128—RELATING TO MONETARY POLICY

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a concurrent resolution and out of my own time ask that it be read by the clerk.

I will ask that this resolution be printed in the RECORD and appropriately referred.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk proceeded to read the concurrent resolution.

Mr. ROBERT C. BYRD. Mr. President, I modify the verbage in the resolution to include the words "agricultural sector" in one of the "Whereas" clauses.

The PRESIDING OFFICER. The resolution is so modified.

The modified resolution is as follows:

S. CON. RES. 128

Whereas, The nation's economy is entering the seventeenth month of a severe recession, with few signs of recovery;

Whereas, Nearly 20 million people are underemployed or unemployed due to this recession;

Whereas, Our nation's steel, auto, housing industries, and agricultural sector remain mired in a depression;

Whereas, Given the current underutilization of both labor and capital, lower interest rates will not rekindle inflation;

And Whereas, Lower interest rates are the key to higher employment, higher production and sustained economic growth; Therefore, be it

Resolved by the Senate (the House of Representatives concurring), The Board of Governors of the Federal Reserve and the Federal Open Market Committee should take such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant

economic growth and thereby reduce the current intolerable level of unemployment.

Mr. ROBERT C. BYRD. Mr. President, as we reconvene for the final weeks of the 97th Congress, the tragic recession that has been with us for 17 months lingers on. Unemployment has darkened the lives of 11.5 million people, and nearly 20 million willing and able Americans remain underemployed. Industrial production continues to plummet, and we learned today that last week's steel production set new record lows as only 31 percent of its capacity was in use.

The spotty and anemic signals of recovery during the last few months have been wiped out by renewed losses the month after they were cheered by administration economists. Retailers are now concerned that the Christmas sales surge will fade as did the previously predicted recoveries from spring buying, summer tax cuts and fall back-to-school sales.

The road and bridge repair bill and the jobs programs being considered by the Senate and House are important stopgaps, and together will help nearly 600,000 Americans find work they desperately need. But for the other 19,400,000 Americans who are underemployed, only a strong and sustained recovery will put them back to work.

Mr. President, since last spring, we Democrats have maintained that only a sharp drop in interest rates will get this economy moving again. With lower, affordable rates, companies can buy again, companies can invest again, and builders can build again.

In July, Democrats in both Houses introduced legislation entitled the Balanced Monetary Policy Act of 1982, designed to force the Federal Reserve Board to look at real interest rates as well as money supply when setting policy. This legislation was designed to force interest rates down closer to historic real levels. Events of August and October, as the Fed moved decisively away from monetarism and toward a more balanced approach, showed that the Fed could bring interest rates down dramatically.

Late in the summer, we welcomed the support of our Republican friends on the House side who introduced legislation substantially similar to ours and brought a welcome bipartisan spirit to our proposals.

Together, we sent a shot across the Fed's bow this summer, and the results speak for themselves. However, in the last few weeks, the actions of the Federal Reserve have raised questions as to their willingness to continue on a path to lower interest rates. Interest rates have remained largely stagnant, and in fact some short-term rates turned up slightly yesterday. The stock market and financial markets have been looking for a strong signal from the Fed that it will continue to support the necessary monetary easing and lower interest rates needed to promote a healthy recovery. But the Federal Reserve has not taken that lead, and uncertainty has returned once more to the market.

Our Nation's industrial capacity is underused by more than 30 percent—which is a postwar record. Our Nation's human capacity is underemployed by 20 million citizens—which is another postwar record. In such dire straits we need not worry that inflation is just around the corner.

As interest rates linger above affordable levels for most Americans, the economy continues to sink lower and lower into this recession. Recently, many of our Republican colleagues, including the distinguished majority leader and the chairman of the Senate Budget Committee, have expressed their exasperation with continued high levels of interest rates.

I hope these public expressions represent a chance for swift bipartisan action to convince the Federal Reserve Board that lower interest rates must come if the economy is to recover. By nearly all estimates, there is substantial room for lower interest rates and higher money growth before any inflationary pressures would begin to appear.

In the hope that bipartisanship can prevail in these terrible times, I am today introducing a concurrent resolution that I believe all of my colleagues can support. I believe the Federal Reserve Board needs a strong signal from Congress that it has the full faith and support of both Houses in continuing to press rates down and promote economic recovery.

The Board's reaction to our bills of last summer was positive, and took us part way toward affordable rates. By supporting and passing a sense of Congress resolution at this time, I believe we can stiffen the Fed's resolve to bring rates down while avoiding the need for permanent legislation.

The sense of Congress resolution I propose is not designed to give the Board of Governors explicit instructions about how to bring rates down, they have shown that they know how to bring rates down when they so choose. It is not designed to compromise the integrity of the Federal Reserve Board, but it is designed to show that Congress remains committed to lower interest rates, and that the Fed's course of late summer and early fall should be renewed and maintained to produce a strong and sustained recovery.

I hope all of my colleagues can cosponsor and support this resolution. So I have offered this resolution this afternoon in that spirit. I hope for bipartisan support.

I ask unanimous consent, if the majority leader will not object, that the concurrent resolution lay at the desk throughout the remainder of this day, before it is referred, for cosponsors. Of course, if it is referred, they can obtain permission to cosponsor it after today without objection. If the majority leader has no objection, I make that request for today only.

Mr. BAKER. I have no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader and the Chair, and if the majority leader wishes some time which was yielded to me, I will yield it back to him.

Mr. BAKER. I thank the minority leader. I have no further use for my time.

Mr. ROBERT C. BYRD. If no other Senator wishes to have time, I yield back the remainder of the time.

RECOGNITION OF SENATOR SPECTER

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania (Mr. SPECTER) is recognized for a time not to exceed 15 minutes.

S. 3045—TO ALLOW HOME EQUITY CONVERSIONS THROUGH SALE-LEASEBACK ARRANGEMENTS

Mr. SPECTER. Mr. President, I rise today to introduce legislation which will enable elderly homeowners to keep their homes while, at the same time, converting the equity in their homes into guaranteed annual incomes.

Our elderly homeowners who must live on fixed incomes are often faced with a cruel choice. Confronted by ever-rising living costs, they must either reduce their standard of living or sell their most precious asset, their home, just to pay their bills.

The trauma of losing a home for which persons have worked for a lifetime is profound. But the alternative is equally dismaying: living out one's last years—the allegedly golden ones—in materially constrained circumstances. It is a choice no elderly homeowner should have to face if an alternative can be devised.

My bill encourages a mechanism known as sale leasebacks. Its purpose is simple. Rather than having to sell for funds to meet living expenses and moving to an apartment, elderly homeowners can sell to a financial institution but continue to live in their home under a lease while being paid an annuity.

Tax barriers to sale leasebacks would be eliminated by the legislation which I am today proposing. First, the elderly homeowner in the sale-leaseback transaction would be entitled to

the one-time capital gains tax exemption that is otherwise available to homeowners past the age of 55 who sell their homes. And, second, the purchaser/lessor could depreciate the value of the residential property it had purchased and then leased back.

With these tax barriers removed, I am confident that the sale-leaseback transaction will prove attractive to financial institutions.

The President's Commission on Housing has estimated that the potential market for these home equity transactions to be between $30 and $40 billion. And the Commission has said that this market can be expected to increase as the number of older Americans increases and the idea of home equity conversion gains acceptance.

Access to the rewards of home equity—which has been dearly earned—should be given to our elderly Americans during their lifetimes. It is of no value to them after their deaths. And it will go a long way toward making their last years truly golden ones.

This legislation will make sale leasebacks feasible. It will make them attractive both to the elderly homeowner and to the purchasing financial institution.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3045

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (d) of section 121 of the Internal Revenue Code of 1954 (relating to one-time exclusion of gain from sale of principal residence by individual who has attained age 55) is amended by adding at the end thereof the following new paragraph:

"(9) Sale or exchange defined.—For purposes of this section, the term sale or exchange shall include a transaction in which the seller retains a life estate in the property and the net proceeds from the transaction are used to purchase a qualified joint and survivor annuity (as defined in section 481(a)(11)(G)(iii)) for the seller.".

(b) Subsection (b) of section 167 of such Code (relating to depreciation for life tenants and beneficiaries of trusts and estates) is amended to read as follows:

"(h) Life Tenants.—

"(1) GENERAL RULE.—In the case of property held by one person for life with remainder to another person, the deduction shall be computed, except in a transaction described in paragraph (2), as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant.

"(2) SECTION 121 SALE OR EXCHANGE.—In the case of property held by one person for life with remainder to another person, pursuant to a sale or exchange under section 121, the deduction shall be computed as if the remainderman were the absolute owner and shall be allowed to the remainderman;".

(c) Section 167 of such Code is amended by adding after subsection (h) the following new subsection:

"(i) BENEFICIARIES OF TRUSTS AND ESTATES.—

"(1) BENEFICIARIES OF TRUSTS.—In the case of property held in trust, the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each.

"(2) BENEFICIARIES OF ESTATES.—In the case of an estate, the allowable deduction shall be apportioned between the estate and the heirs, legatees, and devisees on the basis of the income of the estate allocable to each.".

(d) The amendments made by this Act shall apply to sales or exchanges after the date of the enactment of this Act, in taxable years ending after such date.

Mr. SPECTER. I thank the Chair, and I yield the floor.

RECOGNITION OF SENATOR LEVIN

The PRESIDING OFFICER. Under the previous order, the Senator from Michigan (Mr. LEVIN) is recognized for not to exceed 15 minutes.

Mr. LEVIN. I thank the Chair.

SOCIAL SECURITY TITLE II DISABILITY REVIEWS

Mr. LEVIN. Mr. President, I asked for some time today in order to remind my colleagues of a very dire situation for the severely disabled former workers of this country—that is the unjust way in which beneficiaries of title II social security disability are being reviewed and terminated.

In 1980, Congress passed legislation which mandated the Social Security Administration to conduct continuing disability examinations of individuals receiving disability benefits once every 3 years. These periodic reviews were intended to insure that only those who are severely disabled and unable to work continue to receive benefits. Congress specifically directed the Social Security Administration to begin these reviews in January 1982, in order to allow time to establish the necessary procedures and to hire and train additional staff to insure that the reviews would be conducted efficiently and fairly.

However, rather than waiting until 1982 as the Congress had recommended, the Social Security Administration decided to start the reviews early and increase the volume of reviews. Predictably, reports from all over the country revealed a disturbing pattern of burgeoning caseloads and backlogs at all levels, poor development of medical evidence, undue reliance on hasty and incomplete consultative examinations, a disregard for the beneficiaries' complete medical history, and inadequate notice to beneficiaries.

On May 25, the Oversight Subcommittee of the Governmental Affairs Committee held a hearing where witness after witness sharply criticized the way in which the continuing disability reviews are being conducted and the frequently unjust results of those reviews. On August 18, the Senate Finance Committee heard similar testimony.

The situation has not significantly changed since those hearings. Although we went away for 8 weeks, this problem did not. Seriously disabled, desperately sick people are still being unjustly terminated from the disability program only to be reinstated some 9 to 12 months later—9 to 12 months during which they receive no benefits and no assistance for medical expenses. This is not the way we should be treating the workers of this country. I say "workers" because title II social security disability is not a welfare program—it is a disability insurance program. Individuals work and employers pay for the protections this program is supposed to afford.

A constituent of mine in northern Michigan was recently notified by an administrative law judge—on October 7, 1982—that indeed, the decision to terminate his benefits in January 1982, 10 months ago, was wrong. In the meantime, the constituent had spent over 30 days at the Mayo Clinic in Rochester, Minn., for treatment of his illness (which is lupus) and incurred medical expenses in excess of $10,000. His medicare coverage was terminated when his benefits stopped in January.

In another case, a woman from Michigan who was found to be disabled due to severe mental illness was told this past month that she would be terminated from the disability program even though the same psychiatrist whose diagnosis was used to bring her into the program stated that she is worse now than she was before. "There is no difference in her condition," the psychiatrist said, "except that her paranoia is more prominent and she is hearing voices."

In yet another case of a Michigan resident, who is of Greek descent and cannot speak English, this man was reinstated by an administrative law judge on November 17, 1982, 11 months after his benefits were terminated. This was because a Greek speaking attorney was able to fully explain this man's disability to the administrative law judge. Because of the loss of benefits during appeal, however, this man's house was to be sold at a sheriff's sale on November 19. The reinstatement of his benefits barely might be able to save his home.

These stories are being repeated in every State in this country. They are an embarrassment to our Government. "I believe," a reader wrote to the Detroit News in October, "that the system is trying to destroy our belief in justice."

89-059 O-86-39 (Pt. 20)

Mr. President, the 97th Congress cannot in good conscience adjourn without addressing this critically important problem. I understand that the substantive issues of the review process itself are complex and merit study—the dual standards used by the administrative law judges and the State disability examiners, the use of consultative exams versus treating physician reports, the proper time for a face to face interview, and so forth—and I am confident we can address these questions through hearings and legislation next year. But, until these fundamental changes are made, we must do something in the short term. The vehicle for a temporary solution and relief is H.R. 7093, which contains a provision sponsored by Senator COHEN and myself that was reported by the Finance Committee on September 30. It would continue the payment of benefits for persons terminated from the social security disability program until the appeal to an administrative law judge has been concluded. Since approximately two-thirds of the persons who appeal their terminations by the State disability examiners are reinstated on appeal, the payment of benefits through this period is the only responsible temporary remedy. Any benefits paid to a person whose termination is upheld on appeal would be subject to recapture by the Social Security Administration.

I repeat that this is only a temporary measure. By the terms of an amended version of the bill itself, it will apply to terminations only through September 1983. It is anticipated that by that time a permanent, comprehensive reform bill will have been adopted and the necessary substantive changes in place.

This bill currently has the support of 25 Members of the Senate who have cosponsored it, reflecting the broadest possible political spectrum. I want my colleagues to know, Mr. President, that the urgency of this bill, the need for this bill has not diminished one iota in the last 8 weeks. The horror stories have not gone away. They pile up daily. The problems are still present. The Congress must act.

I ask unanimous consent that several articles and letters depicting current examples of this tragic situation be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. LEVIN. Mr. President, I hope that our colleagues will read these articles and, in realizing the extent of the problem nationwide, will join in getting H.R. 7093 enacted into law before we adjourn in December.

I thank the Chair and I yield back the remainder of my time.

EXHIBIT 1

[From the Charleston (W. Va.) Gazette-Mail, Aug. 29, 1982]

DISABILITY—QUESTION OF BENEFIT ELIGIBILITY LEAVES THOUSANDS IN LIMBO

(By Beth Spence)

Two months after her disability Social Security benefits were cut off, Anna Carter went back to the work she knew best—waitressing.

She lasted less than three days before she collapsed and had to be carried out of the restaurant by her disabled husband, John.

That was in May. Today the 51-year-old Mrs. Carter is in a wheelchair with both her legs in knee-high casts. She has had one operation on her feet and faces further surgery, but she already has been told she probably will never again walk unaided.

"I went back to work because I was thinking we couldn't make it on what John gets a month on his disability," said Mrs. Carter, a serene-looking woman with a hint of Virginia in her Monroe County speech. "We were having a hard enough time with both our checks."

Mrs. Carter's case is not unique. Across the country, thousands of disabled people have been cut from the Social Security rolls during the past year and a half in a massive review of claims by the Reagan administration.

Between May 1, 1981, and May 28, 1982, state disability determination boards terminated benefits for 106,862 persons—or more than 44.4 percent of the cases reviewed. In West Virginia, 1,509 people lost their benefits.

A majority of the cases—Social Security officials say 55 percent—eventually are won on appeal, but lawyers representing disabled clients are frustrated with the length of time it is taking to process the appeals.

They also say tremendous pressure to deny claims is being placed on examiners who make the determinations and on administrative law judges who hear the appeals.

Joseph D. Coffman, manager of the Charleston Social Security office, said the reason for the increased number of re-evaluations is 1979 congressional action requiring review of all claims at least once every three years to make sure recipients still qualify for benefits.

Thomas H. Zerbe, managing attorney for the West Virginia Legal Services Plan in Lewisburg, argues that the review is being used as an excuse to terminate benefits for recipients whose conditions have not improved.

"Sometimes this results in a disabled individual being forced to go against his doctor's advice and return to work while his case is pending," Zerbe said. "The consequences can be tragic."

Anna Carter can attest to that. A sickly child, Mrs. Carter can remember that her father had to carry her from room to room when at 9 she developed a condition doctors diagnosed as an inflammation of the bones in her legs.

Through the years, the infection has recurred in different parts of her body. Mrs. Carter says the initial attack left her legs so weak that even as an adult her ankles turn if she steps on something as small as a matchstick.

At 16 she quit school to get married and she and her husband moved to Virginia. By the time she was 19, she was divorced, on her own, and had a child to support.

She took a job waiting tables, but was soon forced to take a second job at a ribbon factory to make ends meet. For six years, she worked 16 hours a day—an 8-hour shift at the restaurant, followed by an 8-hour shift at the factory.

When the ribbon factory closed, she worked for three years at a book-binding factory, standing on her feet 8 hours a day.

During that time her health began to deteriorate. Between 1949 and 1980 Mrs. Carter had 23 operations, including the removal of 16 inches of her intestines, part of her stomach, her gall bladder, a disc from her back and a large gland from her neck.

In addition, she was diagnosed as having angina, for which she takes nitroglycerine, and an aneurysm in her temple.

Mrs. Carter qualified for Social Security disability benefits in 1973, after she had to quit working at the small grocery store she and Carter, her second husband, bought after they were married in 1967.

One of her more severe health problems is dumping syndrome, a condition in which food passes rapidly through the body. She developed the problem after 75 percent of her stomach was removed in 1963.

"When I eat, it goes right through me," she explains. "I got to where I only weighed 98 pounds and the doctor told me to eat six times a day and lie down for an hour after I eat."

By following her doctor's instructions, Mrs. Carter had managed to spend more than a year off the operating table when she was told by Social Security officials to go for an examination early in 1981.

"The doctor told me to move my neck and hands, which I did, and touch my toes, which I couldn't do, and that was the examination," she explained.

In February, examiners determined that Mrs. Carter again could work in a store, and she was told that her checks would be cut off in March and her Medicare benefits would end in April.

"I knew I had to go to work," she said. "I thought I was lucky to find the job I did."

The first day, her heels bothered her, but she thought they would be all right, that she just had sore feet because she wasn't used to standing all day.

"For the three days I worked I never ate a mouthful of food because I knew the owner would let me go if I had to keep going to the bathroom," Mrs. Carter explained.

The second day her feet were worse. "The third day I just couldn't put weight on my heels. John had to come and get me and carry me out. If he couldn't have helped me, I would have had to crawl."

Her doctor said the infection, which had spread through her body since childhood, had been touched off again and she should not bear weight on her feet.

"But you know how it is, sometimes you have to get around," she said. "I let the dog out and she was in heat. A male dog came around and I just forgot about my feet. I took two steps toward the dog and I must have hit the back of my heel on the doorsill. The tendons snapped in both my heels."

Mrs. Carter had to have the tendons wired back to the bones in her ankles. Complications developed in her right leg, which doctors have told her will require further surgery, and a large sore has appeared on her ankle.

"I asked if I would walk and the doctor said he was afraid I'd never walk like I did," she said.

As Mrs. Carter's medical bills mount and her appeal drags on, she and her husband are trying to sell their two-story farmhouse just outside Alderson in Monroe County.

They plan to move to Virginia and care for Carter's aging mother in exchange for food and shelter.

"We had planned on this for our retirement home," said Carter, who has had a heart attack and triple bypass surgery. "We've been more contented here than anywhere we ever lived. But we just can't make it."

Social Security officials are convinced that situations like Mrs. Carter's are rare.

"We are concerned that some people have been taken off the rolls who are indeed disabled, although we believe that number is small," said John Trollinger, deputy press officer for the Social Security Administration in Baltimore.

Trollinger said the agency has found an error rate of only 3 percent in monitoring state decisions.

In West Virginia, Social Security disability claims are reviewed by the Disability Determination Section of the state Division of Vocational Rehabilitation.

A. J. Allen, administrator of the DDS, said reviews show that the conditions of a number of individuals have improved, making them no longer eligible for benefits. Others weren't disabled in the first place, he said.

Allen said he believes "far too many claims" denied by examiners are being reversed by administrative law judges.

Asked if the Reagan administration has set a national goal of terminating 25 percent of the cases reviewed, Allen said briskly, "No. But we'll probably terminate more than that."

Trollinger cited a number of reasons for the high number of reversals by administrative law judges.

"Sometimes the condition may have worsened," he said. "Sometimes medical evidence can be presented that wasn't available when the decision was made to terminate benefits. And when the administrative law judge hears the case, he or she has the ability to look at the person. Sometimes you can tell a lot more when you see someone."

For Janet Friedman, the paralegal in Lewisburg who is handling Mrs. Carter's appeal, the reversals aren't happening quickly or often enough.

"I feel that attitudes are changing," Ms. Friedman said. "I'm just not winning the cases I used to win. One examiner as much as said to me that he wanted to decide the case in favor of the client, but he was afraid it would be kicked back to him.

"It's a waste of time, energy and money," she said. "They hired more people in DDS when they had to start making the decisions, they get rooms at Holiday Inns, hearing assistants are paid. Where's the saving? It seems like the money is being redirected instead of going to recipients."

A case that was decided quickly, according to Ms. Friedman, involved a client whose benefits were cut off in March. His hearing was Aug. 11 and the decision to restore his benefits made on Aug. 19.

But that was "unusually fast," according to Zerbe. More typical is the case of a client who was terminated in March 1981, had a hearing in November and didn't get a decision until the following June.

"So many of these people are being asked to do without benefits for more than a year and, because our funds have been cut, we're having to turn away clients," Zerbe said. "There's not only an injustice here, but peoples' ability to respond legally is being cut off."

Zerbe said examiners and administrative judges have admitted privately they are under a lot of pressure to get people off the disability rolls.

He said decisions in favor of the clients—both by DDS officials and administrative law judges—are being carefully scrutinized, while decisions against clients are not being monitored.

Trollinger said his statistics show more reviews of cases decided against clients. "We have reviewed twice as many reviews that terminated benefits as those that allowed benefits," he said.

Social Security "is such a political football and no one wants to cut old age and survivors off," according to Zerbe. "This seems to be a way that required no congressional action and no one had to take the heat."

No one, that is, except people like Anna and John Carter, who can't hide their bitterness toward the Reagan administration.

Wiping tears from her eyes, Mrs. Carter said, "When I woke up after that last surgery, if President Reagan had been standing at the foot of my bed, I would have told him what I thought. Just think, all of this for 2½ days work."

"This is all on account of Reagan," Carter said. "Because of him, what walking she'll be doing will be on crutches."

[From the Detroit News, Oct. 3, 1982]

SOCIAL SECURITY: A SIEGE CRISIS

(By John McAleenan)

In March of this year, word went out to Social Security offices in Michigan and across the country: Get tough.

A month or so later, people started getting tough right back.

The "tightening up" procedures and case reviews spawned an avalanche of threatening telephone calls to Social Security and disability-determination offices around the country.

Officials in Michigan say it wasn't uncommon at many offices to have a caller let loose a series of threats, then repeatedly click the hammer of a gun in the telephone headset. These threats have doubled and tripled in recent months. A bomb was mailed to the Southfield Social Security office early this summer.

At the suggestion of Michigan State Police, disability-review officials had all the windows bulletproofed in the three offices around the state; took down identifying signs in front of the facilities; and beefed up security throughout the buildings. "We're not scared," says one worker, "we're just being sensible."

Recently, a man committed suicide in the parking lot of the Social Security office in Lansing after being denied disability benefits. In Los Angeles, 11 persons were reported to have died of illnesses for which they had applied for federal aid, but were denied.

In that fractious and sometimes tragic atmosphere, it is not surprising that a lot of people are coming to agreement on one point. The Social Security's Disability Determination Service in this country is a system searching for an overhaul.

Some think it is too tough. Others say there are too many cracks through which fraud can escape.

Congressional offices, both in Michigan and across the country, are being inundated with letters from irate constitutents who have either (1) been yanked unceremoniously from the disability rolls or (2) been denied disability benefits or (3) know someone who has.

Ivan Cotman, an associate superintendent for the Michigan Department of Education, the agency the government subcontracts the disability claim work to, is admittedly the man on the point in of all this. He's in charge—and at times it pains him.

Cotman hurries to say: "We are very sensitive to the impact we have on people, despite the picture they paint of us. We are also very insistent on making sure they get hooked into the rehabilitation processes available if they are denied benefits.

"We don't leave people stranded, just knock them off the rolls and let them hang there. There are a variety of tools we can provide, from vocational counseling to employment leads.

"The bottom line is that we are in the middle of this. We don't write the federal guidelines, we implement them. And if we did a lousy job at that, the contract (worth $22 million this year) would go to some other agency and 580 people would be looking for work. If there are going to be any changes, they will have to come at the congressional level."

A point well made by Cotman, since it was at the congressional level during the Carter administration, and at the president's urging, that a Social Security amendment was passed in 1980 mandating more frequent reviews of disability cases already on file; a toughening up of medical standards and reviews for persons filing disability claims; and in general, just a closer look at where the estimated $102 billion (in 1980) paid out in disability benefits is going.

One government survey, in 1978, suggested that at least 20 percent of the people then receiving disability benefits (584,000), either no longer qualified or shouldn't have received them in the first place.

(For the record, the Social Security Administration defines disability as: "the inability to do any substantial, gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted, or can be expected to last, for a continuous period of not less than 12 months . . .")

The Reagan administration, which is getting much of the heat for the uproar the new procedures are causing, did little more than accelerate the process, moving the timetable from September of this year back to early March.

In quick succession, the following developments began to make news:

There was an immediate 15 percent increase in continuing disability reviews and a nationwide average of 70 percent denial in new disability claims.

A congressional amendment to allow disability benefits to continue to be paid while a denial was being appealed was voted out of the Senate Finance Committee late last week. The amendment is still under consideration.

A growth industry in the legal profession took place, with one West Coast group of "public service" attorneys successfully appealing 59,000 cases in 1981 alone, earning fees for themselves totaling $65.2 million.

A troublesome paradox quickly became apparent in the Social Security office of Hearings and Appeals. On one hand, the disability claim offices were found to be making strict and correct interpretations of regulations denying benefits. Yet, when these denials reach an administrative law judge on appeal, many of them (the average nationwide is close to 65 percent) are reversed and payment is granted.

Several moves are currently being studied to get these judges in line with the disability denials. Among them would be having

Social Security attorneys present to argue the government's position and the issuance of a "manual" for judges emphasizing the use of the same criteria and the need for uniform agency policies.

The government also has hired 140 new judges, bringing the total to 800, to ease the docket load and cut down on hearing times. The appeals process, from the original disability denial to an administrative law judge hearing, can be as long as four to six months. There were 1.78 million disability claims nationwide in 1981. Of these, 252,600 eventually wound up in law judge hearings.

William Edmunson, director of Michigan's three disability claims offices, says that "there's been an awful lot of heat generated since we went to work under the 1980 guidelines. I'm pretty sure there will be a reduction in the review procedures in the next couple of years."

Edmunson, like Cotman, is a man in the middle of the battle. He's doing a good job. Which also means a lot of people on the short end of a disability decisions don't like him. Michigan's examiners were graded at 90 percent plus recently in a quality assessment review, meaning they were pretty close to perfect in making a strict and correct interpretation of disability claims.

"There are goals in our operation," says Edmunson, "but primarily we look at accuracy. If an examiner is not accurate in determining a disability, then we have achieved nothing."

Pete Griswold, state director of Michigan's rehabilitation services, didn't want to get in the middle of all this along with Cotman and Edmunson, but finds himself there anyway.

His office gets referrals from the disability office when a claim is denied. His program, at least on paper, is designed to find another job for that person, either by retraining, vocational counseling, or other means.

In the beginning of 1981, Griswold was looking at $3.4 million in federal contributions to help him with this job. In October 1981, he was looking at zero, as he is now.

"There is simply no federal money available to continue the program. We still have state aid, of course, and some from other sources, but lack of money is eroding of staff, services, counseling, everything.

"It seems to me the present administration is trying to cut down money in the front end to look good at budget time, but that kind of thinking is creating dependency instead of independency—which means they will pay for it in the long run. We are creating a pool of people who are not unemployable, but simply unemployed."

Another man is not in the middle of anything. He got out. After three years as a disability claim examiner, he quit recently and started his own consulting firm, helping persons who have been denied benefits. He requested anonymity to protect an already fragile working relationship he has with State Social Security officials. He contends there was a sense of "hurry up" about the job.

"From the administration point of view, the idea was to get the claims in and out as fast as possible, but adhering as closely to the guidelines as possible. It was, in the strictest sense, management by objectives, and the objective was to move those claims along. You could argue for more time, but if it (a decision) was not forthcoming very soon, it got shipped out."

On an average, this person processed about 25 decisions a week. Only a few cases came alive during all that paper shuffling.

"Some of them were very hard to work on, because you could sense the dilemma, or pain or something, but in the end, if the book says the hemorrhoids have got to be three inches long, then they've got to be three inces long—and that's it.

"It was an assembly line operation, there's no question about it. The head office in Baltimore runs the system like a dictatorship, and they crack the whip. We didn't have an official motto in my office, but 'Get It Out' would come close.

"If you ran into a deadline and were still unsure about the claim, the thinking was to send out a denial, figuring the client always had another crack at it on reconsideration.

"I, for one, am certainly glad the people have the administrative law judge procedure down the line. We just looked at the rules, but couldn't look at the pain. We could look at a guy with five or six back operations behind him and maybe figure out how much he could lift, but have no sense of how he felt. As examiners, we just looked at the guidelines, the law. The judges can look at the spirit of the law."

[From the Detroit News, Oct. 3, 1982]

ONE LIFE TO LIVE . . . SIX MONTHS TO LIVE IT

(By John McAleenan)

Ken and Connie Marsee celebrated their 14th wedding anniversary at home two weeks ago. It was a private party, just Ken and Connie sitting at the dining-room table. The kids, Mike and Marc, were in bed.

They talked about the tapes Ken had been making and what colleges the kids might go to when the time came. They talked about some favorite dreams. They talked about bills. They talked about Ken's nagging cough. They talked about many things except the one thing they had already talked to much about.

And then, as the night grew old, they went to bed and held each other tightly, falling asleep knowing there would never be a 15th wedding anniversary.

The Marsees' suburban brick home in Warren is nothing less than House and Garden lovely, and Connie will blush just a little when Ken mentions that she did all the decorating herself. Mike is 9 and at school and Marc, who is 4, is in the basement banging around, doing a little redecorating.

The sun is shining outside, birds are at the feeder, somewhere children are playing, Ken and Connie are chuckling at a private joke, and there is nothing, absolutely nothing in this pretty house, to tell you that (1) Kenneth Marsee is walking around with a malignant brain tumor that will kill him in six months or a year at the most, and (2) the Social Security Department has denied, for the second time, his claim for disability benefits.

"It was not what you would call a bang-up summer," say Connie, "First Ken gets a death notice, and then we get what amounts to a notice saying I better start thinking about food stamps. That's a pretty good one-two punch.

"We didn't always have a sense of humor about this, but we quickly found out you can't live a normal life talking about nothing but dying all the time, so we've put that aside. We do just one day at at time, trying to cram as much as we can in that day."

What Ken and Connie did not put aside, and will not put aside, is a letter dated Sept. 16 from the Social Security's Disability Determination Service. It sits centerpiece on the dining room table. It reads, in part: "The medical information shows that you do have a brain tumor . . . however, your condition does not restrict you to the extent that you would qualify for Social Security benefits."

Period.

Ken leans back in the chair, lights a cigaret and smiles a soft smile. He knows the explosion is coming. Connie does it better than he can. And in a sense, it's her battle. His is over.

"What in God's name are those people thinking about? Do we really have to wait until he's paralyzed or blind to get benefits? What more do they want? How disabled do you have to be?" It is not a hammering-on-the-table kind of explosion, but still, Connie sits down again, somewhat exhausted. She has asked the same questions many times. So Social Security sent her another letter.

This read, in part, "We realize that your condition prevents you from doing your job as supervisor, but it does not prevent you from doing work . . . that is not difficult and which can be learned in a short period of time. You do not have a disability severe enough . . ." etc.

Period.

They can both laugh at that letter. "Well, they were right about one thing," says Ken. "At least they are qualifying me for work I can learn in a short period of time."

If Ken and Connie were amazed at the response from the Social Security office, their physician, neuosurgeon Dr. Warren Hardy is . . . well, he's dumbfound.

Dr. Hardy performed the surgery on Ken last March, when it was determined that after two months of splitting headaches, he had developed a fast-growing frontal lobe tumor.

The operation was only partially successful. A portion of the tumor, which proved to be malignant, could not be removed, and following six weeks of intense, daily radiation treatments, a CAT scan showed it was rapidly growing again. Further radiation and chemotherapy treatments were considered "marginal" efforts at best.

Ken, just a shade past 36, once a foreman in the steel construction field, once a bowler, once a swimmer, once a dancer, once a man who sometimes made $50,000 a year, went home angry and hid for a while. He did not want to see or talk to anyone.

Dr. Hardy wrote "astrocytome, grade II" on the disability form sent for him to fill out and answered a series of other questions. He later sent a letter to the Social Security office restating his opinion that Ken was "completely and totally disabled." He added: "This is permanent, and life expectancy for this patient is six months to one year."

Dr. Hardy went over his letter again a few days ago. "It's a mystery to me how the agency can react that way with the information I gave them. I don't understand it. In fact, I can hardly believe it. Maybe they asked the wrong questions, or were too general about what they wanted. I just don't know.

"Ken can't work. Hell, I wouldn't hire him to do anything. I can't imagine anyone that would. As the tumor continues to grow, he will experience increasing drowsiness. His personality will change. He'll lose his appetite. Eventually he may have seizures or become paralyzed. His judgment will be impaired, he'll have poor memory. He will become very weak. I simply can't understand what those people are thinking about."

When all this is said, however, that disability denial is, at the moment, more utter frustration than a full-blown catastrophe. An attorney has been hired to take the claim to the third level of appeals, before an administrative law judge.

Connie is certain they will fall upon someone who is sane in the system, if not sooner, then later. She would like it sooner, if for no other reason than to avoid having to apply for food stamps. The money, you see, is also fast running out.

At the dining-room table, Ken and Connie have sort of divided the problems.

Connie: "I have myself and the kids to keep me busy. I worry about them. That keeps me from bothering Ken too much. The money is becoming a hassle. We are getting $50 a month now in insurance disability from the union where Ken worked. We did get $94.30 a week for 26 weeks, but that ran out. I guess you could say we are sweating it out as far as that goes. The disability money, should we get it, would be $1,100 or $1,200 a month and that certainly would make a difference. It would take some worry from both of us. I could go shopping for school clothes, little things like that I can't do now."

Ken is worried about his rotten cough and a dramatic 30-pound weight loss. "But you still have to have a little sense of humor. I found that very important. I can even laugh a little at this silly wig I wear sometimes. The bad news I sort of put away. I don't think about it anymore."

"The good news is you tend to see things more sharply. Everything is like . . . well, in a tight focus. You hold things more closely. I miss some things. The baseball season with Michael, for instance. He played outfield in the league and I helped coach. But I can't do that any longer. The doctor closed all the doors."

With a summer of tears behind them, with the dreams resurrected the last time and put away, Ken and Connie simply get up every morning like anyone else and get through the day as best they can. In other times, there were wishes to be brought out and fantasies to examine, but that is gone now.

Connie: "The dream we had the longest was that on our 25th anniversary, the kids grown a little and off to college, we'd vacation in Hawaii. Ken has always promised me we'd go there. I guess not now. You know, you think about all this and it seems so unreal. We would have laughed if someone told us this would be happening to us a year ago."

Ken has a few things he's looking for as the season turns to autumn. Not much. "I'd like a little dignity as this winds down. I'm hoping Mike will remember me. I think he will. We've done lots together.

"I've got tapes made for the kids to listen to as they grow older, special tapes for special times in their lives. I'll be around that way. It's not enough, but it's all I can do. I just told them they could be president of the U.S. if they wanted to. And although I wouldn't be here, I expected them to do the right things at the right time. Especially to go to college.

"I will always love them. I told them that. I'm sometimes sad about this because I wanted to see them grow up. That would have been one of my greatest pleasures.

"Some time ago I promised Marc I'd take him to Disney World, but I put it off, and put it off. I was always putting things off, always saying, 'Wait 'til tomorrow.' I was something of a procrastinator."

Ken laughs a little at this point, as much to himself as anyone. "You know, a malignant brain tumor is a tough way to cure a procrastinating problem, but it's very effective."

[From the Philadelphia Daily News, Nov. 11, 1982]

SURVIVAL: THE SYSTEM VERSUS WALTER DAVIS

(By Julia Lawlor)

In the daytime, when the sun warms the grassy field where Walter Davis sleeps, it is easier to see why he would call it home.

His bed—a 6-foot square of soiled blankets—is nestled just behind a furniture factory at Richmond and Cambria streets in Port Richmond. Overhead cars whiz by on I-95, and at night Conrail trains rumble down nearby tracks. Rats scurry over him in the darkness, heading for a trash heap on the other side of the factory. He says he sleeps well, that no one bothers him. Always there is the faint smell of rotting garbage.

Davis, 47, has been sleeping outdoors since his Social Security disability checks were cut off early last month. He is one of more than 4,000 Pennsylvanians who have lost their disability benefits under the Reagan administration's controversial stepped-up review process, begun in March 1981.

He had been collecting $490 a month in disability benefits for the 17 years since an operation to remove a brain tumor left him with a paralyzed left arm and leg and suffering from epileptic seizures and poor vision.

Although Davis has tried to get on welfare, in order to apply he must get a copy of his birth certificate at City Hall and a medical report from a doctor. He does not appear to be in any hurry to do either. His friends say this is because he is incapable of taking care of himself, especially in times of stress.

Lately, he claims he's been having as many as three seizures a day as a result of the pressure he's been under since he lost his monthly check and was thrown out of his rented room.

Most days, Walter Davis wears an old brown-and-white cap pulled over his head, a striped shirt, a stained polyester jacket, red pants and an old green plastic raincoat. He walks slowly, hunched over and dragging his left leg.

His blue eyes stand out against his dark, weathered face. "They sparkle," he says proudly. "They do the talkin' for me."

Much of his day is spent in the Rose Garden Flower Shop at 2964 Richmond St., where he occasionally mails a letter or takes a ride in the delivery truck. There he is treated as "one of the guys." He may look like he has given up, but there is something that remains in him of his old self that endears him to people.

"I've known him five, six, 10 years," says John Petaccio, owner of the Rose Garden. "He's just been around. He's no problem at all to anyone, other than he's dirty. He's a good citizen—no villain by any means. He came in here the other day and wanted to know if we all voted. He got up and voted bright and early—Republican." Petaccio chuckles, thinking about it. "He's a passive type of person. He's not lazy, he's a good guy. There's not a mean bone in his body."

Petaccio is outraged that anyone could think Davis is capable of working. He has made repeated calls to the local Social Security Administration office, with no effect. In the meantime, flower shop employees feed Davis, give him money for medicine, store his clothes in their garage and offer him a warm place to stay until closing time.

"Social Security believes that if he took his medicine (to control epileptic seizures) he could work," says Petaccio. "He's not capable of working, whether he has a seizure or not. Eleven million people are unemployed in this country and some guy is gonna hire him?

"This is just not right in today's society. Walt is a human being—he's a victim of circumstances. All he wants is a place to live."

"He's in bad shape," says David Hill, an attorney in Community Legal Services' Kensington-Allegheny office who is appealing Davis' case to the Social Security Administration. "He's fortunate he has his friends, because there's no way he could manage on his own."

Hill said Davis could conceivably be without an income for a year or more because of the backlog of cases before administrative law judges who decide on disability claims. Meanwhile, Social Security has agreed to reconsider Davis' case.

Davis has been living on Social Security disability for so long that he doesn't remember exactly when the first check arrived. He believes it was in 1965 or '66 a year or so after the brain surgery. That's why it was such a shock to him when the letter cutting off his benefits arrived at the flower shop in July.

"The evidence in file shows that the strength in your arms and legs is good," reads the letter to him from the Disability Determination Division dated July 2, 1982. ". . . You could be capable of working at unskilled and uncomplicated jobs such as machine cleaner, sorter or assembler . . . You are able to do jobs which require lifting of not over 50 pounds, frequent carrying of not more than 25 pounds, and standing and walking for up to six hours of an eight-hour workday . . . ."

This conclusion was based on reports from the three "consulting" physicians hired by the Disability Determination Division in Wilkes-Barre, Pa., a state agency that holds a contract with Social Security to perform periodic reviews of disability cases. None of Davis' physicians at Hahnemann Hospital's seizure clinic was asked for an opinion.

"We did not obtain any other reports because the ones shown had enough information to evaluate your claim," the letter stated.

One of the doctors who examined Davis last May, Dr. Mark Faynberg, reported that Davis told him he gets only three to six seizures a year. He said Davis told him three of the seizures had occurred in the previous week.

Faynberg disputed Davis' contention that his left arm and leg were paralyzed.

"As far as a possible seizure order is concerned," he wrote, "the description, duration and complete lack of weakness are inconsistent with epileptiform disease [epilepsy]."

Hill says that although Faynberg's report alone may have indicated that Davis was able to work, his past medical history and other impairments—poor vision and difficult in using his left hand and arm—should have been considered. He added that since Davis was dropped from the rolls, he claims he has had as many as 50 seizures.

"Some of the things they said are fairly ridiculous," Hill says. "You can tell by looking at him that he can't lift 50 pounds, or carry 25 pounds."

No one who made the decision to cut off Davis' checks had ever seen him.

"We don't think the decision was wrong," said Rose LePore, regional commissioner for Social Security in Philadelphia. She refused to discuss details of the doctors' reports, or how the decision was reached.

"Based on evidence in the file, based on the information he provided to a doctor, the individual is not disabled to the point where he cannot work," she said.

LePore said her agency felt no responsibility to ensure that Davis had enough money to feed, clothe and shelter himself once his checks were stopped in early October. "Our responsibility is to assure that people receiving benefits are entitled to those benefits," she said. "There are hospices, and other agencies [for people in Davis' situation].

His memories of childhood are vague—he says his mother put him in the Northern Home for Children, a private home for dependent and neglected children in Roxborough, when he was 4. He recalls suffering from excruciating headaches, which he believes came from a tumor in his brain that was not diagnosed until he was much older.

His first marriage, to a woman named Angelina, lasted seven years.

In 1959, he married again, and had three children with his wife, Judy. He worked as a machinist in a knitting mill at 10th and Callowhill streets. He believes that an auto accident he had in 1962 triggered the growth of his brain tumor, which had expanded so much that by 1963 he was unable to work.

He had an operation to remove the tumor at Germantown Hospital in 1964, he says. The doctor who performed the operation and cared for him in the years following, died earlier this year.

"I was in the hospital a good year or better," Davis recalls. "I couldn't do anything. It took me a couple years to get over it."

But he was never the same again. And when his wife left him after a trip to Florida in 1965, he seemed to lose all will to live.

"She never came home," he says, tears in his eyes. He shows a visitor a handful of faded color snapshots he carries in his pocket. One shows his oldest daughter Judy, posing for the camera in the family's Germantown home on her first communion.

Davis moved in with a friend in Port Richmond after his wife left him. He's been there, or in one boarding home or another, ever since.

In September, U.S. Secretary of Health and Human Services Richard Schweiker announced changes in the Social Security disability review process in response to several suicides committed throughout the country by despondent recipients whose benefits had been terminated.

Beginning Oct. 1, all claimants were supposed to be seen in a face-to-face interview before a decision was made on their cases.

Even if Davis had been eligible under this new requirement, says Jonathan Stein, chief of law reform for Community Legal Services, it would not have helped him.

Stein calls the new change a "public relations gesture." The interviews, he says, are conducted at local Social Security offices instead of by disability determination workers upstate who make the ultimate decision.

"The adjudicator still does not see the claimant," says Stein. "The decision is still made on paper."

"They had repeatedly found [Davis] was eligible [in the past],' he continued. "Now they're reversing their own decision. What we've been arguing is that you can't treat him as a new applicant. Social Security should have the burden to prove someone has medically improved. They don't want to do that. They want to make it easier for themselves."

Stein and Social Security has also quietly instituted a practice of considering each disability a person has individually, instead of looking at the overall combined effects of "multiple impairments" as the regulators require.

Barry Stern, state secretary of labor and industry, testified on Social Security's review process before the U.S. Senate Finance Committee last August.

". . . [Social Security] no longer considers the combined effect of all impairments of an individual, rather evaluates each impairment singularly, resulting in many of the multiple disabled being terminated from the disability rolls."

Stein believes that this may be the reason why Davis was dumped after 17 years. If he appeals the decision to an administrative law judge, he has a good chance of winning—67 percent of those who appeal win their cases. Half those who are terminated, though, never appeal.

While Davis waits for is case to be decided, he continues to sleep in the field.

The Daily News contacted Franklin Anderson, a social worker for the adult services section of the city's Department of Public Welfare, last Friday about Davis.

"The city's going to get him off the street as soon as possible," said Anderson. Davis spent three more nights in the cold. "So far, we haven't been able to locate him. Anderson explained Monday. "Everything indicates this man ought to be in protective service with us. We're marking this urgent."

Yesterday, Davis had an appointment with a city social worker for 4 p.m. at the flower shop. The social worker never showed up.

A letter from Mark Caldwell, an attorney from Phoenix, Arizona, who represents disability claimants, to several members of Congress, dated September 24, 1982, states in part:

"As an attorney who does a great deal of disability work, I would like to share with you two recent examples from my own case load that . . . illustrate (the disability review) problem . . . . The second example from my current case load involves an individual who was found to be no longer disabled as of November, 1981. We proceeded to hearing which was finally held in June of 1982. Thereafter, the claimant was ultimately issued a favorable decision by administrative law judge in July of 1982 wherein he was found to remain disabled. Unfortunately, the claimant was not able to celebrate the results of his lengthy battle with the SSA bureaucracy since he died from his disability (a cardiac impairment) on July 1, 1982. The claimant's survivors have indicated to me that the claimant's doctor indicated to them that he felt the added stress of having the claimant's only income taken away from him while legal proceedings continued was a factor in the fatal heart attack.

"I note that the enclosed article finds that the Social Security Administration has audited the Social Security Administration finding that only three percent (3 percent) of the cessation decisions are erroneous. My personal experience in handling quite a few of these cases indicates that considerably more than 75 percent of my clients who survive this process are ultimately found to be suffering from a continuing disability. The tragedy, of course, is that many people cannot tolerate the inhumane process which they are forced to endure in establishing their continuing entitlement. I applaud your concern for these victims of governmental bureaucracy.

"Sincerely,

"FRIEDMAN & CALDWELL,
"MARK CALDWELL."

PHOENIX, ARIZ.
August 19, 1982.

Re: (Name withheld for purposes of confidentiality) claim for period of disability and disability insurance benefits

Mr. RICHARD S. SCHWEIKER,
Secretary of Health and Human Services,
Washington, D.C.

DEAR SECRETARY SCHWEIKER: I have received a copy of the Department of Health and Human Services' "Social Security Award Certificate" dated August 6, 1982. This office represented———in his proceedings before your agency.

When———was denied disability insurance benefits upon reconsideration, the "explanation" attached to that decision in March of 1982 indicated that he maintained a stable weight. Indeed, when I visited Mr.———home to discuss his claim in May of 1982, it appeared that he would have the opportunity to lose very little weight since he indicated to me he weighed only 73 pounds.

I note that the award certificate indicates that "Since your condition may improve, we have scheduled a review for June, 1983." I regret that your organization will not have the opportunity to conduct this review, since———died from his illness prior to the issuance of a favorable decision by an administrative law judge. No further improvement is expected in Mr.———condition, although I do believe he has now satisfied his burden of proof in proving disability.

Sincerely,

FRIEDMAN & CALDWELL,
MARK CALDWELL.

NOVEMBER 8, 1982.

CARL LEVIN,
U.S. Senate
Washington, D.C.

DEAR SENATOR LEVIN: You are the first I am writing to concerning the favorable Social Security decision. The final outcome was obvious, because the original decision was without basis. I hope you will continue to take the time to review what had happened to us. The file is quite detailed and interesting reading.

The file will not include what it has personally cost us:

Our bank account of $10,000.00 is gone.

A rental property was sold because we could not meet the payments nor obtain a loan with no income. The loss here another $10,000.

Hundreds of dollars gone on postage and xerox copies.

Thousands on doctor bills—and they still aren't paid.

The back payments received did not cover the money we borrowed, finance charges we paid during the purge. Nor did the government pay us interest.

Our credit is ruined. I had requested a letter to submit to our creditors explaining what had happened and that the decision was unfounded and beyond our control. My request was ignored.

With our cash and investment gone, we will be unable to meet a $20,000 demand note due on our property in 1984. We will lose our custom built home. I've already had

it appraised. If we sell now—IF it can be sold—we will lose another $40,000.

My husband's overall condition has deteriorated. Emotionally, we are both drained.

Finally, my mother didn't make it. She was weak from cancer, just as she showed some improvement, our hearing was held and more waiting began. The stress and worry over her child and grandchildren added to her already overwhelming stress. The day after she died the first check arrived. While we were at her wake the children's check came. The day of her funeral, my husband's check awaited us. She was only 60 . . . Never collected a penny from Social Security nor Welfare—but she died totally disgusted with this country and our government.

In ten years, I do hope you'll look for the sons of the doctors who cheated us, the politicians who didn't care, the social workers who are being bribed—but don't come looking for my sons. You've taken everything else we have.

You personally have been outspoken in behalf of us and others like us. We sincerely thank you.

Name withheld for purposes of confidentiality.

[From the Detroit News, Oct. 3, 1982]

(The Social Security disability stories in today's Accent are a followup to an article written by John McAleenan and published in this section July 25. Entitled "In the Matter of Frank Williams' Back," it considered the case of a Detroit man who hobbled around with excruciating back pain, certified by his doctor, after two operations had been performed. Yet he was ruled "not disabled" and was cut off from Social Security disability payments. Following are some readers' reactions, edited for space. Contributing to this series of stories was Contact 10 editor Roy Courtade.)

"DEAR SIRS: I am presently facing almost identical circumstances as those of Mr. Williams. One year ago I was stripped of my Social Security disability benefits, just like he was. I has been receiving them since May of 1974. I also have a severe back injury that two surgical attempts at correction have further complicated. I assume the administrators at the Disability Determination Service believe that any attempt to surgically correct or prevent further deterrioration, by virtue of its implementation, must be successful . . .

"The judge reviewing Mr. Williams' claim stated that several times he appeared hostile in the proceedings. After waiting the better part of a year in the belief you will be given an impartial hearing, and then finding the judge is an advocate of the system trying to destroy you, it is not the ideal situation to remain unperturbed. You're damn right Mr. Williams was hostile. So am I."—Kenneth Kreager, Port Clinton, Ohio.

"DEAR SIRS: I, like Mr. Williams, am trying to collect Social Security benefits. I have three minor children, can't drive a car or lift a bag of groceries. I am not a candidate for surgery, but I have arthritis, myelitis and a slipped disc. I was denied my first application for disability because of a clerical error on their part. I filed for reconsideration, and this, too, was denied. Since then I have been hospitalized for ulcers and spastic colitis.

"I must write this because I feel, as does Mr. Williams, that the system is trying to destroy our belief in justice and the right to appeal. If denied a third time, I will appeal again and again. There is nothing else to do. Yes, Mr. Williams, I am walking in your shoes."—Betty J. Dumas, Detroit.

"DEAR SIRS: I just read your story on Mr. Williams' bad back. What gets me upset is this judge has the right to say that Williams can do *some* kind of work. How can this man sit back and judge someone else's pain? I have a bad back and do not wish bad luck to anyone, but I wish the judge would have his back go out on him one day, like mine does frequently, and let him know what it's like not to be able to get off the toilet or get dressed or walk down the stairs.

"Let him sit down in a chair and try to get back up again, or take what it seems like hours just to roll over in bed. Thank you for the story on behalf of everyone who has experienced that kind of pain."—Christine See, Detroit.

"DEAR SIRS: Thank goodness you have finally made the public aware of what's going on with the disability reviews. I, too, am going through the same thing with a bad back and fighting like hell with the insurance company and their 'hired guns' to maintain my workman's comp benefits. There are many, many people out there who are being cut off and denied benefits they deserve."—Ed Rowland, Westland.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. I suggest that the Senator from Georgia be recognized.

RECOGNITION OF SENATOR MATTINGLY

The PRESIDING OFFICER. The Senator from Georgia will now be recognized for not to exceed 15 minutes.

Mr. MATTINGLY. I thank the Chair.

S. 3049 THE POULTRY AND EGG EXPORT EQUALIZATION PLAN

Mr. MATTINGLY. Mr. President, it is apparent the Ministerial Conference under the General Agreement on Tariffs and Trade (GATT) will offer no relief for American farmers from the adverse effect of export subsidies. The European Economic Community continues to insist the GATT allows them to use export subsidies to take an unfair share of the world market. In light of the stalemate and the EC's unwillingness to resolve this issue bilaterally or multilaterally, it is now up to Congress to achieve solutions to this critical agricultural trade problem.

As a first step, I intend to propose to the President, the Department of Agriculture, the U.S. Trade Representative, and Congress a plan they can enact that will place American broiler and egg producers on an equal footing with their foreign competitors, who now have an unfair advantage in foreign markets due to the export subsidy practices of their government. This plan, the poultry and egg export equalization plan, is designed to offset the adverse effects of export subsidy schemes currently practiced by other countries on U.S. exports. These unfair subsidy schemes have drastically reduced our share of world poultry and egg markets.

To regain the share of sales that our production efficiency would allow in a world market free of subsidies, I propose a targeted program that uses domestic surplus commodities to offset the advantage that foreign governments give their exporters. This program will entail the distribution of surplus corn to poultry and egg producers. Under the plan, each ton of poultry and eggs for export will qualify our domestic producer for a proportionate amount of surplus corn currently held by the Commodity Credit Corporation. This will reduce production costs to the poultry and egg producer and enable him to meet unfair overseas competition. The program also has the advantage of reducing excess supplies of corn, which are depressing American grain farmers' prices. A third advantage would be to relieve taxpayers of the costly burden of maintaining these surpluses in storage. Finally, many workers in our poultry and egg processing plants will be able to go back to work.

Most of all, this program is fully consistent with our international commitment under the GATT not to use export subsidies to gain more than an equitable share of world export trade. Our export markets have been stolen by subsidized competitors. This program will be designed only to regain that equitable share we have lost to unfair subsidized competition.

I want to emphasize that we have tried to solve the subsidy problem within the context of the GATT process by formally complaining to countries that engage in these practices. We have also used the occasion of the GATT Ministerial to call for a multilateral commitment to reduce export subsidies over a reasonable period of time. These efforts have led us to a dead end and the time is now here for unilateral action. The proposal I am making is within our rights and obligations under the GATT.

Mr. President, while this action involves Government intervention in the marketplace, which is distasteful to me personally and to American poultry and egg producers, there is now no other alternative. We have exhausted all other possibilities. The only other choice is to withdraw from the world market—a totally unacceptable solution.

I hope this action will lead our trading partners to recognize the foolishness of their practices. It is almost unbelievable to me that countries would

subsidize the sale of poultry and eggs and hand the bill to their own taxpayers. When and if these countries realize their folly, we will be ready to negotiate an end to these practices by all countries.

Mr. President, the GATT Ministerial Conference that was held this past week has focused attention on the world trade problems. We, the Congress, and people in this country, should not accept the status quo. To do so would be to cut our own throats. Ignoring the world trade problems is not going to solve the world trade problems. We cannot ignore the trade barriers established by the Japanese to hinder American exports. We cannot ignore the $8 billion in subsidies of agricultural exports by the European Community.

This country and this Congress must stand up for our industrial and agricultural private sectors so they can be treated fairly in the world markets. The GATT Conference was held, among other things, to encourage the elimination or the rollback of barriers and subsidies to trade. This was not accomplished, so we could not return to fair trade as a result of the GATT Conference. If we continue our nonaction, we shall continue with the present unfair trade obstacles.

In order to create fair trade for the United States and stop the job loss, we must contemplate what measures the United States should use to encourage rollback of subsidies by the European Community and the lifting of trade barriers by Japan. As a first step, our trading partners have to know that we are serious in the United States. They almost got that impression at the GATT Conference, but obviously, by the language that is included in the final agreement, they are saying, "We do not expect the United States to act and we will not stop our current practices."

Mr. President, there is a time when you can no longer turn the other cheek. We must allow the United States to compete fairly. We must allow our producers in the United States to compete fairly, on a level playing field with everyone else. It is only right that we in Congress assure that for our American producers.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. BAUCUS. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk continued to call the roll.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, I wish to introduce legislation to be a part of the statement I have just completed. The bill I introduce would authorize the Secretary of Agriculture to make available stocks of corn of the Commodity Credit Corporation to poultry and egg producers of the United States in order to encourage export markets for poultry.

Mr. President, this legislation would be enabling legislation to allow the Department of Agriculture to proceed to enact this program I have just spoken of on the floor of the Senate.

I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3049

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, in order to encourage and facilitate the expansion and development of export markets for poultry and eggs produced in the United States, the Secretary of Agriculture may make available to poultry and egg producers in the United States supplies of corn owned by the Commodity Credit Corporation. The Secretary shall make such corn available in such quantities and under such terms and conditions as he determines appropriate.

Mr. MATTINGLY. Mr. President, I suggest the absence of a quorum.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 60 minutes, with statements therein limited to 5 minutes each.

THE AMERICAN CHARACTER

Mr. THURMOND. Mr. President, over 4 years ago, a radio show known as "The American Character" was created with the sole purpose of sharing true stores of caring and selfless individuals who exemplify the American spirit.

"The American Character," which is broadcast weekly, is narrated by the famed author and philanthropist, Dr. Norman Vincent Peale. Dr. Peale is perhaps best known for his book, "The Power of Positive Thinking," which has greatly influenced millions of people throughout the world.

During each show, Dr. Peale highlights outstanding contributions of people from across America who have served their fellow man in extraordinary ways.

Mr. President, "The American Character" represents that which is good, wholesome, and honorable about Americans. Yet, this unique show not only recognizes individual achievements, but it also serves to inspire others to do noble things.

This special program is made possible by the International Telephone and Telegraph Corp., and ITT is to be commended for sponsoring such a worthwhile service.

In order to share more about the nature of "The American Character," with my colleagues, and to acknowledge those who make this program possible, I ask unanimous consent that a transcript of the proceedings honoring "The American Character" be included in the RECORD at the conclusion of my remarks.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

TRANSCRIPT OF PROCEEDINGS HONORING "THE AMERICAN CHARACTER" IN THE U.S. SENATE CAUCUS ROOM

Mr. NED GERRITY. Good evening ladies and gentlemen. I'm Ned Gerrity of ITT, proud to welcome such a distinguished gathering. Since March of 1978, it has been my company's privilege to be associated with a unique project, "The American Character", narrated by Dr. Norman Vincent Peale. Its goal is to inspire Americans by daily reporting on what is not considered necessarily newsworthy by the mass media. We like to report the acts of heroism, compassion, perseverance and generosity which go into making up that character that we distinguish as uniquely being American. For those who have not heard the program, I would like to play a very special episode that was broadcast earlier this year.

ANN. Here is Norman Vincent Peale on "The American Character."

Dr. PEALE. What in the world do you call a man who's saved the lives of at least three dozen people? In fiction, you might call him the hero's hero. But in fact, you'd call him Pete Vallas of Hackensack, New Jersey. As volunteer fireman and civilian, Pete has spent years preserving life—often by facing death. Once, he dashed into a burning building to rescue two children. He was carrying them out when an accumulation of gas exploded. The kids were okay. But Pete was severely burned. Another time, he dragged two teenagers from an overturned car seconds before it exploded. Then, when a swimmer suffered a heart attack, Pete kept him alive with C-P-R until medics arrived. But not all of his lifesaving is so dramatic. You see, he also works with juvenile offenders, saving them from lives on the wrong side of the law. And right now he's setting up a youth anti-drug program. For his good works, Pete Vallas has received many citations—including several from state governors and one from a member of Congress. So it is with special pleasure that we recognize the accomplishments of this extraordinary American on this, the one-thousandth broadcast in a series dedicated to the best in America—"The American Character."

ANN. Norman Vincent Peale on "The American Character" is funded in the pub-

lic interest by ITT, International Telephone and Telegraph Corporation.

You will meet this remarkable man, Pete Vallas, in a few minutes, but now it is my high honor to introduce the President pro tem of the United States Senate who, with his lovely wife, Nancy, were among the first to support the concept of "The American Character" series. It is my pleasure to introduce the distinguished Senior Senator from South Carolina, the honorable Strom Thurmond.

Senator THURMOND. Thank you very much.

Mr. Chairman, Dr. Peale, distinguished guests—the purpose of inviting you here this evening is to help us salute a positive influence in our national life. I am referring to "The American Character", not in the generic sense of our national character, but in the specific sense of the radio program by that name which tells us what is best about ourselves. I was introduced to "The American Character" when it was first broadcast on the air over four years ago. I felt then, as I feel now, that it is a celebration of what is good, wholesome and positive in our national life and that it could inspire similar activity by others who heard it. The beauty of "The American Character" is that it does more than simply praise American values. It also cultivates them by presenting examples of these values, reflected in the every day lives of every day Americans, the average citizens whose courage, dedication and kindheartedness are featured daily on "The American Character" typify the goodness to which we hope all Americans aspire. Commonsense tells us that nothing fosters good works so much as a good example. Speaking of good examples, I would like to thank Dr. Norman Vincent Peale, narrator of "The American Character" for his enduring example of positivism in American life. I would like to recognize the corporate example of International Telephone and Telegraph Corporation in contributing to the interests of our nation at large by commiting itself to bringing "The American Character" to listeners throughout the country by providing the program to radio stations without charge. This kind of private sector initiative ought to be encouraged and applauded. We all hope to see more of it. Thank you for inviting us here today and saying these few words. We are delighted to have everyone of you here on this occasion to meet this great American, Norman Vincent Peale, and to salute these people who sponsor this program and we are very honored that you could take the time to come. Thanks very much.

Mr. GERRITY. Thank you, Senator Thurmond—and now I take great pleasure in introducing the Chairman, President and Chief Executive Officer of ITT, Mr. Rand Araskog, Rand:

Mr. ARASKOG. First of all, I would like to say that tonight Dr. Peale told me that each of his broadcasts has a maximum limit of 80 seconds. Ned Gerrity gave me 25 so I simply want to make a couple of comments. First of all, the hero that is being celebrated here this evening has a real heroine because I am sure she realizes that every time he leaves the house he may go out and save someone at great danger to his own life and I think she qualifies for applause as well. Secondly, I certainly appreciate the efforts of Senator and Mrs. Thurmond, Nancy, and the efforts of Dr. Peale, his wife Ruth. This is a very fine evening. We are very complimented by those who have come—the many honored people here in Washington, D.C.

We at ITT sponsor many events that we hope will contribute in a great way to the American way of life. This particular program is one of which we are most proud. We have the very real belief that it is making a positive contribution because of the efforts of Dr. Peale and because of those great efforts taking place every day in America that he is recognizing. So we are going to continue to support this program in a major way and we are confident he will continue to devote energy to it because I have discovered that over the last four years or so that I have known him that he does get younger every year. Thank you.

Mr. GERRITY. Thank you, Rand. It is no exaggeration to say that millions of people, not only in this country, but around the world know Norman Vincent Peale—and I put quotes around the word "know". They know him in many ways—they have heard him speak, they have read his books. Norman Vincent Peale is the soul (soul) and the guiding light of The American Character. He is a clergyman, a lecture. He is the author of "The Power of Positive Thinking." We need more people like Norman Peale and I am delighted to introduce him to you now. Dr. Norman Vincent Peale.

Mr. PEALE. Mr. Ned Gerrity, Mr. Araskog, Senator Thurmond. Now it didn't do that for anyone else. (Referring to feedback from public address system)—(laughter). We milled around here for awhile, Mr. Gerrity, and then at Senator Thurmond's suggestion, we formed a receiving line. Now, I liked that because it gave me the pleasure of standing by the charming Mrs. Thurmond and Mr. Araskog on the other. It wasn't all that perfect because everyone that came along lingered inordinately at Mrs. Thurmond and left poor Mr. Araskog and myself dangling at the end of the line.

I want to thank Senator Thurmond and Mrs. Thurmond for all they have done to make this possible this afternoon. I have long admired his statesmanship and his leadership in this country and it is a pleasure, Sir, to be associated with you again this afternoon. I want to thank you folks for coming out today. I know you are all very busy. You hold important positions in this city and your time is at a premium. So, you honor us greatly by coming to be with us today.

This program, "The American Character", was initiated by two friends of mine—John Scott and Howard Greene—and they spoke to Mr. Araskog and George Massaua and you, my good friend, about ITT funding this program. I think it is a very great thing when one of our greatest corporations in the United States cares about people and I wish to express my great appreciation to them today for all they have done.

The thing that impresses me as I present the stories over the air is that we are better than we think we are. We have a tendency in America to put ourselves down, but as I read the stories of men and women (and I read many of them over the year), I am convinced that Americans are the greatest people that the good Lord ever made. (applause) And I don't mean to exclude the distinguished gentleman from Egypt that I met here this afternoon, and others. They get in under this umbrella of humanity. The stories that we give over the air are about people like Pete Vallas who with no concern for his life saved the lives of other people or by neighbors who helped neighbors. Little children who have saved aged grandmothers, for example, from fire—one after the other of these stories indicates that there is in everyone of us a hero. I think Thomas Carlisle first pointed that out. So that what you are doing, Mr. Araskog and others by making this program available to the American people is to remind the American people that they are greater than they have every imagined. And while there is evil in this country, there is a lot of good also. And I am one of those who believe that if we give publicity to the good, the good will finally triumph over the evil. That is known as the philosophy of optimism. But I have tried to be a positive thinker all my life. (applause) And I would just like to say from the heart—God bless you everyone.

Mr. GERRITY. Thank you, Dr. Peale. Now, we would like to have all of you meet Mrs. Ruth Peale, who has been the inspiration for Dr. Peale for all these years, Ruth. She is right here with Senator Thurmond. (applause) And now we would like you to meet that remarkable man who the tape described a few minutes ago. And I would guess that he is the standard bearer of all those people Dr. Peale has described in "The American Character". I would like to have Peter Vallas join us here on the podium along with Senator Thurmond and Mr. Araskog and Dr. Peale. Come on up, Peter.

Mr. ARASKOG. While this award simply states that the deeds of Peter Vallas are hereby cited as outstanding examples of those inspiring qualities which best reflect the ideals of "The American Character" program and Dr. Peale and I have countersigned this with sincerest congratulations for a small recognition of what you have done.

PETER VALLAS. Senator Thurmond, Dr. and Mrs. Peale, Mr. Araskog, honored guests. Ever since I found out that I was receiving this award, people I know have been asking what I was receiving the award for. So, I would mention some of the things you just heard, the life saving, the drug programs, etc. But in thinking about it, I really don't think that the doing of those things got me here today. I feel that it was more the reasons I did them that brings me before you as an expression of "The American Character". For most of the 200 years that we have been a nation, we had to depend on each other to survive. To help one another. To care how a neighbor was doing and it became a habit. If we wanted to live in a good town we couldn't wait for someone else to make it a good place in which to live. And, we had to invest our time and our energies to make it work. In today's world, some people do not feel the same as they did years ago. But I feel "The American Character" is an example which our heritage is built on. It should continue forever. The Bible says, "If I am not for myself, who will be for me?" But if I am not for my brother, then what good am I? I have tried to follow that in directing my life. And now, I look to you, Nicholas D'Jimas, my nephew, to perpetuate the goodness of America and to take my place by living the life of "The American Character". Thank you ladies and gentlemen. I am very proud to accept this award.

Mr. GERRITY. Before we close, I would like to read a letter delivered to Dr. Peale. This is from the President of the United States.

THE WHITE HOUSE,
Washington, D.C., September 14, 1982.

Dr. NORMAN VINCENT PEALE,
New York, N.Y.

DEAR DR. PEALE: Nancy and I welcome the opportunity to extend our congratulations

and best wishes on the 500,000th broadcast of your program, "The American Character."

In each of these broadcasts, some good deed by an American citizen, young person or adult, is told. You have provided great inspiration for our citizens, and we appreciate the uplifting spirit of this series.

With warm personal regard and, again, congratulations.

Sincerely,

RONALD REAGAN.

Congratulations, Dr. Peale, Peter Vallas, and all of you who exemplify "The American Character".

THE DEATH OF STEFANO TACHÈ

Mr. PROXMIRE. Mr. President, while the Senate was in recess, a grave anti-Semitic offense took place in Rome. On October 9, terrorists fired submachineguns and threw handgrenades at Jewish worshippers leaving a synagogue after Sabbath services. Thirty-four people were wounded, including a 4-year-old boy, Marco Tachè, who suffered severe head wounds. His 2-year-old brother, Stefano, was killed. It is a grim irony that Marco and Stefano were taken to services to celebrate Shemini Atzereth, a holiday on which children receive a special blessing in the synagogue.

This incident is a painful reminder that millions of Jewish children lost their lives during World War II, only 40 years ago. Moveover, it is a warning that anti-Semitism did not die with those children, and still poses a threat to Jewish citizens.

Mr. President, this wanton act of violence should not be taken lightly, for every small offense can lead to a larger one. I remind the Senate that the tide of anti-Semitism in Nazi Germany began with the desecration of synagogues, and ended with systematic mass murder. Attacking a synagogue may appear minor compared to Nazi concentration camps, but the oak tree was once an acorn.

Mr. President, let us work to prevent further recurrences of anti-Semitism, before we have to record another human nightmare in the history books of our country. The first step in this effort is the ratification of the Genocide Convention, which guarantees to all groups the right to live free from persecution, regardless of their race, religion, or creed. Moreover, it makes genocide a crime under international law.

Many nations have signed this treaty—82, to be exact. But the United States, a decisive force in defeating the Nazis in World War II, is not yet a party to this treaty.

The death of Stefano Tachè should be a reminder and an inspiration. We must recall that anti-Semitism led to genocide in the past, and we must resolve to prevent another genocide in the future. Therefore, I call upon the Senate to ratify the Genocide Convention without delay.

POSSIBLE CHANGES IN POLICY BY THE SOVIET UNION

Mr. THURMOND. Mr. President, the recent death of Soviet President Leonid Brezhnev has caused a flurry of speculation about possible policy changes by the Soviet Government.

While I fervently hope that our two countries can begin to work together more closely and cooperate on projects of mutual interest, I continue to believe that the goals and objectives of the Soviet Union will remain the same, and, therefore, that there is little hope that policies toward the West will change.

The prime directive of the Soviet Government has been, and will continue to be, world domination. Some of this country's most learned "Kremlinologists" have speculated that the new Soviet leader, Yuri Andropov, will lead his government toward a new, more conciliatory relationship with the United States.

I am not a political scientist, but I do not share the optimism of those who believe that a change in Soviet leadership will, necessarily, precipitate a moderation of Russia's goals.

The Soviet Union, Mr. President, is a country unlike ours in that changes in leadership do not bring about great sweeping changes in policies.

We should remember that the Soviet Politburo—the real governing body in Russia—chooses that country's leaders and spokesmen. Little, if anything, on an official level is said or done in the U.S.S.R. without the express consent of the Politburo.

I want to also remind my colleagues that Mr. Andropov is a former head of the Soviet Secret Police—better known as the KGB—and that he has espoused Russia's goal of expansionism.

A recent editorial analysis in the Washington Post, written by Robert Kaiser, points out the tremendous influence of the Politburo in the Soviet Union and concludes that Andropov's elevation to power does not signal immediate changes in policy.

Critics, however, will insist that Mr. Kaiser's conclusions are the product of so-called "Cold War Mentality."

Mr. President, I dislike sounding like a cynic, but I believe that changes in Soviet policy, if any are forthcoming, will manifest themselves in events—not rhetoric. At the risk of sounding trite: The proof will be in the pudding.

I ask unanimous consent that the article, entitled "No, Russia Won't Change," be included in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 14, 1982]

"NO, RUSSIA WON'T CHANGE"

(By Robert Kaiser)

Hard as it may be for Americans to believe, the death of Leonid I. Brezhnev is unlikely to bring any early or dramatic changes in Soviet policies or Soviet-American relations. This is true because—alas—the Soviet Union is so profoundly different a country than we are used to.

We have already heard prominent Americans predicting that the transition period will be a time of Soviet militarism, or a good moment for a peace offensive, but all such predictions are improbable. Forecasts of sudden change in Russian policies can only be made by outsiders who project their own patterns of behavior onto the Russians.

In America a new president sweeps clean the slate of state: New officials blithely implement new policies (often contradicting the old ones) as though history began the day they took office. The West European democracies are more consistent, but they, too, can switch directions abruptly.

Not the Russians. Apart from the Bolshevik Revolution itself, changes of government in Russia have been marked not by departures but by a striving for continuity, at least for a couple of years. Yuri Andropov will not ignore that tradition.

From a Russian point of view this makes eminent sense. The challenge to Andropov and his colleagues is to preserve a claim on legitimacy by reassuring the people that they will keep the historic bargain between Russians and their rulers. This bargain is simple: The people give up any right to choose their leaders or influence their policies (in other words, they give up any claim to freedom) in return for basic security, order and the staples of daily life.

An abrupt change in the party line would only raise doubts that the new leaders could make good on their end of the bargain. Abrupt changes would rekindle the ancient Russian fear of disorder or anarchy. So the new Soviet leaders will try to avoid abrupt changes.

This does not mean a new Soviet government is bound to stick forever to the path set in the Brezhnev era. On the contrary, the many grave problems, domestic and international, that the Soviets now face will require significant policy changes in the years ahead. But changes will not come in the years immediately ahead. They are likely in the mid-1980s and beyond.

The money men on Wall Street talk about the way the stock market "discounts" a big event before it takes place—an election, a new tax cut, whatever. In a similar way, both the soviet elite in Moscow and the rest of the world have already discounted the death of Leonid Brezhnev. Like Konrad Adenauer or Mao Tse-tung, Brezhnev was one of those fixtures on the international stage who actually prepares the world for their eventual departure by defying the actuarial tables and sticking around so long.

In Moscow, maneuvering in preparation for the end of the Brezhnev era has been going on for years.

The committee that has been running the country for the last 18 years has had to jigger its membership as others of the old men at the top have died or retired, and lately the jiggering has suggested that the committee was preparing for the post-Brezhnev era. The quick selection of Andropov on Friday as the new general secretary of the Communist Party indicates that the ruling committee has known where it was headed for a long time.

The crucial point here is the existence of that committee. For all the eagerness of the news media to make Brezhnev into a personal dictator, he has never been one. He has always shared power—willingly, by all ap-

pearances—with others in the group who conspired with him to oust Nikita Khrushchev (who really was a personal dictator) in October 1964.

The record on the committee's importance is clear. That record is sprinkled through Richard Nixon's and Henry Kissinger's memoirs of the 1972-74 period when detente was in bloom, and all important matters in Soviet-American relations were referred to the Politburo for final decision. In 18 years as the leader of the Soviet Communist Party, Brezhnev never gave an extemporaneous speech. He invariably read from a prepared text—a text presumably approved by the Politburo.

Recently, when Brezhnev reportedly could work no more than a few hours a day, the committee was obviously running the country without him—as it will be running it now.

Andropov was an important member of the committee in the Brezhnev era, particularly since 1967, when he was sent to the KGB to handle a top-priority matter for the leadership: the reassertion of strict control over unorthodox political behavior. Andropov must have become a hero of sorts to the committee when he managed—over more than a dozen years, with patient diligence—to wipe out the political dissidence that arose in the '60s. Dissidents terrified the committee, because they seemed to challenge its legitimacy, its right to rule in the name of the people. Thanks to Andropov, today there are virtually no dissidents.

The cardinal domestic achievement of the Brezhnev era was to broaden the Soviet regime's base of active support. When the Brezhnev group took over in 1964, a relatively small Soviet elite benefited personally from the system. Under Brezhnev the system of privileges and special rewards for members of the elite grew dramatically, as did the size of the elite that was eligible for them.

By giving hundreds of thousands and probably millions of people a direct personal stake in the system—a stake based on improved housing conditions, better food to eat, opportunities to travel abroad and the like—Brezhnev enhanced the stability of the Soviet regime.

But there was a downside to that accomplishment. By creating such a large group with a personal stake in the status quo, Brezhnev made it terribly difficult to alter the status quo. Thus it turned out that all the Brezhnev group's attempts at reform, particularly of the Soviet economy and agriculture, came a cropper. A vast layer of the Soviet establishment just wasn't interested in reform.

This inertia is not something a new leader can abolish with a wave of his hand. It is now a fact of Soviet life, and it will remain one for years.

Whether Andropov will even want to challenge this inertia remains to be seen. At 68, he is already six years beyond the life expectancy for a Soviet man. He reportedly has heart trouble. Many Kremlinologists expect him to be a transitional figure who will prepare the way for a member of the next generation, someone now in his 50s, to preside over the next phase of Soviet history.

But even if Andropov wanted to make a strong individual mark as leader, history suggests it will take him several years to be able to try. Three years after the Brezhnev group took power, the Soviet spokesman at a Soviet-American "summit" meeting in Glassboro, N.J., was Alexei N. Kosygin, not Brezhnev. After Stalin died there was several years of tumult inside the ruling committee before Khrushchev emerged on top. The committee moves slowly when deliberating policy departures, and it takes time for one man to consolidate a position of personal ascendancy.

Even Brezhnev, who did achieve personal ascendancy within the committee, apparently never had the personal power to impose a significant policy change on his colleagues. He built a consensus on the committee for his detente policy, but he didn't dictate it. His greatest personal power may have been negative. According to one intriguing story that is told by well-informed people in Moscow, Brezhnev did personally prevent a Soviet invasion of Poland at the end of 1980—the committee was ready to do it, but Brezhnev denied his colleagues the consensus they required for such a big step. It's just a rumor, but a plausible one.

That there will be change in Russia is inevitable. The '80s may prove to be a decade of abrupt discontinuity in Soviet history. A generation gap has emerged in the Soviet Union—the Russians may be about to have their version of the '60s. The economy has stopped growing, agriculture is deteriorating and the system of control in East Europe is no longer effective. These are grave problems, and none can be dealt with effectively with the kind of marginal policy adjustments that typified the Brezhnev era.

At least theoretically, the Soviets' need to make changes creates opportunities for the United States and its allies. It became clear in the '70s that the West *can* influence the Soviet Union, sometimes (though not always) in positive directions. Détente did open Soviet society to an unprecedented degree. It pushed the Soviets for the first time into the international (capitalist) economic system. It made Solidarity possible in Poland. The '80s might provide a chance to make the Russians more responsible members of the international community. But the Reagan administration seems committed to pursuing a confrontational policy toward the Russians, rather than exploiting new opportunities for different kinds of approaches.

President Reagan's decision not to attend Brezhnev's funeral can be defended on numerous grounds, but there is no doubt about how the Soviets will interpret it: as an affront. If the American president is not interested in attending a Soviet leader's funeral, he obviously isn't interested in a better Soviet-American relationship—that will be, understandably, the Soviet view.

The Reagan policy until now could be described as the "uncle" policy—the United States will put so much pressure on the Soviets that they will eventually cry uncle, agreeing to American terms for arms reductions, agreeing to withdraw from Afghanistan, agreeing to grant more human rights to Soviet citizens and Poles.

The chance of this approach succeeding was always slim; with new leaders in the Kremlin it is nonexistent. The most obvious thing new leaders cannot do under any circumstances is to begin acceding to the demands of "imperilists," as they like to call us. No signal would be more threatening to the Soviet elite than a hint that their new leaders can be intimidated by the United States.

So, ironically, American policy will reinforce the Soviet tendency not to change course in the aftermath of a change of leadership. There are no foreseeable prospects for a better Soviet-American relationship.

BUS DEREGULATION

Mr. PRESSLER. Mr. President, last spring, I fought legislation to deregulate the bus industry because of its negative impact on small carriers and rural bus service. I was the only member of the Senate Commerce Committee to vote against this bill. On the Senate floor, only a handful of my colleagues joined me in opposition to this measure, which has recently been signed into law. Only now are organizations and associations beginning to realize the potential harm resulting from industry deregulation.

The American Newspaper Publishers Association recently published an article in its November issue of Presstime. I ask unanimous consent that the text of this article be included in the RECORD immediately after my remarks. ANPA expresses serious concern about the loss of bus service and probable rate hikes in rural areas because of deregulation. Six months ago, I argued the very same objections here in the Senate.

My home State of South Dakota has already suffered severe loss of railroad and commercial air service because of deregulation. Intercity bus service reductions resulting from deregulation will also have a dramatic impact on rural life. Many small businesses, including community newspapers, depend on intercity bus service for mail delivery. Rising transportation and distribution costs simply cannot be absorbed by these small businessmen who are also battling a slow economy and high interest rates.

In the rush to deregulate, Congress appears to be ignoring the common carrier obligation which is essential to rural transportation services. I am very concerned that our rural citizens will become more and more isolated unless we pay closer attention to the special needs of our farming and ranching communities. I urge Congress to closely monitor the impact of bus deregulation on small community passenger and mail service. We must encourage adequate and dependable transportation for the many Americans who do not benefit from competition afforded by deregulation in some parts of the country.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Presstime, November 1982]

BUS DEREGULATION COULD RAISE RATES, DECREASE SERVICE

The bus deregulation law that takes effect Nov. 20 could lead to higher rates for shipment of newspapers as well as a decrease in service in some places.

Many ANPA members use bus transportation for some newspaper distribution. It is suggested that circulation departments consult with bus companies on any changes in service that may affect subscribers.

Under the Bus Regulatory Reform Act of 1982, signed by President Reagan Sept. 20,

the bus industry will get new freedoms that are even broader than those accorded trucking companies in 1980.

The act allows companies:

Greater freedom of entry into and exit from the bus market.

To set rates and fares within a "zone of reasonableness," with the zone to widen progressively over the years. Initially, bus companies will be allowed to raise rates or fares by 10 percent or lower them by 20 percent compared with year-before levels.

Federal preemption of some state bus regulations.

Moratorium on grants of U.S. operating rights to Canadian and Mexican carriers without approval by the U.S. trade representative.

Elimination of antitrust immunity to set rates collectively.

To stop applying separately for authority to carry freight shipments as well as passengers [Presstime, Jan. 1982, p. 15].

TRIBUTE TO VIETNAM VETERANS

Mr. THURMOND. Mr. President, on November 11, the Nation paid its annual tribute to the millions of men and women who have served in our Armed Forces and who have fought to preserve the freedom which we hold dear. This year the Nation paid special tribute to its Vietnam veterans and to those who gave their lives for freedom in that war. On November 11, I attended a ceremony in the White House in honor of the Vietnam veterans; on November 13, I had the great honor and privilege of participating in ceremonies held at the National Cathedral, where the names of all those men and women killed in Vietnam were read over a 5-day period.

Mr. President, the tribute to Vietnam veterans served as a long overdue welcome home to these brave Americans. After their service in Vietnam, rather than returning to parades and crowds of grateful Americans, most Vietnam veterans were greeted by war protesters and by those who condemned them for their service. Now many Americans have taken the time to honor these men and women who answered the call of their country and served just as other Americans have in other wars.

Mr. President, many lessons can be learned from our experience in Vietnam if we are willing to recognize them. I believe that the greatest lesson which must be remembered is that we must never again send our men and women to fight in a cause while pursuing a military policy which prevents them from winning. We must all recognize that the men and women who served our country in Vietnam did not lose the war. They fought with courage and with great skill, and victory was prevented by our policymakers.

On November 13, 1982, the Vietnam Veterans' Memorial was dedicated in Washington, D.C. This memorial bears the names of the more than 57,000 Americans who died in Vietnam. I find a memorial to Vietnam veterans highly appropriate, and I commend the individuals and organizations who made it possible. Through such a memorial, the American people will never forget the sacrifice and devotion to our country which was shown by those who served in Vietnam.

Mr. President, great controversy surrounded the Vietnam war. There has also been considerable controversy surrounding the Vietnam Veterans' Memorial. But there should be no controversy about the fact that the men and women who answered the call of this Nation and who served in the Vietnam war showed the same courage and valor as shown by other Americans during other wars in our history. For this, we are forever in their debt.

WHERE SHOULD WE CUT THE DEFENSE BUDGET?

Mr. PROXMIRE. Mr. President, Fred Kaplan, a noted defense expert, recently published an essay in the New York Times, November 17, 1982, called "Defense Nuts and Bolts." In this article he raises the questions of what items in the military budget are most vulnerable to spending cuts in the near future, and why. His answer is that Congress will be inclined to leave expensive weapons untouched, while chipping away at the "nuts and bolts" of the defense system: spare parts, ammunition, fuel, and other items essential to conventional military readiness.

Kaplan gives four reasons for this. First, he says, cutting military operations and maintenance results in large and immediate savings in the annual defense budget. Major weapons, on the other hand, are built over a period of years, and therefore scrapping them does not always offer the charm of a sizable reduction in next year's defense budget.

Second, Kaplan points to the political clout of major weapons manufacturers to explain congressional reluctance to scrap major weapons projects. As we know, defense is a billion dollar industry in the United States, and accordingly, Rockwell International, Hughes International and McDonnell Douglas all play a key role in the politics of weapon building. Manufacturers of spare parts and ammunition do not.

Third, Kaplan argues that those at the Defense Department who think we could reduce spending in other ways than slashing the readiness account have not offered coherent alternatives.

Finally, Kaplan touches on perhaps the most basic reason why we tend to cut small essentials rather than large weapons. Everyone agrees that B-1 bombers and MX missiles are inherently more exciting and glamorous than a bullet or a spare part. There is a natural human inclination to choose the beautiful frill over the boring essential. Besides, when have we ever sacrificed sleekness for practicality in our defense budget? Why start now?

Kaplan urges us to start taking practical considerations into account when we start thinking about ways to reduce the defense budget. He believes we have already cut too deeply into the readiness section of the defense budget, and can no longer safely afford to do so. Therefore, he urges us to resist our attraction to the beautiful frill and subject it to careful scrutiny. Do we really need so many major weapons at the expense of reducing our conventional military readiness?

Mr. President, I ask unanimous consent that this article from the New York Times be reprinted in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEFENSE NUTS AND BOLTS

(By Fred Kaplan)

WASHINGTON.—President Reagan's defense budget will almost certainly be cut substantially next year. Federal deficits are intolerably high, social programs have been cut to the bone; the new, more liberal 98th Congress will surely insist that the Pentagon start making its share of sacrifices.

However, if Congress behaves in the usual fashion, it is likely that the wrong things will be cut. The burden will fall disproportionately upon spare parts, fuel, ammunition, depot repair and other elements of the operations and maintenance account that comprise "military readiness."

In short, the items that Congress tends to cut most heavily are those that are most essential to fighting a conventional war for longer than a couple of weeks.

In the past year or so, Congress has paid more attention, in rhetoric anyway, to the importance of readiness. Yet it continues to cut still further the one section of the defense budget that is underfunded to begin with. The reason has do with incentives that lie close to the heart of the legislative system.

First, cutting the production of major weapons yields relatively small savings in immediate outlays. It takes several years to build tanks, missiles, airplanes, ships; only a small fraction of the appropriated money—2 percent in the case of aircraft carriers, about 15 percent for tanks—is actually spent in the first year of outlays.

However, the workaday items of operation and maintenance are used almost right away; a $1 billion cut in this account produces, on average, an $850 million saving in first year outlays. At a time of enormous deficits and demands for quick solutions, this situation make the readiness account a tempting target.

Second, there really is a military industrial complex, and Congress is caught in the middle of its workings. Even liberal legislators are often persuaded by arms manufacturers in their districts to preserve otherwise useless weapons programs that mean big money and thousands of jobs for constituents. For example, Alan Cranston, Democrat of California, one of the Senate's leading nuclear-freeze advocates, always votes for the B-1 bomber, manufactured by his home state's Rockwell International

Corporation. And if some Congressmen have no such interests to serve, they may need to trade favors on other bills with those who do. By comparison, the makers of spare parts and bullets carry no measurable clout.

Third, to a much greater degree than is casually assumed, Congress still defers to the wisdom of the Joint Chiefs of Staff (who in this Administration also appear to have the Secretary of Defense firmly in their pocket). Even if some members are skeptical of the military's requests for bigger and more expensive weapons, there is no consensus among the 535 individuals and their staffs in Congress for any coherent alternative.

Finally, there is a visceral dimension that few would openly acknowledge but that is very obvious to anyone who has observed relations between Congress and the Pentagon for a while—and that is that big, fancy weapons systems are sexy, while the mundane supplies that keep the weapons operational are not. Few experiences aside from a roller-coaster provide the thrills of watching—or, better yet, riding in—an M-1 tank tearing across the countryside at 35 miles per hour (even though it breaks down after a few hours of wear), an F-15 jet zooming at Mach 2 (even if no pilot flies that fast in combat), an Aegis destroyer with dozens of radar-control switches lighting up (even if the radar makes the ship vulnerable to antiradiation missiles).

On the other hand, reports on depot backlogs, low readiness rates and spare-parts shortfalls tend to be boring.

To the extent that Congress cuts funding for major weapons at all, it usually just stretches out the procurement schedule—thus accomplishing little more than making the weapon still more expensive, because of future inflation, in the end.

A great defense debate has been raging in the news media over fundamental issues concerning weapons procurement: Should we buy small numbers of expensive weapons or a larger number of cheaper, simpler ones? Since many new weapons have failed miserably in testing, why fund them any further? Is the counterforce strategy that justifies many of the Pentagon's new nuclear missiles prudent or practical?

The story to watch is whether members of the new Congress will be able to overcome the incentives that lead them to dodge such issues, or whether they will continue to slash the essentials and let the bloated parts remain. It may well be that only a President can hope to control the Pentagon's appetite—and Ronald Reagan has not revealed an inclination to do so.

MAYOR JESSE HELMS OF GREENVILLE, S.C.

Mr. THURMOND. Mr. President, I rise today to pay tribute to the former mayor of Greenville, S.C., Hon. Jesse Helms, who passed away on November 8, at the age of 73. To his lovely wife, Louise, and his family and friends, I extend my deepest sympathy.

Those who knew him well realize that his life may best be described as one of inexhaustible service to his fellow man, his State and Country, and God.

Mayor Helms was a man whose deep faith in God influenced every aspect of his life. Indeed, many would say that his success in life can be attributed to the fact that he sought God's direction and guidance in everything he did.

In the business world, Mayor Helms became successful as the founder, president, and chairman of Southern Foods, Inc., which has flourished as a leading distributor of food products in the Piedmont region of our State. His leadership in the food industry is well-known, as he was a cofounder of the National Institutional Food Distributor Associates (NIFDA), which is one of the largest organizations of its kind in America.

Mayor Helms' exceptional administrative abilities proved to be valuable in areas other than business. For 6 years, he served as a member of the City Council of Greenville, a position which enabled him to serve his fellow man.

Perhaps the most valuable public service Jesse Helms rendered to the community was his role as mayor of Greenville, South Carolina's second largest city and one of the premier textile producing areas of this country. Under his direction, Mayor Helms brought new optimism to the business sector through his involvement in the redevelopment of the city's business district. Recognizing Greenville's potential as a progressive metropolitan area, Mayor Helms maintained excellent rapport with business and industry so that the cooperative efforts of commerce and Government would allow Greenville to flourish economically.

Over the years, I have enjoyed working with Mayor Helms on various projects for the city of Greenville. I know first hand of his outstanding leadership abilities and of his desire to help the citizens of the city he loved so much. He gave much to Greenville and its people, and his service will greatly be missed. Yet, his numerous contributions to this thriving city will long be remembered.

Mr. President, Mayor Jesse Helms was a man of uncompromising character, firm convictions, and concern for people.

In order to share more about this remarkable individual with my colleagues, I ask unanimous consent that two editorials and an article from Mayor Helms' hometown newspapers, The Greenville News and the Greenville Piedmont, be included in the RECORD at the conclusion of my remarks.

There being no objection, the article and editorials were ordered to be printed in the RECORD, as follows:

[From the Greenville Piedmont, Nov. 8, 1982]

HELMS' FRIENDS REMEMBER HIM AS BEING A MAN OF CONVICTION

Jesse Helms was a man of convictions—in his love for the city of Greenville and in his religion, his associates in business and politics said today.

His death will be a great loss to the city of Greenville, they said.

"The thing that dominated Jesse Helms more than anything else was his strong will and his single-mindedness," said City Councilman David Thomas, like Helms a Republican. "He was probably the most strong-willed person I've ever known. Once he made up his mind, he would never change it."

"He said to me one time that some folks tried to play politics, but he never did," said Democratic City Councilman Joe Mathis. "He told me he always talked with the Lord, and the Lord told him what to do. He never made compromises."

Mike Burton, chairman of the Greenville County Republican Party said Helms' death came as a shock to him. He said he saw Helms a few days ago and Helms "was very optimistic about the upcoming (mayoral) elections."

Helms had said recently he was "full steam ahead" towards a second term, although he had not made a final decision.

His associates said today that Helms' greatest accomplishments were in the area of economic development of the central business district. He will be remembered for his work in securing the Greenville Commons Project and the U.S. Shelter Corp. highrise, City Council members said.

"The mayor was a very sincere and dedicated person who took his role as mayor in a fashion that he definitely wanted to contribute to the city of Greenville," said City Manager John Dullea, who worked with Helms for the three years he served the city as mayor.

Helms would have said the creation of the Greenville Central Area Partnership—a board of public and private officials who have initiated a plan of downtown redevelopment—was his greatest landslide victory over Democratic Greenville lawyer Doug Dent.

One of the most controversial aspects of Helms' administration was his management of the Mayor's Prayer Breakfast, an all-faiths annual gathering of Greenvillians hosted by the mayor and the Greenville Ministerial Association.

The breakfast began during the Heller administration and was cosponsored by the Greenville Ministerial Association. But the association withdrew its support from this year's gathering, and a spokesman for the organization said the move was because of Helms' comments on his fundamentalist Christian beliefs.

The Rev. George Tolleson, pastor of the Unitarian Church of Greenville and then-president of the association, said the association withdrew as sponsors because the breakfast was for Christians and non-Christians alike and the statements embarrassed non-Christians.

The breakfast also cost Helms his seat on the Bob Jones University Board of Directors. BJU Chancellor Bob Jones wrote Helms a letter in March 1980 stating Helms was not reappointed because of his participation in thc breakfast. Jones called the breakfast an "ecumenical mockery of the Lord Jesus Christ" in a letter to Helms announcing BJU's decision.

Helms said, "I have no apologies to make. Under the curcumstances I did what I should have done as mayor," by participating in the breakfast.

Helms was proud of his negotiations with the U.S. Shelter Corp. that helped secure a 17-story office building now under construction downtown.

The city was forced to arrange a financial package for a public parking garage when the federal government turned down a grant application.

Helms also took pride in his administration's supervision of the Greenville Commons Project to its fruition in January. When Helms took over as mayor he inherited a complicated financial package supporting the project, which had been planned and developed by Heller.

Helms founded Southern Foods Inc., a wholesale food distribution business, and ran the business for 30 years. The company supplies food to hotels, restaurants, hospitals, schools and other institutions.

Helms resigned as president of Southern Foods in the late 1970s and continued to serve as chairman of the board.

Helms was born June 7, 1909, in Columbia, the son of Jesse Newton and Hattie Reaves Helms. He went to Columbia High School in Columbia. From 1930 to 1934 he was a store manager for Home Stores in Columbia and from 1934 to 1948 he was district manager and salesman for Standard Brands Inc.

After founding Southern 10 years previously, in 1958 Helms helped organize National Institutional Foods Distributor Associates Inc., a distribution organization which had a dollar volume in excess of $1 billion in 1975 when Helms served as president.

Helms was a Mason and member of Greenville Lions Club, Greater Greenville Chamber of Commerce, Greenville Country Club, Poinsett Club and Hejaz Shrine Temple. He also was on the board of trustees of the Greenville Rescue Mission and the board of directors of Goodwill Industries.

In addition to his widow, Helms is survived by two sons, Jesse Lee Helms Jr. of Greenville and W. E. Helms of Columbia; two daughters, Mrs. Anne H. Eastland and Mrs. Doris H. Blair, both of Greenville; two sisters, Mrs. Gertrude Hammond and Mrs. Corrine McGrady, both of Columbia; nine grandchildren; and four great-grandchildren.

Funeral services are scheduled for 11 a.m. Wednesday at Mitchell Road Presbyterian Church. Burial will be in Woodlawn Memorial Park Mausoleum.

Visitation will be Tuesday between 7 p.m. and 9 p.m. at Mackey Mortuary. Memorials can be made to Miracle Hill, Mitchell Road Presbyterian Church or North Greenville College.

[From the Greenville News, Nov. 9, 1982]

MAYOR JESSE HELMS

Jesse Helms approached the job of Greenville mayor as he did every aspect of his life—with vigor and deep sincerity.

For six years as a city council member and nearly four as mayor, Helms dedicated himself to the betterment of this community. He will be remembered most for his role in the redevelopment of the city's business district, and for his conciliatory influence in city-county relations.

As founder, president and then chairman of a successful food distribution company, and as a city official, he combined a businesslike conservatism with compassion for others.

The strong religious convictions that guided his public actions at times led him into controversy, as when the Greenville Ministerial Association withdrew its sponsorship of the interfaith Mayor's Prayer Breakfast because Helms offended some association members. But even those who disagreed with him respected his sincerity and directness.

Jesse Helms' death at 73 leaves a void at City Hall and in all of Greenville.

[From the Greenville Piedmont, Nov. 9, 1982]

MAYOR JESSE L. HELMS: AN ENTHUSIASTIC LEADER

Greenville Mayor Jesse L. Helms was a good man with a strong sense of commitment to church, community and family. His death Monday at the age of 73 removes from public life an individual motivated by sincere beliefs.

He often said, "Greenville has been good to me, and I want to give something back to the community." The difference between Mayor Helms and other politicians was that he meant every word.

He dearly loved the city and its residents. He worked diligently as a councilman and then as mayor to honor his mandate as a public official, but he refused to sacrifice his religious convictions.

His position on the Mayor's Prayer Breakfast resulted in a good deal of criticism from various quarters. It is a measure of Mayor Helms' dedication to principle that he could not compromise on the matter of his personal religion.

Mayor Helms had tremendous faith in the free enterprise system. He enjoyed telling how he founded Southern Foods Inc., a major wholesale food distribution business, and helped organize National Institutional Foods Distributor Associates Inc.

It is the success story of a self-made man in the very best American tradition. And Jesse Helms remained true to the values on which his success was based.

He enjoyed being mayor. He filled the office on City Hall's tenth floor with exuberance and good will. One of his last acts was to write a letter to the Greenville Piedmont.

It was not a letter of complaint about an editorial or a news story. His letter to the editor, which was received Friday, was in "appreciation and gratitude" to the people of the greater Greenville area "for the tremendous expression of cordiality and hospitality they extended to the many guests and visitors to our city" during the recent international textile machinery exhibition at Textile Hall.

"I have had letters and telephone calls," he wrote, "from people all around the world expressing their pleasure and appreciation for the warm welcome they received here in Greenville and I want to share these compliments with all of you." It is typical of Mayor Helms' enthusiasm for Greenville that he wanted to share with all of us the positive reaction to our city. His total joy in being a Greenvillian will be missed.

AERIAL RECONNAISSANCE CAMERAS

Mr. DIXON. Mr. President, last April I spoke on the floor regarding a sole-source procurement by the Navy for low-altitude aerial reconnaissance cameras.

Mr. President, I was prepared last May to offer an amendment which would have halted the purchase of these cameras until an investigation by the General Accounting Office into the entire purchasing decision of the Navy had been completed.

After a telephone conversation with Mr. James F. Goodrich, the Acting Secretary of the Navy at that time, I withdrew my amendment.

Mr. President, my colleagues, Senator PERCY and Congressman PHILIP CRANE, and I met with Secretary Lehman in October and presented to him our Illinois delegation's opinion that the Navy had been in error by sole sourcing this procurement. We presented to the Secretary a proposal by an Illinois firm which involved a competitive "fly-off" between its camera and the foreign camera—acompetition which would not delay the Navy's scheduled purchase plans. Mr. President, the Illinois company further proposed to develop its camera at no cost to the Navy and, in fact, to begin to manufacture the camera not knowing if it had won the "fly-off" competition, thereby insuring that the Navy's procurement schedule would be met. Secretary Lehman expressed interest in the idea and indicated he would seriously consider the proposal.

The Secretary sent a letter to Senator PERCY, Congressman CRANE, and me on November 15 stating that his decision was to allow the purchase of 10 cameras in fiscal year 1983 on a sole-source basis, but to allow a competition for the procurements in fiscal years 1984 and 1985.

Mr. Lehman is a fine man, but I, along with my Illinois colleagues, feel that in this decision, he has been ill-served by his staff.

Mr. President, this contract is for only $13.8 million, but it has far-reaching consequences for the Navy which apply to the replacement of the RF-4B aircraft in the next decade with the RF-A-18A.

Mr. President, the Secretary's offer is nothing more than a subterfuge to allow a continued sole-source procurement. The Secretary knows that once a company has begun production, it is placed at a significant advantage in bidding on future contracts. But Mr. President, let us just say for argument's sake that a different company does win the fiscal year 1984-85 procurements. That means the Marine Corps would be forced to establish training systems, spare parts inventories, maintenance programs, and all the rest for two different cameras in the same plane. Is that cost effective?

No, Mr. President, the Navy is just trying to placate the Illinois delegation with this decision, and is hoping we forget this contract in a few years. We will not. This contract award is symbolic to the State of Illinois. Our State's taxpayers receive a minuscule amount in defense spending based on how much they contribute to the defense budget. The members of the Illinois delegation are not demanding that sole-source contracts be awarded to companies in our State. We just

want our companies—and every State's companies—to have a chance to bid on projects. This cannot fail to produce for the military the best product at the lowest cost to the taxpayers.

Mr. President, at the proper time my senior colleague, Senator PERCY, and I will be introducing an amendment to the fiscal year 1983 defense appropriations bill.

This amendment will be very simple. It will prohibit the Navy from spending any moneys on the procurement of low altitude aerial reconnaissance camera for the RF-4B aircraft until the General Accounting Office transmits to the Committees on Appropriations and Armed Services results of an examination of the Navy's sole-source purchasing decision for these cameras.

Mr. President, I ask unanimous consent to have printed in the RECORD Secretary of the Navy Lehman's recent letter and the response to that letter from Senator PERCY, Congressman CRANE, and myself.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE NAVY,
Washington, D.C., November 15, 1982.

Hon. ALAN J. DIXON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DIXON: At your request I have thoroughly reviewed the procurement of the reconnaissance camera for the low altitude high speed mission of the U.S. Marine Corps RF-4B. I agree this procurement should be competed and U.S. camera manufacturers should have the opportunity to participate. I have directed that future requirements be purchased in this manner which should give CAI the time to develop its CA-810 to meet the requirements for the RF-4B.

Currently we are faced with a time-sensitive requirement to purchase ten of these cameras. It is apparent that only the Zeiss KA-107C camera now meets the RF-4B requirement. No U.S. manufacturer, including CAI, is able to compete without imposing unacceptable schedule and cost risks upon the government. Notwithstanding that CAI did not respond in a timely manner to the pre-qualification solicitation for this purchase, the CA-810 is still in a preliminary design stage and would need modification before it fully satisfies USMC RF-4B requirements. Because of this the Navy has decided to proceed with initial procurement of the Zeiss KA-107C camera.

Should CAI continue to develop their CA-810 camera meeting Navy specification, CAI would be welcome to compete for the fiscal year 1984 and fiscal year 1985 procurements. Navy will definitely conduct a competition for the remaining twenty-eight camera procurement.

The negotiated Zeiss contract captures the majority of total price for U.S. businesses and provides for production expansion and technology transfer to Tricor Systems, Inc., located in Dundee, Illinois. I appreciate your interest in the Navy/Marine Corps aerial reconnaissance mission. CAI should be aware that if the Navy determines that the RF/A-18A is required to perform a low altitude photoreconnaissance mission, it is our intention to conduct a full and open competition.

Sincerely,

JOHN LEHMAN.

U.S. CONGRESS,
THE ILLINOIS DELEGATION,
Washington, D.C., November 24, 1982.

Hon. JOHN LEHMAN,
Secretary of the Navy,
Washington, D.C.

DEAR MR. SECRETARY: We are writing to express our dismay over your action with respect to the Navy's acquisition of a new low level reconnaissance camera for the RF-4B. Particularly distressing is the fact that you did not consult with us—as you said you would—prior to taking this action. In our opinion, the decision which the Navy has reached does not provide for fair and open competition.

Equally disappointing has been the response of Navy personnel to the specific concerns which we raised on this issue. Not only were our questions to your staff repeatedly not answered, and not only was information deliberately withheld; but, based upon our own assessment of this matter, we can only conclude that the facts and observations about this case which we raised were, in our view, improperly conveyed to others for the purposes of thwarting our efforts to get to the bottom of this matter.

As we stated at the outset, our only objective has been to secure fair and honest competition in this procurement. As you pointed out in our meeting, this buy by the Navy has far reaching consequences. We well appreciate and applaud your efforts to encourage additional competitive sources of supply for the United States Navy but in all candor, Mr. Secretary, the actions which the Navy has taken with respect to this procurement and our legitimate efforts to gather information about it, far exceed the bounds of propriety, and perhaps the letter of the law.

Accordingly, we—as well as other members of the Congress—shall proceed with the necessary steps to ventilate this entire matter; and if the evidence thereby revealed so warrants, reverse the effect of this decision.

Enclosed you will find a list of specific questions which have been directed to the Navy in various forms on previous occasions. Would you be so kind as to have specific and complete answers provided to each of us no later than the close of business on December 6?

We do have one immediate question, however. Your letter of November 15 stated that the Navy has decided to buy ten of the 38 cameras from Zeiss on a sole source basis and that the "Navy will definitely conduct a competition for the remaining twenty eight camera procurement." But even this statement does not seem to square with the facts. We have learned that the Navy has instructed the contracting authority to sign a two year procurement contract (FY82 & FY83) which, according to the Navy's RFP, provides for eighteen cameras from Zeiss—not ten as stated in your letter to us. Mr. Secretary, what are we to believe?

In closing we wish to express our regret over the necessity for this letter and our attendant future actions; however, based on the long and disquieting experience of attempting to resolve this matter by reasonable and diligent effort, the Navy has left us with no other choice. Only more regretful is the failure of Navy personnel to live up to your personal commitment.

Please feel free to call on us. Our goal as I'm sure is yours, is to serve the people of Illinois and the nation.

Respectfully,

CHARLES H. PERCY.
ALAN J. DIXON.
PHILIP M. CRANE.

UNANSWERED QUESTIONS ON U.S. NAVY PROCUREMENT OF LOW ALTITUDE AERIAL RECONNAISSANCE CAMERAS FOR RF-4B AIRCRAFT

1. Why, during the period 1977-1981, did the Navy work only with Zeiss Avionics to develop a new low altitude aerial reconnaissance camera?

2. Did Naval personnel deliberately or otherwise keep secret from U.S. Sources the Navy's requirement for a new low altitude area reconnaissance camera and did the Navy specifically and purposefully keep secret from CAI Recon/Optical, Inc., its developing relationship with Zeiss Avionics for the purpose of establishing a second, competitive source of supply for aerial cameras? Why did Naval personnel on numerous occasions between 1977 and 1980 falsely state, in response to specific inquiries from representatives of CAI Recon/Optical, Inc., that there was no requirement for a camera of this type when, in fact, those same personnel were during that same period discussing precisely such a requirement with Zeiss Avionics?

3. Why did Naval personnel state to representatives of CAI Recon/Optical in the Spring of 1979 that the sole purpose of the initial acquisition of the Zeiss KA-107 camera was an unsolicited routine technical evaluation directed at no specific requirement? How does the Navy reconcile such statements with Assistant Secretary Sawyer's statement (March 26 letter to Senator Dixon) that a specific requirement has indeed existed since 1978?

4. Was there collusion between Naval personnel and Zeiss to the exclusion of U.S. industry? Has the Navy investigated, as requested by members of the Illinois Congressional delegation, the relationship between the current head of Zeiss Avionics, who retired from the Navy in 1980 after holding positions of responsibility for major procurement decisions on aerial reconnaissance cameras, and who then continued to work closely and in confidence with former associates and personnel still in the Navy who were instrumental in Zeiss' development of the KA-107/KA-108 cameras and who have subsequently had major responsibility for shaping the current sole source procurement? Did any current Navy personnel play any role in connection with the hiring of the head of Zeiss Avionics?

5. What is the Navy's justification for (a) awarding to Zeiss in July 1980 a $320,000 sole source contract for automatic test set for the KA-107/KA-108 cameras, and (b) developing with Zeiss and approving in April 1981 an Integrated Logistic Support Plan for the KA-107C camera, when the Navy admits that the Marine Corps' formal operational request for a new camera was not made until June 1981?

6. What efforts did the Navy make, prior to September 1981, to open the camera procurement to competition by U.S. sources? What companies were contacted? By whom? When? What were they told? What evidence does the Navy have of its efforts to work with U.S. sources?

7. Why was the September 1981 Commerce Business Daily (CBD) notice of source solicitation issued only after CAI

Recon/Optical directed inquiries to the Navy concerning the Navy's previously undisclosed plans for procurement of production quantities of the Zeiss Camera?

8. Why were the camera criteria listed in the CBD source solicitation tailored to the Zeiss camera,[1] effectively precluding fair competition by U.S. sources?

9. Since the Navy (a) imposed a 14-day response time in the CBD notice, (b) stipulated an "off-the-shelf" camera, and (c) said there was an "imminent need" for the camera (see Assistant Secretary Sawyer's letter to Senator Dixon dated March 26, 1982), why did the Navy take more than seven months—until April 15, 1982—to issue a Request for Proposals for the camera, and then establish in that RFP an extended delivery schedule—with first article delivery 540 days after contract award, first production camera delivery roughly two years after contract award, and final camera delivery not until FY 1986?

10. How can the Navy claim that the KA-107C camera contains no deviations from the criteria set forth in the CBD notice (as Assistant Secretary Sawyer asserted in his March 26, 1982 letter to Senator Dixon) when in a paper presented by Zeiss itself to the Society of Photo-Optical and Instrumentation Engineers in August 1982, the company states that the camera can provide a maximum of only 10.8 pictures per second, while the CBD notice required a minimum of 12.6 pictures per second? If the Navy is relaxing its requirement to allow Zeiss such a major deviation from the specifications and if the Navy is seriously considering competition, why has not the Navy notified potential competitors of changes to the requirements contained in the CBD notice?

11. How can the Navy claim that the KA-107C camera is an "off-the-shelf" camera, meaning "proven equipment" in Assistant Secretary Sawyer's words, when the Navy and Zeiss have encountered massive hardware failures, have engaged in substantial systems redesign, and are still encountering fundamental technical difficulties with the camera's performance more than a year after Zeiss responded to the CBD notice?

12. Why did the Navy proceed (without informing Congressional representatives as the Navy had promised to do) with further flight tests of the Zeiss camera in September 1982 when Assistant Secretary Pyatt explicitly stated to the Congressional delegation that there would be no further activity of *any* kind on this procurement until the delegation's questions were resolved?

13. In the Determination and Findings required by the Armed Services Procurement act of 1947 and the implementing Defense Acquisition Regulations, what basis is cited as justifying a sole source procurement to Zeiss? When was the D&F signed? By whom?

14. Why is the Navy continuing to insist that only the KA-107C camera meets the RF-4B requirement, knowing of the problems with the Zeiss camera, when CAI can produce a competitive camera satisfying the Navy's publicly stated criteria and meeting the Navy's announced production delivery schedule?

Why has the Navy repeatedly refused to respond to Congressional requests for the Navy-Air Force Evaluation Group's evaluation reports on the CA-810 camera? What schedule risk is Secretary Lehman referring to in his November 15, 1982 letters to Senators Percy and Dixon and Congressman Crane? What cost risk is Secretary Lehman talking about, since the production contract is to be awarded on a firm fixed price basis? Why does Secretary Lehman assert that the CA-810 camera would require modification to fully satisfy the RF-4B requirements, when the camera already meets all of the specifications set forth in the CBD and the RFP? Has the Navy altered those requirements without notifying U.S. sources?

15. How can the Navy seriously consider giving a sole source award to Zeiss for the first 10 cameras and then open the FY 1984 and FY 1985 procurements to competition, as Secretary Lehman says it will do, given that different cameras procured for the RF-4B would obviously force the Marine Corps to establish separate training systems, spare parts inventories, maintenance programs, etc? Wouldn't this initial commitment to Zeiss work to the disadvantage of companies other than Zeiss in any subsequent competition?

16. Assuming the Navy were to allow open competition after procuring the first 10 cameras, how does the Navy intend to conduct the out-year procurements? Will a separate procurement be conducted for each fiscal year? Is a single multi-year procurement contemplated? In addition, what happens to the 8 cameras originally programmed for procurement in FY 1983; as Secretary Lehman's November 15, 1982 letters imply?

17. with respect to the Navy's assertion that the sole service contract with Zeiss Avionics captures the majority of total price for U.S. business and provides for production expansion and technology transfer to Tricor Systems, Inc., located in Dundee, Illinois, at what time was this decision made by Zeiss Avionics and how much technology and what percentage of production will be transferred to Tricor Systems, Inc., and at what time will such transfer occur? Has the Navy investigated and satisfied itself that such offers of technology and production transfer are credible in light of Tricor's total lack of technical expertise or prior experience in the production of any kind of aerial reconnissance camera? Was this offer, which has no current prospect of being realized, a subterfuge by Zeiss and Navy personnel designed to mollify the Illinois Congressional delegation when questions were raised about production of this camera in Germany?

18. Has the Navy at any time disclosed sensitive or classified Government information to Zeiss Avionics, a company owned and controlled by the Carl Zeiss Foundation of Germany, a company which at the time of these negotiations did not have appropriate Department of Defense security clearances? Does Zeiss Avionics now have appropriate security clearances, and if so, when were they issued? Would the Navy be acting illegally in disclosing sensitive or classified Government information to Tricor Systems, Inc., if that company is at least partially owned or controlled by Zeiss Avionics?

[1] September 1, 1981 CBD items showing that camera requirements were tailored to Zeiss' KA 107 camera included the following:

(c) V/H limit: 10 RAD/SEC.

(b) Lateral field of view: 140° minimum.

(h) must accept any emulsion or base film including IR without laboratory refocusing.

(m) image distortion sufficiently low to permit accurate mensuration without complex rectification. Item (m) specifically excluded panoramic cameras which is the type of camera design used by all U.S. companies to meet the low altitude requirement prior to the publication of this notice.

MEETING THE CHALLENGE OF THE AUGUST RALLY

Mr. RIEGLE. Mr. President, as the ranking Democrat on the Senate Banking, Housing, and Urban Affairs Committee and as a member of the Commerce Committee, I have maintained a longstanding interest in both the securities industry and the communications industry.

In the 96th Congress I served on the Communications Subcommittee of the Commerce Committee and I am now actively involved in the work of the Securities Subcommittee of the Banking Committee.

Like so many other Americans, I have recently been fascinated by the activity and trading volume in our capital markets. But what has intrigued me the most has been the outstanding interrelationship between our markets and our advanced electronic communications systems which have coordinated so brilliantly to service the investing needs of the public.

I believe very deeply in our free market system and nowhere is this system better exemplified than on the floor of our exchanges.

In the past few months we have witnessed not only a rally in the stock market but unprecedented and historic trading volume.

In my opinion, a study of this experience will show once again that we in America have not only the most advanced free market system in the world, but also the world's No. 1 communications network.

To me it is not surprising that in a democracy we should be leaders in both of these vital industries. But sometimes it is taken for granted.

Mr. President, today I am submitting a copy of an article written by Donald Stone, senior partner of Lasker, Stone & Stern and vice chairman of the New York Stock Exchange, entitled "Meeting the Challenge of the August Rally" and I will ask unanimous consent that it be inserted in full in the CONGRESSIONAL RECORD.

Mr. Stone's article appeared in the October 1982 edition of Registered Representative and captures in detail the spirit of the August rally as well as the advanced technology of the New York Stock Exchange which made handling of the heavy volume possible.

I commend this article to all of my colleagues in the U.S. Senate and I congratulate the entire leadership of the New York Stock Exchange for stressing the importance of advance

planning in installing the modern systems for trading and communications that met so successfully the August challenge, and hopefully will meet the many challenges of the future.

I ask unanimous consent that the article I referred to earlier be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MEETING THE CHALLENGE OF THE AUGUST RALLY

(By Donald Stone)

The two-week, record-breaking August rally marked the most exciting period of trading any of us had ever seen. As a specialist on the floor of the New York Stock Exchange, it was gratifying to see how well the personnel and computer systems functioned under th pressures of the heavy volume. The modern trading support communications systems permitted rapid transmission of orders from RRs to the trading floor and back to member firms with efficiency and speed.

More than two years of work and $70 million in expenditures had resulted in what is generally regarded as the most advanced privately owned computer system in the country. But until late August we were not entirely certain; the system had never been tested at the "supersonic" volumes for which it was designed.

As a trader, I have been on this floor for 32 years, and have seen bull and bear thrash it out many times. But the rally of '82 became one of the most exciting periods I can recall. The tempo of any trading day is hectic, but this was magnified even more than in the past.

The mood at the beginning of the rally was right. The economy remained stagnant, and interest rates had begun to fall. The trigger was the Federal Reserve lowering the discount rate three times. Its effect was expedited by Henry Kaufmann, the respected economist for Salomon Brothers, who reversed his previous view that interest rates would remain high.

His pronouncement on Tuesday, August 17, sent the market soaring to a volume of 93.8 million, just under the record set on January 7, 1981. A furious buying spree—some called it a buying panic—followed on Wednesday, and on the days after.

At the closing bell on Friday, August 27, the end of "the second week that was," a record 549,830,554 shares for one week had been traded on the floor of the NYSE—more shares than had been traded in the entire year of 1960, and well above the record set the week before, 455,127,820 shares. For the two weeks, more than one billion shares were traded, and August was a new record month with 1.7 billion shares traded.

In a letter praising members and employees for their handling of the heavy volume, NYSE Chairman William M. Batten stressed the importance of advance planning by the Exchange in installing the modern systems for trading and communications that met the August challenge.

"The people and systems performed extremely well," Batten said, "in the face of the demands put on them during the period. Our electronic systems, which are very flexible, handled unexpected sharp increases in volume, using a combination of experienced professionals supported by our advanced computer and communications systems."

August 26, the biggest day in Exchange history, saw 137,280,490 shares traded in 89,751 transactions.

A sense of urgency marked late August, and it continued through the coming days of the rally. At the opening each day, members and pages could be seen moving more swiftly than usual across the floor, a sign of many orders and heightened interest. Noise levels were high, another indication of an active market. Cheering swept the floor—populated by 2,700 individuals—at 1:54 p.m. on August 18 when trading passed the 100 million mark for the first time, and again at the close when a new record was set. The scene was repeated over and over in the subsequent days.

From the gallery at one end of the main room visitors jammed against the tinted plate glass, and from the other end a dozen television cameras peered relentlessly. Afterwards, newsmen crowded the lobby trying to get interviews as all access to the floor by visitors had been prohibited. Following that first day, a dozen or more members cancelled their vacations to return to trading. So much for the August doldrums.

In the first hour of trading on August 18, 37,020,000 shares changed hands, far more than ever before during that period. Block trades (10,000 shares or more) totaled 2,456, sharply up from the record 1,596 blocks only a day before. Institutional traders were a powerful force in the early stages of the rally, followed by individual investors the second week.

At the New York Futures Exchange, an NYSE subsidiary, a record 11,103 contracts in the NYSE index contract were traded, fallout from the nearby activity on the Exchange floor. It was further evidence of the growing interest in the use of the index futures contract as an investing strategy.

Meantime, the NYSE Composite Index itself was rising dramatically. On Tuesday, August 17, the index, which reflects the movement of all 1,517 common stocks, gained a record 2.66, compared with the previous record increase for one day of 2.13 set November 1, 1978. For the week, the NYSE Index rose 5.11, surpassing a one week record of 4.61 set in 1980. (The Dow Jones Industrial Average rose 38.81 on Tuesday, surpassing the record gain for one day of 35.34 set November 1, 1978, and was up 81.24 for the week, overcoming the old record 73.61 increase the week ending October 11, 1974.)

How was this volume handled with such professionalism and with seeming ease? The answer lies in the NYSE's "Capacity Increase" program. It was undertaken in the firm belief that trading volumes would increase immensely in the '80s.

The Exchange goal was a trading capacity of 150 million shares on a peak day and 90 to 100 million shares over a longer period. To achieve this, 11 electronic systems were installed to support the trading activities of brokers on the floor. Any of you who have visited the Exchange recently have seen the large superstructure suspended overhead that carries the power and communications cables to the posts below, and to the heavy reliance on television monitors at each trading post for current information. Fourteen modern new trading posts were installed as part of the capacity increase program, replacing the 50-year-old posts that were restored by the Exchange and then donated to museums and universities across the country.

What are these systems we talk about? Let me describe several of them briefly.

One system, known as DOT for Designation Order Turnaround, is an electronic transmission system that permits a member firm to route market orders of up to 599 shares directly from their offices anywhere in the country to the appropriate trading post on the floor of the Exchange. On the floor, the specialist represents the investor in the trading crowd, assuring him the best possible price.

Another, the Limit Order System, electronically files the orders priced away from the current market, assigns a turnaround number to each and delivers the printed order to the specialist for appropriate action. "Day" limit orders up to 500 shares and "good 'til cancelled" orders are in the system.

OARS, Opening Automated Report Service, facilitates efficient and accurate processing of eligible orders up to 1,099 shares. When a specialist opens trading in a stock, he feeds the opening into the system which assigns the price to each stored order and transmits a full execution report to the originating member firm.

MDS, Market Data System, processes all NYSE last sale and quotation data and last sale data for other market centers in the National Market System.

It was no accident in late August that all systems performed magnificently. The Exchange knew this was coming and was prepared. The Exchange's research studies have indicated growing interest in the ownership of corporate stocks by both insitutions and individuals. Our Public Transaction Study (PTS) in late 1980 confirmed that institutions and intermediaries such as banks and insurance companies continued as a dominant force in the market but that the growth in institutional trading had stabilized. Institutions then were trading an average of 46.4 million shares a day. At the same time, individuals were buying and selling an average of 25 million shares a day.

If these clues were not enough, the Exchange went further and surveyed individual shareowners across the country, developing a portrait of the modern day shareowner. These shareowners had a median income of $29,200, generally higher than the national level. Their portfolio median was $5,450, and their median age was 46 years, lower than in previous studies.

The Exchange's most recent survey of shareownership, conducted in mid-1981, showed that in one year the number of individuals owning corporate stock rose by seven percent to a record high of 32, 260,000. The total represented an increase of 2,020,000 shareholders since the previous survey a year earlier.

All of this, of course, pointed in the direction of future growth as you, the registered representatives, are finding out.

The New York Stock Exchange, meanwhile, is aware that trading may reach the level of 200 million shares on a peak day, and has already gone forward with the expansion of its trading floor by 25 percent to accomplish this goal.

It is quite possible that by the time you read this we shall have set new records.

NEW YORK STOCK EXCHANGE TRADING ACTIVITY, AUGUST 16–27, 1982

	Monday, Aug. 16	Tuesday, Aug. 17	Wednesday, Aug. 18	Thursday, Aug. 19	Friday, Aug. 20

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations and withdrawal received today are printed at the end of the Senate proceedings.)

PROPOSED LEGISLATION ON HIGHWAY CONSTRUCTION MESSAGE FROM THE PRESIDENT—PM-196

The Presiding Officer laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Finance.

To the Congress of the United States:

I am submitting for your consideration and appropriate reference a draft bill "To authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes."

This legislation proposes an increase in highway user charges by 5 cents per gallon to help meet the needs of our deteriorating highway and transit systems. These systems are essential for the efficient movement of people and freight and to a healthy national economy. Investments by all levels of government are falling well short of the amount necessary to complete the Interstate System and to keep our nation's highway system, including its bridges, from facing rapidly accelerating deterioration. Urban rail and bus transit capital investment needs will total almost $50 billion over the next 10 years to maintain our existing systems. Transit needs cannot be viewed as separate, since highways and transit form a complementary and interdependent system for the efficient and economical movement of goods and people in urban areas.

The primary objective of this legislation is to provide renewed investment to help rebuild our nation's deteriorating infrastructure. In addition to supporting economic recovery by providing an effective transportation network that is crucial to commerce, this bill sets the framework for several other beneficial effects on the economy. For example, this legislation would create an estimated 320,000 jobs, 170,000 direct and indirect in construction industries and 150,000 more jobs "induced" by the construction. The bill also proposes a reallocation of existing user charges to make the current user fee structure more equitable. The bill eliminates a large portion of the existing cross-subsidy from lighter to heavier trucks, and it assesses motorists as directly as possible for the highway costs they impose. Finally, this legislation proposes changes to truck size and weight laws to help bring about uniformity and provide significant productivity benefits for the trucking industry.

This bill does not contain a Federalism turnback. However, the Administration remains committed to Federalism and will strive to return to State and local governments programs that are primarily of local interest and responsibility. The Administration is consulting with the Governors, affected State and local officials, and the Congress on a bill which will implement the appropriate turnback of highway programs and accompanying revenues. The current status of the consultative process is that $2.2 billion (equivalent to 2 cents of the current motor fuel tax) and the Federal-aid programs relating to urban, secondary, non-primary bridges and safety construction would be turned back. The attached bill treats these programs in a manner that will allow them to be easily incorporated into Federalism legislation.

Major provisions of the legislation are discussed below.

Title I—Federal-Aid Highway Program

This legislation continues the direction established by the Federal-Aid Highway Act of 1981. The extent of Federal involvement in all Federal-aid highway programs has been analyzed and the total program is restructured to emphasize the highway systems that warrant Federal interest. This legislation continues to make completion of the Interstate System and its rehabilitation and preservation the highest Federal priority. The bill provides program authorizations for the Interstate, primary, secondary, urban, bridge rehabilitation, and certain other programs through FY 1988. The 1982 Federal-Aid Highway Act provided authorizations in FY 1983 for several highway programs, but reduced the amount available for obligation by a factor based on the number of days in the continuing resolution passed by Congress (Pub. L. 97-276). This legislation establishes authorizations for the full fiscal year 1983 for the major highway programs.

Interstate Program

The Federal-Aid Highway Act of 1981 reduced the cost to complete the Interstate System by limiting eligible construction items to those that provide a minimum level of acceptable service on a safely operating system. This bill continues that definition, but increases the authorizations for Interstate construction to $4.0 billion in FY 1985, 1989, 1990, and 1991 and to $4.500 billion for FY 1986, 1987, and 1988. The FY 1985 authorizations actually become available beginning in FY 1984 because they are apportioned one year in advance of the year of authorization. The one-half percent minimum Interstate construction apportionment is not continued because it is contradictory to our emphasis on completing the Interstate System.

To further the expeditious completion of the System, the bill revises the criteria for distribution of Interstate discretionary funds. Rather than being allocated on a first come, first served basis as under present law, the funds will be allocated by the Secretary on a priority basis to projects that will help complete Interstate segments not open to traffic and to projects of unusually high cost relative to a State's apportionment. The discretionary fund will consist of $300 million per year set aside from Interstate construction authorizations and will also contain lapsed amounts from previous apportionments. Also, when Interstate substitute actions occur, sums equal to the amounts deducted from a State's unobligated Interstate apportionment will be added to the discretionary fund.

The importance of rehabilitation and preservation of the Interstate System is indicated in the bill by the increased levels of Interstate 4R authorizations. These increase from $2.5 billion for FY 1985 to $3.9 billion for FY 1989. These authorizations are apportioned a year in advance. Interstate 4R apportionments not needed for 4R purposes may be used to fund Interstate construction or primary system improvements. Interstate 4R apportionments will be adjusted in FY 1983 and FY 1984 to compensate States for any reductions in total Interstate authorizations that might occur due to the elimination of the one-half percent minimum Interstate construction apportionment.

Several modifications are made to existing Interstate substitution provisions. A specific authorization for appropriation of $650 million for each fiscal year from 1984 to 1988 is provided from the Highway Trust Fund for highway substitute projects. These funds will be available for two years. The 1983 Cost Estimate (ICE) is established as the base for costs of Interstate withdrawals approved after 1983. Construction cost adjustments to withdrawals will be prohibited after Congress approves the 1983 ICE.

Non-Interstate Programs

Primary Program. Authorizations are provided for this program through FY 1988. The priority primary program and the connector primary demonstration program are eliminated so that States can select those projects that reflect their own priorities.

Bridge Program. The bridge replacement and rehabilitation program authorizations are extended through FY 1988 and separate bridge apportionment formulas are established for primary bridges and non-primary bridges to provide more equitable distribution of funds. Apportionments are available for 2 years, after which unobligated funds may be redistributed to other States. A discretionary bridge fund of $300 million is set aside from the authorization for each year through 1988 for use on high cost bridges. Projects eligible for these funds must cost more than $10 million or at least twice a State's annual program apportionment.

Secondary and Urban System. The bill would continue funding for the secondary and urban programs at the FY 1982 level for each of the fiscal years 1983 to 1988.

Highway Safety Improvement Program. A new safety program is established to combine the separate categorical programs that now exist: Hazard Elimination, Rail-Highway Crossing, and FHWA's 402 Safety programs. Funding for this new program is provided through FY 1988.

Program Consolidation. The bill eliminates a number of existing categorical highway programs and rescinds any unappropriated authorizations. Unobligated balances will remain available until expended or the periods of availability expire. Most of these programs are eligible activities under regular primary, secondary, and urban programs. The bill also contains several provisions that will allow the Federal-aid highway program to be more effective and efficiently managed.

Title II—Transit Program

The mass transportation portion of this bill makes important changes in the structure of Federal transit assistance to begin to shift decisionmaking responsibility from Federal to State and local authorities. The bill would create a capital formula program for transit assistance and would phase out transit operating assistance by the end of FY 1984. In addition, the bill would establish a new transit infrastructure program to be funded from a portion of the proposed increase in the highway user fee. The bill would authorize Federal transit funding for fiscal years 1984 through 1988. Transit authorizations for the five-year period ending 1988 would total approximately $19.54 billion. The bill also includes $550 million in new fiscal year 1983 authorizations for the transit infrastructure program.

Infrastructure Program

Approximately $1.1 billion would be available annually for transit infrastructure projects from the one cent of the proposed increase in the highway user fee. This bill would add a new section 22 capital infrastructure development program to the Urban Mass Transportation Act of 1964, as amended (UMT Act), which would distribute these funds to urbanized areas by an administrative formula to be devised by the Secretary of Transportation. The funds would be available for transit infrastructure development projects involving the rehabilitation or replacement of transit facilities and equipment. These funds would be subject to the same streamlined requirements as that proposed for the new section 9 capital formula program (see below) with a proposed Federal/local share of 80/20.

The administrative formula, to be published annually in the *Federal Register,* would be based on the size, age, and condition of mass transit systems and the infrastructure needs of those systems. Each State, however, would receive no less than one-half of one percent of the total funds annually available under this program. Moreover, apportionments of a Governor or designated recipient in an urbanized area would be eligible to be used for highway projects in the State or urbanized area instead of for a transit infrastructure development project. However, the decision to release these funds for highway purposes will limit the availability of transit discretionary

funds to fund any project that could have been funded under this program.

Capital Assistance

This bill would add a new section 9 to the UMT Act, which would authorize $8.914 billion in capital funds to be distributed through a capital formula program for urbanized areas over 50,000 population. The Federal share for the capital formula program would be 80 percent.

The section 9 formula program funds would be eligible for capital purposes only, including planning, acquisition, construction, deployment of innovative demonstration results, and improvement of facilities and equipment. Capital activities would include the direct costs of spare parts for transit vehicles where the expected service life of the spare part exceeds one year. Federal participation in the cost of spare parts will enhance the ability of transit operators to keep their equipment in service and help to protect the original Federal capital investment in these items. New rail starts and rail extensions would not be eligible activities under section 9 without the prior concurrence of the Secretary of Transportation.

The capital program funds would be distributed based on a "revenue match" formula. Under this new formula each urbanized area would receive an apportionment equal to its share of the total national non-Federal mass transportation revenues (including State and local assistance).

The bill provides for local self-certification that recipients are meeting a number of existing Federal requirements. This certification process would provide for greater simplicity and flexibility for State and local governments. It would reduce the complexity of applications and thus the paperwork burden at all levels of governments. Finally, it is consistent with the Administration's philosophy of placing greater responsibility for program implementation at the State and local level.

The transit bill also includes a transfer of responsibility under Section 13(c) from the Secretary of Labor to the Secretary of Transportation, to provide greater flexibility to ensure that these labor protections are administered consistently with transportation policy. In addition, the bill contains a change in present procurement requirements which would allow the Secretary to determine a benchmark price for buses.

Title III—Highway Trust Fund and Revenue Provision

The revenue title features a five cent highway user fee increase. Four cents will be channeled into the Federal highway program and one cent of the increase will be available for public transportation or highway programs. This title also includes adjustments to the user charge structure to make a more equitable distribution of costs among the various classes of vehicles. As mentioned above, changes in the Federal size and weight standards have been coupled with the fee structure changes. This title provides that the user fee levels provided in this bill will be in effect through March 31, 1990 and permits expenditures to be made from the Highway Trust Fund through fiscal year 1991.

The program restructuring and authorization levels proposed in this bill represent a strong Federal commitment to an effective national transportation system. The new Federal focus on national interest programs accompanied by greater responsibility for the States will ensure fulfillment of the nation's transportation needs.

RONALD REAGAN.

THE WHITE HOUSE, *November 30, 1982.*

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that he had approved and signed the following enrolled bills and joint resolutions:

On September 22, 1982:

S. 3046. A bill for the relief of Mrs. Spyros Agriopoulos; to the Committee on the Judiciary.

By Mr. KASTEN:

S. 3047. A bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends; to the Committee on Finance.

By Mr. THURMOND (for himself, Mr. EAST and Mr. BIDEN):

S. 3048. A bill to amend Title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic and other products with intent to cause personal injury, death, or other harm; to the Committee on the Judiciary.

By Mr. MATTINGLY:

S. 3049. A bill to authorize the Secretary of Agriculture to make available stocks of corn of the Commodity Credit Corporation to poultry and egg producers in the United States in order to encourage the development of export markets for poultry; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HELMS (for himself and Mr. THURMOND):

S. 3050. A bill to limit the use of appropriated funds to increase the pay of Members of Congress, and for other purposes; to the Committee on Governmental Affairs.

By Mr. SASSER:

S. 3051. A bill for the relief of John Smitherman; to the Committee on the Judiciary.

By Mr. PERCY (by request):

S. 3052. A bill to amend the Board for International Broadcasting Act of 1973 to authorize an amended appropriation for fiscal year 1983; to the Committee on Foreign Relations.

By Mr. D'AMATO (for himself, Mr. MURKOWSKI, Mr. BAUCUS, Mr. MOYNIHAN, Mr. HEFLIN, Mr. KASTEN, Mr. SASSER, Mr. PROXMIRE, Mr. THURMOND, Mr. BOREN, and Mr. PRESSLER):

S. 3053. A bill to amend the Agriculture Act of 1949 to modify the dairy price support program; to the Committee on Agriculture, Nutrition, and Forestry.

By Mrs. KASSEBAUM:

S. 3054. A bill to amend the Natural Gas Policy Act of 1978, and for other purposes; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MURKOWSKI:

S. Res. 497. A resolution relating to the crisis in Poland and the imprisonment of Polish patriot Lech Walesa; to the Committee on the Judiciary.

By Mr. ROBERT C. BYRD:

S. Con. Res. 128. A concurrent resolution relating to monetary policy; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 3045. A bill to amend the Internal Revenue Code of 1954 to allow home equity conversions through sale-leaseback arrangements; to the Committee on Finance.

(The remarks of Mr. SPECTER on this legislation appear earlier in today's RECORD.)

By Mr. THURMOND (for himself, Mr. EAST, and Mr. BIDEN):

S. 3048. A bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm; to the Committee on the Judiciary.

FEDERAL ANTI-TAMPERING ACT

Mr. THURMOND. Mr. President, recently the people of this country have been terrorized by a series of events so reprehensible that most of us would not have thought them possible in this country. This reign of terror began in Chicago, where one or more persons, still unknown, inserted cyanide in capsules of Tylenol, which were then sold to unsuspecting customers of a local drug store. As we all know, several deaths resulted from these poisoned capsules, including three people from a single family. No sooner had accounts of these deaths appeared in the news media, than copycat crimes began to occur in other parts of the country, with other products, such as eyedrops, being adulterated so as to cause harm to unsuspecting customers. The fear that any product, no matter how innocent, might pose a threat of death became so widespread that many parents throughout the country refused to permit their children to go trick or treating on Halloween.

Mr. President, I can think of few things more despicable than the types of actions I have described. To poison capsules of headache remedies or to substitute acid for eyedrops and then return these items to a drug store shelf, not caring who will purchase them or whether those purchasers will be seriously injured or even killed is almost incomprehensible in its viciousness and callous disregard of human life.

For this reason, Mr. President, I am today introducing legislation that will make such activity a crime punishable by up to life in prison if death or personal injury occurs as a result of it and by a maximum of up to 20 years in prison where no such injury results. These penalties will apply not only where the intent of the perpetrator is to actually cause harm to another but also where his intention in committing such acts is to damage the reputation of another's business. In other words, the perpetrator of such an act will not be allowed to escape penalty by pleading that he did not really want to hurt anyone. Regardless of the intent, the conduct this bill would address is so malicious as to merit this type of punishment.

It should be noted that this bill will encourage the use of Federal investigative resources to discover and apprehend those who commit these acts in appropriate circumstances. Although it appears not to have been the case with respect to the Tylenol deaths in Chicago, it is easy to imagine a situation where a product is poisoned in one State and shipped into another, where an injury or death then occurs. In such an instance, the State where the victim resides would be limited in its investigative capability by the confines of its borders and investigative assistance at the Federal level is appropriate.

Mr. President, it is my hope that this bill will serve as a vehicle through which the Senate can consider an extremely serious problem that now confronts us and devise an appropriate remedy for it.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Anti-Tampering Act."

SEC. 2. Title 18, United States Code, is amended by adding the following new chapter:

"Chapter 56—ADULTERATION

"§ 1211. Malicious Injury by Adulterating a Product

"(a) Whoever, with intent to injure, kill, or endanger the health or safety of any person, or with intent to cause damage or injury to the business reputation of an individual, partnership, corporation, association, or other business entity (1) does any act which results in a food, drug, device, or cosmetic being adulterated or attempts to do any such act or (2) tampers or attempts to tamper with any hazardous substance or any other article, product, or commodity of any kind or class which is produced or distributed for consumption by individuals or

use by individuals for purposes of personal care or in the performance of services rendered within the household, if such act of adulteration or tampering occurs before the food, drug, device, cosmetic, hazardous substance or other article, product or commodity is introduced or delivered for introduction into interstate commerce, while such item is in interstate commerce, while such item is held for sale (whether or not the first sale) after shipment in interstate commerce or if such act of adulteration or tampering otherwise affects interstate commerce, shall be punished by imprisonment for not more than twenty years or fined not more than $20,000, or both, or, if personal injury or death results to another, by imprisonment for any term of years or for life.

"(b) Whoever, with willful and malicious intent, imparts or conveys or causes to be imparted or conveyed false information, knowing the information to be false, concerning an attempt or alleged attempt being made or to be made, to do any act which would constitute a violation of subsection (a) shall be punished by imprisonment for not more than twenty years or fined not more than $20,000, or both, or, if personal injury or death results to another, by imprisonment for any terms of years or for life.

"(c) As used in subsection (a), 'food,' 'drug,' 'device,' 'cosmetic,' and 'adulterated' shall have the meanings ascribed to those terms in the Federal Food, Drug, and Cosmetic Act, as amended, 21 U.S.C. 301-392; 'hazardous substance' shall have the meaning ascribed to that term in the Federal Hazardous Substances Act, 15 U.S.C. 1261(f)."

SEC. 3. If any provision of this Act is held invalid, all valid provisions that are severable shall remain in effect. If a provision of this act is held invalid in one or more of its applications, the provision shall remain in effect in all of its valid applications that are severable.

SEC. 4. The analysis of Part I of Title 18, United States Code, is amended by adding the following:

"56. Adulteration ..... 1211"

By Mr. MATTINGLY:

S. 3049. A bill to authorize the Secretary of Agriculture to make available stocks of corn of the Commodity Credit Corporation to poultry and egg producers in the United States in order to encourage the development of export markets for poultry; to the Committee on Agriculture, Nutrition, and Forestry.

(The remarks of Mr. MATTINGLY on this legislation appear earlier in today's RECORD.)

By Mr. HELMS (for himself and Mr. THURMOND):

S. 3050. A bill to limit the use of appropriated funds to increase the pay of Members of Congress, and for other purposes to the Committee on Governmental Affairs.

PAY INCREASES FOR MEMBERS OF CONGRESS

Mr. HELMS. Mr. President, today I am introducing legislation to require an affirmative vote of Congress before Members of Congress receive any increase in pay, benefits, or other emoluments.

I have always objected to the process by which Members of Congress are eligible to receive annual salary increases without voting for them. This backdoor pay raise system is repugnant to most Americans, and properly so. Moreover, Mr. President, I am persuaded that the credibility of Congress is at stake.

Mr. President, how did this process evolve and why? I think the answer is obvious. Certain Members of Congress, somewhere back in the eons of time, wanted to guarantee themselves a pay raise without having to face the voters after the fact. So they created the present system. The salaries of Members of Congress are tied to the salaries of white-collar Federal employees. Members of Congress and white-collar Federal employees receive an automatic raise each year—unless Congress blocks the raise. Here is how the system works:

Federal law—the Pay Comparability Act—requires the salaries of white-collar Federal employees, and thus Members of Congress, to be adjusted to achieve comparability with the wages paid persons performing comparable jobs in the private sector. The President's pay advisers are required to report to the President the pay raise necessary to achieve comparability. This year, for example, the pay advisers set that figure at 18.47 percent.

Now, Mr. President, is there any wonder that there is growing cynicism across America about things going on in Washington, D.C.?

Mr. President, this recommendation takes effect automatically unless the President recommends a lower figure. Congress can accept that figure by doing nothing or veto it, in which case the pay advisers' recommendation will take effect.

A pay increase for Members of Congress is perhaps the most controversial issue to come before the Congress since I came to the Senate in 1973. The vast majority of those who are taxed to pay the salaries of Members of Congress make nowhere near as much money as a Member of Congress.

As of now the legal rate of pay for Members of Congress is $74,300 per year, but because the pay cap is in effect the present salary of a Senator or Representative is $60,667.50. But if the pay cap comes off, up go the salaries, automatically, to $74,300.

Mr. President, if Members of Congress are willing to vote themselves a raise, fine. I will not vote with them, but they have a right to do so if they choose. What is unconscionable, however, is that Members could receive a hefty pay raise without voting for it.

I propose to do whatever I can to change this system, Mr. President, and I urge my colleagues to support my legislation, whether it be in the form of a freestanding bill or as an amendment to other legislation.

Mr. President, I ask that the bill be appropriately referred, and that it be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3050

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law—

(1) no appropriated funds shall be obligated or expended to increase the pay, rate of compensation, or other emoluments of any Member of Congress unless the increase is previously authorized by a law setting forth specifically the precise amount of such increase; and

(2) in no event shall any such increase take effect for the Congress authorizing the increase.

By Mr. PERCY (by request):

S. 3052. A bill to amend the Board for International Broadcasting Act of 1973 to authorize an amended appropriation for fiscal year 1983; to the Committee on Foreign Relations.

BOARD FOR INTERNATIONAL BROADCASTING AUTHORIZATION ACT, FISCAL YEARS 1982 AND 1983

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to amend the Board for International Broadcasting Act of 1973.

This legislation has been requested by the BIB and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Chairman of the Board for International Broadcasting to the President of the Senate dated November 23, 1982.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "The Board for International Broadcasting Authorization Act, Fiscal Years 1982 and 1983".

AUTHORIZATION OF APPROPRIATIONS

SEC. 1. Subparagraph A of section 8(a)(1) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)(1)(A)) is amended by striking after "and" "$98,317,000" and inserting in lieu thereof "$111,600,000".

BOARD FOR INTERNATIONAL BROADCASTING,
Washington, D.C., November 23, 2982.

Hon. GEORGE BUSH,
President of the Senate,
U.S. Senate, Washington, D.C.

DEAR MR. PRESIDENT: On November 4 the President sent a letter to you asking the Congress to consider an amended appropriation request for the Board for International Broadcasting (BIB) in the amount of $21.3 million for fiscal year 1983.

This request exceeds the current fiscal year 1983 authorization by $13,283,000. I therefore ask the Congress to increase the BIB authorization to $111.6 million. There is transmitted herewith proposed legislation to make the required amendment to the BIB Act of 1973 which would authorize the $21.3 million appropriation request.

A sectional analysis of the proposed legislation is also enclosed.

The Office of Management and Budget has advised the BIB that there is no objection to the presentation of this proposal to the Congress and that its enactment would be in accord with the program of the President.

Respectfully,
FRANK SHAKESPEARE, *Chairman.*

Enclosure.

SECTIONAL ANALYSIS

Section 1. This paragraph authorizes an amended appropriation of funds to the Board for International Broadcasting for improvements in the programs and facilities of Radio Free Europe/Radio Liberty, Inc. in fiscal year 1983.●

By Mr. D'AMATO (for himself, Mr. MURKOWSKI, Mr. BAUCUS, Mr. MOYNIHAN, Mr. HEFLIN, Mr. KASTEN, Mr. SASSER, Mr. PROXMIRE, Mr. THURMOND, Mr. BOREN, and Mr. PRESSLER):

S. 3053. A bill to amend the Agricultural Act of 1949 to modify the dairy price support program; to the Committee on Agriculture, Nutrition, and Forestry.

MODIFICATION OF DAIRY PRICE SUPPORT PROGRAM

● Mr. D'AMATO. Mr. President, today I am introducing legislation which would repeal the Secretary of Agriculture's authority to deduct 50 cents from the hundredweight of milk marketed commercially by producers. Scheduled to begin on December 1, 1982. This bill would also repeal the Secretary's authority to impose a second 50-cent assessment on April 1, 1983, should the Commodity Credit Corporation (CCC) projected purchases exceed 7.5 billion pounds of milk equivalent for the current marketing year. Such authority was granted to the Secretary in the Omnibus Reconciliation Act of 1982, which became Public Law 97-253 on September 8, 1982.

Mr. President, we are all well aware that the costs to the Federal Government of the dairy support program have escalated substantially in recent years. Although there is unanimous agreement amongst all concerned parties that the program is in dire need of comprehensive revision, the 97th Congress has been stymied in its attempts to formulate workable alternatives to the current system. Under the pressures of the budget process a frustrated Congress hastily devised the 50-cent deduction in a well-intentioned effort to curb the runaway costs of the dairy support program. Since enactment of the reconciliation bill, everyone agrees that the 50-cent assessment is a glaring mistake which only exacerbates the fundamental problems inherent in the price support program leaving future Congresses with bigger problems which sooner or later must be confronted. Just today, it was reported in the Washington Post that 50,000 dairy farmers are "curdingly mad at Secretary Block." Notwithstanding that the comments recorded at the Agriculture Department are running 50,000 to 20 in opposition, the Secretary is planning to begin collecting this fee on Wednesday.

The foremost problem facing this country's dairy industry is surplus dairy products that are piling higher and higher in Government warehouses at an enormous expense to the American taxpayer. As the dairy support program is currently constituted, it has become profitable for dairy farmers to produce with the sole intention of selling their products to the Federal Government. More than $3 billion of surplus butter, cheese, and dry milk purchased by the CCC is presently kept in Federal storage facilities at a cost of more than $100 million per year.

Instead of solving the surplus problem the 50-cent assessment will only compound it. It is reported from around the country that dairy farmers are increasing their production in order to meet their current costs in light of the new 50-cent deduction. Such a reaction will increase the quantity of surplus which the Government must purchase under the current program. In fact, the deduction will only curtail production by forcing the young and efficient farmers out of business due to their inability to meet heavy debt commitments at exorbitant interest rates.

Additionally, the 50-cent deduction will not result in lower prices for dairy products in the commercial market. With prices remaining at current levels, no incentive will be provided to American consumers to purchase more dairy products, which would alleviate the multiplying accumulation of Government surplus.

It would seem that any logically formulated revision of the support program would have as its highest priorities the removal of existing surplus held by the Government and, more importantly, the trimming of future surplus production. The 50-cent deduction, however, would not accomplish either of these two goals.

There is virtually unanimous agreement that the dairy support program is a complex problem that requires further study in order for a workable and lasting solution to be formulated. Indeed, such a study was mandated by Congress in the Agriculture and Food Act of 1981 (Public Law 97-98). Therein, Congress requested a report from the Secretary of Agriculture "describing the strengths and weaknesses of existing Federal programs, and the consequences of possible new programs, for controlling * * * surpluses of fluid milk and products thereof." The Secretary is expected to release interim results of the study by December 31, 1982.

I am confident that the findings of the Secretary will shed new light on the dairy support program giving the 98th Congress an improved informational base with which it can effectively confront the program's fundamental problems. More immediately, however, I believe the 50-cent deduction is a hastily considered compromise which will have unintended an untoward effects on the dairy industry.

Thus, in proposing to repeal the Secretary's authority to implement this assessment, this bill offers the 97th Congress the opportunity to correct this mistake. I urge immediate action by the 98th Congress to work toward a revision of the dairy price support program which will have long-term, positive effects on dairy farmers, consumers, and the Federal budget.

Mr. President, I ask unanimous consent that the test of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3053

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraphs (2) through (7) of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d) (2) through (7)), as amended by section 101(2) of the Omnibus Budget Reconciliation Act of 1982, are repealed.

(b) Section 201(d) of such Act, as amended by subsection (a), is amended—

(1) by striking out "(A)"; and

(2) by redesignating subparagraphs (B) and (C) as paragraphs (2) and (3), respectively.●

By Mrs. KASSEBAUM:

S. 3054. A bill to amend the Natural Gas Policy Act of 1978, and for other purposes; to the Committee on Energy and Natural Resources.

AMENDMENT OF NATURAL GAS POLICY ACT

Mrs. KASSEBAUM. Mr. President, today I am offering legislation aimed at alleviating a problem which is approaching crisis proportions for large segments of our population, that of spiraling natural gas prices. Prices that consumers must pay to heat their homes have already risen to such

levels that many people, even with careful budgeting, are unable to meet their monthly gas bills. Large numbers of commercial users are finding the price of gas so high that they are switching to alternate fuels, further increasing the costs to residential users. It is clear that something must be done.

These high natural gas prices cannot be justified by current market conditions. The natural gas market today is a distorted, inefficient allocator of our energy resources. One simple, stark fact is sufficient to establish the existence of this distorted market—the price is increasing for a commodity of which we have a surplus. It is simply unconscionable that natural gas consumers are forced to pay high rates, rapidly increasing, in a time of surplus supplies. We clearly do not need a further increase of rates in order to stimulate production.

In order to arrive at the source of this artificial price inflation, it is necessary to break down the total wellhead price increase. From mid-1981 to mid-1982, the average wellhead price of natural gas rose approximately 17 percent. Some of this increase is attributable to the increased ceiling prices for gas set in the NGPA. According to figures released by the Energy Information Administration, however, more than 75 percent of the increase is due to increasing purchases of high cost, section 107 gas. This trend is strikingly evident in the vast Hugoton gas field in Kansas. There, gas with an average price of $0.50 per Mcf is being shut-in in preference to supplies ranging from $6 to $9 per Mcf.

The pervasive existence of take-or-pay obligations requiring payment for gas whether it is taken or not is largely responsible for this seemingly irrational behavior of the natural gas market. High take-or-pay percentages based on open-well deliverability have so restricted the natural gas market that it cannot respond in a rational manner to changes in demand. Coupled with the mechanism of the purchased gas adjustment, these take-or-pay obligations lead to the abandonment of low-cost sources of gas first in a period of slackening demand.

My legislation attacks the problem of take-or-pay obligations by specifically granting FERC the authority to modify these obligations in cases where they are found to materially restrict the ability of a pipeline to purchase available supplies of low cost gas. My bill also adds imprudence to the list of factors contained in section 601 of the NGPA which permits FERC to disallow the passthrough of purchased gas costs.

To help insure that pipelines have sufficient incentive to purchase lower cost gas, my legislation requires FERC to apply an incentive rate-of-return procedure in pipeline cases. The goal of such a device will be to encourage a pipeline to contract for the maximum amount of low cost gas which is consistent with that pipeline's long-term supply and demand posture and its physical characteristics.

In addition to dealing with the take-of-pay contract situation, my bill freezes the wellhead ceiling prices set by the NGPA at their October 1, 1982, levels for a 2-year period. Gas which currently has no ceiling price specified for it and which is produced from a well the surface drilling of which began after October 1, 1982, would remain free of any price restriction. I believe that this freeze is necessary to give my other proposals an opportunity to work. It is my hope that at the end of the 2-year freeze, the action of moderating the operation of the onerous take-or-pay requirements will have obviated the need for the freeze.

In the final analysis, it matters very little who is to blame for the current spiraling gas costs. What is important is that we return to the goal that led to the enactment of the NGPA in the first place: Provide adequate supplies of natural gas at prices consumers can afford. It has become increasingly clear in the last few weeks that we have failed to achieve that goal. Congress must not turn its back on the people who bear the consequences of a gas market gone awry. We must take decisive action to set us back on the road to a rational natural gas policy and away from dependence on imported oil. I welcome the support of my colleagues in my attempt to restore some measure of sanity to the natural gas marketplace.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3054

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subtitle A of title I of the Natural Gas Policy Act of 1978 is amended by adding at the end thereof the following:

"Sec. 111. Price freeze on natural gas.

"(a) PRICE FREEZE.—Notwithstanding any other provision of law, the maximum lawful price applicable to any first sale of any natural gas in effect on October 1, 1982, shall continue to be the maximum lawful price applicable to such sale for the period starting October 1, 1982, through January 1, 1985. Any first sale of natural gas which has a price lower than the applicable maximum lawful price on October 1, 1982, may increase by the lesser of (i) the rate provided in the contract for such sale, or (ii) the annual inflation adjustment factor as determined in section 101(a)(1); but increases permitted hereunder may not cause the first sale price to exceed the applicable maximum lawful price in effect on October 1, 1982, during the freeze period.

"(b) PRICE FREEZE ON NATURAL GAS NOT COVERED BY WELLHEAD PRICE CONTROLS.—Notwithstanding any other provision of law, the maximum lawful price for the period commencing October 1, 1982, and ending January 1, 1985, for any first sale of natural gas from a well the surface drilling of which began by October 1, 1982, and for which there was no applicable maximum lawful price on October 1, 1982 under this title, shall be the contract price specified for deliveries of such natural gas on October 1, 1982, or if there was no contract price specified for deliveries of such natural gas on such date, the maximum lawful price shall be the average of the prices paid on October 1, 1982, for the same category of natural gas from the three nearest wells by surface location.

"(c) EXPIRATION OF PRICE FREEZE.—Following the expiration of the price freeze imposed by this section, the maximum lawful price for any first sale of natural gas for which a ceiling price is specified on October 1, 1982, shall increase from the October 1, 1982, level at the rate specified by this Act for that category of natural gas.".

(b) The table of contents for subtitle A of title I of the Natural Gas Policy Act of 1978 is amended by adding at the end thereof the following:

"Section 111. Price freeze on natural gas.".

Sec. 2. (a) Section 121 of subtitle B of title I of the Natural Gas Policy Act of 1978 is amended—

(1) in the matter before clause (1) of subsection (a) by striking out "January 1, 1985" and inserting in lieu thereof "January 1, 1987"; and

(2) in subsection (c), by striking out "July 1, 1987" and inserting in lieu thereof "July 1, 1989".

(b) Section 122 of such Act is amended—

(1) by striking out subsection (b)(1) and inserting in lieu thereof the following:

"(1) may not take effect earlier than July 1, 1987, nor later than June 30, 1989; and"; and

(2) in subsection (c), by striking out "May 31, 1985" both places it appears and inserting in lieu thereof "May 31, 1987".

(c) Section 123(a) of such Act is amended by striking out "On or before January 1, 1984, and on or before January 1, 1985," and inserting in lieu thereof "On or before January 1, 1986, and on or before January 1, 1987,".

Sec. 3. (a) Subsection (c)(2) of section 601 of title VI of the Natural Gas Policy Act of 1978 is amended (1) by inserting "imprudence," immediately after "abuse," and (2) by adding the following new paragraph:

"(3) Whenever the Commission, after a hearing had upon its own motion or upon petition of any party, shall find that any gas sales or purchase contract contains a provision which the Commission determines prevents the purchaser from responding to the demands of customers or other market forces by requiring the purchaser to pay for a minimum contract quantity of gas whether or not such gas is taken, the Commission shall have the authority to take such appropriate action as it may deem necessary including the rescission, annulment, or modification of such contract provision.".

(b) The Federal Energy Regulatory Commission shall take such action as may be necessary, within the 90-day period following the date of the enactment of this Act, to devise and put into effect an incentive procedure for determining the appropriate rate of return that a pipeline company may earn under section 4 of the Natural Gas Act. The purpose of this procedure shall be to stimulate the purchase of the maximum amount

of lower-cost gas which is consistent with gas availability and the need for a steady supply.

ADDITIONAL COSPONSORS

S. 1581

At the request of Mr. JEPSEN, the name of the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 1581, a bill to amend the Internal Revenue Code of 1954 to allow the taxpayer the choice of a tax credit or a deduction for each household which includes a dependent person who is at least 65 years old.

S. 1939

At the request of Mr. GOLDWATER, the names of the Senator from Maine (Mr. MITCHELL), the Senator from Wyoming (Mr. SIMPSON), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Texas (Mr. BENTSEN), the Senator from New Hampshire (Mr. HUMPHREY), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 1939, a bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases.

S. 1956

At the request of Mr. THURMOND, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 1956, a bill to amend title 38, United States Code, to authorize reimbursement for the reasonable charge for chiropractic services provided to certain veterans.

S. 2061

At the request of Mr. MOYNIHAN, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 2061, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public and Indian lands, and for other purposes.

S. 2300

At the request of Mr. RIEGLE, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 2300, a bill to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes.

S. 2804

At the request of Mr. PELL, the name of the Senator from Nevada (Mr. CANNON) was added as a cosponsor of S. 2804, a bill to authorize the Secretary of Education to provide financial assistance to States for use in expanding educational programs in juvenile and adult correctional institutions to assist in the rehabilitation of criminal offenders, and for other purposes.

S. 2919

At the request of Mr. LUGAR, the names of the Senator from New Jersey (Mr. BRADLEY), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of S. 2919, a bill to help insure the Nation's independent factual knowledge of Soviet-bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes.

S. 2953

At the request of Mr. PELL, the names of the Senator from Hawaii (Mr. INOUYE), and the Senator from Connecticut (Mr. WEICKER) were added as cosponsors of S. 2953, a bill to provide for a program of financial assistance to States in order to strengthen instruction in mathematics, science, computer education, foreign languages, and vocational education, and for other purposes.

S. 2954

At the request of Mr. PELL, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 2954, a bill to amend part E of the Higher Education Act of 1965 to provide cancellation of loans for certain teachers who enter the teaching profession in the field of mathematics, science, or computer education.

SENATE JOINT RESOLUTION 222

At the request of Mr. WEICKER, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from Florida (Mr. CHILES), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of Senate Joint Resolution 222, a joint resolution to designate the week of February 13 through February 19, 1983, as "National Police Athletic League Week."

SENATE JOINT RESOLUTION 254

At the request of Mr. JEPSEN, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from Montana (Mr. BAUCUS), the Senator from Indiana (Mr. LUGAR), the Senator from Illinois (Mr. PERCY), the Senator from Georgia (Mr. MATTINGLY), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Arizona (Mr. DECONCINI), the Senator from Texas (Mr. TOWER), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of Senate Joint Resolution 254, a joint resolution designating September 22, 1983, as "American Business Women's Day."

SENATE JOINT RESOLUTION 255

At the request of Mr. HEFLIN, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of Senate Joint Resolution 255, a joint resolution to designate the week of October 10, 1982, through October 16, 1982, as "Freedom Week U.S.A."

SENATE JOINT RESOLUTION 258

At the request of Mr. WEICKER, the names of the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from North Dakota (Mr. BURDICK), the Senator from Nevada (Mr. CANNON), the Senator from Mississippi (Mr. COCHRAN), the Senator from New York (Mr. D'AMATO), the Senator from Arizona (Mr. DECONCINI), the Senator from Illinois (Mr. DIXON), the Senator from Kansas (Mr. DOLE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Washington (Mr. GORTON), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Wisconsin (Mr. KASTEN), the Senator from Vermont (Mr. LEAHY), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Ohio (Mr. METZENBAUM), the Senator from Georgia (Mr. NUNN), the Senator from Illinois (Mr. PERCY), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of Senate Joint Resolution 258, a joint resolution to authorize and request the President to designate the month of December 1982 as "National Close-Captioned Television Month."

SENATE CONCURRENT RESOLUTION 124

At the request of Mr. SASSER, the names of the Senator from South Dakota (Mr. PRESSLER), and the Senator from Iowa (Mr. JEPSEN) were added as cosponsors of Senate Concurrent Resolution 124, a concurrent resolution concerning the administration's study of hydroelectric power.

SENATE CONCURRENT RESOLUTION 128—CONCURRENT RESOLUTION RELATING TO MONETARY POLICY

Mr. ROBERT C. BYRD submitted the following concurrent resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. CON. RES. 128

Whereas the Nation's economy is entering the seventeenth month of a severe recession, with few signs of recovery;

Whereas nearly twenty million people are underempioyed or unemployed due to this recession;

Whereas our Nation's steel, auto, housing industries, and agricultural sector remain mired in a depression;

Whereas given the current underutilization of both labor and capital, lower interest rates will not rekindle inflation; and

Whereas lower interest rates are the key to higher employment, higher production and sustained economic growth: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), The Board of Governors of the Federal Reserve and the Federal Open Market Committee should take such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment.

SENATE RESOLUTION 497—RESOLUTION RELATING TO POLISH SOLIDARITY

Mr. MURKOWSKI submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 497

Whereas the American people and the people of Poland share a close and lasting friendship which is founded upon an unfaltering respect for freedom; and,

Whereas the imposition of martial law and the eradication of the Polish worker's chosen trade union Solidarity represent grave abridgements of the civil rights and personal liberties of the Polish people; and,

Whereas a military government has engaged in a systematic and brutal supression of human freedoms in Poland since December 13, 1981; and,

Whereas the people's chosen trade union representative, Lech Walesa, was imprisoned for several months and deprived of the voice of leadership democratically conferred upon him by the Polish people; and,

Whereas the martial law regime continues in Poland to engage in acts of violence and repression against its own citizens in contravention of the indomitable right of the Polish people to determine their own future:

Now, therefore, be it

Resolved, That it is the sense of the United States Senate that:

(1) the Senate fully supports the efforts of the Polish people to secure and express the privileges and immunities of democratic freedom;

(2) the Senate condemns and abhors the suppression of civil liberties and human rights by the martial law government in Poland;

(3) the American people respect and admire the commitment to the ideals of freedom and independence manifested by the Polish people and Mr. Lech Walesa in particular;

(4) the Polish people have an unalienable right to choose their representatives in all matters, free from external influence or coercion;

(5) the President and his advisors should strive to explore possible means of solving the crisis in Poland in concert with America's allies so as to remove the obstacles to the democratization process in Poland;

(6) that December 13, 1982, should be declared Polish Solidarity Day, a day on which all Americans should pause to consider the plight of the Polish people and thereafter reaffirm their commitment to maintaining the dream of freedom, as an expression of solidarity with the Polish people.

Mr. MURKOWSKI. Mr. President, I am submitting today a resolution pertaining to the continuing crisis in Poland. Most Americans are aware that martial law was imposed in Poland late in the evening of December 13, 1981. The 21-member Polish military junta led by General Jaruzelski has, since that date, engaged in a systematic eradication of the precious few civil liberties which the Polish citizens and their chosen trade representative, Solidarity, had previously negotiated. The brief period of democratization which Poland experienced during the months before last December 13 has ended, but must not be forgotten.

The Polish people stand today deprived of basic human rights and freedoms by General Jaruzelski's regime. The swiftness with which the military moved and the severity of the military's response to opposition in Poland were startling. The brutality and oppression which the Polish people have suffered at the hands of their own Communist government should be recognized and remembered by the citizens of all free nations as evidence of the need for unfailing vigilance in defense of democracy.

The purpose of this resolution is to establish December 13, 1982, as "Polish Solidarity Day," a day of national prayer and reflection on which all Americans pause to consider the plight of the Polish people and to reaffirm their commitment to the ideals of freedom and democracy. I hope that through this expression of support and unity, all Americans can symbolically demonstrate to the people of Poland and to the world our commitment to the goal of freedom.

AMENDMENTS SUBMITTED FOR PRINTING

FURTHER CONTINUING APPROPRIATIONS, 1983

AMENDMENT NO. 3639

(Ordered to be printed and to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to a joint resolution to be considered making further continuing appropriations for the fiscal year ending 1983, and for other purposes.

AUTOMATIC PAY RAISE

● Mr. PRESSLER. Mr. President, I send to the desk an amendment that will block the automatic pay raise Congress would otherwise receive December 17, 1982, on the expiration of the current continuing resolution.

My objections to this pay raise are the same as those of almost every other American citizen. Quite simply, it is not right for Congress to increase its salary automatically in light of the hardships many sections of the economy currently are facing.

Some Members of Congress may disagree with me, and say that congressional pay is not high enough. However, there can be no doubt that the method being used to achieve this pay hike is a repeat of past efforts to avoid a direct up-or-down vote on the matter of Senators' and Representatives' salaries.

If a pay raise is needed, then the question should stand alone and not be an amendment to some other legislation. The implementation of a pay raise should not be automatic. These efforts seeking "backdoor" pay raises probably will always fail because a majority of Congress feels as I do—that we should address the question of pay raises openly and honestly.

I ask unanimous consent that the full text of my amendment be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD as follows:

At the appropriate place in the joint resolution, insert the following:

SEC. . (a) For the purposes of this section, the term "Member" means an individual who is a Senator, Member of the House of Representatives, Delegate to the House of Representatives, Resident Commissioner from Puerto Rico, President pro tempore of the Senate, Deputy President pro tempore of the Senate, Majority Leader of the Senate, Minority Leader of the Senate, Majority Leader of the House of Representatives, Minority Leader of the House of Representatives, or Speaker of the House of Representatives.

(b) No part of the funds appropriated for the fiscal year ending September 30, 1983, by this Act or any other Act may be used to pay any Member at an annual rate of pay which exceeds the annual rate (or maximum annual rate, if higher) of pay payable to such Member for September 30, 1982.

(c) For purposes of administering any provisions of law, rule, or regulation which provides retirement, life insurance, or other employee benefit, which requires any deduction or contribution, or which imposes any requirement or limitation, on the basis of a rate of pay, the rate of pay payable after the application of this section shall be treated as the rate of pay.●

COMMITTEE AUTHORITY TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. STEVENS. Madam President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, December 1, at 10 a.m., to hold a hearing to consider the nominations of Donald P. Hodel, of Oregon, to be the Secretary of Energy; and Martha O. Hesse, of Illinois, to be an Assistant Secretary of Energy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Madam President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, December 1, at 2:30 p.m., to hold a secret level consultation to discuss the Guatamala situation.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. BAKER (for Mr. MATHIAS). Mr. President, the Committee on Rules

and Administration will hold a meeting on Thursday, December 2, 1982, at 9:30 a.m., in room 301, Russell Senate Office Building, to receive testimony on two measures currently pending before the committee: Senate Concurrent Resolution 32 and House Concurrent Resolution 153, both to authorize a bust or statue of the late Dr. Martin Luther King, Jr., to be placed in the U.S. Capitol.

Senators and Representatives wishing to testify and those wishing to submit a statement for the record should contact Anthony L. Harvey of the Rules Committee staff on 224-9078.

Mr. President, on Wednesday, December 8, 1982, at 10 a.m., in room 301, Russell Senate Office Building, the Committee on Rules and Administration will meet to receive testimony from Senators and from officials of the electronics industry on computer and communication systems and services for the 1980's.

Anyone wishing to testify or to submit a statement for the record should contact John K. Swearingen of the Rules Committee staff on 224-305.

Mr. President, at 9:30 a.m. on Thurday, December 9, 1982, the Committee on Rules and Administration will have a business meeting in room 301, Russell Senate Office Building, to consider legislative and administrative business items currently pending before it.

For further information regarding this meeting, please contact Carole Blessington of the Rules Committee staff on x40278.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee and the House Small Business Committee will hold a joint hearing on "the Findings of the Securities and Exchange Commission Government-Business Forum on Small Business Capital Formation," on December 1, 1982, in room 2359A of the Rayburn House Office Building, beginning at 2 p.m. Senator D'AMATO and Representative NOWAK will cochair the hearing. For further information, contact Mike Haynes at 224-8487.

Mr. President, I would like to announce that the Senate Small Business Committee will conduct an Oversight hearing on "the Small Business Administration's SBIC Program," December 16, 1982, in room 424 of the Russell Senate Office Building, beginning at 9:30 a.m. For further information, contact Mike Haynes at 224-8487.

ADDITIONAL STATEMENTS

APPOINTMENT OF CALVERT BRAND

● Mr. LUGAR. Mr. President, today I rise to bring to the attention of my colleagues an appointment made by the administration during the recess. I am pleased to inform the Senate that my good friend, Calvert Brand, has been named General Deputy Assistant Secretary for Housing-Federal Housing Commissioner at HUD.

This is an important post with significant responsibility for the quarter-trillion-dollar subsidized housing program and the equally important FHA programs. Fortunately, Cal Brand is a man uniquely qualified for service in this position. His background combines experiences as a businessman, a housing developer, a legislator, and a government executive. One might be able to imagine a background better suited to managing Federal housing policy at such a critical time in our Nation's history but it would not be easy.

Cal Brand is a native of Columbus, Ind., where he has played an important role in the development of that progressive city while building a very successful business in lumber and building materials. However, he is much more than a public spirited businessman.

In 1955, he Began his service as an elected representative, first as a city councilman and then in the Indiana State Legislature. In the legislature, he was chairman of the house budget and ways and means committees.

In 1970, he joined the staff of Gov. Edgar D. Whitcomb, first serving as administrative assistant and then as State budget director. In each of these positions, he had a reputation for integrity, imagination, hard work, and the highest levels of public service.

He began his Federal service last year as a Deputy Assistant Secretary for Policy and Budget at HUD. He has come to Washington at great cost both in the personal sense as well as the financial sense.

Cal Brand does not need this job. He has agreed to help the Reagan administration out of a sense of responsibility and duty. He has the knowledge, experience, and skills needed to administer one of the most difficult Federal agencies during a time of great turmoil. We are fortunate to have him in Government and I am fortunate to have him as a friend.●

DEDICATION OF A VIETNAM WAR MEMORIAL

● Mr. PELL. Mr. President, during the recent congressional recess I had the honor of participating in the dedication of a memorial to those who served and died in the war in Vietnam. This memorial was erected in the village of Harrisville, R.I., under the sponsorship of the Berard-Desjarlais Post of the American Legion. Otis E. Jolly, commander of the post, led the effort to erect the memorial, assisted by Norman H. Manville, town clerk of the town of Burrillville within which the village of Harrisville is located.

Harrisville is the kind of picturesque village we envision when we think of small towns in New England. There are white church steeples, a town common and a dam forming a still pond which reflects the surrounding homes and trees of the close-knit community. It is by that pond on a small patch of grass that Harrisville chose to honor the memory of six young men who left their lives in Rhode Island and lost their lives in Vietnam.

To a town the size of Harrisville, six is an enormous number of deaths. To a community as close as Harrisville, even one is a burden.

Whatever thoughts the individual residents of Harrisville may have about the course of the war in Vietnam, it was evident at this dedication that they are united in honoring the memory of the young men who lost their lives in the service of their country in this conflict. The memorial lists their names: Pfc. James A. Blanchard, Maj. Walter F. DeCorta, Sp. Peter Kapas, Jr., Capt. Edward A. Lapierre, Sgt. Owen S. McCann, and Pfc. Allen B. McCutcheon.

The dedication ceremony included a moving address by State Senator Irene P. Smith, who represents Harrisville in the Rhode Island General Assembly. Senator Smith eloquently expressed the thoughts of many Americans today about the war in Vietnam and about the men and women who fought in it. I ask that the text of her address be printed at this point in the RECORD.

The address follows:

REMARKS BY SENATOR IRENE P. SMITH

"Memory" said Cicero, "is the treasury and guardian of all things." "Praising what is lost," said Shakespeare, "makes the remembrance dear."

We come here today in that spirit. We are gathered to treasure and praise those who have been lost to us, and thereby to make the memory even more meaningful.

The function of this gathering is to renew the memory of the impact on our lives of those whose journey through life preceded ours. We are reminded here of what that journey left behind.

Life is a long highway, with twists and turns to our lives—some get off the highway after only a few miles, and some stay on the highway for many miles. Those we honor here today, journeyed only a few short miles on this road to life.

But, we have not come together here today, however, just to reinforce our individual memories of those so well worth remembering. We came also for a very real purpose of trying to show those nearest and dearest to them that their deep sense of loss is shared—shared by us as individuals, shared by a community.

We hope that in some way, by showing our own sense of loss and fond remembrance, we can help further the sense of a life well lived—a time on Earth well spent—a heritage of lasting meaning.

The Vietnam conflict was different—where WWII brought Americans together—Vietnam divided us;

Where WWII saw young men, some not even old enough, flock to enlist in the

Armed Forces; Vietnam, to a very frightening extent, disaffected a substantial fraction of an entire generation.

The Vietnam conflict prompted riots and even affected elections on March 2, 1973, when the United States, the Viet Cong, the North and South Vietnamese, signed a peace treaty in Paris, that ended so many years of a far off, often questioned war—the end came like a whimper.

Unlike the headlines of the New York Daily News when WWII ended—Peace Breaks Out!!!—a truly appropriate phrase, because peace is precisely that—a breakout, a break away from the grinding horrors of war. In 1945 the bands played, the crowds cheered and the churches of all denominations were packed on that night—celebrations lasted for weeks, and each time one more veteran came home, another parade, another celebration.

When Vietnam was over, it was as though we just turned the television to another channel—for some reason, and it certainly was not done intentionally—we made the Vietnam veteran feel that he had to simply slip quietly back into his own country and back into our lives. It was as though the American public said it is over—now let us get back to something else.

The Vietnam war was different—its conclusions much less definitive than WWII or even Korea, and the homecomings much less triumphant, but the commitment of those who served was no less heroic.

Why, one might ask, did it happen this way. I am sure that each of you here today has a different answer depending upon which generation you belong to. Was it because our attitudes about war have changed—perhaps. But it should not lessen our sensitivities to the loss of lives.

It should not make the sacrifices made by those who died or those they left behind any less meaningful.

Let us never forget and always remember—peace and freedom, wherever it might be, has always been, and always will be very expensive. And the cost is in human lives.

I remember very well all of those young men whom we honor here today, some I knew well, some I knew casually. And as I sat here thinking about them, about their families and about the community and why we were gathered here: I asked myself what would they want us to do for the Vietnam veterans who came home to find no jobs; who came home to hospitals; and who came home to one disappointment after another.

I think they would want us to understand—to reach out and help—not pity—but be sensitive that Vietnam was a very different kind of conflict and they came back to us with very different problems, very different concerns. These veterans fought a war in and for a different culture—it tore at the very fabric of those who fought—it was psychological; it was a war of nerves.

Their problems are different, let our solutions to their problems and concerns be different—let us understand.

As we dedicate this monument to them today as a mark of our respect and our dedication to peace and freedom, let us be assured that they did not sacrifice their lives in vain, because the greatest monument to them and to their bravery, is the peace and freedom we enjoy today. Let us guard it well. Let us be very jealous of our freedom.

Christopher Wren's epitaph in St. Paul's in London, reads, "If you would see their monument—look around." I would like to paraphrase that here today, "If you would see the real monument to those human beings we memorialize today, look around." It is in your faces, it is in your hearts.●

SOLZHENITSYN TELLS TAIWAN TO RELY ON ITSELF

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, one of the greatest writers of this century, a man who is a brillant observer of historical trends, Alexandr Solzhenitsyn, recently gave an important speech in Taipei, Taiwan, in which he warned Free China not to rely on support by the United States for its future survival.

Mr. Solzhenitsyn, who was a Nobel Prize winner in 1970, was invited to give a lecture in Taipei by the Wu Shan-lien Literature Foundation. In his Taipei speech, which was delivered before an audience of academics and students on October 23, Mr. Solzhenitsyn expressed his amazement at the abandonment of Taiwan by nations of the world which should be able to clearly perceive the difference between democratic developments and economic progress on Taiwan and the totalitarian brutality and economic poverty of the Communist system.

According to Mr. Solzhenitsyn, the problem lies in the fact that the Free Western World is less and less prepared to pay for the price of freedom. Western nations are even afraid to sell Taiwan weapons for its own defense out of fear of angering Peking.

Solzhenitsyn believes the United States has also succumbed to the general world trend to leave the Republic of China to its perils. We have abrogated diplomatic relations and a defense treaty with Taiwan, promised to reduce military support and have denied much of what Taiwan needs.

Mr. Solzhenitsyn warns Taiwan that it can rely only on its own strength. He raises hope, however, that the destructive elements of communism will finally bring about its own collapse.

Mr. President, I believe Mr. Solzhenitsyn's message offers a valuable lesson for all persons who love liberty. I submit the text of his speech for the RECORD.

[From the Washington Times, Oct. 25, 1982]

WEST'S "FEAR" SEEN A THREAT TO TAIWAN

(By Alexandr Solzhevitsyn)

For 33 years, Taiwan, I believe, has attracted, by its specific fate, the attention of many people throughout the world. I myself felt that way long ago. Three score countries have already fallen under the yoke of communism. Scarcely one of them has been fortunate enough to retain even a tiny patch of its independent national territory, where its state authority could continue to develop despite the disruption, and through comparison show the world the difference between itself and communist disorganization. In Russia, such a patch of land could have been Wrangel's Crimea. But lacking any external support and abandoned by its unfaithful former allies, it was soon crushed by the communists. But in China, thanks to a wide strait, a fragment of the former state became the Republic of China on Taiwan, which, for a third of a century, has proved to the world what heights of development could have been reached if the whole of China had not fallen under the yoke of communism. Today, the Republic of China on Taiwan differs from others in its development, its industrial achievements and the well-being of its population, thereby proving how logically the forces of a nation can be guided, if they are not in inimical hands.

It would seem that the population of our planet should clearly perceive such an instructive comparison and should have its eyes opened to see how peoples who escape communism flourish and how those who fall victim to communist tenets perish by the millions. The history of communist destructions in the Soviet Union, Poland and Cambodia are now known to all. The history of the millions destroyed in China, Vietnam or North Korea is yet to be revealed in detail, but many signs allow us to judge this history even now.

But no. It is free China which has had to endure and suffer from the greatest injustices and ignoble attitudes of other countries. The United Nations, long degraded to an irresponsible side show, disgraced itself by expelling from membership the 17 millions of Free China. The majority of countries on our planet treacherously expelled your country from the U.N., whose delegates, adding insult to injury, whistled, jeered and shouted. The majority of Third World countries behaved like madmen who don't know the price of freedom but are themselves waiting for the kick of the boot.

For centuries the Western world has known very well the price of freedom. But with years passing and well-being achieved, it is less and less prepared to pay for it. The western people value their state systems but are less and less inclined to defend them with their own bodies. From decade to decade, the West has become increasingly senile and unable to defend itself. The betrayal of one country after another had already begun before the second world war. Afterward, no scruples were felt in abrogating the whole of Eastern Europe just for the sake of the West's own well-being. How easy it was to betray the government of Mikolaychik, how easy it was to withdraw support from one's ally Chiang Kai-shek. And soon we shall witness how one country will betray another for the price of surviving just a little longer. Should it be surprising that the majority of the frightened western countries are even afraid to sell you weapons for fear of angering Peking. That's how much their drive and concern for freedom is worth. Meanwhile, threatened Europe should understand your position better but is so cowardly that it fails to recognize that the Republic of China and other countries of Asia are themselves endangered. Just recently, the former premier of Japan declared that the arming of Free China would destabilize the Far East. What more can be said?

They are all obsessed with the search for self-protection and the quest for a stand-in. So there emerged an attractive myth—that there are "bad" and "good" communisms. And out of such a myth grew the image of Communist China as a good-natured peacemaker. But should that be surprising—when in South Korea, which herself survived a Communist assault, there exists a myth that actually the Soviet Union is not directly hostile to them, not so much an enemy,

not like North Korea. The South Koreans have also been doing their utmost to curry favor with Peking. Now they are hesitating about whether to give a defecting Red Chinese aircraft to Free China.

No, it is not out of short sightedness, not out of stupidity, that such myths are believed, but out of despair, out of the loss of spirit.

In a particular relationship to you is the United States of America. Up to this day, the United States provides the only outside guaranty restraining the Communists from attacking your island. But how difficult it becomes for the United States to remain faithful to Taiwan, how much has already been lost on the way. The Americans have also succumbed to the general world trend to leave the Republic of China to its perils, to abandon it to its fate. America moved to abrogate its diplomatic relations with the R.O.C. for what? For what fault of hers? Only to follow the futile western dream of gaining an ally in Communist China. America has restricted its connections with you, curtailed its military support and is denying you much of what you need.

What pressures have been exerted upon American presidents, urging surrender of Taiwan. Not all of them could bear the strain. Here we have a former president, just back from a visit to China, where he flattered his hosts by saying that "A strong Communist China is a guarantee for peace" and that America seems to be interested in a strong Red China. Such people in former years have governed the United States and there is no guarantee that another such person might not succeed President Reagan.

The United States is highly heterogeneous. There are many currents, of which the capitulatory tides are quite powerful. Extremely powerful circles are leaning toward betrayal of a free country in favor of a friendship with a totalitarian one. They gladly picked up the hypocritical offer from Communist China on "peaceful unification." Many American journalists cry from the housetops that Peking is now "bound by promises" to effect unification peacefully. They wanted to forget, and therefore successfully forgot, how many times the communists have already cheated. The experience of "governments in concert with communists" in postwar Eastern Europe has taught no lesson. This helpless experiment now is being conducted in Cambodia. Similarly, according to Kissinger's agreement, North Vietnam was "bound by a ceasefire"—until it set the day for the seizure of South Vietnam. And leading American newsmen reached such heights of stupidity as to write that the United States doesn't make mistakes. If Red China "breaks its promise" and seizes Taiwan by force—then—only then—America would be freed from obligations and could again start to deliver arms . . . to whom, then? . . . Yes, such delirium appears on the pages of leading American newspapers, and they don't realize what they are doing.

And thus the influential circles in the United States want to force Taiwan to accept capitulatory negotiations, to relinquish voluntarily its freedom and power.

What, then, does Communist China want from you? Certainly, it is eager to grab your blossoming economy to plunder and devour it. After all that has happened in the 20th century, only shortsighted simpletons can trust Peking's promises that it will totally preserve your economic and social system, and even your armed forces along with some elements of freedom. But the main issue is not to take away from wealth, to steal the fruits of your hard work. The main thing is that the communist system does not tolerate any deviation in anything or anywhere. Not even the wealth of your island is important, what matters is the deviation from their system. Communist China hates you for your economic and social superiority. For them it is not permissible that other Chinese should know that there can be a better life without communism. The communist ideology does not tolerate any islets of freedom. And so, with all their might, the communists want to cut off the sale to you even of defensive arms, to try to weaken your defense capability, to disturb your balance of power in the strait—and thus to bring closer the day of intrusion into your island.

In order to nurture the apathy of the United States, Red China plays speculatively on the negotiations between Peking and Moscow on matters of China-Soviet rapproachement. Such rapprochement is not make-believe. It is a very realistic perspective. Both governments have long had common roots, a fact which everybody seems to forget. As far back as 1923, a Soviet agent Grusemberg, alias "Borodin," prepared a communist coup, and it was he who promoted Mao Tse-Tung and Chou En-Lai to the highest positions in the party.

All that I am telling you—because of the deadly danger in which you find yourself—is understood well by many, if not yet by all. The threat is understood better here than in South Korea, where the young generation, the students, have quite forgotten the brief horrors of communist intrusion, so that the present freedom seems to them not enough. But they will remember and revalue their present "nonfreedom" when, after a command "hands back," they are driven under armed guards into concentration camps.

It seems to be fashionable in the West: to demand from all who stand in the forefront of defense, under machine-gun fire, to demand the widest democracy, and not just simple but absolute democracy, bordering on total dissoluteness, on state treason, on the right to destroy their own state and country—such freedom as western countries tolerate. Such is the price the West demands from each menaced country, including yours. But it seems that on your island the logical limits are known and will sustain your struggle.

There is another danger stalking you. Your economic successes, your living standards and well-being are of a two fold nature. There are the bright hope of all the Chinese people. But they also can become your weakness. All prosperous people tend to lose the awareness of danger, an addiction of the good living conditions of today, and consequently lose their will for resistance. I hope and I urge you to avoid such a weakening. Don't permit the youth of your country to become soft and placid, to become slaves to material goods, until finally they will prefer captivity and slavery to the struggle for freedom. That for 33 years you lived peacefully does not mean that you might not be attacked in the following three years. You are not a serene, care-free island, you are an army, constantly under the menace of war.

You are 18 millions, about as many as there are Jews in the world and your problem is of the same dimensions. But the Jewish problem attracts the attention of all states and has become one of the central problems of contemporary times. Comparing this with the uniqueness of your position, I don't preceive why the fate of Taiwan should not command the equal attention of the world.

But in today's world betrayal from weakness reigns supreme, and it is only your own strength upon which you can really rely. But there is also one more big and bigger hope: the peoples of the enslaved nations, who will not endure indefinitely but who will rise in one menacing hour—menacing to their communist rulers.

In your books you write that your island is "a bastion of national recovery." So be it. Not only defense, not only self-preservation should be your goal—but help, but the liberation of your compatriots suffering on the mainland, and first of all, free and courageous radio broadcasts.

It may seem, since no one comes to mind, that you have no firm, reliable allies, although them might appear in the hour of destruction. But you have the most formidable ally in the world: One billion Chinese people. Their sympathy is your moral and spiritual support. Just a few days ago, you had an encouraging signal from your compatriots through the act of defection of a Red Chinese air force pilot. Often I think of still anonymous prisoners of the Chinese gulags whose true story might not be told until the 21st century.

All the oppressed people, including the peoples of the Soviet Union, cannot rely on outside help, only on their own strength. At the best, the whole world would watch indifferently by possibly with a great deal of relief, if the mad rulers of China and the USSR should unleash war among them. I hope that won't happen. But in any case, let us testify here and now to the mutual amicability and trust between the Chinese and Russian peoples, to the absence of contraditions amongst them, even more, let us hope for a union of our long suffering compatriots against both communist governments. Whatever might happen between these two self-interested, anti-national governments, let us preserve mutual understanding, mutual compassion and frendship. Let's not allow them to blind our eyes and deaden our ears through fruitless national hatred.

We don't know how long the plague of communism will affect our world. One hundred and thirty-five years ago, who would have told the leaders of the then great empires that the tiny group of utopists—communists who organized themselves in Europe—would conquer them all with iron and blood and force to their knees their might and pride? They would not even have smiled at such a prophecy. Such forces could not then be seen anywhere. The strength of the communists was based on their drive and their cruelty, the weakness of the West was rooted in the absence of the will to fight.

We don't know what whimsical zigzags human history will follow. I have already expressed a supposition that would communism will outlive both Soviet and Chinese communist regimes and spread over other countries, many of which are still eager to experience communism. But in our two countries national common sense shall finally prevail.

Anyway, both our peoples have suffered too much, lost too much. They are already moving along the way of liberation and recovery.●

ARMANDO VALLADARES

● Mr. JACKSON. Mr. President, after 22 years of imprisonment in Cuban jails as a political prisoner Armando Valladares was released by the Castro government last month. He is at last a free man and we rejoice in his release.

Mr. Valladares' refusal to bow to the arbitrary and inhumane dictates of the Castro regime is particularly remarkable and attests to his extraordinary courage and integrity. And, his long and cruel imprisonment for his religious and philosophical views is yet another example of the lengths to which the Castro government will go to silence dissenting points of view.

Mr. President, I ask that an October 24 article from the New York Times and a November 17 article from the Washington Post relating to Mr. Valladares' release from Cuba be printed in the RECORD.

The articles follow:

[From the New York Times, Oct. 24, 1982]

POET FREED BY HAVANA TELLS OF 7 YEARS IN UNLIGHTED CELL

(By John Vinocur)

PARIS, October 24.—Armando Valladares, a Cuban poet who was freed in Havana last week after 22 years in prison, said tonight that he had been kept for seven years in a cell without light.

The poet arrived in Paris Friday after his release following a personal appeal from President Francois Mitterrand to Fidel Castro, the Cuban leader. He said he had been informed of the decision only three or four days before he was placed aboard a plane in Havana on Thursday.

The French Government had expressed particular interest in his case, and Régis Debray, Mr. Mitterrand's special counselor for cultural affairs, and a friend of the late Ernesto Che Guevara, the Latin American revolutionary, visited Havana to discuss the matter earlier this month.

Mr. Valladares's comments tonight were made in brief, fragmentary interviews with two of the French television networks. The translation of his replies to two reporters' questions was broadcast over the poet's own voice and it was impossible to hear his remarks in Spanish

AVERAGE DAY DESCRIBED

Mr. Valladares said in the interview that he was never a terrorist or an operative of the United States Central Intelligence Agency. Rather, he told the television network, he was accused of being an enemy of the revolution.

Mr. Valladares gave no details on his isolation in the cell, but described an average day as one in which he got up at 4 a.m. to crush stones in withering heat until 6 or 7 p.m. "It was forced labor," he said. On return to his cell, he went on, there was only a little water in which to wash.

When asked if he had been tortured, Mr. Valladares replied: "I can't really reply in three minutes. I'll tell it all in my book."

Normally, Mr. Valladares would have been released from prison in 1986. He was sentenced to a 30-year term in 1961 for what was charged was his involvement in terrorist activities but his sentence was later reduced.

During his time in prison the poet was able to communicate to friends outside of Cuba that his legs had become paralyzed, and the title of a collection of his work was called "From My Wheelchair."

ABLE TO WALK AGAIN

In the interviews today, Mr. Valladares said he had received treatment in Cuba from late 1978 until his release. Six months after the treatments began, the poet said, he was once again able to walk. He told of being furnished orthopedic devices for his knees and ankles. Accompanying pictures showed the poet, who is 45 years old, walking in the streets with his wife.

When one of the interviewers asked what event had impressed him most since leaving prison, Mr. Valladares replied that it was the situation in Poland. "There was a true alliance there between workers and students to change the Communist system," he said.

In answer to another question about the difference between the Batista and Castro dictatorships in Cuba, the poet said, "The most awful dictatorship that humanity has known is the dictatorship of the proletariat."

[From the Washington Post, Nov. 17, 1982]

RELEASED POET DESCRIBES LIFE AS POLITICAL PRISONER INSIDE CUBA

(By Karen DeYoung)

PARIS.—Twenty-two years ago, Armando Valladares, a young Cuban working as a minor bureaucrat in the new revolutionary government of Fidel Castro, was arrested and sentenced to 30 years in prison as an enemy of the state.

Last month, eight years short of the completion of his sentence, Valladares was abruptly released as a "good-will gesture" to France following a personal appeal to Castro by French President Francois Mitterrand. Quickly flown out of the country, he now lives with Marta, the Cuban woman he married in a 1969 prison ceremony, in a small hotel in downtown Paris while he decides what to do with the rest of his life.

Thousands of political prisoners were arrested in the first years after Castro's 1959 takeover, most of them, like Valladares, anonymous. But Valladares' case has been special since 1977, when a book of poems he had smuggled out of jail was published abroad. Titled "From My Wheelchair," its story of how the young prisoner had become paralyzed due to prison-induced starvation brought international sympathy and demands for his release.

Cuba said the paralysis was faked to discredit the Castro regime. But it presented no public proof of his health, and cancelled his visit and letter-writing privileges. From 1979 until recently, no one from the outside saw or heard directly from Valladares.

When his imminent release was announced, there was considerable curiosity. The first photographs were taken in Cuba, showing a frail, pale Valladares walking unaided up the ramp of an Air France jet, and he has not been seen in a wheelchair since. Those who had believed his story from the first said they were glad of his recovery. Others, including some French officials familiar with the case, said they were suspicious.

But even the most skeptical agree, as one official here noted, that "there is no mystery for us. The man spent 22 years in prison, and I don't care about the state of his legs or his head or anything else." These officials deny there was a "deal" involved in Valladares' release—the promise of an invitation, much coveted by Castro, for an official state visit to France—as has also been suggested in the French press.

It was a question of "principle" that prompted Mitterrand first to write Castro about the poet nearly a year ago, French officials said, after he received an appeal from the Spanish writer Fernando Arrabal. On Oct. 18, with only a few days' warning, Valladares was brought to the airport in Havana and handed over to Regis Debray, Mitterrand's adviser on Third World affairs.

The story Valladares tells, with little malice but a constant tapping of his fingers on the table top is one of faith and fortitude in the face of the arbitrary, almost casual injustice of an all-powerful state. Unlike others before him, he does not denounce his captors, and makes no profound political statements. He survived his imprisonment, he says, because of "my indestructible [Roman Catholic] religious conviction, and the love of my wife. Because of this, there is not one atom of hatred in my heart for anyone, not even my jailers."

A slight man, Valladares appears younger than his 45 years, with a quick, gamin-like vitality that matches the rapid speech of his homeland. There is no evidence of paralysis, and as he describes his 1961 trial as a counterrevolutionary, he kicks his feet easily up on the table in imitation of the guerrilla judge who read a newspaper during the proceedings and casually sentenced him to 30 years.

"I was arrested on Dec. 28, 1960. I had no explosives, no arms, no subversive literature, nothing to implicate me as a conspirator. There were two periods of interrogation, each lasting 15 minutes. There was no proof against me, but they said they knew I was a 'potential enemy of the state.'"

Although the government charged that Valladares had been a member of the police force of Fulgencio Batista, whom Castro overthrew, he denies this.

"I worked in an office giving tests to police applicants, working part-time, 8:30 to 11 a.m., to earn money" for his studies in administration at the University of Havana. After Castro's victory, he was investigated by a revolutionary "purge commission" and got a minor bureaucratic job in the Communications Ministry.

He was arrested nearly a year later, Valladares said, because, "in my workplace, in assemblies, I had spoken out against communism. I refused to join the militia. I wouldn't put on a uniform. I'm not a criminal or a terrorist. I was never involved in violence. If I had been involved in any activities, they would have shot me that first day."

Instead, they held him until Jan. 11, when, with no charges and no witnesses, he was brought before a revolutionary tribunal. Two days later he was in prison at the Isle of Pines, off Cuba's southern shore, sentenced to 30 years.

"It all happened so fast," he said. Three months later, he said, charges were entered associating him with sabotage and bombing, although there was no new trial and no proof submitted.

[A Cuban diplomat in Washington said that Valladares was found guilty of "conspiratorial and terrorist acts" involving a number of bombings, as part of a "group led by someone who was connected to Batista."]

Valladares appears to remember things in blocks of years—the years he was in solitary, the years the prisoners got no letters, the year he was moved from one prison to another, the years of visits and those of none. In 1967, political prisoners were ordered to put on the same uniforms as common criminals and those who had

agreed to submit to a "rehabilitation" program. Some accepted, Valladares said, but 900 refused, and "we went naked."

In 1969 he and Marta, whom he met when she visited her prisoner father in 1961 at the Isle of Pines, were permitted to marry in a 15-minute prison ceremony.

Marta left Cuba in 1972. From 1970 to 1978, he said, no visits were permitted for those who refused to participate in the rehabilitation program.

It was in 1974, during one of the periodic battles of will between the jailed and their jailers, Valladares said, that he and a number of others were deprived of food for 46 days.

"Six of us ended up in wheelchairs," he said.

Valladares pulled out what appeared to be documents from the Cuban Health Ministry, sent to Amnesty International, describing his condition as "polyneuropathy." Medical dictionaries describe it as a flaccidity of the muscles, sometimes leading to paralysis of the lower extremities, that can be caused by malnutrition.

The condition is reversible with therapy, and although he tried to exercise his muscles, Valladares said he received no professional treatment until 1979. That was the year Castro released about 3,600 political prisoners in one of his sporadic good-will gestures. While other imprisoned invalids were pardoned, Valladares was not, because, he said, the authorities were angry about the book of poems published in 1977.

The first poem in the book speaks of the day when "my wheel chair will grow wings/ [and] I will fly over parks/ carpeted with children and violets./ My wheelchair will be a winged dream/ without the alienating obsession of the prison bars."

Instead, he was sent to a hospital "on the street," outside the prison. He was there nearly a year and a half, and learned to walk fairly well with braces, before being sent back to Combinado del Este prison on the edge of Havana. There, he said, he was kept in virtual solitary confinement, led into another room twice daily for therapy. "They wanted me to be ready," he said. "They wanted to say I was never crippled."

Other than waiting for relatives to join him here, marrying in a religious ceremony, and "doing what I can" to help free what he says are still about 330 "old" political prisoners from the early days of the Castro government, Valladares said he has no plans.

"I'm not going to write any more poetry. That is what I did in jail, to think, to express myself."●

DAVID STOCKMAN, WHERE ARE YOU?

● Mr. ABDNOR. Mr. President, the November 12, 1982, edition of the Wall Street Journal contained an article by a professor of political science at Texas A&M University which should be required reading for every Member of Congress.

There is little doubt in my mind that although Congress ordered this Outlook, most of the copies delivered to Capitol Hill wound up in the circular file beside some staffer's desk. If Mr. Payne's assessment of its worth is on target, the waste of its publication would be compounded by the waste of anyone's time.

One wonders how many more of these bagatelles we have out there—and when we will get around to calling a halt to such nonsense.

I ask that the article be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Nov. 12, 1982]

THE HIGH COST OF WRITING A BOOK FOR CONGRESS

(By James L. Payne)

Last January, I received a book to review for Science Books and Films, a magazine put out by the American Association for the Advancement of Science. The volume was "Outlook for Science and Technology: The Next Five Years," written by the National Research Council and published in 1982 by W. H. Freeman. I have no idea how I was selected to handle the volume, but in retrospect, the AAAS probably commissioned one of the best qualified reviewers they could have found. My education in science is quite strong, especially in chemistry, biochemistry, and electronics, and my various hobbies and interests have kept me in touch with a wide variety of technical fields, from geology to psychophysics. As a political scientist, I was qualified to comment on the public policy aspects of science and technology—the ostensible focus of the volume. And finally, I was independent of the scientific establishment that had produced the volume, and therefore disinterested.

I found the volume disappointing, and, feeling myself under an obligation to try to explain the failure, I began to look into its background. It turned out that the book was the product of a $367,000 federal grant given by the National Science Foundation to the National Research Council. This grant, in turn, represented the implementation of an act of Congress, the National Science and Technology Policy, Organization and Priorities Act of 1976.

I dug out the law in question, and, sure enough, buried in the torrent of platitudes and redundancies was the injunction that someone keep Congress informed about "problems of national significance that are identified through scientific research." Whether congressmen actually had specific "problems" in mind when they approved this pretty-sounding language is doubtful. If, for example, scientists discovered a giant meteor hurtling on a collision course with the Earth, it hardly seems that a special federal bureaucracy would be needed to bring the matter to our attention.

If Congress wanted accounts of more mundane scientific developments, all it had to do was buy a subscription to, say, Scientific American for about one ten-thousandth of the cost of an NSF/NRC report. (If congressmen proved to be avid readers, two subscriptions could be entered, one for the House and one for the Senate.)

Naturally, the bureaucrats never pointed out that Congress had empowered them to deliver a bagatelle. They simply played the game out to its wasteful end. Scores of scientists, diverted from their own research by the honoraria dangled before them, were set to writing what a steering committee guessed congressmen might have wanted in a report they never intended to read. The result was the book in question.

I wrote my review, compressing the critique into the 200-word limit, and mailed it off in time to make the requested deadline. It never appeared in Science Books and Films, and apparently never will. In explaining why she killed the review, the editor declared that her action was "dictated" by "procedures" which, owing to certain inefficiencies, could not be followed in this case. Cynics will say that that doesn't sound very logical, and point to the vested interest of the AAAS, as an academic lobby for federal bucks, in supressing any suggestion that these bucks sometimes go astray. Personally, I believe the editor because her voice on the telephone had a ring of sincerity to it. Anyway, here's the review they never published:

"This book is unlikely to have users—a not surprising result for a volume conceived and written by committees expending governments funds to fulfill a congressional whim.

"The 17 chapter topics follow no discernible principle of selection; they range from plant diseases to cognition, from nutrition to the sun. The chapters themselves lack focus or purpose. The bits and pieces they contain are not integrated into any detectable theme, message or conclusion. The level of treatment varies both in depth and style, from superficial generalizations (in the ecology and water quality chapters, for example), to narrow, technical presentations (the chemical synthesis chapter, for example).

"It is almost as if someone had entered a science and technology library and torn pages from all the volumes at random and then pasted them together in this book. There is nothing particularly wrong with the individual paragraphs, but combined together by 112 members of 17 subcommittees, the result is an unreadable hodgepodge. And since the coverage of each topic is so fragmentary, the volume cannot even serve as a reference book.

"The Preface reports that the NSF and NRC intend to continue to inflict these pointless 'Outlook' volumes upon us every other year or so forever. David Stockman, where are you?"●

JULIA MIRANDA

Mr. JACKSON. Mr. President, today Mia Miranda, the document clerk of the Committee on Energy and Natural Resources, has an especially difficult task. This afternoon funeral services were held for her young daughter, Julia, who died unexpectedly last week.

Julia visited us often in room 3200 of the Dirksen Senate Office Building, where her mother manages, with competence and poise, the availability to staff and the public of copies of bills, printed hearing records, committee reports and other documents published by the Committee on Energy and Natural Resources.

Julia was, quite simply, a pleasure to all who knew her. There is very little we can say to make sense of the untimely loss of someone so young and so perfect. We can try to make our feelings of loss known and offer to her mother, a valued friend and colleague, our deepest sympathy.

It just seems so inadequate.

A CONGRESSIONAL SALUTE TO DR. CHARLES KELMAN

● Mr. D'AMATO. Mr. President, the God-given gift of sight is one of our most treasured abilities thus it is altogether proper and fitting that I take this opportunity to pay tribute to Dr. Charles Kelman of Glen Oaks, N.Y., who has restored the sight of thousands of people who would otherwise know a world of darkness and shadow.

To tell you about Charles Kelman, the physician, would indeed be shortsighted. Rather, I want you all to know Charles Kelman, the musician, the author, the pilot, the professional golfer, and above all, the humanitarian. He is a man who routinely donates his operative skills to restore the sight of those who cannot afford surgery.

In fact, in December Dr. Kelman will operate on a 4-month-old infant from Italy, afflicted with both congenital eye defects and cataracts. The operation will be the first in a hands-across-the-sea humanitarian project sponsored by the Nassau County, L.I., New York Sons of Italy in cooperation with Lydia E. Hall Hospital in Freeport, N.Y., were Dr. Kelman is chief of ophthalmology. Lydia E. Hall Hospital will absorb most of the expenses of the baby's surgery and Dr. Kelman will contribute his services. The Sons of Italy hope to bring at least 12 children to this country for eye surgery.

In the highly technological world of ophthalmology, Dr. Kelman is best known as the man who pioneered cataract phacoemulsification. Stated simply, an ultrasonic tool, also developed by Dr. Kelman, fragments the cataract, which is then drawn out of the eye through a tiny incision in the cornea. Prior to phacoemulsification, which Dr. Kelman developed in the late sixties, cataract surgery was at best a difficult and risky procedure that required weeks of hospitalization and recovery. Today, 30 percent of cataract surgery throughout the world utilizes Dr. Kelman's revolutionary 7-minute procedure, and hospitalization is a brief 1 day or shorter.

Dr. Kelman's story has appeared in Newsday, the New York Times, People Magazine, even Reader's Digest. He has appeared on "The Tonight Show," "Real People," and "The Tomorrow Show." His patients have included such notables as jazz great Lionel Hampton, screen legend Hedy Lamarr, disc Jockey William B. Wiliams, boxer Joe Frazier, opera star Jan Peerce, and actress Ann Miller.

While Charles Kelman is at home in the operating theater, so too does he perform in theaters all over the world, where he has entertained thousands with his saxophone, his own songs, and comedy. He has performed at Carnegie Hall, Fountainbleu Hotel in Miami Beach, Summit Hotel in Manhattan, and the Concord Hotel in the Catskill Mountains. Once every few months, Dr. Kelman takes to the stage for his patients, so, as he puts it "they can see my other side." I salute Dr. Kelman and his musical talents, which he frequently calls upon for the benefit of the Louis Braille Foundation for Blind Musicians and the Ichilov Hospital in Tel Aviv.

I have focused on Dr. Kelman, the physician, the musician, and the humanitarian. There is also Charles Kelman, the teacher. Not satisfied with helping only the patients who can come to his New York facilities, Dr. Kelman has traveled around the world, at his own expense, to teach phacoemulsification to more than 1,400 ophthalmologists. He spends about 40 percent of his time teaching others at Lydia E. Hall Hospital and at New York Medical College, where he is a full professor of ophthalmology. Dedicated to informing the world about cataracts, and in an effort to ease the fears of potential patients, Dr. Kelman has just written "Cataracts: What You Need To Know About Them."

No tribute to Charles Kelman would be complete without mentioning his prowess on the golf course—where he performed well enough to win a class A award last year—to his expertise in the sky—at the controls of his own helicopter.

Mr. President, my esteemed colleagues, please join me in saying thank you to Dr. Charles Kelman for giving so many people the gift of sight, the sound of music, and the benefits of his outstanding intellectual skills.●

ATHLETIC ACHIEVEMENTS OF THE SEIBEL FAMILY OF VERMILLION, S. DAK.

● Mr. ABDNOR. Mr. President, as a graduate of the University of Nebraska, I took great pride and pleasure from the Cornhuskers' win over Oklahoma last week that clinched another Big Eight championship. As a South Dakotan, though, last week's game took on an additional meaning.

Kevin Seibel, Nebraska's kicker, was perfect on all of his extra point attempts to give the Cornhuskers their 4-point victory margin. His efforts capped an incredible year for Seibel and three of his brothers, all of whom are kickers for college or high school grid squads.

It is unusual enough for one family to have four boys playing at the same position at the same sport but, to top it off, they have all achieved great success in their specialty. Each of the Seibel siblings have made at least 60 percent of their fieldgoal attempts and they have combined for a remarkable 61-of-63 record in extra point tries.

And, on October 25 of this year, they pulled off another remarkable feat. Each of them kicked their respective teams to victory. Kevin kicked three fieldgoals in Nebraska's 23-19 win over Missouri. One younger brother, Kurt, kicked a fieldgoal with 3:32 to play to give the University of South Dakota a 13-10 victory over Morningside College.

Kent Seibel, a freshman at Augustana College in Sioux Falls, kicked two fieldgoals to pace Augustana to a 13-10 win over South Dakota State, and Kyle Seibel booted 3 extra points in a Vermillion High School victory over Canton.

Of course, the Seibel siblings cannot take total credit for their achievements. Much of that kicking talent must have been inherited from their father Willie, who played for Herreid High School and the University of South Dakota as a kicker.

And those talented toes are not limited to the father and his four eldest sons. Look out for Karl Seibel, now a seventh-grade linebacker and wingback who will begin kicking for his team next season.

Mr. President, I ask to include the attached material in the CONGRESSIONAL RECORD.

The material follows:

KICKING FOOTBALLS TO HELP TEAMS' WIN A FAMILY ACT FOR SEIBELS

(By Steve Matthies)

VERMILLION, S.D.—Kurt Seibel stood on the turf of the University of South Dakota's Dakota Dome Saturday night looking for anyone who had heard how Augustana College and South Dakota State University fared.

When the score was announced his eyes twinkled in the darkened Dome.

"That means we all won. It's the first time this season we've all won on the same day," Seibel, a junioir placekicker for USD, said.

It was a football day that saw:

Kevin Seibel, a senior, kick three field goals and two extra points as the University of Nebraska beat Missouri 23-19.

Kurt Seibel, a junior, kick two field goals and an extra point as USD beat Morningside College 13-10, his second field goal coming with 3 minutes and 32 seconds to play.

Kent Seibel, a freshman, kick two field goals and an extra point as Augustana beat SDSU 13-10, his second field goal coming with 3:28 to play.

Kyle Seibel, a senior, kick three extra points as Vermillion High School beat Canton 21-8.

"We made all four games, too," Willie Seibel, the boys' father said.

"Lois, my wife, went to Nebraska with her mother (Billie Bruyer). I drove my motorcycle to Canton so Kyle could use it to go watch Augustana play and I came home with the (Tanager) team on the bus to watch the University."

Such is the Saturday life of Willie and Lois Seibel—and family.

"We make our plans the first of the week as to who's going where." Willie, who is an assistant football and the head wrestling coach at Vermillion High, said.

"One weekend, Kyle and I went to Nebraska and then hustled back to watch Augustana play," he said. "It makes for a long day when you start out around 7:30 a.m. and finish after the last game. But I'm glad we

can do it. And I'm glad all the schools are near the interstate (29)."

Seibel said he doesn't know how many miles he and his family have traveled to get their kicks out of football.

"The only thing I worry about is having enough money to put gas in the car and buy a hot dog when I get there," he laughed.

But, before the season is out, things will get a little easier.

"November the sixth," Willie said. "It's a big day. We've chartered a private plane and will go to Nebraska. They're honoring Kevin, as they do all the seniors, and it's his turn. We want to be able to stay for a little bit of the reception. Then we'll fly back for the University's game against Augustana (in the Dakota Dome)."

The 1982 family travel schedule—that often includes Bruyer, who is better known around the house as Mrs. B's—is something none of the Seibels had sights on when the boys first began kicking in the Punt, Pass and Kick competition sponsored by the Ford Motor Company.

"It all started 13 years ago," Willie said, "with an ad in the paper for the Punt, Pass and Kick competition, and we're thankful for it and Jack Stewart, who runs it in Vermillion.

"We talked to the boys about it and encouraged them. One thing led to another. We won a lot of trips."

And a little notoriety.

"After the first year, we talked about it and said wouldn't it be nice it one of the boys became a national (PP&K) champion. It came true with Kurt (in 1974). Kyle missed out by 2½ feet in the semifinals."

The idea that the four oldest boys would all be kicking for a college or high school on the same day, however, was never a thought.

Making sure each one got an education has been more important, Willie said. That education has been family oriented, as well as at school.

"This has brought a lot of repect and unity for each other. We have our ups and downs, but whenever there's a communications problem, we get right on it. Without communications, everything goes haywire."

Only when Kevin Seibel began kicking for Nebraska's Cornhuskers did the thought of the Seibel boys all kicking in college become a thought for the family.

Kevin had the fortune of kicking for four years at Vermillion High. Kent kicked for three years. Kurt and Kyle will have one-year kicking careers for the Tanagers. "I wish they all could have kicked for three years, but the oldest one got to do the kicking and they understand that."

While his sons have been kicking for glory, even though their names are often confused in some sports stories and broadcasts, Willie Seibal has had to endure some heat himself. Many people thought he was pushing his boys into kicking, football and athletics.

"Through all those years, I shagged a lot of footballs and I don't regret it," he said. "But I don't feel I was pushing. We've encouraged them to participate, and I've always been willing to work with them. Athletics are our livelihood."

Dad still helps out, too.

"We usually don't talk about the bad times," he said. "We will talk about how to improve or be ready for a situation."

Only once does Willie Seibel, a three-year letterman for USD who did some kicking for the Coyotes, admit to being tense watching his boys kick.

"That was when Kevin kicked off for the first time at Nebraska," he said. "I was up in section 109, 10 minutes before the kickoff. I knew he could do it, but my knees were really shaking. That's the last time I really got nervous."

South Dakota wrestling fans might find that interesting. Willie Seibel is often the focus of close matches when his Tanagers are on the mat.

He still has plenty of chances to get nervous watching his boys kick, though.

Not only do Kurt, Kent and Kyle have collegiate eligibility remaining, but Karl is in the seventh grade. Currently a linebacker and wingback for his school team, Karl will get into kicking next year, and his father emphasized, "If he wants to."

A halfback and defensive lineman at Herreid, S.D., High School, Willie Seibel's involvement in kicking isn't anything new. "I did all the kicking there, too," he said.

CLINCH RIVER—A NET LOSS

● Mr. HUMPHREY. Mr. President, proponents of the Clinch River breeder reactor (CRBR) project, estimated to cost nearly $9 billion by the General Accounting Office (GAO), claim the controversial project will generate anywhere from $8 to $20 billion in revenues from sale of electricity. This estimate is contained, for instance, in a report of the House Appropriations Committee in its energy and water development appropriations bill report. The report states that:

> On a straight profit and loss basis, reasonable estimates of the value of CRBR's electricity over the cost to complete the project, would show a net return of about $9 billion while fulfilling the project's objectives as a research, development and demonstration activity.

Proponents of Clinch are wrong about profitability. What the House Appropriations Committee report neglects to mention is that this $9 billion net return is really an estimate of Clinch River's gross revenues in year-of-receipt dollars. This net return is bloated by inflation and fails to consider expenses of financing, construction, and operation and maintenance. When these additional costs are considered, at best the real value of Clinch River's net operating revenues turns out to be one-fifth of what proponents claim.

A Congressional Research Service (CRS) study I am releasing today drives this point home: After deflating these revenues into 1982 dollars and applying the discount rate the Tennessee Valley Authority (TVA)—the anticipated purchasers of Clinch—would use to calculate the cost of buying the plant, CRS concludes that the range of gross revenues from Clinch River over its 30-year lifetime is between $0.76 billion—assuming a discount rate that the Office of Management and Budget now uses—to $2.6 billion, without any discount rate. CRS also estimates Clinch River's net operating revenues, or gross revenues minus the costs of operating and maintaining the reactor, to be between one-half to two-thirds of gross revenues. I calculate that figure to be approximately $0.38 to $1.72 billion.

The Department of Energy, another Clinch proponent, sets Clinch River's total cost at $3.6 billion, or $5.2 billion less than GAO. Using DOE's total cost estimate, it is easy to see that net revenues—what would be left after subtracting the costs of financing, construction, and operation and maintenance—are nonexistent.

Even the most optimistic estimates of Clinch River's anticipated net operating revenues are minimal. A June 1981 estimate by the Tennessee Valley Authority of Clinch's expected revenues, after subtracting operating and maintenance, shows that Clinch River would only produce $542.4 million and are based on four optimistic assumptions: First, that Clinch would operate at 80 percent of its designated capacity compared to the industry norm of 65 percent; second, that Clinch's capacity, unlike other reactors, would not decline; third, that TVA would pay more than what they are obligated to pay for Clinch's electricity, and fourth, that reprocessing Clinch's fuel, requiring the construction of a $1 billion plant, will cost nothing.

Other Government studies now underway are more pessimistic, suggesting that Clinch River's net operating revenues, after subtracting operation and maintenance costs, to be nonexistent. The GAO is currently completing a study that concludes there will be no net revenues from Clinch River. Even after accruing revenues from the sale of electricity, the operators of the Clinch River breeder reactor, according to GAO, will be in red ink to the tune of $3 billion due to high operation and maintenance costs.

Given these considerations, it is difficult to imagine that TVA, which already has a large surplus of nuclear generating capacity, would be willing to buy or operate Clinch River. Indeed, there is good reason to doubt that TVA is willing to buy the plant at all. And, if TVA refuses to buy the Clinch River breeder reactor project, the Federal Government will be forced to decide either to operate the plant or to cut its losses and mothball the facility.

These points are important and should be considered before we vote on whether to continue the current lameduck session. Certainly, Congress should benefit from the same information used by the Department of Energy to determine Clinch's net revenues. Since this information, contained in the aforementioned TVA study, was conducted for the current Washington director of the breeder

project, and since the CRS study corroborates its findings, I ask that the complete text of both studies be printed in the RECORD.

The material follows:

JUNE 5, 1981.

MR. GORDON CHIPMAN,
Room B, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHIPMAN: In response to your request for a determination of the "plant life revenues" of the Clinch River Breeder Reactor, we have prepared the following information.

Based on a 30-year life and beginning operation in 1990, the plant has been evaluated using the energy output levels provided us and listed below:

	Megawatt years
1990	146.25
1991	187.5
1992	225.0
1993-2020	281.25

We have also included the operating costs of $544.5 million in the first five years of operation which were provided to us. Beyond the fifth year, we have used $26.5 million (fuel) and $15.0 million operation and maintenance expenses as provided to us. We have escalated these values at the appropriate escalation rate of 9.7 percent for fuel and 11.5 percent for operation and maintenance costs.

The enclosed table provides the detailed calculations in determining this plant life revenue. Since we do not estimate rates beyond 2000, general trends were observed to determine the level of wholesale rates beyond that year.

Using the 14⅜-percent discount rate you requested, the 30-year net worth of generation from the Clinch River Breeder Reactor is approximately $542 million (1981 dollars). For the initial five-year period of operation, this value is approximately $63 million.

It should be noted that present contractual arrangements call for purchase of power from the Clinch River Project at the cost of generation displaced on the TVA system. This rate is generally lower than the wholesale rate.

If you have further questions, please let us know.

Sincerely,

LYNN C. MAXWELL,
Chief, Power Planning Staff, Tennessee Valley Authority.

CLINCH RIVER BREEDER REACTOR

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., October 26, 1982.

Attention: Henry Sokolski.
To: Hon. Gordon J. Humphrey.
From: Robert L. Civiak, Analyst in Energy Technology, Science Policy Research Division.
Subject: Clinch River Breeder Reactor Revenues.

In response to your request, enclosed is a report on the projected revenues from the sale of electricity from the Clinch River Breeder Reactor (CRBR). This report expands upon a September 27 memorandum that I prepared for you on CRBR revenues.

We hope you will find this useful. Please call if we can be of further assistance (237-7055).

PROJECTED REVENUES FROM THE CLINCH RIVER BREEDER REACTOR

There is considerable debate in Congress over whether to continue funding for the controversial Clinch River Breeder Reactor (CRBR). One issue of contention is the amount of gross revenue that can be expected to be received from the sale of the electricity produced by the plant. This report shows that dramatically different estimates of CRBR gross revenues—$769 million to $19.2 billion over 30 years—are within the realm of possibility depending upon the assumptions used. It should be emphasized that the above figures are for gross revenues. Net revenues are even less certain, but would be considerably lower. Net operating revenues would be gross revenues minus fuel, operating, and maintenance costs. Net revenues would be net operating revenues minus capital costs.

In order to project CRBR revenues, one must estimate a rate for the sale of a kilowatt-hour (kw-hr) of electricity, what percentage of its maximum output the plant will produce (capacity factor), the future rate of inflation, and any possible deviation of electricity rates from the general inflation rate. Different estimates of these variables contribute to the variance between projections of CRBR gross revenues. However, perhaps the greatest variance comes from different assumptions about the discount rate to apply to future revenues[1] and from presenting [illegible] revenues in terms of dollars of different value (i.e., different base years). In this report mid-range values for the first four variables are assumed; CRBR gross revenues are then calculated for a wide range of discount rates and base year dollars, and the results compared.

Gross revenues are projected both for the first 5 years of CRBR operation and for the full 30-year expected life of the plant. The revenues during the first 5 years are significant, because according to current contracts for the construction and operation of the plant the gross revenues are to be returned to the U.S. Treasury.[2] At the end of 5 years the Tennessee Valley Administration (TVA) may buy the plant from the Government. While this means that revenues received after the first 5 years may not be returned to the Treasury, the value of CRBR at the time of the sale may depend upon the expected net operating revenues, which are of course substantially less than the gross revenues.

Assumptions

In the revenue projections presented below it is assumed that CRBR begins oper-

ation in 1989, as currently planned by the Department of Energy (DOE), and that it operates at its 350 megawatt design capacity for the full 30-year design lifetime.

The general inflation rate used in the projections is 8.0 percent, which is the rate that DOE uses in estimating the cost to build CRBR. It is further assumed that electricity prices will increase at a rate of 1 percent per year faster than inflation for the entire period studied. This latter assumption may be compared to the Energy Information Administrations projection that electricity prices will increase between 1½ 2 and percent faster than inflation until 1995,[3] but at a rate of less than one-tenth of one percent per year above inflation from 2000 to 2020.[4]

According to the contract between TVA and DOE, TVA will buy the electricity produced by CRBR at a price equivalent to the cost to TVA to produce the power it replaces. Using TVA's 1981 costs, DOE estimates a rate of 3.06 cents per kw-hr in 1981 dollars as a base for projecting CRBR revenues.[5] In the projections below, an equivalent rate of 3.3 cents per kw-hr in 1982 dollars has been used.

The average capacity factors used are 60 percent for the first 5 years and 68.5 percent for the full 30 years. These compare to an average capacity factor of about 65 percent for nuclear reactors in operation in the United States over the past 5 years. It is assumed that CRBR's capacity factor will be slightly lower than the national average during its first 5 years because it is a demonstration reactor with an untried design. The 30-year average capacity factor of 68.5 percent is the same as that used by the Nuclear Regulatory Commission in its 1977 Environmental Impact Statement on CRBR.[1]

When these assumptions are combined, the estimate gross revenue from the sale of electricity produced by CRBR in its first year of operation is: 350 megawatts X .60 capacity X 24 hours/day X 365 days/year X 3.3 cents/kw-hr X 1.08^7 (for inflation) X 1.01^7 (electricity prices),[7] which equals $111.5 million in 1989 dollars. Similarly, for a 68.5 percent capacity factor, the "base year" gross revenue is calculated to be $127.3 million in 1989 dollars.

Results

Projected gross revenues from the sale of the electricity generated by CRBR in its first 5 years of operation are given in table 1, and gross revenues for the full 30-year design life of the plant are given in table 2. Revenues are given for three different ways of valuing dollars and for four discount rates. In the first column in each table gross revenues are shown in undiscounted, year-of-receipt dollars. For this calculation, the revenue in the "nth" year of CRBR operation is taken as the revenue in the base year times $(1.08 \times 1.01)^n$. The factor of 1.08 accounts for general inflation and the factor of 1.01 is for the extra increase in electricity price above inflation.

TABLE 1.—PROJECTED GROSS REVENUES FROM THE FIRST 5 YEARS OF CRBR OPERATION

Discount rate (percent)	Gross revenues (millions of dollars)		
	Undiscounted	Discounted to 1989	
	Year-of-receipt (dollars)	1989 (dollars)	1982 (dollars)
0	729	574	335
3.7	729	515	300
5.6	729	489	285
10.0	729	435	254

In the second column in each table the gross revenues are calculated in 1989 dollars, discounted to 1989 (the planned first year of CRBR operation), at discount rates of 0, 3.7, 5.6 and 10.0 percent. For this column the revenue in the n th year is the base year revenue times $[(1.01)/(1+i)]^n$, where i is the relevant discount rate.[8] In this case the factor of 1.08 does not appear because the calculation is in constant 1989 dollars, but the factor of 1.01 is retained to account for the assumption that electricity prices increase faster than inflation.

In the third column in each table the gross revenues are discounted to 1989, but shown in 1982 dollars. For this column the results of column two are divided by $(1.08)^7$.

TABLE 2.—PROJECTED GROSS REVENUES FROM 30 YEARS OF OPERATION OF CRBR

Discount rate (percent)	Gross revenues (billions of dollars)		
	Undiscounted	Discounted to 1989	
	Year-of-receipt (dollars)	1989 (dollars)	1982 (dollars)
0	19.21	4.472	2.609
3.7	19.21	2.604	1.519
5.6	19.21	2.061	1.203
10.0	19.21	1.318	0.769

Discussion

According to table 1, the gross revenue from the sale of the electricity produced during the first five years of CRBR operation might be projected at from $254 million (1982 dollars discounted at 10 percent per year to 1989) to $729 million (year-of-receipt dollars). These two numbers differ by nearly a factor of three, but there is a much greater difference between the various ways of calculating the CRBR gross revenues over a 30-year period. The 30-year gross revenues (table 2) are projected to be from $769 million to $19.2 billion.

Depending upon the context, it might be correct to say either that the gross revenues from CRBR will be $769 million (1982 dollars discounted at 10 percent per year to 1989) or $19.2 billion (undiscounted year-of-receipt dollars). The larger figure represents the actual revenues from the sale of the electricity produced as they are received, while the smaller figure represents the value of the revenues at the time the plant will begin operation (1989) in terms (1982 dollars), which are most familiar. Great care must be taken when using these figures, however. Neither is appropriate for a comparison with the cost of building the plant.

A proper cost/benefit comparison of CRBR would compare the costs of building the plant (including interest), expressed in constant year dollars of some base year (most conveniently 1989) with the discounted net operating revenues (gross revenues minus operating and fuel costs) from its operation. Depending on the discount rate used, the discounted gross revenue from the sale of electricity is estimated (table 2) at $1.3—2.6 billion (1989 dollars) and the net operating revenues might be expected to be about 1/2 to 2/3 of the gross revenue.[9]

On the cost side, DOE estimates a total cost of $3.7 billion to build the plant in as-spent dollars, which range from 1974 dollars to 1989 dollars.[10]

The comparable cost in 1989 dollars would be considerably higher. In addition, the U.S. General Accounting Office (GAO) has estimated that the cumulative interest on the money spent to build CRBR would be another $3.9 billion (mixed 1974-1994 dollars).[11] Hence, it is clear that the net operating revenue from CRBR is expected to be considerably less than the cost to build the plant, i.e. there is projected to be a large net cost associated with building and operating CRBR rather than a net revenue.

On the other hand, CRBR was never designed to operate at a profit. Its value is as a research, development, and demonstration facility. Benefits accruing from these functions have not been included in the above oversimplified cost/benefit analysis.

APPENDIX A

The discount rate[12]

Capital spending projects in the public sector are often evaluated by a method called cost-benefit analysis. Cost-benefit analysis involves identifying and measuring the costs and benefits associated with each project.

In order to evaluate the benefits and the costs which accrue at different rates over different periods of time, their values must be stated in terms of a common reference point. This common reference point is usually, but not necessarily, the present.

The flow of costs and benefits for an investment project are discounted to their "present value" through the application of an appropriate discount rate. The application of the discount rate is much like the compounding of interest, only it is generally backwards in time instead of forward.

The present value of a quantity may be defined as $1/(1+i)^n$ times that quantity, where i is the discount rate and n is the number of years through which the quantity is being discounted. The term present value is used even if the common reference point is not the present. Present values of costs and benefits can be compared to compute the net benefit of each individual project. The problem then is to determine the appropriate discount rate.

Many economists believe that the discount rate used to evaluate Government projects should measure the opportunity cost of capital to the Government. The opportunity cost of capital is the value of the commodity which would have been produced had the capital been invested in its most productive alternative. The alternative to public investment is private investment; thus the opportunity cost of capital to the Government is the rate of return earned on productive resources in the private sector. We are still left, however, with the difficulty of measuring the rate of return on investment of the private sector of the economy.

The Office of Management and Budget (OMB) has provided some guidance in this regard. OMB Circular A-94[13] establishes a fixed discount rate of 10 percent for all evaluations of applicable programs and projects (water projects, real property, commercial-type services, and automatic data processing equipment are exempted). The circular states that this discount rate "represents an estimate of the average rate of return on private investment, before taxes and after inflation." Hence according to OMB, the 10 percent discount rate should be used in establishing the present value of future costs and benefits expressed in constant dollars.

A 1977 Congressional Research Service investigation[14] into the question of the appropriate discount rate to be used in Government cost-benefit analysis offers another means of approximating the opportunity cost of capital to the Government. That investigation concluded that the interest rate on new, long-term Government bonds is the

best approximation of the opportunity cost of capital to the Government.

The interest rate on long-term Government bonds has recently been about 14 percent. However, that rate must be corrected for inflation to establish the discount rate to be used in determining the present value of future costs expressed in constant dollars. The discount rate is the absence of inflation, "i", is related to the discount rate that reflects the current bond market, "c", and the inflation rate, "e", by the following equation.

$$i=1-(1+c)/(1+e)$$

If inflation is projected to be 8 percent, then substituting 0.08 for e and 0.14 for c gives i=0.056, or a discount rate of 5.6 percent for use with quantities expressed in constant dollars.

Another candidate for a discount rate comes from the Technical Assessmen Guide (TAG) prepared by the Electri Power Research Institute (EPRI).[15] Th TAG is intended to provide "a consisten economic methodology for determining the relative cost to electric utility customers of the potential results of alternative R&D efforts." The TAG specifies a constant dollar discount rate of 3.7 percent based on EPRI's analysis of utility rates of return on their investment. It should be noted, however, that this discount rate is suggested for calculations made in an electric utility setting rather than for public sector R&D projects.

Another study of discount rates, by Econ, Inc.,[16] analyzes the choice of discount rate for long-term Federal energy R&D programs (specifically fusion energy) and finds that "the use of a 10 percent discount rate is clearly unwarranted for the evaluation of long-term projects. . . . High discount rates strongly favor the selection of short-term projects and nearly doom competing long-term projects, despite the potential benefits offered." They note that the use of a 10 percent discount rate may be justified when the risks in a project are large and uncertain. However, they suggest that a discount rate in the range of 3 to 5 percent be used in the evaluation of long-term energy R&D programs when the risk is considered in the expression of the costs and benefits.

It can be seen that, while the concept of discounting may be generally accepted, there is a considerable range of discount rates suggested for use. The discount rates used in the above analysis of projected revenues from the sale of electricity produced by the Clinch River Breeder Reactor (0, 3.7, 5.6, and 10.0 percent) were chosen to span the range of suggested values.

FOOTNOTES

[1] Because receiving a dollar 10 years from now is not as desirable as receiving that dollar tomorrow (even without inflation), a technique called discounting is generally used for placing streams of revenue with different time patterns on a common basis. In its simplest terms, discounting is accomplished by dividing future revenues by a constant factor for each year in the future that they will be received. While the technique of discounting is generally accepted, there is a large variation in the discount rates that are used. Discount rates of 0, 3.7 percent, 5.6 percent, and 10.0 percent are used in this report. The choice of a discount rate is discussed in appendix A.

[7] The exponent in the inflation factors is 7 because there are that many years from 1982 to 1989.

[8] See Appendix A for a discussion of the methodology of discounting and the reasons for choosing different discount rates.

[9] The difference between gross revenue and net operating revenue is based upon a comparison of our $19.2 million undiscounted year-of-receipt gross revenue estimate with DOE's project operating cost of $8.5 billion in undiscounted year-as-spent dollars presented in the letter from Gordon Chipman to J. Dexter Peach, op. cit.

[10] DOE's latest official cost estimate for CRBR is $3.6 billion, but that includes about 0.1 billion credit for projected net revenues during the first 5 years of operation.

MEMORIES OF MRS. JESSIE BAKER

Mr. GRASSLEY. Mr. President, it is a great pleasure to call to the attention of my colleagues the article sent to me by the Reverend Richard Henningfield, the Lutheran Church—Missouri Synod, of Council Bluffs, Iowa. The article relates some memories of Mrs. Jessie Baker, of the Twilight Acres Home, at Council Bluffs, Iowa. Mrs. Baker celebrated her 101st birthday on October 4, 1982. I ask that the article be printed in the RECORD.

The article follows:

MRS. JESSIE BAKER CELEBRATES 101ST BIRTHDAY

On October 4, 1982 Jessie Baker celebrated her 101 birthday at Twilight Acres. She was born in Wisconsin and moved to this area in 1887 at the age of six.

As a child, Mrs. Baker recalls Wall Lake with a dirt road main street. There was a harness shop in the spot where the current bank building now stands. Her parents operated a small hotel where the bowling alley is. Other businesses on main street at that time included another large hotel, a doctor's office and two general stores.

In those days it was an everyday occurrence to see a covered wagon pass through Wall Lake. Their extra team of horses or oxen would be tied to the back of the wagon. Most of them were headed west, going to the gold fields in California.

Some of her fondest memories are from her childhood. "Children were kept as babies for as long as they could be back then. Children today are much sharper and grow up much faster. I'm not sure that's best. The things I enjoyed most as a child were the long rides to see the circus and to see 'Little Eva' and 'Toppsie' in the Tent Shows."

As a member of the "class of 1900", Mrs. Baker is the oldest living graduate of Wall Lake High School. Following her graduation she taught school in the rural Sac county school systems. She was married in 1907 and has four children. Following the death of her husband, Mrs. Baker traveled around the country visiting relatives, which included three grandchildren, seven great-grandchildren, and one great-great-grandchild.

Mrs. Baker has lived from the time of the covered wagon, to the advent of the automobile, to having a man walk on the moon. She commented on the speed of current technology by saying that "It's just too much, too fast. I just don't know how much longer it can go on this way. We didn't have any of the things that they have now, no modern machinery, no indoor plumbing, and no telephone." They used to get their news, when they picked up the paper on Saturday, on their weekly trip to town.

"Those were the good ole days. I certainly wouldn't trade them for now. I used to walk one mile to get to school." In those days it took a long time to get anywhere. It was 1907 before Mrs. Baker saw her first automobile. "It wasn't long before everyone had to have one," she added. Since that time Mrs. Baker had ridden in an automobile many, many times and now even enjoys flying in airplanes.

One of the eras that Jessie Baker has experienced was the Great Depression. When asked how it compared with today's economic conditions she responded that she didn't feel that it was as bad then as it is now. "Back then we didn't have all the payments that people do today. If you were out of a job then you could somehow manager to get by. Today, if you loose your job it's pretty near impossible because of the bills."

One example of inflated costs offered by Mrs. Baker were the doctor bills for the birth of her four sons. The bill for the first two was $10 and the second two, $25. The doctor bill alone for the birth of a child now runs in the neighborhood of $500, not including hospital costs and others expenses.

The Great Depression, however, was not the most tragic portion of history for Mrs. Baker. The event that offers the most bitter memories was WWII. She and her husband lost a son aboard the "Indianapolis" when it was sank.

Another event that brings back vivid memories is the assassination of President McKinley. Mrs. Baker was working on a soap demonstration crew. "We were sitting at the breakfast table at the hotel in Lewis, Ia. when the lady who ran the hotel came over and told us the president had been shot.

Six years ago Mrs. Baker moved to Twilight Acres. Since moving there she has been two time champions at both checkers and spelling. She tied in a third spelling tournament with one of her former pupils, who also resides at Twilight Acres.

Mrs. Baker attributes her long life to the fact that she was born healthy. She is extremely proud of the claim that she takes the least medication of any of the residents at Twilight Acres. "I've never had much use for doctors. I had all the childhood illnesses

but my mother took care of me with home remedies."

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who proposed to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Rick Rolf, of the staff of Senator MARK HATFIELD, and Mr. Scott W. Martin, of the staff of Senator RUDY BOSCHWITZ, to participate in a program sponsored by Korea University, in South Korea, from November 12 to 21, 1982.

The committee has determined that participation by Messrs. Rolf and Martin in the program in South Korea, at the expense of Korea University, to discuss United States-South Korea relations, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Gina Despres, of the staff of Senator BILL BRADLEY, to participate in a program sponsored by Korea University in South Korea from November 12 to 21, 1982.

The committee has determined that participation by Ms. Despres in the program in South Korea, at the expense of Korea University, to participate in discussions on United States-Korea relations, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Robert Vastine, of the staff of Senator CHAFEE, Mr. Lester Rosen, of the staff of Senator QUAYLE, and Ms. Mary Hawkins, of the staff of Senator DECONCINI, to participate in a program sponsored by a foreign educational organization, Tunghai University, in the Republic of China, from November 5 to 14, 1982.

The committee has determined that participation by Messrs. Vastine and Rosen and Ms. Hawkins, in the program in the Republic of China, at the expense of Tunghai University, to participate in economic and political issue discussions, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. William Canis, of the staff of Senator CHARLES H. PERCY, to participate in a program in the Republic of Korea from November 12 to 21, 1982, sponsored by a foreign educational organization, Korea University.

The committee has determined that participation by Mr. Canis in the program in Korea, at the expense of the Asiatic Research Center of Korea University, to tour Korea's industry, government, and educational institutions, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Earl Eisenhower and Mrs. Judy Eisenhower, of the personal staff of Senator BARRY GOLDWATER, to participate in a program sponsored by Soochow University, in the Republic of China, from November 7 to 15, 1982.

The committee has determined that participation of Mr. Eisenhower and Mrs. Eisenhower in the program in the Republic of China, at the expense of Soochow University, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Lorraine Huang, of the personal staff of Senator ALAN CRANSTON, to participate in a program sponsored by a foreign educational organization, Korea University, in South Korea, from November 12 to 21, 1982.

The committee has determined that participation by Ms. Huang in the program in South Korea, at the expense of Korea University, to participate in seminars and meetings on United States-Korean economic, political, and security relations, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Dorothea Roberson, of the staff of the Select Committee on Intelligence, to participate in a program sponsored by a foreign educational organization, Soochow University, in Taiwan, from November 6 to 15, 1982.

The committee has determined that participation by Ms. Roberson in the program in Taiwan, at the expense of Soochow University, to participate in discussions regarding events in Taiwan and general issues of mutual concern, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Susan Schwab, of the staff of Senator JOHN DANFORTH, to participate in a program sponsored by the European Parliament and the Commission of the European Community in Europe from November 6 to 27, 1982.

The committee has determined that participation by Ms. Schwab in the program in Europe, at the expense of the European Parliament and the Commission of the European Community, to discuss issues of mutual concern with Europeans who have an active interest in United States-European relations, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Kathleen Connolly, of the staff of Senator JOHN GLENN, to participate in a program sponsored by a foreign educational organization, Soochow University, in Taipei, Taiwan, from November 6-14, 1982.

The committee has determined that participation by Ms. Connolly in the program in Taipei, at the expense of Soochow University, to discuss Taiwanese culture and institutions, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Richard F. Kaufman of the staff of the Joint Economic Committee, Mr. Winslow Wheeler of the staff of Senator NANCY KASSEBAUM, and Mr. Henry J. Steenstra, Jr., of the staff of Senator DAN QUAYLE, to participate in a program sponsored by a foreign educational organization, the Japan Center for International Exchange, in Tokyo, Japan, from November 7-13, 1982.

The committee has determined that participation by Messrs. Kaufman, Wheeler, Spencer, and Steenstra in the program in Tokyo, at the expense of the Japan Center for International Exchange, to discuss United States-Japan relations, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Margo Carlisle, of the staff of Senator JAMES MCCLURE, to participate in a program sponsored by a foreign educational organization, Konrad-Adenauer-Staftung Foundation, in Bad Godesberg, Germany, from November 19-21, 1982.

The committee has determined that participation by Ms. Carlisle in the program in Bad Godesberg, at the expense of the Konrad-Adenauer-Staftung Foundation, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Brent Budowsky, a member of the staff of Senator MAX BAUCUS, to participate in a program sponsored by a foreign educational organization, the Japan Center for International Exchange, in Tokyo, Japan, from November 6-14, 1982.

The committee has determined that participation by Mr. Budowsky, at the expense of the Japan Center for International Exchange, to discuss United States-Japan trade relations, is in the

interest of the Senate and the United States.

The Select Committee on Ethics has received a request from Mr. Charles Mitchell, a member of the personal staff of Senator HEFLIN, to participate in a program sponsored by a foreign educational organization, Tunghai University in the Republic of China, from November 4–15, 1982.

The committee has determined that participation by Mr. Mitchell in the program in the Republic of China, at the expense of Tunghai University, to discuss trade and policy issues, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request from Mr. Jade West, a member of the personal staff of Senator SYMMS, to participate in a program sponsored by a foreign educational organization, Tunghai University in the Republic of China, from November 5 to 14, 1982.

The committee has determined that participation by Mr. West in the program in the Republic of China, at the expense of Tunghai University, to discuss trade and policy issues, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. James P. Lucier and Mrs. Mary Grace Lucier, of the staff of Senator JESSE HELMS, to participate in a program sponsored by a foreign educational organization, Soochow University, in the Republic of China, in early November 1982.

The committee has determined that participation by Mr. and Mrs. Lucier in the program in Taiwan, at the expense of Soochow University, to participate in discussions with faculty members and students of the university and leading officials of the Republic of China, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Diana Smith, of the staff of the Committee on Foreign Relations, to participate in a program sponsored by the NATO Euro-group of discussions with high level government officials of the NATO Euro-group countries from October 14 to 24, 1982.

The committee has determined that participation by Ms. Smith in the program, at the expense of the NATO Euro-group, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Messrs. Richard Finn and Drew Harker, of the staff of the Armed Services Committee, to participate in a program sponsored by the NATO Euro-group countries, to travel to Turkey, Greece, Italy, and Portugal, to discuss foreign policy and mutual security issues from October 13 to October 24, 1982.

The committee has determined that participation by Messrs. Finn and Harker in this program, at the expense of the NATO Euro-group countries, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Messrs. Geryld Christianson, Edward G. Sanders, Patrick Balestrieri, and John Ritch, of the staff of the Committee on Foreign Relations, to participate in a program of discussions with high level government officials of the NATO Euro-group countries (Turkey, Greece, Italy, and Portugal) concerning foreign policy and security issues on the southern flank, and relations with the United States, from October 14–24, 1982.

The committee has determined that participation by Messrs. Christianson, Sanders, Balestrieri, and Ritch in the program, at the expense of the NATO group, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request from Mr. Douglas L. Miller, a member of the personal staff of Senator LARRY PRESSLER, to participate in a program sponsored by a foreign educational organization, Tunghai University, in the Republic of China, from November 4–18, 1982.

The committee has determined that participation by Mrs. Miller in the program in the Republic of China, at the expense of Tunghai University, to discuss trade and policy issues, is in the interest of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Margo Carlisle, an employee of the Senate Republican Conference, to participate in a program in Guatemala from October 13 to 21, 1982, sponsored by the Guatemala Freedom Foundation.

The committee has determined that participation by Ms. Carlisle in the program in Guatemala, at the expense of the Guatemala Freedom Foundation, to participate in educational meetings, is in the interest of the Senate and the United States.●

JACK KEY'S SERVICE TO SENATE WAS EXTRAORDINARY

● Mr. NUNN. Mr. President, Jack Key, who has been a most effective member of the staff of the Senate Permanent Subcommittee on Investigations for the past 3 years, is leaving Washington to return to his native Florida where he will enter the business community of Manatee County. Jack Key has been one of my most valuable aides. His competence, sound judgment, and loyalty will be missed.

Jack, who was chief investigator when I was chairman of the subcommittee and now serves in that capacity on the minority staff, made many important contributions to our work, particularly in the effort to strengthen the Government's ability to combat organized crime and to immobilize the international drug syndicates.

A nationally recognized expert on organized crime and drug abuse, Jack brought to the subcommittee proven investigative ability and experience gained in nearly two decades of law enforcement work at the State, county, and local levels in Florida.

Calling upon lessons learned in a wide variety of law enforcement assignments, from undercover drug duty to security operations at the 1972 national political conventions in Miami Beach, Jack Key knows and understands police work, he knows and understands the criminal justice system and he knows and understands how the Federal Government can assist local officials. He is a unique perspective, one that constituted a great resource for the Permanent Subcommittee on Investigations as we sought to carry out our mandate to examine organized and syndicated crime and recommend methods to control it.

But Jack Key did not limit his contributions to cases relating to organized crime and drug trafficking. He played a vital role in the subcommittee's recent inquiry into the Government's ability to control the illegal diversion of militarily critical technology to the Soviet Union. The subcommittee's investigation of the Government's failures in examining the Teamsters Central States Pension Fund was very much enhanced by the participation of Jack Key. Additionally, in the waterfront corruption hearing, his many contacts in law enforcement agencies throughout the Nation resulted in the subcommittee's having the unprecedented testimony of a New Jersey State police officer who, in an undercover capacity, had penetrated the core of a major organized crime family.

Jack Key is one of the most capable men I have had the pleasure of working with. I know I speak for other members of the subcommittee when I say that we are grateful for the service he gave. We wish Jack good luck in all his future endeavors.●

THE DEATH OF MR. KORCZAK ZIOLKOWSKI

● Mr. ABDNOR. Mr. President, on October 21, South Dakota and the Nation lost one of the most remarkable individuals of our time with the death of Mr. Korczak Ziolkowski.

While there might be many who might not recognize his name, there are few that do not know of this remarkable man's efforts to turn a mountain in South Dakota into a timeless memorial.

Korczak, as he preferred to be called, was invited in 1939 by Sioux Chief Henry Standing Bear to carve an Indian memorial in the Black Hills which would honor the legendary Indian Chief Crazy Horse.

In 1948, he began work on the sculpting of an entire 600-foot mountain in the round. When completed Crazy Horse will stand taller than the Great Pyramid or the Washington Monument.

Nine years before, he began his work with $174 in his pocket and lived in a tent at the base of Thunderhead Mountain as he struggled to carve the heritage of the Indian Nation in stone.

Up until his death at age 73, not a day went by that he did not spend on his mountain. He singlehandedly raised the needed funds to meet his expenses and twice spurned offers of Federal assistance. Day after day for 35 years he worked to move his dream nearer to reality.

In these efforts he was not alone. His beloved wife, Ruth, was his partner in every sense of the word. They were joined by their 10 children (5 boys and 5 girls) who gave their love and support to this man and his dream.

They will now carry on his dream, as he requested in his final words to his family.

Korczak once said that "when legends die, the dreams end; when the dreams end, there is no more greatness." Well, this monument to man's greatness will live on as a legend for all time—not only to Crazy Horse and the noble character he epitomizes, but also for Korczak Ziolkowski who lies buried at the foot of his beloved mountain.

Mr. President, I ask to include the following material in the CONGRESSIONAL RECORD.

The material follows:

THE THUNDER IS GONE FROM THUNDERHEAD MOUNTAIN

[From the Rapid City Journal, Oct. 22, 1982]

ZIOLKOWSKI: AN ARTIST, A DREAMER

(By Marguerite Weisbeck)

"You must keep building. The only good is in building. Crazy Horse must be finished. You must work on the mountain—but slowly, so you do it right."

Korczak Ziolkowski's last words to his wife and children.

The thunder is gone from Thunderhead Mountain. Korczak Ziolkowski is dead.

He was a strong man, a stubborn man. He knew what he wanted and he usually got it. He was independent. He made things happen. He brooked no interference.

That was the side of him so many people saw. But there was another side. he was an artist, a romantic. He was a dreamer. In many ways, he still embodied in his bear-like frame the wonder of a child.

He was enthralled by the romance of the West and the romance of the American Indian, with the way things used to be but so seldom were any more. He was drawn to the authentic, the beautiful, the creative.

The old chiefs of the Sioux, he revered. Of Gutzon Borglum, the original mountain sculptor, he spoke with awe. He has an eye for every lovely thing on his mountain, from the grain of the rust in the granite, to the long views from the mountaintop, to the patterns of ancient lichens on ancient stone.

"I believe I'm just about the only white man ever invited out here by the Indians," he said once, with satisfaction. He would take no money from the government to help with the work on Crazy Horse Monument. He had promised the Indians a humanitarian project, with health and educational centers, and he didn't believe the government would keep a promise to build them any better than they had kept any other promises to the Indian people.

Like a child, he believed implicitly in his dream. He couldn't understand that some people don't believe in dreams, that some people don't dream at all. "When the legends die, the dreams end. When the dreams end, there is no more greatness," he would quote with relish, not remembering who has said it, but liking the philosophy.

He aspired to greatness. The first plan for the monument was small, a carving on a mountain. Soon, it became a carving of a mountain. It would be the biggest, the most dramatic, the most unforgettable monument even seen. Nobody in the history of the world had carved a heroic figure, in the round, out of a mountain.

But he was also the most realistic of men. He carved his own coffin out of pine grown on his own land and kept it in the art gallery that contained the other treasures of his hands, the wood and stone carvings, the furniture and the history of his work told in newspaper and magazine clippings that covered an entire wall.

"Maybe it's like carrying an umbrella," he said of the coffin. "As long as you carry it, it doesn't rain."

And he carved his own tomb out of the rock of the valley floor and designed the great metal door that swings shut at the touch of a finger. He planned his own funeral.

Korczak the strong man is dead. But Korczak the dreamer lives on in his dream. When the long arm of the figure on the mountain is finished and gleams white in the sun, when the words on Crazy Horse are repeated on the wide veranda where thousands of visitors come to view the mountain: "My lands are where my dead lie buried," Korczak will be there.

[From the Rapid City Journal, Oct. 22, 1982]

KORCZAK ZIOLKOWSKI—MAN ON THE MOUNTAIN

Korczak Ziolkowski left his mark on the Black Hills in more ways than one.

For 35 years he devoted his life and considerable talent to a dream he shared with Sioux Indian elders of a generation ago—a gigantic monument to the great Sioux leader, Crazy Horse.

To fulfill that dream, he purchased the land surrounding Thunderhead Mountain north of Custer to be the site not only of the monument but of an Indian university and medical center.

Early on, Ziolkowski exhibited his single-mindedness and fierce independence (some would call it stubbornness) by refusing financial help from the federal government because it was conditioned on abandoning plans for the university and medical center and concentrating on the monument.

Having to depend on contributions from benefactors and tourists slowed work on the monument. Often Ziolkowski worked alone blasting rock and pushing it from the mountain to rough out the form of Crazy Horse astride a horse with his arm outstretched over the horse's head. The monument was to depict an incident in which Crazy Horse answered the taunts of a soldier by saying, "My lands are where my dead lie buried."

Ziolkowski was a man of contrasts. At times his language was from the gutter, at other times from the drawing room. He could tell a crude story or discuss fine arts. He easily made the transition from dirty buckskins and battered western hat to a silk-lined cape and top hat. Over the years he cut off people who had been friends, supporters or benefactors, often for insignificant reasons. A genial host, he was difficult to get to see. He had harsh words for his critics. If you weren't for him, you were against him.

Even though he fell behind his timetable, and the years began to take their toll on his massive frame, he persisted in saying the Crazy Horse Monument would be finished. Finally realizing it couldn't be done in his lifetime, he trained some of his children to carry on the work.

Whether the monument to Crazy Horse ever emerges or remains nothing more than a scar on Thunderhead Mountain, Ziolkowski's name will remain etched on the pages of South Dakota history.

Here was a man who was as flinty and stubborn as the Black Hills granite which challenged his determination and talent and kept him from realizing his dream.

[From the Argus Leader, Sioux Falls, S. Dak., Oct. 22, 1982]

ZIOLKOWSKI: LEGEND LIKE CRAZY HORSE MOUNTAIN

South Dakota's man on the mountain—Korczak Ziolkowski—didn't get the six more good years that he wanted to work on his sculpture of Crazy Horse in the Black Hills. But he got one year—1981—and hope for another before he died Wednesday night at age 74.

According to spokesman Rob DeWall, the sculptor's family will carry on the work of completing his monument to the great Sioux Indian Chief Crazy Horse. That's appropriate for the honoree and the sculptor Ziolkowski was a great South Dakotan and American artist.

He worked 35 years on Crazy Horse Mountain and became a legend himself—so much a part of the Black Hills and South Dakota that it's easy to forget his origin and how he began the monument.

Ziolkowski was orphaned in Boston when he was a year old. He came to the Black Hills in 1939 to work for sculptor Gutzon Borglum on Mount Rushmore. That was the year that Sioux Chief Henry Standing Bear asked Ziolkowski to carve a mountain memorial to Crazy Horse.

Ziolkowski began the task after World War II, blasting 7.2 million tons of rock from the mountain before he died. Another 2 million tons must be removed before detail work can be started.

Throughout his work on Crazy Horse mountain, Ziolkowski saved the most difficult and dangerous tasks for himself. His

wife, Ruth, and his children have helped him with the project; sons worked on the mountain with him. His daughters assisted Mrs. Ziolkowski with the operation of the visitor's complex. One daughter made models of Crazy Horse Memorial as part of the money-raising effort.

Ziolkowski consistently refused federal aid for his project, relying instead on admission fees and private financing. It is estimated that 1.1 million visitors saw Crazy Horse Mountain in 1981.

The U.S. Post Office issued the Crazy Horse 13-cent postage stamp at the memorial last January. Other recent notable recognition for Ziolkowski came from Northwestern Bell. The company put a color photo of the sculptor and his wife and Crazy Horse Mountain on the cover of its South Dakota phone books.

There are many anecdotes about Ziolkowski, his attention to detail and his allcomsuming interest in the project. At the same time, he was a devoted family man and a friend of innumerable South Dakotans and others who visited him at Crazy Horse.

Ziolkowski's research about Native Americans led to admiration for them and disgust with the federal government's breaking innumerable treaties with the tribes. He met with many Sioux leaders and also with Mari Sandoz, the famed Nebraska author, to gain insight for his monument.

Ziolkowski persisted in working on the mountain in recent years despite seveal back operations. His death resulted from complications following recent heart surgery.

His plans for his family to carry on the work were made carefully.

Now its up to them to carry on—and complete the dream Ziolkowski had for Crazy Horse Mountain.●

EXTREMISTS SUPPORT NUCLEAR FREEZE

● Mr. EAST. Mr. President, in the last 2 months several major newspapers and public figures have made charges of a "revival of McCarthyism" in response to allegations made by President Reagan, Senator DENTON, and others that the so-called nuclear freeze movement has been penetrated and influenced by Communists, pro-Soviet elements, and far left activists. While I believe that those Americans who support the freeze are mistaken in their support, the majority of those who do support the freeze are nevertheless patriotic citizens who are unaware of the ulterior motives that are harbored by some of the leaders and more prominent figures who promote the freeze.

I shall provide here extensive documentation from reliable and publicly available sources for the allegation that pro-Soviet, Communist, Communist Party front groups, and far left activists are indeed present in the freeze movement and have exerted considerable influence within it. I am submitting these articles today not in order to expose the freeze movement but in order to inform other Americans—especially those who are not aware of the far left influences within it—of the presence and influence of those elements.

While it is certainly the right of American citizens to support those policies in which they believe, I would ask supporters of the freeze movement to ask themselves about the goals and purposes of that movement and about the security of their own country and its institutions:

First, why does the Soviet Union want a nuclear freeze? Is it because the largest totalitarian state in the world—a nation that persecutes its own citizens and is currently invading and destroying Afghanistan and other nations behind the Iron Curtain—is really interested in peace? Is it because the Soviet Union—which in the last 15 years embarked on the largest nuclear buildup in history—wants an end to the arms race? There is in fact no arms race on the part of the United States, since we have not deployed a single new land-based nuclear weapon system since the early 1970's. Or does the Soviet Union support a nuclear arms freeze because it now enjoys nuclear superiority in the European theater and elsewhere and knows that its superiority would be ended by the planned deployment of Pershing II and ground-launched cruise missiles by the United States in NATO by the end of 1983?

Second, is it not likely that the Soviet Union would use its immense propaganda assets in the KGB, the international department and the information department of the Central Committee of the Soviet Communist Party, in the Communist Parties of the world and their front groups, and other assets as well to promote a policy that the Soviets deem to be in their interest? Is that an unreasonable possibility?

Third, are those persons really interested in peace and disarmament who have taken the side of the Soviet Union, Cuba, North Vietnam, and other Communist states over the years; who have traveled to the Soviet Union to take part in "peace" conferences sponsored by the Soviet Government and presided over by known Communist Party members; who have denounced the United States and its foreign and military policies repeatedly as well as its fundamental institutions; or who have generally supported anti-American and anti-Western causes, countries, and movements? Or are such persons and organizations really motivated by some other desire than the security and best interests of the United States?

Fourth, are those leaders of the freeze movement who have not been explicitly or implicitly pro-Communist or anti-American in their rhetoric or activities but who dismiss charges of a Communist presence in the freeze movement as absurd or who say it is irrelevant—are such leaders acting responsibly and in a manner intended to promote the best interests of the United States?

Mr. President, I pray that all Americans will ask themselves these questions about the freeze movement and seek serious answers to them as they read the articles and materials below, and I ask that the articles be printed in the CONGRESSIONAL RECORD in full at the conclusion of these remarks.

The articles are as follows:

(1) Robert Moss, "The Intelligence War—Long Arm of KGB on Disarmers," Daily Telegraph (London), November 2, 1981, p. 5.

(2) "The Nuclear Freeze Network," Peace Through Strength Report (American Security Council), April 17, 1982.

THE INTELLIGENCE WAR—LONG ARM OF KGB ON DISARMERS

(By Robert Moss)

Evidence has come to light of the direct involvement by the KGB, the Russian secret police, in efforts to promote unilateral disarmament campaigns in Nato countries.

Last April, the Dutch government expelled a 31-year-old Russian called Vadim Vassilevich Leonov, supposedly a correspondent for the Tass news agency in Holland.

Mr. Leonov had been identified by the Dutch security service as a KGB officer who was actively engaged in espionage and covert operations.

Mr. Leonov's primary role was to maintain contacts with leaders of the Ban-the-Bomb movement.

He was to help orchestrate mass demonstrations and propaganda operations according to instructions forwarded from Moscow via the top-secret telex in the KGB Referentura (or code-room) inside the Soviet Embassy in The Hague.

Several months after Mr. Leonov's expulsion, a Dutch religious newspaper, the Reformatorisch Dagblad, published some remarkable disclosures by an unidentified church activist who had been cultivated by the KGB man.

According to the newspaper report, Mr. Leonov had boasted one evening that "if Moscow decides that 50,000 demonstrators must take to the streets in Holland, then they take to the streets.

"A message through my channels is sufficient.

"Everything is organized with military precision under the leadership of people who are essentially conscientious objectors.

"I should know," Mr. Leonov went on, "becasue not only am I involved in these clandestine activities on a daily basis, but I am also one of those who transmit the orders coming from Moscow."

Mr. Leonov's indiscretion—no doubt expressed to his confidant while never suspecting that he would later be quoted in print—is singularly revealing.

BAN CIRCUMVENTED

On the other side of the Atlantic, Mr. Leonov's role appears to be paralleled by that of Yuri Kapralov, whose nominal post is that of counsellor at the Soviet Embassy in Washington.

Mr. Kapralov has become a familiar figure at rallies and seminars organized to oppose the Reagan Administration's defence programme.

Last August, he was scheduled to address a disarmament rally that was to be held at the end of a march between the symbolically-named Vermont towns of Washington and Moscow.

The State Department intervened to prohibit Mr. Kapralov from speaking in Washington, Moscow, or two other towns along the route.

But the order failed to mention a fifth village along the line of the march, so Mr. Kapralov was able to make his speech at the Wesley Methodist Church in Waterbury, Vermont.

He spoke in support of a moratorium on the development of both nuclear and conventional arms by the two superpowers—a freeze that would confirm the present superiority enjoyed by the Soviet Union.

THE NUCLEAR FREEZE NETWORK

A well-organized international campaign to freeze U.S.-Soviet nuclear arms is now well underway in this country. The subject of extensive coverage in the national news, including a cover story in Time magazine last month, this is without question the largest and best-organized disarmament campaign yet. The flurry of freeze activity has already led to significant Congressional action, and a major co-ordinating effort will be concentrated in this month's Ground Zero Week.

A joint Congressional Resolution, introduced by Sens. Edward Kennedy (D.-Mass.) and Mark Hatfield (R.-Ore.) and Reps. Edward Markey (D.-Mass.) and Silvio Conte (R.-Mass.) has also garnered the support of 179 Congressmen. Also actively lobbying on behalf of the freeze are prominent social activists such as Screen Actors Guild president Ed Asner, composer-conductor Leonard Bernstein, entertainer Joan Baez, and politicians George McGovern and Bella Abzug.

Scheduled to begin April 19, Ground Zero Week's goal is to reach as many Americans as possible in some 300 targeted communities nationwide through teach-ins, seminars, lectures and other presentations with the message that nuclear weapons "are the biggest threat in the world." Rapidly gaining momentum in more than 100 free nations, the movement is building up to a climax in June when massive lobbying efforts and rallies are expected throughout the world, according to the Communist newspaper Daily World. In fact, key organizers of the international freeze campaign are the World Peace Council and its American affiliate, the U.S. Peace Council. President Reagan has already publicly described the Council as being "bought and paid for by the Soviet Union."

Critics of the freeze initiative argue that it does not address the issue of historic Soviet expansionism and is based on the assumption that the U.S. and Soviet Union have equal nuclear arsenals, while leading defense experts report the USSR has more than double the nuclear destructive force possessed by the U.S.

Calling the nuclear arms race the first step to the possible "annihilation of humanity," Sen. Kennedy said, "The only sure choice is for both sides to halt and then to reverse the race." He suggested the planet Earth is "an endangered species" because "we are nearing a time when the world as we know it will be only a second away from nothingness."

The anti-nuclear advocates have created a broad network of member groups dedicated to the implementation of such a proposed freeze. As such, while a relatively small number of core organizations co-ordinate strategy, the uprisings appear to emerge from the local—or grassroots—level.

The plan seems to be working well, as evidenced by the overwhelming success scored in New England with the American Friends Service Committee pushing for inclusion of the freeze resolution on hundreds of town warrants. Countless other groups are conducting direct-mail campaigns to solicit funds and support for the freeze, and speakers are being brought to college campuses from both the U.S. and Europe to lecture on the merits of a nuclear arms freeze.

"It would be the end of our strategic modernization program," declared Defense Secretary Caspar Weinberger of the proposed nuclear arms freeze. Calling the freeze an "open invitation" to the Soviet Union to keep up its military drive, Weinberger added that the Soviets have been consistently outinvesting the U.S. in defense hardware.

Professor William Van Cleave, Defense Department transition team leader and head of a strategic studies program at the University of Southern California, explained that "every single, relevant, strategic index, with the possible exception of nuclear warheads, and that's very debatable, now favors the Soviet Union. The Soviets are ahead in equivalent megatonnage, hard-target kill capability, number of launchers, and in my view, even warheads, when you include the Backfire Bomber and Soviet missile reload capabilities. . . ."

Bearing Banners with such slogans as "Babies Can't Survive Nuclear War" and a butterfly-emblazoned sign reading "Give Children Dreams, Not Nuclear Nightmares," such groups as SANE, the Union of Concerned Scientists, International Physicians for the Prevention of Nuclear War, the Lawyer's Alliance for Nuclear Arms Control, the Business Alert to Nuclear War, and Artists for Survival, among a whole host of others, are converging to make nuclear weapons so frightening that sufficient fear is inspired to have citizens demand a halt to the production of nuclear weapons at all costs.

Politically-savvy Linda Jones, editor of The Maine Paper, a Hallowell, Maine-based bi-weekly, suggests that by moving from the universities and "think tanks" into "middle-of-the-road" communities, organizer-activists manage to influence local people to support their concepts and thus succeed in creating the illusion of a "grass-roots uprising."

"To produce the necessary ground swell," Jones explained, "a great many pamphlets have to be dispatched to community groups, churches and organizational affiliates.

"Initiatives are introduced at the local level to bring the mandate back up through the U.S. populace to complete the process," she continued, "making the demand on Congress from grassroots America."

NUCLEAR WEAPONS FREEZE CAMPAIGN NATIONAL CLEARINGHOUSE

One extraordinarily successful group, largely responsible for getting the arms freeze proposal on town meeting warrants in scores of New England communities, is the St. Louis, Missouri based Nuclear Weapons Freeze Campaign National Clearinghouse.

Former Freeze Campaign director and current member of the Massachusetts-based Institute for Defense and Disarmament, Mark Neidergang, told us that St. Louis was chosen because "we felt that if this issue were going to convince the broad majority of the people, we needed to demonstrate that we were sort of symbolically 'middle-of-the-road,' not an east coast liberal establishment movement, or a west coast flaky movement."

Over 60 groups operate nationally under the wings of the Freeze Campaign, including Clergy and Laity Concerned (CALC), and the American Friends Service Committee.

CLERGY AND LAITY CONCERNED (CALC)

Clergy and Laity Concerned (CALC) was formed in 1965 as the "Emergency Committee of Clergy and Laymen Concerned about Vietnam," and they had over 50,000 members by 1970. CALC currently boasts 20,000 members and hopes to add another 3,000 this year.

CALC calls the nuclear freeze its top priority and plans to co-sponsor with the American Friends Service Committee a two-week visit by ten major European "peace leaders" next month. This delegation will split into groups of two and lecture in a total of 36 cities during their U.S. stay.

Extremely active in both the planning and development of the Nuclear Weapons Freeze Campaign, CALC is now working towards involving all 42 of its chapters in sponsorship of Freeze conferences.

AMERICAN FRIENDS SERVICE COMMITTEE

The American Friends Service Committee, originally established by and for Quaker conscientious objectors to war, has grown into an activist organization with emphasis on social issues ranging from world hunger to social justice.

Right now the main focus of the Service Committee is the weapons freeze initiative. The group was highly successful in organizing opposition at New England town meetings and its campus speakers bureau is said to be the most effective in the anti-defense community.

COALITION FOR A NEW FOREIGN AND MILITARY POLICY (CNFMP)

The Coalition for a New Foreign and Military Policy (CNFMP) is being credited by the national media as having mounted the most comprehensive anti-defense effort yet. Like the Nuclear Weapons Freeze Campaign National Clearinghouse, CNFMP is a central operation with 70 member groups running the gamut from religious organizations like the National Council of Churches to self-described progressive lobbying groups

and think-tanks, such as the Institute of Policy Studies.

Other CNFMP member groups include, again, CALC and the American Friends Service Committee, the National Center to Slash Military spending, the International Longshoremen's Union, Members of Congress for Peace Through Law, the National Council of Churches, and Americans for Democratic Action.

There is reportedly a great deal of cross-membership among the smaller groups in these large "pulse-centers" of anti-defense activity that suggests to many an "interlocking directorate" of control.

As these oranizations march and lobby to influence the remaining members of Congress to join in their call for a nuclear arms freeze, President Reagan and Caspar Weinberger will continue to argue the case for increased weapons development to "keep America strong."

HOW FAR LEFT IS MANIPULATING U.S. NUCLEAR "FREEZE" MOVEMENT

Where did the idea of a "nuclear freeze" come from? When Senators Edward Kennedy (D.-Mass.) and Mark Hatfield (R.-Ore.) introduced their resolution calling for such a freeze, they implied that the proposal was their own and that it was simply a response to "grass-roots" pressure. However, there is evidence to indicate that the freeze proposal is the product of the extreme left, and that identified Communist-front organizations and actual Soviet agents have had a role in promoting it.

An internal document of the anti-nuclear forces obtained by Human Events identifies a disarmanment activist by the name of Randall Forsberg as the "intellectual author" of the freeze campaign. This document, dated February 22 and written by Anne B. Zill, a representative of liberal financier Stewart Mott, reveals the inner workings of the anti-nuclear movement and how it is manipulating the media.

Ms. Forsberg, who was unavailable for comment, is identified in the document as the head of the Institute for Defense and Disarmanent Studies in Brookline, Mass. Formed in 1979, the group recently obtained tax-exempt status, according to the document. "With a staff of eight full-time and three part-time employes," it says, "Randall Forsberg plans to have her first newspaper in May, called 'Defense and Disarmament News.' Also in preparation is listing all American peace and peace-related organizations, both national and local. The goal is to increase the amount of cooperation."

It just so happens that Ms. Forsberg is well connected with those "peace organizations." One of the directors of her institute is Richard J. Barnet, a founder of the extreme-left Institute for Policy Studies (IPS), which has served as "watering hole" for apologists of Communist regimes such as Cuba and North Vietnam.

The Mobilizer, a newspaper of the anti-nuclear group, Mobilization for Survival (MFS), reported in its April/May 1981 issue that Ms. Forsberg delivered a "keynote address" to the December 1979 MFS conference. She then "proposed a joint U.S.-USSR freeze on all nuclear weapons as a concrete step to halt the nuclear arms race," the newspaper reported. "That idea was well-received, and Ms. Forsberg was encouraged to develop it into a full-blown proposal."

That Ms. Forsberg would attend a conference of the Mobilization of Survival is significant because the MFS is one of the most radical anti-nuclear groups on the scene. Its affiliate members include the Communist party and the U.S. Peace Council, the American branch of the World Peace Council, an organization described by President Reagan as "bought and paid for by the Soviet Union." It is not surprising, therefore, that her freeze proposal, which would lock in Soviet nuclear superiority, would receive such a warm reception.

According to The Mobilizer, Ms. Forsberg then produced a paper, "A Call to Halt the Nuclear Arms Race," incorporating the freeze concept. The paper picked up a number of endorsements, including that of the MFS national coordinator. "Soon after this," the newspaper said, "organizational commitments began to follow, and an interim steering committee (again with MFS participation) was formed to launch the freeze as a major national campaign. That committee agreed that the first step in building the campaign should be a national strategy conference, in which local organizers and groups who had not been previously involved could both get excited about it and help shape it."

In March 1981 the first national strategy conference of the freeze campaign was held in Washington, D.C. The MFS newspaper reported that it featured almost 300 people "gathered from 33 states, Great Britain and the Soviet Union," and that Ms. Forsberg participated, as did Yuriy S. Kapralov of the Soviet Embassy.

In February 1982 the second national conference of the freeze campaign was held in Denver, Colo., and Senators Kennedy and Hatfield followed by introducing their freeze resolution in Congress. Did the Kennedy-Hatfield forces contact Ms. Forsberg's Institute for Defense and Disarmament Studies before they went ahead? "Yes, they did," replied institute spokesman Melinda Fine.

The congressional action suddenly focused national attention on the freeze campaign. Major newspapers and news magazines carried stories about a supposedly "broadly based" and "grass roots" movement, ignoring the fact that the freeze proposal had been nurtured from the beginning by the extreme left.

While the freeze proposal has attracted a number of congressional supporters, most of them liberal Democrats, and while it has generated support in town meetings, city councils and even some state legislatures, there is no reason to believe that most Americans support the Kennedy-Hatfield proposal or anything like it. A Newsweek magazine poll reported, for instance, that 61 per cent of the people opposed a nuclear freeze which gave the Soviets an edge. The Soviets, as President Reagan noted at his last news conference, do have just such an edge.

Nevertheless, the anti-nuclear forces are working hard to create the illusion of popular support for their cause. The Zill document mentioned earlier describes in detail how the anti-nuclear groups are moving their propaganda into the media.

Zill notes, for instance, that the Nuclear Weapons Freeze Campaign in St. Louis has a staff of only five people, but that a reporter for U.S. News & World Report contacted the group's coordinator and then "concluded that the push for a nuclear weapons freeze is rooted in local referenda and churches and that it is spreading through middle America."

Evidence of such popular support can't be found in the document. In fact, Zill complains that some of the "peace groups" are poorly funded and she laments "the absence of a high-powered, effective peace lobby." She suggests that groups pool their efforts and concentrate on projects that will attract media attention.

"The three biggest calendar events of the year," she says, "are the Ground Zero Week in April, the second Special Session On Disarmament at the United Nations with an accompanying mass rally in June, and a Veterans Day repeat of last year's successful university teach-ins on November 11."

The mass really, scheduled for June 12, has received strong backing from the U.S. Peace Council. In a recent letter to its supporters, the pro-Soviet group said the rally will be an expression of support for the U.S. disarmament session, an event which "comes at the urging of the non-aligned movement and the Socialist countries. . . ." It called the rally "a matter of great urgency."

In the face of this anti-nuclear propaganda assault, complete with the Vietnam-like street protests and demonstrations, the Administration can't afford to retreat in its effort to rebuild America's deterrent, especially in view of mounting evidence that the Soviets have already—in blatant violation of SALT II—begun to deploy the mobile SS-16 (see page 3). The American people will back the Administration, but the President's political advisers—Jim Baker, Dave Gergen and pollster Richard Wirthlin—have to allow him to make the hard-hitting statements necessary to rally the electorate.

"PEACE" VISITORS SING A SOVIET SONG

(By Allan Brownfeld)

During April, a group of European supporters of a "nuclear freeze" is touring the U.S. under the auspices of what they call the "U.S.-Europan Peace Tour."

In the group are Joan Ruddeck, chairwoman, of the Coalition for Nuclear Disarmament in Great Britain and Bruce Kent, a Roman Catholic priest from England who runs the CND.

When these "peace" advocates portray themselves as supporters of a world without war, they present themselves as something other than what they are. Fortunately, several young Englishmen committed to a far different philosophy also are visiting the U.S. to tell the truth about their countrymen. They are Francis Leonard Holihan, director of the Coalition for Peace Through Security of London, and Edward Leigh, who served as correspondence secretary to Margaret Thatcher and since 1977 has been a Conservative member of the Greater London Council.

Leigh declares: "We became alarmed about the growth of the Campaign for Nuclear Disarmament. It has grown phenomenally in the last two years. They believe not in mutual disarmament but in the unilateral disarmament of the West. While in the U.S., they disguise their real purposes and pretend to be non-political and well-meaning churchmen. The Soviets are desperate that the Pershing missiles not be placed in Europe. They are convinced that the European 'peace' movement will do their work for them. Now they are bringing it to the U.S., hoping to stir public opinion in the direction of disarmament on both sides of the Atlantic."

SOVIET FUNDING

Holihan says: "We are facing a global threat from world communism but have no global strategy with which to combat it. It is essential that Americans understand the radical political nature of the so-called 'peace' movement in Europe. There is absolute proof of Soviet funding of some elements of the European 'peace' movement. There is even strong circumstantial evidence of Soviet involvement in the CND."

Evidence of Soviet involvement is growing. Last November, the Danish government expelled a Soviet diplomat, Vladimir Merkoulov, for channeling funds to the "peace" groups. Several months earlier, Denmark expelled Vadim Leonov, a KGB agent posing as a Tass news agency correspondent and link with the "peace" groups. At one point he declared: "If Moscow decides that 50,000 demonstrators must take to the streets in Holland, they will take to the streets."

The British CND group, which has growing links with American groups such as the American Friends Service Committee and Clergy and Liaty Concerned, has clear Communist connections. In November 1981, when President Reagan proposed canceling U.S. loans for installing Cruise and Pershing II missiles in Europe if the Soviets would dismantle their equivalent missiles, the CND denounced the proposal as a "propaganda ploy." Novelist John Braine, a CND member who left the movement, said: "The CND reaction to the Reagan initiative once again gave the game away. Despite its great protestations of political impartiality, CND is about as independent of the Soviet line as a ventriloquist's dummy. Indeed, it provides a textbook example of the way in which Communists involved in any movement will take it over."

CHURCHES CALLED HANDICAPPED

A leading CND figure now traveling in the United States is Monsignor Bruce Kent. With 11 other full-time staffers—two of whom admit being Communist Party members—Kent states: "The churches are handicapped by profound anti-Communism at variance with Christian teaching."

When the Soviet Union invaded Afghanistan, the CND criticized not the Russians but the reaction in the West. Thus, Dr. Michael Pentz, CND national councilor, attacked President Carter and Prime Minister Thatcher for "reviving the cold war by cynically exploiting the Afghanistan crisis." A CND pamphlet said the invasion, which it called an "intervention, may well have been caused "partly by the Soviet Union's fear of growing encirclement." The author: Communist Party Member Betty England.

In its July 27, 1981 issue, "The London Daily Telegraph" reported a quarter of the CND's council was in the Communist party of Great Britain. While Kent denies receiving money from the World Peace Council, clearly identified as a Soviet front, he cabled congratulations to its meeting in Bulgaria in September 1980. Speaking on the BBC World Service of May 15, 1981, Kent said NATO was "preparing for annihilation." He already had attacked Cruise missiles during a broadcast from East Berlin on Dec. 17, 1980.

TO VISIT 50 CITIES

At this time, the CND has dispatched about 30 key personnel to the United States. Their itinerary will include some 150 college campuses and 50 cities in an effort to capture control of the U.S. "peace" movement.

Many churchmen in England fully recognize the truth about Monsignor Kent and his colleagues. The Rev. William Inge, a former dean of St. Paul's Cathedral, said: "There is not much use in the sheep passing resolutions in favor of vegetarianism while there are still wolves who like mutton." Similarly, the Rev. William Oddie, an Oxford University chaplain, said: "The easy moral indignation and strident calls by some church leaders to abandon nuclear weapons unilaterally are not only dangerously naive but even constitute a form of spiritual escapism. By closing their eyes to the suffering of millions in the Soviet bloc, they demonstrate a lack of contact with reality which will make any Christian contribution towards the practical problem of genuine disarmament impossible."

Americans should not be misled by these wolves in sheep's clothing who now urge us to surrender.

(Allan Brownfeld is a Washington area writer.)

[From the Backgrounder, May 14, 1982]

MOSCOW AND THE PEACE OFFENSIVE

INTRODUCTION

The United States today confronts a task of major proportions in attempting to fulfill the 1979 NATO decision to deploy new Pershing II and ground-launched cruise missiles in Western Europe. Designed as a means of countering the Soviet theater-range missile buildup, the program now faces formidable opposition in the West. In some European NATO countries, support for the plan is plummeting under assault from increasingly strong peace and disarmament movements.

This shift in European sentiment is, in great part, the result of the Soviet Union's massive disarmament propaganda campaign. Moscow's propaganda apparatus comprises a variety of organizations primarily under the control of the Central Committee of the Communist Party of the Soviet Union. These agencies in turn influence the activities of organizations in the Western European countries that have been set up as front groups by the pro-Soviet national Communist parties.

This standard propaganda arrangement has been made even more effective in the past few years by a Soviet decision to allow the communist organizations to work on the disarmament—"safeguarding the peace"—issue with groups of almost any political character. In order to counter this effort by Moscow to prevent the deployment of NATO's new missiles, the United States must understand the nature of Soviet disarmament campaigns.

The first Soviet disarmament campaign to utilize a European front group successfully as a national mobilizing force was the fight against the "neutron bomb." With the aid of "independent" religious peace groups, the Dutch Communist Party broadened public support for its 1977-1978 "Stop the Neutron Bomb" movement far beyond the communist, lefist, and pacifist circles traditionally active in such campaigns.

Having realized the success of this broad support concept, Soviet leaders determined to use it in other "peace offensives." The Soviet Union's campaign against NATO's modernization of its theater nuclear forces proved a remarkable success in 1981, which has continued into 1982. This resulted in no small part from the USSR's decision to ally its disarmament forces with European peace groups of differing political outlook in order to present a united front on disarmament. This broadening of support has provided Soviet propaganda activities with Western European coloration—legitimizing Soviet anti-U.S. and anti-NATO efforts in the guise of genuine European nuclear fears.

The nuclear freeze campaign now gaining momentum in the United States is a cousin to the European disarmament movement. Its roots are American, but its emotional arguments parallel those used by the Europeans, its leaders have begun receiving organizing advice from European peace movement figures, and for all its high-minded idealism, its effects prove no less beneficial to Soviet propagandists.

THE SOVIET UNION'S PROPAGANDA APPARATUS

Propaganda has always loomed large in the work of the Communist Party of the Soviet Union. Lenin maintained that the political and ideological work of the Party was distributed among three categories—theoretical activity, propaganda and agitation.[1] Theoretical activity was the preservation and elaboration of the doctrines of Marx and Lenin. Propaganda was the dissemination of doctrinal messages on specific subjects to an elite audience consisting primarily of Communist Party cadres. And agitation was the dissemination of more simplified doctrinal messages to the great mass of the common people. These last two categories are commonly recognized today as propaganda.

The Soviet Union uses a variety of agencies—overt and covert—to target the West with its propaganda. The Central Intelligence Agency estimates that the USSR spends the equivalent of some $3.3 billion each year on these efforts. Overt activities include Radio Moscow's foreign service—broadcasting 2,022 hours a week in eighty-two languages—and TASS (Telegraph Agency of the Soviet Union), the Soviet news agency. By contrast, the United States' Voice of America broadcasts 904.75 hours a week in only forty languages. The most important USSR agency lending covert support to Soviet propaganda initiatives is the KGB or Committee for State Security.

The Politburo of the CPSU Central Committee approves the major propaganda themes and the methods to be used to disseminate them. It also rules on the use of major support actions by the KGB. Departments of the CPSU Central Committee with a direct responsibility for propaganda efforts are the International Information Department, an organization established in recent years, which directs overt propaganda activities against non-Communist countries, and the International Department, which directs relations with non-ruling Communist parties.

Heading the International Information Department is Leonid Zamyatin, a member of the CPSU Central Committee and former Director General of TASS. The Department's First Deputy Chief is Valentin Falin, the former Ambassador to the Federal Republic of Germany. Until his death on January 25, 1982, Mikhail Suslov, the CPSU's ideologist, advised Zamyatin on propaganda efforts, in connection with his role as ideological overseer for Soviet foreign policy.

The CPSU Central Committee's International Department is headed by Boris Ponomarev, Candidate Member of the Politburo and Secretary of the Central Committee, a man with twenty-five years of experience in the job. Ponomarev's First Deputy Chief is Vadim Zagladin, a member of the CPSU Central Committee. Because of its responsi-

---

[1] Footnotes at end of article.

bility for dealing with Communist parties in non-Communist states, the International Department funnels its covert propaganda requirements through both the Communist parties themselves and, utilizing its International Organizations Section, the various pro-Soviet international front organizations.[2]

The Soviet leadership's view is that national Communist parties should support CPSU policy initiatives down the line. Of course, the actual role that a particular Communist party plays in a Soviet propaganda campaign is determined in large part by the strength of its pro-Soviet alignment or, in the case of parties with basic policy disagreements with the USSR, by whether or not the propaganda issue is one of common concern. Peace and disarmament are issues of natural agreement between the Soviet Union and the vast majority of Western Europe's communist parties, because of the latter's anti-military stance.

The most prominent Soviet international front group in the disarmament effort is the World Peace Council (WPC), established in Paris in 1949 as part of Joseph Stalin's "peace offensive" of the late 1940s. The Council's first propaganda effort was its 1950 Stockholm Appeal, a "peace petition" that demanded "the outlawing of the atomic weapons as instruments of aggression" and "the strict international control" of atomic weapons. Expelled from Paris in 1951 and outlawed in Austria in 1957, the WPC remained in Vienna under the cover of a new organization, the International Institute for Peace, until it moved to its present Helsinki headquarters in 1968. The president is Romesh Chandra, a veteran Indian Communist involved in the Soviet international front movement for some twenty-five years.[3]

The KGB's covert role in the propaganda campaign apparatus often is to furnish disinformation to its agents of influence, to provide clandestine funding for cooperating organizations in various countries (particularly money for mass demonstrations), and to forge documents. Such "active measures" are the responsibility of Service A of the KGB's First Chief Directorate (Foreign Intelligence).[4] Disinformation (dezinformatsiya) is defined by the Soviets as "the dissemination of false and provocative information." In practice it encompasses the distribution of forged documents and photographs, the spread of misleading rumors and erroneous information, duping non-Communist visitors to the Soviet Union, and perpetration of physical violence for psychological effect. One Soviet defector described a successful disinformation operation in which he had participated:

"One example, in Tanzania, was our 'work' to discredit the American Peace Corps. The line was that it was a CIA front organization and its subversive activity had to be 'exposed.' We tried, often successfully, to place prepared articles into local papers—preferably signed by the Tanzanians. The 'authors' were always paid well, and 'their' articles worked: Tanzania, and then Uganda, started refusing Peace Corps Services." [5]

FORMER SOVIET DISARMAMENT CAMPAIGNS

The Soviets have used peace propaganda extensively since the late 1940s, first to check America's potential use of its atomic weapons monopoly for political capital at a time when the USSR had none or only a few of such weapons and then, late, to hinder the United States' arms buildup and the American defense of South Vietnam. Nikita Khrushchev stressed the usefulness of peace propaganda in a January 1961 strategy speech: "Every day bigger sections of the population should be drawn into the struggle for peace . . . The banner of peace enables us to rally the masses around us. By holding aloft this banner we will be even more successful." This Soviet line was immediately picked up by Gus Hall, the leader of the U.S. Communist Party, in a major report to the Party's National Committee:

"It is necessary to widen the struggle for peace, to raise its level, to involve far greater numbers, to make it an issue in every community, every people's organization, every labor union, every church, every house, every street, every point of gathering of our people. * * *

"It is essential to give full support to the existing peace bodies, to their movements and the struggles they initiate, to building and strengthening their organizations. . . . It is also necessary to recognize the need for additional peace organizations. * * *"

* * * * *

"Above all, Communists will intensify their work for peace, and their efforts to build up peace organizations." [6]

PROPAGANDIZING AGAINST THE "NEUTRON BOMB"

On June 4, 1977, Washington Post staff writer Walter Pincus called attention to the Defense Department's decision to request congressional funding of the enhanced radiation warhead (ERW). In his newpaper article, Pincus stated:

"The United States is about to begin production of its first nuclear battlefield weapon specifically designed to kill people through the release of neutrons rather than to destroy military installations through heat and blast.

"Funds to start building an "enhanced radiation" warhead for the 56-mile range Lance missile are buried in the Energy Research and Development Administration portion of the $10.7 billion public works appropriations bill now before Congress." [7]

This Post article and the newspaper's negative editorial on the new weapon quickly gained public attention, and in the subsequent few weeks, negative reporting in influential newspapers around the country aroused a small public furor over the issue.

The Soviets joined in with an article on the "neutron bomb" in Pravda on June 19, 1977, castigating the weapon as "according to the press assessments, practically a chemical warfare weapon. . . ." On July 13, the U.S. Senate passed the appropriations legislation allowing the spending for enhanced radiation warheads. The Carter Administration, however, delayed a decision on production.

Within a few days of the Senate decision, the Soviets launched a full-scale assault on the "neutron bomb." Beginning on July 19, one Soviet international front group after another initiated formal protests against United States production of the weapon. The following week, the World Peace Council announced that an International Week Against the Neutron Bomb would be observed from August 6 to 13—dates coinciding, not surprisingly, with the annual commemorations of the Hiroshima and Nagasaki atomic bombings of World War II.

On August 20, 1977, at the initiative of the Dutch Communist Party (CPN), 130 Dutchmen launched an appeal in the Communist daily De Waarheid to start a widely based movement against the "neutron bomb." This movement was furnished immediate organizational strength by two cooperation groups whose ties had begun in 1976, the Christians for Socialism (CVS), a known communist front organization, and the Inter-Church Peace Council (IKV). Throughout that fall, the "Stop the Neutron Bomb" campaign gathered momentum in the Netherlands in its avowed goal of mobilizing Dutch public opinion against the weapon, even as Dutch and Belgian Communist Party leaders were jointly discussing the campaign's strategy (one such meeting taking place in De Haan, Belgium).

By October 1977, President Carter was still undecided on whether to produce ERWs, and later that month, Secretary of Defense Harold Brown informed NATO representatives that the United States would probably not proceed with production unless a consensus in favor of the weapon's deployment could be formed by the Western European countries. The public announcement of this altered American position gave Soviet propagandists and their agents incentive to further increase their anti-neutron agitation in Europe.

By this time, local anti-neutron groups throughout Holland consisted not only of Communists, but also of pacifists and concerned Christians who had been drawn into the Communist campaign largely unaware of its real sponsorship. The active participation of the Inter-Church Peace Council was particularly useful in broadening the movement's base.

The emerging situation demonstrated the sucessful working relationship of the open Soviet propaganda apparatus, which orchestrated strong public denunciations of the weapon with the Soviet covert apparatus, largely used to manipulate public sentiment in Western Europe through the machinations of Western European Communist Parties and their front groups.

Anti-neutron sentiments were by now gaining strenth throughout the Continent, aided by the constant attention of the media. In West Germany, where most of the neutron warheads would have been deployed, Secretary General Egon Bahr of Chancellor Schmidt's own Social Democratic Party (SPD) in July 1977 publicly denounced the "neutron bomb" as "a symbol for the perversion of human thinking." And although its public efforts in the propaganda campaign received less attention than those of the Dutch "Stop the Neutron Bomb" group, the German Peace Society-United War Service Resisters (DFG-KV), with close links to the West German Communist Party (DKP) and its affiliated organization, the Socialist German Workers' Youth (SDAJ), set aside the August 6 anniversary of Hiroshima as a day of demonstrations against the neutron weapon in more than forty German cities.

Meanwhile, overt Soviet propaganda continued. In the course of his address commemorating the sixtieth anniversary of the October Revolution, Soviet leader Leonid Brezhnev presented two "new" disarmament proposals; one urged that "agreement be reached on a simultaneous halt in the production of nuclear weapons by all states—all such weapons[,] whether atomic, hydrogen or neutron bombs or missiles."

Nevertheless, most of the Soviet propaganda was negative in nature, attempting to picture deployment of the ERW as a plot by the Carter Administration to lower the nuclear threshold in Europe.[8] And in a December 1977 Pravda interview, Brezhnev announced that the Soviet Union would not remain a "passive onlooker" if such a

weapon were developed but would instead answer the challenge. These Soviet messages were relayed directly to President Carter by Polish leader Edward Gierick, when Carter visited Poland in late December.

On December 15, 1977, the World Peace Council announced an effort "to secure a ban on the neutron bomb in 1978."[9] It held a series of meetings and "peace conferences" at which the "neutron bomb" was a major topic of abuse. For example, the WPC Bureau met for the first time in the United States, in Washington, D.C., in January 1978. There the group called, among other things, for all world peace forces to step up the struggle against the arms race, especially the manufacture of the "neutron bomb."

That same month, Leonid Brezhnev sent personal letters to the heads of each Western European NATO government. In harshly worded letters, the Soviet General Secretary warned that NATO should reject American efforts to produce and deploy neutron weapons. Other "official" Soviet propaganda activities included a proposal on March 9, 1978, made by the Soviet delegate to the thirty-country Geneva Disarmament Conference, to prohibit the production, stockpiling, and deployment of "neutron bombs." At about the same time, the Soviets attacked U.S. actions during the Belgrade conference assembled to review the Helsinki agreement.

On March 18, an "International Forum" supported by the CPSU was held in Amsterdam on the "neutron bomb" matter. The following day the "Stop the Neutron Bomb" movement, augmented by prominent East bloc representatives marched through the streets of Holland's largest city, more than 40,000 strong. The leaders of the movement presented Parliament with a "poll of the people"—the signatures of more than one million of people opposed to the "bomb" which their organization had been gathering since August 1977.[10] It was the culmination of months of patient effort by the Dutch Communist Party and its front organizations in the Netherlands, all in service to the propaganda needs of the Communist Party of the Soviet Union.

On April 7, 1978, President Carter capitulated and announced that the United States had decided against the "incorporation of enhanced radiation features" into U.S. battlefield weapons. The final American decision, he averred, would be influenced by the degree of restraint shown by the Soviets in their future military programs and force deployments. The Soviets had won their propaganda offensive. In an address given the same day as Carter's decision, Brezhnev "scoffed at making the neutron bomb 'the subject of bargaining and tying in this weapon with unrelated issues.'"

THE SOVIET PROPAGANDA CAMPAIGN AGAINST TNF MODERNIZATION: 1979

On October 1, 1979, Brezhnev fired the opening salvo of what has since become a major propaganda offensive against the United States' latest effort to strengthen NATO's nuclear deterrent forces. The Soviet leaders apparently decided to mount such a campaign when they realized that the decision on the development and deployment of new NATO theater nuclear weapons was imminent.

For all the campaign's later momentum, its opening shot was all but inconspicuous. In an otherwise undistinguished recounting of Soviet disarmament policies made on October 1 to a Socialist International Working Group on Disarmament, Brezhnev remarked: ". . . the initiators of the arms race, including those who are now pushing plans for turning Western Europe into a launching pad for American nuclear weapons targeted on the U.S.S.R. . . . are playing a dangerous game with fire." However, the Soviet leader followed up this brief statement with a major address in East Berlin five days later. He proposed a number of initiatives designed to keep NATO from procuring and deploying Pershing II ballistic missiles and ground-launched cruise missiles.

There were several threats in the Brezhnev speech. One was the warning that the USSR would be forced to strengthen its forces if NATO deployed the new theater nuclear weapons. Specifically the General Secretary noted: "The Socialist countries would not, of course, watch indifferently the efforts of the NATO militarists. We would have in such a case to take the necessary extra steps to strengthen our security. There would be no way out left to us." Another was the threat that, were the Federal Republic of Germany and other European NATO countries to allow missiles on their soil, they would suffer dire consequences if these new weapons were ever used. This threat was coupled with the assertion that the Soviet Union would "never use nuclear arms against those states that renounce the production and acquisition of such arms and do not have them on their territory."

The pledges of good will made explicit in the Soviet leader's address but clearly contingent upon NATO's decision not to deploy the new weapons were twofold—first, an announcement that the Soviet Union was prepared to reduce the number of medium-range weapons deployed in the western USSR; and second, a promise of "further expansion of measures of trust in Europe," including early agreement on notification of large exercises of ground forces (already provided for in the Helsinki Final Act), timely notification of large-scale troop movements, and the immediate commencement of SALT III talks once SALT II was ratified. Interestingly, a third pledge was not made contingent upon NATO actions but was given as a sign of Soviet "good faith." It promised the USSR's unilateral withdrawal of up to 20,000 Soviet troops, 1,000 tanks, and "also a certain amount of other military hardware" from East Germany over twelve months. This was not the first time that a Soviet leader had promised troop withdrawals in the hope of forestalling the deployment of U.S. missiles in Europe. In early January 1958, just three weeks after NATO had agreed to allow Jupiter IRBMs on European soil, Nikita Khrushchev announced that he was withdrawing 40,000 troops from Eastern Europe. And indeed some 41,000 Soviet troops were withdrawn. Yet, within six months of Khrushchev's announcement, the Soviets were again heating up the situation in Berlin.

Following the Brezhnev speech, the Soviet propaganda campaign against NATO nuclear force (TNF) modernization expanded in many directions. Articles began appearing in prominent Soviet news organs reiterating Brezhnev's points or challenging Western press interpretations of them. For example, Valentin Falin, the First Deputy Chief of the CPSU Central Committee's International Information Department (and reputed leader of the anti-TNF propaganda campaign), wrote in Pravda: "If 400 or 600 new carrier rockets were to be deployed in Western Europe . . . then, of course, this would lead to the appearance in the East of systems adequate to counterbalance them." And Izvestiya criticized the Western press on October 10 for "distorting [the] clear-cut, practical and concrete proposals" which had been made by the Soviet General Secretary.

The immediate American response to the Brezhnev address was firm. At a press conference on October 9, President Carter responded: "It is not quite as constructive a proposal as at first blush it seems to be. What he is offering in effect is to continue their own rate of modernization as it has been, provided we don't modernize at all. . . . The decision ought to be made to modernize the Western allies' military strength and then negotiate with a full commitment and determination mutually to lower armaments on both sides. . . ."

As the days passed the Soviet press hardened its line. In maneuvers designed more for European than for American consumption, Soviet news organs began claiming that the introduction of new, medium-range, theater nuclear weapons by NATO would violate American-Soviet, understandings as set forth in SALT II, and that the Pershing II missiles were being fitted to carry "neutron warheads." The SALT-related charge was made by Falin in a Soviet television news commentary program that was quickly sent worldwide by TASS. The charge that the U.S. missiles proposed for European deployment would eventually carry "neutron" warheads was made on a television program by a senior Soviet officer and quickly distributed in the West by the Novosti Press Agency. This was obviously intended to link the new American plan to the "neutron bomb" which an earlier Soviet propaganda campaign had discredited so successfully in Western Europe the year before.

While this public propaganda effort was in full swing, the Soviet government was actively employing diplomatic pressure. Brezhnev sent each European NATO government a private letter reiterating his proposals.

Meanwhile, outside the Soviet Union, allied agents of the USSR's campaign of persuasion used their influence to good advantage. On October 17, the "parliaments" of the Warsaw Pact countries issued an appeal for Western European legislators to raise their voices against the plans for the deployment of "new types of American nuclear missile weapons on the European continent." In Brussels, a public disarmament forum was held from October 26 to 28, giving Warsaw Pact representatives a perfect opportunity to air anti-TNF views extensively. The East German government, especially, participated energetically. At the beginning of November, in Sofia, Bulgaria, Secretary General Erich Honecker of East Germany's Socialist Unity Party warned the Federal Republic of Germany that NATO approval of TNF modernization would cause deterioration of East-West relations and would specifically endanger the recently improved relationship between East Germany and West Berlin. That same week the Honecker government requested East Germans to sign petitions against the new Western weapons. In addition, the GDR dispatched a special "anti-missile" delegation, headed by Politburo member Kurt Hager, to canvas for support in Belgium, the Netherlands, and Luxembourg.

And then, the Soviet campaign was aided unintentionally by a visit to Denmark of three American arms control advocates. The men—Herbert Scoville (a former assistant

director of the Arms Control and Disarmament Agency), Arthur M. Cox, and Richard Barnet—had come to Copenhagen under the sponsorship of the Danish newspaper *Information* and the United Nations Association to meet with influential Danes to urge them to oppose the deployment of the new weapons in NATO.[11] The Americans argued that if NATO did not deploy the new weapons, the Soviet Union might begin withdrawing its old SS-4 and SS-5 missiles from inventory.[12] Their advice was well received by the sizeable left wing of Denmark's ruling Social Democrats, already ideologically predisposed against the new weapons; in addition, the advice had a significant impact on many centrist Danes.

The approach of the scheduled November 13-14 NATO Nuclear Planning Group (NPG) meeting, which both the United States and the Soviet Union saw as a bellwether of the North Atlantic Council's December vote, gave renewed impetus to Soviet anti-TNF agitation efforts. On October 25, in a major Pravda article, obviously directed at Western Europe, Soviet Defense Minister Dmitriy Ustinov charged the United States, Great Britain, and West Germany with attempting to implement "schemes hostile to the cause of peace." He warned European leaders that "West European countries would suffer retaliation if the deployed weapons were put into operation by their masters."

That same day, the United States responded to Brezhnev's original proposal with a disarmament offer of its own. Having first discussed the idea with European allies, the Carter Administration announced that it was considering the withdrawal of up to 1,000 older nuclear warheads from Western Europe, contingent upon a favorable NATO decision on the deployment of the new weapons.[13] Apart from its value in matching the Soviet disarmament initiative, the proposal was seen by the Carter Administration as a way of garnering additional European support for procurement and deployment of the new weapons.

With time for the NATO decision growing closer, the Soviet Union attempted to rekindle Western European interest in the Brezhnev proposals by stressing the positive aspects. On November 6, 1979, *Pravda* published a commentary by Leonid Brezhnev on the issue of immediate negotiations. In it, the General Secretary emphasized:

"As regards a practical solution of the problem of these weapons, there is only one way to follow—that of embarking on negotiations. The Soviet Union is of the view that the negotiations must be embarked on without delay. We are prepared for this. Now it is up to the Western powers. It is important, however, that no hasty actions be taken which might complicate the situation or obstruct the attainment of positive results. There will be a greater chance of obtaining such results if no decisions are taken on the production and deployment in Western Europe of the above-mentioned means pending the outcome of the negotiations. And conversely, the chances will be undermined if such decisions are taken within the framework of NATO." [14]

Although the new Soviet propaganda tack did not alter the outcome of the Nuclear Planning Group meeting at the Hague, it did rekindle doubts about the necessity of an immediate decision on deployment of the missiles in the parliaments of several NATO countries. On November 14, the NPG national members unofficially endorsed the United States' plan to procure and deploy 572 Pershing II and ground-launched cruise missiles in Western Europe. The Netherlands, however, withheld full approval. Noting approval of procurement of the weapons, the Dutch urged that the decision to deploy the missiles be deferred two years, during which the Soviet Union's good faith in negotiating adequate theater nuclear force reductions would be tested.

The near solidarity on the issue expressed at the NPG meeting was not lost on the Soviets. Although Soviet propaganda against theater nuclear force modernization did not slacken in the month between the NPG meeting and the December 1979 meeting of the North Atlantic Council, its emphasis gradually shifted to the possibility of TNF arms reduction negotiations. As the editors of *Soviet World Outlook* later commented:

"Soviet Foreign Minister Gromyko and other Soviet personages fanned out throughout Europe in a last-ditch effort to dissuade NATO from accepting deployment of U.S. medium-range nuclear missiles. However, a marked shift of emphasis from the stick to the carrot suggested that Moscow has already reconciled itself to the positive decision reached by the NATO on December 12 and is now intent upon frustrating implementation of the decision."

During a well-publicized visit to West Germany in late November, Gromyko told reporters that the NATO erred in its view that once it had made the decision to produce the missiles it could then start negotiations with the Soviets. He remarked: "We have openly stated that such a formulation of the matter means political preconditions. This destroys the basis for talks." Gromyko's strong statement was later modified by the Soviet government to fit with Brezhnev statements that an adverse NATO decision would undermine the potential success of future arms control talks.

With just a week to go before the momentous North Atlantic Council decision, the Soviets began a high-profile withdrawal of some 150 men and 18 T-62 tanks (a contingent of the 6th Soviet Tank Division) from East Germany, the first step in their purported 20,000-man troop withdrawal. Western reporters, including television camera crews, were treated to speeches from East German officials decrying NATO's "preparations for war." A day later, in a maneuver that came as somewhat of a surprise to Western observers, the foreign ministers of the Warsaw Pact countries issued a communique appealing for a conference on general disarmament as soon as possible. In a distinct change from the prevailing Soviet propaganda line, the communique implied that European disarmament talks could take place right up to the actual deployment of the new missiles.

On December 12, 1979, the North Atlantic Council endorsed the theater nuclear force modernization program. Only Belgium and the Netherlands withheld full approval. The immediate Soviet reaction was not unexpected. The brunt of the Soviet attack centered on the United States, which was pictured as a villain who had used "arm twisting tactics" on allies unable to stand up for themselves. This interpretation was clearly designed to enlarge the desired split between the U.S. and its European partners.

THE SOVIET PROPAGANDA CAMPAIGN AGAINST TNF MODERNIZATION: GEARING UP IN 1980

Even as the Soviet Union began readying an extensive propaganda effort against NATO's modernization of its theater nuclear forces in late 1979, Western Europe's communist parties were moving to consolidate their influence on the emerging national peace movements. During the last half of 1979, the Dutch Communist Party, whose "Stop the Neutron Bomb" movement had been so successful the previous year, broadened this effort into a new international campaign—"Stop the Neutron Bomb, Stop the Arms of Mass Destruction"—which could target the new NATO theater nuclear forces plan as well.[15] And in West Germany, the Communist controlled Committee for Peace, Disarmament, and Cooperation staged an International Antiwar Day on September 1 which was supported by a variety of groups, including the Association of German Students, Nature Friend Youth, and local organizations of the Young Socialists and the Catholic and Protestant churches, which were to loom large in the "nonaligned" peace marches two years later.

It became clear by mid-1980 that the Communist Party of the Soviet Union had mastered the primary lesson of the "neutron bomb" campaign: that major participation in the disarmament efforts of the CPSU by pacifist, religious, and ecological groups not directly linked to the USSR could assist significantly in influencing popular and government sentiments in NATO countries on nuclear weapons issues. The CPSU could see that two measures were necessary to ensure such broadly based European support: first, to downplay differences between the CPSU and the non-Communist European Left on all non-germane issues, thereby allowing the Soviets and their European Communist allies to embrace the gamut of European leftist groups in the struggle for "peace"; and second, to manipulate carefully in Europe peace themes and popular fears about the dangers of nuclear war in order to bring into the peace movements such groups as alienated young people who would be otherwise leaderless.

This theme was stressed by Bulgarian state and party leader Todor Zhivkov in his address to the World Parliament of Peoples for Peace, in September 1980:

"We must consider the efforts of social organizations and the masses. I am talking about the activities of the World Peace Council, which is the initiator of our present international meeting, and also about the activities of all peace-loving forces. * * *

* * * * *

"To state this objectively, there is no other social movement capable of joining together dozens and hundreds of millions of people, capable of organizing their efforts. * * * For the sake of this glorious goal we must together find the paths leading toward coordination of the joint initiatives of all peace-loving organizations, movements and forces on a national as well as international scale. * * *

"The role of youths and the intelligentsia is essential in the struggle for peace. * * *

"We are called upon to do everything in our power in order to involve the overwhelming majority of youths in the struggle for peace and happiness. * * *" [16]

The World Peace Council came out of its Sofia meeting determined to push at all levels for the adoption of the Soviet sponsored disarmament initiatives during 1981. Increasing popular support for the various European national peace organizations became the WPC's major priority. As the Council's 1981 "Programme of Action" detailed:

"This programme seeks to make 1981 the year of the decisive offensive of peace

forces, to make the 80s the Decade for new victories for peace, for disarmament and detente, for national independence, justice, democracy and social progress.

* * * * *

"The World Peace Council's Programme of Action for 1981 places its main emphasis on common united mass actions by the widest range of forces, campaigns, conferences, seminars and symposia at national levels. It's directed particularly at the strengthening of national and local peace movements." [17]

Communist dominated front organizations were active even then in the anti-TNF modernization effort in West Germany. In November 1980, at the initiative of the German Peace Union (DFU), a long-time Communist front organization, the so-called Krefelder Apell (Krefeld Forum) was promulgated by representatives of the Green Party (Germany's left-leaning ecology party), small trade union groups, the German Communist Party, the German Peace Union, German Evangelical Church groups (particularly the Lutherans), and pacifists and conscientious objectors.[18] The Forum, directed specifically against NATO, called upon the government to reverse its "erroneous and fatal decision" authorizing the stationing of new American theater nuclear weapons on German soil. Among the most prominent participants in the *Krefelder Apell* were Petra Kelly, leader of the Green Party, Pastor Martin Niemoeller, a well-known German theologian and honorary member of the World Peace Council's Presidium, who had been awarded the Lenin Peace Prize by the Soviet Union in 1967, and Major General (Ret.) Gert Bastian, a former Bundeswehr Division Commander who, since retiring, had participated as one of the "Generals for Peace" in the "peace" work of various World Peace Council front groups.[19] Mainly because of its seemingly non-Communist sponsorship, the Krefeld Forum was to prove very successful during 1981—signatures backing the Forum numbered 20,000 by early January and reached a reported 1.5 million by the end of the year.

THE 1981 CAMPAIGN AGAINST TNF MODERNIZATION

Soviet leaders undoubtedly were heartened to see the various national peace movements gearing up in early 1981 for massive protests against the TNF modernization plan. On January 12, 1981, Pravda looked to the possibility of a "mass movement" against missiles in both the Netherlands and Belgium, and the journal, New Times, noted in two January articles the mass campaigns in Italy and the United Kingdom and the increasing level of protests in West Germany.[20]

Needless to say, having done so much behind the scenes to initiate the anti-NATO activities of these groups, the Soviet Union hastened into public print to deny any connection with these efforts. As TASS commentator Vadim Biryukov proclaimed: "The protest against deployment of nuclear missiles in Europe can by no means be presented as a 'hand of Moscow.' Protest is being voiced by politicians, military men, scientists, trade union leaders, peace champions."

The major Soviet anti-TNF effort for 1981 started in late February, following Brezhnev's "peace offensive" speech to the 26th Soviet Party Congress. He declared that there is "currently no more important task on the international plane for our party, our people and all the people of the world than the defense of peace." [21] And although the actual "peace" proposal put forth during the 26th CPSU Congress were really reworked repetitions of older Soviet proposals, Soviet propagandists used them as the basis for their renewed efforts in Western Europe. On March 9, 1981, Soviet ambassadors in the Western European countries presented letters to their host governments from Brezhnev rehashing the proposals in his February speech. [22]

Meanwhile, Soviet "journalists" and "academicians" traveled around Europe providing the CPSU peace propaganda line to Western reporters. One of the most effective of these spokesmen was Georgiy Arbatov, the newly promoted full member of the CPSU Central Committee who is widely viewed in the United States as a shrewd, non-ideological observer of U.S.-Soviet matters. Arbatov's effectiveness as a propagandist and disinformation expert is directly linked to his position as director of the USSR Institute of the United States of America and Canada, an academic research institute subordinate to the Economics Department of the USSR Academy of Sciences. Despite its seeming independence from the formal Soviet propaganda apparatus, the Institute spokesmen who deal with Westerners always place the propaganda value of their comments above other considerations. In addition, the CIA has estimated that some fifteen percent of the identified personnel of the Institute have a current or former intelligence affiliation. Despite this, Arbatov and his colleagues enjoy a measure of credibility with the Western press—even Americans.

Georgiy Arbatov played on two themes in his interviews with Western European reporters—the harmlessness of ongoing Soviet theater nuclear force modernization efforts and the dangers inherent in planned U.S. and NATO efforts to counter them. In a Dutch newspaper interview, Arbatov noted:

"What is the SS-20? A replacement, a modernization of old missiles known in the West as SS-4's and SS-5's. No doubt the new missiles will be a better weapon—I am no military expert—but their function is no different from that of the outdated missiles and the total number will not increase. It is unfair to say that this gives us something which the other side does not have." [23]

And in a Bonn television interview, Arbatov carefully equated the proposed NATO theater nuclear force modernization effort with the Soviet Union's 1962 emplacement of strategic missiles in Cuba and then hinted darkly about the possible consequences of following through with the NATO action.[24]

As the Soviet Union's Euromissile propaganda campaign accelerated, the efforts of all cooperating Soviet State organizations increased dramatically. KGB support tactics were used in ways almost certain to lead to exposure, such as what happened in the Netherlands in April 1981. A TASS "correspondent" named Vadim Leonov was accused of espionage and other activities and was expelled by the Dutch government. It turned out that Leonov had boasted, when intoxicated, of his role in manipulating the Dutch peace movement for Moscow. He had told his listener:

"Do you know that all those well meaning people in the Netherlands are being taken for a ride? They believe that the anti-neutron bomb movement and the reaction against the cruise missiles and other NATO activities have grown out of a pure idealism based on compassion for and concern with the fate of one's fellow man and his children. Oh, if those people just knew that everything is taking place according to a blueprint in Moscow, how they are being manipulated by a small group of communist ideologues who receive their instructions through me.

"If Moscow decides that 50,000 demonstrators must take to the streets in the Netherlands, then they take to the streets. Do you know how you can get 50,000 demonstrators at a certain place within a week? A message through my channels is sufficient. Everything is organized with military precision under the leadership of essentially conscientious objectors. I should know because not only am I daily involved with these clandestine activities, I am also one of those who transmit the orders coming in from Moscow." [25]

During 1981, several other such disclosures of direct KGB involvement were made. In October, the Danish government expelled Soviet Embassy Second Secretary Vladimir Merkoulov for subversive activities, after he had paid Danish author Herlov Petersen $2,000 to buy newspaper ads promoting a "Nordic nuclear free zone." Other Merkoulov-Petersen activities apparently included attempting to influence Danish public opinion-makers by treating them to expensive lunches and gifts. Merkoulov had been working with the Cooperation Committee for Peace and Security, a Danish Communist Party front organization with links to the World Peace Council. And in late November, two Soviet diplomats were up for expulsion from Norway because of their subversive activities. One of them, Soviet Embassy First Secretary Stanislaw Chebotok, had offered money to several Norwegians to write letters against nuclear arms to Norwegian newspapers.[26]

But because accounts of these matters were scattered while the press gave overwhelming attention to the nationalist flavor of many of the European peace groups, no public attempt was made to ask whether such covert Soviet activities were but shadows of a larger Soviet influence on the European disarmament movement.

In April 1981, the World Peace Council held its presidential meeting in Havana, Cuba. At the closing session, Romesh Chandra delivered an address which emphasized the role of mass demonstration in thwarting America's TNF modernization plans for Europe. Chandra also asserted at this meeting that the WPC had reached a "compromise with all political forces, with all governments, with all mass movements, with all organizations, with all workers, with the church, with the youth, with the women, with all existing mass movements."

During the spring and summer of 1981, the Soviet Union continued its overt propaganda for the United States to respond to Brezhnev's "generous" peace proposals. In June, in what apparently was intended as a warning to West Germany about the new missiles, Soviet propagandists reversed the previous decade's low-key propaganda line and accused the Germans of returning to "neonazism and revanchism." Obviously, all was not yet lost in the Federal Republic, since peace forces were increasing their strength there. As A. Grigoryants wrote in Izvestiya:

"A mass-based, truly popular movement against 'arms upgrading' is mounting in the FRG. Over 1 million people have already signed the Krefeld appeal calling on the federal government to reverse its agreement to the deployment of U.S. Pershing II missiles and cruise missiles in the FRG. Fer-

ment is growing in both ruling parties. The SPD's major land and district organizations are demanding that their leaders annul the 'arms upgrading' decision."[27]

Later that month, the Supreme Soviet of the USSR released an "Appeal To the Parliaments and Peoples of the World." It "called on the law-making bodies of all countries resolutely to declare for business-like and honest talks with the aim of preventing a new round of the nuclear arms race."

In July, the CPSU Central Committee sent a messager on the problems of peace and disarmament to socialist and social democratic parties throughout Western Europe: "[O]ur appeal to you is based on the belief that remedying the international situation depends not only on the Soviet Union but also on the will of other states and their political parties and movements and on their willingness to make the necessary efforts to safeguard peace." It went on to note that since the socialist and social democratic parties enjoyed influence among the masses and the trade unions, "the way in which the international situation evolves depends in many respects on the social democrats' commitment. * * *"

The news on August 9, 1981, that the United States would produce and stockpile enhanced radiation warheads caused the Soviet Union to revive its anti-"neutron bomb" agitation. A TASS broadcast the same day proclaimed: "The U.S. administration has taken another extremely dangerous step towards the further spiralling of the arms race and enhancing the threat of nuclear war." And a day later Radio Moscow charged: "The proposed production of that most inhuman weapon of mass destruction signals a new step in preparations for a global nuclear holocaust."[28]

In West Germany, Communist Party chief Herbert Mies called on all German citizens to protest the Reagan Administration's "neutron" decision. In Helsinki, the World Peace Council issued a statement condemning the decision as threatening to accelerate the U.S. arms build-up "to the point of no return." On August 14, the Soviet Committee for European Security and Cooperation called the Reagan decision a threat to Europe and acknowledged its support for mass actions by the Western Europeans against this inhuman weapon. And at sessions of the U.N. Disarmament Committee, delegations from the Soviet Union and a number of Eastern European Countries, including the German Democratic Republic, Hungary, and Czechoslovakia, introduced a proposal calling for the immediate start of debate on the question of drafting an international convention banning production, stockpiling, deployment, or use of the neutron weapons.

By the end of August 1981, Soviet propagandists and their allies effectively had merged the renewed "neutron bomb" agitation effort with the ongoing campaign against NATO's TNF modernization. This proved especially useful in raising the level of fear in Western Europe about the specter of nuclear war.

The culmination of the Soviet Union's 1981 propaganda efforts was the spectacle of massive national peace demonstrations in European capitals in the fall. Soviet propagandists had been anticipating these mass protests for months, and while they had done much to avoid exposing the range of the USSR's support for these peace demonstrations, they had not hesitated to make good use of the KGB's forgery capability to heighten the atmosphere for such protests.

In country after country during 1981, copies of "top secret" U.S. nuclear plans were conveniently "discovered" and passed on to sympathetic newspaper editors. In February, for example, a package containing a collection of documents purporting to be operational plans for American forces in Europe were mysteriously mailed from Birmingham, England, to a variety of Danish politicians and reporters. These documents described targets in Denmark, which supposedly would be bombed in time of war by U.S. forces. At the beginning of August, the Italian weekly *Panorama* published extracts ostensibly from two U.S. military directives—Directive 10-1, which related a plan to transfer special U.S. Army nuclear and chemical weapons units to Europe in emergency situations, and Document 100-7, a supposed Headquarters CINCEUR operations plan, which asserted that the decision to use nuclear weapons in the territories of the European NATO allies would be made by the U.S. Command without consulting the Europeans.[29] While in October, Austrian readers were informed of the finding of U.S. Document 77707/10-70 "in a safe" located in the barracks of a military saboteur training school in Bavaria. This document set forth U.S. plans to target Austrian cities and installations for nuclear destruction.[30] Such Soviet forgeries undoubtedly "took in" a good many unwary readers in Western European countries.

In West Germany the peace protests intensified in late summer. On August 29, 1981, a number of demonstrations were held in various areas. At Pirmasens, in the Palatinate, some 5,000 people protested the stockpiling of U.S. chemical weapons in the region. One of the major speakers was Petra Kelly of the Green Party. In Berlin that same day, about 30,000 people rallied against the neutron weapon and NATO's TNF modernization decision. In addition, groups of 3,000 and 1,500, respectively, demonstrated in Bremen and Hanover. These demonstrations were merely preliminaries to the planned major demonstration.

On September 13, Secretary of State Alexander Haig visited Berlin to meet with leaders and to deliver a foreign policy address on the Soviet threat and European relations. Haig's presence in the divided city was used as pretext for a major disarmament demonstration by the left-wing Young Socialists (Jusos) and some twenty other groups, including the German Communist Party. Planning for the protest had been under the leadership of Jusos chairman, Willy Piecyk. Piecyk had clearly been echoing the Soviet propaganda line when, a few days before Haig arrived, he had remarked to a German reporter that NATO and the United States were steering toward confrontation with the Soviet Union and lowering the threshold of nuclear war by their weapons decisions. The September 13 demonstration by some 50,000 protesters began peacefully but climaxed in rioting in which a small hard-core portion of the participants looted and destroyed property; 251 (police officers and protesters) were injured.

The culmination of the 1981 West German disarmament campaign was for October 10. Organizers for this massive demonstration were chiefly Evangelical Church groups, established disarmament organizations, the German Communist Party, and hundreds of smaller peace, environmental, and Marxist groups.[31] Nevertheless, the FRG's Social Democrat/Free Democrat ruling coalition was most concerned by the participation of left-wing SPD parliamentarians, the most prominent of whom was Erhard Eppler, a member of the SPD Presidium. He announced on September 21 that he would speak at the demonstration and had been sympathetic with the Soviet position on theater nuclear forces for some time. In February 1981 he had told Der Spiegel:

"[I]t was obvious even at the time [when NATO approved TNF modernization] that the U.S. Government would not even dream of entering into serious talks on disarmament of the Eurostrategic weapons. The so-called zero option never existed at any time as far as the Americans were concerned. And now this measure, which was passed off as absolutely necessary for the military balance—whatever you wish to interpret as balance—is being included in a strategy which is no longer aimed at balance but at preponderance."[32]

He had just returned in August 1981 from talks in Moscow with CPSU Central Committee staff members Vadim Zagladin and Valentin Falin asserting that the Soviet Union's SS-20 missiles were not nearly as dangerous as thought in the West. The Soviets were "making intense preparations and they will try to make the best of these [TNF] negotiations" with the United States, even though they doubted that country's good faith.

The planned participation by Eppler and some fifty-eight SPD Bundestag members sparked a sharp vocal reaction from the Schmidt government. On October 2, Peter Corterier, Minister of state at the Foreign ministry, told Bild Am Sonntag that Social Democrats who participated in the so-called peace demonstration would be violating the SPD's irreconcilability resolution which prohibits joint activities with Communists. He went on to say: "Anyone who continues to demonstrate with Communists against the government must ask himself whether he can remain a member of this party." And during the course of a Bundestag debate on the "peace demonstration" on October 9, 1981, Chancellor Schmidt responded: "Unfortunately, it has become quite clear that the organizers—I am referring to the organizers and not to the demonstrators—refused to repudiate a number of supporting communist groups. . . ."

In the end, some 250.000 Germans rallied on October 10 in Bonn, including the large left-wing SPD Bundestag delegation and thousands of rank-and-file SPD party members. The participants listened to speeches castigating the German government for agreeing to NATO's decision to modernize its theater nuclear forces and calling on Germany to repudiate its "colonization" by the United States. The demonstration was a major Soviet propaganda victory. Pravda hailed the German anti-missile movement, which it claimed had reached "Unparalleled proportions," and noted with evident satisfaction that the demonstration was "a manifestation of an emergent alliance of people who are coming to realize, despite all obstacles and difference of their world outlooks, their responsibility for safeguarding world peace." Just the day after the German mass rally, Welt Am Sonntag released news of a recent study by the Federal Office for the Protection of the Constitution ("Security-Endangering Leftwing Extremist Trends in the Struggle for Peace"), which acknowledged that Communist and ecological groups had drawn up a three-year plan for actions against "counterarming"—a plan that included "resistance actions" against

military installations in the Federal Republic.

The peace and disarmament activities in other Western European countries during the summer and fall of 1981 also revealed stage-managing by Communist front organizations. For instance, the largest disarmament demonstration of the summer—the "1981 March for Peace"—consisted of a six-week (late June through early August) "peace walk" from Copenhagen to Paris. It was organized by Women for Peace, a Danish disarmament group claiming to have 500,000 members. The march attracted wide attention in Europe, particularly because many of the participants were colorfully clad young people reminiscent of the "hippies" of the 1960s. What was not revealed at the time, however, was that Women for Peace had strong ties with Denmark's Cooperation committee for Peace and Security, the largest Communist front group in the country. In fact, the two Danish organizations make little effort to disguise their connection, both sharing the same Copenhagen address in Gothersgade—in a building that had earlier housed the Danish-Cuban Friendship Association.[33]

The mass demonstrations in the fall of 1981 varied in the amount of overt Communist participation—from the marches in Paris and Rome, where groups tied to the national Communist parties were the chief organizers, to the demonstrations in London, Brussels and Amsterdam, where the organizing was done by more broadly based groups.[34] Even in the latter cases, the extensive planning and support of Communist influenced or dominated peace groups was noticeable to informed observers. Despite this clear link to Moscow, the protests received massive, favorable press coverage and had a significant impact on European public opinion.

PRESIDENT REAGAN'S ZERO OPTION

On November 19, 1981, President Ronald Reagan, in part to reassure Europe that the United States was determined to undertake serious arms control negotiations with the Soviet Union, delivered a major address on the American program for peace and arms control. In this speech, the President offered to cancel the planned deployment in Europe of new Pershing II and ground-launched cruise missiles if the Soviet Union agreed to dismantle its SS-20, SS-4 and SS-5 missiles already deployed.

This "zero option" proposal was immediately denounced by the Soviet Union. As Sergey Losev wrote in Izvestiya: "Unfortunately, the point at issue is in fact a propaganda 'cushion' designed to soften the unfavorable political consequences of the line pursued by the United States of starting a fresh steep round in the nuclear missile weapons race.* * *"

And not surprisingly, the leadership of a number of the "independent" European disarmament groups criticized President Reagan's zero option in almost the same words as those used by the Soviets. Britain's Campaign for Nuclear Disarmament (CND) warned that the zero option "was mainly about propaganda and not about disarmament." And the main speakers at the second "Krefeld Forum" were equally villifying in their comments. Josef Weber, for instance, exclaimed that there "is no doubt that with his propaganda coup Reagan intends first and foremost to mislead the peace movement rather than to begin serious negotiations."

In late November, Brezhnev visited West Germany. At a dinner given in his honor by Chancellor Schmidt, Brezhnev set forth the latest version of the USSR's TNF disarmament proposal, aimed at preventing the deployment of U.S. Pershing IIs and cruise missiles. The Soviet leader told his audience:

"To facilitate the dialogue and to create a favourable atmosphere for it, we have put forward this proposal: that while the talks continue, both sides should abstain from deploying new and modernising the existing medium-range nuclear means in Europe. * * *

"Besides, as we have informed the federal chancellor today, should the other side consent to the moratorium I have just spoken about, the Soviet Union would be prepared not only to discontinue a further deployment of its SS-20 missiles. We would go even further.

"As an act of goodwill, we could unilaterally reduce a part of our medium-range nuclear weapons in the European part of the USSR. . . . This is a new and substantive element in our position." [35]

Here the Soviet leader was attempting to counter the favorable impression made on Western European leaders by Reagan's zero option. Moscow as claiming to have offered a greater concession. Soviet commentaries in the following weeks stressed that Leonid Brezhnev's proposals were the "genuine 'zero option.'"

Despite Soviet statements about its concessions and the need for balanced negotiating positions, the Soviet leadership continued to depend upon the communists' alliance with the European disarmament movements as the focus of attack against U.S. deployment of the new missiles. In December 1981, International Department Head, Boris Ponomarev, in a speech to an all-union scientific students conference, declared:

"The question of war and peace has advanced into the focus of attention of wide sections of world public opinion. The anti-war movement in Western Europe, and in recent months also in the United States, and a number of other countries reached an unprecedented scale. . . . However, the interests of peoples and the interests of preserving peace call for further deployment of the anti-war movement, since no one has cancelled the U.S. giant military programmes or Reagan's decision to manufacture neutron weapons. * * *" [36]

The need for even greater participation in the efforts of the "peace forces" by people of all backgrounds was echoed by the World Peace Council. The Bureau of the WPC Presidential Committee issued a statement following its January 1982 meeting which noted:

"The WPC calls on all peace movements and all peace workers to redouble their efforts to halt the arms race. * * *

"The WPC, as always, stands ready to encourage and support all initiatives along these lines, wherever and whenever they are undertaken, to have dialogue and to cooperate on an equal footing with all other peace forces." [37]

BREZHNEV'S MARCH MORATORIUM

The Soviet Union's most recent overt propaganda initiative was unveiled on March 16, 1982, in a speech by Brezhnev to the 17th Congress of Soviet Trade Unions. He announced a unilateral moratorium "on the development of medium-range nuclear armaments in the European part of the USSR"—freezing the futher deployment of SS-20 missiles as "replacements" for the older SS-4s and SS-5s. Brezhnev further stated that the moratorium would stay in force either until the United States and the Soviet Union reached agreement on reducing medium-range missiles or until the U.S. began "practical preparations" for deploying Perishing IIs and GLCMs in Europe.

The thrust of the Soviet proposals was well timed to reinforce the growing support in the United States for a nuclear freeze. And although the Reagan Administration has since pointed out the major strategic inequalities inherent in this all-too-obvious Soviet propaganda ploy, the Brezhnev initiative has been given a more than respectful hearing on both sides of the Atlantic.

As it stands now, the Soviet disarmament campaign directed against NATO's deployment of modernized theater nuclear forces is moving ahead on all fronts. The disarmament movement in West Germany held Eastern peace marches in twenty German cities. And the World Peace Council is gearing up its allied "peace forces" for a major push timed to coincide with the U.N. General Assembly's June 7-July 9 Second Special Session Devoted to Disarmament. Clearly, the United States should be attempting to devise a strategy to cope with the increasingly effective mass movement tactics of the Soviet propagandists.

CONCLUSION

Events in the past year demonstrate the effectiveness of the Soviet disarmament propaganda campaign when joined with European peace group efforts. It seems certain that the anti-nuclear sentiment in Western Europe, and now in the United States, will continue to grow unless it is checked by a well-organized counter-effort by the Reagan Administration.

Alerting the European and American publics to the incontrovertible facts of the strategic balance is the vital first step. Soviet propagandists and their allies (witting and unwitting) thrive on the public's ignorance of relative U.S. and USSR military capabilities. Exploiting this ignorance are peace groups on both sides of the Atlantic, which have established firm ties with leaders of the Protestant and Catholic churches and are laying the groundwork for grass-roots campaigns against American nuclear weapons. A massive rally is now scheduled to coincide with the June opening of the U.N. Special Session on Disarmament in New York. The nuclear freeze statements passed recently in several states and in dozens of localities in New England and California testify to the success of the American groups' preliminary organizing efforts.

Blunting the drive of nuclear freeze organizers in this country and of the disarmament movement in Western Europe will require far more than a few speeches by the President and his Secretaries of State and Defense. Needed is an effort at least equivalent to the Carter Administration's SALT-selling campaign of 1979. State, Defense and ACDA must mobilize a corps of speakers to travel to the towns, cities, and campuses across the United States. They must talk to citizens about the realities of the military balance, the questions raised about the Soviet Union's compliance with past arms limitation treaties, and the role that the Soviet propaganda apparatus is playing in the supposedly independent peace movement.

In Western Europe, activities of this sort should be coordinated through NATO and its affiliated public support organizations. It would be extremely useful for NATO delegations to share information concerning the links in their countries between known

Communist front groups and the "independent" peace groups. Such data would permit an overall assessment of Soviet influence on the European disarmament movement.

A U.S. effort of this magnitude will prove difficult to organize and will cost more than the several millions of dollars that the Carter Administration spent in its SALT-selling effort, but nothing less than a major drive to counter the disarmament campaign now under way will be effective. Without such an effort, Washington will find itself increasingly hampered in its plans for strengthening U.S. and NATO nuclear deterrent forces. This deterrent offers the best guarantee of the peace that the disarmament movement so passionately desires. It is for this reason that the Soviet propaganda campaign and its coopting of other groups has become a major threat to peace. It is this story that the Reagan Administration must start telling.

Both Scoville and Barnet have had continuing ties with organizations on the American Left—Scoville has been on the Board of the Center for Defense Information, and Barnet was formerly a co-director of the Institute for Policy Studies. For detailed information on the above-named organizations, see William T. Poole, "The Anti-Defense Lobby: Part I, Center for Defense Information," Heritage Foundation Institution Analysis No. 10, April 19, 1979; and William T. Poole, "Institute for Policy Studies," Heritage Foundation Institution Analysis No. 2, April 19, 1977.

[12] It should be understood that the Soviets have been purposely delaying the retirement of these older missiles, possibly in an effort to use them as bargaining chips in future arms negotiations. Some 140 had been retired by late 1979, but nearly all of these had been targeted on China.

[13] "U.S. May Withdraw 1,000 NATO Weapons," The New York Times, October 26, 1979, p. A6. It was not a new idea. In 1975, Secretary of Defense James Schlesinger unsuccessfully had proposed reducing NATO's stock of obsolescent tactical nuclear warheads.

[24] "[Questioner] If individual West European states deploy missiles within the framework of NATO's decision to counterarm, would this entail sanctions from the Soviet side?

[Arbatov] Oh well, you understand that very serious arms are involved. There is the Pershing II which we can compare—you know with what?—with Soviet missiles stationed in Cuba in 1962. You remember what the reaction of the American's [sic] was at that time.

[Questioner] Yet, Mr. Arbatov, would that lead to a similar situation as in 1962 in Cuba? The missile crisis?

[Arbatov] You know, I do not want to talk about that.

[Questioner] You introduced it yourself.

[Arbatov] I just want to say that the Soviet Union takes it very, very seriously. It would, therefore, be much better to avoid it. . . . But naturally there will be consequences. Naturally it will aggrevate and spoil the situation in Europe." Arbatov interview, ZDF Television Network (Mainz), March 16, 1981, in Foreign Broadcast Information Service Daily Report: Soviet Union, March 18, 1981, pp. G1-G2.

[37] "WPC Bureau Calls for Negotiations, an End to Arms Race," (World Peace Council) Disarmament Forum, Vol. 1 (January 1982), p. 4. Interestingly, two United States Congressmen—Representative John Conyers of Michigan and Representative Gus Savage of Illinois—both members of the Congressional Black Caucus, were active participants in the WPC's Bureau meeting in Copenhagen. See their recorded comments in "WPC Bureau Meeting in Copenhagen Urges: Negotiations, Not Confrontation!" (World Peace Council) Peace Courier, Vol. 13 (January–February 1982), pp. 2–3. In addition, Congressman Savage was one of the honored participants in the Portugese "peace marches" that occurred on January 16, 1982—the same marches over which two Soviet diplomats were expelled from Portugal (see footnote 26). "Portugese Peace Marchers Call for End to Arms Race," Ibid., p. 6.

THE PEACE MOVEMENT AND THE SOVIET UNION

(By Vladimir Bukovsky)

(Peace will be preserved and strengthened if the people take the cause of peace into their own hands and defend it to the end.—Joseph Stalin, 1952.)

The "struggle for peace" has always been a cornerstone of Soviet foreign policy. Indeed, the Soviet Union itself rose out of the ashes of World War I under the banner of "Peace to the People! Power to the Soviets!" Probably from the very first, Bolshevik ideologists were aware of how powerful a weapon for them the universal craving for peace would be—how gullible and irrational people could be whenever they were offered the slightest temptation to believe that peace was at hand.

Only a year before the Bolsheviks raised their banner, the most terrible prospect for any Russian would have been to see an enemy burning down his villages and defiling his churches. Yet once blinded by the slogan. "A just peace without annexations or tribute," he was to rush from the front lines, along with hundreds of thousands of his fellow soldiers, sweeping away the last remnants of the Russian national state. He did not want to know that his desertion had done no more than simply prolong the war for another year, not only condemning thousands more to death on the Western front, but ending in that very German occupation of the Ukraine and Russia he had so much dreaded just a year ago. For the moment the only thing that mattered was peace—right now, and at any price.

Hardly anyone taking part in the stampede back home in 1917 knew the first thing about the ideology of Communism—except possibly for a couple of simple slogans and this one incendiary word: Peace. In a country of 70 million there were only 40,000 Communists. Anyone who had taken the trouble to read the Communists' "fine print" with just a little care could have discovered that what their soon-to-be masters meant by "peace" was not peace at all but rather the "transformation of imperialist war into civil war."

The Russian people were in any case so fed up with the war by then that they did not care. Anything seemed better, or at least not worse. After three years of civil war, however, in which some 20 million people were slaughtered or died of starvation, cold, and typhoid (i.e., ten times as many as were killed at the front during the whole of World War I), the war came to seem a trifle by comparison, a sort of frontier skirmish somewhere in the Byelorussian swamps.

And once again an irresistible craving for peace drove people to accept Soviet rule—as a lesser evil. Anything was now preferable to this monstrous slaughter, starvation, and typhoid. They would give anything for some kind of order.

The order imposed by the Communists was nothing more than a permanent state of civil war, both inside the country and around the world. Or as Lenin put it, "As an ultimate objective peace simply means Communist world control." Thus, while comrade Chicherin, at the Conference of Genoa in 1922, was appealing to the entire world for total and immediate disarmament, crowds of bewildered people in the Soviet Union were marching to the cheerful song:

We'll fan the worldwide flame,
Churches and prisons we'll raze to the ground.
The Red Army is strongest of all
From Moscow to the British islands.

Indeed, the churches were the first to be put to the torch, As for the prisons, the Communists were in no hurry to carry out their bold promise. Quite the contrary, the number of prisons grew with each year to accommodate tens of millions of "class enemies" or "enemies of the people." And speaking of worldwide flame, one need only compare the map of the world of, say, 1921 with that of 1981 to see that the song's promise was not entirely empty.

Once they recognized the power of "peace" as a weapon, the Communists have never let go of it. In this respect, it must be admitted, Soviet politics have invariably been most "peaceful." We must at the same time bear in mind that according to Communist dogma, wars are the "inevitable consequence of the clash of imperialist interests under capitalism," and therefore they will continue to be inevitable as long as capitalism exists. The only way to save humanity from the evil of wars, then, is to "liberate" it from the "chains of capitalism." Accordingly, there is a very precise distinction to be made between "just wars" and "unjust wars." "Just wars" are those fought "in the interests of the proletariat." It is perfectly simple and perfectly clear: just wars are absolutely justifiable because they lead to the creation of a world in which there will be no wars, forevermore. Proletarians are all brothers, are they not? So, once the world is rid of capitalists, imperialists, and various other class enemies, why should those who are left fight one another?

By this same impeccable logic, the interests of the proletariat are best known to the advance-guard of the proletariat, that is, the Communist party, and should be defined by Lenin, Stalin, Khrushchev, and Brezhnev, since they are in turn the advance-guard of the Communist party.

As soon as we have pinned down this formula and deciphered its terminology, the course of history becomes absolutely clear. For instance, Soviet occupation of the Baltic states and Bessarabia, or the war with Finland in 1939–40, were of course perfectly just, as was the partition of Poland, achieved in cooperation with Nazi Germany in 1939. On the other hand, the Nazi attack on the Soviet Union in 1941 was blatantly unjust. By the same token, any attack by the Arabs on Israel is just, at least insofar as it is successful. If Israeli resistance to attack is successful, however, then all peace-loving peoples must protest.

It goes without saying that world public opinion must accept the distinction I have outlined above and direct every effort in the struggle for peace toward establishing it. Fortunately, there are a great many "progressive" people in the world, people for whom any direction taken by Moscow is progressive because by definition it is taken in the service of socialism. Thus, before the Molotov-Ribbentrop pact of 1939 was signed, the energies of all progressive people were mobilized against fascism, whether in Spain, Italy, or Germany. As soon as the pact was signed, the notion of what was progressive and what was not changed drastically.[1]

On February 2, 1940, for example, the German Communist leader, Walter Ulbricht, later to become head of the East German state, was permitted by the Nazi government to publish an article in *Die Welt* in which he said: "Those who intrigue against the friendship of the German and Soviet peoples are enemies of the German people and are branded as accomplices of British imperialism."

The British *Daily Worker* adopted a similar line and greeted the new alliance as a victory for peace, as did the American *Daily Worker,* On September 19, 1939, when the was was raging in Poland, it published a declaration of the National Committee of the American Communist party proclaiming the war declared by France and Britain on Nazi Germany to be an imperialist (that is, "unjust") one, which should be opposed by the workers. This appeal was immediately supported by fellow-travelers like Theodore Dreiser, and Communist trade unions set out to sabotage production in munitions fac-

[1] Much of the material that follows here on the early days of World War II is taken from the book by Nikolai Tolstoy, *Stalin's Secret War* (1981), where the appropriate references can be found.

tories, lest any aid reach Britain or France. Right up to the eve of the Nazi invasion of Russia, Communist propaganda did everything possible to dissuade the United States from helping the European democracies in their war against Nazi Germany. These pages in the history of the glorious "struggle for peace" by the progressive social forces are not much spoken of any more, particularly where the young might hear.

But nowhere was this "struggle for peace" as influential as in France, where the Communist party and its fellow-travelers were openly defeatist before, and remained so during—and some time after—the Nazi invasion of France. The French Communist party, which was quite considerable in strength, worked so energetically to undermine the French war effort as to suggest a fifth column. Within a month of France's declaration of war the party's leader, Maurice Thorez, fled to Moscow to direct the resistance to French preparations against Germany. In November 1940 Thorez and his associate Jacques Duclos exulted openly over the fall of France, Thorez declaring that "the struggle of the French people has the same aim as the struggle of German imperialism."

The Franco-German alliance alluded to by Thorez expressed itself in concrete terms. German propaganda leaflets dropped over the Maginot line pointed out that "Germany, after her victory over Poland and since her pact with Russia, disposes of inexhaustible resources in men and material," while all the Communist deputies petitioned President Herriot to make peace in response to Hitler's appeal. After Communist publications had been suspended by decree in France, the party continued to publish its propaganda on German presses. Its leaflets urged troops, dockers, and others engaged in essential war work to resist and to sabotage the country's effort. In March 1940, a party leaflet claimed that the Allied failure to launch an offensive was due to the effectiveness of the party's defeatist propaganda. And there can be no doubt that this effective spreading of defeatism, coupled with a serious campaign of sabotage in munitions factories, played a major role in the catastrophic French defeat of June 1940.

At the very time that General de Gaulle, in London, was issuing his appeal for resistance, the French Communist paper *l'Humanité* said: "General de Gaulle and other agents of British capital would like to compel Frenchmen to fight for the City. . . ."

Later Khrushchev was to recall that "Stalin once told me that Hitler had sent a request for a favor through secret channels. Hitler wanted Stalin, as the man with the most authority and prestige in the Communist world, to persuade the French Communists not to lead the resistance against the German occupation of France." Evidently Hitler's request was not denied.

Even in Yugoslavia, where the Communist movement had directed all its efforts to vilifying the British and French, Tito's first appeal for a struggle against the German invaders did not come until June 22, 1941. It was not the German conquest of Yugoslavia that aroused his ire, but the German invasion of the Soviet Union. Even in far-off Buenos Aires, a British diplomat had noticed that Nazi diplomats were "collaborating with local Communists in a very dangerous attempt to win over the masses with the cry of 'away with British capitalism and commercial exploitation.'"

As soon as Nazi Germany turned against its great Eastern ally, the "struggle for peace" was instantly terminated. Indeed, the sudden outburst of patriotism among the "progressive social forces" was remarkable. No strikes, no condemnation of Western imperialism—as if the latter had never existed. For the remainder of World War II the Allies were to enjoy a happy time of industrial peace and a relaxation of the class struggle. The war, of course, was now a "just" one.

Oddly, the passion for peace was resurrected shortly after the war was over, while the Soviet Union was swallowing a dozen countries in Central Europe and threatening to engulf the rest of the continent. At that time, some "imperialist warmongers" were sounding the alarm over Soviet conduct and even suggesting the creation of a "very aggressive" NATO alliance. The "reactionary forces" in the world were starting a "cold war." Beyond this, the Soviet Union was troublesomely lagging behind the U.S. in the development of nuclear weapons. For some curious reason, however, the "imperialist military-industrial complex"—all those Dr. Strangeloves—failed to drop the atom bomb on Moscow while they still enjoyed a monopoly on it. This should undoubtedly be ascribed to the success of a great movement of peace-lovers. How could it be explained otherwise, short of the reactionary suggestion that NATO generals were not in the least aggressive?

In any case, members of the older generation can still remember the marches, the rallies, and the petitions of the 1950's (particularly the famous Stockholm Appeal and the meetings of the indefatigable World Peace Council). It is hardly a secret now that the whole campaign was organized, conducted, and financed from Moscow, through the so-called Peace Fund and the Soviet-dominated World Peace Council—where a safe majority was secured by such figures as Ilya Ehrenburg, A.N. Tikhonov, etc. This was the period when comrade Stalin presented his memorable recipe for peace that is the epigraph to this article. Stalin's formulation was enthusiastically taken up by millions, some of them Communists, some loyal fellow-travelers, a number of them muddleheaded intellectuals, or hypocrites seeking popularity, or clerics hungry for publicity—not to mention professional campaigners, incorrigible fools, youths eager to rebel against anything, and outright Soviet agents. Surprisingly, this odd mixture constitutes a fairly sizable population in any Western society, and in no time at all the new peace campaign had reached grandiose proportions. It became fashionable to join it and rather risky to decline.

The purpose of all this peace pandemonium was well calculated in the Kremlin. First, the threat of nuclear war (of which the Soviets periodically created a reminder by fomenting an international crisis) combined with the scope of the peace movement should both frighten the bourgeoisie and make it more tractable. Second, the recent Soviet subjugation of Central European countries should be accepted with more serenity by Western public opinion and quickly forgotten. Third, the movement should help to stir up anti-American sentiment among the Europeans, along with a mistrust of their own governments, thus moving the political spectrum to the Left. Fourth, it should make military expenditures and the placement of strategic nuclear weapons so unpopular, so politically embarrassing, that in the end the process of strengthening Western defenses would be considerably slowed, giving the Soviets crucial time to catch up. Fifth, since the odd mixture of fools and knaves described above is usually drawn from the most socially active element in the population, its activism should be given the right direction.

The results were to exceed all expectations. Soviet money had clearly been well spent. The perception of the Soviet Union as an ally of the West (rather than of Nazi Germany) was still fresh in peoples' minds, which undoubtedly contributed to the success of the "struggle for peace."

Subsequently, the death of Stalin, the shock created by the official disclosure of his crimes, the Khrushchev "thaw" in international relations, and, above all, the fact that the Soviets had caught up with the West in nuclear weapons, were to make the peace movement temporarily redundant; it ceased to exist just as suddenly as it had once appeared. Meanwhile, the inefficiency of the Soviet economy once again brought it to the point of collapse. The Soviet Union badly needed Western goods, technology, and credits. Without these, there would have to be very substantial economic reform, dangerous to continued party control over the entire economic life of the Soviet Union. At the same time it was from the strategic point of view important for the Soviets to legitimize their territorial holdings in Eastern Europe and to secure for themselves the freedom to move further. Something new was called for. Out of the depths of the Kremlin, the doctrine of détente was born.

Though the peace movement was put in cold storage, the issue of peace was nevertheless central to this new Kremlin policy as well. The West had grown so exhausted by the constant tension of the previous decades that the temptation to relax, when offered by the Kremlin, was simply irresistible. And after a decade of a ruthless "struggle for peace," no Western government could get away with rejecting a proposal to limit the arms race—however well some of them understood that it would be senseless to try to reach an agreement with the Soviets while the essentially aggressive nature of Communist power remained in force. Probably some such recognition explains why the Western governments insisted on linking participation in the Helsinki agreements to the observance of human-rights agreements inside the Communist bloc. Their idea was to force the internal relaxation of the Soviet regime and to make it more open and less aggressive. In exchange the West provided almost everything Brezhnev demanded in his "Peach Program" of the 24th Party Congress in 1971. "The inviolability of the postwar frontiers in Europe"—that is, the legitimation of the Soviet territorial annexations between 1939 and 1948—as well as a substantial increase in economic, scientific, and cultural cooperation were solemnly granted by the Western countries in Helsinki in 1975. Earlier a separate treaty had perpetuated the artificial division of Germany without even a reference to the Berlin Wall.

The Western democracies had displayed such readiness to accommodate their Soviet partners that their behavior was perceived as weakness. Probably the most disgusting features of détente could be seen in Germany where the "free flow of people and ideas" had very quickly degenerated into trading people like cattle, the right to visit one's relatives in the East becoming a kind of reward conditional on the "good behavior" of the West German government. By playing on this sensitive issue the Soviets

were able to blackmail the whole country and to "modify" the policies of its government. Unfortunately, Germany is a key factor in East-West relations because in order to avoid a major split in the Western alliance the other members have to adjust their positions in accordance with Germany's. So it was that Soviet influence came to be exerted through the back door, and the West was politically paralyzed.

In addition, far from making the Soviets more dependent—as the proponents of détente had assured us—increased trade, and particularly huge Western credits, have made the West more and more dependent on the Soviet Union. The dimensions of this disaster became clear only recently, when the discussion of economic sanctions against the Polish military rulers and their Soviet masters revealed the inability of the Western countries to reduce once-established economic relations with the Eastern bloc without harming themselves even more. In fact, by now the Soviets are in a position to threaten the West with economic sanctions. Undoubtedly, they will take advantage of it very soon.

In the meantime, far from relaxing internally, the Soviet regime had stepped up its repressive policies, totally ignoring the weak Western protests against Soviet violations of the human-rights agreements. The weakness of these protests had in turn served only as further incitement for the Soviets to proceed in their course of repression without restraint. Clearly, then ideological war waged by the Soviets through all those earlier years had only increased in intensity during the era of détente. Nor did they try to camouflage this warfare. On the contrary, Leonid Brezhnev stated openly in his speech to the 25th Party Congress, on February 24, 1977: ". . . it is clear as can be that détente and peaceful coexistence relate to interstate relations. Détente in no way rescinds, or can rescind, the laws of the class struggle."

Furthermore, as it transpired, instead of reducing their military expenditures and arms build-up, as the Western nations had during those years, the Soviet Union, taking advantage of Western relaxation, had significantly increased its arsenal. So much so that if in the 1960's it could be said that a certain parity between East and West had been achieved, by now the Soviets have reached a point of clear advantage over the West. We also now know that the benefits to the Soviet Union of trade with the West were invariably put to military use. For example, the Kama River truck factory built by Americans in the 1970's has recently begun manufacturing the military trucks that were observed in action—during the Soviet invasion of Afghanistan.

By the end of the 1970's the West was becoming increasingly aware of these dangerous developments. The usefulness of détente, long challenged by some, was now being questioned by many. And then came the final blow—on Christmas 1979. Just at the moment when most people in the West were preoccupied with such things as Christmas cards and presents, something like 100,000 Soviet soldiers moved in to occupy neighboring Afghanistan, an officially "nonaligned" country with a population of about 17 million. The world was shocked and the USSR was immediately placed in isolation. Even the Communist parties of many countries condemned the Soviet action as a piece of blatant aggression. The invasion of Afghanistan, followed by the arbitrary banishment to internal exile of Nobel laureate Andrei Sakharov, followed still later by the threatening of Poland (leading, finally, to the imposition of martial law), virtually terminated the era of détente.

This termination has cost the Soviets dear. In fact, they have lost almost everything they had gradually managed to gain while the West was enjoying its bout of unilateral relaxation. Ratification of the SALT II agreement was suspended indefinitely. The Americans were awakened from their prolonged lethargy to discover with horror how weak, ineffective, and unproductive their country had become. In this new psychological atmosphere, the victory of Ronald Reagan was inevitable, promising an end to American defense cut-backs, the deployment of a new, previously shelved, generation of weapons like the B-1 bomber, the cruise missile, the MX, and the neutron bomb. It seemed equally inevitable that the military budgets of all the other Western countries would be increased, while the trade, technology, and credit arrangements with the Soviets would be reduced, or at least be made more difficult to obtain.

Thus, if this trend were to continue, the Soviets would lose their position of military superiority—especially in view of the fact that their economy is so much less efficient than that of "rotten capitalism." Add to this the new wave of international hostility noticeable especially in the Muslim world (the United Nations General Assembly voted against the Soviets on Afghanistan, for the first time since the Korean war), a continuing crisis in Poland, a hopeless war in Afghanistan, and a growing unrest among the population at home caused by food shortages, and the picture grew so gloomy as to be just short of disaster. Clearly the Soviet rulers had to undertake something dramatic to avoid a total catastrophe.

I myself, to tell the truth, was not very much surprised when suddenly, within a year, a mighty peace movement came into being in Western Europe. Especially since, by some strange coincidence, this movement showed itself first of all precisely in those European countries where the old missiles were to be replaced by newer Pershings and cruise missiles. I make no claim to special prescience; it is just that after 34 years of life in my beloved Communist motherland, I have some sense of its government's bag of tricks, pranks, and stunts. In fact, it was not a very difficult thing to predict, for the Soviet state is not a particularly intelligent creature. If you think of it rather as a huge, brainless, antediluvian reptile with a more or less fixed set of reflexes, you cannot go far wrong. "Well, here we are, back to the 1950's again," I thought to myself.

What was much more amusing to observe was the ease with which presumably mature and responsible people had by the thousands fallen into the Soviet booby-trap. It is as if history were repeating itself before our eyes, offering us a chance to see how the Russian state collapsed in 1917, or how France collapsed within one month in 1940. It is also quite amusing, if one has a taste for such amusement, to be reminded of how people are practically incapable of deriving any useful knowledge from even the recent lessons of history. Once again, the universal craving for peace right now, this very moment, and at any price, has rendered people utterly illogical and irrational, and left them simply unable to think calmly. Their current arguments, if one may call them that, are so childish, senseless, selfish, that an involuntary smile comes immediately to one's lips. Even at best what one hears is a parroting of the kind of old moldy Soviet slogans and clichés that even schoolchildren in the Soviet Union would laugh at.

To begin with, why is it that everyone has suddenly begun to be so apprehensive about nuclear war again? What has happened to make it more real than it was, say, two or three years ago? The entire history of East-West relations shows that the only way to force the Soviets to respect agreements is to deal from a position of strength. So are we to understand that because the Soviets might cease to be militarily superior to us, nuclear war is once again a reality? Should we, then, take this proposition to its logical conclusion and say that the only guarantee of peace is Soviet military superiority?

Meanwhile, countless TV programs have suddenly sprung up that unfold before us images of the great treasures of our civilization—paintings, sculptures, pyramids, antiquities, etc.—and at the end of each the narrator reminds us, his voice trembling with noble passion, how terrible it would be if all these treasures were to be destroyed along with the great civilization that produced them. And on other channels, we are treated to documentary after documentary about nuclear explosions and the consequences of radiation. After such relentless, programming, naturally public-opinion polls show a sudden increase in the number of those who believe that nuclear war is imminent.

Then there is the catchy new idea that "Our deterrent does not deter anymore," Why? Has a nuclear war begun already? Have the Soviets attacked any NATO country? Or is it simply because those who like to say the deterrent no longer deters have seen their full quota of televised nuclear explosions?

It is so easy to start a panic. The question is: who is served by the is panic? The Soviet-controlled World Peace Council declared in 1980 (and the whole European peace movement repeats it as if under a hypnotic spell): "The people of the world are alarmed. Never before has there been so great a danger of a world nuclear holocaust. The nuclear arms build-up, the accumulation of deadly arsenals, has reached a critical point. Further escalation in the arms build-up could create a most dangerous situation, facing humanity with the threat of annihilation."

Never before. But was not the world in as much danger a year earlier? The leaders of the European peace movement themselves claim that the nuclear potential accumulated on both sides is sufficient for them to destroy one another ten times. Is there any technical reason why "twenty times" is more dangerous than, say, "five times"? Or is it that, like a nuclear charge itself, the accumulation must reach a "critical mass" in order to explode?

Somehow, in the midst of all this nuclear hysteria it seems to be totally forgotten that bombs themselves are quite harmless, unless somebody wishes to drop them. So why are we suddenly alarmed by the stockpile of hardware and not by the Soviet military move toward the Persian Gulf?

Again, quite suddenly, voices begin to cry out in a huge chorus, "Nuclear weapons are immoral!" Wait a minute. Did these weapons just become immoral? Are conventional weapons moral? Why should this idea come all at once into the minds of so many people? Take as another example the question of the new missiles to be deployed in Europe. Why is it more dangerous to replace the old missiles with the new ones than to

leave the old ones where they are? Are not the old ones equipped with nuclear warheads as well? To be sure, the new missiles are more accurate. So what? We can thank God that they are on our side. They may make life more difficult for the Kremlin adventurers, but why should millions of people in the West perceive that as a tragedy and danger?

Deep in their hearts most of these terrified people have a very simple answer to all these "whys." They know that the only real source of danger is the Soviet Union and that anything which might make the Soviets angry is dangerous for that very reason. But fear is a paralyzing and deranging force. So deranging as to lead some people to advocate the abolition of the police because the criminals are becoming too aggressive.

Indeed, the most amazing aspect of the present antiwar hysteria—aside from the fact that it has arisen at a time so remarkably favorable for Moscow—is the direction of the campaign. Millions of people in Great Britain, Germany, Holland, Belgium, France, and Italy, supposedly of sound mind and with no evidence of the influence of LSD, march about claiming that the threat of war comes from . . . their own governments and the government of the U.S.! A psychoanalyst might characterize this behavior as the Freudian replacement of a real object of fear with an imaginary one. Except that even a psychoanalyst might conclude that pro-Soviet propaganda had something to do with the delusion in this particular case.

The facts are too obvious to discuss here. One may like or dislike President Reagan or Chancellor Schmidt, but unlike comrade Brezhnev, they were elected by the majority of their respective populations and are fully accountable in their actions to the parliaments and to the people. They simply cannot declare a war on their own. Besides, it is quite enough to look around to see the real source of aggression. Was it American or Soviet troops who occupied half of Germany and built a wall in Berlin? Is it not the Soviets who still occupy Hungary, Czechoslovakia, the Baltic states, not to mention Afghanistan, very much against the wishes of the people in these countries? Was it East or West German troops who took part in the occupation of Czechoslovakia and who are prepared to invade Poland?

Everything in the West is done quite openly—one might say, far too openly. But what do we know about the decisions made by 14 old fools in the Politburo whom nobody ever elected to make these decisons and whom nobody can call to account? No press is allowed to criticize them, no demonstrations to protest against their dictate. Anyone refusing to obey their secret orders would instantly disappear forever. There is in fact very little difference between the Soviet system and that of Nazi Germany. Is there anyone who supposes that he should have trusted Hitler more than the democracies?

After the experience of speaking several times with members of the current European peace movement, however, I know only too well how futile is the recourse to rational argument. They announce unabashedly that there is no Soviet military superiority. It is all, they say, CIA propaganda; the only reliable source of information as far as they are concerned seems to be the KGB. They refer one to the findings of a certain Stockholm International Peace Research Institute, leaving one to guess at the kind of methods employed by this institute for assessing the Soviet arsenal. Since the Institute has no satellites at its disposal, its "researchers" are undoubtedly left in a painful dilemma: whether to obtain their information from the blue sky, or from the Sputniks. Nobody in the European peace movement, it seems, has ever wondered about the reliability of this obscure establishment.

But this is just a trifle. More seriously, our peace-lovers—repeating word for word an old *Pravda cliché*—maintain that the "crazy American generals" are so trigger-happy as to push the button just for the fun of it. I have never been able to understand why generals must invariably be crazy—American generals, of course, not the Soviet kind, who seem to have some innate immunity from craziness—and if they are crazy, why they did not push the damn button long ago. In any case, it is hard to imagine that the generals, who at least have some technical education, are less equipped to understand nuclear problems than the primary-school teachers who are so heavily represented in the peace movement.

Some of the "peace-makers" sincerely believe that as soon as the West disarms itself, the Soviets will follow suit, and with an almost literally incredible naiveté they urge us to "try" this suicidal experiment. Others, far more sophisticated, know perfectly well that their Soviet comrades need to gain time so as to enjoy a more advantageous posture in future negotiations with the Americans. What they urge is that the West start negotiations first and improve the Western position later. Still others are more candidly selfish and object only to the deployment of nuclear weapons near their own village, so to speak—as if being protected is more dangerous than not being protected. Or better still, as if any single village, city, or country could maintain neutrality during a nuclear war. "Let the Americans fight the Russians," they say, implying that the entire problem of the modern world grows out of some stupid far-off quarrel between "Americans and Russians," who are apparently in some kind of conspiracy to destroy the poor Europeans. Surely if comrade Brezhnev promised to respect the "nuclear-free zones" in case of war, people could heave a sigh of relief and go to sleep untroubled. If Brezhnev says so, there will be no nuclear-armed submarines off your shores. After all, has comrade Brezhnev ever broken his word? Of course not. He is an honest man. He is so honest he can even guarantee you in what direction the contaminated clouds will move and locate for you the radioactive fallout. "Why should the Russians attack us, if we are disarmed?" Why indeed? Ask the Afghan peasants, they would probably know the answer.

There is no sense in rehearsing all the various "peace arguments," so contradictory and even incompatible that one wonders how those who make them manage to get along together in the same movement. Only one thing these various strands have in common: panic, and a readiness to capitulate to the Soviet threat even before such capitulation is demanded. Better red than dead. That is why current Soviet propaganda has so quickly become so remarkably successful.

Indeed, it is difficult to imagine a more openly pro-Soviet line than that of the European peace movement. It is even more pro-Soviet than that of the local Communist parties, who after all at least have to camouflage themselves with a cover of independence from Moscow. Nothing is more obvious, for example, than that the present increase in international tension was brought about by the Soviet invasion of Afghanistan. There is hardly a country, a political party (including some Communist parties), or an international organization that did not condemn the Soviet aggression unequivocally. The only public movement in Western Europe that never condemned the invasion, paradoxically, is the one that calls itself the "peace movement." No such condemnation has ever been pronounced at a peace-movement rally in Western Europe, or passed as a resolution, or published in one of the movement's major publications, or circulated as a mass petition. Perhaps you will imagine that the peace groups condemned the invasion in their hearts? On the contrary, the evidence is far more convincing that they simply justify this international crime.

Not long ago I myself was publicly charged by the leaders of the British Campaign for Nuclear Disarmament (CND) with having distorted their position on Afghanistan. Therefore I find it particularly useful to quote from an official CND booklet, *Why We Need Action, Not Words,* by Betty England: "The intervention in Afghanistan may well have been caused partly by the Soviet Union's fear of its growing encirclement. The fear cannot be called unreasonable after Sir Neil Cameron's statement in Peking . . ." (p. 12). In other words, the poor Russians whom Sir Neil, Marshal of the Royal Air Force, so frightened with a speech critical of them, must have good reason for what they do. By this logic, we ought to be imposing strict censorship on anti-Soviet speeches lest we be faced with Soviet occupation of the entire world. But the implications are even more important. The idea buried in Miss England's passage is that the only way to keep the peace is gradually to accept the Soviet system and Soviet demands.

Even more outspoken than the CND is the World Peace Council. Its booklet, *Program of Action 1981,* contains a direct instruction to support the present puppet government of Afghanistan (p. 25). This program was *unanimously* adopted in 1980 by a gathering in Sofia, Bulgaria of representatives of most of the peace groups (about this gathering, more later). After this it comes as no surprise that at the recent International Peace Conference in Denmark it was decided to convene the next meeting in Kabul, the capital of Afghanistan, within six months.

It is obvious that a Soviet invasion of Poland would bring us closer to world war, or, to be more precise, would make any real relaxation of international tension quite impossible for ten or fifteen years. And once again, the only public movement that has never condemned the continuous Soviet threat to Poland (and is still uncertain about its reaction to the Soviet-dictated imposition of martial law) is the peace movement. The leaders of the biggest British peace group, CND, went even further, publicly praising themselves for not "overreacting" to the events in Poland (B. Kent, letter to the London *Times,* December 9, 1981) only a few days before the imposition of martial law, and displaying their "impartiality" by equating the Polish crisis with that in East Timor. Perhaps the leaders of the movement seeking to promote peace in Europe should be reminded that in 1975 the 35 countries of Europe, together with Canada and the U.S., solemnly recognized an inseparable link between security in

Europe and respect for human rights in the participating countries. Should we assume that the CND leadership refuses to accept the Helsinki agreement, or are we to conclude that it is indifferent to the question of European security?

At least about Poland not all in the movement can be accused of indifference. I have, for instance, never heard of a case in which a representative of the Chilean or Argentinean government was invited to expound his government's views before any international peace conference. But for some strange reason, an exception was recently made for a representative of the Polish junta, who was invited by the World Peace Council to address the International Peace Conference in Denmark. His vicious lies about Solidarity and personal slanders against Lech Walesa (see the *Guardian*, January 11, 1982) were greeted with hearty applause by the peace-lovers (BBC report).

It is simple common sense to try to restrain both sides of any would-be conflict if one wishes to preserve peace. But the European peace movement is so remarkably unilateral that it seems barely conscious of "the other side." It cries shame on the Americans for as yet nonexistent weapons like the neutron bomb, or the not-yet-deployed cruise and Pershing missiles, but speaks only in whispers, if that, of the hundreds of Soviet SS-20's already aimed at Europe.

Since, again, I have provoked an angry reaction from the CND leaders for pointing out this particular instance of extreme unilateralism (London *Times*, December 9, 1981), I looked through the major CND publications once more. The booklet by Betty England quoted above does not contain a single mention of the SS-20's, though it is virtually saturated with the names of American missiles. Nor does a widely distributed report on the CND annual conference of 1981 (the latest to my knowledge), nor the official CND leaflet, *Nuclear War and You*, dropped into my mailbox by some caring hand. Only recently I have learned that a decision to mention the SS-20 was finally taken by CND after many heated debates and very much against the wishes of the CND leadership, many of whom are also members of the British Communist party.

Oddly enough, there are many in the European peace movement who have worked (some still do) with Amnesty International in support of prisoners of conscience in the Communist countries. Unfortunately, this by itself does not seem to prevent one from making dangerous political mistakes, nor, to judge from the results, does it guarantee any moderating influence on the movement's leadership. Be that as it may, the fact is that the European peace movement (including its large constituent organizations) has never said a word in support of the thousands of people in the USSR who are imprisoned for opposing aggressive Soviet policies, for refusing to serve in the army on errands of aggression, or to shoot civilians in Afghanistan. During all the time that hundreds of thousands of "peace-lovers" were noisily expressing their one-sided feelings on the streets of London, Bonn, Amsterdam, and Brussels, not one word was said about Sakharov, still in exile and on a hunger strike—Sakharov, who has done more than anyone in the world to halt nuclear testing. These peaceful souls would happily throw stones at General Haig, but they would welcome Marshal Brezhnev with servile smiles.

This is not to deny that there are plenty of well-intentioned, and genuinely concerned and frightened people in the movement's ranks. I am certain that the overwhelming majority of them are. Just as it did in the 1950's, the movement today probably consists of the same odd mixture of Communists, fellow-travelers, muddleheaded intellectuals, hypocrites seeking popularity, professional political speculators, frightened bourgeois, and youths eager to rebel just for the sake of rebelling. There are also the inevitable Catholic priests with a "mission" and other religious people who believe that God has chosen them to make peace on earth right now. But there is also not the slightest doubt that this motley crowd is manipulated by a handful of scoundrels instructed directly from Moscow.

In fact, just as this essay was going to press, John Vinocur reported in the New York *Times* (April 6, 1982) "the first public substantiation from inside the antinuclear movement . . . that the West German Communist party, at the direction of the Soviet Union, has attempted to coopt public sentiment against nuclear weapons." The environmentalist party known as the Greens "charged that the West German Communist party, which is aligned with Moscow, dominated and manipulated a meeting [in Bonn] Sunday [April 4] in which representatives of 37 groups, describing themselves as elements of the antimissile movement, planned a major demonstration against President Reagan when he visits Bonn . . . June 10." The Greens, who participated in the meeting, acknowledge that they themselves have cooperated with the Communists "on certain local issues," but what happened in Bonn was "scandalous" even to them. "The Communists dominated the meeting completely. It took place under seemingly democratic rules, but that was a joke. We could barely get a word in." The meeting—at which were represented such groups as the German Student Federation, the Evangelical Student Committee, the Federation of German Youth Groups, and the German Peace Society—rejected resolutions condemning Soviet interference in Poland and Soviet intervention in Afghanistan, and the delegates refused to express support for Solidarity. "They adopted, however, by a large majority, a motion condemning United States actions in Central America, the Middle East, southern Africa, and other regions."

Earlier, as I was in the process of writing this essay, news came that one of the Danish leaders of the movement, Arne Petersen, was arrested along with his wife for channeling Soviet money into the funds of the peace movement. His master, the Second Secretary of the Soviet embassy in Copenhagen, was expelled from the country. Now and then we hear about subsidized trips taken by peace activists to the best Soviet resorts where they are wined and dined royally—and, of course, shown kindergartens, schools, and hosptials (no munitions factories).

The majority of the European peace movement is undoubtedly not aware of these facts. Probably they will ignore the charges of the Greens, just as they missed the reports of Mr. Petersen's activities, which involved placing paid advertisements (out of Soviet donations) for the Danish peace movement in the Danish papers, ads signed by a number of prominent Danish intellectuals (who for sure knew nothing about it). And even our angry CND leaders "know nothing of the subsidized trips to Soviet resorts" (London *Times*, December 9, 1981). Well, sometimes it is very comfortable—even for professional intellectuals—not to know things. . . .

For those, however, who do wish to know, let us track down the origin of the current revival of the "struggle for peace." Anyone who has read thus far will not be surprised to hear that the earliest traces of this revival are to be found in Soviet publications, quite clear for those who know how to read them:

"The first bright colors of autumn have already touched the emerald green parks of Sofia. The golden leaves of maples and aspens are trembling on the breeze. And everywhere the tenderblue streamers bearing the insignia of the World Peace Council. Sofia is expecting an important event: the World Parliament of the Peoples for Peace will be working here from 23 to 27 of September. It is the biggest and the most representative meeting of the world's peace forces convened in the last years by the World Peace Council." (*Izvestia*, September 23, 1980)

The same day *Pravda* referred to "the biggest gathering in history of the fighters for peace." Indeed, the most peaceful and independent country of the world, Bulgaria, played host during those September days to 2,260 peace-lovers from 137 countries, claiming to represent 330 political parties, 100 international and over 3,000 national nongovernmental organizations. To be sure, this was no ordinary meeting of the international Communist movement. The political spectrum of those represented was exceptionally wide: 200 members of different national parliaments, 200 trade-union leaders, 129 leading Social Democrats (33 of them members of their respective national executive bodies), 150 writers and poets, 33 representatives of different liberation movements (including the Association in Defense of Civil Rights from Northern Ireland), women's organizations (like the National Assembly of British Women), youth organizations, the World Council of Churches and other religious organizations, 18 representatives of different UN specialized committees and commissions, representatives of the Organization of African Unity and of OPEC, ex-military people, some of them generals, and representatives of 83 Communist parties (*Pravda*, September 23, 24, 25, 26, 27, 28, 29, November 5, 1980; *Izvestia*, September 23, 24, 27, 28, 1980).

It had all started about a year earlier, as we are informed by a talkative Bulgarian, the chairman of the Organizational Bureau, responsible for the "practical preparation" for this show (*Pravda*, September 23, 1980). They had expected, you see, only 1,500 delegates, but 2,200 came. No wonder the chairman wished to talk about his success.

Yet a year earlier—in 1979—none of the conditions now cited to explain the current miraculous resurrection of the peace movement existed. There was no so-called "new strategy of the Pentagon," the famous presidential directive 59; there was no new escalation of the arms race; there was no neutron bomb. The Vienna summit meeting had just been successfully concluded with the signing of SALT II. September 1979 was a time of universal happiness, the sky was cloudless. Only one significant thing happened in September 1979: a sudden wave of mass arrest in the Soviet Union and, as we have learned now, a decision to reactivate the peace movement. Who could have predicted in September 1979 that within a year the cold war would be back—who else but those involved in "practical preparations" for the invasion of Afghanistan? Given the

nature of the Soviet planned economy, with its fabulously inflexible, slow, and inefficient workings, the Soviets must prepare everything well in advance. Why should they have allocated such a large sum of money to hold a Bulgarian peace show in the middle of happy times, if not in anticipation of grave political trouble ahead?

Furthermore, we learn from comrade Zhivkov, the Bulgarian Communist leader who oppened the meeting with a long speech, about an appropriate decision taken by the Political Consultative Committee of the Warsaw Bloc countries in May 1980 (*Pravda*, September 24, 1980), as well as an appropriate resolution of the Plenary Session of the Central Committee in June 1980 (*Pravda*, September 29, 1980). Comrade Zhivkov was simply revealing the ways decisions and resolutions first travel through the Communist bureaucratic machinery on their way to rubberstamping by a "representative" body—in this case, the Sofia "Parliament" in September.

Indeed, the whole show was depressingly familiar to anyone acquainted with the methods the Kremlin producers applied to the same scenario in the time of Stalin. Even the dramatis personae were the same. There was the same World Peace Council with its immortal President Ramesh Chandra; there was the same chief conductor, Boris Ponomarev, former official of the Comintern (now responsible in the Politburo for contacts with fraternal Communist parties as well as for intelligence). Even the slogan adopted for the occasion, "The people have the power to preserve peace—their basic right," was remarkably similar to the unforgettable words of comrade Stalin in 1952.

Only this time the personal message that comrade Ponomarev brought to those convened was from comrade Brezhnev, not comrade Stalin. The latter, of course, would never have tolerated even the mention of the term "rights"—basic or any other—in his slogans. Well, the times have changed after all. Still, those damned "human rights" had gotten out of hand. Hence, better to find something like "basic rights."

The first to speak, as I said, was comrade Zhivkov, and he spilled the beans about the Soviets' real concern (*Pravda*, September 24, 1980). The aggressive circles in America, he said, refuse to accept the present balance of forces in the world. They don't wish to submit to their historically predestined defeat. They have become so arrogant as to reject all of the recent Soviet peace proposals. They have decided to replace détente with a policy based on a "position of strength." They don't observe agreements on cooperation; they interrupt political and economic contacts; they interfere with cultural and scientific exchange; they dissolve sporting and tourist connections (in other words, the grain embargo, the Olympic boycott, the scientific boycott, etc., responses to the invasion of Afghanistan and the persecution of scientists in the USSR).

This theme was taken up by most of the speakers with only minor variations. The main speaker, comrade Ponomarev, suggested a whole program of action intended to bring America's aggressive circles into compliance. He appealed for unity among all those concerned with preservation of peace, irrespective of their political views. "The time has come for action, not words," he said. (Wait a minute, have we not met this sentiment somewhere already? Surely not in the CND official booklet?)

The show proceeded smoothly, exhibiting the whole gallery of monsters, from the greatest peacelover of our time, Yasir Arafat, to a "representative" of Afghanistan.

How did all these 2,260 representatives of Social Democrats, trade unions, youth, women, and religious organizations react? Did they rush out in disgust? Did they demand the withdrawal of the Soviet troops from Afghanistan in order to remove the main obstacle to détente? Did they express concern about the massive Soviet arms build-up and the deployment of SS-20's? By no means. This self-appointed World Parliament issued an Appeal in which the main ideas of comrade Ponomarev's speech were repeated. Thus, the "Parliament" is opposed "to the vast machine and arms build-up of the most aggressive forces of imperialism which seek to take the world toward a nuclear abyss; to the falsehoods and lies of the propaganda in favor of the arms build-up, which are disseminated through imperialist-controlled mass media."

Translated from party jargon, this constitutes a clear directive to work against the armament programs of the Western countries (first of all, of course, the U.S.—the "most aggressive forces of imperialism"), and to reject any "lies" of the mass media about the Soviet arms build-up.

Beyond this, the "parliamentarians" set "the new tasks and duties . . . for action of the peoples of all continents" and worked out the Charter of the Peoples for Peace which was adopted unanimously (!) together with the Peoples' Program for Peace for the 1980's. The year 1981 was chosen to be "the springboard of the 80's, a year of a decisive offensive of the peace forces to achieve a breakthrough in curbing the arms build-up."

Most of the program was carried out, the mass demonstrations of October 1981 in the European capitals having been planned within a framework of what is called in the Soviet program "UN Disarmament Week (October 24-31)." How on earth could the Soviets have known in 1980 about events that would take place at the end of 1981, unless they were running the whole show?

My pointing out this strange coincidence, which I did in an article in the London *Times* (December 4, 1981), was bound to provoke heated denials; and did so. The Soviets in *Literaturnaya Gazetta* (December 23, 1981), as well as the CND leaders in the London *Times* (December 9, 1981), made much of the fact that UN Disarmament Week had originally been designated as an annual observance by the UN General Assembly as early as June 1978. Now, the UN flag may seem to many to be a perfect cover. One must ask, however, why virtually nothing happened during that all-important week in 1978 or 1979—even the Sofia meeting was scheduled in September, not October, of 1980—until details for its observance were specified by the Soviet-inspired program? Moreover, if one looks through the *Final Document of the Assembly Session on Disarmament (May 23-July 1, 1978)*, issued by the UN, one can find hundreds of designated weeks, months, years, and decades, all totally ignored by our peace-lovers, whereas the suggestion singled out by the Soviets was the one, the *only* one, to gather thousands in the streets. For example, was anyone aware that the decade 1969 to 1979 was solemnly declared by the United Nations to be "The Decade of Disarmament"? If there were any huge rallies or vigorous campaigns during these ten years, they seem to have escaped notice.

But let us return to this remarkable program, unanimously adopted by the international community of peace-lovers. (It is published by the World Peace Council in Helsinki, as already noted, and is available in English under the title, *Program of Action (1981.)*

This program includes such items as the "elimination of all artificial barriers to world trade," an amazingly frank recognition of the Soviet need for Western goods and technology and its desire to be granted the status of most favored nation. But what this has to do with the problem of peace and why all peace-loving people should fight for it tooth and nail is hardly made clear.

As could be expected, the program contains a clear definition of "just" and "unjust" wars: "The policy of destabilization of *progressive regimes* in developing countries actually constitutes an aggression, waged by psychological, economic, political, and other means, including armed intervention." However, similar acts against "racist and fascist" regimes are quite justified because the mere existence of non-progressive regimes "is abhorrent to the conscience of humankind." Accordingly, the sale of arms to these "abhorrent" countries should be banned, but nothing need restrain the peace-loving from selling arms to "progressive" regimes and to "liberation movements."

And, of course, there are directives to the mass media, which "must serve the cause of peace and not the military-industrial complex by confusing public opinion with lies and disinformation." (In other words, the media should not report on the Soviet arms build-up.) A similar directive is issued to those "who bear responsibility for educating a new generation."

The program further specifies precisely which events and campaigns to undertake, and designates weeks for the collection of signatures on various petitions, etc., all around the world. It constantly emphasizes the urgent need for "further intensification of actions against the deployment of the new U.S. weapons of mass annihilation in Western Europe" and plans for "strengthening and broadening of national movements into a worldwide network of peace organizations."

It is not possible here to discuss all the details of this remarkable document. It simply introduces each and every aspect of Soviet foreign policy wrapped around with the phraseology of peace. Not surprisingly, therefore, it includes Afghanistan under the guise of a "week of solidarity, with special emphasis on support for a political settlement as proposed by the Afghan government." For Ethiopia it proposes "a week of solidarity with the Ethiopian revolution" and "support for the struggle of the Ethiopian people against imperialist and reactionary conspiracies and plans in the Horn of Africa." For Kampuchea there should be an "international campaign of solidarity with the government and people of Kampuchea led by the National United Front for National Salvation and an international campaign for recognition of the People's Revolutionary Council of Kampuchea and the seating of its representatives in the UN; exposure of the conspiracies of the Peking hegemonists who are working in collusion with the U.S. imperialists against Kampuchea." For Israel: "Support for the peace forces in Israel in their struggle for the complete withdrawal of Israel from the occupied territories and for the realization of the inalienable national rights of the Palestinian people." Whereas for the Middle East in

general: a "campaign of solidarity with the Arab peoples in their struggle to liquidate the political and military consequences of the Camp David and Washington accords; solidarity actions with Libya against the threats of aggression by the Egyptian regime and U.S. imperialism." As for the U.S., even in so totally pro-Soviet a document as this the instruction to campaign for the "release of political prisoners in the United States of America" reads like a bad joke. Clearly, the love of peace dulls the sense of humor. The only countries where violations of human rights are recognized by the unanimous vote of 2,260 delegates from 137 countries are: Bolivia, Chile, El Salvador, Guatemala, Haiti, Israel, Paraguay, Uruguay, Indonesia, South Korea, Northern Ireland, and the U.S. Has the world not undergone a remarkable improvement?

After the successful adoption of this program, what followed was simple. Returning from Sofia, the enthusiastic delegates threw themselves into a hectic round of implementing the program, pressing for appropriate resolutions, actions, and commitments in each of their respective organizations (*Pravda*, November 5, 1980). An additional impetus was given to the campaign by an endorsement from the World Council of Churches at their meeting in Dresden (East Germany) on August 28, 1981, thus committing a huge number of adherents of the various Christian denominations to following the Soviet line. And in no time hundreds of thousands in the West came honestly to believe that they were out to save world peace.

Well, is there any further need to explain why the Soviet Union is so interested in the peace movement? There is a term in party jargon coined by Lenin himself: "a useful idiot." Now, in spite all their blunders, senseless adventures, economic disasters, the Polish crisis and the stubborn resistance of the Afghan peasants, Reagan's rearmament plan and UN resolutions, the Soviet rulers have scored a spectacular victory: they have recruited millions of useful idiots to implement their bankrupt foreign policy. They are no longer isolated and there is still a big question as to whether the Americans will be allowed to place missiles in Europe.

True enough, the American economy is vastly more productive and efficient than the Soviet, but the Americans don't have a weapon like the "struggle for peace." True again, this peace movement will be expensive for the Soviet people (the meeting in Bulgaria alone must have cost them millions, to say nothing of subsidizing all peace activists on those jaunts to the best Soviet resorts; the cost of running this worldwide campaign must be simply astronomical). Still, it is cheaper than another round of the arms race, let alone the cost of maintaining a priceless military superiority. And the result will be long-lasting.

Mind you, we are into only the second year of a planned ten-year "struggle for peace." Within a few years, the whole earth will be trembling under the marching feet of the useful idiots, for their resources are inexhaustible.

I remember in the 50's, when the previous peace campaign was still in full swing, there was a popular joke which people in the Soviet Union whispered to each other: "A Jew came to his rabbi and asked: 'Rabbi, you are a very wise man. Tell me, is there going to be a war?' 'There will be no war,' replied the rabbi, 'but there will be such a struggle for peace that no stone will be left standing.'"

II

One of the most serious mistakes of the Western peace movement and of its ideologists is the obdurate refusal to understand the nature of the Soviet regime, and the concomitant effort to lift the question of peace out of the context of the broader problem of East-West relations. After several decades of listening to what they believe to be "anti-Communist propaganda," they have simply got "fed-up with it." They ascribe everything they hear about the East to a "cold-war-type brainwashing," and make no attempt to distinguish what is true from what is not. This attitude, which I can only describe as a combination of ignorance and arrogance, makes them an easy target for any pseudo-theory (or outright Soviet propaganda) that happens to be fashionable at any given moment. Besides, baffled by endless and contradictory arguments among the "specialists" about the nature of the Soviet system, the leaders of the peace movement believe they have found a "new approach" which makes the entire problem irrelevant.

A few months ago in England, I attended a public debate on the problem of unilateral disarmament. The leader of a big peace group opened his speech by saying that from his standpoint, it is irrelevant who is the aggressor and who the victim. He said: "It is like when two boys have a fight in the churchyard. It is impossible to find out who started the fight, nor is there any need to do so. What we should do is to stop them."

This metaphor reflects very well the prevailing attitude among peace-movement members. They believe they have gotten around a baffling problem, whereas they have in fact inadvertently adopted the concept of the "normal opponent." From the "churchyard" standpoint, the present conflict seems very ordinary: two bullies have become so embittered by their prolonged quarrel—in which anyway the essence of the disagreement has been lost or forgotten—that they are quite prepared to kill each other and everybody else around. They are temporarily insane, mad, but are basically normal human beings. Pride and fury will not permit them to come to their senses, unless we, the sane people around them, are prepared to intervene. Let us make them talk to one another, let us pin down their hands, let us distract them from their quarrel. We cannot, to be sure, pin down the hands of one of them. Then, in the best Christian tradition, let us make the other repent, in all good Christian humility. Let us disarm him to convince his adversary of his peaceful intentions. Let us turn the other cheek. Sooner or later the other will come to feel ashamed.

This view sums up exactly what I mean by a combination of ignorance and arrogance. Indeed, if we look upon the world from the "churchyard" standpoint, there probably is no need to find out who is the aggressor and who the victim. There is no need for police or armed forces. All we can see is a row of graves with the dead lying orderly in them and a couple of children quarreling with each other. Unfortunately, outside the church walls there is a bigger and far more dangerous world with gangsters, murderers, rapists, and other perverse characters.

Needless to say, this churchyard model simply does not merit serious consideration. Unfortunately, it is a widespread belief (and not only within the peace movement) that the Soviet government, like any other government, is preoccupied with the well-being of its people, and will therefore be eager to reduce military expenditures. This notice comes so naturally to our peace-makers that they just do not notice they have taken on a view of the Soviet system which is both very old and unquestionably wrong. If they only took the trouble to study a little Soviet history, they would know immediately how misleading this seemingly natural view is. Not only are the Soviet rulers indifferent to the living condition of their populace, they *deliberately* keep it low; on the other hand, disarmament (irrespective of the problem of well-being) would lead very rapidly to the collapse of the Soviet empire.

Normally we try to understand an opponent by taking his place, getting into his shoes, so to speak. That is why most people try to explain Soviet behavior in terms of "normal human motives," that is, by motives familiar to them. And that is exactly why they constantly pile one mistake upon another. For it is extremely difficult for a "normal" human being to put himself inside the skin of a mentally ill one. It is almost as in nature itself: when we test natural phenomena under extreme conditions, we suddenly find some unpredictable anomaly that is baffling to us. Logic itself becomes abnormal in certain extreme cases. If we add up two numbers, say, or multiply or divide them, we invariably obtain a new number. But if we use zero or infinity our whole rule suddenly goes wrong.

But let us take an example relevant to the present discussion. Let us take the key question: why is the Soviet Union so aggressive, so eager to expand? We see how many schools of thought there are among those studying the problem (and we see, too, how all of them are wrong).

There are some people who believe that the present Soviet expansionism is just a continuation of the Russian pre-revolutionary colonial policy. In other words, it is a bad legacy. Indeed, this notion about Soviet expansionism was the dominant one for a very long time—and still is in some quarters. In line with it, there have been repeated attempts to offer the Soviets a division of the world into spheres of influence. We owe to it the Yalta agreement, the Potsdam agreement, and assorted other disasters. Each time the Soviets have accepted the division into spheres of influence, and each time they have violated it. Is this because they need more mineral resources, more territory, a wider market for their goods? No. Their own territory is undeveloped, their own mineral resources are in the earth, they do not have enough goods for their own internal market. There are no useful mineral deposits in Cuba or Afghanistan. There is no Russian national interest in Angola or Vietnam. In fact, these new "colonies" cost the Soviet people many millions of dollars a day apiece. So, Soviet policy is no classical case of colonialism.

Then there is another theory, far more pernicious because much more widely accepted and because to reject it one needs a real knowledge of Soviet life. I mean the theory according to which Soviet aggressiveness is the result of the fear of hostile encirclement. The proponents of this theory argue that Russian history, particularly the history of repeated invasions of Russian territory within the last century, has made the Russian people almost paranoid about an external threat.

This theory sounds very scientific because many facts may be cited to back it up. Still, it is no more than a shrewd combination of obvious lies, wrong interpretations, and very perfunctory knowledge. It is mainly based

on an overestimation of the importance of history for any given nation and on an oversimplification of the Soviet system.

To begin with, there is an obvious lie in this theory—that is, a deliberate confusion between the people and the government in the USSR. Those who know the Soviet system only moderately well may still need to be reminded that the people have no privilege of representation in the government—that is, have no free elections. Thus, the government does not reflect the feelings of the population. So if we are to believe that the population is frightened by the long history of invasions, the government has no reason to share these fears. The Soviet government, with its vast and omnipresent intelligence system, is extremly well-informed about every move and every smallest intention of the West (anyway not very difficult to achieve in view of the remarkable openness of Western societies). By 1978-79, when their arms build-up was at a high pitch, whom were they supposed to be so afraid of? Their great friend, the French President Giscard? Or their even better friend in West Germany, Willy Brandt? Britain, with its puny armed forces (and ongoing discussion on unilateral disarmament), or perhaps Nixon and Carter, who between them shelved all the major armament programs? Japan, which has no army at all?

Clearly the Soviet government had no reason to be frightened. In fact, the theory of Soviet paranoia does not imply a frightened government, but rather a frightened *nation*. In a "normal" country this might drive the government to become aggressive. But in the Soviet Union the people mean nothing and have no way of pressuring their government to do anything. They would not be allowed to voice any fears. So, who is so frightened in the Soviet Union? Besides, as far as the rulers are concerned, their own experience of war, World War II, could not frighten them for a very simple reason: they won the war. Can you show me any victorious general who is so afraid of war as to become paranoid? The psychology of Soviet rulers is in any case totally different.

One need only look at a map of the world to see how ridiculous this theory is. Can we honestly believe that the poor Communists in the Kremlin are so frightened that they must protect themselves by sending their troops to Cuba and Cuban troops to Angola? By sending military equipment and advisers to Ethiopia and Vietnam and then by sending Vietnamese troops to Kampucahea? Take another look at that map: it is not at all obvious that the USSR is encircled by hostile powers. Rather the other way around: it is the Western world that is encircled by the hostile hordes of the Communists. Well, if their paranoia can be satisfied only by surrendering the whole world to their control, what difference can it make to use whether they act out of fear or out of endemic aggressiveness?

Finally, and most importantly for an understanding of this pernicious theory, is the fact that it was invented by the Kremlin propaganda experts. It was very successfully exploited in the years of détente, when Western governments, acting under its influence, deliberately permitted the Soviets to achieve military superiority. They would probably deny it now, but I remember very well the discussions of that period. The argument of the ideologists of détente was that once the Soviets caught up, they would relax; this would in turn lead to the internal as well as external relaxation of the Communist regime, i.e., to *liberalization*. The results of this brilliant experiment we can see now.

The Soviet population, too, has been subjected, day after day for sixty-five years, to an intense propaganda campaign about this putative "hostile encirclement." The Communist rulers unscrupulously exploit the tragedy of the Soviet people in World War II for the purpose of justifying both their oppressive regime and their monstrous military spending. They try their best to instill into the people a pathological fear of the "capitalist world." Fortunately, the people are sane enough to laugh at the very idea. Thus, contrary to this theory, there is no paranoid population demanding to be protected in the Soviet Union, despite the best efforts of a perfectly sober and cruel government.

No, it is not the fear of invasion or a World War II hangover that has driven the Soviet rulers to wage an undeclared war against the whole world for half a century now. It is their commitment—repeated quite openly every five years at each Party Congress since the beginning of this century—to support the "forces of progress and socialism," to support "liberation movements," everywhere on the globe.

Are we then to assume that the Soviet leadership consists of fanatics aiming at global control? Even such a model, crazy as it might sound, still imputes too much "normality" to the Soviet leaders. Or, more precisely, it is too big a simplification. This theory, too—fortunately for us—does not fit a number of the facts. Paradoxically, none of the present Communist leaders believes any longer in Communist doctrine. Fortunately, because no real fanatic would ever tolerate the destruction of the object of his obsession. He would rather witness the destruction of the entire world.

The Soviet rulers are a totally cynical lot, much more preoccupied with their own privileges and pleasures than with Marxist ideas. They probably hate Communist dogma more than any Western capitalist. Moreover, the majority of the Soviet people are as cynical as their leaders. There are many more sincere Communists to be found in the West than in the USSR.

But this fact has also created false hopes among Western politicians and the public. The same false hopes encouraged by the theory of encirclement—that it will be possible to treat the Soviets as normal partners at last, that it will be possible to negotiate, to cooperate, and to relax. Both theories lead equally to the same mistaken policy.

So what is the truth about the damned Soviet system?

Certainly, there was a period when the Soviet leaders were Communist fanatics, ready to sacrifice the whole world to their faith. There was a period, too, when at least some part of the population was prepared to greet this new idea with considerable enthusiasm. The people of my country, I suppose, could be excused for their delusion, because Communism was indeed a new idea and one that might be thought by the inexperienced to appeal to the best qualities in human nature. Is it after all not a worthy purpose, to secure unalloyed happiness for all future generations, to liberate and unite the whole of mankind? Naturally, such a thing will not be easy, but it is worth a great deal of sacrifice to achieve. Just as naturally there will be many selfish people to oppose it and we should learn to be ruthless with them. Only millions of individual wills fused into a single invincible "we," united by the iron fist of a Leader, can achieve so difficult an end.

This period of ecstasy, however, was very short-lived. One by one, the various elements of the Soviet population cooled down, sobered up, and then could not believe in their own former enthusiasm. The besieged minority reacted to this desertion of the public by becoming even more ruthless and single-minded: "We will make them happy against their will; their children will be grateful to us." I will not describe the mass slaughter that resulted from this great determination. It has been described many times. A terrorized majority obeyed with sham enthusiasm, because it was a crime to look gloomy. But underneath there was a silent, passive resistance. The minority of "believers" over time became simply a ruling clique which had lost its ideals in the constant fight for survival, in corruption, and in its abuses of power and its privileges. The ensuing political situation can best be described as a latent civil war in which a kind of balance has been maintained by political terror.

In this way the Soviet Union reached a condition in which absolute power was exercised by absolutely cynical people over absolutely cynical people, each side vociferously assuring the other that they were all still sincerely building an ideal future society. But the ideology exists now almost as in a work of science fiction: it has separated itself from its substratum and has petrified in the structure of the society. It has become an institution in which nobody (not even the top executive) is allowed verbally to deviate from the dead dogma. The will of millions is still being taken from them and welded into the iron fist of abstraction.

There is practically no free human being inside the entire country. The state—the only employer—will not allow anyone to be financially independent—as indeed no independence of any kind will be tolerated. Everybody must be carrying out a useful task, performing a needed function. Several nationwide networks of security and secret police spy first on each other and then together on everybody else. Such a system has created a new type of a man, who thinks one thing, publicly expresses another, and does a third.

The enormous inertia of this system is not surprising. There is no internal "class enemy" any more; there is no need to terrorize so many millions. Still, there are huge concentration camps, because they have become an integral part of the country's economic, political, and spiritual life. Nobody believes now in the ultimate victory of Communism in the world, but the policy of external subversion and the promotion of "socialist forces" everywhere has became an integral part of the state machinery. The system rules the people.

Beyond inertia, there is something else, something even more decisive: the instinct of self-preservation of the ruling clique. Once you are riding a tiger, it is difficult to jump off. Any attempt at internal liberalization might prove fatal. If the central power were to weaken, the sheer amount of hatred accumulated within the population for these sixty-five years of the socialist experiment would be so dangerous, the results of any reform so unpredictable—and, above all, the power, the fabulous privileges, the very physical survival of the ruling clique would become so tenuous—that one would be mad to expect the Soviet leaders to play with liberal ideas. Only the imminent threat of

89-059 O-86-41 (Pt. 20)

total collapse might force them to introduce internal reforms.

The two sides of the Soviet regime—internal oppression and external aggression—are inseparably interlocked, creating a sort of vicious circle. The more the regime becomes rotten inside, the more pains are taken by its leaders to present a formidable facade to the outside world. They need international tension as a thief needs the darkness of the night. In the political climate of latent civil war, given the enormous and senseless sacrifices of the last fifty years, the constant economic difficulties, and the lack of basic rights—not to mention, again, the extraordinary privileges enjoyed by the ruling clique—the only hope for stability lies in the need to cope with an external threat: "hostile encirclement" and the subversive activity of "world imperialism." In this artificially created state of war, the worker's demand for a better deal, or a captive nation's demand for its independence, can then be treated as an act of subversion, "playing into the hands of the enemy."

Nor is it enough to create a devil in order to maintain one's religious zeal. This imaginary enemy must be defeated over and over again or there will be the risk that he will seduce you. American "imperialism" must be defeated at any cost, and the liberation of proletarians in the capitalist countries must be promoted by all means. The failure to support a "friendly government," to establish Communist rule in a new country, will immediately be perceived as a weakening of Soviet power, and therefore an encouragement to the sullen and embittered population at home. Any failure of the Soviet international adventure may thus trigger a chain reaction leading to the ultimate collapse of the Soviet rulers. This is why they cannot allow a popular uprising in Hungary, a "Prague Spring" in Czechoslovakia, an anti-Communist "Holy War" in Afghanistan, or an independent alternative center of power in Poland. Immediate repercussions would be felt in all the other countries of the Socialist camp as well as in the Ukraine, the Baltic states, Central Asia, and other occupied territories. The scenario of aggression is depressingly uniform. First, the Soviets undermine a democratic state, helping the friendly "progressive forces" come to power. Next, they have to save their bankrupt "progressive" friends, when the resistance of the population threatens to overthrow them.

Are they frightened to the point of aggressiveness? Yes, but not by your piles of hardware, not by your clumsy attempts at defense. They are frightened by their own people, because they know the end is inevitable. That is why they must score victory after victory over the "hostile encirclement." Behind every victory is a very simple message addressed to their own enslaved population: "Look, we are still very strong and nobody dares to challenge our might."

If they are afraid of you, it is because they are afraid of your freedom and your prosperity. They cannot tolerate a democratic state close to their borders (and then, close to the borders of their buffer-states), because a bad example of thriving democracy so close at hand might prove to be too provocative.

Knowing, all this, let us ask ourselves a question: What would happen if the West were to disarm unilaterally? Could the Soviets follow suit? Certainly not. It would mean the rapid disintegration of their empire and a general collapse of their power. Does this mean they will simply roll over the now defenseless Western countries? Again, the answer is: no. They don't need your territory, which would be difficult to hold anyway. Above all, where would they acquire goods, technology, credits, grain, etc., if they were to impose on you their inefficient economic system? They need you in the way China needs Hong Kong. *But from that very moment you will gradually begin to lose your freedom, being exposed to constant and unrestrained Soviet blackmail.*

You may like or dislike your trade unions, but would you like them to have to consider a possibility of foreign invasion every time they wanted to declare a strike—as Solidarity had to do in Poland for eighteen months? You may like or dislike your mass media, but would you like to see the self-censorship of your press in order to avoid an angry reaction by a powerful neighbor—as in Finland? You may like or dislike your system of representation, but at least you are free to elect those whom you choose without considering the desires of a foreign power. Nobody threatens to come into your country and impose a government of its choosing—as in Afghanistan. The nature of the Soviets system is such that it can never be satisfied until you are similar to them and are totally under their control.

So, we come to a very important conclusion: the issue now is not "peace versus war," but rather "freedom versus slavery." Peace and freedom appear to be inseparable, and the old formula "Better red than dead" is simply fatuous. Those who live by it will be both red *and* dead. Whether we like it or not, there will be no peace in our world, no relaxation of international tension, no fruitful cooperation between East and West, until the Soviet internal system changes drastically.

Has this simple and self-evident truth ever been understood by Western decision-makers? I doubt it. In a way, I can share some of the concern of the peace movement. Because for the West to react stereotypically by increasing military spending and stockpiling new hardware every time the Soviet instability-aggression complex manifests itself is simply to miss the target. At any rate, it is not enough. It is not going to change the Soviet system. It is not going to prevent Soviet expansion, especially in the Third World. Soviet ideological warfare is far shrewder than a big nuclear bludgeon. Would we, for instance, consider a nuclear bombardment if tomorrow there were to be a revolt of various tribes in Pakistan, instigated by Moscow? Or a Communist takeover in Iran?

There are plenty of "natural" troubles in the world, brought on by local conditions. But the influence of Moscow immediately turns them into major strategic problems. It would be senseless to try to solve all such problems by military means all over the globe. Simple logic suggests that we must deal first of all with the *source* of the world's major trouble—i.e., the Soviet system. We must find an effective way to help the Soviet population in its struggle for change. After all, they are our biggest ally.

Unfortunately, this has so far never been appreciated by the West, which has instead been continuously strengthening the Soviet system by credits, trade, technology. Why should the Soviets bother to introduce any internal reforms if their inefficient economy is periodically saved by the West? The West is still rich enough to help them out, and Siberia is also rich enough in turn to sell natural gas, gold, diamonds.

We may shake with indignation whenever we hear about the Soviet invasion of yet another country. We hate these little obedient soldiers, ever ready to do whatever they are told. Are they robots? But what do we propose that they should do? Do we honestly expect them to rebel and face a firing squad, while the entire world continues to provide their executioners with goods, credits, and modern technology? Don't we demand of them much more than we demand of ourselves? Somewhere, somehow, this vicious circle must be broken, if we are to survive as human beings. Why not start where it is easier?

There are 90,000 of these "robots" trapped in Afghanistan at this very moment. They cannot rebel because they will be shot down. Even so, there are occasional rebellions (and executions). They cannot desert, because they will either be killed in the process or, if they are lucky and manage to reach Pakistan, the Pakistani authorities will return them to the Soviet command (that is, again, to the firing squad). Does any government try to help them? No. Instead, several European governments have decided to buy Soviet natural gas, perhaps the very same gas that is being pumped out of Afghanistan by the Soviet occupation authorities as compensation for "liberating" Afghanistan.

There is a lot of noise about Poland right now. A lot of noise, and a lot of smoke screens. But does any government sacrifice anything? After issuing thunderous condemnations, the European governments decided not to apply economic sanctions against the Eastern bloc, because sanctions would "harm us, probably, more than them." Why should you establish the kind of relations that only make you more vulnerable than the enemy? Why do you continue to sign new agreements of the same type (natural gas, for example)? The American banks recently decided to cover the huge Polish deficit because the "bankruptcy of Poland would undermine the world financial system." What would happen, I wonder, if tomorrow the Soviet-bloc countries were to refuse to pay their debts and to suspend all trade?

This is what the struggle for peace and freedom boils down to: the people in the East should sacrifice their lives, but you should not sacrific your profits. Small wonder that the Polish army does not rebel.

In fact, the imposition of economic sanctions on the Polish military junta and on their Soviet masters is not just a possible step; it is the actual *obligation* of the Western countries under the terms of the Helsinki agreement. A direct link among security, economic cooperation, and the observance of human rights is the very essence of this agreement. If that is forgotten now, of what point is all the noise lately heard from Madrid?

To tell the truth, I do not believe that any of it has been forgotten. Neither do I believe that the Western banks, industrialists, and governments are so "stupid" as to tie themselves to the Eastern chariot wheels by mistake. It is their deliberate policy, overtly articulated in the time of détente, and covertly now. Moreover, it is their philosophy. They love stability, these bankers and businessmen. And they are much against any resistance movement in the Communist countries, very much against any prospect of liberation for the enslaved nations of the East. They are the greatest peacelovers of all, far more powerful than all those crowds on the streets of the European capitals. Thanks to

them, we descend slowly into the Age of Darkness.

III

This article is not addressed to the bankers, or to the governments. I do not expect any help from them. In spite of all the harsh words used in it, I wish it to be read by sincere people who are seriously concerned with the problems of peace and freedom. They will probably dislike many of the things I have said here. I hope, however, that they will understand its main point: that peace has never been preserved by a hysterical desire to survive at any price. Nor has it ever been promoted by catchy phrases and cheap slogans. There are 400 million people in the East whose freedom was stolen from them and whose existence is miserable. It so happens that peace is impossible while they remain enslaved, and only with them (not with their executioners) should you work to secure real peace in our world.

Your recent mass demonstrations were disastrous, because in them you identified yourselves, willingly or unwillingly, with the rulers of the Eastern countries. To make broad alliances with any public (or governmental) forces just for the sake of power is a tremendous mistake. This mistake must be corrected if we are to live in peace and freedom. We should know who are our friends and who are our enemies. The fate of Solidarity should open our eyes.

[From the Washington Report, June 1982]

THE NUCLEAR WEAPONS FREEZE MOVEMENT

America is a land where things novel, bizarre, and even radical, can grip large segments of the population almost overnight. Sometimes these phenomena seem to arise spontaneously in the natural course of human events; in other cases, as with Rubik's cube, they are the result of someone's shrewd and calculated effort.

Few trends or fads have seemingly burst upon the nation more spontaneously or spread more rapidly than the so called nuclear "freeze" movement. The media have touted the movement, hailed its "grassroots" nature, and described it as sweeping like a prairie fire, from resolutions in New England town meetings to an agenda item next fall on the California state referenda. But the timing of this phenomenon was not accidental. It is evident from the literature of the organizations concerned that the freeze call was designed to reach a crescendo just as the United Nations Special Session on Disarmament takes place, June to July of this year. Moreover, behind the seeming spontaneity there is a complex hierarchy of professional organizers, following a carefully designed strategy.

It is no coincidence that this strategy serves to implement the aims of the Soviet Union. It is clearly an integral part of the massive campaign to disarm the West which the Soviets have conducted over the past five years. This effort has been very effective so far, resulting in the cancelling of plans to develop the so-called neutron bomb in 1978 by President Carter, and more recently in making it politically impossible to deploy Pershing II and cruise missiles in Holland and Belgium when these weapons become available.

There is no overt data, as such, on the sums being spent by the Soviet Union to promote the U.S. freeze campaigns, and in fact much of the funding for these initiatives comes from American foundations and from the donations of thousands of well-intentioned but exploited Americans. But in any case, Soviet propaganda has made a critical contribution to the overall atmosphere of the freeze campaign, by creating a climate of fear.

The movement is rapidly becoming a divisive political force. Senators Ted Kennedy and Mark Hatfield have embraced the concept as their own by co-sponsoring a freeze-now, equalize-through-negotiations-later resolution in the Senate. Bantam Books has cooperated with the Senators by rushing into print in a near-record six days a paperback entitled *Freeze*, ostensibly written by Kennedy and Hatfield.

In response, Senators Jackson and Warner have sponsored Senate Joint Resolution 177, which calls for "a longterm, mutual and verifiable nuclear forces freeze at equal and sharply reduced levels of forces." The operative word in this initiative is "equal," reflecting the view that parity does not now exist. The Kennedy-Hatfield resolution mustered only twenty co-sponsors, compared with fifty-eight for the Jackson-Warner resolution.

On the other hand, President Reagan has opposed a freeze, as such at this time, which would "legitimize a condition of great advantage to the Soviets." Recently, he challenged the USSR by proposing a cut of one-third in the strategic nuclear weapons of both sides. In a second phase, he suggested, missile throw-weights would be reduced to equal and verifiable levels.

The Soviet response to Reagan's proposal came in Leonid Brezhnev's speech to the Young Communist League on May 17. Reflecting the Soviets' sense of their own superior strategic position, Brezhnev said: "We would be prepared to reach agreement that the strategic armaments of the USSR and the U.S. be frozen right now, as soon as the talks begin. Frozen quantitatively."

In the same statement the Soviet leader reiterated his country's willingness to freeze present levels of medium-range missiles in Europe, in other words, to maintain the present unanswered threat to Western Europe posed by the Soviet SS-20 weapons. In recent months the Soviet government has also offered to guarantee not to use nuclear weapons against countries in Northern Europe, the Balkans, and Mediterranean which would declare a freeze on deployment of any nuclear weapons in their territories. This latter offer of course represents scarcely-disguised blackmail, a threat to use Soviet nuclear might against those countries which harbor NATO installations.

The differences in approach to the question of arms reduction promise to become a prime area of domestic political dispute from now until November of 1984.

One possible consequence of adopting a nuclear freeze is a halt in U.S. weapons production but not in Soviet weapons production. This would pose the greatest single threat to U.S. security since the Cuban missile crisis of 1962.

With the security of this country and its allies at stake, the American people should take a close look at the genesis and aims of the nuclear freeze movement. The American Security Council Foundation has just published a report prepared by Gilbert Stubbs, a scientist at the Massachusetts Institute of Technology. This 30-page analysis systematically refutes the tenets of the freeze proposal written by Randall Forsberg and circulated by the American Friends Service Committee (AFSC). (See the editor's note on page 8 for availability.)

In addition to Stubbs' investigation of the individual freeze arguments, we shall examine here in some detail the history of the movement, and the organizations and personalities which have been the prime movers in its rise to prominence. In particular, we shall question the spontaneity of this campaign, the sources of its financial and other support, and the interests—other than the laudable but illusory goal of instantaneous world peace—which will be served if an immediate freeze on strategic nuclear weapons should become American policy.

FREEZE ORIGINS

The history of the nuclear freeze idea reveals that several distinct initiatives have gone into the present makeup of the movement. It also shows the extensive ties and cooperation which exist among the organizations that have been most active in propagandizing the American public on this issue.

In treating the present freeze movement, most media observers have focused attention on three initiatives:

(1) The Kennedy-Hatfield resolution.

(2) The appeal for an unqualified freeze contained in the *Call to Halt the Nuclear Arms Race*, written by Randall Forsberg of the Institute for Defense & Disarmament Studies (IDDS) in Brookline, Mass., with the collaboration of the American Friends Service Committee (AFCS). Ms. Forsberg is described by an antidefense analyst as "the intellectual author" of the nuclear freeze campaign.

(3) The more recent "Ground Zero" initiative.

A prime thesis among the advocates of nuclear freeze is that the U.S. and its development of nuclear weapons forced the U.S.S.R. into the nuclear arms race. The argument follows, therefore, that the U.S. must take the initiative and assume the risks involved in nuclear disarmament. The historical record does not support this argument.

A plan for total nuclear disarmament was presented by the United States to the U.N. in the summer of 1946. It is identified with Ambassador Bernard Baruch who spoke on its behalf in the United Nations. The United States was then the sole atomic power. Yet Baruch called for halting the manufacture of U.S. bombs, destroying existing U.S. stocks, and turning over to a U.N. authority the know-how for production. The plan further specified that the veto power enjoyed by the U.N.'s "Big 5" powers would not apply in the field of atomic energy. Significantly, the Soviet Union vetoed this first attempt at outlawing nuclear weapons.

Since then the United States has made numerous proposals to the Soviet Union regarding the freezing of nuclear weapons stockpiles. For example, in a White House briefing on SALT in 1972, Henry Kissinger used the word eight times in less than two pages of text. It was the avowed purpose of SALT I to cap or freeze the nuclear arms race.

Such initiatives made sense for this country, since they were proposed at times when America was either ahead in nuclear capability, or was at or near parity. Now, when we are at a relative disadvantage in strategic weapons, freezing current levels of armament has the effect of locking our country into a dangerous condition of inferiority, of being "second best" to a Soviet Union which avowedly seeks the demise of the United States as the leader of the Western free-enterprise system.

John Fisher, president of the American Security Council Foundation, points out in

his foreword to Stubb's analysis that it is scarcely a coincidence that the campaign gained full prominence when it suited Soviet strategic interests. No protest was raised when Soviet SS-20 missiles and Backfire bombers were being deployed, but now that the U.S. Pershing IIs and cruise missiles are to be deployed in Western Europe to counter the Soviet threat, there is a cry for a weapons freeze. Similarly, when the President announced last fall a plan for modernizing U.S. strategic forces, including the resurrection of the once-killed B-1 bomber, there was an immediate demand for a moratorium on further modernizing of U.S. weapons, to the professionally-orchestrated accompaniment of a full chorus of doomsday experts.

Some of the individuals connected with the current freeze movement claim to have invented the idea. Kosta Tsipis, an M.I.T. professor and disarmament advocate, told Gilbert Stubbs that he, George Kistiakowski, and Bernard T. Feld developed the idea in 1975.

In Chapter 7 of the Kennedy-Hatfield Freeze, a liberal/left and revisionist view of the freeze history is presented: "It is the story of an idea that took root in America in the 1980's because the time was right and the country was ready."

The theme recurs throughout the book that the campaign is a grass-roots phenomenon. But even a quick reading of Freeze belies this. It becomes obvious that a unique cadre of dedicated individuals worked long and hard for years to bring the concept to its present state.

Many of these activists are given due credit in *Freeze.* But for a more revealing look at their manifold activities, we must turn to the literature of the hard-line left. For example, the April 14, 1981, issue of *The Daily World* (organ of the Communist Party USA) names the two Americans who originated the International Peace Petition which is now being circulated in 100 countries, demanding that the two superpowers ". . . as a first step . . . terminate immediately all research, development, testing, manufacture and deployment of nuclear bombs and missiles; and progressively, but quickly, destroy present stockpiles."

The two individuals named are Sidney Lens and Stewart Meacham. Both these men are long-time leftist activists. Lens (a pseudonym) was an official of the ultra-radical Revolutionary Workers' League until its demise in the mid-1940's. After writing a landmark think-piece, *The Doomsday Strategy* in 1976, Lens founded a new group, the Mobilization for Survival, in 1977.

The above proposal from the International Peace Petition sounds reasonable. It does not appear to be anti-American. But in his many articles, Lens set the tone for U.S. leftist nuclear disarmament policy, as in the following two points:

"Neither the Soviet Union nor the communist ideology can possibly threaten American world interests as much as they are threatened by nuclear technology. . . .

"Americans need defense against their own leadership more urgently than they need defense against a foreign invasion."

Lens further advised the American people not to become "resigned to the win syndrome, the closed society tyranny and ultimate suicide." This is a classic assemblage of communist terms in a single sentence.

Lens' associate in the international peace petition effort, Stewart Meacham, heads the AFSC's Peace Education Division. Meacham's past includes a generation of "pacifist" activity, from a beginning as a Quaker missionary. His zeal for political organization led to his expulsion from India. Later, according to the *Daily Worker,* Meacham was a leader in the 1960 "Campaign for Disarmament" which among other things called for the United States to ban nuclear testing and agree to total disarmament.

Lens himself, in an article in *The Progressive* of May 1982, identifies three other key persons who have breathed life into the freeze movement. One was Senator Mark Hatfield of Oregon, who proposed an "executive amendment" to the SALT II treaty calling for the freezing of R&D, testing, manufacture, and deployment of new nuclear weapons and delivery systems. In Lens' words, this was "a compromise to which the 'left-wing' critics of SALT II . . . could and did subscribe." The amendment died along with SALT II.

In a modest moment, Lens gave credit for the present impetus in the nuclear freeze movement to the efforts of two others, Terry Provance, national coordinator of the AFSC's disarmament program, and Randall Forsberg, president of IDDS.

Provance has a history of anti-U.S. military activism dating to the Vietnam era. He was also a member of Lens' Mobilization for Survival.

Forsberg is also a veteran "peace" campaigner. After a start in U.S. left issues, she became an analyst in the Stockholm International Peace Research Institute (SIPRI) in 1968, working in the area of arms control. She returned to the United States in 1974 for study at MIT and to co-found the Boston Study Group. In the Spring of 1981 the AFSC published her *Call to Halt the Nuclear Arms Race.* for practical purposes, as far as media attention is concerned, the U.S. nuclear freeze movement dates from that time.

In addition to the AFSC and Mobilization for Survival, initial support for the new freeze movement was also provided by two other established antidefense groups, Clergy & Laity Concerned (CALC) and the Fellowship of Reconciliation. Through its more than 40 chapters around the country, CALC, in particular, lent critical support to the campaigns.

BROADENING THE FREEZE INITIATIVE

Another element of the freeze campaign originated in the western Massachusetts leftist colony centered in the five universities located in Amherst, Northampton, and South Hadley. Randy Kehler of the Traprock Center and the Northampton chapter of AFSC made a pioneering effort to place a nuclear weapons freeze on the ballot in three Massachusetts senatorial districts in the fall of 1980. After obtaining the necessary voter signatures to accomplish this, Kehler and his associates waged a media and bumpersticker blitz which resulted in victory by a 59-to-41 ratio.

This achievement became the model for similar freeze campaigns in other states. In California a couple named Seidita copied Kehler's techniques to collect 750,000 signatures, more than twice the number needed to place a freeze referendum on the ballot for the 1982 elections in California. The campaign there is being financed by millionaire Harold Willens, a long-time disarmament activist and founder of the Center for Defense Information. Meanwhile, Kehler has become codirector of a National Clearinghouse for the Nuclear Weapons Freeze Campaign, with headquarters in St. Louis.

Many of the old guard antidefense organizations have lined up behind the Forsberg/AFSC freeze proposal and are working through the Clearinghouse.

Organizations, besides those mentioned already, include: Council for a New Foreign & Military Policy (CNFMP); Democratic Socialists of America; National Council of Churches (NCC); Physicians for Social Responsibility; SANE; Sojourners; Women Strike for Peace (WSP); Women's International League for Peace & Freedom (WILPF).

A workhorse in the freeze effort has been the Physicians for Social Responsibility, a 1960's group which had become practically moribund until it was revived with a vengeance in 1980 when Dr. Helen Caldicott, an Australian, was appointed president. Of Caldicott, Sidney Lens once said, "She can wring a heart of stone with her recitations of the horrors of nuclear radiation." She and such other speakers as Dr. Jack Geiger and ex-SIPRI peace specialist Kosta Tsipis, now at MIT, have preached to live and television audiences of millions about the imminent doom of our planet unless we renounce nuclear weapons.

One antidefense group which is pursuing a more or less independent course of antinuclear propagandizing is the Union of Concerned Scientists (UCS). Its full-page ad in the April 25 issue of The New York Times urged that NATO announce a "Policy of No First Use of Nuclear Weapons in Europe," and also that NATO withdraw its forward-based tactical nuclear weapons and ask that the USSR do the same.

The UCS's position closely parallels the approach taken by former disarmament specialists Robert McNamara, McGeorge Bundy, George Kennan, and Gerard Smith, as expressed in a major article in Foreign Affairs, Spring 1982. Both these initiatives would couple a no-first-strike declaration to a buildup of conventional military strength in Europe.

George Kennan is also the author of a proposal for the superpowers to cut their present nuclear arsenals by 50 percent. This recommendation is endorsed by another organization, the Committee for East-West Accord.

Another important network of antidefense organizations is working along lines closely paralleling the freeze movement. This is the Fund for Peace group. It comprises the Center for Defense Information, Center for International Policy, and Center for National Security Studies, all in Washington; and the Institute for Study of World Politics plus a nationwide network of radio programs, "In the Public Interest," with headquarters in New York. Some of the funding for this group is provided by the Stewart Mott organization/United Methodist Church complex in Washington. According to a February 1982 report by this group's Anne Zill, the Center for Defense Information will stage a major disarmament happening in June, in conjunction with the United Nations Special Session in Disarmament. This will include bringing together a clutch of ex-NATO and Warsaw Pact officers. CDI's "Nuclear War Prevention Kit" for speakers is to be updated for this event.

An affiliated organization, the Council for a Livable World (CLW), is reportedly setting up a "nuclear hotline" to assist antidefense groups around the country with details of legislation, hearing, and so forth.

Another organization, Ground Zero, headed by former National Security Council nuclear specialist Roger Molander, is a relative newcomer to the antinuclear scene. In spite of this, it has managed in a very short

time to seize the media spotlight by staging a "Ground Zero Week" in April 1982 and by publishing a folksy paperback entitled *Nuclear War—What's in It for You?*

Ground Zero literature takes considerable pains to project an image of impartiality. Nevertheless, the purpose and net effect of its programs is to promote a nuclear freeze and to generate fear in the U.S. public. It is reportedly coordinating its actions with the Physicians for Social Responsibility. Ground Zero specializes in flooding the country with its extensive stable of speakers.

It should be noted in passing that a number of formal nuclear disarmament initiatives have existed for many years, usually involving annual conferences of American and Soviet disarmament "experts" or peace advocates. Chief among these are the Pugwash and Dartmouth conferences which have become a tradition, the "Airlie" conferences which feature antinuclear declarations by U.S., Soviet, and other foreign medical authorities, and the Stanley Foundation's conferences. Their efforts have by no means stirred sizable grass-roots reaction.

THE EUROPEAN CONNECTION

The ongoing U.S. nuclear freeze campaigns are closely associated with similar efforts in Western Europe. Indeed, there is a which-came-first question. It is difficult to tell whether individual freeze initiatives began in America and/or Europe. It is clear, however, that close coordination and cooperation exists between some U.S. groups and activists on the other side of the Atlantic. For example, a West German Protestant disarmament activist credits the American group Clergy & Laity Concerned with originating the disarmament campaign ideas put to use in Germany.

On the other hand, British Roman Catholic priest Bruce Kent heads an organization called Campaign for Nuclear Disarmament, which has led the drive to create local "nuclear-free" regions in many parts of England. It is the special goal of CND (which includes a number of British communist members) to block the deployment of U.S.-made cruise missiles in Britain. CND also calls for unilateral British disarmament, particularly an end to British ownership of Trident-equipped submarines. In early 1982, Kent and other CND persons toured a number of U.S. cities and universities, in a briefing and propaganda campaign arranged by the AFSC's Peace Committee, CALC, and others.

Similarly, SANE recently imported such German nuclear disarmament figures as Petra Kelly and retired Bundeswehr general Gerd Bastian, to speak against U.S. nuclear weapons programs. Ms. Kelly exemplifies the inextricable interconnection between U.S. and European "peaceniks." Stepdaughter of a U.S. military officer, reared in West Germany and educated in U.S. universities, she participated in antidefense activities in Washington from 1966 to 1970. Returning to Europe as a European Common Market advisor in Brussels, Kelly worked her way up to into a leadership position in the West German "Green" (ecological) movement, which soon reoriented itself toward antinuclear issues. She and Bastian were leaders in the "Krefeld Appeal" of 1981, which induced over two million Europeans to sign a call for an end to nuclear weapons in Europe. The German news magazine *Der Spiegel* describes Kelly as "the personification of activism," and "always under high tension." On either side of the Atlantic she is a driving force in movements to disarm the West.

THE SOVIET CONNECTION

Demonstrating the interconnections between such movements and U.S. counterparts is not especially difficult. Tying them directly to Soviet interests, however, is another matter. Only occasional bits of information appear which clearly show Soviet coordination or control of European disarmament groups. For example, TASS employee Vadim Leonov was obliged to leave the Netherlands after it became known that he had passed orders and funds to Dutch communist and peace groups. Similar incidents have occurred in the Scandinavian countries.

No such Soviet intelligence links to American organizations have been made public. However, we can cite in this regard statements made in a CIA report to the Congress in 1980: "Soviet international fronts—organizations which appear to be independent from the CPSU but in fact are funded and guided by Moscow—were and are active in issuing propaganda statements supporting Brezhnev's [disarmament] proposals. . . . The World Peace Council (WPC), largest of the thirteen major Soviet front groups, has played a leading role in organizing demonstrations and in issuing formal condemnations of NATO plans."

Among the more than 130 worldwide affiliates of the WPC is the United States Peace Council (USPC), which is headquartered in New York City. We can catch a glimpse of the close liaison which exists between this group and its parent body by noting that it hosted a ten-city speaking tour of the United States by the WPC a year ago. The delegation included WPC president Romesh Chandra, a member of the Central Committee of the Indian Communist party.

This year the USPC is participating actively in the June 12 demonstrations planned to coincide with the U.N. Special Session on Disarmament in New York. The Council outlines its own contribution to this occasion: "For our part, we will make special efforts to guarantee massive participation from labor and the Black, Hispanic and other oppressed minority communities."

The futility of gestures by peaceniks like E.P. Thompson to press their disarmament ideas "deep into Russian opinion also" was shown with special clarity on April 19, when seven West European disarmament activists attempted to unfurl a banner and hand out leaflets in Moscow's Red Square. KGB agents, apparently alerted in advance, hustled the men off before a single leaflet could be passed out.

Some disarmament sentiment has been manifested in East Germany, chiefly among Protestant leaders and conscientious objectors. The fact that this trend also has elements of pan-German nationalism, calling for a unified Germany free of both U.S. and Soviet military power, has made the Soviets uneasy. This resulted in an official East German crackdown on any displays of this sentiment. Police have stripped peace emblems from the jackets of hundreds of students, and some have been threatened with dismissal from higher education. The Soviet Union is spending billions of dollars to spur disarmament initiatives in the West. But this is strictly a one-way street; the communist system cannot afford to allow citizen participation in its security policies.

THE SOVIET CONNECTION GOES PUBLIC

A new avenue of linkage, however, between U.S. disarmament groups and the Soviet Union seems to have been opened in recent months. This phenomenon, carried on with little attempt at secrecy could have far-reaching implications for U.S. security.

Last December, Randall Forsberg, the intellectual mother of the present freeze movement, spent two weeks in the Soviet Union, apparently under the auspices of the AFSC. While there she conferred with Soviet disarmament experts at "five research institutes."

In April of this year a delegation of eight persons from the U.S. Peace Council also traveled to Moscow, according to the *Daily World*, at the invitation of the Soviet Peace Council. The *Daily World* quotes the vice chairman of the Soviet group to the effect that *the stated goals of the American representatives "fully coincided with the goals of the Soviet Peace campaign."* These goals include "negotiations to prevent the introduction of additional nuclear weapons in the European theater." In other words, the Pershing IIs and cruise missiles must be excluded, but the Soviet SS-20s can remain.

An even more blatant flouting of U.S. security interests was the trip to Moscow, also in April, of a ten-member delegation sponsored by the leftist think-tank Institute for Policy Studies. According to the *Washington Post's* Moscow correspondent, these Americans, including top IPS brass Robert Borosage and Marcus Raskin, conferred with five members of the Communist Party of the Soviet Union. Among the latter was Vadim Zagladin, deputy chief of the party's International Department. In its report to the Congress in 1980, cited earlier, the CIA said that the International Department "maintains liaison with many foreign organizations which are frequently used to disseminate Soviet propaganda and views on international affairs."

With such major U.S. antidefense groups forging direct connections with the Soviet government, *inside the USSR*, there is less need for intrigue, for Soviet diplomats or TASS "correspondents" to risk disclosure for paying off Western disarmament groups. The United States now has no effective mechanism to block this form of subversion, in the absence of an Attorney General's list or other specific legislation; indeed, we cannot even define the term. Citizens like Forsberg and the IPS chiefs can travel legally and openly to Moscow, and there receive advice, instructions, or whatever, directly from the party hierarchy. The doors and windows to U.S. society are wide open, and the American left is taking advantage of it by riding the Moscow shuttle.

It should be noted also that Soviet policies can be targeted directly against the Congress, through the medium of the quasi-official Members of Congress for Peace through Law. This body is closely linked to the IPS, for example, through its participation in the "Washington Seminars" conducted by IPS.

IMPACT OF THE FREEZE MOVEMENT

The freeze has probably achieved much of its impact from the fact that the media have over-reported the issue. For example, across the country the public response to the "Ground Zero Week" of last April fail completely to match the exaggerated attention given to it in advance by network and local television and *Newsweek* magazine.

By contrast, the American Security Council's Peace Through Strength Resolution has been passed by more state legislatures (13 states plus the territory of Guam) than have adopted the Kennedy-Hatfield freeze

resolution (eight), and has been sponsored by more members of the U.S. Congress (288) than have endorsed the freeze (about 190). This record has been achieved in spite of the fact that Peace Through Strength has never once been mentioned on any evening TV news program.

The fact that these successes have been scored by Peace Through Strength without benefit of intense media "hype," and without the aid of a corps of dedicated activists, shows clearly that the tenets of Peace Through Strength reflect truer indications of American sentiment regarding the threat of nuclear war than do the craven alarms of the freeze proponents. A majority of Americans obviously still face the future with courage, resolve, and hope.

A blizzard of pamphlets, resolutions, and even bound volumes advocating various forms of nuclear arms freeze has blanketed the country in a few short months. Kennedy-Hatfield's Freeze has managed to upstage so far the mammoth statement of the freeze philosophy in the book by Jonathan Schell, which has yet to appear in bound form (the text has been released in three installments in the New Yorker magazine). Hundreds of pages of material, pro and con, have been entered into the Congressional Record, and every editorial writer in the nation has aired his opinion of the movement.

One of the most reasoned of the comments was that of columnist David Wilson in the Boston Globe of April 12, 1982. On the question: "What ought I to be doing, at this instant, to prevent nuclear war?", Wilson says:

"The instinct is to 'do something.' Of course, doing nothing is, in a way, doing something, and frequently is the most benign course among options of conduct. . . .

"To be opposed to nuclear war is rather like being opposed to crime or cancer. Everybody is, but very few know how to go about it. . . .

"The certain consequence is that those individuals who vote and campaign for a freeze will experience the satisfaction of believing that they have 'done something' to stop nuclear war. The act will make them 'feel good.'

"Instead, it seems to me, they are increasing the likelihood of conflict by inviting hostilities to arise from existing and potential situations of tension around the world.

"What Americans certainly can anticipate, as spring warms into summer this year, is a new and divisive national debate in which political partisanship and ambition will be mixed with religious conviction and misguided idealism in a confrontation remarkably resembling the anti-war movement of the 60s."

Wilson's description touches on two key points which should be kept in mind in regard to the freeze and similar disarmament initiatives. First, the great majority of concerned persons who become involved in some form of political or social action in this vital and emotional issue are well-intentioned, patriotic citizens.

At the same time, however, it should be clearly understood that many of the activists in the new "freeze" organizations are professional leftists with backgrounds of prior work in antidefense causes. Among themselves, and in the literature of the "alternative" world, they make no secret of their political beliefs and aims. A majority of these professionals are Marxists of some stamp or other, whose whole lives have been devoted to bringing about the eventual end of the capitalist system in America. Heated issues such as survival in the nuclear age offer them unexcelled opportunities to weaken our country's defenses and thereby bring the attainment of their goal a little nearer.

The other point is that the nuclear freeze issue promises to become as divisive as the Vietnam war. The parallel may be even closer than envisioned by Wilson, since many of the freeze leaders were deeply involved in the radical organizations and movements during that period. Some of the present groups date from Vietnam days; others are skeleton cadres from such groups, but with new names and causes to exploit the problems of today's world.

There are other valid objections to the idea of an immediate nuclear freeze. One of these is the realistic fact that a blanket freeze of *all* nuclear weapons really does not correspond to Soviet desires at this point, in spite of Brezhnev's apparent willingness. The Soviets want more military advantage, not a freeze. Therefore, the whole exercise is futile on face value, *except as a devise to frighten and confuse the American public and halt American military programs.*

Another objection is the unlikelihood that the Soviet Union will ever agree to a reliable verification system which would cover all aspects of R&D, testing, manufacture, and deployment. As Stubbs points out, the claim of the freeze proponents that all this is feasible by "national technical means" is patently ridiculous.

But the most basic flaw in the freeze concept, in our view, is that it focuses on the existence of nuclear weapons as the primary threat to America. In reality the overriding menace is the inescapable fact that the Soviet Union is bent on winning, on imposing its political system on the world, by any and all means possible. This is the impetus for the massive "peace" offensive aimed at locking us into inferiority.

Therefore, as opposed to a freeze of nuclear weapons followed by negotiations aimed at reductions—with no guarantees or stipulations ahead of time—the American Security Council believes that the proper policy for our national security is to place primary reliance on our national strength. The U.S. should and must be willing to negotiate, but it must avoid the delusions and self-deceptions of the past 12 years of SALT. Detente is not only dead; it never lived. We have tried the course of self-restraint and unilateral arms reduction, in the hope of Soviet reciprocation. There has been no reciprocation. Moreover, the United States must enter any new rounds of negotiations with a full appreciation for the fact that the negotiating process is not important of and by itself. What is important are the terms of the finished product. In the interest of our freedom we must set as our high standard the resolve that we will not accept any arms control agreement which does not truly contribute to world peace and stability and enhance our own survival.

THE COUNTERFEIT PEACEMAKERS: ATOMIC FREEZE

(By Rael Jean Isaac and Erich Isaac)

WHO'S BEHIND THE POLITICS OF NUCLEAR NEUROSIS? THE CRABSHELL-KREMLIN ALLIANCE?

What the media have dubbed a "peace crusade" is sweeping the country. It centers on something known as the Nuclear Freeze petition, which calls for a mutual freeze by the United States and the Soviet Union on the testing, production, and deployment of nuclear weapons and their delivery systems. Nuclear freeze petitions are on street corners, in front of super-markets, in churches and synagogues. State legislatures have passed freeze resolutions with scarcely a demurring vote. In California, a drive to put the freeze on the ballot collected the requisite 350,000 signatures in two months and more than twice that number are expected to be collected by the deadline for submitting them. There seems every prospect of its passage, since polls show that Americans would vote for a freeze on local bollots by a margin of 3 to 2. Mass demonstrations are on the way, scheduled to coincide with the UN Special Session on Disarmament beginning June 9. Some of their footpower will come from the campuses, energized by April's week-long teach-in campaign.

Every effort is being made to galvanize the unimaginative. In the first week of March, buildings, signs, office elevators, and windows at 17th and M Streets in Washington, just north of the White House, were plastered with two-inch circular gummed labels that said: "Flash! Boom! You're dead!!!" The presumably startled reader was enlightened by the small print: "A small nuclear bomb explodes over the White House. Standing here, you have a 98 percent chance of dying immediately, from leveled buildings, intense heat, lethal radiation, or debris flying to 500 m.p.h." On a national scale there is the effort of a group called Physicians for Social Responsibility to spell out the physical suffering their audiences will experence following a nuclear explosion: the starvation, dehydration, radiation sickness, and infections. These doctors will provide you with an entire bibliography explaining the horrible aftermath of nuclear war and their total inability as physicians to help any of the survivors. (Not that they want to improve their capacity to cope. Far from urging rational civil defense measures, which the Soviets have taken, a film produced by the Physicians for Social Responsibility includes a statement that it is a breach of medical ethics for a physician to participate in planning for emergency medical services in the event of nuclear attack.)

While no one doubts the dreadful consequences of nuclear war and the need to avert it, this can scarcely explain the peace crusade. The nuclear age has been with us since 1945. Why the sudden ferment, to the point that a Wall Street Journal front page headline reports "Town of Pella, Iowa talks of little other than nuclear attack"? Where did the nuclear freeze come from? Where do its initiators plan to take us? Answers to these questions are in order before the public throws itself headlong into a current whose direction it little understands.

The nuclear freeze was initially coordinated in early 1980 by two pacifist organizations: the American Friends Service Committee (AFSC) and the Fellowship of Reconciliation. The first is wealthier and better known, but both originated at the end of World War I as religiously based organizations committed to nonviolence. The freeze quickly won the support of almost all the organizations that make up what in current jargon could be called "the peace community." These are both pacifist and nonpacifist groups devoted to reducing the prospects of war: The best established of those who signed the initial "Call to Halt the Nuclear Arms Race," as the freeze was originally titled, were Clergy and Laity Concerned and SANE (which have been the most active in procuring signatures for the freeze), Mobilization for Survival, Pax Christi (a Catholic organization), Riverside Church Disarma-

ment Program, and Women's International League for Peace and Freedom. Once the freeze caught on, the Nuclear Freeze Weapons Campaign, consisting primarily of organizations which signed the initial "Call," decided to establish a special clearing-house in the center of the country. Using the tax exemption of one of them (the Council for a Liveable World Education Fund), the clearing house opened in St. Louis in January 1982.

Most Americans have a warm, if hazy, image of peace organizations, especially pacifist groups, whose dedication to nonviolence is seen as admirable, if impractical. A closer look, however, would produce some major surprises. The major pacifist organizations—the AFSC, the Fellowship of Reconciliation (FOR), the War Resisters League (WRL), and the Women's International League for Peace and Freedom (WILPF)—are centers of radicalism whose relation to nonviolence is highly problematical, since in practice they condone violence to achieve the goals of what the Left defines as, "liberation movements". The distinction between pacifist and nonpacifist peace organizations, indeed between most peace organizations and radical left-wing political groups, has become a distinction without a difference.

Intrinsic to pacifism, of course, is the view that means and ends cannot be separated, and all the pacifist organizations continue to pay lip service to this principle. A 1980 article in the Fellowship of Reconciliation's journal states the case as eloquently as ever: "Nonviolent activists dispute the assertion that the end justifies the means: they see means and ends as one and inseparable. . . . The means invariably become embodied in the end, however noble, and skew and distort that end—often beyond recognition." The article quotes a pithy phrase: "You can't grow a rose from a cactus seed." Similar passages could readily be produced from every pacifist publication.

One dramatic example of the gap between pacifist rhetoric and reality is the attitude of these groups toward the Palestine Liberation Organization. As the world's chief terror organization, the inspiration and actual training agency for the world's proliferating terror groups, from the Baader Meinhof to the Red Brigades to a host of groups in Latin America, the PLO should be especially abhorrent to pacifists. Instead, the attitude of the pacifist organizations toward the PLO is one of warmth, even admiration. For example, in 1975 the Fellowship of Reconciliation sent a group to PLO headquarters in Lebanon. The members returned to praise the PLO officials with whom they had spoken, and were particularly enthusiastic about one whom they said "spoke in near pacifist terms about guerrilla violence." (The very fact that such a phrase could be formulated says something about what has happened to American pacifism.) One member of the Fellowship group criticized Secretary of State Henry Kissinger, then engaged in his famous "shuttle diplomacy" in the Middle East, for "inviting Palestinian militants to return to terrorist tactics in the absence of any peaceful alternative for justice." If the United States did not give the PLO what it wanted, the PLO had no "alternative" except violence.

The Women's International League for Peace and Freedom seems almost obsessed with the PLO. In a recent year its journal, Peace and Freedom, ran ten articles on the Middle East, the purport always the need to involve the PLO. WILPF's 1979 resolution on the Middle East calls for negotiations with the PLO without any suggestion that the PLO abandon terrorism or recognize Israel's right to exist. International WILPF (for years headed by Americans, first Kay Camp, now Carol Pendell, wife of a Methodist minister in California) sent its journal's editor as the organization's delegate to a PLO conference in Lebanon. This pacifist lady described with obvious relish being "driven into town escorted by jeeps full of Palestine Liberation Army soldiers" who permitted nothing "to break our line." Her only regret was that "more of us could not be there to come to understand why the struggle of the Palestinian people must continue."

The AFSC meanwhile has done more. Its activities in Israel, ostensibly "humanitarian," provoked the Israeli government to the point where it sought to remove the AFSC's Middle East respresentative for pro-PLO activities. The AFSC maintains a Community Information and Legal Aid Center in East Jerusalem. While the Israeli authorities were told it would be a counseling center, it rapidly developed into a legal aid service for captured PLO terrorists. In an interview in 1979 Jean de Muralt, then its director, said: "We help the small fry. The big people have their own connections and don't need our help." In the United States the AFSC has organized lobbying efforts on behalf of the PLO and speaking tours for its propagandists.

The identification of pacifist organizations with the PLO is a particularly striking illustration of the breakdown of pacifist principles; however, instances of pacifist support for terrorist groups could be multiplied. Almost any Third World "liberation movement," provided it attacks the West, can count at the very least on full moral support from the U.S. pacifist organizations whose fundamental principle, to use the words of an AFSC brochure, is that "violence can never be right."

Although the breakdown of American pacifism is a phenomenon only of the last fifteen years, the tensions that led to its disintegration are much older. They stemmed from the conviction of pacifists that war would be eliminated only if the cause of war were eliminated, this cause being social injustice. With the Bolshevik Revolution, many pacifists became attracted to revolutionary Marxism and its promise to eliminate injustice once and for all. The Fellowship of Reconciliation was the most influential pacifist organization in the interwar years, and it was repeatedly battered by conflicts between those who opposed all violence and those who were convinced that class warfare was necessary to prevent international warfare. The Fellowship came down on the side of non-violence, and in the mid-thirties, the dissidents—who at one point included the organization's executive secretary, J. B. Matthews—were forced to resign. The most famous American pacifist, A. J. Muste, briefly left the Fellowship for a fling at Communism, becoming general secretary of the Communist League of America, a section of the Trotskyite Fourth International. He returned to pacifism, and the Fellowship, in 1937.

All this ferment left its mark. While still a pacifist but undergoing the intellectual development that would make him, if only temporarily, a Communist, Muste developed a radical conception of pacifism outlined in his 1928 essay, "Pacifism and Class War." Here he expanded the definition of violence, declaring that "the basic fact is that the economic, social, political order in which we live was built up largely by violence, is now being extended by violence and is maintained only by violence." He insisted that since 90 percent of the violence in the world was perpetrated by forces of the status quo, it was somewhat "ludicrous" that public concern centered on the 10 percent of violence used by rebels against repression. Not only did Muste minimize the importance of revolutionary violence, but he argued that it is improper even to counsel nonviolence so long as we benefit from the existing "violent" order.

After World War II, Muste's doctrines became pacifist orthodoxy. Conscientious objectors, particularly those who chose prison over the forms of alternative service offered by the government, emerged with a new conception of nonviolent tactics as the way "to shake the present order to its foundations." Although the Fellowship initially resisted, the War Resisters League (a nonreligiously based pacifist group that developed out of the Fellowship in 1923) resolved in 1947 to work for "political, economic and social revolution by nonviolent means." David Dellinger, a member of the League's executive committee, published a paper called Direct Action whose first issue advocated "strikes, sabotage and seizure of public property now being held by private owners." One writer suggested that a mass invasion of A&P supermarkets by housewives with hungry families, for the express purpose of emptying shelves, would be a good way of keeping down the profits of the masters." The editor felt called upon to object, protesting that "taking goods surreptitiously" would imply they rightfully belonged to store-owners, "thereby continually paying homage to capitalist ideals of property."

What happened when Muste's broadened definition of violence was accepted was that the distinction between violence and nonviolence disappeared. All governments, including democratic governments, were violent because they implicitly had the sanctions of violence behind them. There then was no way of distinguishing between the violence of the status quo and the bombs and guns of the revolutionaries who challenge it. Indeed revolutionaries were to be preferred, for they merely respond to the prior violence of the established order and seek to achieve greater justice.

Pacifists thus have so extended the meaning of violence that it no longer even refers to the use of force, implicit or explicit. According to David McReynolds, a War Resisters League staffer, nonviolence is "most deeply violated" when it is confined to the area where "the state kills people"; poor housing, racism, and sexism are equally "violent," and the violence of unemployment is as real "as napalm falling on Vietnam." An article in the Fellowship of Reconciliation's Fellowship claims that "where a woman is denied equal pay for equal work . . . it is an example of violence." War Resisters League President Norma Becker believes all our institutions must be overturned "because unless these institutions are eradicated," it doesn't seem likely that we "will be in a position to really practice nonviolence."

Another revealing glimpse into modern pacifism comes from the reading list compiled by the War Resisters League in response to requests for books on the meaning of pacifism and nonviolence today. Under the heading of "Race" the League offers five books, two of them attacks on nonvio-

lence: Eldridge Cleaver's Soul on Ice and Frantz Fanon's extended paean to the therapeutic power of violence, Wretched of the Earth. Under "Socialism" seven books are offered, including the Communist Manifesto, German Communist Rosa Luxemburg's The Russian Revolution, and Carl Oglesby and Richard Shaull's Continuity and Change. (Oglesby was a New Left organizer and Shaull is a liberation theologian who believes that only at the center of the revolution can man "perceive what God is doing.") Under the heading of "Biography" one would expect to find books describing the lives of great pacifists. But of the eight biographies presented, only two are of pacifists. Among the others are Leon Trotsky, labor radical Eugene Debs, anarchist Emma Goldman, and black revolutionary Malcolm X.

While pacifist identification of revolutionary socialism with "justice" is the most obvious explanation for such reading lists, there may be deeper factors involved in the power violent revolutionaries have exercised over the imagination of modern pacifists. George Orwell, writing during World War II, noted the attraction some leading pacifists felt toward Hitler. A revealing reply to Orwell's charges came from D. S. Savage, one of the pacifists to whom Orwell had pointed. He wrote:

"The pacifists' championing of Hitler referred to by Orwell is simply a recognition by us that Hitler and Germany contain a real historical dynamic, whereas we do not . . . Personally I do not care for Hitler. He is, however, 'realler' than Chamberlain, Churchill, Cripps, etc. in that he is the vehicle of raw historical forces, whereas they are stuffed dummies, waxwork figures, living in unreality."

Although it is difficult to know to what extent modern pacifists respond to a sense that Yassir Arafat represents "raw historical forces" in contrast to the "waxwork figures" cut by Western statesmen, there may well be a psychological component of this sort in the attraction men who live by violence exert upon those who have renounced it.

Given the breakdown of pacifism in traditional pacifist organizations, it is hardly surprising that the formally nonpacifist peace organizations that have sprung up since World War II have also come to identify with violent movements. The most important to develop prior to the Vietnam war were SANE in 1957 and Women Strike for Peace in 1961, both of which arose to protest nuclear atmospheric testing. (Physicians for Social Responsibility also dates to 1961 but became moribund until revived by pediatrician Helen Caldicott in 1979.) The Vietnam war produced a series of organizations, the most lasting of which has been Clergy and Laity Concerned about the Vietnam War (CALC). After the war was over, it dropped the last four words in its title. CALC is now simply "Concerned," chiefly about the evils of the American Empire. Several of the prominent peace organizations are coalitions: The Coalition for a New Foreign and Military Policy brings together many of the organizations active against the Vietnam war, especially the churches; the Mobilization for Survival combines anti-nuclear energy groups with disarmament and radical political groups.

Insofar as they are influential, disarmament movements by their very nature serve to weaken Western defenses and inhibit the willingness of Western countries to project their forces beyond their borders. It thus goes without saying that these movements are an obvious target for Soviet manipulation and penetration. If the Soviet Union can manipulate them to focus exclusively on Western disarmament and discount the existence of external threats—or better still to serve as apologists for aggressive Soviet actions—they are even more useful to the Soviets. The point is to help the Soviet Union project an image of itself as the major force for peace in the world, its initiatives thwarted by Western militarism.

The Soviet Union has a front organization, the World Peace Council (WPC), designed to identify the Soviet Union as the world's chief force for peace among Third World countries and to manipulate Western public opinion, especially Western peace movements, on issues the Soviet Union deems vital to its interests. Created shortly after World War II, the WPC sponsored the Stockholm Peace Petition Campaign of 1950 as its first major effort. The Campaign obtained almost 500 million signatures worldwide, over a million of them in the United States, where most of the signatories had no idea of the campaign's origin. In 1975 the WPC launched a second Stockholm Peace Petition, this time obtaining 700 million signatures.

While the WPC has devoted much effort to extolling the Soviet Union, promoting Soviet-backed liberation movements, and attacking the United States and its "puppets," it has in the last few years assumed an even larger role mobilizing the Western disarmament protests. It has been trying to block U.S. plans to modernize NATO's Theater Nuclear Forces with medium range Pershing II and cruise missiles and to upgrade NATO's antitank capabilities with neutron bombs. In an article in Ons Leger in October 1981, Dutch journalist J.A.E. Vermaat analyzes the extensive role the World Peace Council and a sister Soviet front, the Christian Peace Conference, have played since 1977 in the Dutch peace movement, that major testing ground in the Soviet effort to promote Western disarmament initiatives. Obviously pleased by the success of the Dutch movement and its spread throughout Western Europe, Boris Ponomarev, veteran head of the Communist Party's International Department, told a group of Soviet and foreign scientists in 1981 that even though the antiwar movement had reached unprecedented proportions, "the interests of preserving peace call for further development of the anti-war movement."

The World Peace Council, of course, is the most transparent of fronts, the "peace" in its title the purest Orwellian doublethink. IN 1975 the Council gave its highest award, the Frederic Joliot-Curie Gold Medal for Peace, to Yassir Arafat. That same year it gave a lesser peace award to Lolita Lebron as an "outstanding Puerto Rican freedom fighter . . . who has been in U.S. jails for the last 20 years." (Lebron was one of four Puerto Rican terrorists who opened fire on the U.S. House of Representatives from the visitors' gallery during the Truman Administration.) Another former winner of the Joliot-Curie Gold Medal for Peace is Leonid Brezhnev. On its thirtieth anniversary the World Peace Council celebrated ever new "victories for peace" in "Ethiopia, Afghanistan, Iran." Presumably to help celebrate one of these Soviet "victories for peace," the WPC has scheduled its next meeting in Afghanistan.

In reaching public opinion in the United States, the WPC has been aided since 1979 by the presence of an American affiliate, the United States Peace Council. The groundwork for the U.S. Peace Council was laid in 1975 when a nine-member delegation from the WPC came to this country to publicize the WPC's Second Stockholm Peace Petition.

The reaction of established U.S. peace organizations to the WPC visit was revealing. In the past, and for all their internal tensions, U.S. pacifist organizations would have been wary of Communist manipulation. "Communist-inspired 'peace campaigns' are not genuine," announced the Fellowship of Reconciliation when the first Stockholm Peace Campaign was launched, and lead "to building up the Communist party rather than pacifism or peace." This time, however, none of them decried the delegation as a fraud and several in fact used their standing to give the delegation credibility among unsuspecting American political and religious leaders. The delegation's Washington visit, for instance, was coordinated by Edith Villastrigo, director of the Washington office of Women Strike for Peace. As a result, the WPC delegation was able to meet with twenty members of Congress (several of whom hosted a luncheon for the delegation) and was welcomed at the Methodist Church Center by leading clergymen. Thanks to preparations by various peace and church groups in the fifteen cities it visited, the delegation met with local and state officials, spoke at church meetings, campuses, even high schools (the delegation reported that following its presentation at University High School in Milwaukee many students asked if they could join the World Peace Council). Delegation members appeared on television and met with editorial boards of major daily newspapers.

Indeed, the reception accorded this delegation of the world's leading communist front was nothing short of amazing. In New York City, Ambassador Angier Biddle Duke, on behalf of then mayor Abraham Beame, presented delegation members with Bicentennial Medals. In both Los Angeles and Milwaukee the delegation accepted mayoral proclamations in its honor. In Detroit the delegation won a sheriff's escort and keys to the city. It also accepted a "Spirit of Detroit Award" given to the WPC for its "substantial effort to achieve peace." In South Bend, Indiana, the delegation received keys to the city and a luncheon in its honor was given by the Chamber of Commerce! In each community—and the delegation also visisted Seattle, Cleveland, and San Francisco—the group left behind what it described as an "ongoing WPC committee." Local Peace Councils already existed in Los Angeles and Chicago. The delegation's report mentioned that the Chicago Peace Council would continue "as always to maintain contact with the WPC."

The seeds planted by the delegation came to fruition in 1979 with the establishment of the United States Peace Council. The Communist Daily World hailed its advent, saying the organization "may mean the difference between life and death for humanity." WPC President Romesh Chandra showed up for the first national conference, echoing in his speech the WPC line that liberation struggles are the peace movements of their people. In the words of this former member of the central committee of the Communist Party of India:

"People ask me, 'You are a peace movement. Why do you support the armed struggles in Nicaragua. Palestine, Vietnam?' And I reply, 'The armed struggle in these countries is the peace movement.'"

U.S. Peace Council executive director Michael Myerson, a long-time official of the U.S. Communist Party, announced at the conference that "the main threat to world peace is the U.S. military industrial machine."

Wherever possible, the resolutions passed by the conference packaged Soviet foreign policy objectives to appeal to segments of American society. The conference appealed to the anti-nuclear energy movement by linking the need to shut down nuclear plants with "the recognition that nuclear arms production is even more dangerous and needs to be shut down also." It appealed to distinctive American preoccupations by emphasizing the threat "the draft poses to human rights." It resolved not only to work closely with existing anti-draft registration organizations but to form a GI and Veterans Committee "to organize the thirty million American veterans and two million GIs to fight for peace."

On the whole, however, the conference simply passed resolutions conforming to major Soviet objectives: support for Third World liberation movements and U.S. disarmament. It passed a resolution, "In Solidarity with the Arab People of Palestine and Their Central Issue: Palestine," which condemned the Camp David accords as "a cornerstone of a new U.S. offensive in the Middle East." Another resolution called for withdrawal of U.S. bases from the Philippines and an end to all aid to that country. On the other hand, resolutions called for U.S. aid to Communist Vietnam, Laos, and Kampuchea. Other resolutions concentrated on cutting back U.S. defense expenditures and "forming coalitions of peace groups." Resolutions were passed opposed to all new U.S. weapons systems.

The U.S. Peace Council has established a "Peace Education Foundation," which has received tax exempt status from the IRS. The Fund is headed by Abe Feinglass, a World Peace Council Presidium member and secretary-treasurer of the Amalgamated Meatcutters Union. The Fund has announced plans to explore the effects of the military budget on blacks and other minorities. At its second national conference in 1981, the U.S. Peace Council established a youth caucus, designed to reach out to junior high and high school youth with antidraft and antiwar themes, and announced development of a curriculum guide for courses on peace in public schools.

Even the symbol at the top of U.S. Peace Council literature tells the story: It is a dove shaped into a clenched fist.

It is bad enough that established U.S. peace organizations have failed to denounce the U.S. Peace Council and its transparent effort to channel the desire for peace to serve Soviet purposes. But even worse than their silence has been that virtually all of them have become involved with the U.S. Peace Council in some way. Before its founding conference the U.S. Peace Council issued a "Call" which said:

"We who initiate this Call believe that there is a peace majority in our country. . . . We seek to help organize our peace majority in its entire spectrum because only then can our people compel peace."

Those who gave their names as sponsors of this Call in effect endorsed the U.S. Peace Council as a bona fide peace-seeking organization. Yet the sponsors included the president of the Women's International League for Peace and Freedom, the executive director of SANE, the disarmament coordinator of the American Friends Service Committee, the director of the Washington office of Women Strike for Peace (who had coordinated the 1975 WPC visit), and a leader of Clergy and Laity Concerned. For many, more than sponsorship was involved. At the founding conference the executive director of SANE, the disarmament director of the AFSC, an official of the Women's International League for Peace and Freedom, and a representative of Clergy and Laity Concerned conducted workshops. When the U.S. Peace Council took out a full-page ad in the New York Times in June 1979 to attack Joan Baez and others who had criticized human rights violations in Vietnam (the U.S. Peace Council ad countered that "Vietnam now enjoys human rights as it has never known in history"), it was signed not only by assorted Communists and far leftists, but by the president and vice-president of Women's International League for Peace and Freedom and by several leaders of Clergy and Laity Concerned.

Two pacifist organizations were conspicuous by their absence as sponsors of the U.S. Peace Council "Call"—the Fellowship for Reconciliation and the War Resisters League. The League did send an observer to the 1979 U.S. Peace Council conference who was sufficiently disturbed by the proceedings—she noted that Communist Party literature was "everywhere"—to prepare a critical statement which she tried to read to those assembled. The organizers, however, told her that there was "no time."

Nonetheless, the Fellowship and the War Resisters League together with the other peace organizations have been working with the U.S. Peace Council in a series of strategy groups set up to plan demonstrations for the UN Special Session on Disarmament scheduled to begin this June. Indeed the U.S. Peace Council has begun to show up regularly at meetings of the various peace organizations. Add to this the increasingly frequent references in peace group literature to joint local projects of peace and Peace Council groups and the picture is clear: The U.S. Peace Council is fast becoming an accepted member of the "Peace Club."

Nor are joint strategy sessions the only form cooperation takes. The Mobilization for Survival (MFS) can serve as a model of how Communist and peace organizations have become intertwined. Until recently, when the size of the crowds expected this June made it too much for one organization to handle, the MFS has primary responsibility for organizing the mass demonstrations planned for the Second UN Special Session on Disarmament. (Now, organizing will be done by over a dozen groups making up the June 12 Rally Committee, among them the U.S. Peace Council.) According to the published accounts by MFS leaders, the organization was established in 1977 after Peggy Duff, a leader in the British disarmament movement long active in the World Peace Council, told U.S. peace group representatives that the first UN Special Session on Disarmament (which started as a WPC project in 1975), scheduled for May 1978, was of "historic importance" and it was up to American peace groups to make sure it had maximum public impact. Labor organizer Sidney Lens, long active in the Chicago Peace Council, and sociology professor Dr. Sidney Peck, identified in a 1970 staff study prepared for the Internal Security Committee of the House of Representatives as a member of the Wisconsin State Committee of the Communist Party, took the initiative in establishing the Mobilization for Survival which then organized demonstrations in connection with the 1978 UN Special Session on Disarmament. According to its own no doubt generous estimate, MFS was able to produce only 25,000 demonstrators for that first disarmament session. It is a mark of the peace-movement explosion about 250,000 demonstrators are now expected. A delegation is coming from Europe, and from Japan alone 1,000 demonstrators are being flown in.

The Fellowship of Reconciliation and the War Resisters League and other pacifist organizations became part of MFS upon its founding in 1977. So did SANE and Clergy and Laity Concerned, the U.S. Communist Party with three of its fronts, and in 1979 the U.S. Peace Council. The third element in the MFS was anti-nuclear energy groups. No national environmental organizations joined, but a host of local groups did, their names ranging from Mississippi Alliance for the Environment to the more colorful Appletree, Dogwood, Jackrabbit and Crabshell Alliance.

With a double constituency of anti-nuclear energy and anti-nuclear weapons groups, the Mobilization has worked on both fronts, using such slogans as "Zero Nuclear Weapons" and "Ban Nuclear Power." But there is little doubt that the primary interest of its leaders is in disarmament. A 1979 MFS demonstration in Washington, D.C. brought a World Peace Council delegation to address the rally, including Werner Rumpel, head of the East German Peace Council and Nicholas Schouten, a leader of the Communist Party of the Netherlands, who played a key role in organizing the anti-neutron bomb campaign there.

Those directing MFS activities wear a variety of hats. The head of its Labor Taskforce is Gil Green, a member of the U.S. Communist Party's central committee, whose major responsibility within the Party has been coordinating relations with peace organizations. Head of the MFS International Task Force is Terry Provance, who also heads the AFSC's Disarmament Task Force and was one of the sponsors of the U.S. Peace Council.

Needless to say, what such developments as the founding and growing acceptance of the U.S. Peace Council or the unabashed fellow-travelling of the Mobilization for Survival coalition signify is that the Soviets do indeed have input into the U.S. Peace movement. And whenever well-intentioned people, who are not necessarily wise people, have tried to cooperate with Communists for what they are persuaded are common goals, the results have been disastrous to the well-intentioned. So well did a socialist-pacifist like Norman Thomas learn this lesson that, shortly before America's entry into World War II, in his last ditch effort to keep America out of the war, he cooperated with the America First movement, which he detested, but refused to cooperate with the Communists (then opposed to entering the war because the Stalin-Hitler pact was in effect). Even A. J. Muste knew better than he spoke when he encouraged pacifists to enter into coalitions with Communists during the Vietnam era. At the time of the Korean War, Muste wrote that Communists advocate coalition governments because the strictly disciplined Communist Party always dominates such coalitions and before long takes them over. It is presumably a principle equally applicable to coalitions with Communists outside of government.

Does it then follow that the nuclear freeze is an example of successful Soviet manipulation? Is the specific proposal simply a target of opportunity, or is more involved? According to journalist Peter Pringle, writing in the New Republic, the nuclear freeze proposal had its origin in a meeting called by the American Friends Service Committee in the summer of 1979. Sidney Lens writes in April's Progressive that the freeze was "organized on the initiative" of Terry Provance and Randall Forsberg. Forsberg, formerly of the Stockholm Peace Research Institute, has now established her own think tank, the Institute for Defense and Disarmament Studies. Provance, as we just noted, is disarmament director of the American Friends Service Committee, head of the MFS International Task Force, and was a sponsor of the U.S. Peace Council. But he wears yet another hat. Terry Provance is one of 40 official U.S. members of the World Peace Council. He was elected to this position at the WPC's 1977 meeting in Warsaw. Whatever the case, it is clear that the Soviets want to see the freeze grow. Last August, when the AFSC was trying to build momentum for the freeze, it staged a three-day march in New England. En route the marchers were addressed by Yuri Kapralov, a counselor at the Soviet Embassy in Washington, who said that the Soviet Union had "a very favorable view of the idea of a weapons freeze." The International Secretariat of the Christian Peace Conference, the Soviet front that targets Western churches, declared at a meeting in Moscow in January 1982 that "the principle task of the peace movement today is to support all efforts for a freeze on nuclear weapons as a first step toward disarmament." The U.S. Peace Council has thrown itself into freeze work. U.S. Peace Council chairman Michael Myerson signed the initial "Call" for the freeze and the World Peace Council's Peace Courier in December 1981 praised the role the U.S Peace Council was taking in collecting signatures for it. U.S. Peace Council sponsor and U.S. delegate to the 1980 World Peace Council conference in Bulgaria Irving Stolberg, who is also a Connecticut state legislator, coordinated the campaign that passed the freeze proposal at the state level in Connecticut and Michigan state senators and U.S. Peace Council sponsors Jackie Vaughan III and Perry Bullard worked for it in the Michigan legislature.

There is small cause for wonder that the Soviet Union encourages the freeze campaign; Secretary Haig, however, calls it "not only bad defense and security policy . . . [but] bad arms control policy as well." The Administration's skepticism is warranted. the freeze is bad security policy because the U.S. land-based missile force is vulnerable to a Soviet first strike—and a nuclear freeze would freeze its vulnerability, ensuring the Soviet Union an enormous strategic advantage in any future negotiations. In Europe, now targeted by 300 Soviet mobile missiles equipped with 900 warheads, failure to deploy the Pershing II and cruise missiles would ensure its neutralization, eventually giving the Soviet Union the kind of dominant influence it exerts over Finland. It is bad arms control policy because the soviet Union would have no incentive to negotiate arms reduction—the goal of arms control policies—once its superiority were frozen. From the Soviet standpoint, the fervor over the freeze offers the opportunity to revert to earlier proposals and call them a freeze: Brezhnev has proposed that in exchange for a U.S. "freeze" in not deploying any weapons systems to counter the SS20s, the Soviet Union will withdraw the latter behind the Urals. Since the missiles are mobile, however, they could be returned at the Soviet Union's convenience; moreover, even from behind the Urals they could devastate any European target.

Does the Soviet Union want a freeze on nuclear weapons beyond Europe? Not if it is verifiable, i.e., with on-site inspection. (Aware of this, freeze leaders say satellite inspection will be ample.) For the Soviet Union the ideal situation is prolonged negotiations over the content (and method of verification) of a freeze, during which the United States would be restrained by public opinion from deploying new systems or even increasing defense expenditures while the Soviet Union methodically continued to build up its arsenal.

Nonetheless, the idea of the freeze has tremendous power. One organization, the War Resisters League, was initially lukewarm on the grounds that the freeze failed to make connections to "anti-racist, anti-sexist and a whole variety of other oppressed peoples' struggles." But this is precisely its attraction. The freeze appeals to the fears everyone shares of nuclear war and presents a measure that is simple, one the man in the street feels he can fully grasp. Moreover, it sounds even-handed for it calls upon the United States and Soviet Union to adopt a mutual freeze. And why should one expect the average person to think more carefully of the implications of the freeze when congressmen, with staffs hired to consider the ramifications of legislation, are piling on the freeze bandwagon? By March 10, 129 congressmen had announced they would seek a resolution of both houses asking the President to negotiate an atomic-weapons freeze.

Why have peace organizations, both the traditional pacifist ones and the newer breed of post-World War II organizations, shown so little resistance to Soviet manipulation? Why were the organizations, under their initial leadership, so much more wary of Communism? For one thing, some of the earlier leaders had been burned by actual experience and their subsequent vigilance sheltered a newer generation. Stalin's death was immensely important allowing the leaders of peace organizations to delude themselves that the Communist world had been transformed. The greater sophistication of some of the post-war peace fronts also played a role. The Christian Peace Conference, for instance, which gives Soviet policies a theological aura, convinced many organizations—and churches—that there are independent peace movements behind the Iron Curtain.

A major turning point in making cooperation with Communists acceptable was the Vietnam war. A. J. Muste's influence was again important. He eased pacifist fears of cooperating with groups that endorsed revolutionary violence by suggesting that radical pacifists were equally compromised by cooperating with those who "in practice are aligned with Western nations and are less sensitive to factors of violence, suppression and evil in American and Western culture than in the non-Western world." Critics within the pacifist movement charged that the end result of all the coalitions of peace groups and sectarian varieties of Communists was to destroy pacifism. Albert Hassler, a Fellowship of Reconciliation staffer for 32 years, and executive secretary from 1960 until his retirement in 1974, wrote:

"The question for pacifists, I think is whether, in their proper sympathy for the exploited and oppressed of the world, they are willing to justify the use of killing violence to rectify the situation, when it is used by 'liberation' movements. If they are, then pacifism itself was one of the casualties of Vietnam."

Nonpacifist peace organizations, including SANE and Women Strike for Peace, were equally affected. SANE experienced sharp divisions, with its executive director, Donald Keys, and others on the staff resigning after a number of chapters were captured by radicals. During the war years, a number of U.S. peace organizations began to send delegations to participate in World Peace Council conferences which, under Soviet guidance, were designed to coordinate activities in opposition to the war.

Deliberate Communist infiltration is yet another factor that has driven the peace movements leftward. SANE and Women Strike for Peace have been Communist targets from their inception. SANE was forced to purge itself of Communists in 1960, only three years after its formation; so successful had the infiltration been that a fourth of the chapters had to be expelled from the organization. But, as we have seen, with the Vietnam war SANE was again radicalized. In 1962, Congress held hearings on Communist infiltration of Women Strike for Peace. The women achieved a publicity victory by packing the hearing room with their babies and handing flowers to each of the women called to testify. In the end penetration continued unchecked. Lawrence Scott, an executive of the American Friends Service Committee who initiated SANE as an attempt to reach out to nonpacifists, acknowledged the problem of Communist infiltration over twenty years ago. He believed that pacifist organizations were better protected because of their refusal to separate ends and means. Of course, with the breakdown of the commitment to that principle, pacifist groups have become equally subject to infiltration and manipulation. The process is furthest advanced in Europe. According to the annual report of the Office for the Defense of the Constitution of the West German Ministry of the Interior, Communists have leading positions in the national executive of the West German War Resisters League.

But by far the most important factor in facilitating the transformation of the peace organizations into channels that, for all practical purposes, serve Soviet interests has been a common view of the world all the peace groups discussed here have come to share; the vision of the United States as the greatest threat to world peace and the chief agent of militarism, imperialism, racism, and economic exploitation. In a by no means atypical article, a Women's International League for Peace and Freedom staffer writes that United Staes society is "an oligarchy composed of a very few wealthy people who have been able to spread considerable well-being among their supporters, agents, willing serfs and the general public by plundering the ignorant and weak here and in other parts of the world." The cochairman of Clergy and Laity Concerned, John Collins, quotes approvingly the words of another CALC official who said that corporate capitalism "needs a hungry world to enable it to operate 'efficiently.'" A 1981 conference held by the War Resisters League on Feminism and Militarism turned into a burlesque of these causes. A graduate student in "Irish Liberation Theology" explained the sexism inherent in the neutron

bomb which "would destroy all that was born of women or the earth, while preserving men's creative efforts." A black lesbian organizer with the Marxist-Leninist People's Anti-War Mobilization tore into capitalism and imperialism.

There is, in other words, hardly any gap between the the peace movement's perspective and that of the Soviet Union on how to create a more just global society. The World Peace Council's publications also inveigh against the evils of imperialism, militarism, sexism, racism, all of which they too define as the peculiar property of the United States and its "puppets." It is difficult to distinguish between the foreign policy the World Peace Council, under Soviet guidance, would like the United States to pursue, and the policy the peace organizations would like it to pursue. Indeed, given the identity of underlying views, is there any reason for peace organizations to resist Soviet infiltration and manipulation?

We are left, finally, with an approach to peacemaking whose essence is the double standard. After the Soviet invasion of Afghanistan the pacifist organizations, all of which make a strong point of their belief in resistance—nonviolent resistance—to aggression, might have been expected to support United States responses that stopped short of violence, including the Olympic boycott and the grain embargo. In fact, they sharply opposed any U.S. efforts to counter the Soviet action. (The same thing happened after the repression of Solidarity in Poland. WILPF passed a statement that ignored events in Poland but attacked Reagan's "political and economic sanctions" and called on him "to restore ties with Poland and the Soviet Union to their previous levels.") An article in WILPF's journal by then WILPF international president Kay Camp summed up the organization's view of the invasion of Afghanistan: "While military intervention is always regrettable, the Soviet interest in having close relations with a neighboring country with which it shares a 2000 mile border is understandable."

The peace organizations are concerned almost wholly with U.S. disarmament. David McReynolds of the War Resisters League says frankly that the only "politically realistic" approach is bold unilateral initiatives and the League is in fact circulating a statement calling for unilateral nuclear disarmament. The Riverside Church Disarmament Program minimizes the Soviet "threat" which its publications put in quotation marks. It relies heavily on publications and speakers from the American-the-enemy think tank, the Institute for Policy Studies. This is scarcely surprising since the program is headed by Cora Weiss, daughter of Samuel Rubin, whose Samuel Rubin Foundation, directed by Cora and her husband Peter Weiss, has long served as the major funder of IPS. We are even hearing Soviet slogans passed off as native American peace products. The Women's International League for Peace and Freedom recently announced a new program called STAR, standing for Stop the Arms Race. An innocent enough sounding phrase, it was the slogan of the World Peace Council's 1975 Second Stockholm Appeal campaign, repeated as a litany in its documents: To Make Détente Irreversible—Stop the Arms Race, To Defend the Peace and Build a New World—Stop the Arms Race. What the Women's International League for Peace and Freedom has been able to add is some Hollywood stars—Joanne Woodward, Marlo Thomas, Vinie Burrows, and Polly Bergen are participating in this latest World Peace Council propaganda triumph.

For all their fraudulence, the American peace organizations have grounds to hope that they may find themselves at the center of a great mass movement for disarmament in the United States. Peace organizations have been mushrooming—there are now sixty sizable ones. The older organizations are growing. The Fellowship doubled its membership last year; Physicians for Social Responsibility increased its membership sevenfold; SANE reported an 88-percent increase; the U.S. Peace Council now boasts forty chapters around the country. Other organizations are rediscovering the bomb. The Union of Cncerned Scientists, which began in 1969 as a disarmament group, turned almost all its attention in the 1970s to the then more fashionable issue of nuclear power. Now it is back with the bomb, organizing teachins on campuses around the country, a consciousness-raising tactic which proved effective in the Vietnam war period.

Much more important than the growth of the peace organizations themselves is the influence they are having on major institutions, especially the church. An "Abolitionist Covenant" is circulating through the churches which affirms willingness to live without nuclear weapons as a religious commitment and calls for a freeze as a first step. The Presbyterian Church, the United Church of Chirst, the Disciples of Christ, the Methodist Church, and the Episcopal Church have all voted to make "peace" their priority issue. This is being translated into such measures as the creation, by the United Church of Christ, of "Peace Advocacy" groups in every state to encourage people to "lobby for peace" in Washington. The umbrella National Council of Churches has already endorsed the freeze. The Riverside Church Disarmament Program is training Disciples of Christ ministers to become peace pastors. And the National Conference of Catholic Bishops is taking an active role, condemning any threat to use the American nuclear arsenal, even in response to Soviet prior use. Last November, 29 Catholic bishops condemned the very possession of nuclear weapons as "immoral."

Major environmental organizations, long wary of becoming involved in defense issues, are beginning to man the peace barricades. The Physicians for Social Responsibility's Helen Caldicott, who recently called the nuclear arms race a case of "missile envy" stemming "from an inadequate male sexual complex on the part of world leaders," has urged the Sierra Club to come in on the ground that nuclear war would destroy mammals, birds, and the ozone layer. Caldicott suggested that this was really her own primary concern. She said she had "come to terms with my own death" but "I just worship this earth. . . . So I really care immensely if this earth is to be destroyed. And that's where the Sierra Club comes in." The Sierra Club, whose ranks have been swollen to 300,000 members in 1982, a 44-percent increase in one year, shows every sign of indeed coming in. Its executive committee has already adopted a resolution to lend "support for worldwide disarmament," a cautious entry to be sure, but one likely to lead to what, from the standpoint of the peace movement, are better things. Environmental groups see new propaganda potentialities for their long-standing fight against nuclear power. The Environmental Policy Center now calculates the "warhead equivalent" of commercial reactors. South Carolina's anti-nuclear energy Palmetto Alliance argues that "every time you flick a switch and it's nuclear generated electricity, you're helping to make a bomb." The Alliance notes happily that "people really respond to that."

What explains the current runaway success of the disarmament movement? Fear of nuclear war, never far below the surface of public consciousness, has in the past been tempered by other fears and by confidence in public authorities. For the generation of World War II the Soviet threat was real, as was belief in the need for American strength to contain it. Whatever moral reservations were held regarding nuclear bombs, the right and even necessity of their being a component of the U.S. arsenal was not generally challenged.

What is new is distrust of the U.S. government by its citizens which in recent years has mounted to such an extent that for significant numbers the mere fact that the government states something is sufficient warrant to believe the opposite is true. Long nurtured by the extreme Left, this attitude has spilled over to segments of the media, to the universities, to the leadership of mainline churches. The resolutions passed by these churches in the last decade reflect a view of American institutions as oppressive and of America's role in the world as one of global oppressor. Such attitudes made the climate ripe for Soviet propaganda offensives conducted chiefly through the World Peace Council, which had been able to establish ties with elements of the adversary culture.

The election of Ronald Reagan was a galvanizing experience for those in the adversary culture—at the same time a shattering defeat and a proof that their worst fears were on the verge of being realized. The nuclear freeze proposal, with its evenhanded veneer, has served as a brilliant, even inspired lever by which to mobilize the public's inevitable anxieties about living in the nuclear age into a weapon to prevent achievement of the Reagan Administration's keystone effort: the restoration of U.S. defense capabilities.

Only two years ago a study of peace organizations commissioned by the Institute of World Order found them discouraged and demoralized. Thanks largely to the runaway success of the freeze, they are today transformed. This is not to say that all the peace organizations are enamored of the freeze. We have already noted the objections of the War Resisters League. Roger Molander, head of Ground Zero, which for a week in April raised consciousness by hypothesizing direct hits in several hundred cities and describing how they would look after an atomic bomb has hit them, says he does not like the freeze because it will not lead to arms reductions.

Even the most ardent proponents of the freeze see it as just the begining. Don Ebener of the Fellowship of Reconciliation says "the freeze is only the first step toward total disarmament and it's only to be used as a tool toward that end." Peace groups have plenty of other proposals in the works, including tax resistance, initially in the "symbolic" form of withholding the federal tax on the telephone bill. The project dearest to the heart of the peace movement is "conversion," i.e., converting military industries to civilian production. Pacifist organizations, of course, want to eliminate our war-making potential altogether. Other groups propose cutting military expenditures by 50-80 percent, cuts they say are

feasible even if no further arms agreements are reached with the Soviets.

Given the international realities, it is all too obvious where the peace movement would lead us. *Contentions*, the newsletter of the Committee for the Free World, whose executive director is writer Midge Decter, has put it succinctly:

"The people who claim to seek universal disarmament, to the extent that their efforts will succeed, will bring about only the disarmament of the democracies. A world in which the democracies have renounced the means to defend themselves against a mightily armed totalitarianism is a world in which there will be no freedom *and* no peace."

There are signs some peace organizations are aware of what lies down the road. If disarmament lead to invasion, they are calling for "transarmament," which means nonviolent resistance and noncooperation. They assure us it will make effective occupation of this country "impossible." Indeed, an article in the War Resisters League journal suggests that it is time for the United States to start thinking about the nonviolent defense of the country.

ANTINUCLEAR MOVEMENT AND ITS GOALS

(By Fox Butterfield)

As thousands of marchers inched past a platform in front of the United Nations at last Saturday's huge disarmament march, Elizabeth Holtzman, Brooklyn's District Attorney, told those in the crowd that they constituted a message to President Reagan and the Soviet leader, Leonid I. Brezhnev.

"If you don't listen to us now, we will be five million people the next time, and 50 million the next time and 500 million after that," Miss Holtzman shouted over a battery of loudspeakers. "We won't stop until we win, because we are for the forces of life."

This week, with the fading of the euphoria over what has been described as the nation's largest rally on a political issue, the leaders of the movement against nuclear arms are trying to assess how great an impact they had and whether Miss Holtzman's suggestion that the movement can muster growing strength will prove correct.

PRAYER VIGIL IS PLANNED

In the weeks ahead, the movement's supporters plan an array of activities, such as a rally in Oregon, a demonstration in Nebraska, a conference in New Hampshire and, in August, a nationwide prayer vigil. And the Union of Concerned Scientists is organizing a series of teach-ins on university campuses for next Veterans Day.

The movement itself is an amorphous one aimed at seeking an end to the arms race. The freeze idea has proved popular, but is only one of several proposals and has drawn criticism even within the movement as being simplistic. Some question whether the movement can make real progress without a sharper focus.

But the movement's supporters say their real goal is educational, to raise public concern about the issue. They believe that the key question is whether they can convert the rapidly growing public concern about the nuclear arms race into votes in Congress.

The first test of whether last Saturday's demonstration will carry any political influence may come next Tuesday, when the House Foreign Affairs Committee is scheduled to vote on a resolution calling for a mutual and verifiable freeze on nuclear arsenals in the United States and the Soviet Union. A similar freeze proposal, considered to be the most politically acceptable organizing device that the movement has come up with, was rejected by the Senate Foreign Relations Committee last week, before the rally, on a strict partyline vote, 9 to 6.

THEY VOLUNTEER FOR CAMPAIGNS

Representative Edward Markey, Democrat of Massachusetts, one of the original sponsors of the freeze idea in the House, says: "Everyone in the House that I've spoken to recently who has talked to their constituents about the nuclear arms issue ends up walking out of the room with 15 or 20 more volunteers for their campaign next fall."

Whatever the outcome of the committee vote, the leaders of the disparate peace groups are clearly ecstatic about the size, composition and good behavior of last weekend's marchers, who were estimated by the police to number 600,000 to 700,000.

"It was far more people than we expected," said Dr. James Muller, secretary of the International Physicians for the Prevention of Nuclear War and an assistant professor or cardiology at the Harvard Medical School.

Dr. Muller, who traveled to New York by bus with a group organized by the Wellesley Freeze Committee in suburban Boston, noted that, unlike earlier protest marches he had been in, there were many middle-aged and elderly people with middle-class backgrounds.

"LIKE THE ABOLITION MOVEMENT"

"I think we are going to be stronger and more broad based than the anti-Vietnam War movement," Dr. Muller predicted. "This is going to be more like the abolition movement that ended slavery."

Patrick H. Caddell, the Carter Administration's poll-taker, said that last weekend's demonstration tended to confirm his impression that "the antinuclear arms movement is the most significant movement since the environmental movement in the late 1960's."

One of its key features, he said, is that "most of the impetus has come inside the political process, from things like town meetings and state-wide initiatives."

"This is not just a protest movement, which leads you to believe in the end it will have some political impact," Mr. Caddell went on.

HE SEES PEAK AFTER NOVEMBER

In Mr. Caddell's view, it is still hard to tell what shape the movement will eventually have. In this November's Congressional elections the antinuclear movement may still be a secondary issue to the economy, he said, "but I think you should look at it as a long-term movement that will come to a head after November."

On the other hand, Lance Tarrance, Jr., a poll-taker who works mainly for Republicans, said that when he measured public attitudes toward the freeze in states from Maine to Wyoming, he found support for it not firm.

Although many polls show that 75 percent of the population favor a moratorium on nuclear weapons, he said, when people are asked if they want a freeze that would leave the United States militarily behind the Soviet Union, "many people fall off the bandwagon."

For example, a New York Times/CBS News Poll conducted May 19 to 23 found 72 percent of those responding favored "putting a stop to the testing" of nuclear arms, but half that group said they would oppose a moratorium if it would give the Soviet Union a nuclear advantage over the United States.

Mr. Tarrance has advised his clients not to be afraid of being hurt by the freeze issue. "It is not going to have a detonator affect in national politics," he said.

White House officials are very concerned about the impact the movement might have. But they have decided that the best approach is to put forward proposals for arms reductions rather than criticize the movement.

Officially, Defense Secretary Caspar W. Weinberger says last weekend's demonstration will not influence the Reagan Administration. But it has already affected Mr. Reagan's public statements, if not his private thinking.

After years of arguing that arms control was wrong, Mr. Reagan has now put forward a series of sweeping and dramatic arms control proposals to Moscow.

Some skeptics have asked whether the movement has concentrated on stopping the buildup of arms of the United States while ignoring the Soviet threat. But Dr. Muller of Harvard said that he and two colleagues from the International Physicians group had been invited to appear on Russian television for an hour on June 30.

They will discuss the medical consequences of nuclear war, and Dr. Muller, who studied in the Soviet Union, plans to speak in Russian appealing to the Russian people to join the United States as allies against the arms race just as the two countries fought together against the Nazis in World War II.

[From the Wall Street Journal, June 10, 1982]

THE BUILDING BLOCKS OF THE FREEZE MOVEMENT

(By Dorothy Rabinowitz)

Within a day or so, the disarmament movement begins the climactic hour of its spring "peace offensive." Nuclear freeze proponents along with peace activists of every stripe will converge on New York City for a series of demonstrations this weekend to coincide with the United Nations special session on disarmament.

The mammoth size of the crowds will, freeze coordinators contend, bear out their claim that the clamor for a nuclear freeze is a spontaneous movement of ordinary citizens concerned about the perils of nuclear war. The details of the American peace movement, however, are a good deal more complicated and interesting than its proponents would have us believe. Indeed a good many people who have spent the last months gathering nuclear-freeze petitions, as well as many of the church and professional groups that have signed on as sponsors, might be taken aback by the aims and allegiances of the architects of the freeze in whose campaign they have enlisted.

Prominent among them are the American Friends Service Committee, which had the key role in conceiving the freeze idea in 1979; the Fellowship of Reconciliation, and the Women's International League for Peace and Freedom. All are old-line peace organizations that in the past 10 years have drifted far from the pacifist idealism of their beginnings.

One of the central freeze events, planned to coincide with the UN disarmament conference, is a sit-in next Monday in New York to block entrances to the resident mis-

sions of the five nations that now possess nuclear arms. The sponsoring organizations listed in the literature being distributed to promote the sit-in include the War Resisters League, a nominally paicifist group founded in 1923, whose chief energies today are spent advancing the cause of world revolution; Clergy and Laity Concerned, formed to oppose the Vietnam war and today the principal left-wing network among U.S. churches; Mobilization for Survival, an umbrella disarmament organization composed chiefly of radical activists, Communists and assorted peace groups.

SAME ANTI-AMERICAN ATTITUDE

These well-established peace groups have in common a remarkably consistent sociopolitical outlook, not the least significant aspect of which is a unity of attitude about the government of the United States and its role in the world. It is an attitude these groups have purveyed repeatedly and publicly during the past decade. One does not have to look far for a reflection of this attitude. (Indeed a good portion of the material drawn on for this piece is in the peace collection of the Swarthmore College library in Bryn Mawr, Pa.)

The Women's International League for Peace and Freedom in a statement on foreign policy: "All life on earth is threatened by U.S. imperialism." The avowedly pacifist women's league is an enthusiastic public supporter of the Palestine Liberation Organization.

For Clergy and Laity Concerned, the movement against the Vietnam war represented a "struggle against American imperialism and exploitation in just about every corner of the world." The task now, the group said, was to join those who "hate the corporate power which the United States presently represents. . . ."

A pamphlet written under the auspices of the Quaker American Friends Service Committee warns against passing judgment on the violence perpetrated by "liberation" movements; the writer explains that the worst violence begins with those who "control weapons and institutions of repressive violence," The most prominent agent of this control is identified as the United States, "Before we deplore 'terrorism,' " writes this representative of the nation's most venerable pacifist organization, "it is essential for us to recognize clearly whose terrorism came first." The pamphlet's author, James Bristol, writes that to much of the world, "the United States is an outlaw nation."

The groups organizing next week's sit-in, or "Civil Disobedience Campaign," have published an official handbook for the event. Anyone under the impression that the freeze campaign planned by the disarmament movement expresses the voice of grassroots America might note this handbook's introduction, which includes the information that, "The foreign policy of the U.S. continues to profit the very rich and powerful while stripping everyone else of self-determination, resources and money."

The established groups at the center of the nuclear-freeze movement also share a common view of the Soviet Union and the Communist world. That view is best reflected in the marked incapacity of these groups to perceive in the practices or policies of the Soviet Union or its allies anything meriting blame. The same organizational newsletters that inveigh endlessly against U.S. imperialism contain no word of condemnation for the invasion of Afghanistan or the events in Poland.

The leader of the Women's International League for Peace and Freedom said of the Soviet invasion of Afghanistan that while military intervention was always "regrettable," it was nonetheless "understandable," given the "Soviet interest in having close relations with a neighboring country with which it shares a 2,000-mile border."

Similarly, a member of Clergy and Laity Concerned at a disarmament conference held at the Cathedral of St. John the Divine in New York City last month explained that Afghanistan is "within the Soviet sphere of influence" and that the Soviet Union was thus doing only what it considered necessary under the circumstances.

No country, however, evokes more solidarity or exculpatory wisdom among the peace groups now leading the nuclear freeze movement than Cuba.

A 1977 report on a visit to Castro's Cuba in the journal of the Women's International League for Peace and Freedom concludes that "the healthy relation of the individual to society is a priority in Cuba." The exposure to healthy individualism in Cuba had come, the writer reports, from her experience of marching in the Cuban May Day Parade, watching Cuban government films on liberation struggles and attending a Paul Robeson memorial festival.

Russell Johnson, an official of the American Friends Service Committee, notes in a 1982 article in the Fellowship of Reconciliation magazine that "Our nation [the U.S.] today is the very fount of violence in many places in the Third World," and cites as his authority a Cuban who told American visitors, "Maybe we wouldn't have to carry weapons here in Cuba" if "you North Americans would go back to your country and work to disarm it."

Nowhere is the propensity to exculpate the Soviets and the socialist countries more evident than in the question of disarmament. Notwithstanding the suggestion of even-handedness implicit in a mutual freeze, it is clear from the testimony offered up by the movement's guiding spirits that the U.S. is the main culprit in the arms race.

The Fellowship of Reconciliation and the Methodist Peace Fellowship, for example, published a joint, September 1981 flyer titled "Anti-Soviet Fixation Rules the U.S." The Women's International League for Peace and Freedom puts out "Who Sets the Pace for the Arms Race?" as well as "The Myth of the Soviet Threat."

The congeniality of views between the Soviet Union and the socialist countries and these prominent Western peace groups has its roots in good measure in the success of the Soviet peace offensive in Europe. Soviet expropriation of the peace issue goes back to the early 1950s and the Stockholm Peace Appeal, the earliest in a series of campaigns to stir up and exploit popular fear of nuclear war.

The principal outlet for Soviet peace propaganda since then has been the World Peace Council. Founded in the late 1940s, the council functions, today as then, as a Soviet front organization. In 1975, it presented its highest award, the Joliet Curie Gold Medal, to Yasser Arafat and gave a peace award to Lolita Lebrun, one of the Puerto Rican terrorists who invaded and shot up the U.S. House of Representatives in the 1950s.

DON'T CONSIDER USSR A THREAT

Now headquartered in Helsinki, having been expelled from various other European countries, the World Peace Council took a leading role in two recent successful disarmament offensive mounted by the Soviets: the stop-the-neutron-bomb movement of 1977-78 and the Soviets more recent campaign against modernization of NATO theater nuclear weapons, which eventually broadened into the current disarmament movement.

The connection between the European peace movement and many of the groups organizing the disarmament movement in the U.S. comes through the U.S. Peace Council, a domestic affiliate of the Soviet-dominated World Peace Council. The U.S. Peace Council has elicited support for its activities from most of the key figures in the U.S. freeze movement.

For instance, the World Peace Council lists the disarmament director of the American Friends Service Committee as one of its 40 official U.S. members. In an interview, Terry Provance, the committee's disarmament director and one of the chief originators of the freeze idea, denies that he belongs to the council but says it is necessary "in an important cause such as this to work with groups like the U.S. Peace Council and also to support their right."

The fact is there is almost no distinguishable difference between the foreign policy pronouncements of Michael Meyerson, the head of the U.S. Peace Council and a member of the U.S. Communist party, that "the main threat to world peace is the U.S. military industrial machine" and that of any number of similar statements by officials of Clergy and Laity Concerned, the American Friends Service Committee, the Fellowship of Reconciliation, Women's International League for Peace and Freedom, the War Resisters League, Mobilization for Survival or the Coalition for a new Foreign and Military Policy.

This, in short, is the constituency that today presumes to counsel us on our security interest, a constituency that refuses to consider the Soviet Union a threat but that holds the United States to be the chief enemy of peace and freedom. Those multitudes now enlisting in their ranks would do well to consider these credentials and to ponder just whose music it is they will be marching to behind the nuclear-freeze banners.

[From the Washington Times, Oct. 18, 1982]

COMMENTARY—NUCLEAR FREEZE CAMPAIGN INSTIGATED BY KGB

(By John Barron)

It has spread like a raging fever throughout the world. From Bonn to Istanbul, Lima to New York, millions upon millions of people have joined in the nuclear freeze movement. It is a movement largely made up of patriotic, sensible people who earnestly believe that they are doing what they must to prevent nuclear war.

But it is also a movement that has been penetrated, manipulated and distorted to an amazing degree by people who have but one aim—to promote communist tyranny by weakening the United States.

Whether Americans want to acknowledge the fact or not, the evidence is clear: the Soviet Committee for State Security, better known as the KGB, and other arms of the Soviet government have been involved from day number one in the U.S. disarmament campaign.

Throughout the 1980 presidential campaign, candidate Ronald Reagan declared that, if elected, he would restore American military power to the degree necessary to deter Soviet intimidation or attack. A few

days after Reagan won, the Soviet Union instigated a great new campaign to reverse the American election results by nullifying the defense buildup implicitly mandated by the voters.

On Feb. 23, 1981, Leonid Brezhnev, addressing the 26th Communist Party Congress, issued an official call for a nuclear freeze—an immediate cessation of development of any new weapons system.

Such a moratorium would achieve the fundamental Soviet objective of aborting American production and deployment of the enhanced radiation warhead, the mobile MX, Pershing II and cruise missiles and a new manned bomber, the B-1. It would leave Western Europe vulnerable to 315 deadly SS-20 missiles. It would leave the United States with a fleet of old, obsolete strategic bombers unlikely to penetrate Soviet air defenses and with an aging force of fixed land-based missiles vulnerable to a first strike by gigantic new Soviet missiles.

Instantly the KGB and the International Department of the Central Committee of the Soviet Communist Party heeded Brezhnev's call. On March 20, 1981, less than one month later, the first national strategy conference of the American Nuclear Freeze Campaign convened for three days in a meeting hall at Georgetown University in Washington.

Virtually the entire blueprint for the nuclear freeze campaign that followed was drawn in comprehensive detail. According to a "peace" movement newspaper, the organizers at Georgetown comprised "between 275 and 300 predominantly white middle-class people from 33 states, Great Britain and the Soviet Union."

Records available today identify two of the invited Soviet guests. One was Oleg Bogdanov, an International Department specialist who flew in from Moscow. The other was Yuri S. Kapralov, who represents himself as a counselor at the Soviet embassy in Washington but is in actuality a KGB officer who, since arriving in the United States in 1978, has dedicated himself to penetrating the peace movement.

Kapralov was not merely an observer. He mingled with disarmament proponents, urging them on in their efforts to abort new American weapons. He was an official member of the discussion panel, and, as one listener put it, his statements were "very impressive." Thus, little more than two miles from the White House, the KGB helped organize and inaugurate the American "nuclear freeze" campaign.

Following the Georgetown conference, a delegation of the Soviet-controlled World Peace Council arrived to tour American cities. The appearance most beneficial to the visitors, led by an Indian communist, was on Capitol Hill where, in May, Reps. John Conyers Jr., D-Mich., Don Edwards, D-Calif., Mervyn Dymally, D-Calif., George Crockett Jr., D-Mich., Ted Weiss, D-N.Y., and Mickey Leland, D-Texas, invited colleagues to meet and listen to the WPC delegates.

On orders from KGB headquarters in Moscow's old Lubyanka Prison, the KGB residency in New York concentrated much of its manpower upon the freeze campaign. U.S. counterintelligence identified more than 20 Soviet agents endeavoring to influence elements of the peace movement, particularly leaders in religion, labor and science. Typical of them were KGB officers Sergei Paramonov, Vladimir Shustov and Sergei Divilkovsky, all of whom masquerade as diplomats at the U.N.

The Soviets supplemented the labors of their New York and Washington residencies by sending people from the Lubyanka "Center" into the United States on temporary assignments. Even before the freeze movement materialized, a Soviet delegation including KGB officer Andrei Afanasyevich Kokoshin toured the United States, visiting Americans who were to be prominent in the campaign. Another delegation led by Nikolai Mostovets, who heads the North American section of the International Department, plotted strategy with the U.S. Peace Council.

Of the Soviets who applied for visas to attend a disarmament conference sponsored by the National Academy of Sciences in Washington in January 1982, roughly half were known intelligence officers. The State Department refused entry to most of them. Nevertheless, of those who came, almost half were co-opted KGB agents or International Department operatives.

Throughout the U.S., town councils and county boards of supervisors paused in their deliberations about zoning, sewage systems and school budgets to pass resolutions favoring the nuclear freeze. Nearly 600,000 Californians petitioned for a referendum to record their state in favor of the freeze. Prominent religious leaders, educators, scientists, artists, entertainers and other public figures endorsed the nuclear freeze.

In anticipation of a massive nuclear freeze rally on June 12, 1982, emissaries from 13 Soviet international fronts flooded into New York City. They joined more than 700,000 Americans who paraded and spoke out for peace.

The following week the Soviet Union staged a terrifying rehearsal of a surprise nuclear attack on the United States and Western Europe. In a span of seven hours, they fired land- and sea-based missiles designed to kill American satellites, destroy U.S. retaliatory power, obliterate American cities and wipe out Europe. There was, of course, no great outcry against these ominous Soviet preparations. Neither has there been any outcry against the relentless Soviet buildup of offensive nuclear weapons.

Not long after the mammoth New York demonstration, on Aug. 8, the Associated Press reported from Moscow: "A co-founder of Moscow's only independent disarmament group is being administered depressant drugs against his will in the psychiatric hospital where he is being held, his wife said today."

Thanks in large part to the efforts of the Soviet KGB, talk of a nuclear freeze sounds resonantly in the West today. In the KGB's own backyard, of course, it is business as usual. Moscow's military buildup continues unabated, and any talk of nuclear disarmament is quickly put to rest.

[From Human Events, Oct. 30, 1982]

THE KGB'S ROLE IN VERMONT'S NUCLEAR FREEZE REFERENDUM

The latest word on the nuclear disarmament front is that 24 national organizations have combined to form a coalition boasting an estimated membership of 18 million. The aim, according to its president, Terry Herndon, is to make the Administration "respond to the absolute urgency" of reducing the nuclear arms race.

One might add, tell it to the Russians. But the suggestion would fall on deaf ears. Not only are the coalition's disarmers not listening, they are also bitterly attacking anyone who dares to question their political judgment. No more vivid example of the latter can be found than in Vermont, where the nuclear freeze movement had its inception and gained national attention by placing a nuclear moratorium resolution on its town ballot in March of this year.

Republican State Sen. Madeline B. Harwood has long been a strong but lonely voice, crying out in the political wilderness of Vermont's heavily orchestrated nuclear freeze campaign. Unlike most of Vermont's elected representatives—state and national—the doughty senator knows exactly where she stands on the issue. Her support of the President and his Administration in dealing with the Soviets from a position of strength has been steadfast in the face of a rising tide of liberal attack, climaxed on October 8 by an editorial in the Rutland (Vt.) *Daily Herald*, accusing her of McCarthyism.

The roots of the accusation can be found in a peace march organized by David McCauley of the American Friends Service Committee in August 1981. About 400 marchers hiked some 35 miles between Washington and Moscow, Vt., to hear McCauley's special guest speaker, Soviet Embassy Counselor Yuri S. Kapralov, maintain that the Kremlin is not opposed to a nuclear freeze, or a reduction of forces, and is willing to allow "necessary" on-site inspection of nuclear facilities.

Kapralov's talk was given a wide play in both the news and editorial columns of Vermont's dailies, most of the comment praiseworthy. Sen. Harwood raised her voice in warning, joined by a handful of other realists, and was generally ignored.

In March of this year, 177 towns in Vermont voted in favor of a nuclear freeze resolution, and the Rutland Daily Herald gave McCauley credit for organizing the vote. On March 11, following the vote, Sen. Harwood spoke on the Senate floor against the ratification of the resolution. "The Resolution," she said, "calls for a moratorium with immediate cessation of testing, producing and deployment of all nuclear warheads, missiles and delivery systems—this, at a time of Soviet superiority.

"The wording is such that almost anyone might be expected to agree with it. The problem is, there's a hook in this attractive bit of bait." She went on to describe the hook to her fellow senators: the military balance in the Kremlin's favor and the Soviet's long record of refusal to consider on-site inspection.

"Some important points," she said, "must be considered before voting for this Resolution. Why was it important for David McCauley of Putney, one of 15 peace workers from across the United States, to travel to Western Europe in a delegation organized by the American Friends Service Committee National Disarmament Program last November to find out what made the antinuclear demonstrations so successful there?"

Another question she asked her fellow solons was: "Why was Yuri Kapralov invited to be a speaker at the Wesley Methodist Church in Waterbury, Vt., on August 8 [1981]?"

The senator then gave some prescient information to her listeners about Kapralov which the Vermont press ignored. "Kapralov does not take his orders from the Soviet Embassy—his instructions come from the Central Committee in Moscow," she advised. "He is a point man in the Kremlin's No. 1 priority, U.S. disarmament. Kapralov is known to be a disinformation specialist. . . ."

As noted, no one paid much attention to the senator's warnings about the weakness

in the Resolution or the kind of supporters its leaders had so proudly enlisted and the state Senate voted ratification.

A month ago, Sen. Harwood shook up the peace movement and the Vermont newspapers that support it. She sent them all a letter, declaring that Yuri Kapralov was indeed a KGB agent and his assignment since his arrival in Washington, D.C., in 1978 had been to penetrate and influence the peace movement. Somehow, the senator, who is seeking her seventh term and has been a Republican National Committeewoman since 1973, had gotten hold of advance word on John Barron's explosive Reader's Digest exposé detailing Soviet involvement in the nuclear freeze campaign, and she spoke out before the magazine hit the newsstands.

Said Barron, "While the Soviet-inspired demonstrations against NATO and the new missiles raged across Europe, protests in America initially were scant and inconsequential. But on March 20, 1981, less than one month after Brezhnev called for a nuclear freeze, the first national strategy conference of the American Nuclear Freeze Campaign convened for three days in a meeting hall at Georgetown University in Washington.

"Virtually the entire blueprint for the nuclear-freeze campaign that followed was drawn in comprehensive detail. Speakers stressed that the beauty of the nuclear freeze derives from its simplicity. It would enable all people sincerely concerned about the danger of nuclear war to answer for themselves the question, 'What can I do?' "

According to a peace movement newspaper, the organizers at Georgetown comprised "between 275 and 300 predominantly white middle-class people from 33 states, Great Britain and the Soviet Union." Records available today identify only two of the invited Soviet guests. One was Oleg Bogdanov, an International Department specialist in Active Measures, who flew in from Moscow. The other was Yuri S. Kapralov, who represents himself as a counselor at the Soviet Embassy in Washington.

Kapralov was not merely an observer. He mingled with disarmament proponents, urging them on in their efforts to abort new American weapons. He was an official member of the discussion panel, and, as one listener put it, his statements were "very impressive."

"But Yuri Kapralov did not speak just for himself. Kapralov is a KGB officer who, ever since arriving in the United States in 1978, has dedicated himself to penetrating the peace movement. Thus, little more than two miles from the White House, the KGB helped organize and inaugurate the American nuclear freeze campaign.

On September 21, according to Sen. Harwood, reporter Dan Gillmor, of the Times-Argus, owned by the Rutland Herald, wanted to know how the senator had obtained her information. Sen. Harwood wanted to know, in turn, why, if he had seen her letter, it had not been published. (It was not published until October 2.) The senator refused to divulge her sources but suggested that the reporter might read Barron's KGB for information purposes.

Gillmor, she said, wanted to know what that had to do with the question and asked the senator her opinion of the many people who had voted for the nuclear freeze. She responded that she felt they were not well informed. She suggested they might begin reading U.S. News & World Report for starters. She then reminded the reporter of her previous statements on the issue and said that it made little difference to her whether Kapralov was KGB or not, for he was following the Kremlin's propaganda line. At the conclusion of the conversation the senator said she told Gillmor how he could go about reaching The Reader's Digest.

[From the Washington Post, Oct. 1, 1982]

THE ACTIVISTS: FAMILIAR FACES, A FAMILIAR FIGHT, DIFFERENT ARENA

(By Joyce Wadler)

Benjamin Spock, the grand old pediatrician of the anti-Vietnam movement, is 79 now and lives much of the time in his solar-heated home in rural Arkansas. Throughout the year, however, he can be found lecturing on such issues as a nuclear arms freeze or organizing against a local nuclear plant.

Dave Dellinger, the oldest of the Chicago Seven, lives in the small Vermont town of Peacham and has been active in organizing a protest that prevented the shipment of nuclear wastes from Canada through Vermont. He became involved in the protest through Abbie Hoffman, another '60s activist, who is in the St. Lawrence River area, about an hour away.

In the rapidly expanding anti-nuclear political movement there are many familiar faces from the '60s and '70s.

Daniel Ellsberg, who lives near Oakland, Calif., has been protesting the development of nuclear warheads at the nearby Lawrence Livermore Laboratories. The Berrigan brothers, proponents of civil disobedience, were found guilty this past July—with nine others—of destroying nuclear missile nose cones at a break-in at a General Electric plant in Pennsylvania. The Berrigans pleaded "not guilty by reason of government insanity."

Have they suddenly found a new cause after years of silence? Are they the base of the new anti-nuclear political movement? The answer, according to movement leaders, is no.

"I don't want it to seem that this movement is simply old retreads," said Randy Kehler, national coordinator of the Nuclear Weapons Freeze Campaign and a former anti-Vietman leader. "What makes this movement exciting is that there are a lot of people who are now active who have never been active before."

But there are also many people who have given their lives to political activism, and to whom the nuclear issue is not suddenly this year's issue, but one that is 30 years old.

"We didn't come out of nowhere, you know," laughed Dave McReynolds, of the War Resisters League. "A lot of us were active in the radical movement before Vietnam. There are a lot of new people, but there are also people who belonged to political formations.

"I lived through a student upsurge in 1947 when there was the same fear of nuclear war. We had just used the bomb and it had an impact . . . it exploded inside people's minds, it changed the ways we thought. The fear broke out again in the '50s and now there is a third wave of fear, with totally new people who have never thought about it. . . ."

The concern about nuclear power and the environment led many into the nuclear arms freeze movement.

Kehler, who went to jail for two years as a Vietnam draft resister, became involved in local economic and nuclear issues after moving to western Massachusetts.

"I worked on agricultural revitalization, on the local economy, and on a safe energy issue—there were two nuclear powerplants in the area, and there was a move to build two more," Kehler said. "My energy—until moving to St. Louis for the Freeze Campaign—became very much focused within the community context. I think this is the story of a great many activists from the '60s—they realized that they can't make great changes overnight . . . that perhaps change does have to start on a grassroots level."●

SOVIET USE OF CHEMICAL AGENTS

● Mr. BOREN. Mr. President, I have been concerned for some time about the reports that the Soviet Union has been using chemical agents as weapons in their conflict in Afghanistan and in their involvement in Kampuchea.

There has been a growing body of persuasive evidence that toxin weapons have been used in these areas. I have followed with interest and dismay the reports on "yellow rain" that have appeared in the Wall Street Journal and other noted publications. I have read the periodic reports released by the State Department containing evidence of not only the use of these substances, but of Soviet complicity in that use.

Today in the Washington Post an article by Philip J. Hilts chronicles new evidence of these atrocities. The world cannot, through silence, condone these actions. I ask my colleagues to read this latest report and to reflect on both its contents and what it portends as to the nature of the Soviet leadership and the respect they may have for treaties and protocols to which they are a signatory.

Mr. President, I ask that the entire text of Mr. Hilts' article be published in the RECORD.

The article follows:

[From the Washington Post]

PROOF OF SOVIET TOXIC WARFARE CLAIMED BY U.S.

(By Philip J. Hilts)

Secretary of State George P. Shultz said yesterday the United States has conclusive proof, including two captured Soviet gas masks contaminated with toxins, that the Soviets are using chemical warfare in Afghanistan.

The gas masks are the first physical evidence to support claims that "yellow rain" toxin is being used in Afghanistan, although guerrilla fighters and journalists have reported incidents of chemical warfare there for several years.

In half a dozen previous reports, the United States has attempted to document the use of chemical and toxin warfare by the Soviets and their allies in Asia, chiefly in Kampuchea, formerly known as Cambodia, and Laos. The evidence has included samples of the "yellow rain" toxin itself from areas of alleged attacks, as well as samples of toxin-contaminated blood, tissue and urine from 16 victims. The samples were shipped to the United States for analysis.

In the new report, Shultz once again accused the Soviets and their allies of violating both the 1925 Geneva Protocol on chemical warfare and the 1972 Biological and Toxin Weapons convention. He called on other nations to speak out against the use of chemical warfare. State Department spokesmen say chemical attacks in Asia have been reported within the past six weeks.

The report delivered to the Congress and the United Nations yesterday said, "For the first time we have obtained convincing evidence of the use of mycotoxins [fungal poisons] by Soviet forces through analyses of two contaminated Soviet gas masks acquired from Afghanistan."

Officials said that the two masks were standard-issue Soviet-manufactured gas masks, equipped with the latest breathing canister made by the Soviets.

State Department intelligence officer Gary Crocker said that one of the two masks was torn from the head of a dead Soviet soldier somewhere in Afghanistan in December, 1981. The other mask—which was on display for the press yesterday—was obtained in Kabul, the capital of Afghanistan, in September, 1981, according to the State Department report.

Crocker said he could not elaborate on how the masks were obtained, except to say that both were obtained as a result of U.S. efforts to get evidence of chemical warfare in Afghanistan.

Both masks were swabbed with solvents which then were analyzed by two laboratories for traces of the "yellow rain," so called because it is often reported by refugees to be sprayed in a yellow cloud of gas from an airplane or a rocket.

The mask obtained in Kabul had the yellow rain toxin called T2, a variety of poison that is a member of the mycotoxin family called trichothecenes, a plant-destroying fungus.

Toxins are poisonous substances secreted by certain organisms. Various kinds are alleged to have been used by the Soviet in their effort to subdue resistance forces in Afghanistan and to have been supplied by the Soviets to their Vietnamese and Laotian allies.

Small quantities of the trichothecenes, which have historically been found in agricultural outbreaks of fungus, can cause vomiting, nausea, a severe skin blistering, and sometimes death.

The second mask had T2 toxin as well as several other varieties of trichothecene toxins, according to lab tests conducted by two separate laboratories, including that of Chester Mirocha of the University of Minnesota, an expert on such toxins.

Further evidence from Southeast Asia collected in 1982 was also presented in the report, which stated that "To date, biomedical samples (blood, urine, and/or tissue) from 33 alleged victims have been screened. Specimens from 16 of these individuals show the presence of trichothecene mycotoxins. In addition, six environmental samples from alleged attack sites have been analyzed by Dr. Mirocha. Five show the presence of unusually high concentrations and combinations of trichothecene mycotoxins."

The State Department has said in previous reports that chemical attacks have killed 10,000 persons in the three nations, but "we believe there are many more" that could not be verified from intelligence sources, said Crocker.

State Department spokesmen said that the United States has had some difficulty in convincing other nations and a United Nations commission on the subject to accept their accumulating body of evidence on chemical warfare in Asia.

All but three nations—Canada, Britain and Thailand—shied away from the subject, Crocker said, chiefly for political reasons. Skepticism about the evidence itself and whether it could be faked has faded within the past year, chiefly because of the poisons found in the blood and tissues of victims, something that would be extremely difficult to fake.

The United Nations is scheduled to issue its own report within weeks. Officials who said they have seen a draft copy said it takes note of the samples from the United States and other sources, but draws no conclusion about validity of the evidence.

Critics have said that the rules under which the commission is operating are so restrictive that unless the commission collects and analyzes evidence immediately after an attack, no verdict could be reached. The commission has been denied access to the war zones in Kampuchea and Laos, making any such evidence-gathering impossible.●

HAROLD HAYDEN

● Mr. RIEGLE. Mr. President, recently my hometown of Flint, Mich., and the people of Genesee County honored one of their most outstanding community leaders, Harold Hayden. If it is not already, Harold Hayden's record of service to his city and county should be a model for all of us who have chosen public service as a career.

That service began many years ago with Harold's activities in United Autoworkers Local No. 659, and has reached all the way to national leadership with the National Association of Counties. Along the way, Harold Hayden found several ways to provide service to the people of Genesee County through leadership roles at Flint General Hospital, with the Boy Scouts of America, with the NAACP, with the Urban League, and with and endless list of community groups.

Perhaps his most noteworthy accomplishment was the service and leadership he provided to our community as a member—and eventually as chairman—of the Genesee County Board of Commissioners. If his 13 years on the county board are not a record for their longevity, they should be a record for dedication to the county.

Harold Hayden's record of public service is marked in another positive way. He kept in touch with the people all along the way—his has been a career marked with concern and compassion.

I am proud to join all the citizens of Genesee County in this tribute to Harold Hayden, and to Harold, Margaret, and their family—I wish the best for the future; a future that has been made better because men like Harold Hayden helped shape it.●

THE ECONOMIC CRISIS

● Mr. BOREN. Mr. President, during this past recess, I spent a great deal of time traveling in my State and talking to Oklahomans about their concerns. I found that people are generally worried about their own personal future and the future of their country. While the worries expressed cover a wide range, I believe that it can be fairly said that the basis of their concern is rooted in the economic condition of the country.

The people of the United States have been buffeted continuously with bad and worsening economic news. Two years ago it was double-digit inflation, which melded directly into astronomical interest rates which, in turn, pushed the country into an economic slowdown, which slid into a mild and then deep recession and, for some segments of the economy such as agriculture, a full-fledged depression. All this seemed to occur within the space of a relatively few months.

These same people were told by those who were in an apparent position to know, that things would get better. It seemed that the blacker the economic clouds became, the rosier were the predictions that recovery was just around the corner. It is certainly true that there were political overtones to both the rhetoric of despair and the rhetoric of hope. I believe that by their votes in this past election, the people of Oklahoma and this country were casting their ballots for a moderation of both rhetoric and the economic experiments in which we have engaged.

The people of Oklahoma believe today, as they have believed all along, that the way to economic health requires action on a wide front. The Federal Reserve Board must do its part by moderating its policies; the administration must do its part by realistically proposing revenues and expenditures; and the Congress must do its part through restraint and through steady progress toward balancing Federal revenues and outlays.

The people in Oklahoma have listened with the rest of the country to repeated calls for a balanced budget while, at the same time, deficits have done nothing but increase. Just in my short tenure in the Senate, I can recall being shocked at projections of deficits approaching $50 billion. Now we are told that we can expect deficits in fiscal 1983 to approach $200 billion, and even $250 billion in 1987. I have told the people of Oklahoma that without corrective action, our $1 trillion national debt will double in the next 5 or 6 years. What a tragedy this is, Mr. President.

I returned to Washington to find news headlines quoting the President as saying that only economic recovery, rather than budget cuts or tax increases, can reduce Federal deficits. These reports contain references to a new and frightening phrase called

structural deficits. In a speech to the National League of Cities in Los Angeles, the President applauded the reduction in the annual increase of Federal spending, but warned that budget cuts alone or increasing taxes alone will not deal with the structural deficits built into the budget.

Mr. President, many of my colleagues will recall the emphasis placed by this Congress a few short months ago on the need to increase productivity in the United States. Certainly the President is right in reemphasizing that need. But we must not fall victim to the blandishments that increased productivity alone will resolve this economic crisis. It is disturbing to hear some Members of Congress say that they do not believe that the next Congress will significantly reduce social spending or defense spending, and to hear others say that certain programs designed to alleviate near-term problems will increase the budget deficit. It is the return to the old idea that deficits do not matter. Deficits do matter, Mr. President, and they lie very close to the heart of this country's economic condition. Everyone must sacrifice to remedy our current ills. There are no quick fixes or single panaceas. American agriculture is devastated. And when the family farm disappears, the economic infrastructure of this country will not be far behind.

During this lameduck session, I am going to expand on the points I have made today and suggest actions which will help meet the needs of the times. For now, I am sounding a warning note that just as all of us are now being touched by the economic depression of the moment, so all of us must do our share to achieve and enjoy the fruits of recovery.●

QUORUM CALL

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order of the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

The majority leader is recognized.

Mr. BAKER. Mr. President, I see no Senator seeking recognition.

Would the Chair be disposed to inquire if there is further morning business?

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ANTITRUST EQUAL ENFORCEMENT

Mr. BAKER. Mr. President, previously I had indicated to the minority leader and other Senators that I would today move to the consideration of S. 995, Calendar Order No. 511.

This is a matter that has been discussed at some length both yesterday in the Chamber, previously, and in private conversation.

Mr. President, I now move that the Senate proceed to the consideration of S. 995, Calendar Order No. 511.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays on the motion to proceed.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to proceed to the consideration of S. 995.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Iowa (Mr. JEPSEN), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Arkansas (Mr. PRYOR), the Senator from Maryland (Mr. SARBANES), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that the Senator from Nevada (Mr. CANNON) is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 67, nays 20, as follows:

[Rollcall Vote No. 388 Leg.]

YEAS—67

Abdnor	DeConcini	Heinz
Andrews	Denton	Helms
Armstrong	Dixon	Jackson
Baker	Dole	Johnston
Bentsen	Domenici	Kassebaum
Boren	East	Kasten
Boschwitz	Ford	Laxalt
Brady	Garn	Leahy
Bumpers	Glenn	Levin
Byrd, Harry F., Jr.	Gorton	Long
	Grassley	Lugar
Byrd, Robert C.	Hatch	Mattingly
Chafee	Hatfield	McClure
Chiles	Hawkins	Melcher
D'Amato	Hayakawa	Mitchell
Danforth	Heflin	Murkowski
Nickles	Randolph	Stevens
Nunn	Riegle	Symms
Packwood	Roth	Thurmond
Pell	Sasser	Tower
Percy	Schmitt	Wallop
Pressler	Simpson	Warner
Quayle	Specter	

NAYS—20

Baucus	Eagleton	Proxmire
Bradley	Exon	Rudman
Burdick	Humphrey	Stafford
Cohen	Inouye	Stennis
Cranston	Matsunaga	Weicker
Dodd	Metzenbaum	Zorinsky
Durenberger	Moynihan	

NOT VOTING—13

Biden	Hollings	Pryor
Cannon	Huddleston	Sarbanes
Cochran	Jepsen	Tsongas
Goldwater	Kennedy	
Hart	Mathias	

So the motion to proceed to the consideration of S. 995 was agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, will the Chair please announce the result of the vote once more?

The PRESIDING OFFICER. The yeas were 67, the nays were 20. The motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

Clayton Act (15 U.S.C. 12 et seq.) is amended by inserting after section 4H the following new section:

"SEC. 41. (a) Two or more persons who are subject to liability for damages attributable to an agreement to fix, maintain, or stabilize prices under section 4, 4A, or 4C of this Act may claim contribution among them according to the damages attributable to each such person's sales or purchases of goods or services. A claim for contribution by such person or persons against whom an action has been commenced may be asserted by cross-claim, counterclaim, third-party claim, or in a separate action, whether or not an action has been brought or a judgment has been rendered against the persons from whom contribution is sought.

"(b) A release or a covenant not to sue or not to enforce a judgement received in settlement by one of two or more persons subject to contribution under this section shall not discharge any other persons from liability unless its terms expressly so provide. The court shall reduce the claim of the person giving the release or covenant against other persons subject to liability by the greatest of: (1) any amount stipulated by the release or covenant, (2) the amount of consideration paid for it, or (3) treble the actual damages attributable to the settling person's sales or purchases of goods or services. Under item (3) above, actual damages shall not be trebled in proceedings under section 4A of this Act.

"(c) A release or covenant, or an agreement which provides for a release or covenant, entered into in good faith, relieves the recipient from liability to any other person for contribution, with respect to the claim of the person giving the release or covenant, or agreement, unless the settlement provided for in any such release, covenant, or agreement is not consummated.

"(d) Nothing in this section shall affect the joint and several liability of any person who enters into an agreement to fix, maintain, or stabilize prices.

"(e) This section shall apply to all actions under section 4, 4A, or 4C of this Act commenced after the date of enactment of this section.

"(f)(1) The claim reduction principle of subsection (b) of this section shall also apply to actions alleging an agreement to fix, maintain, or stabilize prices under section 4, 4A, or 4C of this Act which are pending on the date of enactment of this section, if upon proof by any party subject to liability for damages in such an action, the court determines that it would be inequitable, in light of all the circumstances and notwithstanding subsection (f)(2), not to apply the principle in that action. In ruling on a request to apply claim reduction, the court shall find the facts specially.

"(f)(2) No agreement to settle, compromise, or release a claim under section 4, 4A, or 4C of this Act which has been signed by the parties prior to the date of enactment of this section may be rescinded, disapproved, reformed, or modified by the parties or by the court because of the application of the claim reduction principle, except upon the written consent of all the parties thereto.

"(g) Each subsection of this section is severable from all other subsections, and the invalidity of any subsection for any reason shall not affect the validity of the remaining subsections: *Provided*, That subsections (f)(1) and (f)(2) are not severable from each other, and the invalidity of any provision of those subsections as applied in an action shall render the remainder to those subsections inapplicable in that action.".

Mr. BAKER. Mr. President, what is the business pending before the Senate?

The PRESIDING OFFICER. The committee amendment to S. 995.

Mr. BAKER. Mr. President, may we first have order in the Senate? After that, we shall have debate on this measure. I expect we shall stay on this measure, S. 995, for a reasonable length of time today. I hope we might be able to arrange to lay this measure aside temporarily and take up an appropriations bill. That has not yet been accomplished and it may not be possible to do so.

Senators should know that we shall be on S. 995 for perhaps the next hour.

Mr. BAUCUS. Will the Senator yield?

Mr. BAKER. Yes, Mr. President.

Mr. BAUCUS. Would it be proper to ask for the yeas and nays on the amendment at this time?

Mr. BAKER. Mr. President, is there an amendment pending?

The PRESIDING OFFICER. The committee amendment is pending.

Mr. BAKER. I assume it is in order, but prior to that, if the Senator will permit me, I promised the Senator from Kansas to yield for an unrelated matter.

Mr. BAUCUS. This will take just a moment to ask for the yeas and nays on the amendment.

Mr. BAKER. I yield.

Mr. BAUCUS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, there is no time agreement on this measure.

The PRESIDING OFFICER. Will the Senate be in order? The majority leader is making a statement and cannot be heard.

Mr. BAKER. Mr. President, there is no time agreement on this bill. In a moment, I shall yield the floor so the distinguished chairman of the Committee on the Judiciary (Mr. THURMOND), the President pro tempore, may seek recognition. Before I do so, I wish to yield to the distinguished Senator from Minnesota for the purpose of making an introduction.

Mr. President, I ask unanimous consent that, after the introduction is made, the Senate stand in recess for 1 minute so that we may greet our visitor.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISIT TO THE SENATE BY THE VICE SPEAKER OF THE TUNISIAN ASSEMBLY

Mr. BOSCHWITZ. Mr. President, it is my pleasure to welcome today Mr. Abbella Ziz Beltaief, who is the Vice Speaker of the Tunisian Assembly. I ask unanimous consent that we set aside one moment so we may greet him.

(Applause, Senators rising.)

RECESS FOR 1 MINUTE

The PRESIDING OFFICER. Without objection, there will be a brief recess for 1 minute so that Senators may greet our guest.

There being no objection, the Senate, at 3:33 p.m., recessed for 1 minute; whereupon, at 3:34 p.m. the Senate reassemble when called to order by the Presiding Officer (Mr. GORTON).

ANTITRUST EQUAL ENFORCEMENT

Mr. LEAHY. Mr. President, may we have a modicum of order, just for practice?

The PRESIDING OFFICER. The Senate will be in order so that the Senator from Vermont may be heard.

The Senator may proceed.

Mr. LEAHY. Mr. President, I note for the record that I voted to proceed with S. 995. It has been my longstanding practice to support, whenever possible, the Senate majority leader of either party when he seeks to bring up a bill. I suspect that will continue to be my practice. I would not want that to be construed as indicating that I favor S. 995 precisely the way it is now written, since it may be applied retroactively. I note for the Senate that I may well have amendments to the bill as presented before the Senate. I certainly will have a number of statements I shall want to make about it, focusing on the retroactivity provisions of the bill.

With that, Mr. President, I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

In my capacity as Senator from the State of Washington, I suggest the absence of a quorum. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. METZENBAUM. I object.

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue to call the roll.

The bill clerk continued to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, today I am pleased to present for consideration by the Senate, S. 995, the Antitrust Equal Enforcement Act. This bill is designed to improve the equity and the effectiveness of antitrust law enforcement by establishing a right of contribution and claim reduction among defendants subject to liability in horizontal price-fixing cases.

The distinguished Senator from Montana has asked for the yeas and nays on the amendment as reported from the Committee on the Judiciary. I favor the committee amendment and I hope the Senate will adopt it.

The bill applies only to price fixing among competitors, known as horizontal price fixing.

Under the present law of joint and several liability, a single price-fixing defendant may be subject to treble damage liability based on a plaintiff's total damages attributable to the actions of all participants in the price-fixing conspiracy. If a plaintiff settles with some defendants for less than treble the actual damages caused by those defendants, the excess damages can be recovered from nonsettling defendants. Thus, even though one de-

fendant's sales may account for only a small portion of a plaintiff's damages, the defendant nevertheless may find himself responsible for the damages caused by many other co-conspirators, trebled in accordance with the provisions of the Clayton Act.

The question of whether effective antitrust law enforcement requires modification of the present law to provide that a single defendant will be held accountable only for treble the damages caused by his own wrongdoing has been expressly left to Congress by the Supreme Court. In 1981, in the case of Texas Industries, Inc. against Radcliff Materials, Inc., the Court held that there is no express or implied right of contribution under the antitrust laws, nor does such a right exist under Federal common law. However, the Court took note of the far-reaching policy questions involved in the contribution issue and concluded that the matter was one for Congress to resolve. Recognizing its responsibility to consider these important issues, the Committee on the Judiciary conducted hearings both in the present Congress and in the 96th Congress. Based on the extensive record compiled in these hearings, the committee has concluded that a right of contribution should be established for antitrust price-fixing cases.

In recent years, the existence of the principle of joint and several liability without contribution has fostered the increasing use of whipsaw tactics by plaintiffs in price-fixing cases. Once a plaintiff commences such litigation against several defendants, he typically settles for low amounts with a few defendants at an early stage in the litigation. Then, armed with the threat of treble liability for all remaining damages resulting from the conspiracy, the plaintiff is able to bring increasing pressure to bear on the remaining defendants to settle at ever higher amounts.

The use of this coercive practice was well documented during committee hearings on S. 995. For example, Mr. George Kress, chairman of the board of Green Bay Packaging, Inc., related how his company was forced to forgo the defense of its innocence and to settle for $5.5 million in the Corrugated Container litigation, after concluding that its potential liability could otherwise reach $5 billion. Green Bay Packaging's settlement amounted to $3.7 million per market percentage point whereas the first defendants to settle escaped for $500,000 per market percentage point. Despite the inequities of this settlement result, companies in Green Bay Packaging's position have no realistic alternative. Even if they choose to litigate and ultimately establish their innocence, the victory may prove hollow due to the severe impact on the company's borrowing capabilities created by the pending litigation. Because of the existence of contingent liabilities of such magnitude, smaller companies which do not settle have found it difficult, if not impossible, to obtain necessary financing to keep their businesses going as long as the litigation remains unresolved.

S. 995 will put a stop to the inequitable results I have just described. The bill will achieve this first by permitting defendants who are sued or held accountable for price-fixing damages caused by other conspirators to seek contribution from the co-conspirators. This right of contribution may be asserted through procedural mechanisms already established by the Federal Rules of Civil Procedure. Each defendant's share of the damage liability will be based upon its own sales to or purchases from the plaintiffs.

To further insure that each defendant pays no more than his fair share of the plaintiff's damages, the bill provides a carve out formula pursuant to which any damages attributable to defendants who settle the litigation will not be charged to those defendants who do not choose to settle. Basically, the formula operates to reduce the litigating defendants' liability by the amount of any settlement agreed to by the plaintiff and settling defendants or three times the actual damages attributable to the settling defendants' misconduct, whichever is greater.

One of the threshold issues that the committee confronted in its consideration of S. 995 was whether contribution among price-fixing defendants is appropriate from a philosophical standpoint. It was argued by some that the courts and Congress should not be concerned over whether equity is achieved among wrongdoers through contribution.

Although a rule against contribution among joint tort-feasors was originally established in 18th century English common law, the contribution concept has had a much more favorable reception in the United States. At least 37 States have statutes which expressly permit contribution. The Federal courts have established a contribution rule governing tort situations, and Congress has specifically enacted provisions in several statutes permitting contribution even where the wrongdoing is intentional.

It is evident that jurisprudence in the United States is moving more and more toward permitting contribution. Our legal philosophy clearly reflects a belief that every wrongdoer must pay his share of the damages caused. As the Honorable Charles B. Renfrew, a distinguished former Federal judge and current antitrust law practitioner observed in his testimony before the committee: "There has been a clear and unmistakable trend in the law permitting contribution based upon principles of fundamental fairness, and it reflects the policy of allocating damages in an equitable manner upon the responsible parties." The committee therefore concluded that the adoption of a contribution rule in price-fixing cases would be in harmony with our principles of jurisprudence.

It has also been argued by some that allowance of contribution among price-fixing defendants would do harm to the deterrent factor embodied in the principle of joint and several liability without contribution. According to this theory, a potential price fixer is more readily discouraged from illegal conduct if he faces the prospect of having to pay treble the total damages caused by all the conspirators.

The committee carefully considered and rejected this argument for several reasons. First, numerous witnesses testified that actual treble damage liability, coupled with the threat of criminal fines and jail sentences, provide adequate deterrence to world-be price fixers. The Honorable Griffin Bell, former Attorney General of the United States, testified that "the best deterrent to price fixing is vigorous criminal prosecutions" by the Department of Justice, and further, "that treble damages based on the defendants' own market share afford a sufficient deterrent to price fixing." These conclusions were shared by numerous other experts who testified at the hearings and have been affirmed by several noted antitrust scholars.

Second, rather than deterrence being reduced by contribution, some experts feel contribution would actually improve deterrence by providing certainty to all would-be violators that they cannot avoid liability simply by being excluded from direct suits by plaintiffs. Prof. Lawrence Sullivan, for example, has observed that by insuring a larger number of antitrust violators are subject to liability, contribution "maximizes the deterrence goal of certainty of punishment."

It also has been suggested that contribution and claim reduction will discourage settlements in price-fixing cases. The committee found little evidence that the provisions in S. 995 would have an adverse effect on legitimate settlements whereby plaintiffs and defendants enter into a true compromise of their claims. The bill might, however, discourage the coercive settlements that plaintiffs presently are able to extract through the threat that full treble liability for the sins of all conspirators will be visited upon the heads of one or a few defendants.

The very nature of the litigation settlement is compromise. A plaintiff relinquishes some of the damages to which he might otherwise be entitled in exchange for the avoidance of the expense and uncertainty of going to trial. It is indeed ironic that, under current antitrust principles, a price-

fixing plaintiff can "settle," and in reality give up nothing because he retains the right to collect all of his damages from other defendants. It is this very situation that has led to the strategy of plaintiffs' demanding ever higher settlements from the remaining defendants in price-fixing cases.

The hearing record established that price-fixing defendants often are compelled to abandon their defenses and settle in order to avoid massive potential liability occasioned by the absence of contribution. On too many occasions, these defendants, after having paid their settlement amounts, are judged not to have been civilly or criminally liable for antitrust violations. While legitimate settlements of complex antitrust ligitation should be encouraged, defendants should not be forced to forego their day in court because of the high-pressure situations described to the committee.

The Honorable William Baxter, Assistant Attorney General in charge of the Antitrust Division of the Department of Justice, gave his assessment of the situation in his testimony before the committee last December. According to Professor Baxter:

> The kind of settlement in which interference will be at its greatest is the dynamic whipsaw financing kind of settlement, whereby the first defendant gets out for half a cent on the dollar and the next one for one cent on the dollar and the last one winds up facing an enormous potential liability because he essentially is in a position of having to respond to potential liability for the entire industry.

Professor Baxter then observed that:

> If these cases are made somewhat more difficult to settle, I am not at all sure that should be grieved.

The committee shares Professor Baxter's sentiments.

Some critics of S. 995 objected that contribution issues inserted in the midst of antitrust trials would greatly complicate the already complex litigation and deprive plaintiffs of control of their cases. This objection ignores the fact that the Federal Rules of Civil Procedure provide Federal judges with adequate tools to prevent such an occurrence. Under the Federal rules, judges have the authority to order separate trials on some issues. Thus, the courts may allow plaintiffs to prove the collect their total damages in trials against one or any number of defendants. The amount of contribution due from each defendant or from other conspirators not named in the suit clearly is a separate issue which can be tried alone without harming the plaintiff's case.

The committee spent an entire hearing session on the question of whether the contribution and claim reduction provisions of S. 995 should apply to pending cases. After careful consideration of the testimony of numerous antitrust and constitutional scholars, as well as statements from representatives of companies on both sides of price-fixing suits, the committee concluded not to make the contribution section of the bill applicable to pending cases. The committee did, however, adopt a provision making the claim reduction section of the bill applicable to any case pending before the courts on the date of enactment if the presiding judge determines that it would be inequitable not to apply the principle to the particular case.

In adopting this provision, the committee recognized that the question of whether equity and fairness required application of the claim reduction section of S. 995 could not necessarily be resolved in the same manner for all pending cases. By directing the courts to consider this issue, the individual circumstances of each case will be the determining factor and the Federal judges, who are in the best position to determine the equities in each case, can choose to apply or not apply the claim reduction principle as equity demands.

In conclusion, Mr. President, after an exhaustive examination of the issues, it is the opinion of the Committee on the Judiciary that the provisions of S. 995, establishing a right of contribution and claim reduction in antitrust price-fixing cases, will greatly improve the effectiveness of enforcement of the antitrust laws. The principles embodied in the bill reflect a growing consensus in this country that some wrongdoers should not be permitted to escape the payment of their fair share of damages resulting from a conspiracy in which they participated. The bill will not reduce the deterrence factor already embodied in the antitrust laws, nor will it complicate antitrust litigation or hinder legitimate settlements of price-fixing cases. The only settlements that might be reduced are those which permit plaintiffs to intimidate other defendants into foregoing their day in court due to potentially massive liabilities based on damages caused by all participants in a conspiracy. Finally, S. 995 appropriately recognizes that in some situations, equity and fairness may demand that the claim reduction principles embodied in the bill be applied to pending cases. This decision has been left to the Federal judges presiding over the cases, who are in the best position to weigh the equitable concerns of all parties.

In closing, Mr. President, I would like to take this opportunity to thank the cosponsors of S. 995, the distinguished Senator from Montana (Mr. BAUCUS), the distinguished Senator from Arizona (Mr. DECONCINI), the distinguished Senator from Alabama (Mr. HEFLIN), the distinguished Senator from Nevada (Mr. LAXALT), and the distinguished Senator from Utah (Mr. HATCH) for their thoughtful insight and dedicated work on this bill.

Mr. President, I ask my colleagues to join me and the cosponsors of S. 995 in approving this most important and beneficial revision to our system of antitrust law enforcement.

Mr. President, I want to make this clear so people will understand. Nothing in this bill is retroactive as to cases that have been settled. It only provides that in the event that the trial judge feels it would be unjust not to apply it to a case that has not been finally adjudicated, it would be lawful to do so. If the trial judge thinks that it should be applied to a pending case, then he would apply it; otherwise, he would not.

I wanted to clarify that fact because a good many Senators have asked about this. This is not a bill to sanction any price fixing. Some people in some statements in the news media have said something about relieving price fixing. That simply is not true. It merely provides that anyone that is sued for damages under the antitrust laws may only be responsible for their pro rata share of the damages caused.

We think that if the principle of claim reduction is good to apply to future cases, the courts should have the discretion to apply it to pending cases. It does not affect any case that has been finally adjudicated and it does not affect any settlement that has been made.

Now some defendants have made settlements and were concerned about them. The committee put in a special provision in this bill to protect settlements. It reads this way:

> No agreement to settle, compromise, or release a claim under section 4, 4A, or 4C of this Act which has been signed by the parties prior to the date of enactment of this section may be rescinded, disapproved, reformed, or modified by the parties or by the court because of the application of the claim reduction principle, except upon the written consent of all the parties thereto.

So, Mr. President, we think that this bill is fair; we think it is just; and we think it will be a great improvement in the antitrust laws on the books today.

I yield to the distinguished Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. I thank the distinguished chairman, the Senator from South Carolina, Mr. THURMOND.

Mr. President, I am pleased to be here today working for the passage of the Antitrust Equal Enforcement Act, S. 995. In my opinion, there is a crucial need for changes in our antitrust laws to restore fairness and equity and to eliminate the ability of some defendants to escape responsibility for their actions. I believe, Mr. President, that the single most important mechanism for antitrust law enforcement is the knowledge on the part of potential violators that, if they are caught, they will face certain and severe punish-

ment. Today, this fundamental enforcement mechanism does not exist. Instead, it is common knowledge that antitrust violators can, and do, avoid the serious consequences of their activities by entering into "sweetheart" settlements with private antitrust plaintiffs. As long as we permit potential violators to gamble on the fact that the financial rewards of price fixing can be substantial, even if they are caught, we will insure that such violations will continue to occur and that respect for the law will deteriorate.

Because S. 995 closes this significant law enforcement loophole, it is one of the most important antitrust law changes that Congress has considered in recent years. If we adopt S. 995, we will send a message to those who would engage in price fixing that the treble damage liability provisions of the antitrust laws are for real. We will inform plaintiffs and defendants alike that Congress adheres to the predominant legal philosophy in this country that multiple wrongdoers should share equally in compensating the victims of their misconducts. And we will say to the defendants in price fixing cases that we believe they should have an opportunity for their day in court, without fear of massive liability far out of proportion to any damages they themselves possibly could have caused.

I have listened to the primary policy arguments that are raised against S. 995. I submit they are without merit. It is argued by some that the present situation, where some price fixers escape liability while others bear the burden for the entire industry is a greater deterrent to price fixing than the S. 995 approach, which insures that all violators receive their just punishment. I know of no evidence upon which such a conclusion can be based. It certainly seems more logical to me, however, that potential price fixers would be less likely to gamble on illegality if punishment in the form of treble the actual damages they caused was more certain.

I have also heard it said that S. 995 will discourage settlements. The only settlements it will discourage are the "sweetheart" arrangements and the consequent "blackmail" settlements which the present law makes possible. Since I do not believe these inequitable settlements should be countenanced, in any event, I would not be grieved to see them made more difficult.

In conclusion, Mr. President, the antitrust law enforcement system in this country needs this legislation. We should no longer wait for its passage.

All the Senators involved in this legislation have worked hard to achieve meaningful antitrust law reform. Of particular note have been the efforts of the chairman of the Judiciary Committee, Senator THURMOND, and the Senator from Nevada, Senator LAXALT, the Senator from Utah, Senator HATCH, and the Senator from Montana, Senator BAUCUS, as well as the Senator from Ohio, Senator METZENBAUM.

We all agreed on the basic principles embodied in this bill. Following many hearings and discussions among members of the committee, we have approached near unanimity on how to handle almost all key portions of the bill. The only remaining issue to be resolved is whether to apply claim reduction to pending cases. It is my hope that this last remaining issue can be resolved quickly.

Mr. President, I urge my colleagues to approach this task with all the skill and acumen they possess in order that this vital piece of legislation can be processed quickly and that this body can proceed to other vital pending matters.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, no one in the Senate is more saddened by the current circumstances surrounding S. 995 than this Senator. I am a strong supporter of S. 995 as it was introduced. I have worked hard to promote the passage of S. 995 as it was introduced.

Therefore, Mr. President, it troubles me greatly that that bill is now here in a form that I cannot support and that I believe cannot pass Congress. I believe that S. 995, as introduced, was a positive piece of legislation, and that it now has been converted to nothing short of a bailout for price fixers.

Mr. President, the reason that this bill is here before us today, as a private relief bill, is that a few companies are trying to undo the work of our Federal courts. They are coming here attempting to use this body as a court of last resort, and I believe that is wrong.

As I have served in this Congress, I have become more and more impressed with the brilliance of the design of our Constitution. I have repeatedly discussed here on the Senate floor the wisdom of our Founding Fathers in separating the functions of the legislative and the judicial branches.

Once again, Mr. President, we have before us today legislation that ignores the important distinction between the judicial and legislative branches. The legislature is to make the law and the judicial branch is to interpret it. If we permit the legislature to become a court of last resort, then the role of the judicial branch is profoundly undercut. We in the Senate must remain sensitive to the essential doctrine of the separation of powers and the legislation before us blatantly violates that doctrine.

Mr. President, I wish that we had a consensus piece of legislation before us. I wish that S. 995 could breeze through the Senate and the House and be passed by the end of this session of Congress. But, unfortunately, this bill is no longer a consensus bill to make our antitrust laws more fair. Rather, it is now a private relief bill for price fixers who are trying to lessen their liability through the legislative process.

Such a controversial and offensive provision is not the kind of business that should be before us during the lame duck session of Congress. The country wants us working on creating jobs and on appropriating money for the Government. Let us bail out the economy—not price fixers.

S. 995, as introduced, is a bill that I continue to support. I underline "as introduced." It is unfortunate that because of the greed of a few companies that we cannot pass that legislation and benefit the entire business community, which, in my view, should benefit because of the underlying thrust of the bill. However, those few companies and the sponsors of the retroactivity provision are the people who have killed this bill and prevented the businesses of this country from having its benefits far into the future.

The sponsors of the retroactivity provision are responsible for this bill's not passing and the business community should hold them accountable for its not having been enacted during the 97th Congress.

I deeply regret that I cannot wholeheartedly support a bill today on the floor that I have advocated for two Congresses.

I am a primary cosponsor of this bill and I cosponsored a bill that I introduced in the last Congress. I wish that the few companies who are insisting on retroactive application would now back down and allow us to enact an imminently fair bill. If they do not do that, I will feel obliged to do all I can to keep the bill in its current form from passing.

If we permit a few companies to come into Congress now and get bailed out from liability imposed on them by the Federal courts, we are extending an open invitation to every party who is subject to an adverse ruling in a Federal court to come to Congress and try to get bailed out. We cannot let that happen and that is why I cannot support this legislation in its current form.

Mr. President, I yield the floor.

Mr. METZENBAUM. Mr. President, I rise not to address myself at this time to the merit of lack of merit of this legislation but, rather, to address myself to the fact that the matter is before the Senate at all. At this very moment, there is 10.5 percent unemployment in this country. The President, in an ad lib, off-the-cuff remark, mentioned just recently that the economy is in a mess, that the international situation is certainly nothing to be enthused about, that trade negotiations in Europe have not moved forward satisfactorily. There is hardly any problem of major concern that is moving forward in a satisfactory manner, and what does the U.S. Senate do? It stops its action in connection with the special session that was convened at the request of the President to consider certain appropriations bills and we take up a special-interest piece of legislation.

The New York Times today, on the front page, said "Campaign Season Persuades Parties That Voters Want Unemployment Action." This bill is hardly any unemployment action. We are too busy to get into that. No, we have to take up S. 995 because some special interest lobbyists were told that the bill would be taken up during this special session.

As a matter of fact, there is a jobs bill and a program dealing with the economy that the Democrats indicated they wanted to bring up. According to the report in the New York Times:

> Senate Republican leaders, however, warned that there would probably not be enough time to consider the new measure in the special post-election session that began this afternoon.
>
> The new measure that would deal with work renovating veterans hospitals and low-cost housing and other public facilities.

We do not have time to do anything that is important. We have plenty of time to take up every special interest bill that any high-priced lobbyist pushes before the Congress of the United States. This legislation should not be taken up during this special session. It does not belong on our agenda. The American people are not asking for this bill. Some special groups are asking for this bill. This is the session that will be remembered as the one in which every special interest in the country wanted to be exempted from the antitrust laws.

There will be an effort made, I am told, to exempt the shipping industry, in another bill that is waiting to be brought up on the floor of the U.S. Senate, from the antitrust laws; a special effort to bring up the bill to exempt beverage dealers from the antitrust laws; a special effort to exempt the National Football League from the antitrust laws; a special effort to exempt the doctors, the attorneys, and the professions from the antitrust laws; and a special bill to exempt agricultural crops from antitrust laws. Is it not wonderful that the U.S. Senate was brought back for a special session to deal with the appropriations bills and, instead of doing that, we address ourselves to S. 995?

You do not have to be a genius or a profound student of what is going on in Washington to know that there have been more lobbyists hired on both sides of this issue, more high-priced lobbyists than probably any other measure pending before the Congress. This is a high-priced bill, but it is a low-priority measure for the people of this country.

There are 230 million Americans, and I would guess there are not 10,000 of them concerned about this bill. We owe it to them to be doing something about unemployment, something about the economy. But oh, no, it is Tuesday. Wednesday will drag on, Thursday will drag on, and Friday will drag on, and an effort will be made to come in by a side door on one of these other measures. But this bill will have the priority on the floor of the U.S. Senate and only by unanimous consent will it be set aside.

I say to the Members of the U.S. Senate that this bill does not belong here today. It never should have been brought up. It is legislation that, if it should have been taken up at all, should have been taken up in the regular session. We are wasting the time of this body and we are insulting the intelligence of the American people to be debating S. 995 when there are so many pressing problems confronting this Nation.

At a more appropriate time at a later point in this debate, I shall address myself to the lack of merit of this legislation—not alone the basic bill, which I think has no merit, but the amendment that was included having to do with the retroactive aspects of it. For the moment, I shall just rest my case by saying to the Republican leadership of the Senate, this bill does not belong on the agenda and the sooner you take it down, the more gratified will the people of this Nation be.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LAXALT. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAXALT. Mr. President, S. 995 is urgently needed to correct what the Wall Street Journal has called "one of the most perverse injustices in our antitrust laws."

Under existing law, any company named in a private antitrust case is potentially liable for treble damages based upon nationwide sales of an entire industry, irrespective of its market share. A company with only a 1-percent market share can be liable for 100 percent of the alleged damages based upon the sales of the entire industry. In a multi-defendant case, a non-settling defendant can be liable for damages based upon the sales of settling defendants.

The unforeseen combination of a number of unrelated legal developments which leads to this problem has created all the wrong incentives. Culpable defendants, who know they cannot go to trial, often settle first for far less than their proportionate shares. Innocent companies, which believe they injured no one and seek to prove it in court, become liable for damages attributable to settlers. This increased damage exposure deprives them, as a practical matter, of their fundamental rights to trial and appeal because they cannot take the risk of an adverse result. Many find themselves with no choice but to pay whatever amount plaintiffs ask. This is a deplorable situation.

Mr. President, I might say the majority of members of the committee came to the same conclusion. The basic bill has been in our committee for an extended length of time, originally espoused, by the way, by Senator BIRCH BAYH of Indiana. It was later in the course of this particular session that we caused to be injected in the debate—necessarily, a majority of us felt—the matter of pending cases.

I think there is nothing new or novel about the injustice that has been created in the whole field in this relatively new area of law. The matter that has recently been involved is how you treat pending cases.

I might say the distinguished chairman of the committee (Mr. THURMOND) worked long and hard to find equitable means whereby you can take pending cases without retroactive result, address them in court, and end with an adverse result. Each company should be responsible for damages it caused. No company should be able to shift its liability to its competitors.

Although the need for this reform has become urgent in the antitrust field only during the last several years, neither the problem nor the legislative solution is new or unique. Similar rights were provided for Federal securities litigation in 1933 and 1934. Great Britain provided similar rights by act of Parliament in 1935. Almost 40 States have enacted statutes of this sort, so there is nothing new or novel about the approach. These various States have recognized, as our committee did, that unless you apply legislation of this kind, you can obtain disproportionate results and the defendant will be forced to settle or to be adjudicated to a result far in excess of its appropriate share.

The hundreds of companies, small and large, involved in pending litigation affected by S. 995 should have their day in court. They should be given the opportunity to prove their innocence without facing enormous damages based upon the actions of other defendants that settled for less than their share.

S. 995, as reported, is remedial legislation which properly provides for limited application in pending cases. It neither mandates application nor arbitrarily prevents the courts from applying it in those cases where application would be just. The bill gives the courts the discretion to apply claim reduction in pending cases where the defendants establish that it would be "inequitable" not to do so. S. 995 does not permit contribution claims in pending cases. Settlements entered into prior to the date of enactment are completely safeguarded.

An amendment to S. 995 to make the bill "prospective only" would be an arbitrary decision by the Congress that no matter what the circumstances, claim reduction shall not apply. It obviously would unfairly discriminate against the parties in pending cases which gave rise to the need for the legislation in the first place. Moreover, it may prejudice rights asserted in pending cases. For example, in the linerboard case in Philadelphia, five defendants settled with plaintiffs and provided in their settlement agreements that if Congress enacted contribution legislation, the nonsettling companies would not be liable for damages based upon the sales of the settling companies. A prospective-only bill would preclude the benefits of this legislation in that case even though all the parties expressly contemplated the possibility of this legislation. If S. 995 were made expressly applicable only to cases commenced after the date of enactment, such would directly prejudice the rights of the defendants in that and other cases.

There is widespread agreement that S. 995's application to pending cases is proper and necessary. As professor and former Solicitor General Robert Bork wrote prior to being named to the Court of Appeals for the D.C. Circuit:

The patent unfairness that prompted S. 995 is as prominent in existing litigation as it will be in future litigation. Indeed, it was the stark injustice of what is occurring now that led to this bill. It would be a cruel irony to promise a cure for the future while leaving current victims of injustice to suffer the very fate which called for the cure.

Former Attorney General Griffin Bell testified:

I would recommend to the committee only a single change in S. 995. The bill as now written applies only to price-fixing cases that are brought after it becomes law. Yet there are cases now pending that should be subject to this bill. *S. 995 is designed to correct a serious injustice, and the injustice is equally present in pending and future cases.* There is no Constitutional prohibition against making S. 995 apply to pending cases since S. 995 concerns only the remedy for price-fixing. In fact, Congress has made many statutes in the past applicable to pending cases.

The provision of S. 995 *May well lead to settlement of pending cases with the result of a lesser case load in the courts and some modicum of economic stability in the business community at a time when the nation badly needs it.* (Tr. at 19, italic added.)

Former Attorney General Benjamin Civiletti wrote:

The legislation sought would permit claim reduction to be applied in pending cases only if the courts determine that it would be fair to do so. How can it be an "outrage" for Congress to place the determination of fairness in the hands of the courts?

Remedial legislation almost always applies to pending cases to correct or prevent injustice. This remedial legislation is needed to correct a great harm, and it would be both tragic and perverse not to apply it to the very cases which so vividly demonstrate that need.

Former district judge, Deputy Attorney General, and antitrust practitioner, Charles Renfrew, wrote in his statement to the Senate Committee on the Judiciary:

Congress has on many occasions made numerous antitrust and other statutes applicable to pending cases. Indeed, a basic rule of statutory construction is that newly enacted legislation is to be applied immediately upon its effective date and in pending cases, unless to do so would result in manifest injustice or Congress expressly provided otherwise.

There are many examples of legislation applicable to pending cases in the antitrust field. The Antitrust Reciprocity Act was passed by the Senate on July 9, 1981, by voice vote. Last Congress, the Soft Drink Interbrand Competition Act was applicable to pending cases. Numerous other statutes affecting substantial rights have applied to pending cases.

As former Senator Sam Ervin states:

To be fair to all, the claim reduction provisions of S. 995 should be available in pending as well as future cases. The arguments against the amendment to S. 995 adopted by the Senate Judiciary Committee boil down to this—that Congress should delay correcting the widespread abuses of the treble damage provision of the Clayton Act and continue to permit gross injustices to be perpetrated in pending cases.

The reason we have the Congress of the United States is so the Congress can change unjust laws. Administration of justice ought not to be like playing Russian Roulette. Nobody has a vested right in an unjust law. Where the ability to perpetrate an injustice arises out of a law which Congress passed with the best of intentions, it is all the more incumbent upon Congress to change the unjust law.

Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I wonder if my good friend from Nevada, who wears two hats, as I understand it——

Mr. LAXALT. At least.

Mr. METZENBAUM. At least—and who certainly has an authoritative position with respect to the other party in this body, would not care to address himself to the issue that the Senator from Ohio raised and that is whether or not in a session which has been specially convened by the President of the United States, at least asked for by him to deal with appropriations measures, he does not feel that there is some inappropriateness in taking up a measure of this kind rather than some of the more pressing issues having to do with jobs, the MX, and some of the other issues that certainly seem to have greater national concern than does this one? And I ask him in friendliness because I know that the Senator from Nevada has been a very straight-talking person and has been very frank, and although at times I have seen fit to disagree with him I have ualways respected his opinion. I might say in passing that I also want to congratulate him upon assuming his new responsibilities on behalf of the other party. I think that the party has chosen well.

Mr. LAXALT. I thank my friend, the distinguished Senator from Ohio.

I think everybody on this side of the aisle shares the concerns expressed by the Senator from Ohio. Surely we are all concerned with the state of the economy. Surely we are all concerned about the unemployment problem. I might say, in reference to the President, that he called this session, yes, for the principal purpose of our addressing ourselves, as we should, to the appropriations process, feeling, as most of us do in this body, that we have indulged in this Congress, and certainly even in this body, for far too long in stopgap legislation. That is the reason why, despite, I think, a total lack of appreciation of his problem in both Houses and on both sides, he went ahead and pressed his demand.

But I think the good Senator from Ohio also recognizes, as any former Governor would, that you call a special session but the Executive cannot prescribe the agenda—and that is essentially the case here. Certainly, President Reagan has no control over what we consider. He has established what he deems to be his priority, that of the matter of the appropriation bills.

Now, with respect to S. 995, this has been in the hopper for a long while. It has been addressed to the attention of our leader for a long while. Our esteemed chairman, Senator THURMOND, has asked for action on this. We thought we were going to get action before we went out the last time, and

for reasons well beyond our control, and certainly beyond the control of the leader, he indicated that we, too, should have our day in court, so to speak, and that we would have, as our first order of business, consideration of S. 995. That is precisely where we are, with the understanding, it is to be sure, that the consideration of this legislation will in no manner impede the proper consideration of the problems which are far more serious, and those relate to the state of the economy and unemployment. I rather hope that we could address ourselves to the cogent points involved in this legislation, being especially the present cases amendment, and dispose of them. Then we can move forward and handle the bills that Senator HATFIELD wants so badly handled by way of the appropriations process.

Mr. METZENBAUM. I thank the Senator.

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mrs. KASSEBAUM assumed the chair.)

Mr. THURMOND. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Madam President, does anybody on this side desire to speak on this measure? I do not hear anyone.

Does anybody else on the other side wish to speak? Does Senator METZENBAUM know of anyone on the other side who wants to speak?

Mr. METZENBAUM. I do not.

Mr. THURMOND. Then, I guess we are ready for a vote.

Mr. METZENBAUM. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

The bill clerk continued with the call of the roll.

Mr. STEVENS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOTURE MOTIONS

Mr. STEVENS. Madam President, I send a cloture motion on the amendment to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the committee amendment to S. 995, a bill to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

Strom Thurmond, Paul Laxalt, Howell Heflin, Orrin Hatch, Mark Hatfield, Dennis DeConcini, John Glenn, Chuck Grassley, Jesse Helms, Don Nickles, Dan Quayle, Jennings Randolph, Steve Symms, Ted Stevens, James A. McClure, and John Tower.

Mr. STEVENS. Madam President, it is my understanding that is the cloture motion on the pending amendment.

I send to the desk another cloture motion on the bill itself.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the bill S. 995.

Strom Thurmond, Paul Laxalt, Howell Heflin, Orrin Hatch, Mark Hatfield, Dennis DeConcini, John Glenn, Chuck Grassley, Jesse Helms, Don Nickles, Dan Quayle, Jennings Randolph, Steve Symms, Ted Stevens, James A. McClure, and John Tower.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Madam President, will the Chair advise whether the Senator from Ohio is correct that this matter will come to a vote on the motion filed 2 hours after we reconvene on Thursday? Is that my understanding, unless otherwise agreed upon?

The PRESIDING OFFICER. Under the rules, it would be 1 hour after the Senate reconvenes and a quorum is established.

Mr. METZENBAUM. One hour after the Senate reconvenes?

The PRESIDING OFFICER. And a quorum is established.

Mr. METZENBAUM. When will the vote take place with respect to the second cloture motion?

The PRESIDING OFFICER. If cloture is not invoked, then a vote on the second motion will be taken immediately.

Mr. METZENBAUM. Madam President, will the Chair advise the Senator from Ohio until what time may amendments be filed with respect to the first cloture motion and until what hour may amendments be filed with respect to the second cloture motion?

The PRESIDING OFFICER. On the first cloture motion, which is a motion to the committee amendment, amendments may be filed 1 hour prior——

Mr. METZENBAUM. Before the vote?

The PRESIDING OFFICER. Yes.

Mr. METZENBAUM. And on the second cloture motion?

The PRESIDING OFFICER. Let me see if I have it straight. First-degree amendments must be filed by 1 p.m. tomorrow.

Mr. METZENBAUM. By 1 p.m. tomorrow?

The PRESIDING OFFICER. Second-degree amendments may be filed up to 1 hour prior to a vote.

Mr. METZENBAUM. Under what circumstances are amendments required to be filed by 1 p.m. tomorrow? Do you have only the night to lay over where you have an opportunity to offer amendments; is it the Senator from Ohio's understanding that you always have that period up until the cloture vote or just 1 hour prior thereto? I am curious to know why there is a distinction between the first-degree amendments and the second-degree amendments as to when they must be filed.

The PRESIDING OFFICER. The distinction is found in rule XXII, paragraph 2, where there is a distinction made between first- and second-degree amendments.

Mr. METZENBAUM. Madam President, a further parliamentary inquiry. In view of the fact there are two cloture motions and, therefore, it is entirely possible that the amendment may be adopted to the measure itself, and the cloture motion in connection with the measure itself has been filed, is it necessary that amendments be drafted in the alternative, that is, as if the amendment were adopted and on the assumption it will not be adopted in order to offer amendments to the bill itself? Does the Parliamentarian understand the question?

The PRESIDING OFFICER. I am not sure the Presiding Officer did.

I will say to the Senator from Ohio that amendments technically impossible would be out of order and, therefore, an amendment should not be offered that would be just an obstructionist amendment.

Mr. METZENBAUM. The Senator from Ohio is not talking about obstructionist amendments. He is talking about amendments that are germane and whether or not they may be offered, or whether or not they have to be drafted to the bill itself on the assumption that the amendment is adopted, or on the assumption that it is not, or need they be offered in the alternative?

The PRESIDING OFFICER. The amendments may be offered in the alternative.

Mr. METZENBAUM. Madam President, will the acting majority leader be good enough to advise as to what time he intends to reconvene the Senate in the morning?

Mr. STEVENS. It is my intention, the intention of the leadership, to recess until 11 a.m. tomorrow when that time comes. It may be slightly earlier because of routine business or special orders, but we would intend for it to be approximately 11 a.m.

Mr. METZENBAUM. I thank the acting majority leader and I thank the Chair.

Mr. THURMOND. Madam President, I wonder if the distinguished Senator from Ohio would care to have a cloture vote tomorrow and dispose of this matter so we can move on to other important things in this short session.

Mr. METZENBAUM. The answer is no.

Mr. STEVENS. Madam President, I do want to thank the Senator from South Carolina, the Senator from Montana, and the Senator from Ohio for their consideration on how this matter has just been handled.

It is not my intention to attempt to terminate debate at this point. If there is any further discussion on the bill, I would like to know it. If there is no further discussion in this bill now, it would be my hope we would be able to go to some routine matters. I see the distinguished minority leader is here, and we would be prepared to handle some routine matters and then ask the Senate to recess until tomorrow morning. It would be our intention to announce there will be no further votes or requests for attendance of Senators this evening, if that is agreeable with everybody concerned.

ORDER FOR THE RECOGNITION OF VARIOUS SENATORS ON TOMORROW

Mr. STEVENS. Madam President, I ask unanimous consent that Senator SPECTER and Senator HARRY F. BYRD, JR., be recognized on tomorrow, December 1, 1982, for a period of not to exceed 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETO MESSAGE ON S. 2577 INDEFINITELY POSTPONED

Mr. STEVENS. Madam President, I ask unanimous consent that the veto message on S. 2577, the Environmental Research, Development and Demonstration Act of 1983, be postponed indefinitely.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR BUDGET COMMITTEE WAIVER TO BE FILED BY 6 P.M. TODAY ON S. 2411

Mr. STEVENS. Madam President, I ask unanimous consent that the Budget Committee have until 6 p.m. today to file a budget waiver to accompany S. 2411.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. STEVENS. Madam President, I ask unanimous consent that when the Senate stands in recess today it stand in recess until the hour of 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Madam President, is there further business to come before the Senate?

The PRESIDING OFFICER. Is there further business?

Mr. STEVENS. May I inquire of the Senator from Ohio and the Senator from Montana if there is any further business to come before the Senate this evening?

Mr. METZENBAUM. I have nothing.

RECESS UNTIL 10:30 A.M. TOMORROW

Mr. STEVENS. Madam President, if there is no further business to come before the Senate, I move that the Senate stand in recess in accordance with the previous order.

The motion was agreed to; and at 5:32 p.m., the Senate recessed until Wednesday, December 1, 1982, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 30, 1982:

The following-named persons for the positions indicated, to which positions they were appointed during the last recess of the Senate:

Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, vice Paul Craig Roberts, resigned.

Orville G. Bentley, of Illinois, to be an Assistant Secretary of Agriculture (new position).

Martin S. Feldstein, of Massachusetts, to be a member of the Council of Economic Advisers, vice Murray L. Weidenbaum, resigned.

L. Clair Nelson, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988, vice Marian Pearlman Nease, resigned.

Caroline H. Hume, of California, to be a member of the National Museum Services Board for a term expiring December 6, 1985, vice Dorothy Graham-Wheeler.

Edward A. Knapp, of New Mexico, to be Director of the National Science Foundation for a term of 6 years, vice John Brooks Slaughter, resigned.

Jean Broward Shevlin Gerard, of New York, to be the Representative of the United States of America to the Fourth Extraordinary Session of the General Conference of the United Nations Educational, Scientific, and Cultural Organization.

James Daniel Phillips, of the District of Columbia, to be the Alternate Representative of the United States of America to the Fourth Extraordinary Session of the General Conference of the United Nations Educational, Scientific, and Cultural Organization.

WITHDRAWAL

Executive nomination withdrawn from the Senate November 30, 1982:

Norman Terrell, of California, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency, vice Thomas D. Davies, resigned, which was sent to the Senate on January 28, 1982.

HOUSE OF REPRESENTATIVES—*Tuesday, November 30, 1982*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, we pray that You will strengthen our faith and make bold our convictions that we will stand for right and truth. Help us to focus on actions that help people from every region and from all backgrounds that we truly become ambassadors of peace and messengers of good will. Enable us to learn from others so that our perpective will grow till all Your people share in Your gifts, and division and suspicion be put aside. Grant this our prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On September 20, 1982:

H.R. 3663. An act to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers.

On September 24, 1982:

H.R. 1710. An act to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives; and

H.R. 3835. An act for the relief of Rutherford K. Clarke and his wife Ida T. Clarke.

On September 27, 1982:

H.R. 3620. An act transferring certain Federal property to the city of Hoboken, N.J.; and

H.R. 6068. An act to authorize appropriations for fiscal year 1983 for intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes.

On September 30, 1982:

H.R. 3517. An act to authorize the granting of permanent residence status to certain nonimmigrant aliens residing in the Virgin Islands of the United States, and for other purposes.

H.R. 4347. An act to authorize the Secretary of the Interior to proceed with development of the WEB pipeline, to provide for the study of South Dakota water projects to be developed in lieu of the Oahe and Pollock-Herreid irrigation projects, and to make available Missouri basin pumping power to projects authorized by the Flood Control Act of 1944 to receive such power.

H.R. 6956. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes.

H.R. 7065. An act to amend the Community Services Block Grant Act to clarify the authority of the Secretary of Health and Human Services to designate community action agencies for certain community action programs administered by the Secretary for fiscal year 1982, and for other purposes; and

H.J. Res. 520. Joint resolution to provide for a temporary increase in the public debt limit.

On October 2, 1982:

H.J. Res. 599. Joint resolution making continuing appropriations for fiscal year 1983, and for other purposes.

On October 4, 1982:

H.R. 5288. An act granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste; and

H.J. Res. 496. Joint resolution to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week."

On October 5, 1982:

H.J. Res. 486. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982"; and

H.J. Res. 568. Joint resolution to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day."

On October 6, 1982:

H.R. 3589. An act to authorize the exchange of certain land held by the Navajo Tribe and the Bureau of Land Management, and for other purposes;

H.R. 5081. An act to declare that the United States holds certain lands in trust for the Washoe Tribe of Nevada and California and to transfer certain other lands to the administration of the U.S. Forest Service; and

H.J. Res. 612. Joint resolution to provide for the temporary extension of certain insurance programs relating to housing and community development, and for other purposes.

On October 12, 1982:

H.R. 4623. An act to amend titles 10, 14, 37, and 38, United States Code, to codify recent law and to improve the code;

H.R. 5154. An act to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business;

H.R. 6168. An act to amend title 18, United States Code, to provide a criminal penalty for threats against former Presidents, major Presidential candidates, and certain other persons protected by the Secret Service, and for other purposes;

H.R. 6454. An act to amend title 18, United States Code, to clarify the applicability of offenses involving explosives and fire;

H.R. 6976. An act to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons); and

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial.

On October 13, 1982:

H.R. 3881. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain lands conveyed to the Arkansas Forestry Commission, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such lands to such commission;

H.R. 6133. An act to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal years 1983, 1984, and 1985, and for other purposes; and

H.R. 6156. An act to clarify the jurisdiction of the Securities and Exchange Commission and the definition of security, and for other purposes.

On October 14, 1982:

H.R. 825. An act for the relief of Yick Bong Au Yeung;

H.R. 1783. An act for the relief of Felipe B. Manalo and Maria Monita A. Manalo;

H.R. 1841. An act for the relief of Isabelita Clima Portilla;

H.R. 2035. An act to authorize certain employees of the U.S. Department of Agriculture charged with the enforcement of animal quarantine laws to carry firearms for self-protection and to improve the quality of table grapes for marketing in the United States;

H.R. 4468. An act to amend chapter 84, section 1752 of title 18, United States Code, to authorize the Secretary of the Treasury to establish zones of protection for certain persons protected by the U.S. Secret Service;

H.R. 4490. An act for the relief of Lehi L. Pitchforth, Jr.;

H.R. 5658. An act to authorize the use of education block grant funds to teach the principles of citizenship;

H.R. 5930. An act to extend the aviation insurance program for 5 years;

H.R. 5941. An act to designate the building known as the Federal Building and U.S. Courthouse in Greenville, S.C., as the "Clement F. Haynsworth, Jr., Federal Building," the building known as the Quincy Post Office in Quincy, Mass., as the "James A. Burke Post Office," and the U.S. Post Office

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Building in Portsmouth, Ohio, as the "William H. Harsha U.S. Post Office Building";

H.R. 6422. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land previously conveyed to the State of Connecticut;

H.R. 6782. An act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children, and to modify and improve the educational assistance programs administered by the Veterans' Administration and the veterans' employment programs administered by the Department of Labor; and for other purposes;

H.R. 7293. An act to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes; and

H.J. Res. 588. Joint resolution to provide for the designation of the month of October 1982, as "Head Start Awareness Month."

On October 15, 1982:

H.R. 684. An act for the relief of Ok-Boon Kang;

H.R. 1281. An act to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A-056802 without regard to the 80-rod limitation provided by existing law;

H.R. 1481. An act for the relief of George Herbert Weston;

H.R. 1486. An act to establish the Protection Island National Wildlife Refuge, Jefferson County, State of Washington;

H.R. 1826. An act for the relief of Shinji Oniki;

H.R. 2193. An act for the relief of Berendina Antonia Maria van Kleeff;

H.R. 2340. An act for the relief of Theodore Anthony Dominguez;

H.R. 2528. An act to amend the Economy Act to provide that all departments and agencies may obtain materials or services from other agencies by contract, and for other purposes;

H.R. 3171. An act for the relief of Dr. David Pass;

H.R. 3278. An act to amend title 10, United States Code, to provide additional standard for determining the amount of space to be programed for military retirees and their dependents in medical facilities of the uniformed services, and for other purposes;

H.R. 3451. An act for the relief of Danuta Gwozdz; and

H.R. 3467. An act to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes;

H.R. 4476. An act to amend the Administrative Conference Act, by authorizing appropriations therefor;

H.R. 4662. An act for the relief of Eun Ok Han;

H.R. 5145. An act to amend title 5, United States Code, to provide training opportunities for employees under the Office of the Architect of the Capitol and the Botanic Garden, and for other purposes;

H.R. 5890. An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes;

H.R. 6164. An act to authorize the Secretary of Agriculture to implement the Agreement on the International Carriage of Perishable Foodstuffs and on the Special Equipment To Be Used for Such Carriage (ATP), and for other purposes;

H.R. 6188. An act to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resource use and development, and for other purposes;

H.R. 6267. An act to revitalize the housing industry by strengthening the financial stability of home mortgage lending institutions and insuring the availability of home mortgage loans;

H.R. 6273. An act to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1983, 1984, and 1985, and for other purposes;

H.R. 6276. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the issuance of revenue bonds to finance college and university programs which provide student educational loans;

H.R. 6811. An act for the relief of Alejo White and Sonia White;

H.R. 6968. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes; and

H.R. 7115. An act to authorize the transfer of nine naval vessels to certain foreign governments.

On October 18, 1982:

H.R. 5228. An act to amend title 18 of the United States Code to implement the Convention on the Physical Protection of Nuclear Material, and for other purposes;

H.R. 5662. An act to extend until October 1, 1983, the authority and authorization of appropriations for certain programs under the Fish and Wildlife Act of 1956; and

H.R. 6865. An act to amend the Perishable Agricultural Commodities Act, 1930, to require the Secretary of Agriculture to accept the payment of monetary penalties for certain admitted and infrequent violations involving misrepresentation under such act, and for other purposes.

On October 19, 1982:

H.R. 5139. An act to authorize appropriations for certain insular areas of the United States, and for other purposes;

H.R. 6029. An act to authorize the Secretary of the Interior to acquire by exchange certain lands within the Indiana Dunes National Lakeshore in the State of Indiana; and

H.R. 6055. An act to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations).

On October 21, 1982:

H.R. 6142. An act to authorize the Commodity Credit Corporation to process its accumulated stocks of agricultural commodities into liquid fuels and agricultural commodity byproducts, and for the disposition thereof, and for other purposes.

On October 22, 1982:

H.R. 828. An act for the relief of George G. Barrios, doctor of medicine, his wife Olga T. Curz, and their children Kurt F. Barrios, and Karl S. Barrios, and Katrina Adelaida Theresa;

H.R. 2342. An act for the relief of Maria Cecilia Gabella-Ossa;

H.R. 3592. An act for the relief of Uili Tuifua, Talameafoou Tuifua, Heta Tuifua, Sateki Tuifua, Ilaisaane Tuifua, and Ofa Hemooni Tuifua;

H.R. 3787. An act to amend sections 10 and 11 of the act of October 21, 1970 (Public Law 91-479; 16 U.S.C. 460x), entitled "An act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes"; and

H.R. 4828. An act to set aside certain surplus vessels for use in the provision of health and other humanitarian services to developing countries.

On October 25, 1982:

H.R. 4441. An act to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes;

H.R. 4613. An act to increase the efficiency of Government-wide efforts to collect debts owed the United States and to provide additional procedures for the collection of debts owed the United States;

H.R. 4717. An act to reduce the amount of LIFO recapture in the case of certain plans of liquidation adopted during 1982, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and for other purposes;

H.R. 5879. An act to amend chapter 2 of title IV of the Immigration and Nationality Act to extend for 1 year the authorization of appropriations for refugee assistance, and for other purposes;

H.R. 6170. An act to amend title 23, United States Code, to encourage the establishment by States of effective alcohol traffic safety programs and to require the Secretary of Transportation to administer a national driver register to assist State driver licensing officials in electronically exchanging information regarding the motor vehicle driving records of certain individuals; and

H.R. 7292. An act to establish a White House Conference on Productivity.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6928

Mrs. FENWICK. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of the bill, H.R. 6928.

The SPEAKER. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

LAMEDUCKS COULD BE SOARING EAGLES

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, it is interesting to note how ducks seem to have been used to describe certain situations in our country. I am sure that many of us remember the ruptured ducks of World War II. And we all now know of course about the lameducks as they pertain to sessions of Congress after election.

Certainly the millions of enlisted men who received the ruptured-duck emblem upon discharge from the armed services in World War II were anything but ruptured or in any way disabled. And it certainly is not necessary or even fitting that this lameduck session of Congress be crippled or handicapped in any way.

The truth is that we are in a position to take some very constructive steps that will not only help the Congress, but will help the country as a whole.

I am hopeful that we will act on such programs as jobs, MX missile, immigration, and appropriations bills. And, Mr. Speaker, it would be my hope that this 97th Congress can finish up not as a lameduck, but really as a soaring eagle.

SOVIETS SHOULD BE PERMITTED TO BUY GRAIN

(Mr. DASCHLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DASCHLE. Mr. Speaker, this is the last day of the U.S. Government's offer to the Soviet Union to guarantee 6-month delivery on 15 million metric tons of grain. I am not able to understand why the President wants to tie our hands by taking away a glimmer of hope for our economically beleaguered farmers—farmers who now face a fourth consecutive year of declining income—by arbitrarily ending our 6-month delivery offer.

I am introducing a resolution today which extends, through the extension of our current United States-Soviet Grain Agreement, the U.S. offer of 6-month guaranteed delivery on 15 million metric tons of grain. The remaining 6 to 8 million metric tons of grain which we will sell the Soviets has a 1-year guaranteed delivery.

The President, by his policy of delaying renegotiating a grain agreement with the Soviet Union, and then by signing only a 1-year extension of the agreement, has not acted in the interest of the United States. The result has been that the Soviets have already purchased 25 to 30 million metric tons of grain this year, most of it not from the United States. The Soviet Union may not, in fact, now need to purchase much more than 6 to 8 million metric tons of American grain. The administration's hard line policy and needless delay has cost this country, and American farmers in particular, dearly. The least we can do is pursue a policy which will maximize the amount of grain we can export commercially.

FAMILY FARMERS DESERVE BETTER

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, let me also join the gentleman from South Dakota in urging the President to back away from a foreign policy that I think is fundamentally wrong and one that injures the family farmers in America.

The President has now removed the sanctions against firms that deal with the Soviets on the natural gas pipeline. And now the only people who are still paying the price in our Government's fumbling foreign policy are the family farmers whose grain markets have been denied the relief that would come from a long-term grain agreement with the Soviets.

I think it is time for us to remind the administration that the refrain "Stay the Course" is a refrain that asks family farmers to try and stay on an obstacle course that pushes many of them off the financial cliff. And I urge the President on behalf of our family farmers to back away from this restriction against a long-term grain trade agreement with the Soviets. Open up those markets, let us improve those markets, and let us give family farmers in this country a chance to survive.

CONGRESS MUST DO MORE THAN TALK

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, the American farmer and industry have been told that they will be protected from unfair trade. America fought for free trade and lost. We came away empty-handed at GATT. Now we must do more than talk, talk. We have to show that we have some muscle.

Two years ago I appeared before the Rules Committee and asked that my bill on casein imports to restrict casein imports to 50 percent of the present level be brought before the Congress. I was told this was not an agricultural issue but a trade issue.

Well, let us dust off this legislation and bring it before Congress and send a signal to the rest of the world.

Bill Brock, our representative at GATT, told the representatives of other nations that the American Congress will not remain idle. And he was told by the French representative that the American Congress is not the center of the universe.

Well, we may not be the center of the universe but I hope that we will do more than talk. I think it is about time we send a signal and tell the rest of the world that we will not be taken advantage of in trade policies.

OUR TRADING PARTNERS HAVE TO KNOW WE MEAN BUSINESS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, this week we saw the result—or lack of result—in the recently concluded GATT talks as a serious setback for world trade.

For generations our Nation has been bearing the brunt of discriminatory trade practices throughout the world at large. And we alone, or nearly alone, have carried the torch for free trade among the free nations of the world.

I am extremely disappointed that the conference concluded without substantial progress in lowering the discriminatory trade barriers in the Common Market countries affecting our agricultural exports.

Now, I totally agree that it is time for us in this Congress to take note of the lack of resolve among our trading partners, and show the American people that we will no longer sit back and allow our trading partners to kick us in the teeth.

CALL OF THE HOUSE

Mr. UDALL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 397]

□ 1230

The SPEAKER. On this rollcall, 363 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

□ 1230

AMERICANS STILL MISSING AND UNACCOUNTED FOR IN SOUTHEAST ASIA

(Mr. FOGLIETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FOGLIETTA. Mr. Speaker, last October 1, just before our election recess, I introduced Concurrent Resolution 425, concerning the almost 2,500 Americans still missing and unaccounted for in Southeast Asia. Over 500 of these Americans are presumed to be located in Laos.

Currently, the resolution is before the Asian and Pacific Affairs Subcommittee of the Foreign Affairs Committee. I am very hopeful that the subcommittee and the committee will quickly consider and report the resolution, which I believe is noncontroversial.

Mr. Speaker, it is almost a decade since American troops have come home from the conflict in Southeast Asia. For the most part, the governments of the Southeast Asian nations have not been cooperative at all in locating and returning Americans unaccounted for, or their remains. Recently, the Government of Laos received a delegation of Americans from the National League of Families of Americans Missing or Prisoners in Southeast Asia. These Americans were accompanied by U.S. officials and visited several areas that might contain information on missing Americans.

I am heartened by this recent indication of willingness to cooperate that the Lao Government has expressed, and I am hopeful that the House can consider and pass House Concurrent Resolution 425 during this busy session. It is my understanding that Senator HAYAKAWA has introduced an identical resolution, and the Senate anticipates early action.

I am pleased to have among current cosponsors of this resolution my colleague from Mississippi, Mr. MONTGOMERY, my colleague from California, Mr. DORNAN, and my colleague from Massachusetts, Mr. FRANK. I urge my colleagues' support of this resolution, and would be more than pleased to have as many Members as possible as cosponsors.

CURRENT COSPONSORS OF H. CON. RES. 425

Sonny Montgomery, Robert Dornan, Barney Frank, Billy Tauzin, Jim Santini, Robert Roe, Larry Winn, Doug Applegate, Don Young, and John LeBoutillier.

ESTABLISHING THE HOUSE OF REPRESENTATIVES PAGE BOARD FOR SUPERVISION AND EDUCATION OF PAGES

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 611), and I ask unanimous consent for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 611

Resolved, That until otherwise provided by law, there is hereby established a board to be known as the House of Representatives Page Board to insure that the page program is conducted in a manner that is consistent with the efficient functioning of the House and the welfare of the pages.

SEC. 2. (a) The Page Board shall consist of—

(1) two Members of the House appointed by the Speaker and one Member of the House appointed by the minority leader;

(2) the Clerk, Doorkeeper, and Sergeant at Arms of the House; and

(3) the Architect of the Capitol.

(b) As used in this resolution, the term "Member of the House" means a Representative in, and a Delegate or Resident Commissioner to, the Congress.

SEC. 3. The Page Board shall have authority to prescribe such regulations as may be necessary to carry out this resolution.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS OF THE HOUSE OF REPRESENTATIVES PAGE BOARD

The SPEAKER. Pursuant to House Resolution 611, 97th Congress, the Chair appoints as members of the House of Representatives Page Board the following Members of the House:

Mr. MINISH of New Jersey, and

Mr. FAZIO of California.

The Chair recognizes the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, pursuant to House Resolution 611, 97th Congress, I appoint the gentleman from Indiana (Mr. MYERS) as a member of the House of Representatives Page Board.

REMOVAL OF NAME OF MEMBER AS A COSPONSOR OF HOUSE RESOLUTION 48

Mr. VOLKMER. Mr. Speaker, I ask unanimous consent that my name be removed from cosponsorship of House Resolution 48.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 7072, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7072) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi? The Chair hears none, and appoints the following conferees: Messrs. WHITTEN, TRAXLER, ALEXANDER, MCHUGH, NATCHER, HIGHTOWER,

AKAKA, and WATKINS, Mrs. SMITH of Nebraska, and Messrs. ROBINSON, MYERS, LEWIS, and CONTE.

NUCLEAR WASTE POLICY ACT OF 1982

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committees of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3809) to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3809, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, November 29, 1982, the text of H.R. 7187 was considered as an original bill for the purpose of amendment.

Are there any further amendments which are made in order pursuant to the rule?

AMENDMENT OFFERED BY MR. LUNDINE

Mr. LUNDINE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment in order under the rule?

Mr. LUNDINE. Yes, Mr. Chairman, it is.

The Clerk read as follows:

Amendment offered by Mr. LUNDINE: On page 66, strike lines 11 through 18.

On page 67, strike lines 1 through 10.

Beginning on page 72, strike sections 135, 136, and 137.

On page 94, strike lines 21 through 24.

On page 117, strike section 218(c)(2).

On page 118, strike section 218(e).

On page 138, line 6, strike the words, "under section 137(a)".

Redesignate sections accordingly.

Mr. LUNDINE. Mr. Chairman, my amendment would strike from this bill the provisions mandating 2,000 metric tons of Federal interim storage for utility spent fuel. At the outset of the debate on this amendment, I want to make clear that I am a supporter of this legislation and my efforts are not designed to endanger its passage. Neither do I put forward this amendment as someone opposed to nuclear energy. I support nuclear energy and regard it as a necessary energy source for our future economic well-being.

At the same time, after many years of study of the nuclear waste issue, I have concluded that a direct Federal role in the interim storage of utility spent fuel is both unnecessary and ill advised.

The provisions providing for Federal interim spent fuel storage are unnecessary for two basic reasons. First, the technology for storing spent fuel on an interim basis is well known and the utilities to date have had an excellent safety record in this regard. Therefore, there is no overriding health and safety reason the Federal Government must assume this responsibility.

Second, a Federal role cannot be justified on the basis of need. Estimates by the DOE of projected shortfall in utility storage have continued to be revised downward since 1977. When a Federal interim storage program was first proposed in 1977, DOE estimates of the need for surplus storage capacity were greatly overestimated. In 1977, DOE told the Congress that this program was needed to address an anticipated shortfall in utility spent fuel storage by 1983 of 1,700 metric tons, 5,700 metric tons by 1986, and 14,400 metric tons by 1990. In 1978, DOE issued an updated estimate which stated that only 560 metric tons of additional storage would be needed by 1983, and only 6,940 by 1990. In 1980, DOE revised its estimates even further downward to claim a need for only 377 metric tons of storage by 1983, 1,047 by 1986, and 3,277 by 1990. In 1981, in testimony before the Nuclear Regulatory Commission during the waste confidence rulemaking, the Department of Energy testified that a Federal interim storage program for utility spent fuel was no longer necessary. The most recent update from the DOE shows that the earliest date when utilities will need additional storage capacity is in 1986 when they estimate there will be a shortfall of 8 metric tons. Now, DOE only projects a shortfall in 1990 of 400 metric tons.

It is clear from these figures that the critical time period for spent fuel storage will be between 1986 and 1990. What is important to focus on is the fact that DOE's own recent estimates of 8 metric tons up to 400 metric tons does not take into account the potential contribution that new technologies such as rod consolidation and dry storage can make to resolving this modest shortfall. A recently completed plant-by-plant survey by the Nuclear Regulatory Commission of the near-term utility spent fuel storage problems points out that each of these utilities has available to it options to solve its problem. Transshipment, reracking, rod consolidation, utilization of dry storage technologies, and construction and development of additional pools are available.

In addition, DOE, OTA, and NRC have all recognized the potential cost advantage of rod consolidation and dry storage technologies over a centralized interim storage program. A recent report prepared for the DOE estimates that several different dry storage options could be available by 1986 and that they would cost less than centralized Federal storage.

The technology push aspect of this whole debate must not be overlooked. It is important that these new technologies be brought through the demonstration phase and to commercialization. For this reason, under my amendment the section of this bill which provides for an accelerated research and development program for these technologies is retained. It is also important to note that as part of this research and development program, the Federal Government would be permitted to take up to 300 metric tons of spent fuel from utilities for research purposes. Therefore, the research program itself provides a modest safety valve for a utility that might have a storage problem which cannot be resolved.

My amendment would also preserve provisions in the bill for expedited NRC licensing provisions for at reactor interim storage. These streamlined procedures at the NRC will insure timely action on licensing issues.

A recent memorandum from the Office of Technology Assessment which analyzed the pending legislation, I think summarizes my arguments very well:

DOE's most recent analysis of spent fuel storage needs indicates that the amount of emergency storage capacity needed could be quite small, provided that it is indeed limited to cases in which utilities are experiencing unavoidable delays in their good-faith efforts to provide their own storage, and does not serve as a relatively low cost, more convenient substitute for such storage. Specifically, DOE estimates that if applications for reracking of existing basins, and for transshipments to reactors that have additional storage capacity, are approved by the NRC in a timely manner, 400 metric tons of storage in new facilities would be needed through 1990 to ensure that every reactor maintains full core reserve. If this amount of storage in new facilities were made available, the 23 reactors expected to exhaust the maximum capacity of their existing basins by the end of 1990 would have time to construct and license a new water basin, a storage technology for which licensing should be quite easy. If the more flexible and less expensive dry storage technologies could be implemented sooner, which appears likely (particularly if DOE takes an active role in promoting their commercialization, as contemplated in these bills), this would further reduce—perhaps greatly—the need for any emergency backup storage capacity.

The OTA analysis goes on to make one other important point which I have not mentioned. They point out that the amount of spent fuel that the Department of Energy is going to need to acquire from utilities for test and

evaluation activities connected to permanent repository development under the bill could be considerably greater than 400 metric tons. After making this point, OTA states:

Thus the establishment of such a T&E program could render moot the question of whether a special federal last resort AFR storage program is needed at all—at least at this time.

For all of the above reasons, I believe a direct Federal role in interim storage of utility spent fuel is unnecessary. But, as I remarked earlier, it is also, in my opinion, ill advised for the following reasons.

First, too great a Federal involvement in interim storage of utility spent fuel is likely to detract from efforts to development of a permanent repository program. Development of permanent repositories must be our foremost goal.

Second, reliance on centralized Federal storage of utility spent fuel will lead to increased transportation of radioactive materials over our highways.

Third, I believe if a direct Federal role in storage of utility spent fuel is begun under this bill, it will really represent just the nose of the camel under the tent. In future years, once the program is established, we will undoubtedly see requests to increase the metric ton allotment of Federal storage. Once this Federal program is begun the inclination on the part of the utilities will be to avoid taking initiative to solve their own problems because they will be able to count on the feds coming to their rescue.

I urge you to support my amendment. The direct Federal role contained in the bill before us today for storage of utility spent fuel offers the utilities a convenient bailout from their problems. The problems can be solved by them with application of new technology and innovative approaches. The choice is yours and mine to make. Let us choose to establish a clear policy that identifies whose responsibility the interim storage of spent fuel is, and then get on with the business of development of a permanent solution to disposal of our radioactive wastes.

The CHAIRMAN. The time of the gentleman from New York (Mr. LUNDINE) has expired.

(On request of Mr. CORCORAN and by unanimous consent, Mr. LUNDINE was allowed to proceed for 3 additional minutes.)

□ 1245

Mr. LUNDINE. Second, you are authorizing the transportation of this spent fuel all over the United States. If you keep it at the reactor site until it has to go to the permanent repository, you cut down on the amount of transportation. Third, it will inhibit the utilities from taking the initiative on their own to solve their own problems.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from Illinois.

Mr. CORCORAN. Mr. Chairman, I thank my good friend from New York for yielding, and I ask for this time in order to get some clarification with respect to his amendment. It is my understanding as I read the pending amendment that the effect of the amendment would be to delete section 135; is that correct?

Mr. LUNDINE. Yes.

Mr. CORCORAN. I wonder if the gentleman is aware of section 135, subsection (j), which applies to a concern I know that the gentleman has had with respect to his district. It is a concern that the gentleman from South Carolina (Mr. DERRICK) has had over the past several years with regard to his district, and of course, as the gentleman well knows, it is a concern that I have had for quite some time that also relates to my district.

The concern that I have with respect to section 135, subsection (j), is that—and I will quote for the benefit of my friend from New York and our colleagues the relative section here, because I think it goes to the heart of the problem that many of us have; that is, the concern about whether or not private away-from-reactor storage facilities would be vulnerable to a Federal takeover under this legislation. I quote:

(j) APPLICATION.—Notwithstanding any other provision of law, nothing in this Act shall be construed to encourage, authorize, or require the private or Federal use, purchase, lease, or other acquisition of any storage facility located away from the site of any civilian nuclear power reactor and not owned by the Federal Government on the date of the enactment of this Act.

The concern I have is that the amendment would delete that particular prohibition. I just wonder if the gentleman is aware of that consequence of his amendment?

Mr. LUNDINE. I am well aware of it. Now, let me explain to the gentleman and others in the Committee that this is not a parochial amendment. The gentleman has correctly pointed out that West Valley, Morris, Ill., and Barnwell, S.C., have effectively been eliminated by the subsection the gentleman mentions, but I would point out to the gentleman that what this amendment does is, is to set aside any AFR program at a federally owned site or at a privately owned site. So, the gentleman's concern I think is obliterated by the purpose of the amendment, which is not to authorize an AFR program at either site, and I think that subsection is unnecessary.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(At the request of Mr. CORCORAN and by unanimous consent, Mr. LUNDINE was allowed to proceed for 2 additional minutes.)

Mr. LUNDINE. So, I think there are two points to make. First, the situation the gentleman is concerned about has not been forgotten, and I have not forgotten West Valley in regard to this amendment, but to all the members of the Committee I want to assure them that there is nothing parochial about this. Second, I want to point out that I have an AFR in my district. I have been involved in the negotiations with utilities to take back some of their spent fuel, and if we go on and authorize an AFR, we might as well forget about the utilities taking any responsibility for it because they are going to try to get rid of as much as they can and then forget about it.

Mr. CORCORAN. I think the concern that some of us have is precisely this: If we do not have some sort of storage program for the accumulated spent fuel, then West Valley, Barnwell, and Morris, are more vulnerable than they otherwise would be not only to Federal takeover, but also to the prospect that they would be brought into the leasing arrangement, the acquisition arrangement, whereby under emergency circumstances, not in the deliberation that we have enjoyed for the past several months—in fact, all of this particular Congress—in trying to construct a reasonable compromise to deal with the problem, but under emergency circumstances to preclude the shutdown of a powerplant because of a lack of storage that those particular sites in Morris, in West Valley, and Barnwell would be in fact the subject of emergency legislation to authoring a takeover by the Federal Government.

Mr. LUNDINE. Just to answer the gentleman, earlier in this debate the gentleman from Arizona said to somebody else, "Trust me." I am sure I would be asking the gentleman in this respect. I am well aware of the gentleman's concern. I share that concern, and I know the gentleman from South Carolina does also, but what we are doing here, and I think the gentleman can trust what we are doing, is, we are eliminating congressional intent to establish an AFR program at any site, and I would point out to the gentleman that with Federal spent fuel research and development activities, and with the need for radioactive materials for the T&E facility, there will be plenty of capability to relieve an emergency.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(At the request of Mr. CORCORAN and by unanimous consent, Mr. LUNDINE was allowed to proceed for 2 additional minutes.)

Mr. LUNDINE. As I pointed out in my original statement, there are 300

metric tons in here for spent fuel research and development purposes. There is a test and evaluation facility. If a utility, having exhausted every option at its disposal—transshipment, building a new dry storage capacity at its reactor, or building a new pool at the site of the reactor—if every other option is exhausted there is plenty of capacity within this bill for the Department of Energy to use its research means to meet that crisis situation.

Mr. CORCORAN. Will the gentleman yield further?

Mr. LUNDINE. Certainly.

Mr. CORCORAN. The gentleman asked the gentleman from Illinois and the gentleman from South Carolina and the Members of the Committee of the Whole to trust him. I can understand why from his position it is easier than it might be for us to ask for trust. The point is, of course, that the West Valley site in no way would really be targeted because of the research project on solidifying high-level liquid waste that is taking place there. Therefore you could not combine an AFR program at the same site as that R&D project as a practical matter.

Mr. LUNDINE. I have to ask for my time back. I disagree with the gentleman. West Valley is there; there is a pool there; it is an AFR today. If we were looking for quick storage capacity in America today, it would not go to Barnwell; it would not go to Morris; it would go to West Valley. So, I think I am taking a greater risk than anybody in this House if the gentleman's fears should be the operative concern. But, I am confident that that will not occur because I am confident that our interim storage needs will be and can be met at the sites of reactors, and with our research program.

I thank the gentleman for his interest and his concern. I urge the adoption of the amendment. I hope that all of the Members of the Committee will understand that this is not from a parochial point of view, but it is from the point of view of somebody who has lived with an AFR in his district and seen how these matters operate.

Mr. CHAIRMAN. The time of the gentleman from New York has again expired.

(At the request of Mr. WEISS and by unanimous consent, Mr. LUNDINE was allowed to proceed for 2 additional minutes.)

Mr. WEISS. Mr. Chairman, will the gentleman yield to me?

Mr. LUNDINE. I yield to the gentleman from New York.

Mr. WEISS. Mr. Chairman, I urge my colleagues to support Representative LUNDINE's amendment to eliminate provisions for away-from-reactor interim storage of spent nuclear fuel.

Many problems would be created by establishing interim storage sites, but perhaps the most dangerous is that it would encourage utilities to ship their spent fuel to temporary facilities. In fact, according to some projections, there could be more than 6,000 truckloads of spent fuel shipped annually from nuclear plants to storage facilities by the year 2000.

The potential for disaster created by this increase in handling and transporting nuclear fuel is enormous. Millions of lives could be endangered should an accident occur in a densely populated area such as New York City. If the thought of shipping nuclear fuel through the streets of New York is unthinkable to anyone who has attempted to drive those streets, consider that the State of New York has already battled with the Federal Government over regulations that would allow hazardous shipments through the city.

From our experience in New York, we have learned that Federal legislation on nuclear waste disposal must include as a fundamental principle the protection of public health. The nuclear industry has been promoting a Federal AFR program so that they will be absolved of the responsibility of storing spent nuclear fuel. But it is their responsibility, not that of the taxpayers who should not have to bear the cost and the danger of time bombs rumbling through their neighborhoods.

We must speak for the local communities which will be responsible ultimately for the health and welfare of their citizens, should a transportation accident occur.

In a draft study, the National Academy of Sciences has characterized the Federal plan for regulating radioactive transport as primitive. The Academy predicts that serious impasses will occur between State and local officials if localities are not offered a stronger say in regulating fuel shipments through their areas.

Without a dramatic shift in the Federal policy toward transportation of hazardous wastes, the probability of serious accidents is bound to increase. That shift begins with the passage of the Lundine amendment.

Mr. LUNDINE. I thank the gentleman, and I think he raises a very good point. For those Members who are not that familiar with the situation, the question is. Are you going to keep the spent fuel rods at the end of the nuclear generating process at the site of the reactor, or are you going to ship them all over the country to various away-from-reactor storage sites, thereby incurring possible danger? I thank the gentleman for his contribution, and I urge the adoption of the amendment.

Mr. LUJAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think the thing we need to remember that we are providing for in the legislation is a last resort interim storage facility. I emphasize, the last resort facility, because none of us want to get into the situation where because we do have interim storage facilities, that it would delay the construction of a repository site.

The reason that we put this in here is because we have all kinds of testimony and information about reactors that are getting full. The capacity for the spent fuel rods is being exhausted. We have information that by 1989 or 1990 that we will have some 39 reactors where they will not have the capacity at the sites.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. Certainly.

Mr. FUQUA. Mr. Chairman, I appreciate the gentleman yielding, and I wish to amplify on the gentleman's remarks. Many of the operating reactors now are approaching capacity for storage of spent fuel rods, and there is a need which is further exacerbated by the fact that we as a Congress and the the Government have not moved forward with some type of permanent disposal for high-level waste. This is not the fault of the utilities; it is the fault of Congress and the fault of the Government. That is why this AFR is needed as an interim method.

Hopefully, we will not have to use it, but should there be some type of delay, legitimate or not, in construction of the permanent facility, at least we have some means whereby we can give relief to many of the reactors.

I know the gentleman pointed out that some 38 reactors are approaching capacity at this time, and that is why this amendment should be defeated.

Mr. LUJAN. That is exactly correct, and let me continue on.

What happens if the reactor site is full and we do not have the repository ready? The only alternative, of course, is either to ship it off to some other reactor site, which makes the problem even worse, or that we shut down the reactor completely. We have been very careful to specify that it would be only at existing Federal sites, so that any Member does not have to worry about whether or not a new interim storage facility is going to come into his district.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I will in a minute, because I want to make a point to the author of the amendment; that in his own home State of New York, for example, there are three reactors that are presently facing that problem. The Power Authority of the State of New York has one called the J. A. Fitzpatrick, Unit Three at Indian Point; and one at Rochester Gas & Electric has one, so even in his own State we face this same problem of having to shut down a reactor because we do not have any place to take the spent fuel rods.

If the final repository is not ready, I agree with the gentleman, we would

not want to delay the repository, but we have to be careful that we do have some contingency plan in the event that the repository slows down and there is not any room for the spent fuel rods.

Now, I yield to the gentleman from New York.

Mr. LUNDINE. I thank the gentleman. Strictly on the point of how much capacity is needed, does the gentleman accept the Department of Energy, June 1982, report that indicates that with transshipment there is only a need for 8 metric tons by 1986, and for 400 metric tons by 1990, and that we do not get up to the 1,700 metric tons here authorized until after the year 1993?

Mr. LUJAN. I will tell the gentleman that, as he knows, in drafting legislation one just comes up with some figures. I am not totally certain 1,900 metric tons is the answer to all the problems. I will just tell the gentleman that there were some who wanted more and there were some who wanted less, and we just compromised at a figure of 1,900.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield.

Mr. CORCORAN. Mr. Chairman, I want to thank my friend from New Mexico for yielding. Of course, we can look at what the Department of Energy has to say on this question and interpret its recommendation as we want.

Mr. CORCORAN. However, Mr. Chairman, one of the other Federal agencies that has evaluated this problem of need, which is a crucial element in this whole debate, has been the agency with responsibility for the regulation of the nuclear industry and, particularly, of course, the utilities that are using nuclear power on a commercial basis, and that is the U.S. Nuclear Regulatory Commission. Perhaps it is coincidental, but their report is dated June 1982, and this is based on the assumption, which is, I believe, the compelling assumption that all the committees of the House have used, Mr. Chairman, in trying to determine just what the magnitude of the need is, and that is that the final repository will not be coming on line until sometime between 1998 and the year 2000, probably closer to the end of that timeframe.

Now, the gentleman from New York (Mr. LUNDINE) has already said that even the DOE report indicates that the problem becomes one of constipation, shall we say, in 1983. What we are dealing with here is a timeframe around the turn of the century.

If we look at the NRC report, what that shows is that the following utilities—and I will not take the time of the House to read the names of all these utilities—will be in trouble long before 1998 and the year 2000—and I will read just a few of them—

Alabama Power & Light, 1992; Arkansas Power & Light, 1987; Boston Edison Co., 1994; Commonwealth Edison Co. of Chicago, 1989; and Florida Power & Light, 1987.

So what we are saying is that the need will arise long before the final repository becomes operational, and that is why section 135 ought to be protected as is and that is why the Lundine amendment ought to be rejected.

The CHAIRMAN. The time of the gentleman from New Mexico (Mr. LUJAN) has again expired.

(On request of Mr. CORCORAN and by unanimous consent, Mr. LUJAN was allowed to proceed for 2 additional minutes.)

Mr. LUJAN. Mr. Chairman, let me tell the gentleman that he is absolutely correct on the list of power companies that he read.

Mr. CORCORAN. Mr. Chairman, if the gentleman will yield, is this the gentleman from Illinois to whom he is making reference?

Mr. LUJAN. Yes. I am sorry.

Mr. Chairman, if we total those up, the NRC has suggested that by the year 1990—now, that is just 8 years away—by the year 1990 we will have a shortfall of roughly 2,800 metric tons storage capacity at reactor site, and we are only authorizing 1,900 metric tons as a very last resort.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, let me ask the gentleman, is it not true that the NRC has also said that these figures assume no transshipment between pools owned by the same utility and they assume no dry storage technology, which the NRC is pushing itself to try to implement in developing these numbers?

Mr. LUJAN. Mr. Chairman, here is what I have found: Even allowing for construction of additional reactor site cooling ponds and for reracking of the spent fuel, shortfalls in reactor storage capacity are anticipated. This analysis shows a shortfall in spent fuel capacity of roughly 2,800 metric tons by 1990.

I have always found that anytime we get into a discussion of some kind and we want to quote figures, or anybody does—DOE or NRC or EPA or any governmental agency—we can always find some figure to justify what we are trying to sell. In this particular case—and I am being honest about it—we compromised at 1,900 because some wanted more and some wanted less, and, frankly, that is the only way we could come up with an acceptable figure.

I reiterate that this is simply a last resort interim storage facility, and that we will need it. There is no question in my mind that such a facility would be needed, and we would be foolish in stripping this figure from the bill.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, as the debate on this amendment, which I oppose, moves on, I think we should not lose sight of the purposes of this bill, and I would like to make a very quick walkthrough of what we are trying to do with respect to this bill and point out why this amendment does not make sense when we take a look at it in that way.

The major purpose of this bill is to come up with the selection of a final permanent repository, a resting place for spent nuclear fuel. Under the terms of the bill the timetable calls for a selection by 1987. There is a possibility of an extension for a year, but at the latest that selection would occur in 1988.

As has already been mentioned in this debate, the Department of Energy estimates that the completion of that final repository may take as much as 10 years or more so that the repository would not be available for the introduction of spent fuel until 1998 or later, and if it is like most things around here, it could be up into the year 2000 or beyond.

Now, what do we do to take care of the spent fuel problems that will occur and are occurring in nuclear generating plants all across the country between now and the year 2000?

Well, another purpose of the bill is this: Section 131, starting on page 65, and continuing through sections 132, 133, and 134, provides for expedited consideration of applications for expansion of onsite storage of these spent fuels, and certainly there is a crying need for these expedited procedures. Generally speaking, I would say there is agreement that these expedited procedures for the licensing of these onsite facilities are needed, and if there is no final resting place by 1998, obviously there is going to have to be some consideration for the expansion of onsite storage.

Now, there are going to be certain delays. We have seen this happen in the past. There are going to be regulatory delays and other delays, and there are those of us who feel there should be a safety valve program written in here. That is why in section 135, on page 72, we provide for a very small amount of storage capability, the storage of 1,900 metric tons at present Federal facilities. We are not talking about the construction of new facilities; we are talking about the possibility of storage at present Federal facili-

89-059 O-86-42 (Pt. 20)

ties that are handling or storing defense waste.

Now, this 1,900 metric tons amounts to about 3 percent of the spent fuel that will be generated between now and the year 2000, and this ability or this storage capacity cannot be used unless there are certain findings that are made by the NRC, the Nuclear Regulatory Commission. On page 74, we see listed those findings that must be made by the NRC before a utility has access to these Federal facilities, and that is why they have to show that the storage capacity cannot be reasonably provided at their facilities, either onsite or at another nuclear facility that they own, and that they have been pursuing and are diligently pursuing licensing alternatives. If they show to the satisfaction of the NRC that they have been diligently pursuing licensing alternatives and they show they cannot reasonably provide that storage capacity in their own system, then they would have access to these Federal facilities, and only then.

So, as we can see, this is not an automatic right to these Federal facilities; it is only a safety valve in case it is needed.

Otherwise the particular generating plant would have to close down, and, of course, it is not in the public interest to cause that kind of dislocation that could occur.

Mr. Chairman, I urge defeat of the amendment.

Mr. Chairman, I do not have time now to enumerate all the various utilities around the country that are projected to lose their full-core reserve by the late 1980's or the 1990's. However, I think the Members should have this information, so I am including for the record the following table:

NRC STUDY—JUNE 1982, UTILITIES NEEDING AN "AFR" BY 1990

TABLE 2.—UTILITIES AND REACTORS WITH PROJECTED LOSS OF FULL-CORE RESERVE PRIOR TO 1990

Utility and reactor	Loss of on-site storage capacity	
	Year projected to lose FCR	Year projected to lose discharge capability
Alabama Power Co.: J. Farley 1	1990	1992
Arkansas Power & Light Co.:

[1] Projection made on basis that pending application of reracking is approved.

Reference: NUREG/CR-2704, June 1982.

Mr. UDALL. Mr. Chairman, we have 19 amendments pending, and I had hoped that we could move along toward the conclusion of this bill. Therefore, I ask unanimous consent that all debate on the pending amendment cease at 1:25 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. MARKEY. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mrs. SCHNEIDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York. I think most of us are united in favoring a comprehensive nuclear waste policy, and it is obvious that the leadership of the Commerce, Interior, and Science Committees have worked very hard to put together a compromise bill. The gentleman's amendment strengthens the legislation by concentrating Federal resources on our main purpose—the establishment of a deep, geological repository for the safe, permanent storage of nuclear waste. The temporary, away-from-reactor storage provided in the bill is an unnecessary distraction from the goal, and should be eliminated.

Members may want to keep three points in mind when considering this amendment. First, the Department of Energy's estimates as to the amount of away-from-reactor storage utilities will need has been continually revised downward over the past 5 years. It now appears that improved storage methods at the site of existing reactors are a cheaper and more effective alternative than setting up separate, temporary facilities to hold spent fuel rods until a permanent repository can be established.

Second, the creation of AFR sites could double the hazards associated with transporting radioactive materials, as these would have to be moved first to temporary storage and then, theoretically at least, to their final resting place in a permanent repository. I think most of our constituents would prefer that we keep the circulation of nuclear waste on our Nation's highways and railroads to a minimum.

Third, the language in the bill charges the utilities a one-time fee to finance AFR's. That leaves the taxpayers responsible for footing the bill for any cost overruns. Given the Department of Energy's rather poor track record in managing similar contractual arrangements, it seems unwise to give DOE a blank check to cover costs that private industry ought to absorb. While the safe disposal of nuclear waste is a public problem, the responsibility for financing the solution must rest with private industry.

The nuclear waste bill that we enact should preserve an important principle—it should avoid halfway measures and move us directly toward our primary goal, which is to provide for the permanent, safe storage of nuclear waste. Temporary, away-from-reactor storage sites just do not measure up to this principle. I urge my colleagues to vote for this amendment.

Mr. WIRTH. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, first let me say that I want to associate myself with the remarks of the gentlewoman from Rhode Island, Mrs. SCHNEIDER, on the costs of this provision. I think we ought to be aware that what we are assuming here involves significant further costs to the taxpayer. Through its long history, nuclear power in this country has been subsidized over and over and over again by the taxpayer, and this is another example.

Second, what we are doing with this provision is opening up the possibility for some very, very significant further involvement by the Federal Government.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. Let me complete my statement, and then I will be happy to yield if I have time.

Mr. CORCORAN. Mr. Chairman, I thank the gentleman.

Mr. WIRTH. Mr. Chairman, as I was saying, the second issue we have here is opening up a large new area for Federal involvement with nuclear power,

in that away-from-reactor storage raises the possibility of the Federal Government taking all kinds of responsibilities that should be carried by the private sector. We have heard an enormous amount of discussion over the last 2 years about the private sector's assuming its responsibilities and limiting the responsibility of the Federal Government, and here we are, in a very bizarre fashion, doing precisely the opposite, opening up a very large box—away-from-reactor storage—into which the private sector is going to run with a series of problems that are created by nuclear power.

Third, I would point out to my colleagues the language on page 72 of H.R. 7187, from line 16 on. In developing away-from-reactor storage, what are we allowing to happen?

First, the away-from-reactor storage facilities—and this is lines 16 through 19—are exempt from the Nuclear Regulatory Commission's licensing procedure. Why is that? Why is there an exemption from the licensing procedure? What are we going to say in this language they are going to get away with?

According to line 20 through line 2 on page 73, no environmental impact statement is required in the development of away-from-reactor storage capability.

□ 1315

Why is that? Why is there no Nuclear Regulatory Commission licensing as there are for other facilities, and why no environmental impact statement? It does not make any sense.

Something is wrong when, one, we are saying the Federal Government is going to get into this new operation but is getting into it without the kind of licensing procedure and environmental impact statement that is required for every other major endeavor that is embarked upon by the public sector or the private sector.

To further compound the problem, if we get into section d on page 73, the bill authorizes the Department of Energy to construct storage capacity on any other site, at any other nuclear reactor site, again without an EIS, again without licensing. It just does not make any sense.

I think the gentleman from New York has offered an amendment that is rational, that says in summary that clearly there is a problem in terms of storage. But as the gentleman has pointed out, let us push the technology, let us leave that responsibility in the private sector. Let us not have the taxpayer assume the burden, as the gentlewoman from Rhode Island was pointing out. Let us not develop a whole series of new responsibilities for the Federal Government, and let us maintain the process of licensing under the Nuclear Regulatory Commission and maintain the very, very important process of the environmental impact statement required under NEPA.

Mr. MARKEY. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield for purposes of clarification at this point?

Mr. MARKEY. Am I going to be doing the clarification, or the gentleman?

Mr. CORCORAN. I am going to try to clarify the financing issue discussed by Mr. WIRTH of Colorado.

Mr. MARKEY. I yield to the gentleman.

Mr. CORCORAN. I thank the gentleman very much for yielding. On the question of financing the interim storage fund, our good friend from Colorado (Mr. WIRTH) indicated that the taxpayers would have to finance it. As the gentleman from Massachusetts well knows, section 137 of the bill dealing with the interim storage fund makes it clear that the generators of the waste will have to finance the program.

Mr. MARKEY. I thank the gentleman for that clarification.

Of course the generators of the wastes will then dun their ratepayers and as far as the ratepayer is concerned it is very easy for him to take off his taxpayer hat and put on his ratepaying hat and in the wash sometimes it seems very difficult for him to differentiate between one hand or the other in the pocket.

The problem here is this: The utilities want an away-from-reactor storage program. That is priority No. 1. A permanent waste bill is something which is desirable, something that might take place in 1995 or the year 2005. But that is a secondary consideration.

We have all of this waste building up at our existing reactors and it is so critical for us to say to the utilities that we get away-from-reactor storage capacity.

Why is that? The problem is this: The utilities do not want to build any more storage capacity onsite. When a nuclear powerplant is licensed you have one building that has the reactor generating all of the electricity. The fuel rods in that building, when they wear out, when they cannot produce any more electricity, are put in a building right next door in a swimming pool, where they are going to be held until a permanent waste repository can be constructed in this country.

The waste will then be put on trucks and transported to the permanent repository.

What the utilities are saying is rather than having us, as our waste builds up onsite, build an additional swimming pool next to the existing one, we want it to be put in another place maybe 500 miles away or maybe 1,000 miles away. Put the nuclear waste on the highway and drive it to an away-from-reactor storage facility. Then in 15 or 20 years when the permanent nuclear repository is constructed, then take it from the AFR and put it in the permanent repository.

Here is the problem: We will never have a permanent repository if the utilities do not have a need for one. If we take the problem the utilities now have of getting their wastes off of their own premises, then the pressure which will be applied to deal with the problem of permanent waste disposal will be alleviated. As a result, all of the political consensus which wraps around this bill today will be somewhat mitigated since the key party to having a permanent repository will now have its problems somewhat pushed back in time into the indefinite future.

What we have to do is to say to the utilities: "Why don't you make applications for additional storage capacity onsite; why don't you make application to go to dry cask technology of nuclear wastes onsite; why don't you make requests for transshipment between your own utilities in a very small local area and try to minimize the amount of travel of this nuclear waste?"

For every nuclear powerplant in this country, every 1,000 megawatts, it means about 40 to 60 truck shipments per year of nuclear waste on the highways heading toward this away-from-reactor facility.

We do not have any need for an away-from-reactor facility. We do not have any problem with telling the utilities to build additional storage capacity onsite.

Diablo Canyon, Pilgrim, Three-Mile Island, Seabrook, Florida Power & Light, North Carolina Power & Light, no matter where you come from, we will help you expedite through the Department of Energy, through the Nuclear Regulatory Commission, a process that makes it possible for you to take care of your own problems.

It is not the job of the Federal Government to bail out the private sector. It is not our job to put together a program that ought to be put together by the private sector or the self-help program for a problem which the utilities have created and for which they have the facilities and the capacity to deal with themselves.

We are talking about the Federal Government injecting itself into an area of the private sector that it has no business being in until there is a permanent repository which is a legitimate Federal responsibility. There is no role for the Federal Government in bailing out the utilities for the short term.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has expired.

(At the request of Mr. MARRIOTT and by unanimous consent Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I am glad to yield.

Mr. MARRIOTT. My friend knows I share his concerns about getting a permanent repository and doing it properly.

Let me ask this question. The gentleman brings up the point that the existing reactors now have the capability of storing all of the spent fuel without going to AFR's. Does the gentleman believe that they would have little difficulty getting licensing, No. 1 from the NRC to do that and does he believe that the storing in these reactors, some of which are very close to large population areas, would be as safe in the long run as transferring them to some AFR?

Does the gentleman have reactors in his district? Would the gentleman's people sign off on increasing the storage capacity at the reactor? Do they feel no problems with that possibility?

Mr. MARKEY. This is a Republican administration. The Republican administration is in office on the pledge that it is going to try to cut redtape, reduce and minimize bureaucratic interference with private sectors activities. If between you and I, Nunzio Palladino, Don Hodel, and Ronald Reagan we cannot put together a program which expedites the construction of additional onsite capacity for our nuclear power facilities, then there is something terribly wrong.

Second, 30 percent of the electricity in New England, and in my district, is generated from nuclear power. My district would much prefer to keep the wastes onsite until there is a permanent repository and then once put it on the highways and take it through the distict.

Let me tell the gentleman something else. We are all deluding ourselves if we believe this stuff is going to be put on the highways and we are not going to see the granola crowd and some ponytail crowd out there protesting. This is going to be like the nuclear freeze movement. There are going to be middle-class mothers and fathers out in the middle of the highway saying "What are you doing putting nuclear wastes on our highways when you do not have any reason to do so?"

I do not think we have any idea of the political volatility of this issue.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has again expired.

(At the request of Mr. MARRIOTT and by unanimous consent Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from New York briefly.

Mr. LUNDINE. I think the whole idea of the technology push that the gentleman has alluded to operates here, too.

It has been the Nuclear Regulatory Commission that has been encouraging the utilities to adopt dry storage on top.

TVA is proving this can be done. We are not talking about some technology that is in the far distant future, nor are we talking about a regulatory agency that in any way is hostile to what the gentleman has suggested should occur.

Mr. MARKEY. If I may reclaim my time, there has never been in the history of this country one utility that has asked for permission to expand its onsite capacity. Utilities have reracked. They have tried to use to the best of their ability the space available in the existing water cooling area. But they have never asked to build additional facilities.

There is something wrong with that and what is wrong with it is clearly the need for the utility industry to come to big sugar daddy, to come to the big Federal Government and say "You build them for us; you figure out how to solve the problem because we do not want to do it. We promised you, we promised the people when we built these nuclear powerplants in their area that we would take care of the problem. But now Federal Government, you do it instead."

But now when push comes to shove they want you, big daddy, to pick up the bill, and I do not think we ought to do it.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from New Mexico.

Mr. LUJAN. I think the gentleman is mistaken in his statement. He continually says that the Federal Government is going to pay for all these things. The bill provides that the users, the utilities are the ones that are going to have to pay for it.

The gentleman says well, then, they will just pass it on to the ratepayers.

The alternative is that the Federal Government pick up the tab. I guess that is what the gentleman is advocating, that the Federal Government pick up the tab instead of the utilities picking up the tab. I really cannot understand what side the gentleman is on.

Mr. MARKEY. Let me reclaim my time.

The gentleman from New Mexico makes a mistake in leaving the impression on his listeners that the cost is the same whether you put it off site or you put it on site. In fact, it costs twice as much to put it offsite in an AFR as it does to put it onsite; that is, the taxpayer/ratepayer, depending on the hat, gets stuck with the bill.

Mr. MARRIOTT. Mr. Chairman, I move to strike the requisite number of words.

Could I enter into a colloquy with the author of the amendment because I think it is an important issue to discuss. Does not the present bill require the utilities to try to expand onsite storage before they apply for AFR's?

Mr. LUNDINE. Will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman.

Mr. LUNDINE. Yes.

Mr. MARRIOTT. Then I do not understand what the problem is. If we have enough capacity to store 1,900 or 2,800 metric tons at the present reactor site then what is the controversy?

We have then only to go to AFR's if in fact it was necessary and the reactors could make that point.

No. 2, the State still has a veto on that, do they not, that requires a two-House congressional override?

So I do not understand if those two things are in place why we need this amendment.

Mr. LUNDINE. If the gentleman will yield, the problem is you are creating a presumption that there is a need for a Federal facility if this amendment is rejected and all you have is a regulatory proceeding to determine whether or not the utility is making the efforts that they can.

Third, you do not have to consider any new technology. We are just at a breakthrough point that if we relieve this and we provide that the answer to this is away-from-reactor storage pools, we will see the development of dry storage and other new technologies for at-reactor-site disposition or interim storage absolutely grind to a halt.

Believe me, I have seen it. I have seen it where they have it in a pool and as soon as you say you do not have any permanent right to keep it here, they say take us to court.

The push is not toward solving the problem where it is. The push will be to get rid of it and the gentleman is entirely correct; the only protection we have is that the NRC, as the gentleman from New Mexico correctly pointed out, does have these three criteria before they can authorize an AFR.

Mr. MARRIOTT. If I could make one other point, if in fact we put it at the reactor and we do not have an AFR, it seems to me that might expedite the permanent repository process.

Mr. LUNDINE. Exactly.

Mr. MARRIOTT. Which may not be good. That is, we may not be ready yet in the next year or year after to say how we are going to store this stuff on a permanent basis and you may well

be forcing us to make some decision we do not want to make.

Mr. LUNDINE. If the gentleman will yield on that point, I agree with the Reagan administration and with this Department of Energy that it is absolutely imperative that we accelerate the final repository, the final disposition. We have delayed in this country for 30 years the development of a repository. I think the gentleman's analysis is correct.

Mr. MARRIOTT. If I could reclaim my time, the point I want to make is when you go out to a western State where you have underground water table problems, salt problems, proximity to national parks, you do not make those decisions overnight. I do not want to be put in the position where they are going to ramrod something down our throat because we are forced to because we have no AFR's.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I am happy to yield to my friend.

Mr. CORCORAN. I thank my friend from Utah for yielding because one of the issues here is whether or not with the adoption of the Lundine amendment the pressure and the authority would be in the legislation to require the Nuclear Regulatory Commission to make certain that the utilities have exhausted all of the other remedies before going to the last resort.

□ 1330

One of the unfortunate consequences, Mr. Chairman, of the Lundine amendment is that it strikes out section 135, subsection (i), which requires that the NRC issue the guidelines and implement requirements so that the utilities in fact exhaust all of these other technologies, exhaust all of the other steps, to make certain that they solve their problems themselves.

Mr. MARRIOTT. Mr. Chairman, I would just like to say that I applaud what is trying to be done by removing the AFR's, but I think it causes more potential damage than it does good.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, the whole point I have tried to make to the gentleman from Illinois is that this amendment eliminates the entire AFR section, and if there is no authorization for an AFR, then there is no reason to limit it to Federal sites and there is no reason to have NRC criteria. The purpose of this amendment is to try to solve the problem on site, not at away-from-reactor storage sites.

Mr. MARRIOTT. I would just simply conclude, if I have any time left, to say that I think the amendment is a bad one. The present bill provides reasonable stopgaps. I would urge that we support the bill.

Ms. FERRARO. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the amendment before us really might be referred to as a prime purpose amendment. By that I mean that the amendment will help to preserve the prime purpose of the legislation before us.

It is generally understood that this bill is designed to move the nuclear power industry toward a permanent repository for spent fuel. Yet one provision of the bill would establish what the industry has referred to as a "last resort" option—a federally supplied interim storage facility with a capacity of 1,700 metric tons of spent fuel from civilian reactors.

As the gentleman from New York (Mr. LUNDINE) has made clear, such a facility is very likely to become one of first reliance for the industry rather than last resort. Given the alternatives of expanding their own onsite storage capacity or taking advantage of a ready made Federal facility, utilities are sure to take the easiest and cheapest course.

The amendment before us would eliminate the requirement for a Federal interim storage capacity. At the same time, the amendment leaves in the bill the provisions which accelerate Federal research, development, and demonstration programs for cost-effective technologies for storing spent fuel onsite. It would also expedite NRC licensing of onsite storage capacity.

The proposed interim storage facility has been justified as necessary to avoid a crunch in existing storage space. The fact is, however, that estimates of needed storage capacity have steadily been revised downward in recent years. While the Department of Energy estimated in 1977 that 1,700 metric tons of interim storage would be required by 1983, the latest Department estimates are that utilities will not need any Federal capacity until at least 1986.

Another argument against building the interim storage facility is the increase in transportation and handling of spent nuclear fuel which would result. I have been actively involved in the Department of Transportation's efforts to draft new regulations governing the transportation of spent fuel. The DOT's first plan was widely criticized by city officials and environmental groups on grounds that it did not adequately provide for the safety of residents of metropolitan areas through which spent fuel would be shipped. Those concerns were underscored earlier this year when a Federal district court judge in New York struck down the proposed regulations.

The judge ruled that DOT had not given sufficient consideration to the possible use of alternative modes of transportation to the highways, and that more emphasis must be placed on the problems surrounding shipments through densely populated urban areas.

The Department of Transportation has announced its intention to appeal the decision, but the status of Federal regulation of spent fuel shipments is very much in doubt. Given the likelihood that establishment of an interim storage facility would result in an additional 4,750 truck shipments of spent fuel, I believe it would be ill-advised to require such a facility be created before the transportation questions are resolved.

As I said earlier, this amendment serves only to reinforce the principal purpose of the Nuclear Waste Policy Act, which is to encourage new initiatives to develop permanent repositories for spent fuel. I urge adoption of the amendment.

Mr. UDALL. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment cease in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was agreed to will be recognized for 1 minute each.

(By unanimous consent, Mr. WEISS and Mr. DOWNEY yielded their time to Mr. LUNDINE.)

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. KEMP.)

Mr. KEMP. Mr. Chairman, I rise in support of the amendment offered by my colleague, the gentleman from New York (Mr. LUNDINE), to delete the interim storage provisions of H.R. 3809, the Nuclear Waste Disposal Act, and I congratulate him for his hard work.

First, let me say how much I appreciate the very hard work—and hard bargaining by everyone that went into this nuclear waste bill. Devising a plan for permanent nuclear waste storage has, I know, often been a thankless task. Members of both sides of the aisle who have worked long and hard on this legislation deserve our thanks, and also our congratulations for coming up with a fair and workable long-term solution.

I want to emphasize as well that my concern about the interim storage provisions of this bill does not stem from purely parochial interests. It is true that I strongly oppose allowing the West Valley site, in our community of western New York, to become a storage site. Congress is spending millions of dollars cleaning up the nuclear reprocessing plant at West Valley, precisely because the nuclear waste now stored there represents a real and very

significant threat to public health. West Valley is not and would not be an appropriate storage site, because of well-established geographical and geological factors.

I oppose interim storage for these reasons: First, I do not believe it is necessary; second, it increases the danger from transporting wastes; and third, it provides an opportunity and incentive for delaying action on a permanent repository site.

When the Department of Energy first proposed a Federal interim storage program, in 1977, they estimated that by 1990 we would need storage space for 14,400 metric tons of spent fuel. In 1978 the Department revised that figure down to 6,940—a decrease of over 100 percent. And in 1980 they revised it once again, this time down to 3,277 metric tons. At the same time the estimates of waste needing storage have declined, the development of alternative storage technologies has proceeded apace. Fuel rod consolidation, and even more dry storage techniques, now offer onsite storage alternatives that are much cheaper than constructing an interim storage facility—and keep the Federal Government out of the business of providing short-term waste storage for the nuclear industry.

These alternative technologies also reduce the need to transport waste. Clearly the less we need to move this waste along the roads and railways the less we will endanger public health and safety. What is more, the transportation of nuclear waste will become one more area of conflict used to halt the development of nuclear energy, which I know is not the aim of the sponsors of this legislation.

My biggest fear, however, is that by permitting interim storage we will make it easier to put off those hard decisions about permanent storage. Interim storage facilities set up to meet the needs for just a few years might easily be strained beyond their capacities. The pressure on the Federal Government, the States, and the nuclear industry to reach a mutually acceptable solution would be eased. And we would have created one more Federal support program for industry—the kind of program that tends to acquire a long life of its own.

I support this legislation. The nuclear waste accumulating around the Nation, the nuclear waste now being prepared for solidification at the West Valley demonstration site, must find a safe and permanent home. We must reform the licensing procedures for waste management to allow promising new technologies to be used. I do not, however, believe that interim storage is necessary for resolving the nuclear waste problem. Instead, it may stand in the way of a true, long-term solution.

The CHAIRMAN. The Chair recognizes the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman, I rise in opposition to this amendment.

Mr. Chairman, I think it should be pointed out that the Government has had a rather ambivalent policy in regard to our nuclear plants. When they were originally built and for a long time afterwards, the concept of reprocessing was much agreed upon and encouraged by the Government. Then a recent administration banned reprocessing, and it left the industry without the facilities or the capacity to handle the spent fuels. I think, particularly because of that inconsistent energy policy that we have created this problem, and it is the responsibility of the Federal Government to provide for emergency storage with this so called last resort away-from-reactor spent fuel storage facility. I, therefore, urge rejection of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Chairman, the contents of this legislation in the form of the pending amendment offered by our good friend from New York (Mr. LUNDINE) have been adequately discussed, and I think our colleagues know what is in it.

I would like to address one other facet of this matter in the time that I have remaining, and that is the impact of the Lundine amendment on the entire legislation.

Mr. Chairman, in the 96th Congress we came sputtering to the end and we came very close to passing a nuclear waste bill. It got tied up in conference over the military aspect of the program. Now we are coming again to this away-from-reactor storage question which, in my judgment, if the Lundine amendment, God forbid, is adopted, will cause the death of nuclear waste legislation in this Congress. There is no question about the fact that a lot of people, not the author of this amendment, but a lot of other people have already written to the Speaker of the House and the leadership of the various committees involved, who, by the way, are all opposed to this amendment—I do not know the position of the Speaker—and they have asked that the bill itself be pulled from the Calendar for this Congress. They do not want a good sensible nuclear waste bill. And that may be why they are supporting the Lundine amendment.

For this reason as well as many others which I have already discussed during the course of this debate, I urge the resounding rejection of this ill-advised amendment.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Chairman, I would point out to the Members that the last resort interim storage program is limited to existing Federal facilities, and those facilities which have undergone a public health and safety review by NRC. And I would also say that we have special statutory language in section 135, which the gentleman from New York now would have us strike, that would exclude the use of private away-from-reactor facilities for the storage of spent fuel. We specifically put this language in here to take care of the problem that he and others have talked about; that is, the concerns that they have expressed as the possible use of privately owned facilities in their particular districts. And he now wants to strike the language that we put in the bill for the express purpose of saying that there will be no funds used for the private facilities.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, to address the last point to my good friend from North Carolina, I have tried to state, and I honestly believe, this is not a parochial amendment. The gentleman is entirely correct. I believe that the districts of the gentleman from Illinois, the gentleman from South Carolina, and myself are protected by the compromise language in this amendment.

The gentleman also knows that the other body has passed a bill that has no limitations whatever. We have no assurance that these limitations would in fact be in the final legislation that may be adopted at the very latest hour.

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I will yield to the gentleman if he will be brief.

Mr. CORCORAN. The point I would like to make is that if the House adopts the Lundine amendment and the Senate has already rejected similar legislation, the Senate in the conference between the two Houses will be able to insist on its language in authorizing the Federal takeover of private facilities such as at Morris, Ill., and that is what concerns me and many of my colleagues very, very much.

Mr. LUNDINE. I would like to address that point. I honestly am in favor of this legislation. I do not believe the gentleman's analysis is correct. I think if the House adopts the Lundine amendment, and the Senate has a provision in their bill, we will compromise somewhere in between, which will probably be something like the language in this bill. But if the Lundine amendment is rejected, I think the gentleman is at risk, I think this gentleman is at risk, and I think

everybody who cares about an unlimited AFR is at risk. And that is the reason I am going to insist on this amendment.

Mr. Chairman, it is very simple: An away-from-reactor storage facility would be more expensive and it would be more dangerous than the adoption of the Lundine amendment. There are new technologies coming on line which can solve this problem. We have the capacity with the research and development capability of the Federal Government, should there be an emergency, for up to 300 metric tons of space and fuel storage, and additional storage in the T&E facility beyond that. But the fundamental question here is: Is the Federal Government going to step in and undertake a new activity? Or is the basic responsibility going to be on those utilities whose users have had the benefit of the nuclear power up to this time?

I urge the adoption of this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Chairman, we all would like to see the problem solved in the way that we would prefer it would be solved. And I believe it would be wonderful if we did not need an AFR, if we did not need an interim storage facility. But we live in the world that is, not in the world that ought to be.

So it is my feeling that, at some point, these reactor facilities are going to be filled up, and we have to have an alternative to closing those utilities.

We have considered this amendment in Interior. We have had long, long hours of debate on this, and it was the wisdom of the committee to turn it down at that time. I think that the last thing we ought to remember is that this is a last resort interim storage facility. Only after the utilities have done everything they possibly can to increase the storage capacity onsite would this facility be used.

So it is just a backstop so that if we ever find ourselves in the position where we have no capacity, the utilities will not be closed.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona (Mr. UDALL) to conclude debate.

Mr. UDALL. Mr. Chairman, this amendment ought to be defeated. It is well intended, and the gentleman from New York is fighting very hard. He is not parochial; he has not been parochial around here, and I accept his statement in that regard.

We have retreated and retreated and retreated on AFR. Frankly, I have no great enthusiasm for a lot of AFR facility, and I do not think we are going to have any. This is a careful, limited, last-resort, last-ditch facility that we need, for two things: First, if there is an emergency, if the reactor finds that they have rods that they simply do not have space for, they have run out of pools, we will have a Federal program which can accept those rods; and second, we have made a lot of international commitments over the years to nations urging them to use nuclear technology. We have a lot of international commitments that we will provide that space if needed.

So you have a highly limited, 2,000-metric-ton program. The utilities will have to show that they cannot provide storage space at reactor sites, utilities that will use this Federal space will pay for it, and they have to be able to get out as soon as new capacity can be reasonably constructed.

So we should not eliminate the AFR totally. This leaves a very small AFR program, and the amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. LUNDINE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LUNDINE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 84, noes 308, not voting 41, as follows:

□ 1400

The Clerk announced the following pair:

On this vote:

Mr. Washington for, with Mr. Mollohan against.

Mr. STANGELAND and Mr. RINALDO changed their votes from "aye" to "no."

Mr. WAXMAN and Mr. LELAND changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. SWIFT

Mr. SWIFT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SWIFT: At page 141, line 24, strike all after "repositories;" through the end of line 3 on page 142 and insert in lieu thereof the following: "and (B) the Secretary may not commence construction or excavation of any Test and Evaluation Facility prior to issuance by the Commission of a construction authorization for a repository at the site involved.".

Mr. SWIFT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. SWIFT. Mr. Chairman, the purpose of this legislation, among other things, is to assure an objective and a technical decision as to where a repository should be located. It is, therefore, also true that one of the purposes of this legislation must be to avoid prejudicing the decision as to where the permanent repository will be located by spending huge sums of money on it prior to that decision being made, so that we have the camel's-nose-under-the-tent syndrome taking place, saying, "We must locate it here. We have already spent so much money on this location."

The amendment that I am offering takes care of a problem that I see in the bill as written. There is a major ambiguity in the bill which my amendment seeks to clarify. The bill, as I read it, says that the test and evaluation facility located at a candidate or repository site may not commence construction of a surface facility until the Nuclear Regulatory Commission gives a construction authorization. Notice that it says a surface facility.

You go back to page 9 where the definitions are and look at the definition of a test and evaluation facility, it says that that means an at-depth underground cavity with subsurface lateral excavations extending from a central shaft, and so forth.

It seems to me there is a clear ambiguity as to what section 306 means if, in fact, it refers to a test and evaluation facility and then uses only the words "surface facility".

When you consider that such a T&E facility can cost anywhere between a quarter and one billion dollars, should this be located at a candidate site for a permanent repository?

Clearly, the argument is going to arise, "We have spent this quarter of a billion dollars or this billion dollars here. Now we might as well put the site there."

In other words, the objectivity of the decision as to where the site will be, it would seem to me, could be harmed by the ambiguity in the act as it presently exists. It will certainly skew the decision as to where the ultimate site for the permanent repository will go.

Now, you can make a number of arguments about T&E facilities themselves. The Senate bill, for example, does not even allow integration of T&E facilities with a candidate site. T&E itself is a very controversial concept at best. There are activities similar to T&E going on already in a number of places, so that you have a whole question as to whether a test and evaluation facility is something that we need at all; but that is not basically my point.

My point is that the bill as currently written is very unclear as to whether or not it would permit excavation to be done on a T&E facility at a candidate site prior to that site receiving its construction authorization from the Nuclear Regulatory Commission; thereby giving that site an edge in the competition, or to put it around another way, a greater chance of being selected than another site in which there was not a T&E facility. I really believe this ambiguity in the bill must be clarified so that that kind of event could not occur.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I am happy to yield to the gentleman from Florida.

Mr. FUQUA. I appreciate the gentleman yielding.

I certainly understand the concern that the gentleman is expressing to the committee; but let me point out to the gentleman that on page 141, that the gentleman referred to, in section 306(b), this language was worked out in cooperation with Chairman UDALL, Chairman DINGELL; the minority members, the gentleman from North Carolina (Mr. BROYHILL), the gentleman from New Mexico (Mr. LUJAN), and also the gentleman from New York (Mr. OTTINGER), who chairs the subcommittee of the Energy and Commerce Committee. It was with their agreement, and this was the compromise language. It says:

(b) PROCEDURES.—(1) If the test and evaluation facility is to be located at any candidate site or repository site (A) site selection and development of such facility shall be conducted in accordance with the procedures and requirements established in title I—

Now, title I is all the procedures for the permanent repository—

with respect to the site selection and development of repositories;

And it goes on to say, and this is the language that the gentleman is changing:

and (B) the Secretary may not commence construction of any surface facility. * * *

The subsurface facility, the shaft, is part of the test procedure to see if this is a site. Now, if the Secretary determines that this should be the site of a repository as well as a test facility, then he must go through and comply with the procedures as outlined in title I.

So I appreciate the concern that the gentleman is addressing himself to, but I think it has been taken care of in the bill, because we were very careful in drafting the language to take care of exactly the problem that the gentleman is expressing.

Mr. SWIFT. Well, if I could regain my time, then I have elucidated here what my concern is. The gentleman feels that my concern is unfounded because the language in this bill would preclude this.

The CHAIRMAN. The time of the gentleman from Washington has expired.

(At the request of Mr. OTTINGER, and by unanimous consent, Mr. SWIFT was allowed to proceed for 3 additional minutes.)

Mr. SWIFT. So that the gentleman feels that my concern is unfounded, that they could not go ahead and put in a T&E facility and do expensive excavation and therefore, give priority, if you will, in selecting that site for a permanent storage facility. Is that correct, that could not occur?

Mr. FUQUA. Well, let me say that the gentleman is perfectly within his rights to express his concern and those concerns were expressed by many other people. That is why we have this language; but to colocate a test and evaluation facility and then later put a repository there would not be possible under the language that is currently in the bill, because the Secretary of Energy must comply with title I if he thinks that this T&E site might be a suitable site for a repository. Then he must comply with title I.

Now, as far as the shaft is concerned, that is part of the test procedure. They may have several shafts in places to determine the geographic formations, whether they are suitable, and they must go down and do core drillings and other types of drillings in

order to make this determination; but they are prohibited from locating the surface facility and any of the other things there until such time as they have complied with title I, which as I mentioned and outlined and the gentleman is familiar with, outlines the procedures.

Mr. SWIFT. Mr. Chairman, I thank the gentleman for his remarks.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding.

I believe that the concerns of the gentleman are taken care of; though I would acknowledge that it is not as clear as it might be.

The language of section 306(b) says quite clearly that if the test and evaluation facility is to be located at any candidate site or repository site—even just a candidate site, it applies—site selection and development of such facility shall be conducted in accordance with the procedures and requirements established in title I.

□ 1415

As Chairman FUQUA has indicated, that would clearly require a construction authorization prior to excavation of a facility. The way I look at subsection (b), it is an additional requirement that says one cannot even locate surface facilities at that facility without getting a construction authorization for a repository.

So I think that subparagraph (B) is an additional requirement; quite clearly, if you are going to have a facility there, under title I which is made to apply, the construction authorization would be required.

Mr. FUQUA. Mr. Chairman, will the gentleman yield further?

Mr. SWIFT. I yield to the gentleman from Florida.

The CHAIRMAN. The time of the gentleman from Washington has expired.

(On request of Mr. FUQUA and by unanimous consent, Mr. SWIFT was allowed to proceed for 2 additional minutes.)

Mr. FUQUA. Mr. Chairman, on page 142, line 4, under subparagraph (2)—

No test and evaluation facility may be converted into a repository unless site selection and development of such facility was conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of repositories.

Mr. Chairman, I therefore, think the concerns that the gentleman has are addressed. The intent was that one could not convert a T&E facility into a repository unless the Secretary complied with title I and the additional procedures of site selection.

Mr. SWIFT. I thank the gentleman, and would ask him a question: Does he essentially agree with what the gentleman from New York (Mr. OTTINGER) said, then, as I understand it?

Mr. FUQUA. Mr. Chairman, the gentleman from New York, I think, was quoting from line 9 of page 142, which says:

The Secretary may not commence construction of a test and evaluation facility at a candidate site or site recommended as the location for a repository prior to the date on which the designation of such site is effective under section 115.

So that is a further clarification. It was added by the gentleman from New York (Mr. OTTINGER) in our negotiations.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield to me?

Mr. SWIFT. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding to me.

Mr. Chairman, I think as the gentleman has indicated, Chairman FUQUA and I are in agreement on this and I think the gentleman's concerns are addressed. Therefore, I do not think an amendment is really necessary on this matter.

Mr. SWIFT. Mr. Chairman, with those assurances from the two gentlemen, I ask unanimous ccnsent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

AMENDMENT OFFERED BY MR. RAHALL

Mr. RAHALL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire, is the amendment in order under the rule?

Mr. RAHALL. Yes, it is, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. RAHALL: Section 151 is amended by adding the following at the end thereof:

"(c) SPECIAL SITES.—If the low-level radioactive waste involved is the result of a licensed activity to recover zirconium, hafnium, and rare earths from source material, the Secretary, upon request of the owner of the site involved, shall assume title and custody of such waste and the land on which it is disposed when such site has been decontaminated and stabilized in accordance with the requirements established by the Commission and when such owner has made adequate financial arrangements approved by the Commission for the long-term maintenance and monitoring of such site."

Mr. RAHALL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. RAHALL. Mr. Chairman, the amendment I am proposing is virtually identical to a provision contained in the Energy and Commerce Committee's bill and similar in intent to a provision contained in the Interior and Insular Affairs Committee bill. However, it appears that in the rush to put the substitute, H.R. 7187, together, this provision was inadvertantly omitted.

In any event, it is my understanding that both the Interior and Energy Committees have no objection to this amendment.

This amendment builds upon the low-level waste provisions of H.R. 7187 but addresses a very important difference. The sites my amendment addresses would not be used as commercial low-level disposal sites. Instead, my amendment concerns sites used for Atomic Energy Commission licensed activity which have been stabilized by the landowner in accordance with NRC criteria. Once stabilized, the landowner may request the Secretary of Energy to assume title and custody of the site. I would like to stress that the stabilization would be at the landowner's expense, and, that the Secretary could take title only at the request of the landowner. Furthermore, the landowner would have to make financial arrangements with the Secretary for the long-term maintenance and monitoring of the site.

Enabling the Secretary to take title to these sites will assure that they remain undisturbed and provide for a permanent record of their location. Situations addressed by this amendment—and there are only a very few—should be recognized as a shared responsibility of the Government.

This amendment does not preclude the option of having contaminated material moved off the site, and, does not affect the possibility that certain sites may require Federal assistance during the cleanup procedure.

Mr. ROE. Mr. Chairman, will the gentleman yield to me?

Mr. RAHALL. I yield to the gentleman from New Jersey.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, I have a similar situation existing in my State and in my district where we have a low-level radiation thorium material which is an extract, as you know, from rare earth.

I am concerned with the amendment because I want to be sure that this amendment does not forestall nor usurp the position and responsibility of the Federal Government in previous law on the removal of that material.

We are going through a whole examination now by the Federal Government, Nuclear Regulatory Commission, and so forth, so I would like to ask the gentleman specifically—and I thank the gentleman again for yielding—am I correct in understanding that his amendment does not address the question of financial responsibility for the decontamination of low-level-

rad waste sites that are not to be transferred to the custody of the Federal Government, or the disposal of such wastes from such sites, nor is it intended to change existing law relating to the cleanup or care of such sites?

Mr. RAHALL. Mr. Chairman, the gentleman is completely correct. There is no intent in my amendment to establish financial responsibility for such cleanup and caretaking operations or to change existing law relating thereto.

It is my intent merely to create a legal mechanism whereby certain sites may be transferred to the Government for long-term oversight.

Mr. ROE. Mr. Chairman, I thank the gentleman very much for that clarification for the situation.

Mr. RAHALL. I thank the gentleman from New Jersey for his clarification.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield to me?

Mr. RAHALL. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, the gentleman's amendment provides that the owner may make adequate financial arrangements that are approved by the Commission for the long-term maintenance and monitoring of the site.

My question is: Is it the intention of the gentleman, in his amendment, in approving the adequacy of these financial arrangements with the owner that the Nuclear Regulatory Commission consult with the Department of Energy?

Mr. RAHALL. Yes, it is my intent that such consultation would take place.

Mr. BROYHILL. Mr. Chairman, would the gentleman indicate: Will the Department have any powers of concurring with these financial arrangements or is it the intent that the final decision rests with the Commission?

Mr. RAHALL. The final decision would rest with the Commission, as I understand the way the amendment is structured.

I might add that the sites that I mentioned that may be covered by this amendment—and this is from Department of Energy information—are only two sites, one in Cook County, Ill., and one in Norton, Maine. The NRC identified a site in Parkersburg, W. Va.

Mr. BROYHILL. So the gentleman is stating that consultation is intended with the Department of Energy by the Nuclear Regulatory Commission in the determination of the adequacy of these financial arrangements?

Mr. RAHALL. The gentleman is correct.

The CHAIRMAN. The time of the gentleman from West Virginia (Mr. RAHALL) has expired.

(On request of Mr. LUJAN and by unanimous consent, Mr. RAHALL was allowed to proceed for 2 additional minutes.)

Mr. LUJAN. Mr. Chairman, will the gentleman yield to me?

Mr. RAHALL. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, I support the gentleman's amendment. I would only like to ask the gentleman: As I remember, we passed this through the Committee on Interior and Insular Affairs at one time, at the time that we were working on the bill. It is my understanding that it passed the Committee on Energy and Commerce also. So how come it is not in the bill? What happened between the time that we passed it in Interior and they passed it over at Energy and Commerce, and now it is necessary for the gentleman to offer an amendment?

Mr. RAHALL. I cannot adequately describe what happened. I was not sitting in during the process, but when it came to the floor it was not there. I am attempting to correct that oversight.

Mr. LUJAN. Mr. Chairman, will the gentleman yield further?

Mr. RAHALL. I would be happy to yield further to the gentleman from New Mexico.

Mr. LUJAN. I understand exactly. I simply wanted to raise the question at this point, because this is one of the things that has disturbed me about assigning jurisdiction to various committees and then a group of people, including myself, I must admit, get together and craft a bill and take things out that were passed by each committee as though it is not a big deal.

I raise this question because I think maybe we ought to have a change in the Rules of the House that once the committees of jurisdiction pass a particular provision, that maybe we should not be messing around with it and it ought to stay in the bill if, as a matter of fact, it did come from both committees of jurisdiction.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, I do not think that is an accurate representation of what happened, either yesterday with respect to the number of repository sites selected where it was alleged that we did something entirely different, where in fact both of the committees provided for 5 or 6 sites for repositories, with different time schedules. The schedule for site selection was resolved in the substitute.

In this situation we had differing language in the 2 committee bills. We attempted to resolve that. We went to the gentleman from West Virginia (Mr. RAHALL). The gentleman from West Virginia indicated that the language that we have in the bill at the present time, in fact, resolved the problem.

The CHAIRMAN. The time of the gentleman from West Virginia (Mr. RAHALL) has again expired.

(On request of Mr. OTTINGER and by unanimous consent, Mr. RAHALL was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield further?

Mr. RAHALL. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, that did in fact resolve the problem. Then later it appeared that the language was not adequate to resolve the problem. So we are quite agreeable to changing the language for that purpose. But this is not something that is done underhandedly by the committees in violation of what was done in the bill. An attempt was made to give an interpretation that would adequately solve the problem of the gentleman from West Virginia. We thought we had done that originally. Now we have found that it does not. We are trying to accommodate the gentleman.

Mr. LUJAN. Mr. Chairman, will the gentleman yield further?

Mr. RAHALL. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, it is no my contention that it was done underhandedly. Absolutely not. It is done right out in the open.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield further to me?

Mr. RAHALL. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, we have not done something that was not passed in either committee and suddenly it appears here, and that is what the gentleman, as I understand it, was seeking to imply. That really is not an accurate representation of what was done.

Mr. Chairman, I have no objection to the amendment.

Mr. RAHALL. I thank the gentleman from New York.

Mr. Chairman, I yield back the balance of my time, and I urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from West Virginia (Mr. RAHALL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WIRTH

Mr. WIRTH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIRTH: Page 65, strike out line 8 and all that follows down through line 14 and substitute: "The Secretary may not develop a repository at any site unless the Secretary determines that such development, and the construction and operation of such repository, will not require any purchase or other acquisition of water rights that will have significant adverse effect on the present or future development of the area in which such site is located.".

Mr. WIRTH. Mr. Chairman, in dealing with our national nuclear waste problem, a few States will eventually accept a disproportionate responsibility for the waste disposal. We all understand that. There is no problem with that. However, I think that we must not abrogate existing State rights in our move toward developing nuclear waste legislation.

The water rights amendment which I am offering strikes a balance between these two concerns. Water is the lifeline of Western communities and is the essential resource for all development, especially energy projects which are increasing in size and number all over the West.

As we became more concerned about developing our own sources of energy in the last decade, the West has seen tremendous growth in all energy fields. However, the development of coal and synthetic fuels all need a great deal of water and we have to be careful not to create conflicts between various uses of this very scarce resource.

□ 1430

If it is decided that repository is going to be located in an area of energy development; the Secretary of Energy should assess the impact the repository's 1-billion-gallon-per-year water need will have on other competing demands in that area. This is all my amendment requires. The Secretary shall determine what all the demands are for the scarce resource of water. Is it going to go for the storage facility, or is this going to go for energy development? In the West there simply is not enough water to do both things.

Under the bill, the Secretary of Energy is required to consider the effects that a repository will have on local rights, but he is not required to make any determination. That consideration can be just the Secretary saying, "Yes, I have considered it. I did it in my dreams last night or at breakfast this morning, or whatever." No formal consideration of the use for this extremely important resource is required. I am requiring in this amendment that the Secretary make a determination.

Why is this amendment necessary? First, the amount of water that a repository will consume during its construction and operation requires 1 billion gallons of water per year—1 billion gallons of water per year. That is 3 million gallons a day. The Energy Department has told us that this does not constitute a significant amount of water. If that is the case, then there should not be any opposition to the amendment.

My amendment is not antidevelopment in any way. On the contrary, it simply requires careful planning for the successful accommodation of all kinds of competing uses of scarce water. The amendment prohibits nothing. It requires the Secretary of Energy to consider water supplies before taking any action to make a finding on the repository's impact on the surrounding community.

Unlike the population language in the bill, this gives special treatment to no one area, no one place. Under my amendment, all the sites under consideration are treated equally. I would urge my colleagues to support the amendment. We should look carefully before allocating water for one use and not another.

Mr. OTTINGER. Mr. Chairman, would the gentleman yield?

Mr. WIRTH. I would be happy to yield.

Mr. OTTINGER. Mr. Chairman, I am very sympathetic to the problems that the gentleman is seeking to address here, and I would like to give him the maximum protection that is possible. I wonder if we could not engage in a colloquy here that maybe would take care of him, and it would not be necessary to pursue the amendment.

Under the amendment as I read it, it creates an absolute requirement. It says that the Secretary may not develop a repository at any site unless the Secretary determines that there is no possible damage.

Mr. WIRTH. Correct.

Mr. OTTINGER. That is a very drastic requirement that I think would in fact eliminate many sites, even though there might be an infinitesimal amount of damage that could be found. The language of the bill in section 125 says:

The Secretary shall give full consideration to whether the development, construction and operation of a repository may require any purchase or other acquisition of water rights that will have a significant adverse effect on the present or future development of the area in which the repository is located, and the Secretary shall mitigate any adverse effects to the maximum extent practicable.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

(At the request of Mr. OTTINGER and by unanimous consent, Mr. WIRTH was allowed to proceed for 3 additional minutes.)

Mr. OTTINGER. In the guideline section of the bill, section 112, page 16, one of the guidelines that must be developed is a guideline that affects the proximity to water supplies. I am perfectly willing to stipulate with the gentleman that we ought not to have any development of one of these repositories that will have a significant adverse effect on future development of the area, and that the Secretary ought to interpret this language very severely, but I do not think I can go so far as the gentleman's amendment goes in saying that if there is any adverse effect whatsoever on future development, then the repository cannot be developed. Would that be acceptable to the gentleman?

Mr. WIRTH. Would the gentleman be willing to agree that the Secretary should make a determination? Consideration, as the gentleman knows, is scarcely the kind of terminology that carries with it the capacity to see that there has in fact been any thorough study. Again, the part I am making is that there are competing demands for a very scarce resource. To say "consider" particularly with our friends in the current Department of Energy, does not mean very much. A determination, however, is a much more formal proceeding, and if we could include language on determination, that would solve one of the problems, I believe.

Mr. OTTINGER. I would have no problem with that at all. As I interpreted this language, "Full consideration" when read in conjunction with the language of section 16, which requires a formal determination with regard to guidelines, would require the kind of determination that the gentleman requires.

Mr. WIRTH. Can we interpret line 8 on page 65 as full consideration, meaning the Secretary shall make a determination?

Mr. OTTINGER. I would so interpret it.

Mr. WIRTH. Is that acceptable to the gentleman from Arizona and the gentleman from New Mexico, that we are talking about full consideration, that it in fact means that there shall be a formal determination on competing water needs? That addresses the problem that the gentleman from New York points out, which may be a valid concern.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield.

Mr. UDALL. My attention was distracted. Is the gentleman withdrawing his amendment?

Mr. WIRTH. What we are doing is coming to an agreement as to what would be meant by this language. Instead of having the amendment, I would support the interpretation given to the language cited by the gentleman from New York on page 65, that the interpretation of full consideration on line 8 is to mean that the Secretary shall make a determination.

Mr. UDALL. It has got to be clearly understood as far as I am concerned

that we are not crossing this line we talked about yesterday. I have turned down a dozen Members, who have descriptions or definitions that would eliminate certain sites. I think the Secretary ought to consider, ought to look at, ought to weigh all these factors, and specifically water ought to be considered carefully.

The CHAIRMAN. The time of the gentleman from Colorado has again expired.

(By unanimous consent, Mr. WIRTH was allowed to proceed for 3 additional minutes.)

Mr. UDALL. If the amendment were to be withdrawn and the colloquy goes to the language on page 65 and simply is interpreted to mean what I am sure my friend, Mr. OTTINGER, just covered, I have no objection.

Mr. WIRTH. To make full consideration mean determination?

Mr. UDALL. The amendment requires the Secretary to dump the site and not to consider it and stop any facility whatever if there will be an adverse effect on water rights.

Mr. WIRTH. So the gentleman from New York might state his interpretation.

Mr. OTTINGER. Let me make it clear that I think an absolute prohibition against doing anything which has any kind of significant effect on water goes too far. That is what I told the gentleman, but his concern is that the language as it presently stands on page 65, line 8, says the Secretary shall merely give full consideration. He says that there ought to be a more formal determination. My reply to him was that on page 16, in setting up guidelines in accordance with a formal determination process, one of the determinations that has to be made is the proximity to water supplies, and that that, read in conjunction with this section 124, I thought really did require that the Secretary make a formal determination with respect to the effect on water supplies and not just give it some kind of casual consideration. I think that interpretation we could accept, not a determination that says that if there is an adverse effect then the site is disqualified altogether.

Mr. UDALL. I would agree with the gentleman from New York's interpretation of those sections already in the bill, if the amendment were withdrawn.

Mr. WIRTH. Therefore, it could be the understanding following this colloquy and in the report following the legislation, then I would also like to make sure we are all in agreement on this and get the opinion of the distinguished gentleman from New Mexico. I yield to him for that purpose.

Mr. LUJAN. It is perfectly all right. As a matter of fact, I think in many ways that is intended, because part of the guidelines shall take into consideration the effect upon the rights of communities of water. I think that is what the gentleman is saying, that it specifically be included in a study, that he did take these into consideration, and he found that it is not going to adversely, or did not believe adversely affect any users.

Mr. WIRTH. The gentleman understands my concern that consideration by a Secretary of Energy from a water-rich area of the country, who is not experienced in the kinds of water problems familiar to the gentleman from New Mexico and the gentleman from Arizona, may cause very severe problems. What I am concerned about is having a much clearer understanding and determination that there are competing demands, and that those have really been looked at very carefully and not just given the back of the hand.

Mr. LUJAN. I wholeheartedly agree.

Mrs. BOUQUARD. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentlewoman.

Mrs. BOUQUARD. Mr. Chairman, the clarification is acceptable to me if the gentleman withdraws his amendment.

Mr. WIRTH. I would be happy to withdraw the amendment.

The CHAIRMAN. The time of the gentleman from Colorado has again expired.

(By unanimous concent, Mr. WIRTH was allowed to proceed for 1 additional minute.)

Mr. WIRTH. Mr. Chairman, I will agree to withdraw the amendment. Let me also point out that, as the gentleman from Arizona pointed out, what we are not doing is precluding any particular area from consideration. Is that not what the gentleman from Arizona has indicated to us, that the purpose of the authors and managers of the bill is not to preclude from consideration any of the potential sites in the country?

Mr. UDALL. Exactly right.

Mr. WIRTH. That is exactly correct.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

AMENDMENT OFFERED BY MR. WIRTH

Mr. WIRTH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIRTH: Strike out the fourth sentence of 112(a), page 16, line 24, after the period through the period on page 17 line 4, and substitute: "Such guidelines shall specify population factors that will disqualify any site from development as a repository if any surface facility of such repository would be located in a highly populated area.".

Mr. WIRTH. Mr. Chairman, this amendment is fully consistent with the colloquy we just had on the previous amendment. The colloquy on the previous amendment that we had, and particularly with the gentleman from Arizona (Mr. UDALL), said that in this legislation it was the intent of the managers of the bill not to preclude consideration of any particular site. Now, if that is the case, and if we want to have this legislation to be consistent with the intent of the authors and managers of the bill, then the authors and the managers of the bill should accept this amendment.

What this amendment does is simply to say that among the other considerations it was not going to be in a highly populated area, line 17 down to line 3, and that we cut out the language on line 3, adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals.

What is that all about? One mile by one mile having a population of not less than 1,000 individuals is specific language, and that is in here not as a general guideline, which is what I have heard from the managers of the bill, that they are concerned about general guidelines. It is in here to preclude one particular site.

Let us be consistent. We either have a broad set of guidelines to the Department of Energy or we are going to go through and eliminate one site, eliminate another site, eliminate another site because of the concerns of particular Members. Let us be consistent and accept this amendment.

This amendment is exactly consistent with the discussion we just had, involving the gentleman from Arizona, the gentleman from New York, the gentleman from New Mexico and the author of the amendment, and the gentlewoman from Tennessee which stressed the need to have broad general approaches. This language on line 3 is not a broad general approach. It is a site-specific amendment designed to preclude one particular site in the Southern part of the country.

I would ask the authors of the amendment if it is not the case that we want to keep this language general and not to make this language specific to one particular area of the country. I will ask the gentleman from New York.

□ 1445

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I am happy to yield to the gentleman from New York, and then I will yield to the gentleman from North Carolina in a minute.

Mr. OTTINGER. Mr. Chairman, the gentleman from Colorado is correct, and the amendment offered by the gentleman from Mississippi (Mr. LOTT) yesterday was kind of ironic because the language that was in fact adopted

does not adequately protect the area he wanted to make sure would not be the subject of repository. But this language is very mischievous and ambiguous because it says you cannot have a repository adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals.

It is not very clear how that 1 mile is measured, it is not clear as to what time you figure the population, and we could very well rule out many legitimate sites on the basis of this language. It seems to me much more desirable to keep this in, and certainly we do not want sites next to highly populated areas.

Mr. WIRTH. Which is what we say in line 2.

Mr. OTTINGER. Looking at the language in line 2, it says that no repository would be located in a highly populated area, and it allows the Secretary the leeway for the determination of that language.

Mr. WIRTH. So the gentleman would think, in line with the discussions we have had in the last 15 minutes about providing general guidelines and general approaches to the Department of Energy, that the amendment offered by the gentleman from Colorado should be accepted?

Mr. OTTINGER. Yes, and I think the population consideration is a very important one.

Mr. WIRTH. Which is what we have in line 2.

Mr. OTTINGER. And it deserves our determination, just as I agreed with the gentleman that the water problem is a very important problem and ought to be subject to determination.

Mr. WIRTH. But we should not make it specific.

Mr. OTTINGER. But we should not make a specific requirement.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I felt very badly yesterday having to oppose the gentleman from Mississippi (Mr. LOTT) with his concerns, and I have felt very badly in the last few days after hearing other Members who had concerns that they wanted to protect.

I have been in favor of guidelines that make sense; I have been opposed to formulas that rule out one or two specific sites. I tell the gentleman very frankly that I like his language better than what we have in the bill, but we made an arrangement between us, with bipartisan support on these matters, and I know it is very painful to my friends on the other side of the aisle now to stand up to the gentleman from Mississippi (Mr. LOTT). And I think everyone knows how close I have been over the years to the gentleman from Colorado.

Mr. WIRTH. That is true.

Mr. UDALL. But unless there is agreement on the other side, I am constrained to keep my part of the agreement that I made with my friends on the other side.

Mr. WIRTH. Mr. Chairman, I understand the gentleman's position. The gentleman from Arizona is between a rock and a hard place on this, and I understand that completely. I just wanted to point out that the gentleman from Colorado in his earlier amendment was accommodating an understanding that we are looking for general guidelines. But now we have become very specific.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I am happy to yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, the gentleman is aware of course, that the committee yesterday defeated an amendment which would have had the effect of eliminating at least one site for consideration.

The CHAIRMAN. The time of the gentleman from Colorado (Mr. WIRTH) has expired.

(By unanimous consent, Mr. WIRTH was allowed to proceed for 3 additional minutes.)

Mr. BROYHILL. Mr. Chairman, I will ask, is the gentleman aware of that?

Mr. WIRTH. I am very aware of that. That was an attempt to make this particular language even more specific in eliminating this particular area which the gentleman is familiar with, as is the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, is the gentleman in favor of citing one of these respositories 1 mile from a population of not less than a 1,000?

Mr. WIRTH. That is not the point.

Mr. BROYHILL. Well, I just wondered about that.

Mr. WIRTH. The gentleman from Colorado agrees that we should not put a site in broad areas next to a highly populated area.

Now, to get so specific as to say, that in an area 1 mile by 1 mile having a population of not less than 1,000 individuals is, as the gentleman from North Carolina clearly understands, focusing only on one area in Mississippi, it is in there for the purposes of eliminating that area.

Now, if we are going to be consistent—and all I am asking for is that we be consistent—I will not go ahead and say that we should eliminate one or two or three sites in the West, but I do not think it is fair to then go ahead in the legislation and eliminate one specific site because a Member was able to get that in the legislation. That is not playing it straight.

Mr. BROYHILL. Mr. Chairman, if the gentleman will yield, I wondered if the gentleman was aware that the amendment the gentleman from Mississippi wanted was defeated?

Mr. WIRTH. Yes. And that was offered to make this even more specific, as the gentleman knows, with the Richton Dome potential of siting in Mississippi.

Mr. BROYHILL. Mr. Chairman, if the gentleman will yield, the point I was trying to make is that the gentleman from Mississippi does not feel this is restrictive enough.

Mr. WIRTH. So can the gentleman from North Carolina enlighten the gentleman from Colorado as to what site he had in mind by saying, "1 mile by 1 mile, having a population of not less than 1,000 individuals"?

Mr. BROYHILL. This has no site in mind.

Mr. WIRTH. Then why is this language there, then, the language that says, "1 mile by 1 mile, having a population of not less than 1,000 individuals"?

Mr. BROYHILL. It is the same reason that the language having to do with proximity to water supplies is there.

Mr. WIRTH. This is not proximity. The "highly populated area" is proximity to population consistent with the discussion we had earlier about general guidelines. I say, "you can't have your cake and eat it, too." I am saying we should have broad guidelines, but we are then going to eliminate one site that is appropriate for one Member of the House. That is not playing it straight.

Mr. BROYHILL. We are also saying in this legislation that the Secretary should take into consideration the proximity, not only the water supply proximity and proximity to populations, but proximity to components of the National Park Service.

Mr. WIRTH. Absolutely. I agree with the gentleman. It is all there. So let us keep it general. As the gentleman has just pointed out, let us keep it general and get rid of the language in here which is specific to one site, which is what this bill language is.

Mr. BROYHILL. Mr. Chairman, if the gentleman will yield, I can only say what this Member would do. It would seem to me that what we are saying is that a "highly populated area" would be an area of a 1,000 people or more, and that 1 mile would be as close as we would want to go and we do not want to get any closer.

Mr. WIRTH. Then we would have to get back to the water amendment I offered. Let us get into various specifics as to what "proximity" means and what "determination" means and get even more specific. The gentleman knows, as well as I do and as do all the authors of the bill, why we have done this.

The CHAIRMAN. The time of the gentleman from Colorado (Mr. WIRTH) has expired.

(On request of Mr. OTTINGER and by unanimous consent, Mr. WIRTH was allowed to proceed for 2 additional minutes.)

Mr. WIRTH. Mr. Chairman, the gentleman knows and I know and everybody here knows that the language here is focused on one particular area. Let us be straight about it. That is what it is all about. Let us not try to fuzz it over and say that this means a "highly populated area."

The "highly populated area" is in line 2, and the Richton Dome is in line 3. I am proposing this: let us take out the Richton Dome language and leave it general as everything else is general and have the bill be consistent.

It seems to me that if we are going to have general guidelines and we are not going to focus on one area, let us be consistent with the legislation. Let us not have one rule for all other Members of the House and another rule for one specific Member of the House.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I would like to clarify the point raised by my good friend, the gentleman from Arizona (Mr. UDALL), with respect to whether this language is sacrosanct because it was agreed on between the various committee members.

I would just point out that the gentleman from North Carolina did not so interpret it yesterday, because he supported the Lott amendment, which would have changed this language to make it more specific.

Mr. WIRTH. And the gentleman did support the Lott amendment yesterday?

Mr. OTTINGER. Yes, indeed.

Mr. WIRTH. I thought there was an agreement between the managers not to support any amendment.

Mr. OTTINGER. So it seems to me quite clearly that this is not part of the agreed on language among the committees to which at least the minority felt itself bound. So I think, therefore, we can make this improvement and accept this amendment.

Mr. WIRTH. Mr. Chairman, if the gentleman will allow me to say this, perhaps since he mentioned the gentleman from North Carolina, he can clarify what the agreement was between the managers on this and why yesterday he supported the Lott amendment which is a site-specific amendment.

Anyway, Mr. Chairman, we have had a discussion about this, and it seems to me that what we are trying to do in the bill is to make it general and provide general approaches for the determination of where the site or sites are going to be, and that we have agreed not to preclude one, two, or three of the almost two dozen sites.

Therefore, Mr. Chairman, this amendment ought to be accepted.

The CHAIRMAN. If there is no further debate on the amendment, the question is on the amendment offered by the gentleman from Colorado (Mr. WIRTH).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WIRTH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, noes 293, not voting 31, as follows:

[Roll No. 399]

□ 1510

Messrs. MARLENEE, ANDERSON, SKELTON, SANTINI, and BADHAM changed their votes from "aye" to "no."

Mr. FOGLIETTA and Mr. APPLEGATE changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any further amendments which are made in order pursuant to the rule?

AMENDMENT OFFERED BY MR. MARKEY

Mr. MARKEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARKEY: In section 114(a)(3), strike out "and legislature" and insert in lieu thereof "or legislature".

In section 115(a), strike out "and legislature" and insert in lieu thereof "or legislature".

In section 115(b), strike out "and legislature" and insert in lieu thereof "or legislature".

In section 116(a)(1), strike out "and legislature" in the first sentence and insert in lieu thereof "or legislature".

In section 116(a)(1), strike out "jointly" in the first sentence.

In section 116(a)(1), strike out "and legislature" in the second sentence and insert in lieu thereof "or legislature".

In section 116(a)(2), strike out "and legislature" in the first sentence and insert in lieu thereof "or legislature".

In section 116(a)(2), strike out "and legislature" in the second sentence and insert in lieu thereof "or legislature".

In section 116(a)(2), strike out "and legislature" in the last sentence and insert in lieu thereof "or legislature".

In section 135(f)(2)(A), strike out "and legislature" in the first sentence and insert in lieu thereof "or legislature".

In section 135(f)(2)(A), strike out "and legislature" in the last sentence and insert in lieu thereof "or legislature".

In section 135(f)(2)(B), strike out "and legislature" in the first sentence and insert in lieu thereof "or legislature".

In section 135(f)(2)(B), strike out "jointly" in the first sentence.

In section 135(f)(2)(B), strike out "and legislature" in the last sentence and insert in lieu thereof "or legislature".

Mr. MARKEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. STRATTON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read the amendment.

The Clerk concluded the reading of the amendment.

POINT OF ORDER

Mr. BROYHILL. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The Chair would advise the gentleman from North Carolina that the amendment is made in order under the rule.

The gentleman from North Carolina is recognized on his point of order.

Mr. BROYHILL. Mr. Chairman, the point of order is that the language that we adopted on yesterday has already amended the sections and has stricken out "legislature," and thus this amendment would not be in order, since it is action on amendments and sections that have already been amended.

Mr. OTTINGER. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. The gentleman from New York (Mr. OTTINGER) is recognized on the point of order.

Mr. OTTINGER. Mr. Chairman, I think the amendment is clearly in order, because under the rule that was adopted for consideration of this bill, House Resolution 601, on page 3, in lines 14, 15, and 16, it says: "and all such amendments shall be in order even if changing portions of the text of said substitute already changed by amendment."

That, clearly, seems designed to cover this situation, and whatever is last adopted will prevail.

Therefore, I would urge that the point of order is not well taken and it should be denied.

□ 1520

The CHAIRMAN. Is there any further discussion on the point of order? If not, the Chair will rule pursuant to the rule that was adopted on page 3, lines 14 through 16, it clearly states that all such amendments shall be in order even if changing portions of the text of said substitute already changed by amendment. And therefore, the point of order is not well taken, and it is overruled.

The gentleman from Massachusetts (Mr. MARKEY) is recognized for 5 minutes.

Mr. MARKEY. Mr. Chairman, the amendment now pending is another attempt to strengthen the hands of the States to insure that they will be able to play a role of real significance in any siting decision pertaining to a nuclear waste repository in their State. This amendment is a very, very minor change.

This amendment is strongly endorsed by the National Governors' Association and by the National Conference of State Legislatures. The reason that they feel so strongly about this is that when that issue of State veto raises its head, and when a State is going through the process of deciding whether or not it wants to object to the decision by the Federal Government of polling the Federal repository in their State, many States' legislatures may not even be in session. Many State legislatures meet for only 30 to 60 days out of the year. And in some States the State legislature only meets once every 2 years. This body has very limited knowledge as to what rules on filibustering or other tactics might exist in a State that could make it more difficult for the State to meet a very narrow window of days allowed to decide whether or not it wants to object to the siting of a facility.

This amendment quite simply says that a State legislature or a Governor can object to the siting of a waste repository. And that gives the State the responsibility for making a decision as to where this responsibility actually ought to lie.

It ought not be for us to tell a State whose legislature meets only once every 2 years, or for 2 months a year, that it is the legislature that should formally object to the siting of a permanent waste repository. It should be the Governor perhaps in that instance. Other times, it might be the legislature in formulating its own rules and regulations that wants to supercede the judgment of a Governor.

But in any instance we ought to leave that option clearly open to a State since it is the State's rights that are being vindicated in any process that they are going through.

So this is a very simple amendment. It is one that just says to the States, if you must object, you establish the process; you decide if it is the State legislature or the Governor who will formally object; we give to you either/or, Governor or legislature or both or any other formulation that you want to construct as your remedy for any arbitrary decision by the Federal Government in imposing this repository on your citizens' backs.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

What the gentleman says, and as I understand his amendment, it makes sense to me. But the gentleman from North Carolina and I had worked out an agreement on some of these things and he seems to have the view that what the gentleman is trying to do is impose on the States a rule that the legislature alone can do this job. And it seems to me from the gentleman's explanation and the amendment that that is not the case.

Mr. MARKEY. That is not the case. That is not the intention of the amendment at all. The intention of it is to give to the State the authority to make a decision within its own boundaries as to how these issues should be decided.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Well, it is certainly not the intention of this Member to put any limitations on the power of the State to make these determinations. In fact, it says

in line 9 that, it specifically says that the State has the residual power to make that determination. The concern I have with the gentleman's amendment is the confusion that may occur as to who has the ultimate authority to submit a notice of disapproval to the Congress. Can the gentleman respond to that concern?

Mr. MARKEY. The intention is just to give to the State the authority of establishing a mechanism that allows it to respond. I do not intend in this amendment to establish the process by which a State must abide. Rather I am trying to open it up so that we do not restrict the States decisionmaking process.

Mr. BROYHILL. Well, I have no objection with that explanation. I was concerned that there might be some confusion.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Does not the gentleman think to make it only the Governor that it makes it a highly political item. That almost any Governor is going to be forced to say, "Well, I do not want it over here."

At least if you have the legislature, you will have some deliberation on the subject.

Mr. CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has expired.

(At the request of Mr. LUJAN and by unanimous consent, Mr. MARKEY was allowed to proceed for 2 additional minutes.)

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I would be happy to yield.

Mr. BROYHILL. It is my understanding that is the gentleman's intent.

Mr. MARKEY. That is the intention of this amendment.

The Governor or the State legislative can object.

Mr. BROYHILL. If that is the intent I have no objection.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Arizona.

Mr. UDALL. The gentleman's amendment as I understand it says to the State, "You have a veto, we hereby grant you the further power to decide who will exercise that State veto."

It could be the Governor alone, the legislature alone, it could be a special commission set up under State law or any other formulation or arrangement the State wanted to put into effect.

Mr. MARKEY. That is the intention of the amendment.

Mr. UDALL. I think we ought to accept it.

Mr. BROYHILL. If that is the intent, I have no objection.

Mr. MARKEY. We will make the record clear that that is the intention.

Mrs. BOUQUARD. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentlewoman from Tennessee.

Mrs. BOUQUARD. I thank the gentleman for yielding.

If the gentleman from North Carolina and the gentleman from Arizona have no objection, I certainly have no objection.

Mr. OTTINGER. We have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The amendment was agreed to.

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

□ 1530

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3809) to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes, had come to no resolution thereon.

TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT APPROPRIATION BILL, 1983

Mr. ROYBAL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7158) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1983, and for other purposes, and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on the bill be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Ohio (Mr. MILLER) and myself.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. ROYBAL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7158, with Mr. STUDDS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from California (Mr. ROYBAL) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. MILLER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the Treasury, Postal Service, and General Government Subcommittee has reported a bill for your consideration that provides $10.8 billion in recommended appropriations. That is $285 million more than the amount requested in the President's budget. The primary reason for this increase is because the committee recommends full funding of $708 million for revenue foregone payment to the Postal Service. This is $208 million above the President's budget request of $500 million. The revenue foregone subsidy is money appropriated to the Postal Service solely for the purpose of holding down rates for certain second, third, and fourth class nonprofit mailers. If the subsidy is reduced the Postal Service is required by law to raise the rates to these mailers. Included in the House report on page 30 is a list illustrating what the rates would be under various appropriation levels. Since so many domestic programs are being cut and the charitable institutions of the country are being asked to increase their contributions, the committee felt that to impose an additional burden on $208 million in increased mailing rates would not be advisable at this time. The committee has, therefore, recommended the full amount authorized by law.

With regard to the Treasury Department, the committee added $20 million to the Bureau of Alcohol, Tobacco and Firearms and $38.7 million to the Customs Service so that these two law enforcement agencies could continue to operate at the 1982 level. We did not recommend any additional personnel above the 1982 levels for either of these agencies, but considering the almost epidemic level of crime involving firearms and drugs, it does not seem that Federal law enforcement should be reduced in these areas. It should be noted that in several instances in the past 2 years this committee has recommended funds above the President's budget for law enforcement activities. Then, several months later the President has realized the

damage done to law enforcement by these draconian cuts and has requested that the money they proposed to cut be restored. A great deal of damage has often resulted from this type of delayed reaction to real needs. We have another case of this in this current bill. Just a few days ago the President sent up a request for an additional $30 million for the U.S. Customs Service. I will offer a motion at the appropriate time to deal with this issue, but I do want to point out the committee has already recommended a restoration of $38.2 million that the administration proposed to reduce. They apparently have finally realized that not only were they wrong when they proposed the reduction of $38.2 million, but that they should have increased it an additional $30 million. We have put a cap of $25,000 on the overtime that can be paid to Customs employees. This cap can be waived by the Commissioner when circumstances warrant. I would like to point out that the average salary in the private sector in this country is about $16,000 a year, which is less than many customs employees receive in overtime pay alone. Furthermore, if employees are required to work such excessive overtime, it can only lead to reduced effectiveness as well as being detrimental to their health. The committee does not support this kind of treatment of employees.

The committee also added $50 million to the Internal Revenue Service for the taxpayer assistance program. In adding these funds, the committee only restored the taxpayer assistance program to the 1982 level of operations. The committee felt that the restoration of these funds was necessary because of the complexity of the tax laws and the recognition that the Government has some obligation to assist the taxpayer in complying with those laws. The General Accounting Office indicated that there is an alarming rise in noncompliance with the tax laws. While most of us are for tax reductions, those reductions should not be given to those who are filing erroneous returns and gambling on not being caught. Even with the recommended increase the percentage of returns being audited is very low. (Less than 2 percent.)

In the Executive Office of the President we inserted a provision which prohibits the Office of Management and Budget from interfering with regulatory agencies. The committee is concerned that the Office of Management and Budget is getting too involved in regulatory matters, even to the extent of overruling the regulations issued by agencies that were established by law and authorized to issue regulations in their respective fields.

In GSA we have included funding for the allowances and office staffs for former Presidents at the level requested in the budget. We have provided $3 million to continue grants for the National Historical Records and Publications Commission. The subcommittee has also added a general provision (sec. 612) regarding the standard level user charges imposed by the General Services Administration. This provision freezes the rate per square foot charged to all Government agencies by GSA for space in 1983 to the same rate charged in 1982. This will result in a lower cost per square foot in 1982 than was requested in agency budgets for fiscal year 1983. It is a 1 year stop-gap measure which will save about $350 million Government-wide in 1983, but can be done for 1 year only. If continued beyond 1 fiscal year, a very severe adverse impact on all construction, repairs, alterations, leases, and other real property operations would result.

The committee rejected an industrial funding proposal recommended in the budget for certain GSA functions for several reasons. First, legislation authorizing this type of funding was rejected by the Congress. In addition, the committee has opposed this type of funding for a number of years because it would remove these functions from the annual budgetary review process by the Congress. It would also disperse the cost of these functions throughout the Government so that the Congress and the public would not know the total cost.

In connection with the national defense stockpile, the committee is recommending a limitation of $120 million for purchases for the stockpile in fiscal year 1983, the amount requested in the budget. A change in the funding of the stockpile is recommended to allow proceeds from sales from the stockpile to be used for new purchases rather than new budget authority. Limitations on amounts will continue to be as specified in annual appropriations acts, as provided by law.

Finally, the committee has eliminated three general provisions dealing with the tax exempt status of private schools which were added to previous bills by floor amendments.

Mr. Chairman, this is a good bill—a reasonable bill which the Appropriations Committee believes provides adequately and fairly for the agencies under its jurisdiction. We urge your support.

□ 1540

Mr. KAZEN. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Chairman, let me ask the gentleman specifically: What is the situation under the bill with reference to customs inspectors at the international border? What I am after is finding out if there has been an increase in the amount of money to require the Service to emply more customs inspectors.

Mr. ROYBAL. May I answer the gentleman by telling him that the administration requested an appropriation that would decrease the number of personnel by 2,300 employees. The committee, however, restored that amount. Therefore, the money that is now in the appropriations bill provides for the employment of at least 2,300 employees that the administration was seeking to reduce.

Mr. KAZEN. If the gentleman will yield further, my problem is not the fact that we are staying where we have been, but my worry is that we are not increasing the size of the personnel in the Service.

As the gentleman well knows, I represent two international entry ports on the Mexico-United States border, Laredo and Eagle Pass. I have just been told that over the Thanksgiving holidays just this last week, there were cars stretching for some 2 miles waiting to enter the United States because we did not have enough lanes open because we did not have the personnel to man those lanes.

That is what troubles me. Particularly with the holidays coming upon us, the Christmas holidays and later on New Years, at Laredo, if the gentleman will permit me further, they are opening up a brandnew racetrack in Nuevo Laredo, we have a new international bridge, a new facility. This Member worries about the fact that we are not going to have enough personnel to take care of the traffic that is going to be generated, is being generated now, and will be generated in the future, which will be even greater.

My worry is that we have not increased the amount of money for additional personnel.

Mr. ROYBAL. May I respond to the gentleman by saying that these are worries that I have had for many years. We do have a racetrack in Agua Caliente adjacent to Tijuana. We know exactly what the situation is on Saturdays and Sundays or, whenever the track is in operation. We also know that there is not enough personnel provided to take care of that situation.

I know what the gentleman is thinking. I understand his worry. The truth of the matter is that the committee has, in fact, restored funds and personnel that the administration was seeking to reduce.

We were not able to go beyond that, and did not, but I sincerely hope that the personnel that are now in place under this legislation will be used at border stations where they are actually needed.

Mr. KAZEN. Mr. Chairman, will the gentleman yield further?

Mr. ROYBAL. I yield further to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Chairman, how can we assure such a thing? Can we just, by amendment to the gentleman's bill here on the floor, add some additional personnel? What would keep us from doing that?

Mr. ROYBAL. That would be perfectly all right. I would be amenable to discussing this matter with the gentleman and provide a proper motion for that purpose.

Mr. KAZEN. I thank the gentleman.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Chairman, I want to commend our distinguished chairman of the Treasury-Postal Service-General Government Subcommittee of the Committee on Appropriations for his remarks and for his hard word and ability as chairman of our subcommittee.

I have offered on this House floor many times an amendment that would reduce spending, and we attempted to hold down spending in our own subcommittee bill. I think it is vitally important that we start with the subcommittees in order to reduce spending.

We have a couple other gentlemen on the floor here, "Tex" Gunnels and Bill Smith, staff members of the Subcommittee on Treasury, Postal Service, and General Government, who have worked diligently on this bill. I wanted to make sure that they were recognized for their efforts and contributions to the work of our subcommittee.

Everyone on this subcommittee put in a lot of hard work examining in detail the operations of the various agencies, departments, committees, and commissions that come to this subcommittee for their appropriations.

We do have a number of items that do not exactly jibe. Frankly, I am concerned. We have a Budget Committee that says x amount of dollars should be allocated to the Appropriations Committee. We then have the Appropriations Committee chairman who allocates the funds, the 302(b) funds, to the 13 major subcommittees. OMB is "scorekeeping" on the basis of their interpretation of the congressional budget and frankly, at the present time, we are considered by OMB to be over the budget.

□ 1550

When we say over the budget, what budget? For example, when it comes to the strategic materials stockpile, we changed the way we handle that account, and made it a limitation. That limitation was for $120 million that could be spent for strategic materials for the stockpile. The Office of Management and Budget does not feel that the $120 million that is allocated for strategic materials should be allowed without being under the full appropriations process.

With regard to this item, and another item I will discuss, OMB feels that we have used a phony way to get around the appropriation. The other item relates to the standard level user charge, known as the SLUC funding. Under our bill, GSA is limited to collecting from the various agencies no more than the amount they collected in 1982. Now, for the agencies funded under this particular bill there would be about a $50 million savings. Under all the appropriation bills Government-wide there would be approximately $350 million savings. Again OMB is calling that phony. Now, it is very possible that it is, and we have to be careful that we do not try to make the deficit picture look better by not putting the expenditure on the proper side of the ledger.

I think all of this is very important, and I believe it is something that the appropriation process is going to have to look into as we move along, because I am afraid we are on the wrong road at the present time. We are finding ways to make the deficit picture look better while still spending, and in that spending we are not really showing it on the proper side of the ledger.

We have in our legislation items that are very important to the operation of the total Government. Most of the dollars in our appropriation are for personnel—we have agencies that are personnel-intensive. This bill probably has more dollars used for personnel than any other piece of legislation that will be coming before us.

I know that there are many who are interested in the national debt. Today we have a national debt of over $1 trillion. Most people are not aware that just to manage that national debt requires expenditure. In this bill we have $209 million just to manage the national debt. It is becoming larger every year, and I guess that is a responsibility that we are going to have to face up to as we move along, because the debt is not decreasing. There is absolutely no doubt about that.

If we continue to spend here we are going to wind up with not only that national debt increasing, but the amount to administer the national debt will be increasing.

I will not take more time to discuss the bill now, and will comment on other issues as we move along.

Mr. ROYBAL. Mr. Chairman, I yield such time as he may require to the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, my colleagues, I rise in support of H.R. 7158.

In a way, Mr. Chairman, my colleagues, this is a crime-fighting bill because in this bill we provide the extra funds needed for Customs, and we exceed the budget for Customs because we feel that much money was wasted in moving men and women of Customs from one place or problem to another, such as moving from the Northeast down to Florida, for we know the smugglers simply move their operations. We felt that it was more important to bring forth proper number of personnel to cover all points of entry to protect this Nation against the high increase of narcotics.

Mr. Chairman, I commend one colleague, ED ROYBAL of California, chairman of the subcommittee, whose hard work and discerning judgment is evidenced in the bill now before the House: The Treasury, Postal Service and general government appropriations bill for fiscal year 1983. I extend my respects also to the ranking minority member, CLARENCE MILLER of Ohio, and to my fellow members of the subcommittee, our excellent staff, Tex Gunnels, Bill Smith, and Lee Brady.

As Members of the House may recall, the fiscal year 1982 bill was passed by the House on July 30, 1981. The Senate bill, although reported, did not reach the floor. Therefore, the agencies and programs covered by the bill have been carried under the stringent terms of the continuing resolution. We do not want that to happen again this year.

The fiscal year 1983 bill before us now appropriates $10.77 billion in new budget authority. It is $284.5 million above the administration's budget estimates. This is because some of the reductions proposed in the budget were judged by the committee to be totally contrary to our national interest. Funding had to be restored in order to sustain essential programs. At the same time, savings have been recommended. Most notably, the bill contains a general provision which prohibits the General Services Administration from raising the standard level user charges (SLUC) above the fiscal year 1982 level. This provision will reduce Government-wide rental charges by about $350 billion. In this bill alone, the reductions thus made total nearly $50 million.

Title I of the bill makes appropriations for the Treasury Department. Examination of this section shows why the committee did not accept some of the reductions proposed in the budget.

For example, no funds were requested for the Bureau of Government Financial Operations for the costs of issuing social security checks. Language was requested in this appropriation bill that would authorize the Social Security Administration to reimburse the Bureau $68.9 million for this ex-

pense. Not only is this bookkeeping switch unauthorized but funds had to be provided in the urgent supplemental because of Treasury's decision not to request funding for this purpose last year. The funding has, therefore, been included in the bill.

No funding was requested for the Bureau of Alcohol, Tobacco and Firearms. Treasury had proposed to abolish BATF and transfer its functions and some supporting funds to Secret Service and Customs. The committee and Congress rejected that proposal as unwise and directed in the urgent supplemental that the bureau be continued. The committee had to transfer back to BATF the funding included in the Secret Service and Customs Service budgets, and add more, so that BATF can continue to carry out its important missions in fiscal year 1983.

The support of this House for the maintenance of a strong Customs Service has been clearly recorded time and time again. The "Major Themes" budget document for fiscal year 1983 includes a chapter entitled "Reducing Federal Employment." On page 248, with specific reference to the Treasury Department, it states:

> Reductions will occur in selected activities with staffing held relatively constant in direct law enforcement and revenue collection functions.

The Customs Service is both a law enforcement and a revenue collection agency. Nonetheless the administration proposed to reduce the Service by more than 2,000 permanent positions. The committee rejected that proposal and restored $38.7 million for Customs personnel.

The bill continues the Customs overtime pay cap at $25,000 per person in fiscal year 1983. My own position is that the cap should be removed. The Service itself requested that the ceiling be taken off. It has been costly and difficult to administer. Personnel had to be temporarily transferred to locations where local employees had reached the pay cap. The cap remains in place but language has been included to permit the Commissioner of Customs, or his designee, to waive the cap in individual cases.

Of paramount concern to me is the role of the Customs Service as our first line of defense against the entry of illegal drugs into this country. This year we have seen the need to establish a special task force to combat the crisis in drug trafficking in south Florida. I support the provision of all necessary resources to combat that problem. However, the task force was put in place at the expense of transporting trained personnel from their posts in other areas of the country. If we are to win our all-out war against drugs, we must keep up our guard everywhere. The drugrunners must be forestalled from any attempt to divert their traffic to other points of entry. On October 14 the President announced his plan to increase our efforts in the war on drugs. As part of this, additional regional task forces would be set up. A program such as this would have my strong support but, to be successful, it must be adequately manned and adequately funded without detriment to other essential programs.

The bill provides the additional funding and personnel requested to strengthen tax enforcement by the Internal Revenue Service. Those who are in one way or another deliberately dodging their responsibilities as taxpayers must be brought into compliance with the law. However, the budget also proposed a drastic cutback in taxpayers assistance. This would have serious impact on citizens who need and want help in figuring out their taxes but who cannot afford to pay for private counseling. To cut this program would cause further erosion of voluntary compliance which is the very foundation of our tax program. The committee restored $50 million to maintain taxpayers assistance, including Volunteers in Tax Assistance and Tax Counseling for the Elderly, at the 1982 level.

Within the Secret Service budget the administration proposed to slash by two-thirds the funding for Federal reimbursement for protection of foreign diplomatic missions—other than the District of Columbia—in the United States. This would specifically impact my city of New York where protection related to the United Nations is provided by city police. This is the most cost-effective and security-effective method of providing the security so vitally needed. Past levels of funding have been inadequate to cover legitimate, approved claims and a backlog of Federal debt to the city has accumulated. The House endorsed the need to increase Federal appropriations and address the backlogged claims by passing H.R. 6254 on June 15 of this year. The committee, therefore, did not approve the proposed reduction and funding has been added for this program.

These are some of the issues that were addressed in title I of this bill. I will mention only two other items as examples of the significant programs, large and small, included in other sections of the bill.

Title II appropriates funds for the Postal Service. Both Houses of Congress have underscored their concern regarding the revenue foregone program by providing additional funding in the supplemental bills. These appropriations subsidize mail rates for our charitable and other nonprofit organizations. The administration has blithely called upon private charities and institutions to expand their efforts to make up for the drastic cutbacks in Federal funding of social programs. Many of these groups depend heavily on the mails to raise funds. To increase their postal rates would be counterproductive. It would decrease the ability to raise funds and would eat into the resources available for program delivery. These are the reasons I proposed, and the committee approved the full authorized funding level of $708 million for revenue foregone. This amount is $208 million above the budget request.

The bill also includes some very small but significant programs. The National Historical Publications and Records Commission is one. The bill earmarks $3 million for the Commission whose mission is the preservation of our national heritage.

The Executive Office of the President is funded in this bill. So is the General Services Administration, the Office of Personnel Management and a number of other independent offices that make up the General Government portion of the bill. The committee report spells out clearly and in detail the recommendations contained in H.R. 7158.

I urge the adoption of this bill by the House. I would also urge our colleagues in the Senate to move forward and complete action so that we can go to conference and get the Treasury, Postal Service, and General Government appropriations bill out from under a continuing resolution.

Mr. ROYBAL. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Chairman, I rise to join with my colleagues in expressing my support for this piece of legislation, H.R. 7158, which makes appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1983.

I commend the chairman of the Appropriations Subcommittee on Treasury, Postal Service, and General Government, the Honorable ED ROYBAL, and the ranking minority member of the subcommittee, the Honorable CLARENCE MILLER, for their tireless efforts in producing this measure. And, of course, commendations are in order for the full committee chairman, the Honorable JAMIE WHITTEN, and the ranking member of the full committee, the Honorable SILVIO CONTE, for their many contributions to this legislation.

Of particular interest to me is language contained in the Federal Buildings Fund for the General Services Administration (title IV) which earmarks $3 million for site and design of a new Long Beach Federal Building.

As you know, earlier this year the House authorized the construction of this facility which is estimated to cost $21,680,000 and will contain 105,000 occupiable square feet.

In July of this year the Public Works and Transportation Subcommittee on Public Buildings and Grounds held a field hearing in Long Beach to explore the feasibility and desirability of constructing a new Federal building in concert with the city's downtown redevelopment project.

At that time we learned that if Congress continued to allow the Federal Government the option of leasing space in Long Beach, it could cost the American taxpayers literally millions of dollars in annual rent payments—and, we would not have anything to show for it in the end. Also, officials from the General Services Administration estimate that the lease which they were planning to sign for office space in Long Beach would cost a whopping $68.9 million over a 30-year period.

Currently, Long Beach has a vast array of Federal Government activities with offices located in rented office space scattered throughout the city, or located in the congested downtown section of Los Angeles, requiring considerable travel by persons having business with the Federal Government.

A new Federal building for the city of Long Beach will save time and money for area residents who must conduct business with the Government. And, most importantly, the cost of this new facility will quickly pay for itself many times over because we will no longer be spending millions in annual rent payments just to house the needed functions of the Federal Government.

As such, I hope this committee will continue to place this badly needed project in the high priority category as you enter a conference with the Senate and in future appropriation bills.

□ 1600

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I am happy to yield to the gentleman from California.

Mr. ROYBAL. Mr. Chairman, I thank the gentleman from California for his kind remarks concerning the work of this committee. They are deeply appreciated.

I would like to associate myself with the gentleman's remarks concerning the need for a new Federal building in downtown Long Beach, Calif. As most of you know, I am from southern California and I am personally acquainted with the business needs of this vital and expanding region. And, I am also familiar with the frustrations which our citizens experience when they are forced to fight the freeway traffic to get to downtown Los Angeles from Long Beach to conduct business with agencies of the Federal Government who are located there, or even worse, scattered in rented space in remote parts of the area.

I think that when the Subcommittee on Public Buildings and Grounds visited Long Beach, they did a great service not only to the citizens of Long Beach but, to our Nation as a whole, by pointing out the considerable savings which can be realized by the construction of a Federal building in Long Beach, and what this will mean to the citizens in terms of convenience, efficiency, and savings in conducting their own business. The savings to the Government alone are sufficient to warrant construction of this building, but coupled with the savings to private industry and the need to provide a convenient location to our citizens who deal with Federal agencies make its construction mandatory. I am pleased that both the authorizing and appropriating committees have included this building in their bills, and I strongly feel that this is one item which must remain through the conference procedure and in future appropriation bills.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman from California (Mr. ROYBAL) for his remarks.

Mr. ROYBAL. Mr. Chairman, I yield 3 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, the bill before us contains just over $100 million for operating expenses of the Office of Personnel Management. A fair portion of this money goes not for the central personnel management of the Federal Government but rather for the inflated salaries of a gaggle of political hacks who Director Donald Devine has brought on board. Last spring, Dr. Devine bragged to a right wing group of his success in bringing far right political activists onto the Federal payroll. Although his boast was then premature, Dr. Devine has since made good on his word.

The day after the elections, Dr. Devine issued a press release announcing his umpteenth staff reorganization. In this press release, Devine listed six new appointees. A few days later, another political appointment was made. These seven politicos join dozens of other rightwingers already on board. At a time when thousands of dedicated career civil servants are being separated through reductions in force or losing pay through furloughs, it is hypocrisy for the Reagan administration to be padding the payroll with job-seeking Republicans. And these people are being appointed at high salary levels, far higher than most of them earned in the private sector.

These last five individuals have been appointed to GS-14 jobs, which pay a minimum of $41,277 and a maximum of $53,661 a year. The law states that to be classified at this level a position must be made up of duties "which are to perform, under general administrative direction, with wide latitude for the exercise of independent judgment; work of exceptional difficulty and responsibility along special technical, supervisory, or administrative lines which has demonstrated leadership and unusual attainments." The qualifications standards require, generally, graduate training and strong experience. None of the candidates could qualify for such a position. The other three individuals are all paid at Senior Executive Service rates, which range from $56,945 to $58,500. So, just these eight individuals will cost the taxpayers between $377,000 and $444,000. As I said, there are numerous other similar people on board.

It makes a mockery of the merit personnel system for Dr. Devine to appoint wholly unqualified, political campaign workers to such high level jobs. Such appointments lead to public hostility toward the Federal bureaucracy in general, a misplaced but easily understood reaction. It leads to further isolation of the career staff from, the political appointees and reduces the efficiency of the Federal Government. The fact that Dr. Devine is reducing the budget for essential functions to create these unnecessary jobs to provide employment for Republican Party activists is nothing short of a scandal.

I strongly urge Chairman ROYBAL to audit Dr. Devine's appointments to OPM to see whether $100 million is needed. Without appointees like these, I suspect the taxpayers could save a lot of money.

Mr. Chairman, in 1978, Congress firmly decided that Federal employees who blow the whistle on waste, fraud and abuse would be protected from reprisals by agency management. To insure that whistleblowers had protection and to guarantee that their allegations would be seriously investigated, we created on Office of Special Counsel. This office was intended to be part legal aid office for the employee who might be the victim of an illegal reprisal and part prosecutor who was supposed to make sure that the management official who took the reprisal was punished and to monitor the investigation of the whistleblower charge.

We had high hopes and good intentions in 1978. Presidential disinterest or malice and bureaucratic sabotage have turned the Office of Special Counsel from a protector of employees to a protector of management; from a merit system cop into a sting operation. No congressional plan has been as ruthlessly torpedoed as the Office of Special Counsel. For this reason, I introduced H.R. 6392 in May to abolish the Office.

Since that time, Alex Kozinski, who converted the Office from one which was lackluster and directionless to one which was vicious and promanage-

ment, resigned, and President Reagan appointed a well-regarded former Justice Department prosecutor, K. William O'Connor, to succeed him. Mr. O'Connor asked for 6 months to put the Office in shape. Respecting this request, I will wait until spring to decide whether to push H.R. 6392 to enactment.

Still, I think it is worthwhile to talk about the failures of the Office of Special Counsel.

How should one measure the success of this office? I think looking at satisfied customers is one good way, since the Office was set up to help and protect Federal employees. The subcommittee has contacted and been contacted by a high proportion of those who have attempted to use the Office. The reality is that there are no satisfied customers. Those who got some action out of the Office did so because they had their own lawyers, or union lawyers, who investigated and prepared the case, not because the Office did any meaningful investigation. Useful field investigations have frequently been suppressed by higher management. Indeed, a number of good investigators left the Office because their investigative findings were ignored.

Perhaps, the Office should be measured by the number of cases it takes to the Merit Board. From April 1 of last year until November 1 of this year, stays have been asked for in four cases, corrective action in none. Four sets of allegations were sent to agencies for serious investigation. Disciplinary action was sought against four Hatch Act violators and one nepotism law violator. One Hatch Act case was thrown out by the Merit Board because it was so outrageously inadequate. This is the total output of a $4 million a year 100 employee office over 19 months. The Special Counsel invariably accepts the results of agency investigations. In one case, the Special Counsel accepted Treasury's whitewash of its savings bond division. The General Accounting Office in August issued a report which substantiated each of the charges raised by the whistleblower.

In its role as cop, the Office is supposed to force the investigation of the substance of whistleblower complaints. It does this by requiring agencies to investigate substantial complaints and then, in theory, by reviewing the agency report. This key authority has remained virtually unused. The statutory time constraints have been completely ignored.

The Subcommittee on Civil Service receives 20 or 30 letters a month from people who have had unsuccessful dealings with the Office of Special Counsel. Letter after letter tells of long delays after filing with the Special Counsel with no contact at all, followed by a letter dismissing the case for some technical reason. For example, one person wrote, "my complaints were dismissed in a one sentence letter without the Office of Special Counsel having even contacted me or any of my co-workers." Another letter tells of numerous futile phone calls to the Office of Special Counsel to find out the status of a case. Another says, "The response from the Office of Special Counsel was to sit on his case for over a year, and then finally do nothing." The subcommittee has dozens of similar letters.

With each of these letters comes a complete set of correspondence between the employee of the Special Counsel. Some of the allegations do seem a bit strange. Most of them, however, are well worthy of investigation. In my mind, calling agency management and asking them why they did what they did is not an investigation. In many cases, the Office of Special Counsel did not even do that. It just tries to figure out, through an unjustifiably rigid reading of the statute, how to dismiss the case for lack of jurisdiction. This exercise is conducted in complete ignorance of congressional intent in passing the statute.

In one case, the Office went even further. This was the highly publicized case of John Gingles from the Department of the Interior. Gingles was removed from the National Park Service because Jim Watt thought he was a Democrat, or worse, an environmentalist. Gingles sought his own counsel and went to the Merit Board. The Special Counsel, not surprisingly, sought to intervene. When they did, however, the Special Counsel wrote to the Interior Department to say, "it is not necessarily intervening on behalf of the complainant." The Special Counsel had so lost sight of its mission that it was no longer seeing injured employees as its clients.

This shift of bias grew worse, for in April of this year, the Special Counsel held a special seminar before FCC management on how to stay out of trouble with the Office of Special Counsel. It was like the Food and Drug Administration advising drug manufacturers on how to get their drugs approved. There is no authorization anywhere in the law for this sort of activity.

In a recent case, a Commerce Department employee went to the Inspector General to tell of fraud at the Knoxville Energy Expo 82 office. The Inspector General found gross misconduct and caused the removal of two malfeasors. The Commerce Department fired the whistleblower. She went to the Office of Special Counsel. In a meeting with the Commerce Inspector General, Kozinski ridiculed the whistleblower. Commerce Inspector General Sherman Funk is so mad about this that he included a section in his December 1, 1982, biennial report to Congress on how there is no protection for whistleblowers and how the "Special Counsel failed to fulfill adequately (its) statutory responsibility."

To be fair, the Special Counsel's Office has been troubled since its inception. There have been acute funding shortages, serious organizational problems, antipathy from the Merit Board, a lack of stability of leadership, and personality conflicts of truly Olympian proportions. It is only since President Reagan appointed Alex Kozinski in June 1981, however, that the Office lost sight of its mission and started working on protecting management from employees.

The Office of Special Counsel has had the highest turnover of any Government office over the last year and a half. Many long-time employees of the Office were fired by Mr. Kozinski. Others were forced out by his poor management or heavy-handed tactics. The incidence of prohibited personnel practices in the Office is very high, bringing up the ancient question of who guards the guardian. Mary Eastwood, the former Acting Special Counsel, was given a punitive transfer to San Francisco. It may be not surprising that the Special Counsel is blind to prohibited personnel practices in other agencies when they are so prevalent right in front of his own eyes.

Mr. Kozinski publicly argues that he has professionalized the Office. No doubt, the Office of Special Counsel could not be considered a professional law office prior to Mr. Kozinski's arrival. Mr. Kozinski established a work measurement system, built around a computer known as Oscar. While this machine tracks what each employee does in every 15-minute period, it is incapable of generating information requested by Congress on how many stays were requested in cases involving reprisals for whistleblowing, for example. This work measurement system is a classic case of measuring process, not output.

Most of these horror stories occurred during the fortunately short reign of Alex Kozinski or are a direct legacy of his mismanagement of the Office. It is too early to judge Bill O'Connor's performance as Special Counsel. He did seek and win a stay of removal in the case of Dr. Maxine Savitz who was being forced out of the Department of Energy because she did too good a job in running the energy conservation program, something which the current administration opposes. He has not, however, aggressively sought to reopen cases swiftly and inappropriately closed by the prior Special Counsel.

So, I will not today move to strike funding for the Office of Special Counsel. I hope the $4 million in this

bill will not be wasted as was a similar amount last year. But, I do want to serve notice on my colleagues that, unless there is a massive change in the performance and attitude of the Office of Special Counsel in the next few months, I will no longer sit still while the taxpayer's money is wasted.

Mr. GREEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to commend the Subcommittee on Treasury and Postal Operations and its distinguished chairman, Mr. ROYBAL, and to urge my colleagues to join me in support of this bill.

This legislation has a number of favorable features, but I would like to make special mention of a provision of great interest and concern to the citizens of New York City: The bill appropriates $15 million for reimbursements to New York City for the cost of extraordinary protection of foreign missions. Of this $15 million, $8 million is to be used to repay New York for the costs of mission protection in past years, and $7 million is for costs during fiscal year 1983.

I am very pleased by this action. I was actively involved earlier this year in changing the authorization levels for this function, which was taken on by the Federal Government in 1975 with the enactment of Public Law 94-96. For several years, the authorization of only $3.5 million per year for this Federal responsibility was inadequate to cover the actual costs of protecting missions by New York City. However, on June 15, the House passed H.R. 6254, which I introduced along with the gentlewoman from New York Ms. FERRARO, and the gentleman from New York, Mr. MOLINARI. Our bill raised the authorization level to $7 million per year, and permitted appropriations for repayment of claims from prior years of up to $17.7 million. That bill is pending in the Senate.

This change in the authorization, along with the increase in appropriations, will remove a burden New Yorkers have shouldered for too long. The subcommittee has wisely recognized the unfairness of making a locality shoulder a Federal responsibility, the need for diplomatic protection in a world increasingly plagued by terrorism, and the professionalism and cost-effectiveness with which the New York City Police Department carries out its duties in this area. I urge my colleagues to support the bill.

● Mr. ZEFERETTI. Mr. Chairman, I rise in support of H.R. 7158, the Treasury, Postal Service, and general government appropriations bill for fiscal year 1983. In particular, I want to express my support for the appropriation included in the bill for the Customs Service.

H.R. 7158 provides $528.7 million for Customs in 1983. This amount, which is $1.5 million more than appropriated in 1982 and almost $30 million more than the administration's request for Customs functions in 1983, is the minimum appropriation needed to maintain Customs personnel and services during 1983 at 1982 levels.

Under the administration's proposed budget for 1983, Customs would have to reduce its staff by some 2,300 positions or nearly 17 percent of its present authorized strength. These personnel cuts would include the loss of close to 900 inspectors and 100 patrol officers.

As chairman of the Select Committee on Narcotics Abuse and Control, I have no doubt that such a reduction would gravely weaken the Nation's primary border law enforcement agency at a time when the threat from illicit narcotics traffic is greater than ever before. According to the most recent Government estimates, retail sales of illegal drugs in the United States in 1980 generated $79 billion, a 22-percent increase over 1979. Most of these drugs are smuggled into the country. With the resources currently allocated to our law enforcement agencies, we are only interdicting approximately 10 percent of the total quantity of illicit drugs imported from abroad.

The Customs Service has made valuable contributions in our Nation's effort to stem the massive drug trade. From 1978 to 1981, the value of narcotics and other illicit drugs seized by Customs rose from $2 to $5.2 billion. Virtually all of the heroin seizures and a high percentage of the cocaine seizures by Customs in recent years have been made by inspectors. Customs patrol personnel have also played a vital role in interdicting drug traffic. It is difficult to understand how the administration could expect that Customs could improve, or even maintain, its drug interdiction record—not to mention its many other responsibilities—under the severe reductions proposed in the budget.

The bill before us restores the 2,300 Customs positions proposed for elimination by the administration, thereby avoiding any serious adverse impact on Customs drug control capabilities. For this reason, I urge my colleagues to vote for H.R. 7158. If we are to have any hope of significantly reducing the massive illicit drug trade, however, the resources of Customs as well as our other drug law enforcement agencies must be increased substantially. The President has now proposed to establish 12 new crime task forces around the country, in addition to the ongoing "South Florida Task Force," to focus on organized crime and drug trafficking. I understand that the administration will submit its plan to fund these task forces to Congress this week. While it remains to be seen whether the administration's proposals will reflect a serious commitment to provide adequate resources for a strong drug law enforcement program, I urge the House to assume a leadership role in assuring that our narcotics control agencies have the tools they need to do an effective job.●

● Ms. OAKAR. Mr. Chairman, I rise in support of H.R. 7158, the Treasury, Postal, General Government appropriations bill for fiscal year 1983. I commend Chairman ROYBAL and the Appropriations Committee for crafting a bill that balances the legitimate obligations of Government agencies with our present budgetary difficulties. I am particularly pleased with the funding levels for the Postal Service revenue foregone that will allow nonprofit charitable groups to mail at reduced rates. While this appropriation is not as high as many Members would like, it is a substantial improvement over the amount provided in the budget resolution.

This bill also contains sufficient funding to pay the Government's obligation to the civil service retirement system and the Federal employees health benefits program—two programs that are vitally important to millions of retirees. Most Members are aware of the continuing problem in the FEHBP and this appropriation will provide badly needed stability to the program.

I especially want to commend the committee for the bill report language that directs the continuation of VITA, the tax counseling program for the elderly; the continuation of the toll-free telephone assistance program; and the walk-in assistance program. The committee is to be commended for providing an additional $50 million to continue these worthwhile programs that are of such assistance to our taxpayers, especially the elderly.

Mr. Chairman, I hope the House will support H.R. 7158.●

● Mr. LEATH of Texas. Mr. Chairman, yesterday the House approved the Edgar amendment to the Treasury-Postal appropriations bill, H.R. 7158, which provides that funds available to the General Services Administration shall not be used to contract for jobs which are presently being performed by individuals as Federal civil service employees.

The Edgar amendment will stop the contracting out of some 13,000 jobs in the GSA during this fiscal year. I am told by representatives of the veterans organizations and the American Federation of Government Employees that 80 percent of the jobs are held by veterans, under a provision of law which reserves these jobs for veterans so long as veterans are available. I am referring to section 3310 of title 5, United States Code, which was enacted in 1966, to help veterans of the Vietnam era make a successful readjustment to civilian life following their service.

It came as a shock to learn that the contracting out of these jobs has already begun in the GSA and, unless Congress acts promptly, it will be too late. Even more incredible is the fact that this was going on during the very week that the eyes of the Nation were riveted on Washington on Veterans Day and the dedication of the Vietnam Veterans Memorial in memory of the more than 57,000 individuals who died in Vietnam.

BOB EDGAR'S amendment is in line with an amendment that I offered, which has now become law, Public Law 97-306, which prohibits contracting out within the Veterans' Administration's Department of Medicine and Surgery for services which are determined to be direct patient care or incident to direct patient care. The Office of Management and Budget has shown a zealousness to carry out its circular A-76, which is successful, would have seriously impaired the capacity of the Veterans' Administration to provide the quality of medical care that veterans deserve and Congress intended.

In the same vein, BOB EDGAR'S amendment will serve notice to the Office of Management and Budget that Congress does not tolerate contracting for civil service jobs which are reserved for veterans. I commend the House for promptly approving the Edgar amendment, and urge the Senate to do likewise. Time is of the essence and the Edgar amendment must be aproved without delay.

Mr. Chairman, the message the House is giving the executive branch on the contracting issue is this, were veterans are concerned, there will be no contracting out for services—there will be no loss of jobs. In other words, the message is we are going to protect veterans and the programs that are designed to enhance the lives of those who served in defense of their country.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of the amendment to H.R. 7158 dealing with funding for the toll-free telephone assistance program of the Internal Revenue Service.

There is a recognized need to continue this necessary program to the taxpayers and we have provided $50 million to maintain this service at the current level. Nevertheless, IRS announced on November 5 that they would go ahead with a plan to dismantle the toll-free telephone program.

Our voluntary compliance system depends upon each citizen's understanding the tax law and assessing their own tax. Tax forms have become more complicated and difficult to understand as tax laws have become more complex. The toll-free telephone assistance program was designed to meet the need for tax assistance. The Federal Government has a responsibility to provide this kind of assistance.

If we allow the administration's plan to be adopted, many tax law questions no longer will be answered. Only 12.6 million calls would be answered in fiscal year 1983, compared to 36 million in fiscal year 1981.

An IRS study tells us that 38 percent of the taxpayers who contact IRS by telephone have adjusted gross incomes of $15,000 or less. About 11 million taxpayers who had tax law questions fell into this category in fiscal year 1981. These taxpayers, who would have more difficulty understanding an IRS publication and would have less financial ability to turn to a commercial preparer, would probably go unserved if toll-free telephone assistance were curtailed as the administration proposes.

There is no doubt in my mind that this would have a negative affect on voluntary compliance. In an October 29, 1981, memorandum to the Deputy Secretary of the Treasury, the Commissioner of the Internal Revenue Service said that if IRS did not provide answers to tax law questions, "large numbers of taxpayers can be expected to interpret the law in a way favorable to themselves, with little likelihood of detection," and "a significant decline in voluntary compliance and a concurrent decline in revenues may result."

I think it would be penny-wise and pound-foolish to adopt a measure that would result in a loss of revenue at a time when we are facing the biggest deficit in history.●

● Mr. FROST. Mr. Chairman, I am in opposition to the Dornan amendment which proposes to prohibit the use of funds to deny tax exemptions to private schools that have racially discriminatory policies. The Dornan amendment should be rejected because to pass it would be to jeopardize the progressive reputation of this body when it comes to matters of civil rights.

The point has been made during this debate that most of the private schools that now qualify for tax exempt status are not havens for bigots but are in fact providing an alternative source of traditional education. This may be true. But one or two of the schools in question—the Bob Jones University being one of them—have racially discriminatory admission policies. Minority students who are able to pay the tuition and who can meet all other standards are denied admission to these schools. What Mr. DORNAN proposes to do with his amendment is to protect the one or two bad apples in the lot by allowing them to continue to qualify for preferential tax status. More important, by designing the amendment as he has, Mr. DORNAN seeks to preempt the judiciary on this issue by denying funds to implement any future Supreme Court decision that allows the IRS to continue demanding equal opportunity in the private school system.

Moreover, Mr. Chairman, the proponents of this amendment have presented it under the guise of protecting legislative prerogatives. To discuss the Dornan amendment in terms of anything but its civil rights implications is to deliberately mislead the American public as to its true effects. The Dornan amendment will force our Government to subsidize racial segregation in the private school system. A tax exemption is nothing more than financial assistance. This amendment says in effect that it is the policy of this Government to underwrite the prejudiced policies of private schools. If it is passed, an official stamp of approval will be extended to this and all other forms of bigotry that are not specifically prohibited by law.

In the final analysis, this is a civil rights amendment that will have a regressive impact on the human rights record of our country. It should be soundly defeated.●

Mr. ROYBAL. Mr. Chairman, I have no further requests for time.

Mr. MILLER of Ohio. Mr. Chairman, I have no requests for time, and I yield back the balance of my time.

Mr. ROYBAL. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

UNITED STATES CUSTOMS SERVICE

SALARIES AND EXPENSES

For necessary expenses of the United States Customs Service, including purchase of two hundred passenger motor vehicles for replacement only, including one hundred and ninety for police-type use; acquisition (purchase of 1), operation and maintenance of aircraft; hire of passenger motor vehicles and aircraft; and awards of compensation to informers, as authorized by section 1 of title VI of the Act of June 15, 1917 (22 U.S.C. 401); $528,700,000, of which not to exceed $150,000 should be available for payment for rental space in connection with preclearance operations: *Provided*, That none of the funds made available by this Act shall be available for administrative expenses to pay any employee overtime pay in an amount in excess of $25,000: *Provided further*, That the Commissioner or his designee may waive this limitation in individual cases in order to prevent excessive costs or to meet emergency requirements of the Service: *Provided further*, That none of the funds made available by this Act shall be available for administrative expenses to reduce the number of Customs Service regions below nine during fiscal year 1983 without advance approval from both House and Senate Commitees on Appropriations: *Provided further*, That none of the funds made available by this Act may be used for administrative expenses in connection with the proposed redirection of the Equal Employment Opportunity Program.

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On page 4, line 22, strike out "$528,700,000," and insert in lieu thereof the following: "$548,700,000, of which not to exceed $30,000,000 shall be available for Project Exodus, and".

Mr. CONTE. Mr. Chairman, I am offering this amendment today at the request of the President and the Secretaries of Defense and Treasury. The amendment simply provides an additional $20 million to the U.S. Customs Service to continue and expand Project Exodus, a program to prevent the illegal export of critical and high-technology material to the Soviet Union and her allies.

The U.S. Customs Service is responsible for the enforcement of laws governing merchandise exportation. Included in this category is technology consisting of equipment or components of such a sophisticated nature that their shipment or diversion to unfriendly countries could pose a threat to the security of the United States. This is particularly true for electronic equipment, manufactured for civilian use which also has military applications.

All of us here are aware that the Soviet Union, for many years, has undertaken a well-coordinated effort to obtain sophisticated U.S.-manufactured or designed technology to enhance their own economic and defense capabilities. In recent years, this problem has reached critical proportions for two reasons: First, our sophisticated technology is of a very high quality; and second, the tremendous research and development costs which our adversaries would have to cover to develop a comparable technological level.

Sometimes companies in our country, because of financial pressures, get involved in questionable sales, or involved in situations where technology is unknowingly diverted. Sometimes they are the victims of clandestine operations which result in critical technical data being transferred to adversaries.

For these reasons, Project Exodus was begun in October of 1982, and has since picked up its operational pace following the development of a system based on intelligence activities. To date, customs officials have seized aircraft parts, communications equipment, computer parts, and various pieces of technical data all over the United States.

The magnitude of this problem is great and is growing. The amount of money being requested at this admittedly late date will allow customs the needed resources to adequately support an expansion of Project Exodus in fiscal year 1983 to a more effective national program.

The $20 million contained in this amendment, I am advised, will be fully offset by a $30 million reduction in the Defense Department's fiscal year 1983 budget.

Mr. Chairman, we have all read of this problem and we have heard statements from officials on its magnitude. The President and his Secretaries of Defense and Treasury consider it a national security question and I agree with them.

I say let us go ahead and give the needed resources to customs and support their efforts, and at the same time, communicate to them that we will want to be kept abreast of this program, and that we expect to discuss in upcoming fiscal year 1984 appropriations hearings, the progress of the program's operations.

□ 1610

I would like to take this opportunity to compliment Chairman ROYBAL for his able leadership in running that committee.

Twenty-four years ago I served under the great chairmanship of Tom Steed. ED ROYBAL is following in Tom Steed's tradition. He is a good man, a good leader.

Also CLARENCE MILLER, ranking minority member, has done a very conscientious, hard-working job in making sure the dollar was well spent and there was no waste in the budget. I want to compliment both these men.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words.

After those very nice words I must rise in support of the amendment.

Mr. Chairman, I recognize that the loss of American technology through illegal exports is a very serious problem and should be a high priority concern of the Government. I might point out that the committee included approximately $8,000,000 for this program in the fiscal year 1982 bill which was not requested by the administration. In addition, even though the administration did not request any funds for this program in fiscal year 1983, the committee has included approximately $10,000,000 and 300 positions to continue this important program.

Now, the administration is requesting $30,000,000 for the program, but let me tell you how it happened. On November 12, 1982, the President signed a budget request for $30,000,000 for the program and requested 292 positions. The Treasury Department did not contact the Appropriations Committee or provide any information or justifications for the request until November 30, 1982. The committee has not had an opportunity to hear testimony on the program and no guidelines have been prepared, so far as we know, so the Customs Service personnel in the field can properly administer the greatly expanded program. In addition, the informal budget justification material has some internal inconsistencies within the document itself.

I do not think it is the proper way to appropriate public funds to agree to amendments that are handled in such a cavalier fashion.

I believe, Mr. Chairman, it is time the committee put the Department of Treasury on notice that we expect the Department to provide adequate justifications, including appearances before the committee in a timely manner.

I realize, Mr. Chairman, these things could happen and there are problems and realizing that some problems must have arisen I wholeheartedly support the amendment that has been presented. I think it is most important and most necessary. I sincerely hope that it meets with the agreement of the Members of the House.

AMENDMENT OFFERED BY MR. KAZEN TO THE AMENDMENT OFFERED BY MR. CONTE

Mr. KAZEN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. KAZEN to the amendment offered by Mr. CONTE: Amend the Conte amendment by striking out the figure "$548,700,000" and insert in lieu thereof the figure "$553,700,000".

Mr. KAZEN. Mr. Chairman, I thoroughly agree with the amendment proposed by the gentleman from Massachusetts (Mr. CONTE).

I think that that project is a very worthy project and we do have to have the personnel.

May I also call attention to another place where we must have some additional personnel, and that is in the Customs Service. They are one of the services in this country that bring in revenue. Every single person that we put on the Customs Service generates income for the Treasury of the United States.

Down along the Texas-Mexican border, and I am sure along the entire Mexican border with the United States, there is now a shortage of Customs personnel. However, I can only speak for my district. I have the privilege of representing the largest inland port in the United States which is Laredo, Tex. I also have a second port at Eagle Pass.

We have just built a brandnew international bridge with the entire Federal complex, consisting of all services for a port of entry in Laredo. So we now have two international bridges connecting Mexico and the United States at that point.

I am told that this last week during the Thanksgiving holidays there were lines of cars as long as 2 miles waiting to come into the United States because only two or three lanes were open on the bridges on the American side for lack of personnel.

All I am doing in this amendment is adding $5 million to the figure in the Conte amendment, but these $5 million I would hope would be used, if adopted by the Congress, for addition-

al personnel on the Mexican border which are very sorely needed.

I sincerely ask for your particular attention to this matter because it is something that is needed. We have lots of crossings and a tremendous amount of freight that moves accross the border and we cannot man our facilities. Every single person that we put on there will generate income for the Treasury.

It is a shame to hold up the people who come into the United States, whether they be our neighbors from Mexico or our own people coming back from Mexico and submit them to the frustration of having to wait a long time to get cleared into the United States.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman.

Mr. ROYBAL. Do I understand the gentleman correctly when he states that his amendment provides for $5 million additional?

Mr. KAZEN. That is correct.

Mr. ROYBAL. And that that money is to dispense or pay for personnel along the border?

Mr. KAZEN. That is correct, Mr. Chairman.

I cannot, as you well know, specify in the bill that particular provision. But in order to make legislative history, this colloquy between you and me should serve as directive to the Customs agency that this is what this Congress intends these $5 million to be used for.

Mr. ROYBAL. Mr. Chairman, the gentleman from Texas and I are totally in agreement. We both know the situation at the border.

□ 1620

He has a problem in his own district and adjacent to his district. I have a problem in the southern part of California. The problem is exactly the same. We do know that 2- and 3-mile long lines are not unusual on any holiday and that more personnel are needed not only during those times but during the week, as well, so that these people who cross this border can be quickly expedited, and their needs met with efficiency. The need for more personnel along the border States is apparent more and more every day.

So I agree with the gentleman that this money should be used for that purpose, and I sincerely hope that that is the end result.

May I also state that Customs has problems throughout its area of operations. One of the potential problems that we envision is at Los Angeles International Airport where Federal inspections of arriving passengers currently take place at two locations—one at the Western Airlines facility and the other at Satellite 2. Presently, Mexicana Airlines, which clears Customs at the Western Airlines facility, is on strike and thus, operations at that particular facility have been reduced significantly. Because of this decrease, Customs officials have closed the facility from 10 a.m. to 4 p.m. and international flights arriving at the Western Airlines terminal presently clear Federal inspections at Satellite 2. While this represents an inconvenience for those passengers, this appears to be a temporary situation and an efficient utilization of customs personnel. However, when Mexicana Airlines resumes operations, we fully expect Customs to again open the Western Airlines facility between 10 a.m. and 4 p.m. and to resume those inspections at that facility.

Prior to the strike by Mexicana employees, between 25 and 30 percent of the international passengers clearing Customs at Los Angeles International Airport were processed at the Western facility. I say this to express my concern with regard to the overall problems that confront the Customs Department, as well as problems at the border in which we are in total agreement. I too hope that the money proposed by your amendment is used for additional border personnel.

Mr. KAZEN. I thank the distinguished gentleman and I appreciate his support. Let me, however, make this observation: That is not the situation that exists only on holidays. In these structures that I am talking about in Laredo, we are now closing one of the bridges for a considerable number of hours every single day because of the lack of personnel. If we had the personnel, those bridges would be open a lot longer, and it would expedite a lot more traffic. I would appreciate your support and vote for my amendment.

Mr. MILLER of Ohio. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The $20 million that is allowed by that amendment is not additional spending. This funding was deleted from the Defense appropriation bill in markup, and is being transferred to this particular bill, so it does not represent an overall spending increase. It will not increase the deficit by being in this bill instead of the Defense bill. We have the Customs Service in our bill, and I support the amendment. I think most everyone is deeply concerned about the high technology products that are moving from this country into the U.S.S.R. It is happening frequently. Many of you are acquainted with the Kama River truck plant, with the ball bearing plant, with the problems that we had at the time. In the case of this truck plant, the Russians were not to use the engine-building capabilities of the plant for military use, but the engines were found in trucks that were moving troops into Afghanistan. So I think it is very important that we do all we can in order to hold back the high technology on which we have spent billions of dollars in research in this country from moving to the Soviet Union and other Communist countries. Therefore, I support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. KAZEN) to the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. CONTE), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. WYDEN

Mr. WYDEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WYDEN: Page 5, line 14, insert *"Provided further,* That none of the funds made available by this Act shall be used to close the United States Customs Service Office at Portland, Oregon, or to reduce or consolidate with another office the personnel, programs, or functions of such office" before the period.

Mr. WYDEN. Mr. Chairman, my amendment would prohibit the Customs Service from proceeding with any plans to consolidate the appraisement section of the Oregon division office with any other office, relocate import classification specialists from the Oregon office or downgrade the Oregon office in any other manner.

The Oregon District Office—which is responsible for processing and collecting duties on all goods flowing into Oregon, southwest Washington and Alaska—has actually experienced a sharp increase in activity in recent years. Duties collected rose from $89.8 million in 1978 to $120 million in 1980 and then took a 35-percent jump to $161.5 million in 1981.

In 1979 and 1980, 25 Customs Service districts showed a decrease in net dollar collections and 21 experienced an increase. Only three of these had a larger percentage increase than Oregon.

It is my understanding that the 1980–81 percentage increase was again well above the national average and was, in fact, exceeded only by Houston, Tex. In 1980—before the duties collected jumped 35 percent the following year—the Oregon office was the 20th largest in the country.

Any consolidation of the Portland Customs office with any other office would result in increased costs and time delays for Portland traders. Many of the Customs officials in Portland have established a high level of

expertise in handling long-established Portland product lines.

The ports of the Columbia River have a long history of excellent service in a timely and cost effective manner to importers and exporters alike.

Beyond the statistical picture, any downgrading of the Customs Service operations in Oregon would be a serious blow to our efforts to become a major international trading center. Oregon's economy is in desperate condition and—because of our heavy dependence on the housing and timber industries—we see very little light at the end of the tunnel.

What we need to do above all is diversify our economy and lessen our reliance on timber and housing. Because of our geographical location and our tremendous potential for increased waterway commerce, we feel that our best bet is increased international trade with the Pacific Rim countries.

The Columbia River system is a distinct transportation area and unique trade gateway. There is a clear need to maintain a full-service Customs presence to serve the needs of the ports of Oregon and southwest Washington.

To succeed in our efforts to diversify our economy, we need to make sure that Oregon develops and maintains the ability to function as a full-service international trading center. In order to increase goods flowing out, we also need to be able to handle goods flowing in quickly and efficiently. Any move by the U.S. Customs Service to downgrade or otherwise reduce their presence in Oregon would be a serious blow to our efforts.

I would like to in particular commend the chairman, the gentleman from California (Mr. ROYBAL), and his staff for their cooperation. The gentleman from Ohio (Mr. MILLER) has been consulted on this, as well. I urge it upon my colleagues.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to the chairman.

Mr. ROYBAL. Mr. Chairman, I would like to say to the gentleman that we will look into this matter very closely and examine whatever problems he may have in Oregon.

However, I also wish to assure the gentleman that we have no objections to his amendment at this time.

Mr. WYDEN. I very much appreciate the chairman's support and assistance in this area.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to my friend, the gentleman from Oregon.

Mr. AUCOIN. Since the gentleman from Oregon, my colleague from across the Willamette River, has just won the support of the chairman of the committee, I shall be short and brief. I just want to say that this amendment is very important to the whole inland Columbia River system, which is an international trade system. And it is very vital that we have the Customs' support to serve the capacity that the Columbia River represents and its potential in international trade. The Portland office is a productive office, and for that reason this language is needed.

Mr. WYDEN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon (Mr. WYDEN).

The amendment was agreed to.

POINT OF ORDER

Mr. FRENZEL. Mr. Chairman, I make a point of order against the language in lines 6 through 10 on page 5 of H.R. 7158. These lines constitute legislation on an appropriation bill and are, therefore, in violation of clause 2 of rule XXI. If the Chair will permit me, I would like to be heard on my point of order.

The CHAIRMAN. The Chair will advise the gentleman from Minnesota that the paragraph in question has already been read and amended. Therefore, a point of order to the paragraph comes to late.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FRENZEL. Mr. Chairman, at what point would a point of order have been timely?

The CHAIRMAN. The Chair will advise the gentleman that a point of order would be in order between the time when the paragraph had been read by the Clerk and the time when an amendment to that paragraph had been offered or the Committee had gone to another paragraph.

Mr. FRENZEL. Mr. Chairman, I was on my feet when the previous amender was recognized, and I do not recall having heard that language being read. Can the Chair give me some assurance on that?

The CHAIRMAN. The Chair will advise the gentleman that the first amendment offered to the paragraph in question was offered by the gentleman from Massachusetts (Mr. CONTE). The Chair observed the gentleman on his feet, although not pressing a point of order, at the time that the amendment to the amendment was offered, but not at the time the original amendment was offered.

Mr. FRENZEL. And to be timely, my point of order would have to have been made before the gentleman from Massachusetts offered his amendment?

The CHAIRMAN. The gentleman is correct.

Mr. FRENZEL. I thank the Chair.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TAXPAYER SERVICE AND RETURNS PROCESSING

For necessary expenses of the Internal Revenue Service for processing tax returns, revenue accounting, providing assistance to taxpayers, statistical reporting, and hire of passenger motor vehicles (section 1343(b) of title 31, United States Code); $1,000,778,000, of which not to exceed $40,400,000 shall remain available until expended for systems modernization initiatives.

AMENDMENT OFFERED BY MR. BARNES

Mr. BARNES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARNES: On page 6 at the end of line 23 strike out the period and insert the following: ": *Provided*, That no funds made available by this Act be used to reduce the taxpayer service programs below fiscal 1982 levels, including but not limited to, toll free telephone tax law assistance and Internal Revenue Service walk-in assistance available at Internal Revenue Service field offices.".

□ 1630

Mr. BARNES. Mr. Chairman, this amendment which I offer on behalf of the gentleman from Washington (Mr. DICKS) and myself is intended simply to reinforce the Appropriations Committee's decision that the taxpayer assistance programs operated by the Internal Revenue Service should be continued at their fiscal 1982 levels. These programs, as the Members know, include the toll-free telephone lines which millions of Americans use at tax time, the walk-in taxpayer assistance at IRS offices, the volunteers in tax assistance program, and the tax counseling for the elderly program.

In fiscal 1982, taxpayer services activities assisted more than 41 million people. These programs have saved Americans billions of dollars which might otherwise be spent on expensive tax consulting services. They also provide probably the only means of taxpayer assistance available to millions of senior citizens, poor people, and others on fixed incomes who simply cannot afford private help.

At a time when significant changes have been made in the Tax Code by the major tax bills that we passed in 1981 and again this year, and when the continued impact of the recession makes it even more difficult for many Americans to afford to hire somebody to help them with their tax preparation, it is vital that the Federal Government continue its longtime role in helping people decipher the obvious complexities of our tax system.

H.R. 7158, the Treasury-Postal appropriations bill, contains funds for the continued operation of these taxpayer service programs. The committee report strongly endorses the need for them to encourage continued voluntary compliance with our tax system which allows the Government of this country to function.

I offer this amendment along with the gentleman from Washington (Mr.

DICKS) because the administration has unfortunately indicated that it wishes to drastically curtail taxpayer assistance in fiscal 1983. The administration's budget request assumed a reduction of 1,691 positions and slightly over $50 million currently devoted to these programs, which would obviously drastically cut taxpayer assistance and virtually eliminate the toll-free assistance advice to the average taxpayer on tax problems.

Mr. Chairman, my amendment is a technical one which enumerates taxpayer assistance programs, more specifically in addition to what is already mandated in the appropriations bill. It does not provide additional funds beyond what is already in the bill. But it is intended simply to give this House an opportunity to go on record against these cuts in taxpayer assistance now and to discourage the administration from such cutbacks in the future.

To my knowledge the administration has not ruled out attempting such reductions in the future, and an "aye" vote for this amendment is a way to insure that these reductions will not be attempted.

I want to commend the Appropriations Committee and the subcommittee chairman for their strong leadership on this matter, urge the approval of the amendment.

And I want to yield now to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the committee as well for their diligence and activity on this matter. Clearly a voluntary compliance system which our tax system is requires that the taxpayers be able to understand the Tax Code, and having a system that provides this kind of advice and assistance to taxpayers I think is absolutely essential basically because I think even most lawyers find the Tax Code to be very complicated.

So I want to join with the gentleman in sponsoring this amendment. I think it is a good one. I think it will clearly demonstrate the will of this House to keep these taxpayer assistance programs in place.

Mr. Chairman, I rise in strong support of the section of this bill concerning funding for the toll-free telephone assistance program of the Internal Revenue Service.

We, the Congress, through the actions of both the House and Senate Appropriations Committees, have recognized the need to continue this necessary program to the taxpayers and have provided $50 million to maintain this service at the current level.

Yet despite this action, IRS announced on November 5 that they would continue with their plan as originally submitted and dismantle the toll-free telephone program.

Mr. Chairman, our voluntary compliance system depends upon each citizen's understanding the tax law and assessing his/her own tax. The tax return has become more complicated and difficult to understand as the tax law has become more complex. The toll-free telephone assistance program has evolved in response to the need for tax assistance as recognized long ago by Congress, the public demand for such assistance and the basic tenent that taxpayer assistance fosters voluntary compliance. The Federal Government has a responsibility to provide this assistance as an essential ingredient in the administration of the tax laws.

If the administration's plan is accepted, and tax law questions are no long answered, only 12.6 million calls would be answered in fiscal year 1983 as comapred to 36 million in fiscal year 1981.

An IRS study has found that 38 percent of the taxpayers who contact IRS by telephone have adjusted gross incomes of $15,000 or less. About 11 million taxpayers who had tax law questions fell into this category in fiscal year 1981. These taxpayers, who would have more difficulty understanding an IRS publication and would have less financial ability to turn to a commercial preparer, would probably go unserved if toll-free telephone assistance were curtailed as the administration proposes.

Such a severe cut could also be expected to impact adversely upon voluntary compliance. In an October 29, 1981, memorandum to the Deputy Secretary of the Treasury, the Commissioner of the Internal Revenue Service stated that if IRS did not provide answers to tax law questions, "large numbers of taxpayers can be expected to interpret the law in a way favorable to themselves, with little likelihood of detection", and "a significant decline in voluntary compliance and a concurrent decline in revenues may result."

In light of the $150 to $200 billion projected deficit for fiscal year 1983, as well as the clear intent of Congress to maintain this program at the present levels, I find it unconscionable that the IRS would continue to proceed with their plan to eliminate this vital service to the taxpayer.

Mr. WOLF. Mr. Chairman, will the gentleman yield?

Mr. BARNES. I yield to my friend from Virginia.

Mr. WOLF. Mr. Chairman, I rise in support of this amendment to H.R. 7158 to earmark funds for the IRS taxpayer assistance program. I would like to urge my colleagues to join me in support of this amendment.

During the past 2 years, we have seen the largest tax rate reduction in history and one of the largest revenue compliance and tax increase measures passed into law. In view of these developments, I feel strongly that this is a crucial time to fund this program. I support this language to earmark specific funds in the appropriations bill to cover this assistance program.

Although I realize the accompanying committee report is very explicit in its support of this program, I believe this amendment offers needed protection for the program and guarantees its continuation.

In fiscal year 1982, the taxpayer assistance program responded to 41.4 million individuals. Our Government depends on taxpayers' voluntary compliance with tax laws so it is vital to continue those assistance tools which are designed to expedite this process.

I urge that the Members of this body recognize the important and invaluable service provided by this program and vote to insure its continuation.

Mr. BARNES. I thank the gentleman for his comments. I hope the gentleman is correct about the administration's position.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. BARNES. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. I thank the gentleman for yielding.

I would like to ask just a couple of questions about the amendment. We on the subcommittee were deeply concerned as is the gentleman about maintaining certain of these services and expressed ourselves. We were equally concerned that we not do anything to inhibit the modernization of services, whether there be a move to computer telephone call-ins, for tape recordings, this sort of thing.

As I understand the gentleman's amendment, there is nothing here that would prohibit that, and there is no personnel service.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BARNES) has expired.

(At the request of Mr. CAMPBELL and by unanimous consent, Mr. BARNES was allowed to proceed for 1 additional minute.)

Mr. CAMPBELL. Mr. Chairman, if the gentleman would yield further, as I understand the gentleman's amendment, there was no floor on personnel. But the service has to be maintained which would not prohibit modernization and cost savings if that were the direction chosen; is that correct?

Mr. BARNES. The gentleman is correct. The amendment refers only to the taxpayers service programs. It does not refer to how those programs would be implemented or carried out. It simply would require that they could be continued, that the service be continued at the 1982 level. The funding has been provided of course by the committee.

Mr. CAMPBELL. I thank the gentleman for his explanation. I think he has a good amendment.

Mr. BARNES. I thank the gentleman.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to inform the gentleman from Maryland that the committee added $50 million to the IRS budget and wrote language in the report which accompanies the bill which mandates that the taxpayer assistance program be maintained at the 1982 level of operations.

Now, this proposed language is inserted in the report and in this instance it would be in the bill itself.

It should not be necessary to do what the gentleman is now intending to do, because the action of the committee clearly implies that those things that he seeks to gain will be done.

However, I still feel that the gentleman is correct. In this instance the best way to do things is to go the direct route, include the language in the bill.

Mr. HOYER. Mr. Chairman, I would like to commend the gentleman from Washington and the gentleman from Maryland for their efforts to preserve this IRS toll-free telephone assistance program which services millions of American taxpayers.

The Congress has provided $50 million to maintain this service out of the recognition that our overly complicated Tax Code often confuses and misleads the taxpayer. In fact, the 36 million Americans who used the service in fiscal year 1983 are testament to the confounding nature of our tax laws.

The expenditure for this service is a cost-effective one. By their own admission, the IRS anticipates large numbers of taxpayers who will interpret the law to their own advantage if this service is curtailed.

We are fortunate to have a staff at IRS that is extremely capable and efficient in answering the myriad of questions posed during the reporting period. These employees and this vital service are not only worth their cost, they are essential to prevent noncompliance, costly errors, and late returns. In that sense, the $50 million budgeted for this program is a good investment with an excellent return on the dollar.

Let me again thank the gentleman from Washington and the gentleman from Maryland for their efforts to insure this program continues, and I urge my colleagues to support this excellent amendment.

Ms. FERRARO. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Maryland to insure continuation of the toll-free telephone assistance program of the Internal Revenue Service (IRS).

We, the Congress, through the actions of both the House and Senate Appropriations Committees, have clearly stated the need to continue this necessary program to the taxpayers and have earmarked $50 million to maintain this service at the current level. Yet despite these actions, this administration announced on November 5 that it would continue with its plan to dismantle the toll-free telephone program.

As chairman of the subcommittee with jurisdiction over Federal personnel levels, I have been extremely concerned about the effects of this administration's personnel cutbacks on the delivery of vital services. The service provided through the toll-free system has been used by taxpayers who want to comply with our complex tax laws, but cannot afford the luxury of tax accountants on retainer. It is used by the elderly and by those with low incomes. It allows Americans to comply with the law and to pay their fair share of taxes.

When the Reagan administration began cutting back taxpayer services last year, I protested the closing of an office in Jackson Heights, N.Y. In response to my protest, the IRS District Director wrote that he intended:

> To expand our Volunteer in Tax Assistance (VITA) and Tax Counseling for the Elderly (TCE) programs. The expansion of these services, *supplemented by our toll-free telephone assistance system will not only be responsive to taxpayers needs,* but will greatly minimize any additional travel for the public. (emphasis added)

This commitment now appears to have joined the long list of administration promises which have become meaningless. Despite clear language in the committee report in support of the existing toll-free telephone assistance, the administration would like to ignore the will of Congress.

I support the toll-free assistance system which has proved so effective in the past, and I support the gentleman's amendment to statutorily insure the continuation of the system.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. BARNES).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF MANAGEMENT AND BUDGET

SALARIES AND EXPENSES

For necessary expenses for the Office of Management and Budget, including hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109, and not to exceed $2,500 for official representation expenses; $33,000,000: *Provided,* That none of the funds made available by this Act may be used by the Office of Management and Budget to interfere with the rulemaking authority of any regulatory agency.

□ 1640

POINT OF ORDER

Mr. HORTON. Mr. Chairman, I rise to make a point of order against the limitation on the use of funds by the Office of Management and Budget contained in lines 18 through 21 on page 14.

The CHAIRMAN. The gentleman will state his point of order.

Mr. HORTON. Mr. Chairman, this limitation provides "that none of the funds made available by this act may be used by OMB to interfere with the rulemaking authority of any regulatory agency."

This proviso is subject to a point of order because it is legislation in an appropriation bill, and therefore violates clause 2 of rule XXI of the House of Representatives. That clause states, in pertinent part, "nor shall any provision in any (general appropriation) bill or amendment thereto changing existing law be in order," with one exception which is not relevant here.

I should say at the outset that in my judgment the language that I am referring to is meaningless because it does seek to prevent OMB from doing something which it is not entitled to do in the first place. OMB, like every other agency in the executive branch, can perform only those activities which the Constitution, statutes and Executive orders make permissible. None of these authorities gives OMB specific authority or power to interfere with any other agency's rulemaking activities.

However, I recognize that it might be construed that this restriction would affect the way in which OMB carries out its business, or the words would not appear in the bill. The key word is "interfere," and how it might be or could be interpreted.

Mr. Chairman, I would suggest that the word "interfere" might be easily interpreted to change existing law. Under the Paperwork Reduction Act of 1980, no agency can require anyone to comply with a form requesting information from more than nine persons unless that form has been approved by OMB. Some forms are, of course, designed to fulfill some regulatory objective. To the extent that OMB rejects or modifies a form which was originated for a regulatory purpose, it might be thought to be "interfering" with rulemaking authority. More specifically, if a form is proposed as a part of a regulation, OMB might file public comments on the form, and if the OMB Director finds that the agency's response to his comments were unreasonable, he could disapprove the form. This might be, of course, interpreted as "interference."

Furthermore, under Executive Order 12291, entitled "Federal Regulation," OMB is given authority to require agencies to comply with various

administrative requirements before proposing certain regulations, and to consider advice on those proposed regulations before issuing them in final form. Although the executive order is carefully written to indicate that OMB's authority exists only "to the extent permitted by law," activities under the order might also be thought by some people to be "interference" in agencies' rulemaking authority.

In my judgment, these authorizations for OMB to have some role in the rulemaking process allow perfectly legitimate exercises of the President's powers—both his general power to take care that the laws be faithfully executed, which is, of course, article II, section 3, of the Constitution, and his specific responsibility to provide central management of the executive branch for the purpose of insuring that regulations are written in a consistent way which does not put excessive paperwork demands on the American people. But to the extent that the word "interfere" has any meaning, Mr. Chairman, that proviso in the bill would modify provisions of both the Paperwork Reduction Act of 1980 and Executive Order 12291. It would also restrict the discretion of executive officers to a degree that may be fairly termed to be a change in policy. This is the sort of action which is clearly legislative and, therefore, violates clause 2 of rule XXI.

The CHAIRMAN. Does the gentleman from New York wish to be heard on the point of order?

Mr. ADDABBO. Mr. Chairman, I rise in opposition to the point of order.

Mr. Chairman, the language on page 14, lines 18 through 21, is strictly a limitation—strictly a limitation on the Office of Management and Budget.

This bill includes the appropriation for the Office of Management and Budget and, therefore, the Congress and this committee has the right to limit the use of those funds. If the gentleman from New York, my colleague (Mr. HORTON), has any question as far as the interpretation of the word "interfere," we can easily establish legislative history today. It is a simple matter that is within the Paperwork Commission and can be easily explained by legislative history, but all we say here is "interfere with rulemaking."

The purpose of the language is very simple. There was an article back on August 11 in the Washington Post by Sandra Sugawara that said:

OMB blocks the Environmental Protection Agency Package of proposed changes in the standards for lead and gasoline until the agency revises it. The EPA's source said that they fear that OMB is trying to force relaxation in the strict standards the agency wants. This was a direct interference with a regulatory body in its rulemaking authority.

It has nothing to do with type of forms, applications, and so forth. The intention of the committee was strictly to limit the OMB's use of these funds to interfere in the rulemaking, not administration, et cetera, as the gentleman from New York has pointed out, but to interfere in the actual rulemaking. The Congress and the committee had that right under the limitation of law.

The CHAIRMAN. Does the gentleman from New York desire to be heard further?

Mr. HORTON. No, Mr. Chairman.

The CHAIRMAN (Mr. STUDDS). The Chair is prepared to rule.

The Chair would cite the following provision from Deschler's Precedents, chapter 26, section 11.1, under the general heading "Imposing Duties on an Executive Official."

§ 11.1 *Parliamentarian's Note:* The application of any limitation on an appropriation bill places some minimal extra duties on federal officials, who, if nothing else, must determine whether a particular use of funds falls within that prohibited by the limitation. But when an amendment, while curtailing certain uses of funds carried in the bill, explicitly places new duties on officers of the government or implicitly requires them to make investigations, compile evidence, or make judgments and determinations not otherwise required of them by law, then it assumes the character of legislation and is subject to a point of order.

With that citation in mind, and with the arguments made by the gentleman from New York, the maker of the point of order, and because of the entire scope of the duties imposed by law upon the Office of Management and Budget in relationship to regulatory agencies, the Chair feels that the Committee on Appropriations has not sustained the burden of showing that the proposed language would not change and augment the responsibilities imposed by law on the Office of Management and Budget and, therefore, sustains the point of order.

The proviso is stricken and the Clerk will read.

The Clerk read as follows:

GENERAL SERVICES ADMINISTRATION

FEDERAL BUILDINGS FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

The revenues and collections deposited into the fund pursuant to section 210(f) of the Federal Property and Admistrative Services Act of 1949, as amended (40 U.S.C. 490(f)), shall be available for necessary expenses of real property management and related activities not otherwise provided for, including operation, maintenance, and protection of federally owned and leased buildings; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation and transfer of space; contractual services incident to cleaning or servicing buildings and moving; repair and alteration of federally owned buildings, including grounds, approaches and appurtenances; care and safeguarding of sites; maintenance, preservation, demolition, and equipment; acquisition of buildings and sites by purchase, condemnation, or as otherwise authorized by law; conversion and extension of federally owned buildings; preliminary planning and design of projects by contract or otherwise; construction of new buildings (including equipment for such buildings); and payment of principal, interest, taxes, and any other obligations for public buildings acquired by purchase contract, in the aggregate amount of $1,994,640,300 of which (1) not to exceed $67,915,000 shall remain available until expended for construction of additional projects as authorized by law at locations and at maximum construction improvement costs (including funds for sites and expenses) as follows:

Mr. STANGELAND. Mr. Chairman, I rise to reserve the right to make a point of order against a provision found in title IV in the paragraph entitled GSA, General Services Administration, Federal Buildings Fund, Limitation on Availability of Revenue, and request the right to speak on that reservation.

The CHAIRMAN. Will the gentleman indicate to the Chair the precise location of the point of order, the language against which he proposed to make a point of order?

Mr. STANGELAND. The reservation to make the point of order would be made specifically on page 20, lines 13 and 14 of the bill, in H.R. 7158, now under consideration.

There is an appropriation in the amount of $2 million for Blair House that does not have legislative committee authorization.

The CHAIRMAN. The gentleman does not need to seek that protection. He may make that point of order when the Clerk reads that portion, which the Chair will treat as a separate paragraph.

□ 1650

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Blair House, $2,000,000 (architectural and engineering studies)

POINT OF ORDER

Mr. STANGELAND. Mr. Chairman, I make a point of order on this portion of the bill.

The CHAIRMAN. The gentleman will state his point of order.

Mr. STANGELAND. Mr. Chairman, I rise to reserve the right to make a point of order against a provision found in title 4, in which the paragraph is entitled "General Services Administration, Federal Buildings Fund, Limitations on Availability of Revenue".

Mr. Chairman, specifically, on page 20, lines 13 and 14, of the bill, H.R. 7158, under consideration, there appears an appropriation in the amount of $2 million for the Blair House in the District of Columbia for architectural and engineering studies for repair of the building. This appropriation of $2 million for the Blair House appears to be in violation of rule XXI,

No. 2, of the Rules of the House of Representatives which states:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations, for such public works and objects as are already in progress.

Mr. Chairman, section 7(a) of the Public Buildings Act of 1959, as amended, 40 U.S.C. 606, states:

In order to insure the equitable distribution of public buildings throughout the United States with due regard for the comparative urgency of need for such buildings, except as provided in section 4, no appropriation shall be made to construct, alter, purchase, or to acquire any building to be used as a public building which involves a total expenditure in excess of $500,000 if such construction, alteration, purchase or acquisition has not been approved by resolutions adopted by the Committee on Public Works of the Senate and House of Representatives, respectively.

Further, section 13 of the Public Buildings Act of 1959, as amended, 40 U.S.C. 612, states:

The term "construct" and "alter" include preliminary planning, engineering, architectural, legal, fiscal, and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures, and other similar actions necessary for the construction or alteration, as the case may be, of a public building.

Mr. Chairman, the committee report accompanying H.R. 7158, states the $2 million has been included in the bill for architectural and engineering studies for the proposed renovation of the Blair House. However, prior to such an appropriation being carried in an appropriations bill, it must be approved by the House Committee on Public Works and Transportation, which it has not been, thus far. The General Services Administration transmitted to the Congress and the House Committee on Public Works and Transportation on July 23, 1982, a prospectus seeking approval by resolution from the committee for the repair and renovation of the Blair House in Washington, D.C. at a cost of $7,020,000. The figure was established after the State Department paid $55,000 for a complete building survey for Blair House to be performed by a Washington based architectural and engineering firm. The report was completed for the State Department in March 1982 which allowed them to get a handle on the magnitude of the problems and what it would cost to correct them. Ultimately, due to the unability of the State Department to receive a supplemental appropriation of $1.5 million for fiscal year 1982, the decision was made to transfer the property to the General Services Administration, who in turn would submit a prospectus to the House Public Works and Transportation for approval, and then an appropriation would follow. What we have before us in this bill is the cart being before the horse.

Mr. Chairman, let me point out, that pending before the House Committee on Public Works and Transportation is the prospectus, which we propose to review in the not too distant future. Section 5 of H.R. 7158 does allow GSA to reprogram funds within the Federal buildings fund upon approval by the Committees on Appropriations of the House and Senate. Thus, perhaps we should proceed in accordance with existing law, whereby, the authorizing committee would consider the matter and then let the appropriation follow.

Mr. Chairman, I am the ranking member on the Subcommittee on Public Buildings and Grounds of the committee on Public Works and Transportation. We have had one hearing. Let me say for the benefit of the committee and the Members of the House that I understand that Blair House needs to be renovated and protected and it ought to be done.

I also recognize that sometimes these kinds of steps have to be taken. I think this is an improper way to go, but because I believe it has to be done, and because I believe that further authorization dollars will have to go before that Subcommittee on Public Buildings and Grounds, I am not going to pursue my point of order, but I would like to make a point for this administration and for any other administration that there are procedures to follow; that these types of fundings have to be authorized and then appropriated, and in the future I would hope that each and every administration would follow those kinds of procedures.

With that, Mr. Chairman, I withdraw my point of order.

The CHAIRMAN. The gentleman withdraws his point of order.

Mr. NELSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I intend to support this legislation but I rise to express my serious concern about actions contemplated by the Customs Service affecting the Melbourne Regional Airport in Florida. My concerns are outlined in a letter that I have sent to the Commissioner of Customs, and I would at this point include that letter, as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 29, 1982.

COMMISSIONER OF CUSTOMS,
(Attn: Regulations Control Branch),
U.S. Customs Service,
Washington, D.C.

DEAR SIRS: This is to register for the record my objection to the proposed action of the Customs Service, noticed in the Federal Register of Tuesday, October 19, 1982, to revoke the "landing rights airport" designation of the Melbourne Regional Airport at Melbourne, Florida.

This action will adversely affect air commerce in one of Florida's fastest growing metropolitan areas. Melbourne, indeed all of South Brevard County, is currently undergoing a period of high-technology industrial growth. New facilities, particularly in electronics, are being located in the area. These new industries will be hampered by greater difficulties in shipment by the proposed change.

With its recent growth, the Melbourne area is attracting growing numbers of such businesses and increasing numbers of tourists. The passenger traffic increases at Melbourne have been dramatic in recent months. At a time when traffic nationally is declining, Melbourne's is increasing.

This increasing passenger traffic is also bringing a new recognition of the fine facilities available at Melbourne Regional Airport. That recognition is spreading to private and commercial flights as well, including the international arrivals which would be halted by this precipitous action.

Melbourne has modern, complete equipment to handle instrument landings in any type of weather. Yet, its designation would be revoked while the airport at Fort Pierce, Florida, which has no such all-weather capability and which does not even have a tower, would remain an international airport.

I am further concerned that the reason cited for this revocation is "savings". The Federal Register notice goes on to call customs service at this growing airport "a nonproductive expenditure of scarce resources." I strongly disagree with that assessment.

The facts are that very little in "savings" would accrue to the federal treasury by implementing this ill-advised change. In fact, the facilities, equipment, and utilities at Melbourne Regional Airport are provided to the Customs Service at no charge by the airport authority. Further, the expenses of the agents incurred in traveling between the office at Port Canaveral and Melbourne are charged to the flight serviced, not the taxpayers. The only cost to the taxpayers is the salary of the agent. Even the director of the Customs Office at Port Canaveral has indicated that the "savings" would only amount to about $20,000. In fact, there will be no "savings" unless there is a personnel reduction at the Port Canaveral office, which is unlikely.

It seems to me that it is in the best interest of commerce, both in South Brevard County and in the country, that facilities such as customs clearance at Melbourne remain in operation. The cost to commerce in time and fuel to clear customs at distant airports cannot be justified solely to eliminate the salary cost of a single customs inspector. The savings is insignificant considering the impact on aviation sales and service and future commerce through the Melbourne Regional Airport.

I strongly urge the Customs Service to reconsider and withdraw this unwarranted proposal to revoke "landing rights" at the Melbourne Regional Airport.

Sincerely,

BILL NELSON.

Mr. NELSON. I thank the Chairman.

□ 1700

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 6. Funds made available by this or any other Act for the payment of rent shall be available for the purpose of leasing space without regard to section 322 of the Act of June 30, 1932, as amended (40 U.S.C. 278a).

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Edgar: Page 31, after line 4 insert the following new section:

SEC. 7. None of the funds made available to the General Services Administration under this act shall be obligated or expended after date of enactment of this act for the procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position described in section 3310 of title 5, United State Code.

PARLIAMENTARY INQUIRY

Mr. DANNEMEYER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DANNEMEYER. Mr. Chairman, I have been listening to the Clerk read. The last reference to a page was at page 20. I was waiting for the Clerk to indicate page 21, because I have a matter to bring to the attention of the Committee on page 25. Now, I find us considering something on page 31. My question is, At what point will I be recognized to speak for the consideration of the Committee relating to page 25?

The CHAIRMAN. The gentleman at any time in the course of the debate can be recognized to strike the requisite number of words. The gentleman did not lose the opportunity to speak. The gentleman has lost the right to offer an amendment to any paragraph that has already been read.

Does the gentleman seek to offer an amendment?

Mr. DANNEMEYER. I have a point of order to assert on page 25, and I was waiting for the Clerk to read.

The CHAIRMAN. The gentleman's point of order comes too late, the Chair will inform the gentleman. The Committee is now on page 31. The gentleman from Pennsylvania has been recognized to offer an amendment, and the Clerk has reported the amendment.

Mr. DANNEMEYER. Mr. Chairman, a further parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DANNEMEYER. How is a Member to know when to assert a point of order relating to a particular page when the Member sits here waiting for the Clerk to get to page 25, to which this Member has a matter to present to the attention of the Committee?

The CHAIRMAN. The Chair will advise the gentleman that when an appropriation bill is being read, the Clerk reads the heading of each paragraph and the figure therein. The Clerk has been doing that during the reading of the bill.

Mr. DANNEMEYER. He has not been mentioning each page as he goes along?

The CHAIRMAN. The Clerk is reading this bill as appropriations bills are always read.

Mr. DANNEMEYER. I notice the Clerk read page 20, and I was waiting for the Clerk to reach pages 21 and 22. It seems logical.

The CHAIRMAN. The Chair will advise the gentleman that the procedure for reading appropriation bills differs from that when considering other legislation. In appropriation bills, the Clerk reads only the chapter heading, section heading, paragraph heading, and only the dollar figure therein. He does not read literally every word, and that is the method by which the Committee generally considers appropriation bills.

Mr. DANNEMEYER. I would like to be recognized after the gentleman from Pennsylvania makes his amendment, if I understand what the gentleman is about.

The CHAIRMAN. The Chair will advise the gentleman, if he wishes to offer an amendment to a section that has already been read, that will require unanimous consent, and the Chair will recognize the gentleman at the appropriate time to make such a request.

The gentleman from Pennsylvania (Mr. EDGAR) is recognized for 5 minutes.

Mr. EDGAR. Mr. Chairman, the amendment would restrict the use of funds appropriated for the General Services Administration to prohibit the contracting out of certain civil service functions which, under current law, are solely set aside for eligible veterans.

Current law, section 3310 of title 5, United States Code, currently restricts competition for the positions of guards, elevator operators, messengers, and custodians solely for veteran applicants. The section was enacted during the 89th Congress particularly to provide direct access within civil service for returning Vietnam-era veterans. The provision has served ever since as a stepping stone and training ground for thousands of Vietnam veterans to advance within Federal employment.

As chairman of the House Veterans' Affairs Subcommittee on Education, Training and Employment it has come to my attention that GSA, under the administrative authority of OMB Circular A-76, has not only begun to eliminate these positions, but has decided to contract out up to 13,000 additional career civil service positions including other security, custodial, and building maintenance functions. Current estimates indicate that up to 80 percent of those 13,000 positions are currently filled by preference-eligible veterans.

Each of these veterans was hired for these positions under the authority of a wide variety of statutes and programs giving special preference or direct access for Federal employment to them.

Unfortunately, the purpose and the timing of this amendment to an appropriations bill cannot correct the serious impact this action will have on all of these veterans who were once promised and received Federal employment and now face the elimination of their jobs.

The problem is complex. I would hope that the authorizing committees, the Committee on Post Office and Civil Service and the Veterans' Affairs Committee would work together to investigate the extent of this disruption to the veteran community to see that current law is upheld.

However, I do feel it to be germane at this time to offer an amendment to restrict and redirect the use of funds which would be used in one particular instance to eliminate those particular services within GSA which, for the past 16 years, by statute, have been specifically reserved solely for veteran applicants through section 3310 of title 5, United States Code.

The statute states:

In examinations for positions of guards, elevator operators, messengers and custodians in the competitive service, competition is restricted to preference eligibles as long as preference eligibles are available.

Contracting out of these functions, already, is preceding at a rapid rate. There is no doubt that elimination of these functions would represent a breech of faith to those veterans already occupying the positions.

However, of even greater consequence, eliminating the functions altogether, simply through arbitrary administrative action, would undermine both the intent and the purpose of congressional prerogative through existing law within title 5 in denying future Federal employment opportunities within these functions for deserving veterans.

In other words, the thrust of this amendment is not just to prohibit contracting out per se, but to insure funding for the maintenance of job opportunities which are already offered by existing statute for veterans.

Making this adjustment in the GSA appropriation for this fiscal year can only allow the time for the authorizing committees to make a thorough evaluation of the extent of the problem and to seek corrective legislative action. The amendment would add no funds to the appropriation.

Mr. Chairman, my amendment has the strong endorsement of the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans, and the Vietnam Veterans of America.

I greatly appreciate the courtesy and the interest expressed by the chairman of the Appropriations Subcom-

mittee, the gentleman from California in supporting this amendment.

I urge my colleagues to support the amendment.

Mr. ROYBAL. Mr. Chairman, I rise in support of the amendment. I would like to thank the chairman of the House Veterans' Affairs Subcommittee on Education, Training and Employment, the gentleman from Pennsylvania, for offering this amendment at this time. I fully support the amendment.

But, I too feel that more should be done in working with the authorizing committee to protect veterans' employment rights mandated by law from arbitrary administrative review. I look forward to working with the chairman and the Veterans' Affairs Committee, as well as the Committee on Post Office and Civil Service, to achieve that goal.

I urge my colleagues to support the amendment.

● Mr. MONTGOMERY. Mr. Chairman, I rise in support of the amendment offered by Mr. EDGAR, chairman of the Subcommittee on Education, Training and Employment.

Mr. EDGAR's Subcommittee on Education, Training and Employment has held a number of hearings on the employment problems of veterans during this 97th Congress both here in Washington and in the field. At all of those hearings it was demonstrated beyond any doubt that there are hundreds of thousands of Vietnam veterans who have not made a successful readjustment to civil life, notwithstanding the majority have been discharged from the Armed Forces for many years.

In attempting to address this problem, the Congress has passed a number of measures to help veterans, particularly to assist those who have had difficulty readjusting to civilian life following their military service. For example, the recently passed Public Law 97-306, the Veterans' Compensation, Education, and Employment Amendments of 1982, contains a number of provisions to improve and strengthen the capability of the Department of Labor to provide job services and placement for veterans seeking employment in the private sector.

In addition the Congress has received much praise for its approval of a number of programs which have provided immeasurable employment assistance to veterans. I speak of the Disabled Veterans Outreach Program (DVOP), the veterans readjustment appointment (VRA) program, and the establishment of the position of the Assistant Secretary of Labor for Veterans Employment in the Department of Labor, to name a few.

One of the longest standing provisions of law which has always received total support from veterans and representatives of veterans organizations is a little known provision which requires the Federal civil service positions of guards, elevator operators, messengers, and custodians shall be filled by veterans so long as preference eligibles are available. According to the latest information, however, the General Services Administration has begun to contract out these civil service positions under the provisions of OMB Circular A-76. It has been estimated that there are about 13,000 positions involved, without 80 percent of the jobs filled by veterans.

The latest unemployment statistics for October 1982 shows that about 621,000 Vietnam-era veterans are unemployed, 545,000 between 25 and 39 years of age. This is the group, mostly Vietnam veterans, that would be hurt by contracting out these positions which are reserved for qualifying veterans.

I commend BOB EDGAR for his excellent work during this Congress as chairman of the Education, Training and Employment Subcommittee, and for offering this amendment today. I strongly support the amendment being offered by Mr. EDGAR which will guarantee that these jobs will continue to be available to veterans, as intended by Congress when it passed the provision in 1966.●

□ 1710

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

The amendment was agreed to.

REQUEST FOR PERMISSION TO RAISE A POINT OF ORDER

Mr. DANNEMEYER. Mr. Chairman, I have a point of order which I would like to assert at page 25, lines 8 through 20.

The CHAIRMAN. The Chair would advise the gentleman in order to do that, that section of the bill having been read, he will have to request unanimous consent.

Mr. DANNEMEYER. Mr. Chairman, I ask unanimous consent that I be permitted to assert a point of order on page 25, lines 8 through 20.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ROYBAL. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think in approaching the work of the House and the committee in this instance that this Member from California is as reasonably alert as any Member present in the Chamber. I came in here today for the purpose of asserting a point of order against the appropriation for a particular activity for which the authorization was denied by a specific vote of this body, 165 to 231, on May 19, 1981. It is in the amount of $3 million and it relates to an appropriation for the National Archives and Records Service operating expenses.

It is the clear sense of the House by the vote on the authorization measure that we did not as a body intend to authorize any funds for this particular activity.

It is for this reason that I came here to assert this point of order because I think the point of order would clearly lie.

I have been sitting here watching the deliberations and listening to what the Clerk has been reading on the premise that the Clerk would read page by page. I heard page 20 read and thinking that we would get to page 21 or 22, then at the appropriate time when we got to page 25 I would assert this point of order. Then I was advised by the Member from Pennsylvania that he would offer an amendment on page 31.

One would almost get the impression that the process that exists is designed to make it difficult for Members to know when exactly to assert a point of order.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

I had a similar misfortune to that of the distinguished gentleman from California.

I get the impresssion that we are making this a skill contest around here. I would simply notify all Members that this is not a race. If we need to slow down the procedure, we can surely slow it down.

But I hope that in the future all Members will be able to make the points that they would like and to raise the questions and to conduct the debate they would like.

I think we are engaged in a bit of a race here and I think the gentleman has made a good point. I am very sorry he was not able to make his point of order.

I thank the gentleman.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to the gentleman from Missouri.

Mr. VOLKMER. I would just like to mention, as perhaps an aid for the gentleman from California in the future, that all you have to do is take a copy of the bill and follow the Clerk in his reading and just read with the Clerk and you will end up on whatever page you want as he reaches the same page.

Mr. DANNEMEYER. I appreciate that advice.

The point is that the rules exist for a purpose and I can understand that. But we should never lose sight of the fact that the deficit for 1983 is esti-

mated to be between $125 billion and $175 billion.

Admittedly, $3 million is not a lot of money. I suppose some in the Chamber would say that we are wasting the time of the body by even talking about the significance of $3 million.

But I do not believe that the rules of this House should be interpreted or enforced in such a way as to preclude a Member from making a point of order to something that is obviously appropriately placed. It is in this spirit that I bring this matter to the attention of the House.

Having concluded, I suspect I would again request the unanimous consent that I be permitted to make this point of order relating to page 25, lines 8 through 20.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ROYBAL. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair would make only one observation and that is this: that the Clerk is reading this bill as Clerks for years and years and years have read appropriation bills. Under that procedure, normally page numbers are not cited at all unless the reading of the bill has been interrupted by the offering of an amendment or by debate.

So it does, the gentleman is correct, require closer attention than the reading of a normal bill or bills other than appropriation bills.

The Clerk will read.

The Clerk read as follows:

SEC. 505. No part of any appropriation contained in this Act shall be available for the procurement of or for the payment of the salary of any person engaged in the procurement of any hand or measuring tool(s) not produced in the United States or its possessions except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States or its possessions cannot be procured as and when needed from sources in the United States and its possessions or except in accordance with procedures prescribed by section 6-104.4(b) of Armed Services Procurement Regulation dated January 1, 1969, as such regulation existed on June 15, 1970. This section shall be applicable to all solicitations for bids opened after its enactment.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. FRENZEL. Is it now appropriate for me to make a point of order against section 505?

The CHAIRMAN. That would be correct.

Mr. FRENZEL. It is now timely?

The CHAIRMAN. The gentleman is correct.

POINT OF ORDER

Mr. FRENZEL. Mr. Chairman, I do make a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. FRENZEL. The point of order is against section 505 of H.R. 7158 as constituting legislation on an appropriation bill and, therefore, in violation of rule XXI, clause 2.

Rule XXI, clause 2, states that—

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order * * *

Section 505 prohibits appropriated funds from being used in the procurement of any hand or measuring tool not produced in the United States or its possessions unless the Administrator of General Services makes a determination that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States cannot be procured as and when needed from domestic sources.

As an elaboration on the prohibition that no provision in a general appropriation bill is in order if it changes existing law, rule XXI, clause 2 has been interpreted to mean that an amendment or language in an appropriation bill may not impose on Federal officials additional duties not required by law, or make the appropriation contingent upon the performance of such duties.

Section 505 is not merely a limitation on appropriated funds but establishes a procurement requirement not contained in existing law, and requires a determination with respect to such procurement by the General Services Administrator that would not be required to be performed under existing law.

Therefore, I raise a point of order that section 505 is in violation of rule XXI, clause 2.

The CHAIRMAN. Does the gentleman from California wish to be heard on the point of order?

Mr. ROYBAL. No, Mr. Chairman.

Will the Chair please rule?

The CHAIRMAN (Mr. STUDDS). The Chair is prepared to rule.

The Chair would cite Deschler and Brown's Procedure, chapter 26, section 19.5:

A section in a general appropriation bill prohibiting the use of funds in the bill for the purchase of foreign-made tools except to the extent that the administrator of the General Services Administration determines that domestically produced tools are unavailable for procurement, was held to impose additional duties on the Federal official and was ruled out as legislation in violation of clause 2, rule XXI.

So for the reasons as stated precisely by the gentleman from Minnesota (Mr. FRENZEL) the Chair sustains the point of order and the section is stricken.

The Clerk will read.

The Clerk read as follows:

SEC. 612. No part of any appropriation contained in, or funds made available by this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the current fiscal year and for which appropriations were granted: *Provided*, That no part of any appropriation contained in, or funds made available by this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the fiscal year 1982.

□ 1720

Mr. FRENZEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, H.R. 7158, the Treasury, Postal Service, general government appropriation bill for fiscal year 1983 is described in the House Budget Committee early warning report for the week of November 29, 1982, to be over the budget resolution and the House Appropriation Committee 302(b) targets in both mandatory and discretionary funding.

In total outlays, this appropriation is $951 million in excess of the budget resolution assumptions, and $717 million over the HAC 302(b) allocations. This bill spends almost a billion dollars more than the budget approved by Congress. The budget targets are not spending floors. If we cannot meet budget goals, we ought not to set them in the first place.

Americans cannot be expected to sit back uncaringly while Congress throws their tax dollars into projects and programs which could be funded for less, but for the undisciplined spending habits of Congress. Potential deficits in the $150 to $200 billion range loom ahead. Any chance of controlling those deficits depends on Congress unwillingness to adopt careful budget resolutions, and stick to them. We have not done so in this appropriation bill.

The committee claimed savings here as a result of freezing the standard level user charges at the fiscal year 1982 level. These savings would not occur. The action would reduce a payment from one Federal agency to another without effecting total outlays. The false savings claimed for SLUC amount to $50 million. This type of

budget hide and seek ought not be tolerated.

Further savings of $120 million were claimed by adopting language that converts the GSA national stockpile fund from an appropriation to a limitation on the availability of revenues of $120 million. Like the SLUC trick, this maneuver will not save a dime.

Worst of all, the committee has done its customary job of underfunding mandatory expenditures. Mandatories are underfunded in budget authority by $416 million. The $416 million will need to be funded later. A supplemental will be required for the payment to the civil service retirement and disability account for pay increases. There is no reason why this $416 million should not be funded now instead of by spring supplemental, except that by doing so the committee is able to slip extra funding into other discretionary accounts.

In addition, as mandated by the continuing resolution, Postal Service rates for subsidized mailers are to remain at current levels. Because of this rate freeze, it is estimated that shortfalls in Postal Service reimbursements in the range of $172 million will occur. The $172 million shortfall will also have to be made up by a supplemental or rate increase later this fiscal year. It is an overage which should not be approved.

The overspending in this bill is not justifiable. It exceeds the Appropriations Committee's own 302(b) allocations. It is excessive by any standard, and it should be defeated.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

(e) For the purpose of administering any provision of law, rule, or regulation which provides premium pay, retirement, life insurance, or any other employee benefit, which requires any deduction or contribution, or which imposes any requirement or limitation, on the basis of a rate of salary or basic pay, the rate of salary or basic pay payable after the application of this section shall be treated as the rate of salary or basic pay.

Mrs. FENWICK. Mr. Chairman, I wonder if we might return to that section which was read, rather hastily, that no funds shall be available to provide an abortion, as I heard it, unless the mother's life is in danger. Did I hear correctly?

The CHAIRMAN. Does the gentlewoman from New Jersey wish to make a unanimous-consent request?

Mrs. FENWICK. Yes, Mr. Chairman.

The CHAIRMAN. The gentlewoman will state her request.

Mrs. FENWICK. Mr. Chairman, my request is that we consider that section that was, as I say, run over rather hastily.

The CHAIRMAN. The gentlewoman asks unanimous consent that we return to section 616.

Is there objection to the request of the gentlewoman from New Jersey?

Mr. HYDE. Mr. Chairman, I object.

Mr. VOLKMER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

AMENDMENT OFFERED BY MR. DORNAN OF CALIFORNIA

Mr. DORNAN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN of California: Add a new section as follows:

SEC. 619. None of the funds appropriated by this title may be used to carry out the proposed revenue procedures 4830-01-M of the Internal Revenue Service entitled "Proposed Revenue Procedure on Private Tax-Exempt Schools" (44 F.R. 9451 through 9455, February 13, 1979, F.R. Document 79-4801), or the proposed revenue procedure 4830-01 of the Internal Revenue Service entitled "Proposed Revenue Procedure on Private Tax-Exempt Schools" (43 F.R. 37296 through 37298, August 22, 1978, F.R. Document 78-23515; or parts thereof.

Mr. DORNAN of California. Mr. Chairman, this past summer, the Dornan amendments to the Treasury, Postal Services, and General Government appropriations bill were, for some inexplicable reason, deleted in subcommittee. My amendments have been part of the Treasury, postal appropriations bill since September 1979, and the amendment presently before the floor received an overwhelming vote of 308 ayes to 85 noes in 1980. Last year, the amendments were not even contested. How is it then, that we find ourselves today without those amendments? For, make no mistake about it, without those amendments, the private and religious schools of this Nation once again find themselves threatened by the IRS and by Federal courts engaged in social engineering.

The amendment presently under consideration relates to the tax-exempt status of private schools and prohibits the Internal Revenue Service from using any funds for the implementation of the proposed revenue procedures of August 22, 1978, and February 13, 1979, or parts thereof. In August 1978, the Internal Revenue Service proposed to eliminate the tax exemptions of private and religious schools that were not in compliance with IRS determined racial minority requirements. The proposed rulings were somewhat modified in February 1979, but remained substantially unchanged. To retain tax-exempt status under the proposed procedures, private schools would be required to undertake arbitrary racial quotas in admissions and hiring. Every private school would be presumed guilty of racial discrimination until it proved itself innocent, a reversal of our entire legal tradition. The end result, of course, of the denial of tax-exempt status would be the closure of most private and religious schools.

When they were first proposed, the IRS rulings evoked anger and outrage from hundreds of thousands of citizens throughout the country. The IRS was deluged with a flood of protests and citizens from all over the United States came to Washington to register their outrage. They included people from all walks of life who have sacrificed much to have their children educated in private schools while at the same time supporting public education with their taxes.

The vast majority of the more then 3,500 private schools that would be affected by the proposed revenue procedures are church related. Religious schools under the proposed revenue procedures have, incredibly, become a suspect class. It should be recalled that the first educational institutions established in colonial America were under religious sponsorship and that the Founding Fathers of our Republic were the products of private, religious education. Religious groups also have constitutional rights which must be respected and have been historically protected by the first amendment.

It is important to note, Mr. Chairman, that my amendment includes the words "or parts thereof." In June of last year (June 18, 1981), the U.S. Court of Appeals for the District of Columbia in Wright against Regan argued that my amendment only prohibited funds to "carry out the IRS proposals." Correctly quoted, my amendment prohibits funds for the implementation of the initial and revised revenue procedures "or parts thereof." The court's omission of the last three words totally changed the meaning of my amendment. Moreover, as a result of that same decision, Wright against Regan, the way has been paved for a possible ruling by U.S. District Court Judge George Hart which would implement significant parts of the proposed revenue procedures forbidden by my amendment and which may threaten the tax-exempt status of every private and religious school in the Nation.

No Federal court may order actions that require the expenditure of funds that are prohibited by this amendment. The judiciary has absolutely no power over the purse. James Madison, the "Father of the Constitution," was particularly emphatic in Federalist 58 in describing the power of the purse as belonging exclusively to the House of Representatives. The Constitution explicitly states (article I, section 9, clause 7) that "No money shall be drawn from the Treasury, but in consequence of appropriations made by law."

There is nothing in the wording of the Tax Code or its legislative history which empowers the courts or the IRS to act as they have. Instead, a few Federal courts have fashioned a doctrine of Federal public policy to justify whatever action they deem necessary

to carry out their agenda of social engineering. The doctrine of public policy as arbitrarily defined by the courts and the IRS surely constitutes one of the most dangerous assaults on representative government in our history. If representative government is to have any meaning, it is the representatives of the people who must have the authority it determine matters of public policy, not unelected and unaccountable judges and bureaucrats.

To protect the private and religious schools of this land, I urge adoption of the amendment.

□ 1730

Mr. ROYBAL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment, for I believe that what we have before us today is an attempt to roll back some of the advancements that we have made in civil rights over the years. This amendment comes under the guise of a prohibition on spending by the IRS. But it is really a civil rights issue because it hampers the ability of the IRS in its efforts to eliminate racial discrimination in private schools.

We all know that some private schools in this country have been established to avoid the effects of civil rights legislation that so many people worked so long to see enacted into law. If we agree to this amendment we are, in effect, saying to these private schools that do discriminate that it is the public policy of this country to support those schools by allowing them to claim tax-exempt status.

In January of this year President Reagan said that he did not believe that the IRS can take away the tax-exempt status of a private school even if the IRS can prove that the school is discriminatory.

Mr. Chairman, I will never agree with the President on that issue. I think that the public policy of this country ought to be so overwhelmingly against discrimination that we simply will not permit a private school that discriminates to be allowed to have tax-exempt status.

Mr. Chairman, the courts have ruled so far that our private schools that discriminate should not be allowed to have a tax-exempt status. The issue of tax-exempt status of private schools is currently before the U.S. Supreme Court.

It is my firm belief that Congress ought not interject itself at this time in an issue that is currently pending in the courts.

I urge the Congress to send a message to all Americans, but particularly to the minorities that have suffered, and are suffering, so much because of racial discrimination. That message ought to be that this House of Representatives, that the representatives of the people, will not allow schools that are racially discriminatory to claim a tax-exempt status.

I urge a "no" vote on this issue.

May I also tell the gentleman from California that the regulations that he has made reference to have already been withdrawn by the IRS, and that this amendment serves no purpose except perhaps to air his own feeling on the subject.

Mr. RANGEL. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from New York.

Mr. RANGEL. I thank the gentleman for yielding.

Mr. Chairman, I would like to say that for many years this country has been proud of the fact that we have so many people from different areas being able to come here and to live as one. We have some terrible pages in our history as a result of being a minority in this country. And somehow historically we have tried to overcome it.

For people to offer amendments under the cloak of the IRS attempting to legislate when it should be a congressional function I think jeopardizes the reputation of our country, not only as it applies to our own citizens, but certainly as other people outside of this country would view us.

I am saying that this very sensitive constitutional question is presently before the U.S. Supreme Court, and if there is any Member of this body who is willing to say that they are anxious to allow the Internal Revenue Service to grant tax exemption which is no more than financial assistance to schools that would discriminate against citizens of this country that have fought for this country, that serve in the U.S. Congress, I think that they are extending this question beyond the scope of this Congress.

It would seem to me that those people who allegedly are concerned about the U.S. Constitution should allow that issue to be decided by the U.S. Supreme Court and to allow the Ways and Means Committee, which has reviewed this issue, to take care of the legislation.

Mr. DORNAN of California. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from California.

Mr. DORNAN of California. I thank the gentleman for yielding.

Mr. Chairman, I would like to make it part of the public record of debate here that it is my own opinion that any American citizen who would open up a school deliberately to exercise prejudice against his fellow citizens, and who would try to teach young children hatred, that kind of person is the lowest form of animal on this planet. And if that is not clear, I do not know what else to put in the record about my feelings about the buffoons who came here to Washington over the weekend to put on their white hoods and run around the streets preaching hatred. They were the initial cause of all the rioting.

But what we are talking about here are the powers of the House, and let us leave the law in place that has been there for 3 years.

Mr. RUDD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I appreciate the good work that my chairman and ranking member have done on this committee. I understand why my good friend and colleague decided to remove this article from the bill when it was in subcommittee.

But let me just strip the amendment to what I think are the salient points that we should consider in this amendment, and I do support the amendment.

□ 1740

This amendment specifically prohibits the IRS from implementing a rule developed in 1978 and 1979 by IRS which would alter the tax exempt status of private, religious, and church-affiliated schools under the Internal Revenue Code of 1954.

The rule developed by the IRS would have created a review system for all such private schools in an effort to set racial quotas and exert Government administative control over private institutions.

The Internal Revenue Service was, in effect, dictating a national policy by this rulemaking procedure based on a misperception that the growth in private church-affiliated schools was racially motivated. While there have been, of course, some individual cases of racial discrimination, the evidence indicates that these private schools offer what is being sought: A quality traditional education, and not a haven for racists.

More importantly, it is the Congress, and this is the issue at stake here, it is the Congress, not the IRS that has the constitutional mandate to set national policy with regard to Federal tax law.

In addition, the Internal Revenue Service's rule promulgation reverses the standard of American justice by shifting the burden of proof with regard to civil rights laws upon the schools and sets the Internal Revenue Service up as lawmaker, law interpreter, and law enforcer. The Constitution never invested all three functions in the executive branch of the Government.

I urge my colleagues to vote, as we have in the past, in support of the 1954 law.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment. The first thing I want

to make clear is that this amendment is not designed to protect schools that deny admission to minority students. My colleagues should be aware of the fact that, as proposed, the IRS rules could result in the denial of tax-exempt status to schools which had never denied admission to a minority student.

What the proposed rules would do would be to presume that private and religious schools that were established or expanded during period of desegregation in nearby public school districts were guilty of discrimination, and impose rigid quotas and affirmative action procedures on them. They would have to prove their innocence by meeting requirements imposed on them by unelected Federal officials. This violates every precept of justice and fair play, and it violates our constitutional form of government. It violates the innocent until proven guilty principle of our judicial system.

If a school is suspected of discriminating against minority students, then a case should be brought, and if that school is actually found guilty of discrimination, then and only then is it fair and proper to deny it tax-exempt status. This is not what the proposed IRS regulations would do.

We all know that it is wrong to reach a conclusion of guilt by association. What the proposed IRS regulations would do is reach a verdict of guilt by time period. These schools would be judged guilty simply because of the time period during which they were established or expanded. This is ridiculous.

The last decade in our country has seen a growing concern on the part of many parents over the ideas being taught in our public schools, the permissiveness, the sometimes outright antireligious bias and lack of sound moral and spiritual values, and the educational methods that turned out children who could not read or write. Therefore many new private and religious schools were established during this decade because of this disenchantment with the public school system. This development has nothing to do with attempts to discriminate against minority students. It is just plain wrong to assume that these schools are discriminatory just because they might have been established during a certain time period.

I suggest to my colleagues that, if they have not already done so, they become acquainted with the private and religious schools in their districts. I certainly know about fine religious schools in my district which have been established to give children a religious upbringing; that is the sole reason for their existence, and they are doing a fine job of preparing moral and upright citizens for our Nation.

Such schools have sprung up all over the Nation, in all our congressional districts. Again, I urge my colleagues to become acquainted with these schools, and talk directly to the parents who are concerned enough about the moral and spiritual, growth of their children to make the financial sacrifice of sending their youngsters to these schools. You will then realize how wrong it is to let the IRS bully and possibly destroy these schools. For the parents of children in religious schools, their fundamental first amendment right of freedom of religion is at stake.

Some may say that the courts have agreed with the IRS on this matter. Sad to say, we do have some court decisions to that effect. What this means is that the judicial and executive branches have joined together in assuming power that rightfully belongs to the Congress, the legislative branch of the Government.

The courts and the IRS have taken it upon themselves to legislate. They are determining what shall be public policy, and they are making tax policy. It is Congress, and only Congress, that has this authority and responsibility under our constitutional form of government.

So again I want to emphasize that what is at stake here is not the issue of discrimination. There are three principles at stake here: First, the principle of "innocent until proven guilty"; second, the first amendment rights for the religious schools; and third, the principle that Congress, and not the two other branches of Government, should make public policy and control the pursestrings.

I urge my colleagues to support this amendment.

Mr. MATSUI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

I would like to ask the maker of this amendment, if I may, a couple questions.

The gentleman knows that in January the administration reversed an 11- or 12-year long-standing policy of the Ford-Nixon administration that basically would not allow a tax-exempt status to educationally discriminatory schools.

Mr. DORNAN of California. Right.

Mr. MATSUI. I would like to ask the gentleman this question: Assume that Goldsboro University and Bob Jones University had provisions in their charters that would prohibit members of racial minority groups from entering that school, even if they have all the other qualifications, the tuition, the educational requirements, and all that. Would this gentleman's amendment still allow Bob Jones or Goldsboro to receive tax-exempt status?

Second, those people that contributed to those schools, would they be able to deduct their donations to these institutions?

Mr. DORNAN of California. Mr. Chairman, anticipating the gentleman's thoughtful question, I wrote this down very succinctly:

The Dornan amendment would not allow funds for implementation of a Supreme Court decision that would require adoption of any parts of the proposed revenue procedures of 1978 and 1979. Although other criteria are not prohibited, the amendment in no way sanctions unconstitutional assertions that Federal public policy is a valid basis for the rule of law. Neither does it endorse another outrageously unconstitutional finding that Government interests are dominant over other constitutional interests.

Mr. MATSUI. Well, the gentleman wrote the amendment, obviously. Could the gentleman answer my question?

Mr. DORNAN of California. The Supreme Court decision, I am anticipating, is not going to uphold the removal of the constitutional prerogatives of this body which the IRS does not have to legislate.

Mr. MATSUI. Is the gentleman then stating by the latter part of his statement that, yes, indeed, these people will continue to have exempt status and also those people that contribute and donate to these institutions will be able to continue to deduct from their income tax returns if the amendment of the gentleman does, indeed, pass; is the gentleman saying yes, indeed, that is the case?

Mr. DORNAN of California. Not necessarily. When the gentleman was first elected and we first attached these amendments to the Treasury and Postal appropriations bill, there were cases being adjudicated in Mississippi, what were called in the press white supremacy academies, and the State courts there were able to target these schools and with a consent decree from the schools, remove discriminatory practices.

But the basis of my amendment, and we will have to see what comes out of the Supreme Court decision, is that you cannot throw a cloud over all the religious and private schools in this country and make them appear to be guilty before they have a chance to defend themselves, particularly in some areas where you could not come up with a quota to satisfy some national standard, if you bus people from a thousand miles away.

Mr. MATSUI. I really have not been able to get the answer from the gentleman; but I am assuming from the gentleman's last statement that, yes, indeed, they would be entitled to tax-exempt status.

I would just say this. The gentleman refers to the pending Supreme Court case. Perhaps the gentleman and per-

haps other Members of this body should wait until the Court resolves this matter and then we can take a fresh look at it after that decision has been made one way or the other. That would seem to be the logical approach to take.

I am surprised that this matter has been revived again after it had been thoroughly discussed in January and February of this year.

Mr. DORNAN of California. We have no choice but to wait. Of course, I am going to do that. I am going to call for a vote here and I think the gentleman will see from the lopsided vote again, almost 4 to 1, that the Members of this body do not want to return to their home States and tell their religious and private schools that they are guilty as charged until they prove themselves innocent with some quota system.

Let us leave the law as it has been for 3 years while the Supreme Court rules on the Bob Jones case.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. MATSUI. I will yield to the gentleman from Arizona, who perhaps can throw some light on this issue.

□ 1750

Mr. RUDD. Mr. Chairman, I thank the gentleman for yielding.

I cannot believe that any institution or any individual who is committing discriminatory practices in opposition to the laws that are on the books and the Constitution of the United States can take advantage of this in any way and I do not believe that this amendment is going to address itself to that.

The CHAIRMAN. The time of the gentleman from California (Mr. MATSUI) has expired.

Mr. FAZIO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to the amendment because I wish to join the chairman of the subcommittee in the fight he successfully fought in the full Appropriations Committee markup against this bill. We found at that time that there was a new understanding of the recent events, the furor that surrounded the administration's most recent decision to allow private schools to discriminate and retain a tax deductible status. We also found a change in the attitudes of the members of our full committee, one which we believe we will find in the full body, the House of Representatives. There are new negative feelings about permitting those few schools in America that continue to seek a tax exemption and at the same time continue to desire to discriminate to do so.

I see a change in attitude because I think the public became very aware and very clear in its understanding that there should be no effort on the part of the Federal Government to in any way condone discrimination when a tax subsidy, in effect, was involved.

I think we had for several years here on the floor a great effort on the part of the gentleman who is offering this amendment, and many of his colleagues, to create an atmosphere in which we assumed that we were, in fact, harming many private schools around the country that were really innocently roped into a very broad and very poorly drafted IRS regulation.

What we found as we investigated that allegation, in fact was that there were very few schools that really were in violation of that IRS regulation and that, in fact, the majority of the private schools were not in any danger of having any of their practices affected by the Internal Revenue Service. In fact, very few schools anywhere in this country were likely to be penalized by the Treasury Department.

I think the administration's bungled effort to attempt to change the law, the regulation that my colleague, the gentleman from California (Mr. MATSUI) has referred to, has helped us all focus much more clearly on the issues involved in this matter.

I think the House would not want to go on record at this time as anticipating a Supreme Court decision which is in the offing this winter. I think we are not desirous of in any way perpetuating the image that the Federal Government wishes to condone actions by private schools which discriminate on the basis of race.

I think this body is not interested in forcing its will on another branch of Government which clearly has the power to interpret the Constitution in this regard.

I think lastly, we certainly do not wish in any way to imply by our actions here that the kind of concern that the gentleman from southern California (Mr. DORNAN) has pointed to is likely to be one that should trouble many of the parents of children in private schools throughout the country.

I am very hopeful that the Members will reflect upon the furor that broke out in this country less than 1 year ago when it became evident that we were going to reverse our traditional policy against discrimination whenever taxpayer funds are involved. I hope the committee will reaffirm the committee's decision and support the subcommittee chairman in his strong, affirmative position against inclusion of this language at this time. This is the most crucial civil rights issue of the Reagan Presidency and this is a sincere test of whether this body fully understands the public's continued commitment to racial equality

Mr. VOLKMER. Mr. Chairman, will the gentleman yield to me?

Mr. FAZIO. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, I am a little bit in a quandry as one who: First, does not want to give tax-exempt status to schools that do discriminate but second, do not also wish to see the heavy hand of the IRS impose itself upon those schools who do not discriminate, those private and parochial schools, as I understand the proposed regulations of several years ago would have done. At least they would have basically said, "You are guilty until proven innocent and we are going to come in and do the auditing."

Mr. FAZIO. Mr. Chairman, I had the same concern that the gentleman from Missouri has.

The first time I was permitted to vote on this proposed rider, I voted the way the gentleman from California, (Mr. DORNAN) would request us to vote today.

I then investigated the actions of IRS. I learned more about what the actual enforcement proposal was, and discovered that it was really going to impact very few schools, and that none of those in my area, and I am sure the gentleman's area, were even under any cloud, even under consideration for any penalty.

At that time I decided it was time to reaffirm my belief in equality anytime we are going to provide a taxpayer subsidy. That position, I think, is even stronger today when I contemplate the actions of this administration.

Since the Supreme Court is going to rule on this issue in several months, I think it is best that the House remain mute on this point until the Court has finally outlined the parameters of the law.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield further to me?

Mr. FAZIO. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, can the gentleman from California (Mr. FAZIO) give us any assurance that the IRS, if the amendment does not go on and does not become law, will not go into private and parochial schools that do not discriminate and start saying, "We want to check your records and the students you have had in the last 10 years"?

The CHAIRMAN. The time of the gentleman from California (Mr. FAZIO) has expired.

(On request of Mr. VOLKMER and by unanimous consent, Mr. FAZIO was allowed to proceed for 2 additional minutes.)

Mr. FAZIO. Mr. Chairman, I cannot give the gentleman the assurance he seeks, but you now have a President, President Reagan, and a Secretary of

Education, an Attorney General, and a Secretary of the Treasury—a number of highly placed officials whose public positions are simply that there should not be any undue harassment or unfair enforcement of this regulation.

I would think this administration would be the last administration to pick on, to take unfair advantage of these parents and these private schools. Certainly I do not think we are going to find any vigorous enforcement of the regulation that existed prior to the Reagan administration coming into office. But neither do I expect a resubmittal of the ill-fated regulation of last spring.

Upon that basis, I would urge that we all simply let this issue lie intil the courts have ruled, and then redress it, if need be, at that time.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield further?

Mr. FAZIO. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, I notice the other gentleman from California (Mr. MATSUI) asked a question of the sponsor of the amendment and tried to get some information from him which I think would have been very good if we did, whether or not if this amendment does go on and becomes law, whether these other schools who do discriminate, and their sponsors or people who donate to them, will be able to receive a tax credit or deduction from their income tax? Now, I still do not know the answer to that.

Mr. FAZIO. Mr. Chairman, I must share the gentleman's concern. I do not have an answer to it, as well. I am sure the gentleman from California (Mr. MATSUI) feels as frustrated as we do.

Mr. SILJANDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment offered by Mr. DORNAN. This amendment absolutely prohibits the expenditure of any funds to formulate or carry out the proposed IRS regulations which the IRS first attempted against tax-exempt private and religious schools in 1978. The same prohibition on use of funds applies to the revised IRS proposal of 1979.

Any funds means exactly that, no funds at all may be spent for payment of any IRS or Treasury Department employee, attorney, or official that contributes to the promulgation or implementation of any part of the proposed IRS revenue procedures.

It seems to me that the key question here is who sets the laws of this land, Congress or the IRS? Congress has stated before that the IRS should not be allowed to remove the tax-exempt status of private and religious schools. Since the IRS has seen fit to do this there is an obvious need to once again pass an amendment that would prohibit the use of funds appropriated in this bill by the IRS to quasi-legislatively make laws to achieve their own perception of social goals.

I ask my colleagues to vote again to establish the authority of Congress to make laws. The IRS must not be allowed to tacitly assume quasi-legislative powers which constitutionally belong to Congress and Congress alone.

Mr. HANCE. Mr. Chairman, I move to strike the requisite number of words so I may speak on the amendment and ask a question of the sponsor.

Mr. Chairman, I would like to ask the gentleman from California (Mr. DORNAN) a question.

Watching on the closed-circuit television, I noticed the gentleman from California (Mr. MATSUI) asked a question and I was not sure of the answer. It seems to me in 1978 when this IRS regulation first came out that the burden of proof was shifted to many of the private schools and that under certain conditions the private schools had to prove that they were not discriminating and that under those conditions, many of us voted for a similar amendment in the past and still support that position.

My question to the gentleman from California (Mr. DORNAN) is, that this amendment, as it is at the present time, would it allow schools that discriminate, much like the ruling that the White House got into last year with the Bob Jones thing, would it allow schools that do discriminate and are open about it, would it allow them to go ahead and get the tax-exempt status and the IRS would not be able to do anything?

Mr. DORNAN of California. Mr. Chairman, will the gentleman yield to me?

Mr. HANCE. I yield to the gentleman from California.

Mr. DORNAN of California. I thank the gentleman for yielding.

Mr. Chairman, the answer is no.

Mr. HANCE. Is the gentleman telling me then that if there is a school that is discriminating that under his amendment the IRS could go back and take away their tax-exempt status?

Mr. DORNAN of California. If the gentleman will yield further, Mr. Chairman, no, not under the proposed procedures of the IRS in 1978 and 1979 that these amendments blocked, because the proposed procedures were simply unconstitutional.

There are many ways that courts can move against discriminatory white supremacy academies, as they did in Mississippi. But the IRS is not the body designed by our forefathers to legislate against things like that. It is the Congress of the United States.

We have it within our capabilities here to pass laws to do things like that and not leave it up to the IRS.

One of the things that is really amazing me here is people in this body still do not understand the difference between a subsidy and a tax exemption, and in my next amendment I am going to have to read a basic primer in here to educate some people on what, in fact, a Federal subsidy is as opposed to what a tax exemption is. They are two different horses of a different color.

Mr. HANCE. Let me ask one additional question.

The regulation that the gentleman from California (Mr. DORNAN) is trying to address was published in 1978. Since then it has been dropped, has it not?

Mr. DORNAN of California. If the gentleman will yield further, no. These amendments restricted activist social engineering on the part of IRS to preempt a congressional prerogative. They were legislating through their laws. That is not their prerogative. It belongs to the Congress, principally to the House of Representatives.

□ 1800

It has been part of the law of the land for 3 years, and I see no reason why it should not continue that way. It is only because some people want to use the IRS—for the best of reasons, I guess—as an instrument of social change, and that just is not the way our Constitution is written. I am willing to submit it to a vote of my peers.

Mr. HANCE. Is the regulation still pending?

Mr. DORNAN. I have to assume the worst, that the same imaginative IRS people are in place there who created such mischief years ago with this. All I can simply say is, the overwhelming majority of groups, of Christian schools who contacted me, rabbinical schools, Bible day schools that are springing up around the country for reasons of violence, lack of discipline, poor education, lowering SAT scores—I have never had anybody come to me and say, "Congressman, I want to keep them out of my school."

Mr. HANCE. My question, though—I cannot get an answer, and Mr. MATSUI cannot get an answer—is the gentleman addressing something that came up in 1978 and in addressing that, is the gentleman hitting on another problem that came up last year that the administration brought about on the Bob Jones thing? If the gentleman is, he just needs to tell everyone that if they vote for this, "If you vote for this you can discriminate and get tax-exempt status?"

That is the question we have.

Mr. DORNAN of California. No, I think the Bob Jones thing is a totally separate case. I just think the Bob Jones thing was not anything that the

late John Ashbrook, a 22-year Member of this body, or I had in mind when we first put in these amendments to stop the IRS from taking the prerogatives of the House of Representatives and writing law, even for good purposes.

Mr. HANCE. One more question. The legislative intent behind this amendment is not to do anything about the Bob Jones situation, that that is a separate thing?

Mr. DORNAN of California. Correct.

Mr. HANCE. And these are two different things, the gentleman is saying?

Mr. DORNAN is California. Correct.

Mr. HANCE. Many of us were totally opposed to what the administration did on the Bob Jones thing and we still oppose that action.

Mr. DORNAN of California. I was opposed to what the administration did.

Mr. HANCE. The gentleman is saying they are two different things?

Mr. DORNAN of California. Yes. I reemphasize, I was opposed to what the administration did.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to ask this House to consider that we have a Supreme Court decision pending, and I think we should rest for it. But, quite apart from the technicalities as to whether or not this is different from the Bob Jones and Supreme Court cases, I think we should consider very carefully what we are doing here, because we are dealing to some extent in symbols. We are dealing in ideas and thoughts that echo in peoples' hearts and that we cannot ignore.

Every agency of Government, whether it is the Internal Revenue Service or any other, should be concerned with discrimination, and the suffering and the injustices that so many of our people have suffered. That any section of our Government should even appear to be condoning such actions is intolerable. The symbol of what we are doing here is important. It is not the technicalities that people are going to remember. It is what direction are we taking and the principles we hold to.

Do we really care about injustices? Are we prepared to say that every single agency of our Government must see to it that injustice is stopped? I oppose the amendment.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I think what we see happening in the House now is what quite often happens when an amendment like this is offered, and suddenly the awareness of what this amendment means really begins to get through to our offices, where many of us were watching this debate, and Members began to suddenly say, "Wait a minute, we are about to vote on something that could have a tremendous significance in this country, far greater than just a simple little amendment restricting the IRS from doing something."

You know, it is always sort of popular to say: "Well, it's the IRS and that bureaucracy that is always telling the country what to do. After all, we make the laws in this country, so let's vote for the Dornan amendment."

Well, I can tell the Members very plainly that this amendment carries with it a very strong message, and regardless of what the author of the amendment may say, this amendment says that discrimination is not going to eliminate tax deductions for institutions that choose to discriminate; and, besides, they are saying it really is not our business.

Now, the administration tried to say it really was not anybody's business a year ago, and there was a genuine outcry in this country from people who were not involved in the political process, who said, "Listen, there are some very basic issues at stake here, and this country does not tolerate, does not stand for discrimination, and certainly in educational institutions that are receiving tax deductions and people can receive tax deductions by giving to them, and they are tax exempt, that somehow we should let that go."

So, I say to my friends in the House, this is a serious amendment. This is a critical amendment, and the message that would go out across this land if we pass it now, in light of the matter being in the Supreme Court, in light of the changes that the IRS has made, that we in this body are saying that discrimination somehow is really all right.

To my friends, I say let us defeat this amendment. Let us send a message that is very clear, that says this is not what this country stands for. We are better than that.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment, and let me say that in my opposition I intend no way to denigrate the reputation or the intent of the maker of the amendment. As I understand it, my dear colleague from California has participated in the civil rights marches, marched with Dr. King, and I commend him for that. I cannot commend him for the amendment, however, because as the distinguished gentlewoman from New Jersey has pointed out, it is the climate—the climate in which he introduces his amendment.

Last year I conducted hearings in the city of Baltimore upon KKK activities and Nazi activities. We heard testimony from Federal, State, and local people. The horrible thing that was disclosed was that during the course of the year there had been 100—100 incidents against minorities in the State of Maryland. The executive director of the State Human Relations Commission pointed out that only 1 out of every 4 such incidents are reported, which means that in my State there were 400 such incidents, and the bulk of them occurred in Montgomery County, which had been known as a bastion of liberalism. That is a climate.

I recently spoke to the NAACP chapter in Prince Edward County, Va. The sordid history of that school situation is well known. In defiance of school desegregation, the school was closed for 5 years, and black students had to go out of State to get a high school education. It is now a private school with no black enrollment. The specious argument is raised, or the response is raised to my question as to why are there no black students, the argument is raised that no blacks have applied. That is part of the climate.

The third point I wanted to make is that Mr. Pendleton, who is now Chairman of the U.S. Civil Rights Commission, a Reagan appointee, recently released a report by his Commission that points out indisputably and without any equivocation that the disparity between black unemployment and white unemployment rates is clearly based upon racial discrimination, despite the extension of law in every category.

□ 1810

My dear colleagues on the floor of this House, I think we would dishonor, this House if we were to pass the gentleman's amendment. I think it would do dishonor because wittingly or unwittingly, knowingly or unknowingly, you will be contributing to this climate which I know you do not want to do.

BOB DORNAN, I know you do not want to do that, and I would almost ask you to withdraw your amendment, but that would be too much.

I would hope that you would, knowing your fine reputation in terms of civil rights. But in the absence of withdrawing it, the only thing I can ask my colleagues to do is the honorable thing. The honorable thing, the decent, the just, the democratic thing, is not to aid and abet a climate which is increasingly racist, a climate in which we find increasing evidence of a resurgence of racism.

If you vote for it, whether you like it or not, that is the signal that you are sending. I am almost making a personal appeal to you to at least withdraw it as of this time and let the Court act.

Mr. DORNAN of California. May I respond to the gentleman?

Mr. MITCHELL of Maryland. I yield to the gentleman.

Mr. DORNAN of California. Your words are very eloquent and moving and they do not fall on deaf ears. I would agree with you that the climate has worsened in many pockets around this country.

The reason I say pockets instead of areas is because I took note in the news magazines that many blacks were elected to statehouses all across this country, that we have hit a high watermark that if you just go back 10 years this is not the same country.

When I joined the Air Force they had just stricken down segregated units.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. MITCHELL) has expired.

(By unanimous consent Mr. MITCHELL of Maryland was allowed to proceed for 3 additional minutes.)

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. DORNAN of California. I will try to be brief.

Of course we do not have to go back to 1925 when 25,000 hooded weirdos came to this city. Here we have two dozen people being vanned around by the police with five times as many police escorts as there were numbers of Ku Klux Klanners here. I can understand the rage it created in people.

But my problem here is a problem of conscience about the power of this House not being exercised and sloughing it off to the IRS which is a creature of this House and the Power of the purse belongs exclusively to the House of Representatives.

Mr. MITCHELL of Maryland. I will reclaim my time because we are talking about the same thing at two different levels.

I, too, am talking about the matter of conscience. It is conscience and morality on my side and yours is procedure of the House and powers of the House on the other as you perceive them.

Let me just clear up some things for the gentleman. Yes, more blacks have been elected to public office, but did you know that the rate is decreasing steadily from where it was 10 years ago? The rate of increase of black elected officials is decreasing, not increasing. That is the climate that we are dealing with.

I would also like to point out to my very distinguished colleague that it is virtually impossible to say things are the same as they were during the 1960's. The gentleman is right.

But in my perception, America is traveling two roads. One, a high road with regard to a certain group of black people, and another is a low road, and the momentum is picking up on that low road.

The high road reflects itself in the election of this fine young man from Missouri, Alan Wheat, who won in an all-white district. That is the high road.

The low road is reflected in a disproportionate unemployment rate where one out of every five blacks is unemployed.

Mr. Pendleton, Mr. Reagan's appointee, says the reason in part for that is racial discrimination.

Let me put to you the bottom line. Your amendment would undoubtedly facilitate and encourage those who would travel the low road. I think you will not withdraw it. I wish you would because of my respect I have for you. But in the absence of your withdrawal I would simply ask the House to overwhelmingly vote this down and do not send the wrong message.

Mr. ROYBAL. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto be limited to 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. CONYERS. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SHANNON. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

I rise to make an inquiry of the gentleman. I was here when the colloquy between the gentleman from California and the gentleman from Texas took place. It was my understanding that the gentleman from California stated that it was not his intention to have this amendment have anything to do with the Bob Jones case, that the Bob Jones case would not be affected by this amendment. Is that correct?

Mr. DORNAN of California. Will the gentleman yield?

Mr. SHANNON. I yield to the gentleman from California.

Mr. DORNAN of California. I did not make a great study of the Bob Jones case that is now before the Supreme Court other than to observe that it was wrong of the administration to change the signals there, that it was a bad message sent out across the country that might give wrong signals.

However, the hue and cry which I joined in condemning the change of signals I think sent an even stronger message that shows that this Nation gets better. Maybe the acceleration rate or the improvement of race relations is not what it should be, but each year it is better than the preceding year.

Because I am not deeply familiar with the Bob Jones case, because, after all of its ramifications, all I can do is say that if the courts are going to take away the powers of the Congress of the United States, particularly this House of Representatives, the power of the purse, that is wrong. It is unconstitutional.

The main, simple point I want to make here is that if we want to give this power to the IRS let us do it in clearer language than the power that they accumulated to themselves.

Mr. SHANNON. If I can reclaim my time, it seems to me what the gentleman is trying to do is to take away the power of the courts to enforce the Constitution.

Mr. DORNAN of California. The courts do not have the right to spend money.

Mr. SHANNON. What you are saying is notwithstanding what the courts should decide in this case that under no circumstances should the IRS be given the tools necessary to enforce a court decision which would deny tax exempt status in the Bob Jones situation.

What tools would be left for the IRS to enforce a court decision should the Supreme Court rule against Bob Jones University?

Mr. DORNAN. If the gentleman will yield, when we first discussed this in an informal session with the distinguished gentleman from New York (Mr. RANGEL) we agreed on both sides of the aisle that this Congress was not imaginative enough with specific laws to root out those last vestiges of discrimination in this country, to give our power to a tax collecting body, to cause tax exemption subsidies, which they are not be definiation——

Mr. SHANNON. I will reclaim my time.

The issue in the Bob Jones case is who should be allowed tax-exempt status. If you are going to say to the tax-collecting agency of the Federal Government "You shall not be allowed with funds appropriated by this Congress to enforce a court decision, a Supreme Court decision," what are you saying?

What you are saying is the Court can decide what it wants but the Congress shall not let the Internal Revenue Service do what the Court says is consititutional.

I think that would be the case. I know the gentleman is one of the great nationally known conservatives and I have heard the gentleman on the floor of the House of Representatives make speeches about the Constitution time and time again. What you seem to be saying here is no matter what is held constitutional or unconstitutional by the Supreme Court, this Congress shall not recognize that; we shall not say to the Internal Revenue Service that it shall live by the Constitution.

In fact, we shall deny it the means to live up to its constitutional obligations should the Court rule against the Bob Jones University.

I do not understand the gentleman's reasoning.

Mr. DORNAN of California. If the gentleman will yield one further time for a response?

Mr. SHANNON. I am happy to yield.

Mr. DORNAN of California. The gentleman is treading on very peculiar ground here. If the gentleman will avail himself of the 501(c)(3) book he will find out in the great Commonwealth of Massachusetts that there is a tax-exemption status for a witches' coven of lesbians of New England.

There are all sorts of weird groups in that fat 3- or 4-inch book that most of us in this House would say is not American.

Mr. SHANNON. That might be the case. If the Supreme Court of the United States says under the Constitution they are not entitled to that tax-exempt status then we as Congressmen are not living up to our responsibility if we deny the Internal Revenue Service its ability to enforce that court decision.

Mr. DORNAN of California. It is pretty arbitrary to give the IRS the power to give witches' covens tax-exempt status.

Mr. SHANNON. We are talking about a pending Supreme Court case. The language the gentlemen has proposed would take away the only tool, the only tool that the Federal Government has to enforce that decision.

Mr. DORNAN of California. I am not that pessimistic.

Mr. SHANNON. Should the Court rule against Bob Jones University.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. I am happy to yield.

□ 1820

Mr. FRANK. I thank the gentleman.

Mr. Chairman, I never thought I would be privileged to be actually present on the floor when a genuine witch hunt was in progress. And I congratulate the gentleman from California for launching one. But if he wants to make this a comparative question, I would say, based on my experience, racial discrimination and bigotry are doing a lot more harm in America today than witches. I congratulate the IRS on its priority in going after the bigots.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. SHANNON) has expired.

(By unanimous consent, Mr. SHANNON was allowed to proceed for 1 additional minute.)

Mr. SHANNON. Mr. Chairman, I just want to say that what we are talking about here is very specific language which clearly, would prohibit the enforcement of a constitutional decision should the Supreme Court rule in a given way on a case now pending before the Court.

I think that this is a case where, whether we are liberals or conservatives, or however we feel on the substance of this issue, the smartest thing for us to do, the prudent thing for us to do is to wait for the Court to rule, not to interfere at this point, but to wait for the Court to rule, see what situation we are presented with then, and if the gentleman or any other gentleman or gentlewoman on the other side of the aisle is unhappy with that decision, wants to come to Congress and within the limits of that decision propose any policy changes, I welcome them to do it. But I just think that we are interfering terribly with our constitutional processes if we act now.

Mr. HANCE. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. I yield to the gentleman from Texas.

Mr. HANCE. Mr. Chairman, I think the gentleman is right. But the problem is, in looking at this amendment and the next amendment, what the gentleman is talking about comes up on the next amendment by the gentlewoman from Ohio (Mrs. ASHBROOK) that talks about a court order.

Mr. SHANNON. Let me just reclaim my time. What got me into this was the assertion of the gentleman from California to the gentleman from Texas that his language did not affect the Bob Jones case. And it seems to me that it clearly does.

Mr. CAMPBELL. Mr. Chairman, I move to strike the requisite number of words, just to inquire of the gentleman from California, after this colloquy that I just listened to: Would the gentleman tell me whether his amendment would prevent the IRS from enforcing a court order, once something is ordered as the law of the land? Is there anything in yours that would stop them?

Mr. DORNAN of California. No. The court rights in Mississippi were very clear. And this all took place during the very period that these amendments were given their genesis by Congressman John Ashbrook and myself. We still have a rule of law here. The main thrust, whatever signals it may send out, my amendment and the amendment to follow, is that this House should never give its power to legislate to a tax-collecting body, the IRS.

Mr. CAMPBELL. Let me ask a second question: If it would not inhibit the court order and would not prevent enforcement of the court order, is there anything in this amendment or is the gist of this amendment to prevent an agency from promulgating rules and regulations as a law itself? Is that what you are aiming at?

Mr. DORNAN of California. Yes.

Mr. CAMPBELL. I want to know exactly where you are headed.

Mr. DORNAN of California. What is amazing to me is, I cannot believe that this body, in the 6 years that I have been here, has not been able to form legislation in our 19 standing committees could rifle-shot laws at discrimination in this country in a private school system or a public school system. I do not believe that this is the only tool, using the IRS as the House of Representatives. I find that pessimistic in the extreme.

Mr. CAMPBELL. What you have told me is that your amendment is aimed at not letting an agency establish a rule that becomes law.

Mr. DORNAN of California. Correct.

Mr. CAMPBELL. That it does not seek to inhibit the court ruling or the enforcement of a court ruling. Are those two assumptions correct?

Mr. DORNAN of California. Correct.

Mr. CAMPBELL. The third question I want to ask: I have heard a great deal about private schools. I am opposed to any private school that has a policy of discrimination on entrance or any other matter. I am concerned, on the other hand, with religious freedom and rights. Now, do I understand your amendment to be addressed to the prevention of the IRS moving into religious beliefs? Is that basically what you are headed for?

Mr. DORNAN of California. Yes. Even in this period of cults and manifestations of all sorts of weird groups, the Guyana tragedy, the nightmare death of 900 people was fresh in our minds. There has got to be more imaginative ways for this Congress to face up to the cult phenomena in the country without the taking away of the religious rights of religious organizations or putting a cloud over all of them.

Mr. CAMPBELL. Is there anything in your amendment—let me take it one step further—that attempts to define what is or is not a religious belief that is legitimate?

Mr. DORNAN of California. Of course not; no.

Mr. CAMPBELL. Is that not the question before the Supreme Court now?

Mr. DORNAN of California. I believe so.

Mr. CAMPBELL. Your amendment does not address it, then, does it?

Mr. DORNAN of California. That is correct.

Mr. CAMPBELL. So your amendment does not address anything dealing with a pending case nor religious beliefs, but it deals strictly with the promulgation of rules and regulations by an agency of Government?

Mr. DORNAN of California. Correct. I think the Supreme Court showed a lot of interest in this tough Bob Jones case, which does involve religious beliefs. And I think we will be talking about that for the rest of our lives.

Mr. CAMPBELL. But that is a different matter.

Mr. DORNAN of California. But that is a different matter. That is not what my amendment is all about,

which is to restrict the power of the IRS and to stop them from abrogating our power.

Mr. HANCE. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman from Texas (Mr. HANCE) is recognized for 5 minutes.

There was no objection.

Mr. HANCE. Mr. Chairman, I would ask the gentleman from California a couple of questions. First of all, in looking at the gentleman's amendment, it is exactly like the amendment that came up in 1981, in July 1981. It is the same thing, and it speaks to the language that was in the IRS ruling in 1978.

I would ask the gentleman to withdraw his amendment, because that language has been dropped by the IRS. It is no longer a pending regulation.

This amendment would have been subject to a point of order had someone made it at the proper time.

The argument that the gentleman is getting into and that all of us have been getting into really is on the court ordered thing that comes up in the amendment of the gentlewoman from Ohio (Mrs. ASHBROOK), in the next amendment. And it seems that we are discussing a moot question so far as the gentleman's amendment is concerned because it has been withdrawn. And I would ask the gentleman to withdraw his amendment since the IRS no longer has this pending.

Mr. DORNAN of California. I appreciate that counsel, but I do not have as much faith in the IRS as the gentleman does. It was arbitrarily put in, in the first place, at the instigation of agents of the IRS, and I would just like to get a vote on it and leave it in the language of the bill where it has been for 3 years.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, now we have it clearly revealed. Is there a man or a woman in the Chamber who does not understand the intent of this amendment? Is there anybody who will read about this amendment and will examine the votes to whom it is not clear on what is the purpose and the intent of the gentleman from California? Do you see where it relates to the Jones case? Is there someone here who really believes that the purpose of this is not to send the signal to the Supreme Court? If there is, I will yield to him or her at this time.

Now, since we all understand that, we are back to the basics. It is not to say that these kinds of amendments have not disgracefully carried in the House in years past. We all know they have. But now is the time for this body and the Senate to speak clearly to the question that persists in the American political system.

So I do not speak to the gentleman from California who engineered this amendment, who knows what he is doing, who has rather disingenuously denied what the effects are and what the message is.

I might disagree with my colleague from Massachusetts. He happens to be a civil rights supporter. We have got a man who has marched with King offering an amendment to defend segregation in the private school systems.

□ 1830

And we are sitting around acting as if we were not quite sure if that is what it is all about. "But we are merely trying to keep the IRS off the people's backs. We want to make it clear that the Congress has the sole responsibility."

But the youngest child in the public school system in the First District of Michigan understands clearly what the amendment is about.

And so that everybody who votes here this afternoon will once again put the highest Federal legislative body in this country on record.

I hope that we will change its record. Notwithstanding the superficial problems of our society, the question is very simple: Will the Federal legislature countenance segregation in the private school systems with or without Federal money? I hope that that answer would be as obvious as it will be to everybody in the First District of Michigan.

Mr. PANETTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, very briefly, I think the points have been addressed. But I think it needs to be stressed that the amendment goes over regulations which were proposed a number of years ago and in fact withdrawn in 1979. So that the amendment, even if enacted, addresses regulations which in effect have been withdrawn and are no longer in place.

The issue then comes up, are these regulations going to be reissued, then, by the Department of the Treasury. And if anyone believes that President Reagan and Secretary Regan are going to move to reissue regulations developed in the Carter administration, then I am not sure they are dealing very correctly with reality.

The fact is that that is not going to happen, that they are going to await the Supreme Court's decision on this issue, and then determine what actions need to be taken, either by the IRS or indeed whether Congress itself decides to move on this issue.

So I would state this. Rather than send a message to the American people that might be interpreted as advocating a tax benefit for segregated schools, it would be far better for us not to take this action, to reject this amendment and to allow the court to proceed to make its interpretation as they will, and then allow the administration and the Congress to take whatever action would in effect implement that decision by the court.

So I would urge rejection of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. DORNAN of California. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1840

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have responded. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from California (Mr. DORNAN) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. DORNAN OF CALIFORNIA

Mr. DORNAN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN of California: Add a new section as follows: "None of the funds appropriated by this title may be used to carry out any revenue ruling of the Internal Revenue Service which rules that a taxpayer is not entitled to a charitable deduction for general purpose contributions which are used for educational purposes by a religious organization which is an exempt organization as described in section 170(c)(2) of the Internal Revenue Code of 1954."

Mr. DORNAN of California. Mr. Chairman, my amendment is identical to the one that had been part of the Treasury, postal appropriations bill since 1979 and which was deleted this past summer in subcommittee. The object of the amendment is to insure the survival of the private religious schools of this land by continuing to allow taxpayers a charitable deduction for general purpose contributions to such institutions.

My amendment has as its basis an unfair IRS ruling (Revenue Ruling 79-

99) against parents who had their child in a Lutheran church school in Houston, Tex. The question was whether a church member was entitled to a tax deduction for contribution to his church if his child attends a parochial school financed solely by all the members of the congregation. The IRS ruled that the church member was not entitled to a tax deduction unless his contributions exceeded "the fair market value of the child's education." But the parish school in question charged no tuition and was financed solely by funds solicited from church members, whether or not they had any children in school. It clearly follows that if the IRS denies tax deductions for such purposes, many of these schools will be forced to close.

Revenue Ruling 54-580 under which we have lived in this country for nearly 30 years states the matter quite clearly:

> The amounts paid in the present instant case likewise were made for the benefit of a particular child or children, and therefore cannot be regarded as contributions or gifts to organizations, involved in operating the schools. However, payments made to or for the use of such organizations in carrying out their general purposes and not in any way earmarked for the benefit of particular children would constitute deductible contributions under section 23-0 of the Code.

The type of revenue ruling which my amendment seeks to prohibit is unfair for another reason. All of us pay State income taxes. If we had these taxes withheld from our paycheck during the course of the year, we could deduct them from our Federal income taxes. Yet, did not some of our sons and daughters go to public school? Paid for with these taxes? And is that not a personal benefit?

So, according to this new theory of the IRS, you can pay certain taxes and derive an incidental personal benefit, and declare this as a deduction on the 1040. But if you make a contribution to a group which is tax exempt, and derive an incidental benefit, you cannot deduct it. This is patently unfair.

Mr. Chairman, there are many prominent organizations that support my amendment including the American Association of Christian Schools, the Association of Christian Schools International, and Citizens for Educational Freedom. I urge adoption of the amendment.

Mr. ROYBAL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment would have the effect of giving a tuition tax deduction to taxpayers who send their children to some type of private school.

The tuition tax credit as a whole is now under consideration by the appropriate committees of the House. This is a recommendation by the President of the United States to the legislative body of the Nation. It seems to me that we should permit the legislative body of the Nation to take action on this very important subject matter.

I ask that this amendment be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DORNAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. DORNAN of California. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. PHILIP M. CRANE

Mr. PHILIP M. CRANE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. PHILIP M. CRANE: On page 48, after line 13 add the following new section:
>
> SEC. 619. None of the funds made available pursuant to the provisions of this Act shall be used to formulate or carry out any rule, policy, procedure, guideline, regulation, standard, or measure which would cause the loss of tax-exempt status to private, religious, or church-operated schools under section 501(c)(3) of the Internal Revenue Code of 1954 unless in effect on the date of the enactment of this Act into law.

□ 1850

Mr. PHILIP M. CRANE. Mr. Chairman, as ranking minority member on the subcommittee that has responsibility for oversight over the Internal Revenue Service, I must stress the importance of public confidence in the integrity of officials who are responsible for collection of the Nation's taxes.

That public confidence has certainly not been enhanced by the revelations of collusive litigation which was used by the IRS to cause usurpation of congressional legislative power by the Federal courts. My office has carefully reviewed these extremely serious allegations of IRS involvement in the sweetheart suits of Green against Miller and Wright against Miller.

We have found overwhelming evidence that the IRS deliberately sought to lose its case in Green against Miller, and has so seriously damaged its case with sweetheart arguments in Wright against Regan, that a nationwide court order adversely affecting the Nation's tax-exempt schools and churches appears likely within a year.

The facts are indisputable. Secret meeting, abuse of religious schools, abuse of third party intervenors rights, sweetheart arguments made by the IRS in order to lose it case, public statements by IRS officials that indicated no desire to win the court case, lobbying against the Ashbrook and Dornan amendments, and violation of the amendments after their enactment—is there any wonder that the public should question the integrity of a Government agency that has clearly participated in such an elaborate sham? Is there any wonder at the growing outrage at the Federal courts who allowed and even encouraged it?

This matter now challenges the integrity of this House. This body cannot allow such corruption of judicial process to be sued for usurpation of the legislative power delegated only to Congress in the very first sentence of the Constitution. Article 1, section 9 also gives the power over the purse to Congress alone. If Congress tolerates such defiance by the IRS and the Federal courts, of its legislative enactments, the legislation branch will surrender its most basic powers, and Congress will be transformed into a futile debating society, a nuseum of bygone representative government.

Mr. Chairman, a vote for the amendment is a vote to restore the integrity of the legislative process. It is also a vote to protect churches and the private and religious schools of the Nation from IRS harassment.

We have heard during the course of the debate on the Dornan amendments a great deal of heated rhetoric that does not properly address the responsibilities that this body has. Each one of us is something of a constitutional jurist, if you will, since we swear faithfully to uphold the Constitution when we are sworn in. We have a coequal responsibility with the court and most expecially with the executive branch.

When one analyzes the suggestion that a defense against bureaucratic regulations, guidelines, or rules designed to promote some ill-defined national or public policy in the absence of statutory guidelines, which incidentally this administration called for in January of this year and this body has yet to act on is inappropriate is to abdicate our responsibilities. We have a responsibility to assert our obligation to the taxpaying citizens of this country, and most especially in the area of protecting fundamental religious freedoms.

I am talking about religious freedoms. I am not talking about the racial question, because any school that practices racial exclusion at the present time can be denied its tax-exempt status.

Second, I think it is important to recognize that there are, unquestionably, schools in this country which have not sought tax-exempt status because they do believe in racial exclusion. And the IRS cannot touch them.

Under the existing law, we cannot address that problem by this question involving tax-related matters. This amendment, incidentally, is the precise language that our late colleague, John Ashbrook, got passed last year in this same appropriation bill. We are living under this language right now. This amendment is consistent with our constitutional responsibilities as

the protectors of the rights and the purse of the body politic.

Mr. Chairman, I yield back the balance of my time.

Mr. ROYBAL. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from California is recognized.

Mr. CONYERS. Mr. Chairman, will the chairman of the subcommittee yield?

Mr. ROYBAL. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding.

Mr. Chairman, could we be advised as to how many more amendments like this we have to go? I am delighted to be back into session, but the hour is growing a little bit late.

Mr. ROYBAL. It is my understanding that there is one more amendment that will be presented.

I would like, however, to inquire from the minority if that assumption is correct. Is it true that we have one more amendment to discuss?

Mr. MILLER of Ohio. Mr. Chairman, will the gentleman yield to me?

Mr. ROYBAL. I yield to the gentleman from Ohio.

Mr. MILLER of Ohio. I thank the gentleman for yielding.

Mr. Chairman, I have a recommittal motion.

Mr. ROYBAL. The question which has been propounded is, how many amendments do we have left? My response to the gentleman from Michigan (Mr. CONYERS) was that it was my understanding that only one amendment is left. Am I correct in that assumption?

Mr. MILLER of Ohio. If the gentleman will yield further, as a matter of fact, now I understand that the gentleman has offered the amendment the chairman of the subcommittee was speaking of and we do not have another amendment left other than a recommittal motion.

Mr. CONYERS. I thank the gentleman.

Mr. ROYBAL. I thank the gentleman for his question.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois, Mr. PHILIP M. CRANE.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PHILIP M. CRANE. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

This Act may be cited as the "Treasury, Postal Service, and General Government Appropriations Act, 1983."

Mr. ROYBAL. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. FOLEY) having assumed the Chair, Mr. STUDDS, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 7158) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MILLER OF OHIO

Mr. MILLER of Ohio. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. MILLER of Ohio. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MILLER of Ohio moves to recommit H.R. 7158 to the Committee on Appropriations, with instructions to that Committee to report the bill back to the House forthwith, with the following amendment: On page 48, after line 13, add a new section as follows:

SEC. 619. Of the total budget authority provided in this Act, for payments not required by law, 2 per centum shall be withheld from obligation and expenditure: *Provided*, That of the amount provided in this Act for each appropriation account, activity, and project, for payments not required by law, the amount withheld shall not exceed 4 per centum.

□ 1900

Mr. MILLER of Ohio. Mr. Speaker and Members, I will not take the 5 minutes. Many of you know about my percentage cut amendments. In this case, in this particular bill, I am offering an amendment of 2 percent, which would reduce the nonmandatory spending in the bill 2 percent. That would be a total of $116.6 million. That is a small amount compared to the total in the bill, of $10.772 billion.

Now, on the mandatory spending, the mandatory spending in the bill would not be affected by this amendment. Only the nonmandatory spending would be cut. We would reduce it by $116.6 million.

Now, the way my amendment works is that no line item of discretionary spending in the bill could be reduced more than 4 percent, and this means that we could stack up all the nonmandatory spending items and put the high priority at the top, winding up at the bottom with the lowest priority. We could take no dollars out of the high priority, but twice as much out of the low priority. That is what the amendment does. It is a 2-percent total reduction on overall nonmandatory spending, and I hope that the Members would support the amendment.

Mr. ROYBAL. Mr. Speaker, I rise in opposition to the motion.

Mr. Speaker, while the motive behind the motion of the gentleman from Ohio is to be commended; that is, its ultimate intent, I still feel that this motion must be opposed because of the fact that it reduces funding for important functions in the Federal Government. First of all, it reduces by many millions of dollars, or possibly billions of dollars, the revenue that will be collected by the Federal Government through the Internal Revenue Service. This means that if this amendment is adopted, that the Internal Revenue Service will lose internal revenue agents, who are devoting their time to the collection of revenue. It would also mean that Customs, for one example, would have to reduce its activities with regard to the trafficking of illegal drugs being smuggled into this country.

I think it would have a very detrimental effect on the overall basic operations of this Government. I think that the amounts in the bill at the present time are actually the minimum amounts necessary. I feel that the time will come when the amounts appropriated will need to be increased because the need will so demand it. I am sorry that we are unable to agree with this motion at this time, but to make that reduction I think would be counterproductive.

I urge a "no" vote on the motion by the gentleman from Ohio (Mr. MILLER).

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. MILLER of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present. Pursuant to the provisions of clause 5 of rule XV, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the question of passage of the bill. Fifteen minutes will be permitted on the vote on the motion to recommit with instructions and a minimum of 5 minutes on any vote, if ordered, on passage of the bill.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 193, nays 172, not voting 68, as follows:

□ 1920

The Clerk announced the following pair:

On this vote:

Mr. Nelson for, with Mr. Roe against.

Mr. DOWDY changed his vote from "yea" to "nay."

Messrs. YOUNG of Missouri and ASPIN changed their votes from "nay" to "yea."

So the motion to recommit was agreed to.

The result of the vote was announced as above recorded.

Mr. ROYBAL. Mr. Speaker, pursuant to the instructions of the House, I report the bill back to the House with an amendment.

The SPEAKER pro tempore (Mr. FOLEY). The Clerk will report the amendment.

The Clerk read as follows:

Amendment: On page 48, after line 13, add a new section as follows.

SEC. 9. Of the total budget authority provided in this Act, for payments not required by law, 2 per centum shall be withheld from obligation and expenditure: *Provided,* That of the amount provided in this Act for each appropriation account, activity, and project, for payments not required by law, the amount withheld shall not exceed 4 per centum.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The Chair will again state that Members will have 5 minutes in which to record their votes.

The vote was taken by electronic device, and there were—yeas 269, nays 98, not voting 66, as follows:

[Roll No. 401]

Mr. BEREUTER changed his vote from "no" to "aye."

□ 1930

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROYBAL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill, H.R. 7158, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DRAFT BILL TO AUTHORIZE APPROPRIATIONS FOR CONSTRUCTION OF CERTAIN HIGHWAYS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-259)

The SPEAKER pro tempore (Mr. FOLEY) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Public Works and Transportation and the Committee on Ways and Means and ordered to be printed:

(For message, see proceedings of the Senate of today, Tuesday, November 30, 1982).

PROPOSED GASOLINE TAX

(Mr. FLORIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLORIO. Mr. Speaker, America needs jobs. America needs restoration of its roads, bridges, and other public works. America needs a common effort through Federal initiative that will deal with our crumbling economy. But what America does not need is the Reagan administration's approach to our economic crisis.

The Reagan administration is supporting a hike in the gasoline tax. But this measure—along with the rest of the Reagan program—does too little, does not aim at the right targets, and compounds the unfairness of last year's tax cuts.

The gasoline tax and the proposal to use it to produce a few hundred thousand jobs is a drop in the bucket. At a time when the country is faced with a rising tide of unemployment, this response is inadequate. This token program does not begin to address the problem of unemployment in the millions. President Reagan acknowledges that this is not a jobs bill, and I agree with that.

Even as to the few jobs the gas tax will fund, it fails to come to grips with the problem we face. People are at the end of their resources, and, as the recent election demonstrated, at the end of their patience. There is an urgent need for jobs now, not the many months that it will take to crank up a roadbuilding program.

To meet the urgent unemployment problem, what we need is the kind of public works program that Congress has initiated in the recent past through the Economic Development Administration. This would provide funds for projects which States and localities have on the shelf now—ready to go. Money should be available and hiring under way within 90 days.

Not only is the administration program to little and improperly targeted, but it compounds the unfair and regressive tilt of the entire Reagan economic program.

Of course we need to rebuild America's decaying infrastructure. In fact, this effort is only the beginning of the list of neglected items on the Federal agenda. Our crumbling intangible resources—such as education, training, and technical know-how—are also in need of repair. But we should not pay for these things through a tax system that favors the affluent.

Yet that is what the Reagan program has done. The budget and tax cuts of last year drastically tilt our finances toward those in the top brackets. Hard-pressed States—such as my own State of New Jersey—have imposed or are considering new sales and excise taxes. At a time when people

have been asking for tax reform, they are being asked to accept a more and more regressive tax system. By piling on additional regressive taxes like the proposed gasoline tax, we will only aggravate this unfairness.

Instead, in order to fund the rebuilding of our tangible and intangible resources, we should recapture the revenues of the regressive across-the-board cuts of last year. We should give serious consideration to deferring or eliminating the out-year tax cut, for a potential 2-year saving of $70 billion. And we should seriously consider eliminating indexing, for a saving of $40 billion over 2 years. By eliminating indexing, we will also remove other inequities, restore a powerful incentive to fight inflation, and help avoid the kind of financial disaster that overtook Canada after its experiment with indexing.

We need jobs. We need roads. We need Federal action. We need a fair program to achieve these. The gasoline tax is not such a program. In fact, it is a substitute for a program. It is the administration's way of saying it has done something when it has not.

THE SOCIAL SECURITY MISCELLANEOUS AND TECHNICAL IMPROVEMENTS ACT OF 1982

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, today I am introducing a bill entitled, "The Social Security Miscellaneous and Technical Improvements Act of 1982." As is implied by the title, this bill contains a series of amendments of title II of the Social Security Act which are either relatively minor or technical or both. Absolutely no social security financing changes are contained in this bill. Nor are there any provisions which would significantly affect benefit amounts or eligibility.

The amendments fall within four separate titles. The first title would result in increased moneys for the social security trust funds by improving the current cash management of the funds. Most importantly, the value of unnegotiated benefit checks would be transferred to the funds from the Treasury, and current investment practices would be amended to allow the Secretary of the Treasury to invest the assets of the funds more profitably than is currently allowed. While the trust funds' cash flow would be improved by the title, this is accomplished without detriment to the general fund. These are prudent changes which are overdue.

Title II of the bill corrects 10 provisions of the Social Security Act which treat people differently solely on the basis of their sex. These provisions are often referred to as "gender-based distinctions." In recent years the effect of these distinctions has been eliminated either through court orders or through administrative action of the Social Security Administration. It is still important, however, to remove the discriminatory statutory language from the act. Concerning these amendments, I would like to acknowledge the leadership which our colleague, JOHN BURTON of California, has shown on this issue over the years.

Title III deals with seven issues concerning the coverage of certain work or wages under the social security system. Four of these provisions are in the nature of technical corrections. The other three miscellaneous provisions extend coverage either in specific areas in which coverage has been requested or in areas where it is now possible to structure an employment relationship or treat compensation so as to avoid social security taxes. While depriving the trust funds of revenues, such practices also result in entitlement to reduced social security benefits at a later date, an effect often unbeknown to the worker at the time of employment.

The final title includes a series of unrelated changes to the Social Security Act. Many of these changes have been recommended by the last two administrations. These provisions are largely technical and definitely miscellaneous. They range from the effective date of extension of social security to the Northern Mariana Islands, a U.S. trusteeship, to the proper names of certain school districts in the State of Utah.

My current intention in introducing the bill at this time is not to press for its passage during the lameduck session. Rather, I intend to hold hearings before the Social Security Subcommittee on December 6, 1982. After this hearing, I would seek an agreement with the members of my subcommittee that, if there is no objection to a particular provision, it be set aside for the next Congress and included in the final title of next year's social security financing legislation.

I am mindful of the fact that one Congress cannot bind another one to action. However, if we do not take this action, I fear that next year, as has happened in previous years, the pressure of considering more significant legislation will divert our attention from these relatively minor yet necessary changes. Following this proposed course of action will allow us to properly consider these changes and then set them aside as we undertake the task of restoring financial solvency to the social security system in the next Congress.

I conclude my remarks with a brief section-by-section analysis of the bill. In many cases revenue estimates are not provided. The social security actuaries have been working overtime in recent weeks and months to provide estimates to the National Commission on Social Security Reform. However, estimates on this bill will be available in the near future. The provision concerning unnegotiated checks would increase revenue by $500 million through 1989. In those other few instances where there would be some revenue or outlay effect, I have been told that the effect is minor.

SOCIAL SECURITY TECHNICAL IMPROVEMENT ACT

TITLE I. CASH MANAGEMENT

Section 101. Unnegotiated Checks.
Section 102. Float Changes.
Section 103. Investments of Trust Fund Assets.
Section 104. Interest on Late State Deposit.

TITLE II. GENDER-BASED DISTINCTIONS

Section 201-212.

TITLE III. COVERAGE

Section 301. U.S. Subsidiaries.
Section 302. International Agreement.
Section 303. Net Self-Employment Income and Foreign Earned Income Exclusion.
Section 304. Deferred Compensation.
Section 305. Standby Pay.
Section 306. Exclusion of Payments under Simplified Employee Pension Plans.
Section 307. Status of Certain Entities in the State of Utah.

TITLE IV. MISCELLANEOUS TECHNICAL AMENDMENTS

Section 401. Super Max.
Section 402. Northern Marianas.
Section 403. Non-Contributory Wage Credits.
Section 404. Delayed Retirement Credit.
Section 405. Special Insured Status.
Section 406. Illegitimate Children and First Month of Entitlement.
Section 407. Remarriage of Disabled Widow(er).
Section 408. One Month Retroactivity.
Section 409. Non-Assignment of Benefits.

TITLE I. CASH MANAGEMENT IMPROVEMENTS

Section 101. Accounting for certain unnegotiated benefit checks

Current Law and Discussion

Under current law the Social Security Administration certifies to the Department of the Treasury the amount of benefits to be paid to social security trust funds to a Treasury transfer account. Treasury then mails the beneficiaries their checks. However, some beneficiaries fail to cash their checks.

Social security benefit checks, as well as most other government checks, are not issued by Treasury under special program symbols. Because of this, Treasury is not able to readily identify what portion of government-wide uncashed checks are social security benefit payments.

Even if uncashed social security checks could be identified, under existing law, Treasury is authorized neither to cancel uncashed government checks nor to credit the value of those checks to the accounts upon which they were drawn. Accordingly, the social security trust fund is never credited for (1) any of the uncashed check amounts, or (2) any of the interest earned on these amounts. Instead, these funds remain in the Treasury account and are not available to the trust funds.

When government checks are cashed by recipients, they are returned to the Federal Reserve Bank where they are reviewed to insure proper credit to the financial institution for the amounts. A listing is then made of those checks which are not cashed. This listing summarizes uncashed checks on a government-wide basis and does not indicate what checks are social security checks.

In 1975 Treasury provided SSA with a sample of all outstanding government-issued checks. SSA analyzed the government-wide listing of uncashed checks for the year 1973 and established for that year a ratio of the amount of uncashed social security checks to the amount of all uncashed government checks. The 1973 ratio was then applied to the total amount of uncashed government-issued checks. As of 1975, SSA estimated the total amount of uncashed social security checks to be approximately $130 million. SSA has updated the estimate through 1982 and estimates that uncashed checks total $270 million. SSA currently estimates that the amount of uncashed checks in a year is approximately $30 million—totaling $500 million by 1990.

Proposed Change

Section 1 would enable the social security trust funds to be credited by the Secretary of the Treasury with the amount of funds representing social security checks that have remained unnegotiated for at least 12 months. The Department of Treasury would also be required to implement a system under which social security checks could be distinguished from other government checks and transfer to the trust funds on a monthly basis an amount equal to the value of all benefit checks which have not been negotiated for a period of 12 months. This system will be in place two years after enactment of this provision. Until this permanent system is in place, annually the Secretaries of Treasury and Health and Human Services shall jointly determine the amount of all outstanding uncashed checks from the previous fiscal year. (The initial determination shall include the amount of all uncashed checks since inception of the program.) The Secretary of the Treasury shall transfer these amounts to the social security trust funds within 60 days of the close of the fiscal year.

Checks which are older than one year will still be negotiable. If any check older than one year is negotiated, the trust funds will be debited accordingly.

Section 102. Float allowance revision

Current Law and Discussion

Social security benefit checks are issued to beneficiaries on the third of each month. (When the third of the month falls on a Saturday, Sunday or legal holiday, checks are issued on the first previous business day.) Current Treasury procedures allow a two-day float (three or four days when the third of the month falls on a weekend or holiday) before trust fund monies are actually transferred to the Treasury in order to pay the checks which have been issued. (The float period is the elapsed time between the issuance of monthly benefit checks and the actual transfer of trust fund monies to the General Treasury Fund in order to pay these benefits.) No float period is provided for that portion of total benefits which is deposited directly in beneficiaries' banking accounts. Currently this is approximately one-third of total benefit payments. Nor is a float period provided for retroactive benefit adjustment checks issued during the month.

A recent study completed by the Inspector General of the Department of Health and Human Services found that it took an average of 5.2 days for recurring benefit checks to clear through the banking system. Retroactive benefit checks required an average of 11.1 days to be processed. The Inspector General estimated that interest income to the OASDI funds would be increased by $91.5 annually million if a 5 day float period were provided.

Proposal

Section 2 of the bill would require the Secretaries of Treasury and Health and Human Services to conduct a study with regard to the "float period" and the redemption of benefit checks. The study shall consist of two separate investigations. As a result of the first investigation, the Secretary of Treasury shall report to the Congress and President within six months concerning the findings and adjust by regulation the current float period of two days to more accurately reflect the actual average length of time between the issuance of benefit checks and the redemption, if the current period is not equal to this actual average. The second investigation will report on the feasibility (in light of the check identification system to be implemented under Section 101) and desirability of providing for the transfer on a daily basis to the general fund from the appropriate trust amounts equal to the amounts of benefit checks which are paid by the Federal Reserve Banks on that day. The results of the second investigation shall be submitted to the Congress not later than twelve months after the date of enactment.

Regulations which are found necessary by the first investigation are to be promulated within six months of the date of enactment. Regulations found to be necessary to implement changes which are found appropriate by the second investigation shall be promulgated within twelve months of the date of enactment.

Section 103. Investment of the social security trust fund assets

Current Law and Discussion

The Social Security Act provides the following guidelines for the investment of that portion of the social security trust funds which is in excess of current obligations:

(1) funds not immediately needed to pay benefits or administrative expenses are to be invested solely in interest-bearing obligations guaranteed as to both principal and interest by the United States;

(2) the Managing Trustee (the Secretary of the Treasury) will invest in special public-debt obligations—"special issues" which are available only to the trust funds—except where he determines that the purchase of obligations which are available in the open market is "in the public interest";

(3) "special issues" shall have "maturities fixed with due regard for the needs of the trust funds" and will pay a rate of interest equal to the average market yield on all marketable interest-bearing obligations of the United States which are not due or callable for at least four years; and

(4) marketable securities purchased by the trust funds may be sold at the market price and special issue obligations are redeemable at par plus accrued interest.

The assumption underlying current law is that long-term interest rates usually will be higher than short-term rates. This is historically true. However, there are periods in which short-term rates temporarily exceed long-term rates. When short-term rates exceed long-term, as they did during much of 1981, current investment policies are criticized because the trust funds are being invested in "special issues" with lower yields than those available to other investors in government securities.

Proposed Change

Section 103 would modify the current special issue interest rate formula and maturity date selection procedure to more closely link interest rates and maturity dates. The proposal would provide two different interest rates—the current long-term rate and a new short-term rate which would be equal to the average on all government obligations with maturities of less than four years. The higher of the two interest rates would be selected and a corresponding short-term (1 to 3 years) or long-term (4-15 years) maturity date would be assigned automatically to special issue obligations. Short-term certificates of indebtedness would earn the short-term rate at all times. Redemptions would continue as under current law, with securities closest to their maturity dates being redeemed first.

Since the proposal links maturity date to the interest rate of the special issues that the investment "decisions" of the trust funds would be more closely analagous to the actions of a "prudent investor" than current law. Such an investor would, in general, invest in short-term obligations when the return on these obligations exceed long-term returns and extend the maturity dates on his investments as long-term rate increase relative to short-term rates. The costs to the Treasury of issuing a certain amount of securities also would be similar whether or not the securities are purchased by the public or by the trust funds. Therefore, neither the trust funds nor the general fund are unfairly advantaged by the transaction.

Changes made by the section would apply to obligations purchased by the trust funds after the month in which this Act is enacted.

Section 104. Interest on late State deposits

Current Law and Discussion

At present the Social Security Act specifies that the annual interest rate charged on late payments of social security contributions due on the earnings of State and local employees is 6 percent per annum. As a result of the Economic Recovery Tax Act of 1981 (P.L. 97-34) the interest rate charged for late payment of taxes by private employers is 100 percent of the average predominant on the prime interest rate and is adjusted annually. Beginning in 1983, it will be adjusted semi-annually. The rate will be 16 percent, effective January 1, 1983. The current law statutory interest rate of 6 percent can be seen as providing an incentive for States to make late payments of contributions on the earnings of their employees because they can invest the money at rates well above 6 percent and retain the interest earned which is in excess of the amount of the penalty.

Proposed Change

Section 105 would conform provisions in the Social Security Act, which specify the rate of interest charged on late payments of social security contributions due on the earnings of State and local employees, to those provisions in the Internal Revenue Code which specify the rate of interest charged on late payments of social security contributions due on the earnings of private sector employees. This would eliminate pos-

sible incentives to delay the deposit of social security contributions.

Changes made by this section would apply to payments due for wages paid after December 31, 1983.

TITLE II. ELIMINATION OF GENDER-BASED DISTINCTIONS UNDER THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM

Section 201. Divorced husbands

Current Law and Discussion

The Social Security Act provides for the payment of benefits to aged divorced wives and aged or disabled surviving divorced wives but benefits are not provided for similarly situated men. However, as a result of *Oliver* v. *Califano,* Northern District California (1977) and other court decisions, benefits currently are being paid to aged divorced husbands and aged or disabled surviving divorced husbands.

Proposed Change

Section 201 of the draft bill would amend the statute to conform to court decisions by providing social security benefits for aged divorced husbands and aged or disabled surviving divorced husbands based on their former wives' earnings records.

Section 202. Remarriage of surviving spouse before age 60

Current Law and Discussion

Widows and widowers who remarry before age 60 are treated differently with respect to their eligibility for benefits based on their deceased spouses' earnings. A woman may qualify for benefits as a surviving spouse, even though she has remarried, so long as she is not married at the time she applies for benefits. A man, on the other hand, under current social security law loses forever his eligibility as a surviving spouse of his deceased wife worker if he remarries before age 60. However, as a result of *Mertz* v. *Harris,* Southern District Texas (1980), benefits are being paid to remarried widowers on the same basis as to remarried widows.

Proposed Change

Section 202 of the draft bill would make the requirements in the law for widowers' benefits the same as they now are for widows and as they are now being paid based on court decisions.

Section 203. Illegitimate children

Current Law and Discussion

In general, the determination of one's status as a parent or child for purposes of the social security program is based upon the intestate succession laws of the State in which the insured individual is domiciled. However, an illegitimate child may be eligible for benefits based upon a man's earnings, without regard to the appropriate State intestate laws, if, among other things, the man has been decreed by a court to be the father of the child, or the man is shown by evidence satisfactory to the Secretary to be the father of the child. Similar provisions do not currently apply when an illegitimate child claims a benefit based upon his mother's earnings. Also, a Supreme Court decision in *Jimenez* v. *Weinberger* (1974), declared unconstitutional the requirement of the Act that an acknowledgement of paternity must have been made prior to the time a worker first became eligible for benefits.

Proposed change

Section 203 of the draft bill would modify the law applicable to benefits for illegitimate children so that such children would be eligible for benefits based on their mothers' earnings as they are currently for benefits based on their fathers' earnings.

Section 204. Transitional insured status

Current Law and Discussion

Under current law, certain workers who attained age 72 before 1969 are eligible for social security benefits under transitional insured status provisions which require fewer quarters of coverage than would ordinarily be required. Wives and widows of eligible male workers who reached 72 prior to 1969 also are eligible for benefits under this provision, but husbands and widowers of eligible female workers are not.

Proposed Change

Section 204 of the draft bill would extend to husbands and widowers the transitionally insured eligibility provisions which currently apply to wives and widows.

Section 205. Equalization of special age 72 benefits under section 228 (Prouty benefits)

Current Law and Discussion

Section 228 of the Social Security Act provides for special payments to persons who attained age 72 before 1968 and who have no quarters of coverage and to persons age 72 in 1968 or after who have at least three quarters of coverage for every year after 1966 and before the year of attainment of age 72. Under Prouty benefits even though each spouse must meet the same eligibility requirements he or she would have to meet if not married, once the eligibility of both is determined, the couple is treated as if the husband were the retired worker and the wife were the dependent. Therefore, the amount of the special payment for the couple is not divided equally between husband and wife. Rather, the payment, which comes largely from general revenues, is allocated so that the husband is paid two-thirds of it and the wife is paid one-third.

Proposed Change

Section 205 of the draft bill would require that where both husband and wife each qualify for Prouty benefits under Section 228 of the Social Security Act, the monthly benefit would be divided equally between them.

Section 206. Father's insurance benefits

Current Law and Discussion

A young wife, widowed mother or surviving divorced mother who has an entitled child under age 16 in her care receives a benefit for both herself and her child based upon the earnings of her husband. As a result of the Supreme Court decision in *Weinberger* v. *Wiesenfeld,* 420 U.S. 636 (1975), other court decisions, and subsequent administrative decisions, a similarly situated father can qualify for benefits based on his retired, disabled, or deceased wife's earnings.

Proposed Change

Section 206 of the draft bill would amend the statute to conform to the court decisions by providing social security benefits for a father who has in his care an entitled child of his retired, disabled, or deceased wife (or deceased former wife).

Section 207. Effect of marriage on childhood disability beneficiary

Current Law and Discussion

In general, the social security law provides for termination of dependents' or survivors' benefits at the time of marriage, since it is presumed that the dependency situation on which the benefits are based no longer exists. An exception is made when certain social security auxiliary or survivor beneficiaries marry certain other beneficiaries, since it cannot be presumed that either one is able to support the other. Thus, in general, when a childhood disability beneficiary (a person with a severe disability that began before age 22 who is entitled to benefits as the son or daughter of an insured worker who is entitled to social security benefits or who has died), marries certain other social security beneficiaries, the benefits of neither spouse are terminated by reason of marriage. However, when a childhood disability beneficiary is married to another childhood disability beneficiary or to a disabled worker beneficiary, and the disability benefits of one of the beneficiaries are terminated because the beneficiary recovers or engages in substantial work, the continued eligibility of the other spouse depends upon the spouse's sex. A woman's childhood disability benefits end when her husband's disability benefits end. However, a man's childhood disability benefits are not terminated when his wife's disability benefits end.

Proposed Change

Section 207 would terminate the benefits of a childhod disability beneficiary, regardless of sex, when the beneficiary's spouse is no longer eligible for benefits as a childhood disability beneficiary or disabled worker beneficiary.

Section 208. Effect of marriage on other dependents' or survivors' benefits

Current Law and Discussion

In general, if a childhood disability or disabled worker beneficiary marries a person getting certain kinds of social security dependent or survivor benefits, the benefits of each individual continue. If the disabled beneficiary is a male and he recovers or engages in substantial work and his benefits are terminated, his wife's benefits also end. If, however, the disabled beneficiary is a women, her husband's benefits are not terminated when her disability benefits end.

Proposed Change

Section 208 would terminate social security payments to an individual, regardless of sex, who is receiving dependents' or survivors' benefits, when his or her spouse is no longer eligible for childhood disability benefits or benefits as a disabled worker.

Section 209. Treatment of self-employment income in community property States

Current Law and Discussion

Currently, the Social Security Act and Internal Revenue Code provide that in community property States all income from a business owned or operated by a married person or couple is deemed, for purposes of Social Security earnings, to be the husband's unless the wife exercises substantially all management and control. In non-community property States, such self-employment income is credited to the spouse which is carrying on the business, based on such factors as ownership and control. This law regarding the treatment of self-employment income in community property States has been held to be unconstitutional in several court cases. As a result, the Social Security Administration now treats the self-employment income of a married couple in a community property State the same as self-employment income in non-community property State.

Proposed Change

Section 209 would treat the self-employment income of a married couple in a community property State in the same way that such income is treated in noncommunity

89-059 O-86 43a (Pt.20)

property States. The law would be amended to conform it to present Social Security Administration policy, which is based on a number of court decisions.

Section 210. Credit for certain military service

Current Law and Discussion

Currently a widow (but not a widower) is permitted, under certain circumstances, to waive the right to a civil service survivor's annuity and receive credit (not otherwise possible) for military service prior to 1957 for purposes of determining eligibility for, and the amount of, social security survivors' benefits.

Proposed Change

Section 210 of the draft bill would allow widowers to exercise this option in the same way as widows are currently permitted.

Section 211. Conforming amendments

Section 211 would make a number of conforming changes in provisions of title II of the Social Security Act that are required because of the substantive changes that would be made by the preceding sections of title II of the draft bill.

Section 212. Effective date

Section 212 would make title II of the bill generally effective for the month after enactment. However, no amendment contained in Title II shall affect the validity of any benefit which was paid prior to the effective date of that particular amendment or of this title generally, as a result of a judicial determination.

TITLE III: EXPANSION OF COVERAGE

Section 301: Coverage of employees of foreign subsidiaries of U.S. corporations

Current Law and Discussion

Work by a U.S. citizen outside the U.S. for a foreign subsidiary of a domestic corporation is covered by social security if the domestic corporation arranges for coverage by entering into a voluntary agreement with the Internal Revenue Service and the agreement applies to all citizens subsequently employed by the subsidiary if their work would be covered if performed in the U.S.

A "foreign subsidiary" of a domestic corporation is defined as a foreign corporation of which: not less than 20 percent of its voting stock is owned by a domestic corporation; or more than 50 percent of its voting stock is owned by another foreign corporation and at least 20 percent of the latter corporation's voting stock is owned by a domestic corporations.

Coverage is not available under current law if either the U.S. employer or the foreign subsidiary are not corporations.

Proposed Change

Section 301 would broaden the availability of social security coverage to American citizens working abroad by (1) permitting coverage of American citizens working outside the United States for a foreign subsidiary of an American employer that is a sole proprietorship or partnership; (2) permitting coverage in those cases where the foreign subsidiary (to be called an "affiliate") is an unincorporated business; and (3) reducing the ownership interest in the foreign affiliate that is required to be held by the American employer from 20 percent to 10 percent.

This section would not extend coverage to services that are excluded from coverage under any existing or future international social security agreement concluded under section 233 of the Social Security Act.

Changes made by this section would be effective upon enactment.

Section 302. Extension of coverage by an international social security agreement

Current Law and Discussion

Section 317 of the Social Security Amendments of 1977 permits an international agreement to establish "methods and conditions for determining under which system [i.e., the foreign system or our own] employment, self-employment, or other service shall result in a period of coverage." As explained by the House report on the bill, "Under this clause, [if] a worker with a permanent connection with one system is covered by existing law under the other system, an agreement could provide that coverage be under the system with which the worker has the permanent connection."

However, through an inadvertent drafting omission Section 317 neglected to amend the Internal Revenue Code or the Social Security Act to define the worker's service, when included in an international agreement, as covered employment or self-employment for purposes of the Federal Insurance Contributions Act or title II of the Social Security Act. Earnings that are intended to be covered under the U.S. system pursuant to an international social security agreement are not covered because U.S. social security taxes cannot be imposed on the earnings. The U.S. has entered into agreements with several countries under which coverage has been provided for services performed outside the U.S. by workers who are not U.S. citizens but who have a permanent connection with the U.S. or are employed by a national of the U.S. However, this coverage has not gone into effect because the social security law does not authorize collection of social security taxes with respect to those services.

Proposed Change

Section 302 would provide for the imposition of social security taxes if an international social security agreement provides coverage under the U.S. social security system. Changes made by this section are effective for taxable years beginning on or after the date of enactment of this Act.

Section 303. Net self-employment income and foreign earned income exclusion

Current Law and Discussion

Certain income earned by U.S. citizens or residents working outside the United States is excludable from gross income for Federal income tax purposes. However, residents of the United States who were outside the United States for an entire tax year compute their self-employment income for social security coverage and tax purposes without regard to the foreign earned income exclusion. These people usually had social security coverage before they went abroad and the inapplicability of the foreign earned income exclusion prevents and interuption or reduction of their coverage.

However, there have been a number of changes to the tax code that were not accompanied by corresponding changes to the Social Security Act. Consequently, effective with tax years beginning after December 31, 1981, there is an inconsistency between the tax and coverage provisions which apply to the treatment of foreign earned income of certain U.S. citizens or residents. The foreign earned income in question is subject to the social security self-employment tax but may be excluded for social security coverage. The consistency also results in coverage based on the housing costs attributable to the foreign earned income with no corresponding authority to collect the tax.

Proposed Change

Section 303 would correct this inconsistency in the social security coverage and tax treatment of certain foreign earned income by amending the Social Security Act to provide that foreign earned income which is subject to social security self-employment tax would be creditable for social security coverage puposes. This section would also ensure that certain housing costs will be deductible from net earnings for social security coverage purposes, thereby providing consistent treatment of such costs for social security coverage tax purposes.

Changes made by this section shall apply with respect to taxable years beginning after December 31, 1981.

Section 304. Social security tax treatment of cash or deferred compensations plans

Current Law and Discussion

Section 3121(a)(5)(A) of the Internal Revenue Code and section 209(e)(1) of the Social Security Act exclude from the definition of "wages" for social security tax and coverage purposes any payment to or on behalf of an employee or his beneficiary from or to a qualified pension, profit sharing or stock bonus plan described in Section 401(a) of the Code. Among the kinds of plans that meet the qualifications set for in Section 401(a), are plans described in section 401(k) under which an employee may elect to have the employer make payments either to a trust under the plan on behalf of the employee or directly to the employee in cash.

Amounts which an employee receives in cash under a 401(k) plan are treated as wages for both social security and coverage purposes. However, amounts which the employee elects to have contributed to the plan (i.e., deferred compensation payments) are neither taxed nor covered for social security purposes. Consequently employees who elect to participate in 401(k) plans whose total annual earnings are below the social security annual taxable wage base ($32,400 in 1982) or whose social security earnings are reduced below the annual taxable wage base due to contributions to 401(k) plans have lower earnings credited to their wage records than employees with the same earnings who elect to receive cash.

Therefore, the participation of some workers in a 401(k) plan—which is designed to provide retirement income—may actually result in the loss of certain amounts of social security benefits (including, but not limited to, retirement benefits).

Proposed Change

Section 304 would amend Section 3121 (a)(5)(A) of the Internal Revenue Code and Section 209(e) of the Social Security Act to include in the definition of the term "wages" for social security tax and benefit purposes elective payments to a profit-sharing or stock bonus plan described in section 401(k). Section 402(a)(8) of the Code (which provides that employer contributions to a deferred arrangement shall not be considered as available to an employee solely because the contribution was made at the employee's election) would be amended so as not to apply to elective payments to profit-sharing and stock bonus plans under 401(k).

Changes made by this section shall apply with respect to calendar years beginning after the sixth month after the date of enactment of this Act.

Section 305. Standby pay

Current Law and Discussion

Section 3121(a)(9) of the Internal Revenue Code and Section 209(i) of the Social Security Act exclude from the definition of "wages" for Social Security purposes any payment (other than vacation or sick pay) made to an employee after the month in which he or she attains age 62 if the employee did not work for the employer in the period for which such payment is made. Such payments which are excluded from the definition wages are frequently called standby and subject-to-call pay. Since these payments are not considered to be wages, they are not subject to social security taxes. In addition, such earnings are not considered wages for purposes of the earnings limitation.

An allegation as to a stand-by or subject-to-call status must be supported by evidence showing that (1) an employment relationship has continued during the entire period at issue, and (2) a bona fide agreement existed between the employer and employee that in exchange for the payments the employee will be ready to work during that period when asked. Each case alleging stand-by payments is decided individually on the basis of the facts and circumstances of the individual case. As a practical matter, SSA can rarely successfully challenge such an arrangement as invalid.

Proposed Change

Section 305 of the bill would repeal Section 209(i) of the Social Security Act and Section 3121(a)(9) of the Internal Revenue Code. The result of this change is to include in the definition of wages, payments made to an individual with the expectation that he will subsequently render services.

Changes made by this section shall apply with respect to calendar years beginning after the sixth month after the date of enactment of this Act.

Section 306. Exclusion of payments under simplified employee pension plans from social security coverage

Current Law and Discussion

In 1978, the Internal Revenue Code was amended to exclude from wages for social security tax purposes employer payments to or on behalf of an employee under a simplified employee pension (SEP) plan. However, no corresponding change was made to the Social Security Act definition of covered wages. As a result, payments under SEP plans are covered as wages for social security benefit purposes, even though there is no corresponding authority to collect social security taxes on these payments.

Proposed Change

Section 306 would amend the Social Security Act to exclude from covered wages payments under SEP plans. It would provide consistent tax and coverage treatment of earnings for social security purposes by preventing social security credit for payments which are exempt from social security taxes.

The changes made by this section shall be effective for payments made after the date of enactment of the Act.

Section 307. Coverage status under social security of certain entities in the State of Utah

Current Law and Discussion

Utah is permitted to extend social security coverage to specific entities listed in the law as separate coverage groups. The names of some of the entities specifically listed in the law have changed since the provision was enacted.

Proposed Change

Section 307 would amend the provision in the Social Security Act listing entities for which Utah may arrange social security coverage to provide that coverage would not be affected by a subsequent change in the name of any of the entities. This change is desirable to prevent confusion and potential conflict over whether the entities should continue to be treated as separate coverage groups for social security purposes.

TITLE IV. MISCELLANEOUS TECHNICAL AMENDMENTS

Section 401: Technical and conforming amendments to the maximum family benefit provisions

Current Law and Discussion

Under current law, when children are entitled to benefits on more than one worker's record, the maximum family benefits on each relevant record are combined for the purpose of paying the family benefits. However, there is an overall limit on the amount any one family can receive when maximums are combined. This so-called "super maximum" for any given year is equal to 1.75 times the PIA which would be computed for average indexed monthly earnings (AIME) equal to one-twelfth of the contribution and benefit base for that year. Whenever the wage base increases (in January of every year), the PIA at AIME equal to one-twelfth of the new base is computed, and then the super maximum is recomputed. Since the formula used to compute the new PIA is adjusted to reflect wage increases, the recomputed super maximum also reflects wage increases. In addition, in June of each year the super maximum is increased when the cost-of-living adjustment is made in general benefit levels.

The problem that has recently arisen and that was unforeseen at the time of the 1977 amendments is that families whose benefits are limited by the super maximum can have their benefits unexpectedly increased or decreased when the average level of wages does not consistently rise faster than the average level of prices. For example, while the June 1981 adjustment to the super maximum reflected a price increase of 11.2 percent, the January 1982 readjustment of the super maximum reflected the 9.0% increase from January 1981 in the taxable earnings base, which is tied to wage increases. As a result, the combined family super maximum which became effective in January 1982 ($1,355.20) was lower than the maximum which had become effective in June 1981 ($1,382.40). This resulted in an unexpected reduction of benefits in January 1982 of $26.70 for families whose benefits were limited by the super maximum.

The super maximum for the period from June 1982 through December 1982 is $1,456.20 (an amount which reflects the 7.4 percent COLA for June 1982). The super maximum will be increased to $1,493.70 for January 1983 (an amount which reflects to 10.2 percent increase in the 1983 wage base relative to 1982).

Proposed Change

Under this provision the super maximum would continue to be adjusted in January of each year. However, this adjustment would apply only to families in the first year of their entitlement. After initial entitlement, a family's super maximum would be adjusted in June of each year when a cost-of-living increase is provided to everyone on the benefit rolls. The amendment would be effective with respect to payments made for months after December 1983.

Section 402: Mariana Islands

Current Law and Discussion

Under current law the U.S. social security system will become applicable to the Northern Mariana Islands (NMI) upon termination of the U.S. trusteeship of the Trust Territory of the Pacific Islands (TTPI), or earlier if the governments of the United States and NMI agree. At the time that the U.S. system becomes applicable to the NMI, the NMI social security system will be merged with the U.S. system, and funds and credits earned under the NMI system will be transferred to the U.S. system.

A problem arises under current law, because it is not likely that termination of the trusteeship and, therefore, the merger of the two systems, will occur on the first day of a calendar year. Merger of the two social security systems other than on the first day of a calendar year would present significant technical and administrative difficulties for the Social Security Administration and the NMI system because of differences in the two systems, such as the contribution and benefit bases, the tax rates, the measure of quarters of coverage, and the exempt amounts under the earnings test.

Proposed Change

Section 402 would make the U.S. social security system applicable to the Northern Mariana Islands beginning with January 1 following the termination of the trusteeship for the TTPI. The legislation would not change the current authority to make the U.S. system applicable on an earlier date if agreed to by both governments. The legislature of the NMI has passed a joint resolution requesting the U.S. Congress to modify P.L. 94-241 in the manner that is contained in this section.

Section 403. Simplification of trust fund reimbursement computation with respect to benefits attributable to non-contributory wage credits for military service

Current Law and Discussion

Section 217 of the Social Security Act provides non-contributory wage credits for military service during the period from September 16, 1940 to December 31, 1956, while Section 229 of that Act provides such credit for calendar quarters after 1956. The cost of benefits attributable to the social security trust funds of these non-contributory wage credits is reimbursed by the Treasury Department. In cases where individuals are eligible for credits under both sections, the cost to the Trust Funds of paying increased benefits must be computed separately because different procedures are provided for each.

Proposed Change

Section 403 would provide that the computation procedure in Section 229 would be used for determining the amount of reimbursement by the Treasury Department to the social security trust funds for the cost of benefits attributable to noncontributory wage credits for military service in cases where an individual gets wage credits based on military service both before 1957 and after 1956.

Section 404. Lower from 72 to 70 the age beyond which no further delayed retirement credits are available

Current Law and Discussion

Delayed retirement credits (an increment of 1/12 of 1 percent of the worker's benefit per month for workers eligible for social security benefits before 1979 and 1/4 of 1 percent per month for workers eligible after 1978) are now provided for months from age 65 to age 72 for which benefits are not paid because the worker has substantial earnings from work or does not apply for benefits. These credits are intended to provide partial relief to workers who continue working past age 65 and who forego benefits under the earnings test but who do not earn enough to qualify for a higher benefit under the benefit recomputation provisions. The Social Security Amendments of 1977 (P.L. 95-216) lowered the age at which the earnings test no longer applies from 72 to 70, effective after 1982. Once the earnings test is eliminated for workers age 70 and over, it will serve no purpose to provide delayed retirement credits for such workers; few, if any, people will delay receipt of benefits after age 70.

Proposed Change

Under Section 404, for persons who attain age 70 after December 1982, delayed retirement credits would not be given from months for which social security benefits are not paid after age 70 (rather than age 72). For persons who attain age 70 before January 1983, delayed retirement credits will be granted without regard to the changes in law which result from this section except that no credits shall accrue for months after December 1982.

Section 405. Relaxation of insured status requirements for certain workers previously entitled to disability insurance benefits

Current Law and Discussion

Workers are insured for disability if they are fully insured and, except for persons who are blind or disabled before age 31, have a total of at least 20 quarters of coverage during the 40-quarter period ending with the quarter in which the worker became disabled. Workers who are disabled before age 31 must have total quarters of coverage equal to half the calendar quarters which have elapsed since the worker reached age 21, ending in the quarter in which the worker became disabled. However, a minimum of 6 quarters is required. In many cases, a worker has been prevented from becoming entitled to disability benefits if he had a period of disability which began before he reached age 31, recovered from his disability, and then suffered a recurrence of a disability at age 31 or older. This is a result of the fact that due to the worker's earlier period of disability, there has been insufficient time for him to obtain the needed 20 quarters of coverage before his subsequent disability.

When the law was changed in 1967 to provide a special insured-status requirement for young workers, it appears that the type of situation was not contemplated.

Proposed Change

Section 405 of this bill would provide that a worker who had a period of disability which began before age 31, recovered, and then became disabled again at age 31 or later would again be insured for disability benefits if he/she had quarters of coverage in half the calendar quarters after age 21 and through the quarter in which the later period of disability began (up to a maximum of 20 out of 40 quarters). As under other insured status provisions, calendar quarters wholly or partly within a period of disability would not be counted in figuring the number of elapsed calendar quarters.

Changes made by this section shall apply generally with respect to applications for disability benefits filed after the date of enactment of this Act.

Section 406. Illegitimate children of disabled beneficiaries—first month of entitlement

Current Law and Discussion

The Omnibus Budget Reconciliation Act of 1981 contained a provision under which the first month for which certain benefits could be paid would be delayed from the month during which the individual satisfied the various entitlement conditions to the first month throughout which those conditions were satisfied. However, the amendments specifically protected the benefits of illegitimate children of retired beneficiaries by establishing parenthood occurs on the first day of the month in which it actually occurs. This protection was not provided to the illegitimate children of disabled workers, thus producing an inequity in the treatment of similarly situated children.

Proposed Change

Section 406 would provide social security monthly benefits to the illegitimate child of a disabled worker for a month in which the child satisfied all other entitlement conditions but was not eligible for benefits because the acknowledgement or court decree or order establishing parenthood occurred later than the first day of that month.

Changes made by this section shall be effective on the date of enactment of the Act.

Section 407. Continue benefits to disabled widow(er) who marries a retired or disabled worker

Current Law and Discussion

Disabled widow(er)s are paid as auxiliary beneficiaries on their spouses' earnings records. When a disabled widow(er) under age 60 marries an old-age or disability beneficiary, his or her auxiliary social security benefits stop until he or she reaches age 62. However, when a disabled widow(er) marries an individual entitled to widow(er)s, parents or child's benefits, the benefits continue. Thus, an anomaly occurs under current law because disabled widow(er)s are treated differently depending on what types of social security beneficiaries they marry. This anomaly does not occur when an aged widow(er) marries.

Proposed Change

Section 407 would provide that social security benefits of a disabled widow(er) will not terminate if the beneficiary marries an old-age or disability insurance beneficiary. Disabled widows and widowers would, as a result of this section, be afforded the same treatment as an aged widow or widower who marries an old-age or disability beneficiary.

Changes made by this section apply with respect to benefits payable for months beginning after the date of enactment of this Act.

Section 408. One month retroactivity of widows' and widowers' benefits

Current Law and Discussion

Under the Social Security Amendments of 1977, the payment of retroactive benefits is prohibited if such payment would require the lowering of future benefits. Under current law a perceived inequity occurs when an insured individual dies so late in the month that the survivor is not able to file for benefits in that month. In many of these cases, the actuarial reduction in future benefits (which in any event will be relatively small) is unimportant, from the survivor's standpoint, when compared with the survivor's need to receive a retroactive benefit promptly.

Proposed Change

Section 408 would amend title II of the Social Security Act to allow an aged widow or widower to receive actuarially reduced benefits for the month in which the insured spouse died, if the application is filed in the following month, even though the retroactive payment would result in lower future monthly benefits than would be the case if benefits were not paid retroactively.

Changes made by this section shall apply with respect to survivors whose applications for monthly benefits are filed after the second month following the month in which the Act is enacted.

Section 409. Clarify the provision in social security law exempting benefits under SSA-administered programs from assignment

Current Law and Discussion

Since 1935, the Social Security Act has prohibited the transfer or assignment of any future social security or SSI benefits payable and states that no money payable or rights existing under the Act shall be subject to execution, levy, attachment, garnishment, or other legal process, or to the operation of any bankruptcy or insolvency law.

In 1978, P.L. 95-598 broadened the applicability of a voluntary form of bankruptcy (Chapter XIII) under which a debtor with regular income sets up a plan to have part of his/her monthly income paid to a trustee who in turn, pays the creditors. Previously, a Chapter XIII bankruptcy could be used only by wage earners; P.L. 95-598 made it available to anyone with a regular income. The legislative history of P.L. 95-598 includes the statement ". . . individuals on welfare, social security, fixed pension incomes, or who live on investment income, will be able to work out plans with their creditors rather than being forced into straight bankruptcy."

Based on the legislative history, some bankruptcy courts have considered social security and SSI benefits listed by the debtor to be income for purposes of a Chapter XIII bankruptcy and have ordered SSA in several hundred cases to send all or part of a debtor's benefit check to the trustee in bankruptcy. SSA has been appealing these orders on the basis of the provision in social security law prohibiting assignment of benefits but may lose the appeals if courts decide that P.L. 95-598 (with its legislative history) was intended by Congress to supersede the provision in social security law.

Not only is assignment of all or part of social security or SSI checks contrary to the long-standing prohibition in the Social Security Act, but it also increases administrative costs for SSA. SSA would have to set up a system to split benefit checks between a beneficiary and a trustee in bankruptcy and, after that, it would cost approximately $75-100 a month to process each benefit assignment.

Proposed Change

Section 409 would specifically state in the Social Security Act that social security and SSI benefits may not be assigned notwithstanding any other provisions of law, includ-

ing P.L. 95-598, the "Bankruptcy Reform Act of 1978".

The changes made by this section shall apply only to benefits payable or rights existing on or after the date of enactment of this Act.

□ 1940

A TRIBUTE TO THE HONORABLE ROBERT H. MOLLOHAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. RAHALL) is recognized for 60 minutes.

GENERAL LEAVE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. RAHALL. Mr. Speaker, I am pleased to have this opportunity this evening to join with many of our colleagues in paying tribute to a man who has dedicated over 30 years of his life to public service, with 18 of those years being spent in this Chamber; but while I am pleased, I am also saddened, that ROBERT MOLLOHAN will no longer be a Member of this House come January of next year.

Throughout life one develops many special relationships; in some of those relationships closer and deeper friendships are developed than others. When such friendships come about, they are truly special and that is how I feel about the past 6 years I have spent with BOB MOLLOHAN as a Member of the West Virginia delegation together.

His frankness and his honesty have served me very well and when I sought his advice, he was always there with the right thing to say. In short, he was always there whenever I needed him and I appreciate the advice and help that he has given me.

When ROBERT MOLLOHAN stated his position, you could count on it, because he followed through and you knew that what he said was what he meant. For that reason, he deserved and won the respect of many Members of this Chamber.

Mr. GAYDOS. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I am delighted to yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Speaker, I want to thank my colleague for yielding and being so kind at this time to interrupt his train of thought and I appreciate it.

For the record, I want to talk about the BOB MOLLOHAN that I grew to know, respect and, yes, and to love in the service of his country.

I first met BOB when he and I served on the House Administration Committee. I remember his dedication, his unequalled dedication when he approached and attacked the problem we had involving elections and the proper funding of elections.

BOB MOLLOHAN was nothing less than a giant in his pursuit of a good workable bill. He put much time in with the former chairman of that committee, the gentleman from Ohio, Mr. Hayes, and also our recent chairman.

BOB MOLLOHAN was not only a close friend on that committee, but a leader, having had substantial experience here in the House at that time. He served on the subcommittee when the House Administration Committee was putting together basically and fundamentally new legislation involving services to our Members, such as better equipment, the ability and the right to lease equipment and to work it into your overall expense account.

Yes, he was a Member's Member and a most sincere and effective one.

I remember BOB MOLLOHAN, I will always remember him and I want the record to show unequivocally that BOB MOLLOHAN was serving on the executive committee of the Steel Caucus as one of the most dedicated executive committee members that I ever had the privilege to serve with over the last 5 years. I think I can say that with some authority because I have served in the last 4 years as chairman on that Steel Caucus, along with good friends of mine like the gentleman from Pennsylvania (Mr. MURTHA) and other members of the executive committee. On that committee, BOB MOLLOHAN was more than a leader. He attended the very early morning sessions that we had. I attribute that committee's activity to a sincere desire particularly on the part of Mr. MOLLOHAN, with his long years of service, to want to serve people and serve this House.

BOB MOLLOHAN gave us the benefit of his sage advice, his experience, close cooperation, and hard dedicated work.

In short, I have to say that BOB MOLLOHAN is probably one of the most active, maybe not as noticeable, but one of the most active Members, not only serving on the executive Steel Caucus, on the Committee on House Administration, on his general committee, but serving his fellow colleagues.

In closing, I would like to say these words to my good friend BOB HOMER MOLLOHAN. BOB, the Steel Caucus is going to miss you, miss you most sincerely. We are going to welcome your son and we know he is off the old block. We know that strain is going to permeate in another good public servant down here in his stead in the guise of his son, so we are going to welcome him with all the nice things we said about his father. We are going to be more than glad to welcome him on the Steel Caucus, in the Steel Caucus, and hopefully in House Administration and generally in the work that this body does.

I thank my colleague again for allowing me to interrupt at this point.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Pennsylvania.

Mr. MURTHA. Mr. Speaker, I want to compliment the distinguished new dean of the Weat Virginia delegation, probably the youngest dean in the history of West Virginia, certainly one of the most powerful and influential Members of Congress for taking this special order for BOB MOLLOHAN, who has served with such distinction on the Armed Services Committee.

BOB is the type of individual, and this shows, he is not even here to listen to the accolades about him and all the nice things that are being said about his service to West Virginia and to the country.

I know him best as an individual who has worked tirelessly for West Virginia, but also for the defense of this great country. His service has been tireless and his dedication to the defense of the country has been without equal.

BOB has become an expert in the fields of building ships and strengthening the Navy. His work in that field probably is exceeded by no one but people who are better known throughout the history of this Congress, but there is no one that has approached it with more dedication and more tireless work in trying to make sure that we did not waste money in defense and that is a key thing. There was nobody from the Defense Department or the Pentagon that could fool BOB when it came to spending money. No one equals him when it comes to making sure that we have a strong defense, but also no one was more eager to say no and to protect the taxpayer when it came to making sure that we had a defense that was paid for and that we could afford to pay for.

So we will all miss BOB. I have some comments. I know the gentleman asked for permission for revision and extension of remarks. Since BOB is not here to listen to these comments, I will put them in the RECORD.

When I first came to Congress, BOB MOLLOHAN was one of the Members who helped me the most in learning about the House of Representatives. Over the past several years, I have worked with him on issues such as black lung law reform, development of natural gas supplies, and speeding the black lung claims process. On each of those items, and many more, BOB MOLLOHAN was a dedicated, determined fighter for the kinds of changes and improvements that helped citizens in West Virginia and throughout the country.

BOB MOLLOHAN brought to Congress the key ingredients of what is needed to be an effective legislator: A concern for his constituents, a willingness to listen to the debate and work with the other Members of Congress for reasonable solutions, dedication to the job, and integrity.

BOB MOLLOHAN will be missed by those of us in the House of Representatives, but I am glad to join in congratulating him on an outstanding record and extending best wishes for much happiness in the future.

□ 1950

Mr. RAHALL. I thank my colleague from Pennsylvania.

Mr. O'BRIEN. Mr. Speaker, will the gentleman yield to me?

Mr. RAHALL. I yield to the gentleman from Illinois.

Mr. O'BRIEN. I thank the gentleman for yielding.

Mr. Speaker, the remarks made about BOB MOLLOHAN by my predecessors this evening cover it rather well. I would like to add mine from a painfully personal note.

I met him when I first came here and served on the Committee on Armed Services with him. I served on other committees with him, but the wonderful thing about MOLLOHAN to O'BRIEN was that party lines meant nothing to him. He was a bulwark of strength on problems which I had, a valuable counselor, a very dear friend.

I think the image of the House is reduced by his loss. I, for one, am very much reduced by his loss. I will miss him very much.

Mr. JONES of Tennessee. Mr. Speaker, will the gentleman yield to me?

Mr. RAHALL. I will be glad to yield to the gentleman from Tennessee.

Mr. JONES of Tennessee. I thank the gentleman for yielding.

Mr. Speaker, I appreciate this opportunity to participate in this special order for our colleague and my dear friend, BOB MOLLOHAN. I want to commend our colleague, NICK RAHALL, for requesting it.

I have had the pleasure of serving on the House Administration Committee with BOB MOLLOHAN. It is there that I got to know him well and appreciate more deeply his knowledge, experience, and reliability. It was also there I became very good friends with BOB.

In the hectic pace we all must maintain here, it is unfortunate that we do not get to know one another better than we do. All too often, our relationships here are all business with no time for getting together on a personal basis. I have been fortunate to have gotten to know BOB MOLLOHAN on more than just the usual professional basis.

While I have great respect for BOB's judgment and legislative skills, it is going to be that personal friendship that I am going to miss after he leaves us. I hope that his retirement is going to be a well-deserved rest and I want to extend to my good friend, BOB MOLLOHAN, and his family, my warmest and deepest wishes for a long and happy retirement.

Mr. Speaker, I thank the gentleman from West Virginia.

Mr. RAHALL. Mr. Speaker, I thank the gentleman from Tennessee for his remarks.

At the end of the 97th Congress, this Grantsville, W. Va., native, and his wife Helen, will spend more time on things which are outside the framework of congressional service or Government service. As BOB has said himself: "We will enjoy life at a much more leisurely pace than we have for the last several years."

In recounting his career, we see that he served in the 83d and 84th Congresses, and was reelected to Congress in 1968. In total he has served 18 years in the House of Representatives. Here BOB was a member of the House Armed Services Committee, and the House Administration Committee, where he was the chairman of the Subcommittee on Office Systems.

Because of his keen interest in issues affecting the steel and coal industries—which are vital to his district—BOB was a member of the executive committee of the Congressional Steel Caucus, and also a member of the congressional coal group.

From his position on the Armed Services Committee, BOB took a very deep interest in national security issues and his record has long revealed a strong support for a sound national defense policy.

BOB MOLLOHAN'S interests likewise encompassed other areas, such as: energy, trade and health. It was his concern about health issues that prompted him to author the Emergency Medical Services Systems Act, which led to improved ambulance services in West Virginia and throughout the country.

But most importantly in direct assistance to those in the First District of West Virginia who he has represented, BOB can be proud of his work with local communities and individuals to help them cope with the public problems of our times. In BOB'S own words he said:

I understand the role of Government to be—easing the burdens and aiding the transitions of people that result from economic and social forces moving beyond their control.

Much of my attention in Congress has been given over to hard work that attracts few headlines. Constituent service is the most basic representative function. Without answering the mail or quietly selling ideas, there would be no educational or health or social security benefits; there would be no new water systems or bridges or low-cost housing to improve the convenience and quality or our lives.

BOB MOLLOHAN has lived his life according to the principles of topnotch Government service. He has believed, as Thomas Jefferson did, that the legitimate object of good government was: "The care of human life and happiness."

This evening we commend him and thank him for what he has done for his country, his colleagues, his district and his family.

A couple of weeks ago, Mr. Speaker, on November 17, here in the Nation's Capitol, in the House Caucus Room, a tribute dinner was held by the West Virginia Society of Washington, D.C., in honor of BOB MOLLOHAN and his wife, Helen.

The West Virginia Society attracted well over 200 people to pay tribute to BOB in what was a fantastic outpouring of friendship and thanks to BOB MOLLOHAN for his outstanding public service in the House of Representatives. During that ceremony, individuals from all walks of life joined to pay thanks to BOB, including long-time personal friends of his like Father Charles L. Currie from Wheeling, W. Va., now president of Xavier University, who testified to BOB'S dedication to public service.

Also, representing the United Steelworkers of American and president of its district 23, was Paul Rusen of Wheeling, W. Va.; Clyde Slease, legal counsel, of Watt, Tieder, Killian, Toole & Hoffar, who told of his longtime friendship for ROBERT MOLLOHAN.

In conclusion, Mr. Speaker, I would like to submit for the RECORD BOB'S own words when he chose not to seek reelection to the 98th Congress of the United States. This was his statement as he said it on Tuesday, February 16, 1982, in which he relayed his thoughts to the people of the First District of West Virginia, his reasons for not seeking reelection and his thanks to them for having given him the opportunity to represent the First District of West Virginia in the U.S. Congress. I would ask that be made part of my concluding comments.

The document follows:

STATEMENT OF CONGRESSMAN ROBERT H. MOLLOHAN

I first campaigned for Congress 30 years ago. That campaign was long and hard, but successful. I have been honored to represent the people of the First District of West Virginia since that time—for four years in the Fifties and for the last 13 years.

Throughout those nine terms in the Congress, I have been proud to work with local communities and to help thousands of individuals cope with the public problems of our time. And that is what I understand the role of government to be—easing the burdens and aiding the transitions of people that result from economic and social forces moving beyond their control.

Much of my attention in Congress has been given over to hard work that attracts few headlines. Constitutent service is the most basic representative function. Without

answering the mail or quietly selling ideas, there would be no educational or health or social security benefits; there would be no new water systems or bridges or low-cost housing to improve the convenience and quality of our lives.

Though it is fashionable to be critical of the growth in our government structure just now, I cannot apologize for the extraordinary strides we have made in improving the fairness and justice of our society—in the health, safety and well-being of our people. Certainly much remains to be done to further assure a higher level of government efficiency and effectiveness.

We all recognize that the Nation has made progress across a broad spectrum of problem areas. We have cleaner water and cleaner air and safer working conditions than we had 30 years ago. We have more adequate low-cost housing for the elderly, greater school and park development. These and hundreds of other developments fostered by the Federal Government have boosted our expectations and our future.

As a ranking Member of the Armed Services Committee, I have been particularly gratified to see our Nation, beginning with the Carter Administration four years ago, strengthen our ability to meet the military challenges of an uncertain world. It is comforting to know that we are on a course of building a more capable and a more highly motivated military force.

I have campaigned for this seat in Congress ten times and have been elected nine of those times. That public referendum on my performance as a Representative gives me great satisfaction. Though I have received high ratings at one time or another from most every organized political group—consumers, business, farmers, labor, defense—I have always tried to represent people and our part of West Virginia, not serve interests.

Over the last few months, many have urged me to seek a tenth term in the Congress and mount my 11th campaign for this First District seat in the U.S. House of Representatives. Let me express my profound appreciation now to all those who have been my loyal friends and who have supported me so effectively through the years.

After considering my length of service and the need for the most vigorous representation for our people and after considering the progress and the accomplishments of the Congresses in which I've served, I believe I should retire from the Congress at the end of this term. Therefore, I will not be a candidate for reelection.

● Mr. RHODES. Mr. Speaker, I am pleased to join the special order paying tribute to Congressman ROBERT MOLLOHAN who is retiring from the House. BOB and I originally came to Congress at the same time, in 1953. And while BOB took a hiatus from the House to run for the office of Governor of West Virginia, and served in other public and private positions for a period of time, I was pleased to see him return to the House in 1968.

Congressman MOLLOHAN's tenure in the House included important committee assignments on the Armed Services Committee and the House Administration Committee. In addition to his legislative duties, BOB MOLLOHAN has served his constituents of the First Congressional District of West Virginia long and well.

He will be missed by all who had the opportunity to know and work with him. Betty Rhodes joins me in wishing BOB and Helen MOLLOHAN a long and happy retirement.●

● Mr. ADDABBO. Mr. Speaker, I am pleased to join my colleagues today in paying tribute to our friend and colleague, BOB MOLLOHAN, who will be leaving us at the end of this Congress.

All of us who have worked with BOB during his altogether 18 years of service recall his dedicated work on the Armed Services Committee and the House Administration Committee. We have applauded his efforts in the areas of energy legislation and trade and health issues. But the most important, and probably least visible, service that BOB has provided has been to his constituents, the residents of the First Congressional District of West Virginia. Rather than seek the spotlight of national attention, BOB has concentrated his energies and resources in assisting those he represents: Answering correspondence and helping to solve the countless everyday problems that the average voter faces—missing social security checks, service-delivery delays, and low-cost housing shortages, just to name a few.

This Nation and the House of Representatives will definitely miss BOB, but the people of West Virginia will suffer the greatest loss. To his son, Alan, I wish the best of luck; BOB is a tough act to follow. I join my colleagues in congratulating BOB on a job well done, and offering our best wishes for success in all his future endeavors.●

● Mr. MONTGOMERY. Mr. Speaker, I want to take part in this special tribute to my distinguished colleague from West Virginia, ROBERT MOLLOHAN.

His 18 years of service to his State and this Nation have been most outstanding. I know the people of the First District of West Virginia will miss the effective and dedicated constituent service provided by Representative MOLLOHAN over the years.

I had the opportunity to serve with him on the House Armed Services Committee and his opinions and leadership on three subcommittees have been a most valuable asset. In addition to serving on the Investigations Subcommittee, BOB has been an active member of the Research and Development Subcommittee, as well as the Seapower and Strategic and Critical Materials Subcommittee.

Besides working diligently on military affairs, he has also served on the House Administration Committee.

Representative MOLLOHAN can indeed be proud of the service and contributions he has given to the people of his State and to this Chamber over the years. I hope he enjoys his retirement and wish him the best in the future. He will be leaving many friends here on Capitol Hill.●

● Mr. MARTIN of North Carolina. Mr. Speaker, today we honor a good friend and diligent Member who is voluntarily departing this House, BOB MOLLOHAN of West Virginia.

BOB MOLLOHAN has been my next door neighbor over in the Cannon Building for 6 years. So often here, we dwell on a colleague's contributions, be they glorious or mundane. His accolades will deservedly be of the higher category, but I would like to speak of a neighbor and friend. To that end, let me recall a homey vignette. Back in January of 1977, we moved upstairs to the suite of offices adjoining BOB's. Amid the usual screaming and chaos of such a move, a quiet deputation arrived from next door with an invitation for refreshments, a little welcoming function from him to my staff and me. It is the sort of thoughtfulness a person never forgets. The 6 years have been like that.

It dawned on me that such a welcome sign of friendship is a sign of something bigger. It is, in the case of BOB MOLLOHAN. If we all performed constituent services with the spirit and professionalism that our colleague has displayed, we could consider membership in this House to be automatic lifetime tenure, and maybe hereditary or divine right. In this case, my friend is passing on the stewardship of his district to his son. If father be like son, I would recommend that as our junior colleagues select their rooms, they bid for those next to those of Alan Mollohan.●

● Mr. MITCHELL of New York. Mr. Speaker, I am pleased to have the opportunity to pay tribute to my good friend and distinguished colleague from West Virginia, the Honorable ROBERT MOLLOHAN.

As a member of the House Armed Services Committee, I have had the pleasure and the privilege of working closely with BOB as our Nation has endeavored to revitalize its defense preparedness. Although he and I differ in party affiliation, we have nearly always shared the same position on crucial defense issues. BOB has been a strong and active advocate of a capable and ready American military.

His departure from the House of Representatives will mean far more than the loss of an able representative of the citizens of West Virginia. It will mean the loss to all Americans who cherish our freedoms and want to insure that they are adequately protected.

He will be missed by his colleagues, his constituents, and the Nation.●

● Mr. PICKLE. Mr. Speaker, there are few people in the House who have rendered longer or more distinguished service than BOB MOLLOHAN. He served his State well and faithfully before coming to Congress and has endeared himself to all the Members here. He is

a reliable Congressman, as sturdy as the mountains and rocks of West Virginia. Every vote he has cast and every action he has taken have been thoughtful and responsible. It is good to know that his son will be succeeding him in this body, so that the name of MOLLOHAN will live on in the Halls of Congress.

I would particularly like to express my appreciation to Mr. MOLLOHAN for his work as subcommittee chairman on Office Systems of House Administration. All of our offices need the best advice and help in efficiently adjusting to the many assignments thrust upon a congressional office, and we all know that we must computerize. My office is in the process of installing a new computer system that we hope will demonstrate a need for this type of facility in other congressional offices. Mr. MOLLOHAN gave his approval for this type of equipment and I personally appreciate his help. Without his help, our office may have had to wait another 3 to 4 months for the equipment to be installed. This is an example of the kind of special cooperation you get from BOB MOLLOHAN.

He is dependable, cooperative and reasonable. As BOB MOLLOHAN'S country road takes him home to the hills of West Virginia, I want BOB MOLLOHAN to know that his friends will remember him with appreciation and respect.●

● Mr. DYSON. Mr. Speaker, I rise to pay tribute to our colleague, Congressman ROBERT MOLLOHAN, who has decided to retire after many years of very distinguished service in the U.S. House of Representatives.

I am proud to have been able to serve on the Armed Services Committee with my colleague. During this time, I have grown to deeply respect and appreciate his contributions to the committee. He has served his congressional district and the Nation with integrity and distinction. We in Congress will miss ROBERT MOLLOHAN. I wish him the best of luck, good health, and much happiness as he travels the country roads to his home in West Virginia. ●

● Mr. REUSS. Mr. Speaker, I am delighted to join my colleagues in this special order honoring Congressman ROBERT MOLLOHAN, who will retire at the end of this Congress after 18 years of service.

BOB has consistently served the highest ideals through his work on the Armed Services and House Administration Committees. He has proved himself a true friend of the American worker.

BOB leaves us yet another legacy. His son, Alan Mollohan, will step into his father's shoes to continue fine representation for West Virginia's First Congressional District.

I extend my best wishes to BOB and his wife, Helen, along with my gratitude for many years of selfless dedication to the House of Representatives.●

● Mr. NICHOLS. Mr. Speaker, I am grateful that our colleague, Congressman NICK RAHALL, has arranged for a special order to pay tribute to my good friend and colleague, Congressman BOB MOLLOHAN, who is retiring from the Congress after a long and illustrious career.

We shall miss BOB in the Congress. We shall miss him on the Armed Services Committee and I shall certainly miss him as a friend.

BOB has represented his home State of West Virginia in an admirable manner over the years serving in many arenas within his State, including that of Director of the Works Progress Administration during the very depths of the Great Depression in the midthirties. Perhaps it was through this service that BOB MOLLOHAN learned to love and appreciate the needs and concerns of the working class of people which has been the hallmark over the years of our great Democratic Party. I know that he must have understood the plight of the unemployed coal miner and those who were otherwise impoverished during that critical period in our Nation's history identified with soup lines and climaxed by the recovery period spearheaded by President Roosevelt who led us out of the worst depression this country has ever known.

It has been my good fortune to know BOB rather intimately from our associations of the House Armed Services Committee. He has worked untiringly in the personnel field, supporting programs which benefited our military people, including better health care through improved pay for doctors and dentists and improved pay for the military servicemen and women.

I had the privilege of having BOB as my traveling companion on numerous trips in which we visited with our military troops overseas in far away places, and I will never foreget that special visit which the two of us had together with the Shah of Iran in Tehran some years back.

Mr. Speaker, I know I speak for BOB'S many friends on both sides of the aisle here in the Congress when I wish for him and Helen many happy years as they enter retirement from Congress. There is an old Irish blessing which goes something like this as I recall:

May the road rise to meet you, may the wind be always at your back, may the Sun shine warm upon your face, the rains fall soft upon your fields and, until we meet again, may God, in His infinite wisdom, bless and keep BOB and Helen MOLLOHAN in the years ahead.●

● Mr. RODINO. Mr. Speaker, with the end of the 97th Congress we will bid farewell to our colleague BOB MOLLOHAN, who has chosen to begin a well deserved retirement.

BOB has devoted most of his life to public service, both in the House of Representatives and in various capacities in his home State of West Virginia. Since he resumed his congressional career in 1969, he has served with dedication and ability on our Armed Services Committee, where he is ranking member of the Subcommittees on Investigations, Research and Development, and Seapower and Strategic and Critical Materials.

While the residents of West Virginia's First District will miss BOB, they are fortunate that his son, Alan B. Mollohan, has been elected in his stead and will be carrying on his fine representation of his constitutents.

My best wishes go with BOB, and my hope that his retirement years will be long, happy, healthy, and productive.●

● Mr. SAM B. HALL, JR. Mr. Speaker, I commend the gentleman from West Virginia for taking this special order to pay a well-deserved tribute to my good friend, BOB MOLLOHAN. We have worked together on some projects vital to our respective areas of the country, and I have the highest respect for his legislative ability, and above all, his personal integrity. In addition, we both have the distinction of representing the First Congressional District of our States.

BOB MOLLOHAN has worked for his constituency as hard as any person serving this body. He has been in the forefront of every conceivable good effort to provide jobs for the American working man and woman. Both of us know firsthand the tremendous problems faced by our domestic steel industry, and BOB'S leadership on the Congressional Steel Caucus has been an inspiration to all of us who are vitally concerned about the plight of the steel industry in America.

He has been a good friend of small business, that sector of our economy which employs 70 percent of the American work force. He took a leadership role in protecting the producers of soft drinks in our communities who were threatened by precipitous action by the Federal Trade Commission. Most cities in America with a population of 20,000 or so have a local producer of soft drinks, and these business men and women employ many of our friends and neighbors. When the FTC threatened their existence some 10 years ago, BOB MOLLOHAN rolled up his sleeves and set as a goal a legislative reversal of the FTC decision to break up their time honored franchise system. When it appeared that our efforts would not be successful, BOB gave us encouragement, leadership, and above all, results. He is a person who can get the job done.

It is good to know that BOB MOLLOHAN'S son will now be taking up where his illustrious father left off. I look forward to working with the new Con-

gressman MOLLOHAN when January rolls around, but at the same time, like all of us who know and admire BOB MOLLOHAN, we will miss the friendship and comraderie that he provided.

BOB MOLLOHAN is a patriot of the first order. He has served his State and Nation with honor. His retirement is well deserved, and I hope he will spend that retirement visiting with old friends and providing the counsel we have grown to rely upon and respect. I wish him well.●

● Mrs. HOLT. Mr. Speaker, it has been my great pleasure to have known and worked with BOB MOLLOHAN. He has performed great service to his country and his constituency during his long career in the U.S. Congress.

I am sure that all of us who have worked with BOB in the House Armed Services Committee will miss his knowledge and experience, but we offer our sincere best wishes to him as he enters retirement.

He has served a total of 18 years in the Congress in a career in which he also served with great distinction in a variety of other public responsibilities.

As he retires, he does so with our great respect and affection, and the people of West Virginia should know they have been fortunate to have been represented by a man of his character.●

● Mr. WON PAT. Mr. Speaker, I thank my friend Congressman NICK J. RAHALL for taking this special order to permit the many friends of our good friend and colleague Representative ROBERT MOLLOHAN of West Virginia to wish him well as he prepares to retire from this body after a long and distinguished career.

I have been privileged to serve with BOB on the House Armed Services Committee where his contribution to the national security of the Nation has long been recognized and appreciated by his fellow Americans.

BOB is a deeply patriotic gentleman whose love for his country is a reflection of his own pride and those of his constituents whom he has served with much distinction in the House of Representatives.

His decision to leave the House has saddened all of us who looked on him as a true friend and inspiration. His knowledge of defense legislation was most impressive and I for one have deeply valued his support for my efforts to help carry on the work of the committee.

I wish BOB and his family the best of happiness in the future. I know that it is never easy to leave this august body which has brought so much professional pride to we who have been fortunate to serve here. Without a doubt, BOB MOLLOHAN is a man whose imprint on the Congress will last long after he is personally gone.●

● Mr. STATON of West Virginia. Mr. Speaker, I would like to commend our colleague, BOB MOLLOHAN, for the fine work he had done in representing the people of the First District of West Virginia. I know that he has listened to their concerns, and has tried to represent them to the best of his ability. The people of the First District obviously trust his judgment as they have reelected him eight times since his initial victory in 1952.

Furthermore, BOB has had an interest in State and national affairs. As the dean of the West Virginia delegation, his colleagues have sought his advice on matters pertaining to West Virginia. Furthermore, he has also played a key role in protecting our way of life as a member of the Armed Services Committee.

As BOB leaves this House next month, I know that we all wish him well in his new endeavors. God bless you.●

● Mr. BRINKLEY. Mr. Speaker, to sit next to a person on a congressional committee is to really get to know him. You might not learn his social status, but you learn the measure of the man and the measure of his character.

Having sat next to BOB MOLLOHAN on the Armed Services Committee for the past 14 years, I feel like he is my brother and I feel like I have gotten to know him under combat conditions. So, when I vouch for the credentials of this remarkable American, it is from the heart; when I point to his contributions as a "watchman on the walls of won freedom," it is because they are real and substantial; when I say that he will be sorely missed, it is because of the authority with which he has spoken and the expertise which he developed on the Armed Services Committee.

Other hands will no doubt pick up where BOB's leave off, but the passing from the scene of this talented man with a passion for candor and an impatience with hyperbole will mark the end of a very special chapter in the life of the U.S. House of Representatives.●

● Mr. DE LA GARZA. Mr. Speaker, it is with great respect that I rise to pay tribute to our colleague, West Virginia Representative ROBERT MOLLOHAN, who is retiring at the end of this Congress. It will be difficult for those of us present at the convening of the 98th Congress to accept the fact that our colleague will not be among those taking the oath again.

As this gentleman concludes his distinguished and illustrious career he leaves behind him a proud record of service to the people of his State as well as the Nation. His ability and steadfastness as well as his keen knowledge of the legislative process will be sorely missed not to mention his guidance and friendship.

With ROBERT MOLLOHAN go my good wishes for all the best the future holds.●

● Mr. BENEDICT. Mr. Speaker, I take this opportunity to commend my able colleague, the Honorable ROBERT MOLLOHAN, upon his retirement from the Congress of the United States. The dean of the West Virginia delegation has provided West Virginia's First Congressional District with capable representation for 18 years.

BOB MOLLOHAN'S career has been highlighted by outstanding constituent service. Through his hard work and devotion to public service, the First District can boast special housing and recreational facilities for our senior and handicapped citizens. He has been responsible for the funding of numerous community service projects.

BOB MOLLOHAN has had an active and important legislative career. His membership on the Congressional Steel Caucus and the Coal Group illustrates his serious concern for the energy and industrial interests so important to his district and State. Of special interest is his membership on the House Armed Services Committee, where he has been a leader in guiding legislation to strengthen our Nation's defense capabilities. He authored the Emergency Medical Services Systems Act to provide improved ambulance service nationwide; legislation of particular benefit to the many rural communities of West Virginia.

BOB MOLLOHAN is a native West Virginian, known affectionately on a first name basis by most residents of the First District. His frequent meetings, tours and public appearances attest to his interest in the views and opinions of West Virginians—opinions which he has faithfully reflected in his actions in Washington.

I know I speak for all my colleagues in saying, "BOB, you will be missed here in the House, and we wish you good health and long life in a happy and productive retirement."●

● Mr. MAZZOLI. Mr. Speaker, I would like to add my thanks and best wishes to my good friend and colleague, ROBERT MOLLOHAN, who will be retiring at the end of this 97th Congress. BOB has had a distinguished career in the House of Representatives and has served his constituents in West Virginia diligently and conscientiously over the years. He has been an asset to the House, and his influence and presence will be missed. I join my colleagues in extending to BOB and his family my very best for their future endeavors.●

Mr. RAHALL. Mr. Speaker, I yield back the balance of my time.

TRIBUTE TO HON. EDWARD J. DERWINSKI, HON. PAUL FINDLEY, HON. ROBERT McCLORY, AND HON. TOM RAILSBACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois, the distinguished Republican leader (Mr. MICHEL) is recognized for 60 minutes.

Mr. MICHEL. Mr. Speaker, and my colleagues, I have taken this special order in conjunction with my good friend and colleague, the gentleman from Illinois, JOHN ERLENBORN, to honor several of our Illinois colleagues who will not be returning for the 98th Congress.

This kind of thing, I guess, can become an exercise in nostalgia, but considering the gentlemen involved, I believe it would be wrong to dwell solely on days gone by. Each of them has special gifts which he will continue to bring to the service of this Nation. They look toward the future, and so should we.

So I am not going to engage in any formal exercise here. I just want to engage in a little informal conversation about our good friends, ED DERWINSKI, PAUL FINDLEY, BOB MCCLORY, and TOM RAILSBACK, and their contributions to this Congress and to the country.

If my good friend JOHN ERLENBORN agrees, what I would like to do is first give a very brief resumé of our four colleagues and then engage in a little discussion about the contributions they have, each of them, made to our party, their individual districts, our State, and the Congress and the country.

□ 2000

I should say before that that when I look over the extensive tenure of service of these four colleagues—24 years for ED DERWINSKI; 22 years for PAUL FINDLEY; 20 years exactly for BOB MCCLORY, and 16 years for TOM RAILSBACK—we in our Illinois delegation are losing the heart of that great delegation on our Republican side, men who have given many, many years of service to the country.

I suspect parenthetically, having just come through an election period, that it would not be amiss for me to mention that I think it is quite clear that we have lost these four distinguished Members of this body through a process called redistricting. Redistricting every decennial year, maybe even more so because of census figures and realignment between the States, can cause some very marked changes. We in Illinois felt that probably like no other State maybe save California. I think that is a fact that was lost in many of the pundits' comments relative to the election results that have just passed, but there is no question in my mind that had we not gone through the kind of political gerrymandering that took place in our whole State of Illinois, that we would still have in our midst these four gentleman.

So, it does take its toll, and I think we would be remiss if we did not make mention of that.

ED DERWINSKI, of course, was first elected to the House of Representatives in November 1958. He was a member of the Committee on Foreign Affairs since 1963. He served on the Subcommittees on International Organizations, International Security and Scientific Affairs. He is the ranking minority member of the Committee on Post Office and Civil Service, on which he has served since 1961, where he is also our senior Republican on the Special Subcommittee on Investigations, as well as an ex officio member of our other subcommittees.

Congressman DERWINSKI is the U.S. Congressional Representative on the Council of Interparliamentary Union, and was appointed as a delegate with the rank of Ambassador to the United Nations for the 1971 U.N. General Assembly session.

It might be appropriate at this time to yield to anyone of my colleagues who might like to make some comments at this juncture with respect to our distinguished friend, ED DERWINSKI.

I will be happy to yield at this point to my friend, JOHN ERLENBORN.

Mr. ERLENBORN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I also want to thank the gentleman for having the thoughtfulness to arrange for this special order so that we might have an opportunity to honor our colleagues who will be departing at the end of this legislative session. Three of these four departing Members were my colleagues in the Illinois Legislature at one time or another, and the fourth, PAUL FINDLEY, has come to be a close friend since our meeting here, since my coming to Congress some years after he did.

Mr. Speaker, when the final curtain falls on the 97th Congress, ED DERWINSKI will forsake the legislative branch for the executive branch, and although Congress will not be the same without the gentleman from the Illinois Fourth District, neither will the Department of State. Our loss is definitely the State Department's gain.

ED's legislative skills, which began back in 1957 when he and I were sworn in together for our first terms in the Illinois House of Representatives, have been marked by his stellar command of the English language. Whether it has been a bill dealing with postal rates, the civil service, or foreign policy, when ED DERWINSKI speaks, people listen. His choice of words has a way of not only winning friends and influencing people, but making them smile in the process. It is a natural trait that should be welcome and equally effective at the Department of State.

ED's departure from this Chamber is not altogether one of his choice, but as the gentleman in the well has said, it was redistricting, and a tour of duty at Foggy Bottom is most appropriate for this master of world affairs.

So, in making this public career change, I want him to know that I will do my best to fill his shoes in representing many of his neighbors whom he served so well, and who because of redistricting I will represent for the next 2 years. We will miss ED DERWINSKI, but we can all sleep a little better knowing he will be serving us at the Department of State.

Mr. MICHEL. Mr. Speaker, I would surely have to agree with the gentleman. I was so happy that the administration saw fit before we had taken our break for the recess to give us pretty clear indication that Ed would be taken aboard downtown and his talents and all that wealth of experience that is his will be put to good use, as I indicated, for the future well-being of our country.

Mr. Speaker, I am happy to yield to my friend, Mr. PHILIP M. CRANE.

Mr. PHILIP M. CRANE. Mr. Speaker, I thank my leader for yielding to me.

I first met ED back in the 1964 campaign, when he was chairman of the Illinois Citizens for Goldwater and I was enlisted in that effort as the research chairman. At that time, I was living down in our distinguished leader's district, and BOB MICHEL was my distinguished representative down in Peoria. It was kind of an interesting experience living downstate at that time to find that there were people up in Cooke County, even though I had roots up in Cooke County, who shared those same basic and traditional values that were so revered in downstate Illinois. When I subsequently moved back up to the Cooke County area, after my predecessor, Don Rumsfeld retired, ED DERWINSKI was at my side helping me as I sought election to that seat. He served as my mentor and father confessor when I first arrived in this body.

I remember having missed, because of a special election, the normal orientation process that most freshmen get. I had to depend upon ED, whose office was in that commanding fourth floor space overlooking the Capitol in the Longworth Building. Mine was a much more modest office about half-way down that hall. At that time I depended, since it was cold weather, on ED to show me how to get to the floor. I remember the first time he took me down to the basement of the Longworth Building and then led me through the tunnel from Cannon over here. The next time the bells went off for a vote, he took me down to the

basement of the Longworth Building, took me over to Rayburn and we took the train. The third time he suggested that in order to familiarize myself with the terrain, we should walk above ground. Having followed ED's leadership back and forth to the floor for a week or so, I finally concluded that I had a mastery of it. I left this floor after a vote; I took the elevator to the basement, and I was under the Senate Chamber before I realized I had made a wrong turn in the labyrinth of passageways there.

I was that dependent upon ED's leadership. He has provided not only friendship and guidance and political wisdom, but I think he is certainly recognized in this Chamber by both sides of the aisle as one of the most effective legislators that we have had in this body. In that sense he will be a great loss to us all.

I have not always agreed with ED on every issue. Something I think a lot of folks back home do not fully appreciate is that you can disagree without being disagreeable, and in this body, where oftentimes we engage in head-knocking debate, it does not mean that that spills over into personalities. In that sense, I think each and every one of us feels a great sense of loss with the departure of all of our colleagues whom we have built up friendships with, even though we may be on opposite sides of the aisle, or we may have been within our own party on opposite sides of the issue from time to time.

ED DERWINSKI, I am confident, is going to continue to faithfully provide the kind of public service that he has so outstandingly provided in his 24-year tenure in the House of Representatives, and I am hopeful that the administration recognizes that ED's talents are not confined to legislation. I think he is one of the outstanding diplomat-legislators, if you will, that this body has seen. One need only visit his office and look at the distinguished array of photographs of world leaders, which include everything from the pictures of past Popes that ED knew and had met and was familiar with to other church denominations throughout this world, as well as the political figures that have come and gone on our world stage over the past 25 years, to realize that ED DERWINSKI has many extraordinary talents to provide in his new job at the State Department.

□ 2010

I know that we will still have the opportunity to share the friendships that we have had. We will all miss him in this body enormously but I think we have had the opportunity, thanks to BOB MICHEL and JOHN ERLENBORN, to pay a special tribute to some truly extraordinary people who represented our great State.

Maybe I am a little prejudiced, but I have always been persuaded since coming to this body that no State had better quality representation than that provided from Illinois.

Mr. MICHEL. I thank the gentleman for his comments.

I am happy to yield to Mr. HYDE.

Mr. HYDE. I thank the distinguished minority leader for yielding. I certainly thank him for his foresight, along with Congressman ERLENBORN, in taking this special order to pay, however brief, tribute to four of the most outstanding human beings that I have been privileged to meet in my life.

Since we are talking about ED DERWINSKI, when I think of ED I think of being articulate. He is one of the most articulate people who could get to the heart of a problem. He was incisive. He did not beat around the bush. You knew where he stood on any issue no matter how controversial.

He was one of the most good humored people that I ever met. He brought a leavening of good humor and frivolity even to sometimes some of the most grave issues, and we need that.

He never took himself seriously but he was taken seriously by this body.

I do not know of a single Member that had the respect nor the influence that ED DERWINSKI had. He proved indeed that a Member of this body does not have to be a chairman of a committee, does not have to be a chairman of a subcommittee, nor in the leadership, to be influential, to make people see your point of view.

I do not think I ever disagreed with Mr. DERWINSKI except once or twice and on those I concede I was probably wrong. But he was a man whose light brought along with him other lights in terms of voting aye or nay on particular issues because he was trusted while he served here. People knew he was knowledgeable, that he knew his subject and that however he voted it would be in the best interests of our great country.

ED DERWINSKI symbolizes the word partriot to me. He was a man who fearlessly defended the ideals of America. He was a man who understood the struggle for the soul of Western civilization, that it is between the free peoples of the world and the Communist slave masters of the world. He never equivocated on that.

He was a spokesman for ethnic groups, Ukrainian groups, people from the Baltic States, the captive nations. He understood the richness that ethnic groups bring to America and he was their spokesman. He understood their causes and he articulated their causes.

Some one with his understanding will indeed be missed. I think the vote in this last election, despite the analyses of the great pundits and the journalists and political scientists, it was far more a vote on cartography than on anything else. I think the map makers deserve the accolades of the political analysts.

Certainly in Illinois, had we run with the map in the previous session, we would not have lost four distinguished Republicans. I do not mean to demean the other party at all, but men of intelligence, of achievement, of long service, of dedication. It is sad and why put a sugar coating on it. It is sad to see their careers ended involuntarily due to the way the map was drawn.

But that is the nature of this vocation that we are in and they accept their losses as the brave gentlemen that they are.

But ED DERWINSKI is special to me. He always will be special to me. I am consoled that his talents, that his ideals will not be lost to our country and to our Government because he will have a very important post with the State Department where his influence can still be felt on the Hill.

I think in closing, in speaking of ED DERWINSKI, about a great line from Camelot where King Arthur said we are all of us tiny drops in a vast ocean, but some of us sparkle. ED DERWINSKI is incandescent and he will not be forgotten.

Mr. MICHEL. I thank the gentleman for his very appropriate remarks.

I am happy to yield to the gentlewoman from the Rockford area.

Mrs. MARTIN of Illinois. I thank you, Mr. Leader.

I cannot claim the years of knowledge of some but perhaps that is useful, too. As a newcomer to the delegation it would have been easy for someone like ED DERWINSKI to ignore me, which I probably properly deserve. But, instead, he has helped.

He makes a human being feel not only welcomed but that they are going to be able to cope, to adjust, and indeed perhaps someday to excel. This is a very special gift that a person has.

ED DERWINSKI makes people feel good. He makes them feel like they can do better and then they do.

That is not just true for newcomers but for the more experienced people in the delegation.

The State Department will not only benefit from ED's brilliance but they will also get to see some sport jackets that I think have enlivened the House often.

We all want the name of the tailor. Perhaps to deport him. But, nonetheless, it is part of ED DERWINSKI.

I think he is special. He is bright and he is funny and we undervalue being funny. He has a brain and a heart and he makes both of them work together.

I think he is just lovely. It has been a sheer joy to be with him for 2 years. The State Department's gain is not

comfort enough for me. I did not want to lose him.

So I guess we will not, but we will keep him as a friend, and for all America. They have had him representing in that very superb way he does so well the area of Illinois and our State that I suspect even in "Foggy Bottom" he will continue to remember and do.

Mr. MICHEL. I thank the gentlewoman and would surely have to agree that the House will not be the same without that humor and good nature of ED DERWINSKI.

As the gentleman from Illinois a moment ago said so well, he did not take himself seriously but everybody else did and when he spoke he spoke with authority.

As I indicated earlier, I am rather distressed that we will lose one who was the second ranking member on the Foreign Affairs Committee of the House of Representatives and the ranking member on the Post Office and Civil Service Committee. So we lost a great deal of seniority in ED DERWINSKI.

Also in PAUL FINDLEY, who was third ranking member on the Foreign Affairs Committee and such a tower of strength on the Agriculture Committee on which he served.

PAUL, of course, was first elected to Congress in 1960. We first appointed him to the Agriculture Committee and its Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, and the Subcommittee on Wheat, Soybeans, and Feedgrains. He was also a member of the Subcommittee on Europe and the Middle East of the Foreign Affairs Committee.

Before coming to Congress PAUL was president of the Pick Press in Pittsfield, Ill., and the Democratic Message of Mount Sterling, Ill., both weekly newspapers in the west central area of Illinois.

I just cannot refrain from mentioning the numbers of times that PAUL FINDLEY has taken the floor of this House in the interest of the American taxpayer out there, particularly well schooled as he was in agricultural economics. There was probably no one more gifted and who did his homework and offered more amendments to alter and shape legislation on the floor of this House.

□ 2020

If he could not get the job done in committee, he was one to take the floor here and argue the case before his 434 peers here, and in more cases than not, even in a minority position from the standpoint of politics, could win the issue. He recognized the popular issues back home that the people were interested in seeing enacted here on the floor of this House.

So we are going to miss a great leader in PAUL FINDLEY. I would like to think that, with his initiative in the food-for-peace program that he was so instrumental in getting enacted on the floor of this House in Public Law 480 legislation, those talents could surely be put to good use by the administration, whether in some ambassadorial rank position either with the Department of State or the Department of Agriculture. I think we would do well to pick up on that great experience that PAUL FINDLEY has.

Mr. Speaker, I will be happy to yield to any Member at this time for whatever comments they might like to make relative to PAUL FINDLEY's service here in this body.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to my friend, the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Speaker, I rise to salute PAUL FINDLEY, our colleague from the 20th District of Illinois, who will soon be departing these Halls.

For 22 years, PAUL has served not only the people he was elected to represent in Congress. He has served all the people of our great and good Nation with honor and competence.

It is hard to imagine not having the counsel of PAUL FINDLEY when a farm bill or foreign policy measure comes to the floor. PAUL could always be counted on to have studied both sides of the issue at hand and to give sound reasons for the stand he chose.

With traits like these, he is destined for success in his new endeavors; and I wish him well.

Mr. MICHEL. Mr. Speaker, I thank the gentleman.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Illinois.

Mr. HYDE. I again thank our distinguished minority leader for giving us a chance to comment on the sad loss of so many able and distinguished Members of Congress from Illinois.

When I think of PAUL FINDLEY, I must say that he and I did not agree on a great number of things. Our approach was different to many, many problems. Again I concede that he may well be right and I may well be wrong, but I admire PAUL FINDLEY for two words: Courage and conviction.

I do not know a Member in this body past or present who has had the courage that PAUL FINDLEY had, to take a very unpopular cause and to see it through and to never be deterred by press or by political penalty in his search for peace.

The thing that animated and always will animate PAUL FINDLEY is a thirst and a love of peace, and his view toward getting peace was, let us say, unorthodox, if one is to say the orthodox is what the majority of us adhere to, but that was an example of his courage; he dared in different ways to try to achieve peace in this world.

He was a man who cared about the big issues, the permanent things—the Atlantic Union, things that were not popular with many Members, but at the same time it was a visionary approach to the grand and great and eternal problem of peace.

PAUL FINDLEY cared a lot about this body. He contributed a lot. He was energetic; he was serious; he was sincere. His loss will create a void that will not be filled.

I am proud and enriched to have served with PAUL FINDLEY.

Mr. MICHEL. Mr. Speaker, I thank the gentleman. I can surely attest to the many, many hours that PAUL FINDLEY dedicated to this job, for we have offices right near one another, and he was always here before I arrived. If I arrived by 7:30 or 8 o'clock, he had me bested by a few minutes, and he was always there, too, as the night shades were falling. I do not know, as the gentleman indicates, of anyone who has given more unstintingly of his time to this process. He loved this House and was a very vocal voice on those issues about which he felt so strongly. As the gentleman indicated, we were not always in agreement, but you could never fault PAUL for having that dedication that, once he had his eye set that this was the position he was taking, he was going to articulate that position and make the most of it.

So we are going to surely miss the likes of PAUL FINDLEY around this House.

Mr. PHILIP M. CRANE. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Illinois.

Mr. PHILIP M. CRANE. I thank the gentleman for yielding.

Mr. Speaker, I, too, would like to comment on what has been observed in terms of PAUL FINDLEY's dedication to his job. I do not think many people fully appreciate the workload that was involved in carrying two major committee assignments, as he did on Foreign Affairs and Agriculture. While Foreign Affairs was less my area of expertise or interest than domestic issues, I nevertheless felt that PAUL FINDLEY's was a voice that should be heard in the debates that transpired in the international arena on this floor. I, too, sometimes had my disagreements with PAUL, but, as I noted earlier, disagreements never got disagreeable with PAUL FINDLEY.

In the area of agriculture, I confess to being a babe in the woods when it came to PAUL FINDLEY's expertise and understanding, most especially of Illinois agriculture and Illinois agricultural interests, because PAUL always had a thoroughgoing understanding and defense of all of the positions he took. I know he provided leadership to me, as

well as to many others, when it came to issues which touched us so dearly back home in Illinois.

So I, too, want to again thank the gentleman for the opportunity to comment on the loss of a very capable and outstanding colleague, but we will lose his friendship never.

Mr. MICHEL. And more specifically, I might add, with regard to the gentleman's remarks relative to agriculture, there were times when PAUL FINDLEY, again in the interests of the taxpayer, aroused the consciousness of this House. When, over a period of years, the price support payments got to the point where very few Members were really aware that they could be so unconscionably high, there was PAUL's limitation of no more than $50,000—again in the interest of the taxpayer, and an initiative on his own. And when over a period of years there was the manipulation of the sugar quotas and marketing system in this country, he was one of the first to take on that very "sacred cow," or sugarcane in this case, and do a job in the interest of the American consumer and the American taxpayer.

So we have many things to thank our friend PAUL FINDLEY for.

Mrs. MARTIN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentlewoman from Illinois.

Mrs. MARTIN of Illinois. I thank the gentleman for yielding.

Mr. Speaker, I do not know why any of us should be surprised at the courage and the daring and, almost, occasionally fey part of PAUL FINDLEY. His hero is Abraham Lincoln. He is a Lincoln collector. His office is a repository, really, of Lincoln memorabilia. I think the spirit that moved the greatest son of Illinois is part of what moved PAUL FINDLEY. I think he cared about people's rights. If he saw that a right was being abrogated or abridged, even in an unpopular area, he moved in. If it were equal rights in this Nation or rights in other nations, he moved in. He would represent the farmers. He does represent the farmers in his district. But if somebody was getting too much money from a farm program, he would go in. He cared. Not just for consumers, but I think, in Congressman HYDE's words, that vision of a better world that he wanted.

For a city girl such as I who represents an agricultural district and has had to learn a great deal quickly, and sometimes not too well, he has also been a teacher. I am much better informed because PAUL FINDLEY helps me. That help and friendship, I know, will continue. We are just quadruply blessed in Illinois as we are talking tonight. He, too, joins ED DERWINSKI in being just a doggone lovely man.

Mr. RAHALL. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to my friend, the gentleman from West Virginia.

Mr. RAHALL. I thank the distinguished minority leader for yielding.

Mr. Speaker, as one from outside the Illinois delegation and as one from this side of the political aisle in the House of Representatives, I could not pass up the opportunity to say a few remarks about PAUL FINDLEY's service in the Congress. While we may take our delight in the political numbers outcome in the past election, it did not overcome the fact that we do work quite often on a nonpartisan basis in this body and we develop friendships across the political aisle. And PAUL FINDLEY was one with whom I did develop a close friendship and one for whom I have the highest praise for his service in the Congress.

□ 2030

He represented not only his constituency, but he represented, in the arena of foreign affairs and from his position on the Foreign Affairs Committee, what I have felt has been the hidden conscience of the American people. He represented what he thought was fair and just in all parts of the world. He represented in the Middle East especially what he considered to be an evenhanded policy. And it was a position that often brought him criticism. It often brought him sharp criticism and political attacks and political support for his opposition.

But as I said, I believe PAUL did represent what he thought was right and what he thought was fair and evenhanded. And for that reason I for one commend him for his service. And yes, we shall miss him in this Congress. But he left a mark that he can be very proud of.

Mr. MICHEL. Mr. Speaker, I thank the gentleman.

From the Judiciary Committee, we are losing two of our Illinois members. We are losing BOB MCCLORY, who served as the ranking Republican member on that committee. Before coming to Washington he was in the Illinois State House of Representatives for 2 years and in the Illinois State Senate for 10 years. He was first elected to the Congress in 1962.

In 1965 he became a member of several of the subcommittees of the Judiciary Committee, and he is also a member of the Legislative Subcommittee of the Select Committee on Intelligence.

We are also losing TOM RAILSBACK, another member of the subcommittee and of the Judiciary Committee also. He was a product of the Illinois State Legislature, as the gentleman from Illinois (Mr. ERLENBORN) stated earlier. He served two terms as a State representative before being elected to the 90th Congress in 1966.

As a member of the House Judiciary Committee, TOM is the ranking Republican on its Subcommittee on Courts, Civil Liberties, and the Administration of Justice and is a member of the Subcommittee on Monopolies and Commercial Law; he is also the ranking Republican member of the House Select Committee on Narcotics Abuse and Control.

TOM's Republican colleagues from the Prairie State elected him chairman of the 14-member Illinois Republican delegation to the 95th, 96th, and 97th Congresses.

BOB MCCLORY has served very ably guiding the fortunes of those on our side in that Judiciary Committee. I would like to think that with all that experience, he would put all that legal talent to work in the private sector out there, which I think, from conversatives with BOB, is probably going to be his lot. I know that he will be doing well, probably much better than he would have done in this House so far as remuneration is concerned. Certainly that would apply to our friend, TOM RAILSBACK, who will be associated with the Motion Picture Association and will be an associate of Jack Valenti, whom many of the Members of this body know so well.

I guess my only regret will be that our frequent golf outings might be fewer in number, because TOM and I over many years have enjoyed that game.

So I cannot refrain again from making mention of the tremendous loss this House is suffering by this redistricting in our home State that causes four Members with such seniority to simply be wiped off our delegation. This House is certainly going to suffer from that.

I yield at this time to my friend, the gentleman from Illinois (Mr. PHILIP M. CRANE).

Mr. PHILIP M. CRANE. I thank the gentleman for yielding.

I find a personal kind of anguish in losing all of these folks in day-to-day service here. But as the gentleman pointed out correctly, I do not think that we have seen the last of them by any means. And I know they will maintain an ongoing commitment to public service.

Mr. Speaker, in the case of BOB MCCLORY, back in 1982, with the reapportionment at that time, I inherited seven townships from what was BOB's old district, and then, of course, after this most recently gerrymandering, BOB was in a position where he chose not to seek reelection, and I inherited a much larger geographic area from him.

I will say that BOB certainly did his job well in representing that district and he bequeathed to me with his departure real "elephant country," because of the yeoman service he had

89-059 O-86-44 (Pt. 20)

provided, because in the process, of course, there were certain partisan consequences that the people who liked BOB increasingly liked Republicans too.

So I am grateful for what BOB did to me as my former congressional neighbor.

Mr. Speaker, it is again with mixed emotions that we take part in this tribute to another Illinois colleague, Congressman BOB MCCLORY, who is retiring from this body upon the adjournment of the 97th Congress.

Before addressing remarks in my own behalf, I would like at this point to submit it for inclusion in the RECORD the statement which was issued on January 13 by BOB, who with his attractive wife, Doris, at his side made his retirement announcement at a press conference in the historic House Judiciary Committee Room, where he devoted his principal legislative service as a member and is now the ranking Republican member of the House Judiciary Committee.

That statement is as follows:

I have called this press conference to discuss important decisions and plans which will affect my life—and those hundreds of thousands of citizens whose interests I have represented in the U.S. Congress for almost 20 years.

First, let me emphasize that my decisions should not indicate any desire to abandon or terminate my congressional service. My jobs here in the U.S. House have not been completed. My desire for service and my capacity for service are as strong—or stronger than ever.

Several factors over which I have no control have contributed to make this extremely difficult. A blatantly political decision of a Federal court in Chicago has undermined my congressional district centered in Lake, Kane, and McHenry Counties. Townships and communities have been severed from their natural environs in a disruptive and debilitation manner. A congressional redistricting which has no legitimate genesis was designed by the Democratic leader of the Illinois House of Representatives and developed in large part during the actual Federal court proceedings in Chicago.

The remap as approved represents the extreme to which judicial activism can be carried and applied. The judges undertook the prerogatives of a legislative body and of political pollsters in speculating on the future political inclinations of Illinois voters in applying a so-called doctrine of "political fairness" never previously applied by a court in producing a court-ordered remap.

The realities of the Federal judges' usurpation of political authority is to doom the future of as many as four or five Republican Members of the U.S. House of Representatives. I probably would not have to be one of the victims of this Democratic court-ordered scenario.

But, for a number of reasons, I have reached a firm resolve not to seek reelection in Illinois' 10th Congressional District. First, I do not relish a divisive, bitter, expensive, and potentially self-defeating campaign against another younger and capable Republican colleague. Literally hundreds of constituents and friends with whom I have spoken admit to an attachment to both Congressman John Porter and me. I want to relieve them of the dilemma of supporting one or the other of us.

The financial commitments of a primary fight would impose burdens on friends and supporters when they are already committed to other national, State, and local races. Political campaign funds should be directed rationally—not recklessly or needlessly.

Ten years ago—following a court-ordered redistricting I entered into a great new area to build up a political following—and to serve new constituent interests. Now, a decade later, I must weigh the physical, organizational and financial problems of developing political bases in densely populated areas of Cook County.

The interests of my Lake County constituents and the Cook County residents of the 10th District are substantially similar. However, a primary battle could be disruptive of those interests and could pit one group against the other.

Finally, I am concerned about the welfare of the Republican Party in the 1982 and 1984 elections. I had hoped for my reelection and the election of a Republican majority in the U.S. House this year. I even had hopes of becoming chairman of the House Judiciary Committee in the next Congress.

All careers on Capitol Hill must come to a close some time. Some Members voluntarily retire. Some are defeated at the polls. Only a few of us are redistricted out of office. In my case, I attribute my decision today to the action of the U.S. Supreme Court on Monday affirming a Federal court in Chicago which is forcing the termination of the political careers of two or perhaps more Illinois Republican Members of the U.S. House.

Let me add that I am making my decision with no bitterness and no regret for any actions I have taken in the court proceedings. In addition, my decision is entirely voluntary and is based upon no conversations importing promises of political or private rewards of any kind.

I'm grateful to my wife Doris for her steadfast support during this trying period. She has shared with me these hours and days of searching and praying for answers to our dilemma. She alone has participated with me in this statement.

We are confident that our friends and supporters will understand this decision and will acquiesce in the reasons for my withdrawal from the primary race. I beg all my constituents and backers to lend their support to the campaign of my friend and colleague, JOHN PORTER in the March Republican primary.

Mr. PHILIP M. CRANE. Mr. Speaker, I will also attach to these remarks editorial comments from the principal newspapers in BOB MCCLORY'S congressional district and a number of communications which were made available to me for purposes of this special order.

Mr. Speaker, the residents of the 13th Illinois Congressional District are justifiably proud of the man who has represented them in this House of Representatives for the past two decades. He will leave behind him an outstanding record. His efforts as a member of the Judiciary Committee will long be remembered.

The record will show that BOB MCCLORY was a principal sponsor of amendments to the Federal antitrust laws, a sponsor of the proposed constitutional amendment to require a balanced Federal budget and to control Federal spending, an active proponent of Federal regulatory reform and immigration legislation. He participated actively in the 1974 impeachment inquiry and authored one of the three articles of impeachment reported by the committee.

Congressman MCCLORY was educated in Switzerland, Dartmouth College, and Chicago-Kent College of Law—now affiliated with Illinois Institute of Technology—where he was graduated in 1932. He was a member of Psi Upsilon and Green Key at Dartmouth, Phi Delta Phi and the Round Table—an honorary legal scholastic society—at Chicago-Kent. He engaged in the general practice of law in the State and Federal courts in Chicago and Waukegan, Ill., until his election to the Congress in 1962.

Congressman MCCLORY received the Distinguished Alumni Award for 1982 from his law school alma mater. He was granted an honorary degree of doctor of laws in June 1982 from Lake Forest College in Illinois.

He is the author of the article "Reforming the Budgetary and Fiscal Machinery of Congress"; a chapter of "We Propose: A Modern Congress, (1968)"; and "Congressional Investigations: A Necessary Hybrid in Our System of Government," which appeared in the 1977 volume of Capitol Studies.

Congressman MCCLORY has been admitted to the Illinois and District of Columbia bars, and is a member of the Illinois State Bar Association—former member of the Board of Governors—and the American Bar Association, the Law Club of Chicago, and other legal, fraternal, and social organizations.

Prior to his election to the Congress, he served for 12 years in the Illinois General Assembly—10 years as a State senator.

Congressman MCCLORY is a member of the House Permanent Select Committee on Intelligence, serving as the ranking member on the Subcommittee on Legislation. Mr. MCCLORY served as a member of the National Commission for the Review of Antitrust Laws and Procedures (1978-79). He served during the past 2 years as a member of the Select Commission on Immigration and Refugee Policy and is currently a member of the Advisory Committee on Project '87—created to celebrate the bicentennial of our U.S. Constitution in 1987.

Mr. Speaker, perhaps Bill Schroeder of the Lakeland Publications in Congressman MCCLORY'S district best summed up the feelings of his constituents when Mr. MCCLORY decided not to run for reelection in 1982.

Schroeder wrote:

Without dominating, the kindly, soft-spoken man from Lake Bluff was a domi-

nant force in Lake County politics for more than 30 years, first as a state representative, then as a state senator and for the past 20 years serving as our representative in Washington, D.C.

With only a hint of bitterness, McCLORY was his customary genteel self in reacting to a blatantly political decision handed down by the courts that decimated McCLORY's district and thrust him into a head-on confrontation with a popular Republican colleague with like views if he was to stay in office. McCLORY chose to retire on the brink of every Congressman's dream, possible ascendancy to the chairmanship of a major House committee

The decision to retire was vintage McCLORY. The popular lawmaker was not known as a quitter or without stomach for a fight. McCLORY didn't quit. He retired—undefeated. As for a fight, the one-time Waukegan attorney could pursue an issue where principle was at stake. In this case, the only issue at stake was political self-preservation. Obviously, that was insufficient in his eyes.

Those words tell the story of BOB McCLORY—a leader, a man of principle, a fighter.

Mr. Speaker, may I add to those words this observation:

ROBERT McCLORY of Illinois will be missed by friend and foe alike. Even his adversaries will concede, he was ever a gentleman and esteemed colleague.

Mr. Speaker, the editorial comments and communications to which I referred are as follows:

[From the Daily Courier News, Jan. 21, 1982]

AS WE SEE IT: McCLORY HAS EARNED HIS DISTRICTS' GRATITUDE

We would be remiss if we did not join reader A. J. Koltveit in saluting Cong. Robert McClory, not only for the reason stated in his letter today, but for long and distinguished service to three constituencies—those of his state representative district, where it all began, later his state senatorial district and, finally, in 1962 his congressional district (for which the boundary lines changed twice during his tenure).

The third change, which would have placed him in the new 10th District, would have removed him for the first time in all those years (since 1950) from the area in which this newspaper has substantial circulation. We've come to know him well, and to appreciate him both as a person and as a legislator.

He has two attributes that are particularly impressive to us, one of which was reflected in the vote he received every two years. He works hard at his job. There aren't many congressional offices as responsive as his to constituents—and he obviously doesn't check first on the voting record of those who ask his help. This quality dates back to his state legislative days when funds for clerical help were in short supply and it has served him well on election days.

The second is this: He is a gentleman, a characteristic that isn't always helpful to elected officials. It is this quality, not partisanship, that made him supportive of both Richard M. Nixon and Spiro T. Agnew until the proof of their wrongdoing became a matter of record. Despite all of his years in public life, McClory couldn't bring himself to believe men so high could stoop so low. That kind of naivete may subject a person to criticism, but we doubt that it's uncomfortable to live with.

McClory has never been known for his flamboyance. He has never been a member of the majority in his 20 years in Congress. Had that come about this year, he would have been chairman of the prestigious House Judiciary Committee on which he is now ranking Republican member. That chairmanship would have been a suitable cap to the career of a dedicated public service.

His age (he will be 74 on Jan. 31) coupled with the widely-whispered message that 1980 would mark his last bid for the office, apparently figured in both Republican and Democratic remap plans this year. And it undoubtedly, too, played a part in his decision not to engage in a punishing primary battle with another Republican in a district in which a Democrat now can win.

McClory, though, is a young septuagenarian, again because of personal discipline. He works at staying physically fit. We hope that he will be given many years to contemplate the greatest reward of all after he finishes his work as 13th District congressman next January—the personal satisfaction that must come from many years honorably spent in service to his nation, to his state and to his people. Not many succeed so well.

[From the News-Sun, Jan. 14, 1982]

McCLORY STEPS ASIDE

U.S. Rep. Robert McClory, R-Lake Bluff, has decided to close out a political career that began in 1950 rather than battle for survival in a congressional district mangled beyond recognition in the political redistricting process.

McClory's announcement Wednesday morning that he was withdrawing from the March primary election in the newly formed 10th Congressional District was not a joyous event. It came as a blow to McClory's supporters, was clearly a traumatic decision for McClory, himself, and it dramatically signaled the destructive effect of congressional redistricting in Lake County.

It is understatement to say that McClory has become a familiar political figure in Lake County. He has been immersed in the area's political seas since he first was elected to the Illinois House of Representatives more than 30 years ago. Though not everyone's leadership choice, he accurately reflected the views of a huge majority of the area's voters, first as a legislator in the Illinois House and Senate and since 1962 as a congressional representative from an ever-changing district based in Lake County.

Lake County at all times had a representative who understood the problems of the area and who worked hard at maintaining that understanding. It truly can be said that McClory worked tirelessly at his job. And though he tugged at times against the political currents in his home district, he never departed far from the views of those he represented back in the Lake County area.

But now a court-approved, Democrat-inspired reapportionment of Illinois' 22 congressional seats has virtually eliminated Lake County as anyone's political home. The county has been sliced into two congressional districts, all vulnerable to domination by outside areas.

McClory's departure from the political arena is not only a cause for sadness in itself but is cause for gloom on a much broader scale. It may be at least another 10 years before the area regains a representative in Congress it can call its own.

[From the Mundelein Herald, Jan. 20, 1982]

AS McCLORY DROPS OUT OF THE PRIMARY

Rep. Robert McClory's surprising withdrawal from the 10th Congressional District primary race represents the first political fatality of that shrewd Democrat-inspired redistricting.

As a state legislator for 12 years before 1963 and a congressman ever since, McClory has long been a household word around here. Ten times the name appeared on the congressional ballot—in the 12th Congressional District during the 1960s, in the 13th District during the 1970s—and 10 times the voters gave it their nod.

To the extent McClory is known nationally, it is for his role as the second-ranking minority member of the House Judiciary Committee during its investigation of the Watergate scandal in 1974. McClory repeatedly expressed dismay at the inculpatory evidence, and eventually he voted to impeach President Nixon for abuse of power.

Yet aside from fleeting prominence achieved during Watergate, McClory played a muted role in national affairs—partly because of the Democrats' control of the House throughout his congressional career and partly because of sheer fate.

Particularly in shaping the historic civil-rights legislation of the 1960s, McClory might have played a far greater role but for the flip of a coin. The toss determined seniority on the House Judiciary Committee and its subcommittees. McClory lost out to Edward Hutchinson of Michigan, who fiercely opposed the civil-rights measures. Had the coin landed otherwise, McClory, an advocate of the controversial legislation, would have been the ranking Republican on the Judiciary panel and very likely influenced the legislation to a greater degree.

If the Supreme Court's acceptance of the congressional map hurt Illinois Republicans, McClory's withdrawal eliminates the need for a bruising and expensive primary battle. Porter will be able to save his money and energy for the Democratic challenger next November.

It was time now for McClory to bow out. He didn't leave until it was time, and when he left he did so with grace. He can be proud of that.

JANUARY 19, 1982.

The Honorable BOB McCLORY.

DEAR BOB: I know you are hearing from everyone in the county—mostly words of warmth and affection I assume. It's too bad we don't get these letters over a period of time so each would get the attention it deserves, instead of all in a bundle at watermark times.

But Hub and I too, would like to express the warmth we have felt for you, and the sure knowledge that if there was something a Congressman could do for us, that we could turn to you and not be concerned that our party would prevent us from getting full attention. And no one knows better than I what an indefatigable campaigner you are—wherever I was with my brochures—there you were also, plastic bag in hand, the other outstretched. I've always been pleased to think of you as a friend—at least once 1966 was behind us, I've continued to think so.

Every good wish to you and Doris on your retirement. May you see everything you haven't had time to enjoy up to now. (When I think about having to run every other year, I blanche . . .)

Affectionate regards,

GRACE MARY STERN.

ABBOTT LABORATORIES FUND,
North Chicago, Ill., January 15, 1982.
Hon. ROBERT MCCLORY,
House of Representatives,
Washington, D.C.

DEAR BOB: Let me add my congratulations to the others I know you have received for the courage and commitment evidenced in your recent decision not to seek reelection in the forthcoming primary. I think I can appreciate the difficulties you faced in coming to such a conclusion and, at the same time, the disappointment you must feel.

As your long-time constituents, Millie and I respect you more than ever and thank you for your long and devoted service to this Congressional District of Illinois. You have represented its interest well and you deserve the gratitude of all its people. Certainly you have ours.

You and Doris have our fondest wishes for many more years of health and satisfaction from whatever may be your future pursuits.

Sincerely,

CHUCK.

MRS. MILTON H. RUDOLPH,
Gurnee, Ill., January 25, 1982.
Congressman ROBERT MCCLORY,
House Office Building, Washington, D.C.

DEAR BOB: Many thanks for the beautiful historical calendar. We appreciate your thoughtfulness.

We are sure you realize how much it has meant to us to have you represent us in Springfield and Washington for all these years. It is going to seem very strange to have to voice our comments and complaints to a stranger! We hope to have the opportunity to meet John Porter, but he can never take your place!

There have been many fine articles about you in the local papers. A great many Lake Countians feel the redistricting is most unfair. However, that strong Lake County Republican voice will surely make itself heard.

We hope you and Doris will enjoy your retirement as much as we enjoy ours. It's really a great life, but takes a little getting used to! We wish you the best of luck and much happiness.

Many thanks for your years of wonderful service to us and to our great country.

Sincerely,

MONTE AND BESS RUDOLPH.

G. D. SEARLE & CO.,
Skokie, Ill., January 26, 1982.
Congressman ROBERT MCCLORY,
Rayburn House Office Building,
Washington, D.C.

DEAR BOB: Your decision to not run in the next primary must have been a very difficult one for you and Deloris.

The fact that you have served so many so well and for so long is one enviable record and will always be a source of pride for those of us who have been able to know you personally.

My guess is that the correct political decision was made. However, the fact that it had to be made at all speaks to a system that has severe deficiencies.

Thank you Bob for being my Congressman and for being a great American. Our friendship will always continue.

Sincerely,

L. SEARLE.

DON PEASLEY,
Woodstock, Ill., January 20, 1982.
Congressman ROBERT MCCLORY,
Rayburn House Office Building,
Washington, D.C.

GOOD MORNING, BOB: On returning from the Farm Bureau Convention in California Sunday night, I was dismayed to learn that you decided to withdraw your candidacy for re-election.

I can understand how you feel. I realize the realities of the situation but that does not lessen my frustration of the unjust way the Democrats and the courts have seen fit to implement the "one man, one vote" rule. Your absence from Congress, when that finally occurs, will be a significant loss to the people of northeastern Illinois.

It was my pleasure—and honor—to have worked intimately with you during part of six years, three campaigns. You are serving with rare distinction but I do know that you will find plenty of opportunities to continue public service if you should desire.

Please give my best regards to Doris and do tell her that I join both of you in sharing your sadness of the outcome of this unhappy situation.

Cordially yours,

DON PEASLEY.

JANUARY 19, 1982.

DEAR DORIS AND BOB: Needless to say, we are sorry to come to the end of an era. We shall all have to readjust to the absence of our District and Congressman all at once. Both of you served the District well, and we'll miss you, but we do hope to see you again, both here and in D.C., if at all possible.

"A cheerful message to tell you . . .

Many friendly thoughts are sent your way!"

Fondly,

RUTH AND NORM RICHARD.

P.S.—David became a partner at Duncan, Allen & Mitchell.

VINCENT CURTIS BALDWIN,
Lake Forest, Ill., January 21, 1982.
Hon. ROBERT MCCLORY,
House of Representatives,
Washington, D.C.

MY DEAR BOB: We were greatly saddened, Connie and I, to learn of your decision not to become a candidate for the Tenth District. Saddened not only for your constituents, but indeed for the country as a whole in losing so distinguished a Representative in the House of the Congress.

Despite your gracious remarks to the Press, it must have been a very bitter decision for you and Doris, as well, to have made.

While we have been deprived of the opportunity of actively supporting you because, under the old alignment, Libertyville has been in Phil Crane's District for so long, we have been outspoken in our political praise of your career. In our opinion, it has been one of the most outstanding and singularly distinguished of any member who has sat in the House during the past two decades. It does occur to us that your knowledge of Congressional and national affairs, procedures and the inner work of the federal government would warrant your appointment to some truly significant office in Washington, and we do hope that this may come about.

It is a long, long time since you were a law school student and I was a cub-practitioner in your father's offices, but those experiences and our later associations have always drawn us and held us close together—at least in our hearts.

We wish always for you and Doris the very best of all good things.

Most sincerely,

VINCENT CURTIS BALDWIN.

MICHAEL CUDAHY,
Glenview, Ill., January 19, 1982.

DEAR BOB: Although I hate to think that you will not be our Representative in the years ahead, I congratulate you on your very unselfish decision not to run for office this year. You know far more than I about the details of the pros and cons of your decision. I respect you for it, however, and I wish you and Doris great happiness in the years ahead. I can imagine how exhausting your work has been in the past and I think a little relaxation doing the things that you want to do will mean a lot to you.

In the meantime, keep up the good work and thank you most sincerely for all the wonderful service that you have given to us who are lucky enough to reside in your area.

Yours with best regards,

MIKE.

THE FIRESTONE TIRE & RUBBER CO.,
Akron, Ohio, January 22, 1982.
Hon. ROBERT MCCLORY,
Rayburn Building,
Washington, D.C.

DEAR BOB: The Bureau of National Affairs Antitrust and Trade Regulation Report carried the announcement of your decision not to seek reelection.

Just as surprising as your announcement was the realization of how much time had passed since John Rutgers and I were out running around getting his car stuck on the golf course distributing your campaign literature when you first ran for the Illinois General Assembly.

During those 30 plus years I think that the Illinois Assembly and Senate, the U.S. House, the Thirteenth District, and Lake Bluff have all been most ably served by you. I shall miss not having a friend in the Congress; and I know Robin will miss the many kindnesses that you have shown her over the years.

While you are not seeking reelection, I am certain you are doubtless not retiring, so I will wish you all good fortune in the future.

With best personal regards,

ROBERT K. LEWIS, Jr.

FIRST UNITED METHODIST CHURCH,
Elgin, Ill., January 25, 1982.
Hon. ROBERT MICHEL,
Minority Leader, House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN MICHEL: Ever since the media carried the announcement of the coming retirement of Congressman Robert McClory, I have wanted to express the feelings of thousands of individuals in the 13th Congressional District. Perhaps the best way is to say that Mrs. Rogers and I have known Congressman McClory for nearly thirty-nine years. We saw him enter the political arena as a Representative to the Assembly in Springfield. He then became Senator McClory in the Senate at Springfield. In due time he was elected to the House of Representatives of the Congress of the United States of America.

I want to know that there are few persons who are held in greater esteem in our area, than Congressman McClory. He has been a great representative. We have known him

for his honesty, straightforwardness, political acumen and sincere concern for all the people whom he represents.

With the kindest regards, I am,

Cordially yours,

CARLETON C. ROGERS,
Senior Minister.

GEORGETOWN UNIVERSITY LAW CENTER,
Washington, D.C., January 18, 1982.

Congressman ROBERT MCCLORY,
House of Representatives,
Washington, D.C.

DEAR BOB: I was sorry to read of the circumstances which lead you to announce that you will not be running again for the Congress.

I want to congratulate you and thank you for all that you have done during your 20 years in the Congress.

It was a delight to work with you in so many ways.

I send to you and to your delightful wife my very best wishes for every continued success and happiness.

Cordially yours,

ROBERT F. DRINAN, S.J.,
Professor of Law.

U.A.D.,
Elgin, Ill., January 20, 1982.

Congressman and Mrs. ROBERT MCCLORY,
Washington, D.C.

DEAR DORIS AND ROBERT: I don't know what people say at a time like this, but Floyd and I wish to tell you both you are the greatest.

There are so many things in life that seem unfair and maybe this is how our faith is tested. I have enjoyed our friendship through the years and most of all the support you have given to our area in the field of volunteer work.

We know you will go forward to other projects, Bob, because you are truly a giver.

We hope to hear from you and Doris when things settle down. I hope you will be in the area. Thanks again for giving so much to others. We will miss you being in our district. Don't forget to let us hear from you. God bless.

Fondly,

BETTY AND FLOYD BROWN.

WASHINGTON, D.C.,
January 18, 1982.

DEAR DORIS AND BOB: We were sad to read that you are retiring. you have had a wonderful career and you can retire in good conscience for having done your duty to your district, state and country.

I enjoyed my association with you in the Congress and Lorraine her association with Doris.

We hope we shall see you often and we send you our friendship and good wishes for the future.

Yours sincerely,

——— ———.

CONSULATE GENERAL OF THE
UNITED STATES OF AMERICA,
Hamilton, Bermuda, January 19, 1982.

Hon. BOB MCCLORY,
U.S. House of Representatives,
Washington, D.C.

DEAR BOB: It was with deep regret that Priscilla and I learned of your decision to retire from Congress after this session.

I know that you and Doris richly deserve some rest, but your work on the Judiciary Committee will be greatly missed.

You have had a wonderfully satisfying career and those of us privileged to have worked with you are most grateful for this association.

You have our very best wishes and warmest regards.

Sincerely,

MAX FRIEDERSDORF,
Consul General.

JANUARY 15, 1982.

DEAR BOB: I read your news with two emotions—one, a sense of loss for the Congress itself and for the Administration. Two, a sense of respect and pride in the way you handled this most difficult decision—a lot of class in that—All the best for the future—

Warm personal regards,

GEORGE BUSH.

HOUSTON, TEX., *January 24, 1982.*

Hon. ROBERT MCCLORY,
Constitution Avenue, NE.,
Washington, D.C.

DEAR BOB: I wasn't at all surprised to read in the Tribune that you had decided not to seek another term in Congress, but personally, I was extremely disappointed at the prospect of our nation losing an honest, forthright public servant who has as distinguished a record as you. Perhaps throughout history, people like you have been in short supply; today that is certainly true. Always during our nation's history we have needed more, not fewer people in Congress like you. The fact that you will not be there in the next session is a genuine tragedy of the outmigration of people from Illinois and the reapportionment that resulted from it. I hope that somewhere in the booming states of Florida through California there is another, budding Bob McClory.

Meanwhile, Ann and I join with your many friends in wishing you all the best for the future, thanking you for the past, and hoping that your absence from Congress will not necessarily mean your silence on important public issues.

Sincerely,

JUSTIN M. FISHBEIN.

SKOKIE, ILL.,
January 25, 1982.

Hon. ROBERT MCCLORY,
House of Representatives,
Washington, D.C.

DEAR BOB: I read the statement you made in connection with what I am sure must have been a terribly difficult decision.

The way you handled it was first-rate, which comes as no surprise to those of us who have known you and worked with you for so many years.

With my best personal regards.

Sincerely,

DONALD RUMSFELD.

CHICAGO, ILL.,
January 13, 1982.

Congressman ROBERT MCCLORY,
Rayburn House Office Building,
Washington, D.C.

DEAR BOB: Although some might say that a quarter-century of distinguished public service is its own reward, you certainly have earned a better fate than that given you by the political unreality of this decade's redistricting.

As I read of your decision not to run against John Porter, it seemed to me to be an altogether too abrupt ending of the congressional career that you so painstakingly built over such a long period of time.

To your great credit in this day and age, the name of Bob McClory will be remembered in the halls of Congress as one associated with honor and a record of tireless effort on behalf of Republican principles during some rather frustrating political years.

Your time on the hill has been dedicated to trying to make things fiscally brighter for the common citizen and small businessman, when most people in the federal government had a more spendthrift philosophy.

We'll miss you and the quality of representation you have provided. Sally and I send our best wishes to you and Doris for good fortune in whatever you seek during 1982 and thereafter. We know that you're not really ready to retire from public life.

You'll always be "our congressman," and we'll look forward to seeing you soon back in the district.

Sincerely,

STEVE.

DEERFIELD, ILL.,
January 24, 1982.

DEAR CONGRESSMAN MCCLORY: I have wanted to write to you ever since you announced that you would not be running for re-election.

Both Don and I are disappointed in your decision as we had been looking forward to your representing us in the new 10th district. We remember when you were our representative not so long ago before the 1970 remap. And I especially recall how warmly you greeted us in Washington, D.C. both in 1967 when I came on an assignment from Pioneer Press and later when we visited with our two oldest sons in 1970.

We do understand, however, your generous decision not to engage in a bitter primary battle, and we applaud it. It is just another example of the high tone which your service to our country has taken through the years. We were not at all surprised when the White House said you had not asked for any appointment or favor. We knew you hadn't.

We also recall your statesmanlike conduct during the painful Nixon exodus. We were proud to know you and wished then that you were still representing us.

Best wishes to you and your lovely wife. Maybe we'll all be seeing more of your when you come back home to Lake County.

Sincerely,

DOROTHY ANDRIES.

ROBERT MCCLORY,
Member of Congress,
Washington, D.C.

DEAR BOB: It was with deep regret that I read of your intention to retire. Since reading this, my memory has brought back many occasions and events that we shared some years ago, more years ago, it seems, than I have realized.

You must be very, very proud of all the years of outstanding service you have given to the citizens of Illinois. It would be hard to find anyone who has been elected to public office that could surpass you in dedication and integrity, and in meeting the commitment you made with the people of your district.

I am sure that your successor, whoever it may be, will find a well of inspiration and encouragement in your great career, Bob. I know that the years you and I worked together were certainly some of the most significant of my life, and I can never thank you enough for all you have done to help me in making my own contribution to government service.

To you and Doris, many happy and productive years ahead. I can't think of two persons more deserving of the richest of futures.

With deepest regards,

ELIZABETH WAWIRKA.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, EDUCATION, AND RELATED AGENCIES APPROPRIATIONS FOR 1983—HEARINGS BEFORE A SUBCOMMITTEE OF THE COMMITTEE ON APPROPRIATIONS

THURSDAY, APRIL 22, 1982.

IMPACT AID

Witnesses: Hon. Robert McClory, a Representative in Congress from the State of Illinois and Charles Thomas, Superintendent of North Chicago School District No. 64.

Mr. NATCHER. Our next witness is Mr. McClory.

Come around, Bob. Our friend and colleague from Illinois, it is always a pleasure to have you before the committee. We would be pleased to hear from you.

Mr. MCCLORY. Thank you very much, Mr. Chairman.

I am pleased to appear before the subcommittee today in support of continued impact aid to schools.

Impact aid funds have been extremely important to the operation of schools within my congressional district. A very large percentage of land, approximately 50 percent, is used for military and federal installations in the City of North Chicago, for which taxes are not collected. It would seem only fair and just that the Federal Government should contribute to the cost of educating the children of military personnel as a payment in lieu of the taxes which it does not pay.

In addition to the lowered tax base of the community due to this large amount of federal property, the City of North Chicago has one of the lowest per capita income levels in the metropolitan Chicago area. In view of the scarce financial resources available to the community and the considerable reduction in the tax base available to them, federal impact aid funds are extremely important to the elementary and secondary schools of North Chicago, a high percentage of which are minority students coming from disadvantaged homes.

I am pleased to have Dr. Charles Thomas, the Superintendent of North Chicago School District No. 64, to supplement my statement.

Mr. THOMAS. Thank you very much, Congressman McClory.

Mr. Chairman and members of the Appropriations Subcommittee, thank you for the opportunity to make a brief statement in support of impact aid.

Public Law 874, commonly known as impact aid, was enacted in 1950 to provide funds for school districts impacted by military bases. In North Chicago, the school district which I represent, there is the Great Lakes Naval Training Base which encompasses one-half of the school district's land area and which provides the school district with 46 percent of the student body. The law was designed to pay federal funds to impacted school districts equal to the amount of local taxes paid for education.

For the past several years the actual impact aid payments have been significantly less than the impact aid entitlement as determined by the Department of Education. For this year, fiscal year 1982, the actual payment will match the entitlement. But it should be pointed out that the fiscal year 1982 entitlement and payment are not based on the traditional head count, but rather, they are based on 86 percent of the fiscal year 1981 actual payment.

While the cost of education has steadily increased and the percent of military A students has remained between 46 and 47 percent, the percent of impact aid payments as it relates to the total school district budget has noticeably declined. To illustrate this point, in fiscal year 1980 impact aid represented 19 percent of the district's budget. In fiscal year 1981 it represented 17 percent of the district's budget, and in fiscal year 1982 impact aid will represent only 14 percent of the district's total budget.

Thus, it is clear to us in North Chicago that the federal obligation is not being met. This year, due to the lateness of payments and the reduction in the amount, the school district has had to borrow money primarily to support the education of military A students and thereby increasing the local taxes paid by the local citizens. Additionally, both educational personnel and programs have been cut for the 1982-1983 school year. It is becoming increasingly difficult for the North Chicago school district, and others like it, to plan and operate sound educational programs with the declining federal funds to compensate for the lack of tax revenue from federal properties.

The Administration's policy is to maintain a strong military. Reducing impact aid is not consistent with that policy. As superintendent of a school district which is heavily impacted by the military presence and for the good of quality education for the boys and girls of the school district, I strongly urge you to provide funding at the fiscal year 1981 funding level for the Impact Aid Program.

* * * * *

Mr. MCCLORY. I think we have stayed within our five minutes.

I am pleased indeed that my two distinguished colleagues from Illinois, Mr. O'Brien and Mr. Porter, are present for the hearing.

Thank you very much.

Mr. NATCHER. Mr. McClory, it has always been a pleasure to have you appear before our committee.

Mr. MCCLORY. This is the most gentlemanly chairman of any committee of the House, together with the most compassionate ranking member.

Mr. CONTE. We are going to miss you.

Mr. O'BRIEN. If the gentleman will yield, obviously the most perceptive member.

Mr. NATCHER. All down through the years you have worked with us, you have aided us. We appreciate it. A good Member of Congress. We are going to miss you.

Mr. Thomas, you are with good folks this morning. We are glad to have you before our committee.

Mr. MCCLORY. I do not mind looking forward to the retirement. The things that I am a little apprehensive about are the retirement tributes.

Thank you very much, Mr. Chairman.

Mr. Speaker, with regard to TOM RAILSBACK, I first met TOM back in 1966. I was campaigning on behalf of the Republican Party again while living down in Peoria. And we had lost that seat that TOM won back for us in that 1966 race.

I followed his career. And I think that probably the memory that most vividly stands out in all of our minds, when you think of TOM RAILSBACK, is the obvious personal anguish he went through while serving during those dreadful days of the Watergate hearings. It had to be a very difficult time for all Americans, but I think most especially it was for BOB MCCLORY and TOM RAILSBACK, our two colleagues who served on that committee that participated in the momentous decisionmaking of that time, a time of trial, as it was, I think, for each and every Member here who was wrestling with his own conscience.

But you could see it most vividly and I think poignantly and painfully in the expressions and the comments on the part of our two great colleagues whom we shall miss in that capacity, as this body will.

Mr. MICHEL. Mr. Speaker, we were fortunate to have three members of towering strength on the committee. And now we have one sole surviving member on there. The gentleman from Illinois (Mr. HYDE) is just going to have to triple his obligations and responsibilities.

Mr. HYDE. I thank the gentleman.

This is particularly felt by myself, the loss of TOM RAILSBACK and BOB MCCLORY because they were my colleagues and my mentors on the Judiciary Committee.

In thinking of TOM RAILSBACK, he was the closest Member to me of the four who are leaving, he was the kindest to me, and I must say that my joy at his new career is tempered by my sense of personal loss at not having his advice and counsel on a daily basis available to me.

I guess the measure of a successful life is how much you care and what you do about the things you care about. And using this yardstick, one must conclude that TOM RAILSBACK, who is still a very young man, has led a very successful life, because he cared greatly about many, many things. He cared about the law, he cared about justice, and he cared about people who live on the margin of society.

He was not a knee-jerk liberal. He was a very thoughtful moderate, who thought his positions through, who always articulated them well, defended them well, and was influential in making his point of view heard, understood, and often acted upon.

He was interested in making the best that America has to offer available to every citizen, whether it was in the voting rights legislation or other legislation. And may I say parenthetically that the record does not show the enormous Herculean job that TOM RAILSBACK did in trying for many, many long frustrating hours to work out compromises with the civil rights community and with Members on the Judiciary Committee. He did that because he knew the goal was important, making access to the political process available to everybody, regardless of

their race or their color or where they are located.

But if it concerned matters of education, matters of civil rights, matters of employment or housing, TOM RAILSBACK could be counted on to lead the fight, to make these things available to those who are less fortunate than the rest of us.

I can only say that TOM RAILSBACK moves on to another career that sounds and seems to be a very exciting one. And he will exhibit his many talents to his new career as forcefully and with as much enthusiasm as he did to serving in Congress.

□ 2040

I am pleased that we will see him, that he will be in Washington often. I wish him Godspeed in his new and very productive career.

For BOB MCCLORY, I think of BOB MCCLORY again in terms of courage and bravery and of a love of law and a love of justice. He served on the Judiciary Committee during the Watergate years, and I am pleased that I did not. I came afterwards; I came in 1975. It was in 1974 that, with this heartbreaking experience, heartbreaking to Republicans who loved the law and loved the rule of law and who were torn by the accusations and allegations of obstruction of justice that colored the entire Watergate era, BOB MCCLORY had the guts and the courage along with TOM RAILSBACK and along with a few other members on the Republican side, to formulate articles of impeachment, and this was a heart-wrenching act for them to do. When they celebrate the anniversary of Watergate, it is usually the chairman of the Judiciary Committee that is interviewed by the press and they ask, "What do you think after so many years? How do you feel?" And "You were the person and you Democrats preserved the Constitution."

Forgive me, I mean no disrespect to Mr. RODINO or to the Democrats, but the Constitution was preserved, if indeed it was ever threatened, by people like BOB MCCLORY and TOM RAILSBACK, who as Republicans were willing to stand up and put justice ahead of partisanship. This body is the most partisan body I have ever seen in my life. It is difficult to imagine the partisanship. It is part of the air we breathe; but when it came to the Watergate situation, when it came to honor and to justice, BOB MCCLORY, TOM RAILSBACK, and other Members of the Republican side put down the partisanship and, believe me, those hearings reeked of partisanship. Those people were after President Nixon. There is no way he could escape. They were salivating for his scalp. In that atmosphere, to let a sense of justice prevail is a tribute to rare qualities that BOB MCCLORY and TOM RAILSBACK possessed in abundance.

BOB MCCLORY brought dignity to the job of being a Congressman, where so often it is undignified, where we so often play the game of criticizing ourselves and our jobs as politicians, and how we spit that word out.

BOB MCCLORY brought dignity. He brought class to the important post of representing half a million people here in Congress. He loved being a Congressman and he did it very, very well.

I just say in closing about all four of the Illinois Members who have been victimized by artful cartography, as I have been blessed by artful cartography, that the burden of our State is the loss of these irreplaceable men. The glory of our State is that we had them so long.

Mr. MICHEL. Well, the gentleman from Illinois says it so beautifully. I am so happy that he made mention of the tremendous job that both BOB MCCLORY and TOM RAILSBACK did during those very, very trying days of the Watergate proceedings.

I know personally of the times that they had come to me, very distraught over what kind of a decision they had to make consciencewise and in committee on a day-to-day basis, always in that search for truth, what really did happen, how far should we go, what is our obligation here. They surely acquitted themselves well.

I am so happy that the gentleman made the specific reference to it, because they will always be noted for the contribution they made at a very critical time in our history.

I am happy to yield to my dear friend, the gentlewoman from Illinois.

Mrs. MARTIN of Illinois. The two gentlemen that the gentleman in the well and Congressman HYDE talked about are my neighbors. They are both good neighbors, indeed. We have shared, the three of us together, similarities in our districts as we try to serve the people there. Each does it, I think, in his own way.

Congressman MCCLORY is courtly in an age where that great virtue has often been lost.

Congressman HYDE talked about dignity, but there is an additional charm to it. There is both a finesse and in the best sense of the word a sophistication, without losing that basic American ability to be down home. He is able to be at the diplomatic level almost as an ambassador from this parliament to the other parliaments of Europe and, indeed, around the world.

Unlike many Americans, he has command of other languages so he can also speak, but he comes back home and talks not at the people or down to the people, but with the people he has served. He has been as that neighbor always helpful to me, and, indeed, as Congressman CRANE suggested, I took part of a district from him for a while and I think that when they would go in in 1980, they were always disappointed that they could not vote for BOB MCCLORY but took the second best and stayed with a Republican and so helped me win in 1980.

To the south and to the west, Congressman RAILSBACK, whom again I really have not known for a long time, but I did know TOM before I got here, because he called and asked if I could help in a campaign, something I think TOM does. "Can I help? How? What can I do?"

It is done with grace, done as if it is a light thing that he offers. He has done it to everybody in the delegation. TOM has more friends on both sides of the aisle than perhaps any other Member of the House. All of us expect free dinners from him now that he is going to be a lobbyist. He is the one that we will let Common Cause go crazy about. I hope TOM is listening, because as the junior Member of the delegation, I am setting up weekly dinners for the Illinois delegation alone, so you can all really be jealous of this marvelous delegation and we will, of course, stick TOM with the check on regular basis. He will probably even like it a little. He is a friend, a man whose love of country, the family, and the things that make worrying about tomorrow as important as what we do today, that is just a part of his life. He has taken some hardships and some knocks well. His grace in losing matches his ability when he won.

Congressman HYDE has talked about artful cartography, which is reminiscent of the Artful Dodger in Dickens.

He quoted a line from Camelot, but the original Camelot musical was based on a book called the "Once and Future King" by a rather strange and marvelous writer who has since died. It is a tetralogy and at the end of the first book of the tetralogy is perhaps one of the great lines in modern literature that describes what happened to these four people with the remap not of their own making, and that line is short. It says, "In tragedy, innocence is not enough."

Mr. MICHEL. I thank the gentlewoman.

I yield to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, after 32 years as a legislator—20 as a Member of the House of Representatives—ROBERT MCCLORY will soon be returning to private law practice. If he has half the success in his new association as he has had in representing the people of Illinois 13th District, the firm will have a host of satisfied clients.

BOB won his election races handily because he has cared about the people. He has worked tirelessly to solve their problems and to represent them. He has given the same brand of dedication to his service on the Judiciary and

Intelligence Committees, and I know he will put as much zeal and hard work into his new endeavors.

I wish my good friend Godspeed and say in all sincerity that he will be sorely missed.

Mr. Speaker, when my good friend from the Illinois State Legislature, TOM RAILSBACK, was elected to the House of Representatives 16 years ago, this body gained a fair, independent-minded expert in constitutional and criminal law. I regret that we will be losing him when the 97th Congress adjourns.

TOM has always been one who is willing to stand up for the things in which he believes, as his record in Congress clearly shows and as my colleagues have commented in his service on the Judiciary Committee, particularly during the Watergate hearings. He has put his heart and soul into his work on the Judiciary Committee and in serving the people from the 19th District of Illinois, and he has applied his knowledge of our Constitution in the crafting of legislation embodying constitutional principles regardless of their committee origination. For this, we can all thank him.

His departure to the motion picture world is good news, however. Movies will be better than ever.

● Mr. ZABLOCKI. Mr. Speaker, it is a special privilege to join my colleagues in paying tribute to a distinguished senior Member of this body (Mr. MCCLORY of Illinois) on the eve of his retirement.

BOB MCCLORY is much more than the ranking member of the Committee on the Judiciary. His knowledge and influence in a variety of areas has been an important, often behind the scenes, factor in the legislative process. It has been my privilege to serve with him on the Select Committee on Intelligence, where his practical good sense and sound judgement have been highly valued. As a past delegate to the Inter-Parliamentary Union (IPU), he has also brought new perspectives and insights to the foreign policy process and has made an important contribution to House debates on foreign affairs legislation.

In his 20 years of service to this body, BOB MCCLORY has demonstrated those qualities of quiet and effective leadership, which have made an impact on our proceedings quite disproportionate to the public recognition he has received. He is, in fact, a man of intelligence, integrity and experience—whom we will lose with a sense of high appreciation mixed with regret.

I join his many friends, both in this Capital and in the great State of Illinois, in wishing him and his family the rewarding and enriching retirement which he so clearly deserves.●

● Mr. GILMAN. Mr. Speaker, it is a privilege to rise today to honor the distinguished gentleman from Illinois who has served his State and this Nation so well for so long. The land that gave this Nation Abraham Lincoln has given us, through this gentleman, once again distinguished leadership and service.

The loss of TOM RAILSBACK is a big one for the House. I had the privilege of working closely with him in his position as the ranking minority member of the Select Committee on Narcotics. I came to admire his wisdom and effective leadership on this committee, as well as his behind-the-scenes work on important legislation coming before the House. We lose not only a keen legal mind, we lose as well a courageous gentleman, always ready to stand up for principle and the good of the country as a whole. His battle to protect the integrity of the Presidency and to assure that elections reflect the true voice of the people are examples of his perseverance and his dedication to his convictions for what is best for the Nation, regardless of political expediency.

He fought hard to represent all the interests of his district, and they have lost a true champion in the Halls of Congress. We in the Congress have lost a true workhorse.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise to offer special recognition for the service to the Congress of the United States by my colleague and good friend on the Foreign Affairs Committee, PAUL FINDLEY.

I have worked with PAUL on a number of serious issues which have faced our committee, including the historic and significant legislative effort embodied in the Nuclear Nonproliferation Act of 1978. His leadership on that legislation was an important element in securing the overwhelming support of the 95th Congress for that measure.

PAUL's conscientious devotion to duty has led him to fight for the principles in which he believes and to carry the interests of his constituents before this body, even in opposition to his own party's policies when he has believed them to be contrary to the interests of the citizens of his district. His devotion to principle, however, has not meant simply choosing the popular, partisan political choice. He has searched for peace in the Middle East in a very personal and direct manner. He is to be commended for his efforts and for his willingness to undertake such a challenge even at the risk of finding disfavor at home. He won the respect and the admiration of his colleagues on the committee and in this House for his efforts. His absence next year will be a serious loss for all of us who looked to PAUL for his leadership on this and other vital issues.

As he concludes his service to the Congress and to people of his district, I want to join my colleagues in wishing him every success in the future and to assure him that his efforts and achievements in this House will not be forgotten.

Again, to Congressman PAUL FINDLEY, I offer my sincere congratulations for a job well done and my best wishes for the future.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise to pay special tribute to my good friend and colleague on the Committee on Foreign Affairs, the Honorable ED DERWINSKI.

During his years on the Foreign Affairs Committee, ED DERWINSKI has brought his intelligence, his discipline, his sharp mind and his even sharper wit to the demanding issues we have faced. His insight and guidance on foreign policy matters have served administations of both political parties, and he has never shirked his responsibility to enlighten and to educate America's diplomats in residence at the State Department in the necessary skills of their craft.

Aside from the impression ED has made with his wit and his amazing technicolor sports coats, he has gained the respect of his colleagues for his conscientious devotion to the principles in which he believes: Consistency in foreign policy, which protects American interests overseas and our national security interests at home.

Our committee and this House will not be the same without the gentleman from Illinois, our distinguished colleague, ED DERWINSKI. But we can all take heart that he will continue to perform an active role in the administration of our country's foreign policy in his new position at the State Department. You can be sure he will be heard from again. Not everyone will want to hear what he has to say, but he will certainly make his arguments clear and to the point.

Again, I want to recognize the valuable contribution ED DERWINSKI has made in the years he has served in this Congress and to wish him good luck and Godspeed.●

● Mr. LENT. Mr. Speaker, it is an honor and a privilege to join so many Members of the House in this tribute to four of our most distinguished colleagues who are leaving the U.S. House of Representatives at the end of the 97th Congress.

I want to thank our esteemed leader, (Mr. MICHEL), for making possible this special order today.

I think every Member of the House would agree that in the departure of ED DERWINSKI, PAUL FINDLEY, BOB MCCLORY, and TOM RAILSBACK the U.S. Congress and our great Nation suffer a severe loss.

Together, these four members of the delegation from Illinois have served a total of 80 years in the U.S. House of Representatives. It is dismaying to contemplate the accumulated wealth

of wisdom, judgment, experience, and legislating ability which will depart from the House of Representatives when our four colleagues from Illinois leave us.

Their dedicated public service has written an outstanding record of accomplishment and achievement; a record which is of great inspiration to each one of us. Their effective leadership, both in the committees on which they serve, and on the floor of the House has provided invaluable counsel and guidance to the Members of the House, and has resulted in improved public laws for our Nation.

Mr. Speaker, let me add this personal note. In the 12 years I have served the people of the Fourth Congressional District of New York I have had the privilege of enjoying the friendship of these four gentlemen from Illinois. I can testify personally that they each were always willing to take the time to give me the benefit of their knowledge and counsel. Their patience and good humor have been exemplary.

Mr. Speaker, our four colleagues from Illinois will be sorely missed by their friends in this Chamber, they will be sorely missed by the constituents they have served with such tireless devotion, but most of all they will be sorely missed by our Nation, whose best interests they have served so faithfully over the years.

I join with my colleagues in offering our warmest good wishes for the future to ED, PAUL, BOB, and TOM, and to express our hope that even though they are departing from our midst, they will return frequently to continue to give us all the benefit of their friendship, and their experience and knowledge.●

● Mr. SHUMWAY. Mr. Speaker, I deeply appreciate having this opportunity to pay tribute to four great Representatives from Illinois who unfortunately will be leaving this body at the close of the 97th Congress. Each in his own way influenced my own development as a Member of the House of Representatives, and all four were men I was privileged and proud to call my friends.

When I first entered Congress, TOM RAILSBACK made a mighty impression upon me as a very senior Member who treated a new freshman such as I was with great respect. He was never too busy to carry on a conversation, or to share his very worthy experience.

PAUL FINDLEY is a man I shall always admire for being a great scholar, particularly concerning the life and accomplishments of Abraham Lincoln. I have always been impressed and amazed that he found the time to research his indepth biography of Lincoln while carrying the congressional load.

While ED DERWINSKI will be remembered for many very noteworthy accomplishments, I personally shall always treasure his wonderful sense of humor. He could bring a note of badly needed levity to even the most acrimonious debate, and he taught us not to take ourselves too seriously.

I have a profound and deep respect for BOB MCCLORY'S knowledge on judiciary matters, and I have always found myself being guided by his vote on issues originating in the Judiciary Committee. His background and viewpoint concerning law and order have been a source of inspiration.

All four men left a mark on the House of Representatives. They have served their respective constituencies and the entire Nation with honor, and they will be badly missed.●

● Mr. ZABLOCKI. Mr. Speaker, I am pleased to join my colleagues in honoring the congressional service of a distinguished member of the Illinois delegation (Mr. RAILSBACK).

In his 16 years in the House, TOM RAILSBACK has compiled an impressive record of legislative accomplishment. Although best known, perhaps, for his work with the Judiciary Committee, and the prominent role he played in the 1974 impeachment hearings, it is worth noting that he has been active in many different fields of legislative activity: He has served on the Select Committee on Narcotics Abuse and Control and on parliamentary exchange programs with France, Germany, and Japan. As a member of the Republican Task Force on International Economic Policy, he has made a valuable contribution to House debates on foreign policy legislation.

TOM RAILSBACK has had a vitally important interest in—and influence on—the youth of this country, and I believe this aspect of his service deserves special recognition. In 1974, he was the principal architect of the Nation's first comprehensive juvenile justice legislation, which stands as a landmark in its field.

He is obviously a man of many parts, talents, and interests, which I know will serve him well in his future endeavors. I join my colleagues in wishing him all possible success in his forthcoming career, which I hope and trust will include further public service to this Nation.●

● Mr. ANNUNZIO. Mr. Speaker, it is a genuine pleasure to join the distinguished minority leader, Congressman BOB MICHEL, and my colleague, the Honorable JOHN ERLENBORN, in paying tribute to the Honorable ROBERT MCCLORY, who has represented the 13th District of Illinois in the House of Representatives for the past 20 years. His dedication to high standards is an inspiration to his friends and fellow citizens, and his accomplishments as a Member of the U.S. House of Representatives are most commendable.

BOB has devoted his life to public service, and served in the Illinois General Assembly for 2 years before being elected to the Illinois State Senate in 1952, and again in 1956 and 1960. He also has served in the U.S. Marine Corps Reserve, and was elected to Congress in 1962.

During his tenure in the House of Representatives, BOB MCCLORY has distinguished himself while serving as the ranking minority member of the House Judiciary Committee, and as a member of the House Select Committee on Intelligence. He was of invaluable assistance in securing the passage through Congress of the legislation making Columbus Day a national holiday as well as my bill to grant a Federal charter to the Italian American War Veterans of the United States. I am privileged to have BOB as my personal friend, and his actions in these committees reflect a record of excellence and creative accomplishments, and are most worthy of recognition.

BOB MCCLORY is a Congressman of outstanding ability, who has provided exemplary service to his constituents and to our Nation. He is a fine legislator and a human being of great compassion, who will be missed by those of us in the House of Representatives who have enjoyed working with him and who know the pleasure of his company.

I extend to my respected colleague, ROBERT MCCLORY, my regards and best wishes for his continued success in future endeavors as well as a healthy and happy retirement.●

● Mr. GILMAN. Mr. Speaker, although I am saddened to see the departure from Congress of ROBERT MCCLORY, I salute Congressmen MICHEL and ERLENBORN for reserving this time for us. I certainly want to take a few moments to recount for my colleagues some of the achievements of BOB MCCLORY.

Since BOB'S election to the House of Representatives in 1962, he has been a devoted and tireless worker on the Judiciary. He was an active participant in the impeachment hearings of President Richard Nixon, and authored one of the three articles of impeachment reported out by the full committee. So it has only been through his true devotion to the integrity of this Nation, and the application of honest principles that BOB has attained ranking minority member status of the Committee on the Judiciary.

Congressman MCCLORY'S service to the people of the 13th District of Illinois has been devoted and tireless. Certainly, Mr. Speaker, 20 years in this Chamber represents an enormous achievement, not only in the changing nature of this country over the last two decades, but in the changing needs of the many individuals who comprise a congressional district. Yet, through it all, ROBERT MCCLORY has maintained a close relationship with

his constituents, and I am certain that the many bonds of friendship that he has forged over the years will resurface now with expressions of appreciation and good will.

I wish BOB and his wife Doris all the best in the coming months and years, and hope that he will continue to give us the benefit of his wise counsel. Certainly, I remember the time BOB spent in my area at the Minnewaska Mountain region. I hope that he will continue to visit us in the future. And looking toward the future, I would also hope for his participation when the omnibus immigration bill is considered, should it not be dealt with before the end of this Congress. Whether in the aisles of this Chamber or in the Halls of the Capitol, I look forward to working with BOB in the years ahead.●

● Mr. ANNUNZIO. Mr. Speaker, I am honored to join my colleagues from Illinois, the Honorable House Minority Leader ROBERT H. MICHEL, and the Honorable JOHN N. ERLENBORN, in tribute to my good friend, the Honorable EDWARD J. DERWINSKI, who is leaving the House of Representatives at the end of the session after serving 24 years.

ED DERWINSKI was elected to the 86th Congress in 1958 and has given dedicated and devoted service to his constituents of the Fourth District of Illinois. He has compiled a splendid record of excellence and outstanding ability as the ranking minority member of the House Post Office and Civil Service Committee, and his diligent efforts as one of the ranking minority members of the House Foreign Affairs Committee have been both fruitful and beneficial to the citizens of this Nation.

Few men have given more of themselves to good government, or have a more compassionate understanding of human problems than has ED DERWINSKI, who served in the infantry in the Pacific theater of operations during World War II, and also served in the Illinois General Assembly as a State representative in 1957 and 1958. He was a delegate to the 26th annual meeting of the United Nations General Assembly in 1971, was Chairman of the U.S. Delegation to the Interparliamentary Union in 1971–72, and was treasurer of the U.S. delegation and member of the Executive Committee of the Interparliamentary Union.

ED has been in the forefront of efforts to implement meaningful solutions and effective action on behalf of individual citizens. He is a fine legislator and a distinguished leader, and his companionship and good humor will be missed here in the House of Representatives.

I extend to EDWARD J. DERWINSKI, my best wishes for continued success in devotion to the highest principles as he assumes the post of Counselor of the Department of State.●

● Mr. ANNUNZIO. Mr. Speaker, I rise to join my colleagues, the distinguished minority leader, Congressman BOB MICHEL, and the Honorable JOHN ERLENBORN, in paying tribute to the Honorable PAUL FINDLEY, who has been a dedicated Member of the House of Representatives for the last 22 years. His tireless efforts on behalf of his constituents in the 20th District of Illinois, and on behalf of the citizens of the United States, are both respected and admired, and are most worthy of recognition.

Before coming to the Congress, PAUL ran a printing and publishing business and was the publisher of a weekly newspaper. He is a World War II veteran, and was first elected to the House of Representatives in 1960.

PAUL FINDLEY has served in the Congress with diligence and distinction as a member of the House Foreign Affairs Committee and as our Illinois member of the House Agriculture Committee. His interests in international relations, and in securing freedom and peace, are reflected in his role as chairman of the House Republican Committee on Western Alliances from 1965 to 1968, and as chairman of the House Republican Factfinding Mission to Paris in 1965.

PAUL has attended many sessions of the annual NATO Parliamentarians Conference as a delegate, and also as a delegate at the North Atlantic Assembly, where he compiled splendid records of achievement.

PAUL is a fine legislator, a dedicated and devoted American, and a Congressman of great ability and skill. He will be missed by all of us in the Congress.

I extend to PAUL FINDLEY my best wishes for success in all his future endeavors as he continues his life of service.●

● Mr. DERWINSKI. Mr. Speaker, it is an honor for me to join with the other members of the Illinois delegation in eulogizing our four distinguished colleagues who will retire from the Congress at the close of this session. Each in his own way has very effectively contributed to the legislative process which, in turn, has lead to the progress and improvement of our country. Our work together in Illinois State matters has always risen above partisanship. These colleagues, each in their own capacity, has made a positive impact on programs which have contributed to the well-being and the progress of the State and Nation. My four colleagues are dedicated public servants in the best sense of the word.

I served with JOHN FARY in the Illinois State House before we both came to the Congress. As a matter of fact, JOHN was a member of the Illinois General Assembly for 22 years before coming to Washington. He was recognized as an outstanding legislator in State government and was always a constructive and truly conscientious public official. He followed his predecessor in the Congress, John Kluczynski in serving on the Public Works Committee. The revitalization of Midway Airport is largely due to JOHN FARY's hard work. JOHN has served as one of the effective and truly knowledgeable Members on issues concerning highway transportation and air safety, and as such, he is recognized as a conscientious and productive member of the Public Works Committee.

PAUL FINDLEY has been a dynamic leader in the Congress for the past 22 years, having served on two major committees—Foreign Affairs and Agriculture. In my opinion and as I am sure the Members will well agree, he is an outstanding spokesman on issues in the area of agriculture. His hard work and special interest in agricultural matters has made him a strong leader for improving the quality of life for the American farmer. PAUL is a sound and responsible Member who has made a great impact on effective legislation. He has been especially interested in the Food for Peace and humanitarian and refugee programs. He is a dear friend with whom I have worked closely on issues that have come before the Foreign Affairs Committee. PAUL is a serious, constructive, and thoughtful individual who executed his duties with great distinction.

BOB MCCLORY has an extra dimension which few Members realize. We all know of his very important and effective service as ranking member of the House Judiciary Committee, but not many are aware of the long years of extra service he has provided to the U.S. delegation of the Interparliamentary Union. The Interparliamentary Union is the oldest and most broadly representative interparliamentary association in the world. BOB has done an excellent job in contributing to the IPU's Committee on Education, Science, Culture and Environment. He has provided the research in the areas of health, communication, education, and humanitarian efforts. During his entire service in the Congress, BOB MCCLORY has represented the Congress and the United States at the annual conferences of the IPU, and over these 20 years, he has gained the respect of parliamentarians from around the world for his spirited participation in promoting international peace and cooperation at the IPU meetings. BOB is fluent in the French language which is an added extra in promoting personal contacts between Members of many Parliaments. BOB's effectiveness in his work on the House Judiciary Committee will long be remembered, as well as his great contribution to our international position.

TOM RAILSBACK has distinguished himself as a man of integrity and abili-

ty in his work on the House Judiciary Committee. TOM will be leaving the Congress to assume his duties at the Motion Picture Association of America, where he will continue to pursue his work in the area of copyright protection. TOM is recognized as an energetic legislator who has compiled an enviable record of achievement, and who possesses one of the most outstanding legal minds in Congress. TOM also served two terms in the Illinois General Assembly before his election to the Congress in 1966. I have found TOM to be a steadfast and effective Member who deserves a sincere word of gratitude from those who have benefited from his outstanding record of service.

Each of these distinguished colleagues has made a great mark in the Congress. I want to heartily congratulate all those retiring Members of the Illinois delegation for their handling of the responsibilities of their congressional assignments with intelligence and insight. The State of Illinois and the Nation have lost the services of these respected and dedicated public servants, but I wish to add my sincerest wishes to them and the members of their families for long and happy years in retirement. They will be missed, but their deeds and accomplishments shall be testimony to their service. The State of Illinois and our country are better for the service of these four able legislators.●

● Mr. BROOMFIELD. Mr. Speaker, it has been my pleasure to serve with PAUL FINDLEY in the House of Representatives since 1961. As PAUL prepares to leave this body at the conclusion of the 97th Congress, it is appropriate that we pay tribute to this conscientious legislator who has served his constituents and his Nation with dedication and vigor.

As a member of the House Foreign Affairs Committee, PAUL FINDLEY has taken a special interest in legislation dealing with famine prevention, world hunger, and title XII of the Foreign Assistance Act. These are programs that are now in place largely because of PAUL'S foresight and commitment to legislation that will help our foreign assistance programs serve the basic needs of the poor. He has sought, at the same time, through his legislative work and overseas missions, to promote foreign markets for U.S. agricultural commodities.

One of the hardest working Members of the House, PAUL authored seminal legislation to stem the dangerous spread of nuclear weapons. His deep concern for U.S. national security also stimulated his active interest in NATO. As a participant in the meetings of the North Atlantic Assembly, the gentleman from Illinois has sought to promote Atlantic solidarity and cohesion. PAUL'S uppermost goal throughout his years in the House has been to keep the alliance vital and invigorated.

It is my hope that the administration will find a place to utilize PAUL'S many talents and expertise in a manner that will permit him to continue serving the American people.

To PAUL and his lovely wife Lucille, I extend best wishes for success and happiness in whatever new challenges they undertake.●

● Mr. GILMAN. Mr. Speaker, I want to commend the Republican leader and Congressman ERLENBORN for ordering today's special order for some of our departing colleagues. Certainly, no finer Member can be found to pay tribute to than ED DERWINSKI of Illinois.

ED DERWINSKI was elected to Congress in 1958, and at the age of 32, must have been one of the younger members. He worked tirelessly at his committee assignments, Foreign Affairs and Post Office and Civil Service, and I count myself fortunate in having been able to serve with him on both of these committees. Over the years, ED has devoted himself totally to the defense and security of this Nation, and has been a valuable asset in the finest congressional bipartisan tradition. It can be honestly said that although ED may not have agreed with a particular piece of legislation that if it became law he worked to see its effective implementation.

As the second ranking member of the Foreign Affairs Committee, ED DERWINSKI has spent countless hours in the cause of freedom, both here and abroad. He has been a leader in the Captive Nations movement, a seemingly unrewarding task that continues on due to the intransigence of the Soviet Union. But ED has rewarded all of us by his presence and hard work on this committee, and we will sorely miss his wise and generous counsel. We can only hope that in future years we will be able to benefit from his vast experience when hopefully ED will serve as counselor to the Secretary of State.

As the ranking minority member of the Post Office and Civil Service Committee on which I serve, ED has tirelessly worked on behalf of the Nation's civil service employees. The Federal workers of this Nation have lost a true champion.

I thank ED for all the valuable input and assistance he has given me personally over the years, and I wish him and his lovely wife, Partricia, and their children, Maureen and Michael, only the best in the years ahead.●

● Mr. CARMAN. Mr. Speaker, it is my pleasure to join with my fellow Members of the U.S. House of Representatives to commend Illinois Members ED DERWINSKI, PAUL FINDLEY, BOB MCCLORY, and TOM RAILSBACK for their productive years of service in the U.S. Congress.

These men have accomplished so much that it is difficult to single out any one of their accomplishments over the others. However, I will especially note: Mr. MCCLORY'S work on the omnibus crime bill; Mr. FINDLEY'S efforts on the foreign aid program legislation; Mr. DERWINSKI'S guidance in developing the Foreign Service Act; and Mr. RAILSBACK'S efforts on the Juvenile Justice Act.

Their devotion as public servants will long be remembered by Illinois and the country.●

● Mr. CAMPBELL. Mr. Speaker, I am pleased with the opportunity to honor our good friend and distinguished colleague, TOM RAILSBACK. During his tenure in Congress, TOM has established himself as a leader and expert on many important issues facing our Nation. He is respected not only for his expertise, but for his hard work, independence, and integrity.

TOM RAILSBACK has played a major role in many important decisions since he was first elected to Congress in 1966. He has witnessed some turbulent years in our Nation's history and has assisted our country in weathering many crises. I am sure that the people of Illinois 19th Congressional District are appreciative and proud of the excellent representation they have received over the last 16 years.

I consider myself fortunate to have had the opportunity to serve with TOM RAILSBACK. His advice and guidance on many issues has proven to be invaluable. I especially enjoyed the opportunity to work closely with him during consideration of the Voting Rights Act.

Indeed, TOM will be missed by all of us who have been privileged to serve with him. He has left a lasting mark on this House and I am sure that he will be just as successful in his future endeavors.●

● Mr. RAILSBACK. Mr. Speaker, I would like to pay tribute to ED DERWINSKI, a distinguished Member of this body who is leaving after over 20 years of service.

No one has a finer wit than ED, and I feel that his ability to poke fun at himself, as well as everyone else, has greatly contributed to the more amicable proceedings of Congress.

But while ED has a wonderful sense of humor he is also a very effective legislator. While ED is generally regarded as a fiscal conservative in the area of foreign affairs he has demonstrated vision and foresight. He recognizes that our country has a responsibility toward the less fortunate in the undeveloped and developing countries, a position that he arrived at during his service as a member of the Foreign Affairs Committee. ED has a conciliatory attitude in dealing with foreign affairs which many of us respect, and we have followed his lead. ED has taken upon

himself the responsibility for making sure that American foreign policy actually works.

He has also been a leader as the ranking minority member of the Post Office and Civil Service Committee. In 1970 he helped manage a bill to create the U.S. Postal Service as a semiprivate corporation, removed from politics, and in 1978 he assisted in working out a compromise version of the civil service reform bill which makes civil servants more responsible to elected officials and to the public.

I am sorry to see ED leave Congress for I know that both his leadership and humor will be surely missed.●

● Mr. ANNUNZIO. Mr. Speaker, I rise today with my colleagues, the distinguished House Minority Leader ROBERT MICHEL, and Hon. JOHN ERLENBORN, to pay tribute to our Illinois colleague, Hon. TOM RAILSBACK, who is retiring from Congress at the end of this session.

TOM RAILSBACK's 14 years of service in the House and his diligent efforts as one of the ranking minority members on the House Judiciary Committee have been most beneficial to the citizens of Illinois and the United States. His outstanding dedication to high standards is an inspiration to his friends and fellow citizens and his record of excellence and creative accomplishments is most commendable.

The residents of the 19th Congressional District of Illinois can be proud of TOM's splendid record in Congress, and I can testify that he gave to them the best of his considerable talents as their Congressman while serving as the ranking member of the Judiciary Committee's Subcommittee on Courts, Civil Liberties, and the Administration of Justice, as a member of the House Select Committee on Narcotics Abuse and Control, and as a member of the Advisory Group on Impeachment in the 93d Congress.

TOM RAILSBACK served in the U.S. Army from 1957–59, and was elected to the Illinois State Legislature in 1962 where he served for 4 years as a State representative. He has also been a representative on the United States-French-German parliamentary exchange program, and as a member of the United States-Japan parliamentary exchange program.

TOM is a fine legislator of courage, integrity, and commonsense, and he will be missed here in the House of Representatives.

I extend to TOM RAILSBACK my best wishes for continued success in his life of service to his community and to his country.●

● Mr. ZABLOCKI. Mr. Speaker, an axiom we all seem to know but too seldom understand, says that a man's good work lives after him. Clearly, that is the case of my good friend and colleague to whom we offer special tribute here today, Representative PAUL FINDLEY of Illinois.

With the close of this second session of the 97th Congress, PAUL's service as a Member of Congress will end. What will not cease, however, is the lasting effect of his dedicated commitment to the Nation and the world.

Over the many years of our joint service on the House Foreign Affairs Committee I have worked with him closely and witnessed his ability to make unique and lasting contributions to legislation involving the important issues of the day.

One of the most significant of those contributions by PAUL FINDLEY was to the war powers resolution, a milestone of legislative accomplishment. Enacted over a Presidential veto some 9 years ago, it still ranks as one of the most significant achievements of Congress. Deeply involved in that effort—consistent, tireless, and astutely determined—was PAUL FINDLEY.

For his role in war powers and many other difficult foreign policy issues we on the Foreign Affairs Committee will always remember this man from Illinois who like Abraham Lincoln before him represented his district with courage and distinction. We will remember him, too, in the words of author Carl Schurz who once described Abraham Lincoln: "* * * he is a man of profound feeling, correct and firm principles and incorruptible honesty. His motives are unquestionable, and he possesses to a remarkable degree the characteristic God-given trait of this people, sound common sense."

To PAUL FINDLEY go my best wishes for his continued success in serving our Nation.●

● Mr. RAILSBACK. Mr. Speaker, the residents of the 13th District of Illinois have had the good fortune to be served for 20 years by a man of uncommon integrity—Congressman ROBERT MCCLORY. BOB MCCLORY was elected to Congress in 1962, and began to distinguish himself as a thoughtful, influential member of the House Judiciary Committee. Since 1977, he has been the ranking Republican on that committee. This year, in a display of his high regard for a colleague, JOHN PORTER, Congressman MCCLORY decided to retire. His retirement will leave a void in Congress and on the Judiciary Committee.

I have been lucky to serve with BOB MCCLORY on the Judiciary Committee. As a member of the committee during the impeachment proceedings against former President Richard Nixon, I came to admire BOB MCCLORY for his courageous stands and high level of integrity. He has served as a model for numbers of incoming Judiciary Committee members.

BOB MCCLORY has been a friend. When I suffered my throat injury while playing paddleball, no one showed more concern than BOB MCCLORY. I will never forget that.

He has had a distinguished career—as a lawyer, as a member of the Illinois House and Illinois Senate, and as an influential Member of Congress for 20 years. The State of Illinois should be proud of his service.●

● Mr. BOWEN. Mr. Speaker, while I regret that one reason for the special order today is the departure of the Member from the Fourth Congressional District of Illinois, I welcome the opportunity to pay tribute to my good friend and colleague, EDWARD J. DERWINSKI.

My association with ED has been on both the House Foreign Affairs Committee and the Interparliamentary Union delegation, and it is an experience which has been of great value to me. In my 10 years in the Congress I have come to regard ED DERWINSKI as one of the movers and shakers here—one of the real achievers in this body. He is a statesman and a credit to Illinois and to the Congress.

For 23 years ED DERWINSKI has represented the United States with distinction at IPU conferences. In a forum of parliamentarians from more than 100 countries of the world he was a leader and a man who commanded the respect of people of all political persuasions. He has been a member of the Committee on Foreign Affairs for 19 years and has made my 4-year service on that committee a far more valuable experience because of his wit, wisdom, and insight.

While the loss will be ours in the Congress at the departure of ED DERWINSKI, the gain will be that of the executive branch. I want to commend the President and the Secretary of State for selecting this man to be Counselor of the Department of State.

We all look forward to working with him in his important new capacity as he continues a distinguished career of public service to our Nation.●

● Mr. RAILSBACK. Mr. Speaker, Congressman PAUL FINDLEY has served in Congress for 22 years as the representative of a diverse, historic area of Illinois. It combines an important agricultural sector of our State and the seat of Illinois State government, Springfield. It is also literally the land of Lincoln, for this is the district Abraham Lincoln represented in Congress from 1847 to 1849. I think it is fitting that PAUL FINDLEY has represented this area. He has been an important spokesman for agriculture, serving farmers in his district well. He has also brought to Congress the spirit of Abraham Lincoln, for PAUL FINDLEY is a major Lincoln scholar.

He has long been a member of the House Agriculture Committee and he is a person others look to for his opinions on agricultural issues, and I have long valued his advice. I believe his

has been an outstanding voice in Congress for the betterment of farmers and the entire rural community. He also has served on the Foreign Affairs Committee, where he has made many contributions and shown tremendous courage.

I believe the 20th District of Illinois will miss the representation of PAUL FINDLEY in Congress. He has been an important spokesman for the people in the agricultural area surrounding his hometown, Pittsfield, and the district's small towns and cities. He deserves thanks for his 22 years of service.●

● Mr. DANIEL B. CRANE. Mr. Speaker, it is always a sad occasion to bid farewell to friends. But it is amplified when your friends have been trusted colleagues with whom you have worked side by side for years.

With the convening of the 98th Congress, we will welcome many new faces. Our newcomers, however, face a strong challenge in the legacy of achievement left by those whom we honor today.

The people of Illinois and the Nation have been extraordinarily well served by Representatives EDWARD DERWINSKI, PAUL FINDLEY, ROBERT MCCLORY, TOM RAILSBACK, and JOHN FARY. Our State has lost 90 years of experience and seniority in the House of Representatives by their retirement.

However, as much as we will miss these men, today is not a day of mourning. The new opportunities and challenges they face, and the time they will have to spend with their families, make us envious indeed.

I know I speak for every Member of this House in wishing them Godspeed.●

● Mr. MADIGAN. Mr. Speaker, I can cheerfully tell this House about my good friend, PAUL FINDLEY, the promoter, or about my good friend, PAUL FINDLEY, the historian.

The promoter has always been one of the most active Members of the House in encouraging development of foreign markets for American agriculture. I can recall spending 3 weeks with Mr. FINDLEY in the People's Republic of China in the spring of 1978, as part of the first agricultural trade mission seeking to open up that broad market for American farmers.

Years before that, he undertook his first agricultural trade mission to the Soviet Union, at a time when few thought the Soviets would ever become steady customers of the American farmer.

Now those two countries buy billions of dollars' worth of American farm products each year—partly because of PAUL FINDLEY'S vision, his promotion and his constant support in the Agriculture Committee and the Foreign Relations Committee.

PAUL FINDLEY, the historian, has written a fine study of the 2 years that Abraham Lincoln spent in this body during the Mexican War. In it, he has come to the conclusion that the divisive issues of the time forced Lincoln to grow substantially and that these 2 years in the House really started Lincoln on the road to the historic Presidency that began 14 years later.

The Findley biography is significant because it is done with the informed intuition that only a Congressman can bring to another Congressman's career. It has forced historians to reexamine the traditional beliefs about the importance of Lincoln's term as a Member of this body.

Mr. Speaker, all of his colleagues from Illinois will miss the contributions of PAUL FINDLEY, the promoter of trade; PAUL FINDLEY, the scholar; and PAUL FINDLEY, the friend.●

● Mr. GILMAN. Mr. Speaker, PAUL FINDLEY has demonstrated strong leadership in his commitment to ending world hunger during his years in this House. In 1975, Congressman FINDLEY amended the Foreign Assistance Act to add title XII, "Famine Prevention and Freedom from Hunger." This important new title created a program to strengthen the capacities of U.S. land-grant universities in agricultural development and assistance. The expertise of these U.S. land-grant universities would then be used to help establish agricultural extension services in developing nations to teach the small farmer improved farming methods and technology. Title XII programs have been established in scores of countries since 1975 and have contributed greatly to the ability of the people of the developing world to feed themselves. Mr. FINDLEY has personally traveled to some of these countries to encourage the faster and more effective implementation of title XII programs. He traveled to Ecuador earlier this year, for example, when the Agency for International Development signed a long-term agreement with Ecuador for a title XII program.

Mr. FINDLEY has been a long and active supporter of Public Law 480, title I and title II programs to provide U.S. agricultural commodities and foodstuffs to the malnourished and starving around the globe. Over the years, he has offered many amendments to improve these programs. Representative FINDLEY has worked closely with me on H.R. 4588, the Hunger Prevention and African Food Security Act of 1982, and in my efforts to offer major sections of this bill as amendments to the foreign assistance legislation of 1982. I will always be grateful for his assistance and hard work on this bill and on House Resolution 424, a bill I introduced to establish a Select Committee on Hunger. Mr. FINDLEY'S amendment to direct AID to focus on postharvest food storage, the lack of which has been a major source of food losses in the developing world, and to target additional Public Law 480 title I funds to development projects in U.S. aid projects was accepted by the Committee on Foreign Affairs and is a part of the 1982 foreign aid bill. For this work and for his other contributions to reducing global hunger, Representative FINDLEY received Bread for the World's Distinguished Service Award in 1982. He has made, and I am sure will continue to make, a crucial difference in the battle against hunger throughout the world.●

● Mr. CAMPBELL. Mr. Speaker, I am pleased today to be called upon to take part in this tribute to our distinguished colleague, PAUL FINDLEY. His 22 years of service to the Nation and the people of the 20th District of Illinois have been filled with many personal achievements.

As a member of the Agriculture and Foreign Affairs Committees, PAUL FINDLEY is noted for his hard work, insight and expertise on many issues. Although he has made many difficult decisions during his tenure in Congress, he has always stood firm on his beliefs and principles.

I am confident that PAUL FINDLEY will continue to be successful in the future, as he has in the past. Indeed, he will be missed in this body.●

● Mr. BROOMFIELD. Mr. Speaker, I want to join with the Illinois delegation and his many friends in Congress in expressing my regret at the departure of ED DERWINSKI as a Member of Congress.

As the ranking member of the House Foreign Affairs Committee, I know what a unique contribution ED has made as a member of our committee in working for a bipartisan foreign policy.

He has distinguished himself as an effective spokesman for our country at interparliamentary meetings around the world.

As the ranking member for many years on the Post Office and Civil Service Committee, ED has provided strong leadership and made many valuable contributions in this important area.

It is my understanding that the administration will utilize ED's talents in the State Department where his expertise will be a valuable asset to our country.

I extend best wishes to ED and his family in his new assignment.●

● Mr. CAMPBELL. Mr. Speaker, I am pleased to have this opportunity to talk about my friend, the Honorable EDWARD J. DERWINSKI of Illinois. During our tenure together in Congress, he has proved an able and valued colleague.

Until the age of 30, ED had never considered a political career, being content to serve as president of the family savings and loan. When the op-

portunity to run for the Illinois House presented itself, he ran a vigorous campaign without the aid of local party leaders who refused to endorse him, believing his background made him an unlikely primary winner. He won in an upset and discovered that politics was in his blood. Two years later ED was chosen to replace Congressman William McVey who had died in office and his conservatism and involvement with ethnic affairs made him a familiar and popular figure in the district.

A proud Polish-American, he also took an interest in national ethnic issues. In 1961 he served as chairman of the Republican Big City Committee, Ethnic Division and later became chairman of the Nationalities Division of the Republican National Committee.

ED DERWINSKI's finest achievements are in the area of foreign affairs. As a central figure on the Foreign Affairs Committee, he probably kept alive the congressional tradition of bipartisan foreign policy more than anyone else in the House. While working closely with the Democrat chairman, he was able to forge fair and workable legislation without compromising his own attitudes toward left-wing governments.

His achievements, however, are not limited solely to foreign affairs. As ranking minority member of the Post Office and Civil Service Committee, ED worked with the Democrats to fashion a compromise version of the civil service reform bill. Without his work, this bill, which for the first time moves in the direction of making civil servants more responsible to the elected officials and the public they are supposed to serve, would never have received enough votes to pass.

ED DERWINSKI will be sorely missed by all of us. His witty debating style and keen instinct for the tactics of the House floor have earned him a reputation as one of the shrewdest of the Republicans. In sum, both his career and the man himself are best described by a phrase he often used himself. He urged his colleagues to be "responsible and international-minded." He set an outstanding example for us all.●

● Mr. MCCLORY. Mr. Speaker, as one who is also leaving the Congress at the end of this session, I rise to pay tribute to my fellow retiree from Illinois, Congressman TOM RAILSBACK.

TOM RAILSBACK is a very special colleague whose place beside me on the House Judiciary Committee attests to his long tenure here in this body and his devotion to the administration of justice with which the House Judiciary Committee is primarily concerned. TOM RAILSBACK has brought to the committee and to the Congress a long experience in the practice of law and in the affairs of government as a former member of the Illinois General Assembly.

TOM's expertise in recent years has centered on the subject of our Federal and State courts systems and, more particularly, on the critical subject of corrections. The increase of crime in our Nation is closely associated with our inadequate efforts to rehabilitate or reform those who commit criminal offenses.

TOM has recognized the close relationship which the trafficking of drugs and drug addiction have with the high incidence of crime. As ranking member on the Select Committee on Narcotics, TOM RAILSBACK contributed substantially to the legislative efforts to control trafficking in narcotics and other dangerous drugs and in improving the criminal justice system which deals with drug related as well as all other criminal offenders.

TOM RAILSBACK's interests ranged broadly to cover the whole spectrum of subjects with which the Judiciary Committee deals. TOM is a recognized expert on copyright and trademark law.

TOM also has assumed a position of leadership in dealing with these subjects as they are affected by the rapid expansion in communications, including primarily the impact of cable television and its transmission of copyrighted materials.

TOM's interest has been directed as well toward the field of antitrust law where he has taken a position consistent with the promotion of competition in our private enterprise system, while protecting the best interests of the American consumer.

Mr. Speaker, TOM RAILSBACK's career in this House comes to an abrupt close with the result that the State of Illinois and the Nation will be the losers. I should add that TOM's failure to win renomination and re-election are the result primarily of a highly partisan and grossly unfair redistricting plan which has been perpetrated on the citizens of Illinois in a manner quite inconsistent with the principles inherent in the Baker against Carr case. Indeed, all four Republican Members of the U.S. House from the State of Illinois may credit their retirement from this body to the congressional redistricting plan developed by a partisan sponsor, the Democratic leader of the Illinois House of Representatives, and promoted from the bench by an activist Democrat Federal judge. I make this statement with regret that such an event has transpired, but with full recognition of the accuracy of this observation.

Mr. Speaker, I join TOM RAILSBACK's other colleagues in wishing him every success in his return to private life and particularly as he assumes a prominent position as executive vice president of the Motion Picture Association, the office which he will assume following the termination of his service in the 97th Congress.●

● Mr. ZABLOCKI. Mr. Speaker, it is both with a sense of appreciation and deep personal regret that I join my colleagues today in saying farewell to a truly outstanding Member of this body, the gentleman from Illinois (Mr. DERWINSKI). During his 20 years of distinguished and dedicated service to the Committee on Foreign Affairs, he has compiled an enviable record of legislative accomplishment and has left a strong and lasting imprint on the day-to-day process of foreign policy debate, both in the committee and on the House floor where, in my judgment, he has few peers.

In the months and years ahead, we will sorely miss ED DERWINSKI' sound judgment, his rare political acumen, his incisive wit, his unique sense of humor (which has elevated the use of sarcasm to a new art form) but above all, we will miss the high sense of responsibility which he has brought to the foreign affairs process over the years in defending and promoting the best interests of this Nation.

It is, in fact, heartening to know that our loss will be the State Department's gain and that his formidable talents and sage advice will be available to the Secretary of State during this critical period in international affairs. To Secretary Shultz and his key foreign policy advisers I would merely add that the "counsel" of this "Counselor" is worth heeding at all times.

During his long and honorable tenure on the Foreign Affairs Committee, ED DERWINSKI has served on numerous subcommittees—most recently as the ranking minority member of the Subcommittee on International Operations, where he has developed a keen awareness and expertise in the worldwide operations of the Department of State and the U.S. Information Agency (now renamed USIA, instead of ICA, as a result of his initiative). He has been a staunch defender of U.S. national security interests and a consistent and effective supporter of the broadcasting mission of Radio Free Europe and Radio Liberty. In promoting these important U.S. Government interests, as I have stated on numerous occasions, we may sit on opposite sides of the aisle, but we are by no means "Poles apart."

Finally, I would particularly like to commend the gentleman from Illinois for the important contribution he has made, over the years, to the work of the Inter-parliamentary Union. Not only has the gentleman served as an officer of that organization, but he has consistently and vigorously defended U.S. and Western positions in that sometimes "lonely forum"—often against great odds and in circumstances where the U.S. delegation has been notably at a disadvantage.

He has also served, with great distinction, as a delegate to the United

Nations General Assembly. In all such undertakings, he has advocated full and active participation by U.S. representatives, rather than withdrawal or boycott, as the most effective means of defending the U.S. interest—and I happen to share that general philosophy.

In short, life in this body will not be the same without the gentleman from Illinois and we will come to recognize, in due course, that we have lost something—and someone—of great and enduring value.

Therefore, I welcome this opportunity to express my personal appreciation for ED DERWINSKI's past service to the Committee on Foreign Affairs, the House of Representatives and the Nation—and also to wish him every possible success in his new and challenging assignment.

And I would like to emphasize that he takes with him to the other end of town our highest regard and our fullest and abiding confidence.●

● Mr. CAMPBELL. Mr. Speaker, it is with great honor that I join my colleagues today in paying tribute to the distinguished BOB MCCLORY. His absence from this body will surely be felt in the days ahead.

Since his election to the House in 1962, BOB MCCLORY has served with a vigor which is stimulating to those of us who have labored beside him. His work on the House Judiciary Committee has been characterized by a diligence and a thirst for the truth which mark the statesmen of history. As a lawmaker, BOB has always endeavored to know the complete story, rather than depend upon partisan feelings. In doing so, he has served the 13th District of Illinois, and our Nation, well. Indeed, his 20 years of service have been years of hard work and difficult decisions.

I have admired BOB MCCLORY's inspiration and his wisdom, which come only with the experience of service. So, it is with a feeling of personal loss that I bid farewell to my friend. I thank him for his years in this body, and wish him well in his future endeavors.●

● Mrs. HOLT. Mr. Speaker, when the new Congress convenes in January, we will be lacking the experience and skill of four Members from Illinois who made great contributions to our country during many years of service in this House.

I will miss the leadership provided by ED DERWINSKI, PAUL FINDLEY, BOB MCCLORY, and TOM RAILSBACK. The knowledge and talents of these four senior Members are considerable assets, and their absence will be a real loss to the work of the House.

In the Foreign Affairs Committee, ED DERWINSKI won universal respect as a spokesman for the cause of freedom, and he also gave us very sound leadership as the ranking minority member of the Post Office and Civil Service Committee.

PAUL FINDLEY joined ED DERWINSKI in serving with great distinction in the Foreign Affairs Committee, and also served in the Agriculture Committee.

In the Judiciary Committee, where BOB MCCLORY is the ranking minority member, he has consistently shown a commitment to high principle, and we have admired his objective and independent judgment. He has also served his Nation well as a member of the Select Committee on Intelligence.

The Judiciary Committee will also be losing the dedicated service of TOM RAILSBACK, and the Select Committee on Narcotics Abuse and Control will miss his leadership as its ranking minority member.

Mr. Speaker, the State of Illinois has contributed splendid public servants to our country through much of our Nation's history. The four men who are leaving us after this session join that distinguished list.●

● Mr. COUGHLIN. Mr. Speaker, I join my distinguished Republican leader and the Honorable JOHN ERLENBORN today in paying tribute to four outstanding Members of the Illinois delegation, who, unfortunately, will not be returning to the 98th Congress. These Illinoisans, ED DERWINSKI, PAUL FINDLEY, BOB MCCLORY, and TOM RAILSBACK, have given tirelessly to their constituents in particular and the Nation in general. I know for a fact of the countless hours they have each spent in representing their districts in the Congress to the best of their abilities.

Out of curiosity, I checked the lengths of service for each of these Members in the Congress. Altogether, these gentlemen have devoted 82 years of public service in the House of Representatives—almost a century of dedication to the Congress. In fact, the Members' congressional service averages out to 20 years each. Surely, it will be difficult to find another State in the Union which has sent such qualified men to represent their concerns in Washington nor a State which for years repeatedly endorsed their continued service.

I also consider myself lucky because I have had the privilege of working with each of these men. For years, I served on the House Judiciary Committee with BOB MCCLORY and TOM RAILSBACK, and believe that I was privileged to witness firsthand their knowledge of the judicial process and our Government's Constitution. Strong advocates of justice and equal rights for all, BOB and TOM were valuable allies for the cause of civil rights in the United States.

Although I did not serve on committees with either ED or PAUL, I have benefitted immeasurably from their expertise in foreign affairs, agriculture, and civil service. They have indeed left their marks on the statutes governing our country and citizens will remember their valuable contributions for the years to come.

When the 98th Congress convenes, it will be without the services of four Members from a single State who have contributed so much to their constituents and to all the people of this Nation. Their presence will be missed.●

● Mr. MCCLORY. Mr. Speaker, it is the with a sense of genuine sadness that I rise to pay tribute to my Illinois colleague, PAUL FINDLEY, who will terminate his congressional service at the end of the 97th Congress. Congressman FINDLEY's service here has extended over 22 years during which time he rose to positions of seniority on the House Agriculture and House Foreign Affairs Committees.

I have been particularly impressed by Congressman FINDLEY's understanding of the problems of American agriculture. He has sought to maintain a high level of independence for the American farmer and to liberate rural America from the schackles of bureaucratic regulations and controls. In this respect, I have consistently followed PAUL FINDLEY's lead. In so doing, I have witnessed farmers in my congressional district improve their economic position while at the same time they have increased their production and have helped bring reasonable prices to the American consumer.

Mr. Speaker, I recognize PAUL FINDLEY as a well-informed, highly intelligent, and most eloquent Member of this body. His service is deserving of appreciation by all Americans and his experience and expertise should be put to the maximum as he departs from this Chamber.●

Mr. MICHEL. Mr. Speaker, in wrapping up this special order in behalf of our four colleagues who will not be serving in the next Congress, I just want to say again how much in seniority we are losing in our Illinois delegation, a total of 82 years, better than 20 years per man average, and what that loss really means to our home State of Illinois.

Reference was made to the likeability of all four of these chaps who could make forays over onto the Democratic side of the aisle and make any number of friends on any given day on any given issue. As the minority leader, I have special, I guess, appreciation for those who can help garner votes on the floor of this House to eventually win the issue on any given day.

So I have to doff my hat to the tremendous service and the lives of these four individuals whom we have lost in Illinois as Members of our delegation, but who we shall always love and respect and revere as friends, newfound friends made in this body.

GENERAL LEAVE

Mr. MICHEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

INNOVATIVE AND CREATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, one of the greatest problems we have in Congress is the desire of Members to be innovative and creative. I remember when I was in college, they said the word "new" gains attention. Something new is always popular here in Congress.

But we have so many new laws that the public simply cannot afford them. As the Government tried to do more and more for all people, it reaches the point where you wonder how long it would be before Government controls it all. In our Government, where 44 percent of the GNP is going for taxes, you are coming very close to that point.

Abraham Lincoln once said "the Government should do for people what they are not able to do for themselves."

Thomas Jefferson once said that "the best governed is the least governed."

But today, every squeaking wheel in this country seems to need grease and the place to get the grease is up here in Washington. Congressmen up here have the best of intentions. Have you heard that "Hell is paved with good intentions." Well, the paving contractors are headquartered here in Washington.

Lets look at innovative legislation in energy. Recently Congress has been very keenly interested in developing synthetic energy. In fact, the total funds allocated were some $20 billion for synthetic energy. Today 75 percent of the energy in this country is furnished by oil and gas. Oil is something that can be produced within this country. Forty percent of the oil and gas. Oil is something that can be produced within this country. Forty percent of the oil rigs for drilling are now laying idle. It is also interesting that the desirable figure for synthetic energy would be to produce gasoline at $2.50 a gallon. Gasoline is selling at the pumps in filling stations throughout America at less than $1.25 a gallon. It raises questions about why the Government should be interested in producing synthetic energy at twice the price to consumers.

Review the regulations passed to take care of controlling the oil industry. At the time that they did this, which was in the early seventies, America was importing $3 billion of oil. As the Government continued to put more and more regulations and took more and more control of the oil industry, it raised the annual imports of oil to $100 billion. We have the energy resources right here at home. But all of these regulations and all of these laws were known as being innovative and creative. An oil company told me they completed 494 different Government forms.

Today with Ronald Reagan in the White House, we have reduced imports, but oil is still $81 billion in imports.

Instead of having more new regulations on the oil business in our country, let us move forward to deregulate natural gas. Remember, when we deregulated oil, the price of gasoline went down.

America has more Government than it wants. America has more regulations than it needs. America has more taxes than it can afford to pay.

□ 2100

LEONARD GIAMPIETRO HONORED AS "MAN OF THE YEAR"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise to call to the attention of my colleagues the most deserved recognition received by Leonard Giampietro, vice president of the Exchange National Bank in Chicago, who was honored as "Man of the Year" by the Italian American Chamber of Commerce at its Diamond Jubilee Dinner Dance on November 27, 1982. Also at that time, Dr. Claudio Ferrari, Consul General of Italy in Chicago, bestowed one of the Republic of Italy's highest civilian awards on Mr. Giampietro, the decoration of Cavaliere Ufficiale, Nell'Ordine Al Merito (Knight, Officer's Rank, in the Order of Merit), in recognition of his dedication and commitment to civic and humanitarian endeavors.

Leonard has been with the Exchange National Bank for the past 25 years and is currently assigned to its Commercial Business Development and Conservation Department. He is an immigrant from Italy born in Mola di Bari, and was educated at Chicago's Wells High School, the University of Illinois, and the American Institute of Banking. His wife, the former Anna Fanizza, is also a native of Mola di Bari, and they now make their home in Glenview, Ill.

As an outstanding leader in Chicago's Italian American community, Leonard is known for his work as a trustee of the Joint Civic Committee of Italian Americans, a member of its executive committee, and is also a member of the JCCIA's Anti-Defamation Committee. He has served as president of the Italian American Chamber of Commerce for the past 3 years and is now on the board of directors and chairman of the executive committee.

Leonard Giampietro is a director of the Italian Cultural Center in Stone Park, serves on the advisory board of Villa Scalabrini, the Italian Home for the Aged in Northlake, Ill., and is a member of the Italo-American National Union. He also is the founder and first commander of the Italian American War Veterans, Victor A. Arrigo Post.

In 1980, Leonard served as chairman of the Italian Earthquake Committee which raised a quarter of a million dollars for the reconstruction of the stricken area. In 1980, he was chairman of the Agnelli Foundation's Exhibit, "Italy Today," at the Chicago Museum of Science and Industry, and is now chairman of a special civil committee that is developing plans for a sister city relationship between Chicago and Milan, Italy.

I send my warmest congratulations to my good friend of many years Leonard Giampietro on these honors, and extend my warmest best wishes to him for many more years of inspiring service to our Chicago community in devotion to the highest principles.●

LOWERING THE COST OF CONDOMINIUMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, today, Congressman ARCHER and I are introducing legislation which will remove the necessity for costly condominium converters.

Mr. Speaker, for many people the dream of homeownership starts with the least expensive form of housing. Because of obvious factors, such as smaller unit size, economies of scale, and considerably less land, condominiums are often the most cost-effective and energy-efficient ownership housing available today.

Present tax laws treat condominium conversion in a curious way that encourages sales to professional converters and not to present tenants. If you own an apartment building and sell units to your tenants you are considered a "dealer" in real estate and must pay taxes on your entire gain at ordinary income tax rates, no matter how long you owned the building. However, if you sell the building to a professional converter you get capital gains on

the entire gain. Hence the law favors sales to a converter and not directly to tenants.

Because of this anomaly an entire conversion industry grew in the 1970's. Conversions are not an easy process. Experts are needed to handle the legal intricacies and the unique tenant-landlord problems. But instead of hiring a company on a fee-basis, conversion companies bought the building from the owner who then converted the buildings.

Converters typically get short-term loans pegged above the prime. To cover the cost of carrying the loan, they many times had to upgrade the building that made it possible to charge more for the units but invariably makes it difficult or impossible for present tenants to afford the units. This has caused the kind of displacement that has helped give conversions a bad name.

If the tax laws did not so strongly discourage apartment owners to convert their buildings themselves, several positive results would occur.

First, there would be no need to carry a large short-term loan. This would keep the conversion costs down and allow more tenants to buy their units. There would be less need to displace tenants during "upgrading" or to keep units empty for prospective buyers. It would be a lot easier to keep units as rentals—an entirely uneconomic situation for a professional converter. It has been estimated by the National Apartment Association that involvement of a middleman converter can raise the cost of a unit 25 percent. In addition, the presence of a professional converter purchasing a building almost always generates fear and uncertainty among existing tenants, especially the elderly. We believe the conversion problems could be significantly ameliorated if the present owner is involved in the conversions.

The legislation that I have introduced today with my colleague, the gentleman from Texas (Mr. ARCHER) would alter the tax treatment conversions making the Code less "proconverter." First, an owner would get capital gain up to the value of the building as an apartment rental. On sale to individuals, any amount received greater than the value of the building as appraised as a rental building, would be taxed at ordinary income tax rates.

I am confident that this bill has no revenue impact. It is only cutting out the middleman giving the owner the option to convert him or herself with a greater likelihood that the present tenants would be able to purchase the units and make more lower priced units placed on the market.

The text of the legislation is printed below.

H.R. 7334

A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of certain conversions of residential rental property into condominium units

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) part IV of subchapter P of chapter 1 of the Internal Revenue Code of 1954 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

SEC. 1257. ELECTION TO TREAT CERTAIN CONVERSIONS INTO CONDOMINIUM UNITS AS SALES.

(a) GENERAL RULE.—For purposes of this title, at the election of the taxpayer—

(1) the conversion of any qualified residential real property into condominium units shall be treated as a sale of such property for an amount equal to its fair market value as residential rental property, and

(2) any gain determined under section (a)(1) shall be capital gain. Any additional gain determined upon disposition of the dwelling units shall be ordinary income. All such gain shall be recognized as from time to time realized in the same proportion that gain in the first sentence bears to the gain in the second sentence.

(3) Expenditures incurred in connection with improvements in the dwelling units while held by the taxpayer in anticipation of their sale, or pursuant to a contract of sale between the taxpayer and the buyer shall be treated as reducing that portion of the gain treated as ordinary income.

(b) QUALIFIED RESIDENTIAL REAL PROPERTY.—For purposes of this section, the term 'qualified residential real property' means any real property—

(1) which was residential rental property (as defined in section 167(j)(2)(B) in the hands of the taxpayer, and

(2) which, except in the case of property acquired by inheritance or devise, was residential real property held by the taxpayer for at least 5 continuous years immediately before the conversion into condominium units.

(c) *Fair Market Value Determinations.*—For purposes of this section, the fair market value of any qualified residential real property shall be determined as residential rental property immediately before the conversion and without regard to any substantial improvement made in anticipation of the conversion.

(d) SPECIAL RULES.—

(1) SECTION APPLIES ONLY WHERE GAIN RESULTS.—Subsection (a)(*1*) shall not apply if the application of such subsection would result in the recognition of a loss.

(2) BASIS ADJUSTMENTS.—The Secretary shall prescribe such regulations as he may deem necessary to provide for adjustments in basis to reflect gain recognized under this section.

(3) ELECTION.—An election under subsection (a) shall be made at such time and in such manner as the Secretary shall by regulations prescribe. Such an election, once made, may be revoked only with the consent of the Secretary.

(b) The table of sections for part IV of subchapter P of chapter 1 of such Code is amended by adding at the end thereof the following new item:

Sec. 1257. Election to treat certain conversions into condominium units as sales.

(c) The amendments made by this section shall apply to conversions after the date of the enactment of this Act in taxable years ending after such date.●

IRAQ SHOULD BE SUBJECT TO CONTROLS ON EXPORTS OF MILITARY-RELATED EQUIPMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

● Mr. BINGHAM. Mr. Speaker, I rise to express my outrage that the Government of Iraq has welcomed the notorious terrorist, Abu Nidal, to Baghdad, and to urge that the State Department restore Iraq to its list of countries which have repeatedly demonstrated a pattern of support for international terrorism. Countries on this list are subject to controls on exports of military-related equipment which would enhance their ability to support international terrorism.

In the Export Administration Act of 1979, Congress established U.S. policy to use export controls to encourage other countries to prevent the use of their territories or resources to aid, encourage, or give sanctuary to those persons involved in acts of international terrorism.

Iraq, along with Syria, South Yemen, and Libya, was placed on the list when it was first formulated by the State Department in 1979. In an incredible move last February 26, the Reagan administration pulled Iraq from the list, saying that "Iraq's improved record warrants removal from this list." The Committee on Foreign Affairs disagreed that Iraq's record on terrorism had improved, and by a vote of 17 to 11 (on an amendment to this year's foreign aid bill, which has not yet come before the House) moved to restore Iraq to the list of terrorist countries.

In a letter on behalf of the President to 61 Members of Congress who protested removal of Iraq from the list of terrorist countries and a proposed sale of aircraft to Iraq, Kenneth Duberstein wrote:

The removal of Iraq from the list of countries supporting international terrorism is intended both to recognize Iraq's improved record and to offer an incentive to continue this positive trend. It does not indicate a shift from our commitment against international terrorism, which remains firm. We have publicly stated that, if future events warrant, we will reimpose controls on Iraq.

The administration's misguided action "to offer an incentive" to Iraq has backfired. President Saddam Hussein, no longer burdened by U.S. controls on exports of military-related equipment, is free to publicly declare, "we welcome any struggler such as Abu Nidal when he comes to Iraq." Any nation which would welcome the leader of the group which claims responsibility for this year's attempted

assassination of Israel's Ambassador in London and is a leading supplier of weapons to other terrorist groups surely must be restored to the terrorist countries list. Should the State Department fail to do so, it will gut the President's stance against international terrorism.●

TEMPORARY EMERGENCY SHELTER DEMONSTRATION PROGRAM ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. VENTO) is recognized for 10 minutes.

Mr. VENTO. Mr. Speaker, today I am introducing the Temporary Emergency Shelter Demonstration Program Act. This legislation provides a measured and moderate national response to one of the most tragic and growing housing problems facing this country. In city after city across the Nation there is an increasing number of people who are homeless, they have no shelter. The resources of cities, as well as nonprofit and charitable organizations, today are stretched to the breaking point. They have made a huge investment of time and energy and yet they have been unable to meet the demand for temporary emergency shelter.

The Congress has an opportunity to work with local governments and private organizations to insure that a basic requirement for human survival is not denied to any segment of our society. To ignore national responsibility would be a callous act, a disregard of basic human dignity. The tragic fact remains that without this kind of program more people today than at any time in recent memory will have no shelter from the bitter winter weather.

There are two trends which document the need for this program and demand our attention. The first disturbing trend is a marked broadening of the type of person who is homeless and has desperate need for temporary emergency shelter. The popular conception of a homeless person is an individual who voluntarily chooses a life on the street. Today, however, people who could not previously conceive of a situation where they would not have a place to live have been forced onto the streets, into cars, onto heating grates, into doorways and into caves along the river. Today, it is more likely than ever before that the person needing temporary emergency shelter is young; is relatively well-educated; is actively seeking and yet unable to find employment; possesses a stable work history; is a woman; or is the primary source of income for a family. Any opportunity they have for a more dignified existence has been thwarted by the deepest recession, yes a depression in many communities across America; by a 10.5 percent unemployment; by the scarcity of affordable housing, drastic reductions in social services, and increases in home heating costs and utility shutoffs.

The second is a disturbing increase in the number of people without a place to live, and in the number who are turned away from existing emergency shelters because of lack of space. Although it is almost impossible to arrive at an accurate count of the number of people without a place to live, a recent study estimated that in New York City alone there are more than 30,000 homeless people. In the first 7 months of 1982, the Dorothy Day Center in my district provided services to 500 people without any permanent address. In St. Paul, St. Mary's Hall which provides temporary emergency shelter has turned away 10 to 15 people each night since it opened on November 1. When a new shelter opens in a city, it finds that it is quickly filled to capacity and that the need for their service is far greater than was originally perceived.

I recently visited an emergency shelter and soup kitchen in my district and met one of the "new homeless." He was middle aged and uncharacteristically well-dressed in a suit and tie. He expressed his deepest appreciation for this meal, his first in 3 days. In talking with him I found out that he had worked all his life but recently lost his job. He had never received any public assistance but now found that he simply had no money, no place to live, and nothing to eat. While this is a single example, it is illustrative of the widening problem we face.

Homelessness is not a situation that defies a Federal remedy. Congress along with cities and private organizations can meet the most immediate and life-threatening needs of people who have no place to live.

My proposal would provide a Federal response in partnership with local governments and private agencies. The single most critical problem in providing this needed assistance is the lack of available space. And yet it is ironic that there are vacant or underutilized buildings in all of our cities which could serve as shelters. However, cities which are caught between reduced Federal assistance, and increased demand for social services, cannot hope to finance the rehabilitation of these existing structures into decent shelters. Charitable and religious organizations continue to do a valiant job in trying to provide the staffing for these shelters but they are even less able to finance the needed physical costs. My legislation would authorize $50 million to be distributed on a competitive basis for the rehabilitation of existing structures to be used as shelters. The religious or charitable organization would continue to administer and staff the shelters.

The Federal Government would provide a single grant to make the physical repairs and, therefore, would not be locked into a long-term subsidy.

My legislation requires rapid implementation and distribution of the assistance. It seeks to encourage the greatest possible amount of private contributions and voluntary effort. In addition, it provides that any rehabilitated structure would be used as a temporary emergency shelter for a period of at least 3 years, and in cases of substantial rehabilitation, at least 10 years.

The proposal has been considered by the Housing and Community Development Subcommittee and by the full Banking, Finance and Urban Affairs Committee. It was included in the housing reauthorization legislation earlier this year without a dissenting vote. I am pleased with the strong bipartisan support it continues to receive and I urge my colleagues to indicate their support by cosponsoring this legislation. I am especially pleased to have as original cosponsors of this legislation, the chairman of the Banking, Finance and Urban Affairs Committee, Mr. ST GERMAIN. In addition, the chairman of the Housing and Community Development Subcommittee, Mr. GONZALEZ, and two distinguished minority members of that subcommittee, Mr. WYLIE and Mr. MCKINNEY, are also original cosponsors.

The bitter cold winter weather has already descended upon the northern part of this Nation. The few existing shelters are full and have been turning people away each night. Swift action by Congress in the postelection session is needed to augment the efforts by charitable and religious organizations and to reduce the human suffering and even death which will undoubtedly be this winter's cold weather companion.

COMPETITIVE SHIPPING AND SHIPBUILDING REVITALIZATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 10 minutes.

● Mrs. BOGGS. Mr. Speaker, today 13 additional Members are joining as cosponsors of the Competitive Shipping and Shipbuilding Revitalization Act (H.R. 6979). This brings the total number of cosponsors to 78.

H.R. 6979 is intended to reverse the drastic decline experienced by the U.S. merchant marine and shipbuilding industry in recent years. Since 1950 the American-flag fleet's percentage of U.S. foreign commerce has shrunk from 42 percent to less than 4 percent of total foreign tonnage. H.R. 6979 would put an end to this decline and

would contribute to the revitalization of our merchant marine as well as our shipbuilding industry.

On November 3, the day after the national elections, the Journal of Commerce published an editorial in support of H.R. 6979. Calling the legislation a key to the future of the maritime industry, the editorial stated "its adoption could be a start toward rebuilding a foundering sector of the American merchant marine." Further, the editorial noted that—

If and only if, the industry can reduce its costs to a point where shipping bulk cargoes on U.S.-flag vessels is a profitable endeavor, then and only then will the U.S.-flag bulker fleet be revitalized.

This is the real basis for H.R. 6979.

I would like to share this Journal of Commerce editorial with my colleagues as well as a resolution adopted on November 17 by the Second Biennial National Shipbuilding Conference, sponsored by the AFL-CIO Metal Trades Department. This resolution endorsed continued active support for the American shipbuilding industry and our American-flag merchant marine.

[From the Journal of Commerce, Nov. 3, 1982]

A START FOR THE BULK FLEET?

The national voting is over and there are so many issues on the agenda of the lame-duck session of Congress it is a safe bet that only a few will be acted on. That will leave a variety of proposals, some more important than they might look, facing the new Congress when it meets next year.

Key among them, as far as the maritime industry is concerned, is a seven-page bill introduced this summer by U.S. Rep. Lindy Boggs, D-La. The measure, which has more than 60 cosponsors, would guarantee a share of the United States' bulk-cargo trade to American-flag ships in a proportion that would start at 5 percent and be increased to 20 percent over the following 15 years.

The multi-faceted result, the Louisiana Democrat maintains, would be a revitalization of the nearly extinct U.S.-flag bulk ship fleet, a shot in the arm for the ailing American commercial shipbuilding industry, and a strengthening of the U.S. merchant marine's roles in commerce and as a military auxiliary in time of emergency.

Mrs. Boggs, who won re-election to her congressional seat in September under an unusual Louisiana law, has promised to reintroduce the bill, known as the Competitive Shipping and Shipbuilding Act. She should; although the measure in itself would hardly be a panacea for the U.S. bulk shipping industry, it merits close attention by Congress.

That the U.S.-flag bulk shipping fleet is in a sorry state is well known. More than 96 percent of the United States' imports and exports of bulk cargoes, many of them strategically vital commodities, are carried in foreign-flag bottoms. The U.S.-flag bulk fleet has shrunk to a virtual handful of ships, several of them aging leftovers from World War II. And U.S. shipyards that do not specialize in naval vessels also face a crisis now that construction subsidies have been suspended and U.S.-flag ship companies allowed to build overseas.

In the best of all worlds, cargo-sharing would be dismissed as unwarranted government interference with the marketplace. But in the real world, most governments subsidize their merchant fleets in a wide range of ways, including reserving for them a healthy share of cargo. The U.S. government would be naive indeed to ignore this reality, and indeed it does not.

Mrs. Boggs' overall approach is not new. Cargo-preference measures have been tried and still exist to some extent, such as in the carriage of U.S. foreign aid cargoes; historically they have had inconsequential impact because the high cost of operating U.S.-flag ships has made profits all but impossible.

But what would be different about the Competitive Shipping and Shipbuilding Act, Mrs Boggs says, is that it would require the maritime industry to cut costs. The bill would mandate the secretary of transportation to consult ship owners, operators, builders, and labor unions and come up with estimates of the cost of building and operating U.S.-flag ships. The actual costs must be 15 percent lower than the estimates before the guaranteed share of bulk cargoes could take effect.

Just how those cuts would be made remains a subject for debate and negotiation, the congresswoman says. But, she adds, shipyards maintain that a steady stream of orders would enable them to produce ships for up to 15 percent less money than it takes to build a single vessel now. And maritime unions have pledged a variety of cost-cutting concessions if the bill goes through, including reductions in manning scales, higher productivity levels and no-strike clauses for long-term contracts.

The bill thus deserves the close attention of Congress. Precedent for it exists, and its adoption could be a start toward rebuilding a foundering sector of the American merchant marine.

But adoption would only be a beginning. If the bill's goal—revitalization of the U.S.-flag bulk fleet—is to be realized, the economics must be present. And, in today's environment of worldwide recession, government cost-cutting, and the availability of relatively cheap bulk vessels on the depressed world ship markets, that would be more difficult than ever to achieve.

The Reagan administration has slapped a moratorium on ship construction subsidies and has said it will provide no ship operating subsidies beyond those already authorized. Potential builders and operators of bulkers would start cost-reduction efforts from ground zero, without the cushion that government subsidies have provided in the past.

Can the goal of revitalization be reached? Yes, but only with great effort. All involved sectors of the maritime industry, from builders to operators to labor unions, would have to press ahead from the start embodied in the Boggs bill with good faith and with vigor.

Bulk shipping is a business that operates on razor-thin margins. If, and only if, the industry can reduce its costs to a point where shipping bulk cargoes on U.S.-flag vessels is a profitable endeavor, then and only then will the U.S.-flag bulker fleet be revitalized.

RESOLUTION

America's private shipbuilding industry faces near-annihilation under the onslaught of ill-advised actions and policies of our federal government. At the very time when our country looks forward to rebuilding and strengthening our naval power, the skills and capital facilities needed to build that power are being dissipated, incentives to private enterprise to modernize facilities are being withdrawn, and the productive future of a highly skilled work force is being terminated.

At a time of deep recession in the United States, with near-record unemployment ravaging our economy, and with the world-wide ship construction industry in stagnation, our government has seen fit to take the task of building and maintaining the American merchant marine away from American shipyards and shipyard workers and award it to foreign countries. Only a fraction of American shipyards and their work forces will be able to survive this starvation of opportunity, by turning to complete dependence on proposed naval construction.

This is an immediate problem, not a cry of doom for the future. In the past few months alone, our national Administration has authorized the construction abroad of 36 new U.S.-flag ships and the reconstruction abroad of 12 others. By these actions, American shipyards were deprived of almost $1.5 billion in construction projects, and 22,500 shipbuilding jobs, together with 65,000 jobs in allied endeavors, are now lost to American workers forever.

In addition, the Administration is urging the Congress to take actions that will encourage the export of even more ship construction projects and jobs, regardless of the enormous damage that will ensue to our private shipbuilding industry and its workers.

These proposals, if enacted, will adversely affect the economy of every one of the United States, do serious and immediate damage to the economic futures of thousands of working people, and undermine drastically our national ability to construct and maintain a modern Navy.

Therefore be it resolved, That the Second Biennial National Shipbuilding Conference of the Metal Trades Department, AFL-CIO, urges the Congress to continue national support of our private shipbuilding industry at the highest possible levels, by continuing to provide incentives for construction and repair of our merchant marine in American shipyards and by retaining in American hands the vital strategic control over American shipping routes and shipping policy.

NOVEMBER 17, 1982.●

NUCLEAR WASTE LEGISLATION

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, the lack of legislation to establish a nuclear waste disposal policy and program is an impediment to the greater use of nuclear energy in our Nation. This impediment must be removed to permit us to move faster in utilizing this vital energy resource since only by utilizing this resource and other domestic resources, such as coal, can we curb the crippling drain on our economy by foreign purchases of fuels. That is why we must enact H.R. 7187 which provides a nuclear waste program.

Following my remarks, I am enclosing a full-page statement by the electrical energy organizations responsible for providing this Nation with such energy, pleading for the passage of this legislation:

Congress Must Act Now To Pass Nuclear Waste Legislation

The time is now. Congress must pass legislation to establish a comprehensive nuclear waste policy and program.

The public agrees. According to a recent national opinion survey, nine out of ten Americans (92 percent) say the Government should stop procrastinating and resolve this issue once and for all.

We agree. The undersigned electric utilities and associations representing systems now operating or constructing nuclear power plants (which serve over 160 million Americans) urge Congress to end its years of debate and pass the nuclear waste bill now.

Congress seems to agree. Through bipartisan efforts, the National Nuclear Waste Policy Act of 1982 has already passed the Senate (S. 1662), and the House is on the verge of passing a compromise bill (H.R. 7187).

Congress must act now. To complete the task of establishing a national nuclear waste policy and program, Congress must act quickly in the lame duck session, if legislation is to become law.

Congress must not let this important chance for passage of nuclear waste legislation slip away.

Let history record that *this* Congress acted responsibly to address this pressing national priority.●

REPORT TO THE SPEAKER FROM COMMITTEE ON THE BUDGET ON THE STATUS OF FISCAL YEAR 1983 CONGRESSIONAL BUDGET

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. JONES of Oklahoma. Mr. Speaker, my letter under today's date, along with its enclosures relating to budgetary matters, is included in the RECORD as follows:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, D.C., November 30, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under Senate Congressional Resolution 92, the First Budget Resolution for Fiscal Year 1983. This report reflects the resolution of June 24, 1982, and estimates of budget authority, outlays, and revenues based on all completed action on spending and revenue measures as of the close of legislative business November 29, 1982.

With best wishes.

Sincerely,

JAMES R. JONES,
Chairman.

Report to the Speaker of the U.S. House of Representatives From the Committee on the Budget on the Status of the Fiscal Year 1983 Congressional Budget Adopted in Senate Concurrent Resolution 92

REFLECTING COMPLETED ACTION AS OF NOV. 29, 1982

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	822,390	769,818	665,900
Current level	806,948	775,026	663,635
Amount over resolution		5,208	
Amount under resolution	15,442		2,265

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $15,442 million for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 92 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 92 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 92.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., November 30, 1982.

Hon. JAMES R. JONES,
Chairman, Committee on the Budget, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1983 budget (S. Con. Res. 92). This report for fiscal year 1983 is tabulated as of close of business November 29, 1982 and is based on our estimates of budget authority, outlays, and revenues using the assumptions and estimates consistent with S. Con. Res. 92.

The current level budget authority and outlay estimates are on a full year basis. The funds normally provided through appropriation bills are covered by continuing appropriations authority as contained in P.L. 97-276. This authority will expire December 17, 1982.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	427,477	519,086	663,635
2. Entitlement authority and other mandatory items requiring further appropriation action	2,468	2,126	
3. Continuing resolution authority	377,003	253,814	
4. Conference agreements ratified by both Houses			
Current level	806,948	775,026	663,635
Second budget resolution, revised, Senate Concurrent Resolution 92	822,390	769,818	665,900
Current level is:			
Over resolution by		5,208	
Under resolution by	15,442		2,265

Sincerely,

ALICE M. RIVLIN,
Director.

Under ceiling	15,442	

Note.—Detail may not add due to rounding.

House Budget Committee Early Warning Report—Week of November 29, 1982

My dear Colleague, the program for the House of Representatives for the Week of November 29, 1982, is as follows:

MONDAY, TUESDAY, AND WEDNESDAY—NOV. 29, 30; DEC. 1

House meets at noon on Monday and Tuesday and at 10 a.m. on Wednesday: Suspensions (no bills).

H.R. 6598—Nuclear waste disposal (continue consideration)

H.R. 7158—Treasury-Postal Appropriations, fiscal year 1983.

H.R. 7205—Labor, Health, Human Services Appropriations, fiscal year 1983.

THURSDAY AND THE BALANCE OF THE WEEK—DEC. 2, 3

House meets at 10 a.m.

H.R. 6598—Nuclear waste disposal (complete consideration).

Any further program will be announced later.

Adjournment times will be announced daily, and Members should expect late sessions.

Conference reports may be brought up at any time, and any further program will be announced later.

Sincerely,

THOMAS S. FOLEY,
Majority Whip.

EARLY WARNING

H.R. 7158, TREASURY, POSTAL SERVICE AND GENERAL GOVERNMENT APPROPRIATIONS, FISCAL YEAR 1983

Committee: Appropriations.

Subcommittee: Treasury, Postal Service, and General Government.

Chairman: Mr. Roybal (California).

Ranking Minority Member: Mr. Miller (Ohio).

Scheduled: Wednesday, December 1.

I. Description of bill

This bill provides $5,950 million in budget authority and $5,787 million in outlays for discretionary programs in the Department of the Treasury, the Postal Service, the Executive Office of the President, the General Services Administration, the Office of Personnel Management, and other related agencies for fiscal year 1983. Such funding has already been provided in the Continuing Appropriations Act (Public Law 97-276). This regular appropriation will supersede and replace funds provided in the Continuing Resolution. The effect of this bill, therefore, is to provide an incremental change to the Current Level of spending that is already provided by law.

II. Comparison with budget targets

Now that Fiscal Year 1983 has started, there are two budget targets to consider. The first is the aggregate ceiling on budget authority and outlays that was specified in the First Budget Resolution for Fiscal Year 1983. Pursuant to Section 7 of that Resolution, the aggregates automatically become binding ceilings on October 1. Summary Table B, below, shows that while the Current Level of budget authority, based on enacted law, is substantially under the Budget Resolution ceiling, the Current Level of outlays is over the ceiling.

The second target is the 302(b) target provided for this Subcommittee when the Appropriations Committee subdivided its share of the First Budget Resolution's budget authority and outlays. These are the targets which the Budget Committee scorekeeping system uses as a measure of spending action. These targets are separated between discretionary spending, over which this Subcommittee has control, and mandatory spending, over which it does not. While the overall resolution ceiling has been breached by other bills, Summary Table C, below, shows that, with this bill, the Subcommittee would also breach the 302(b) targets for discretionary spending that were provided in the first resolution. This bill has no impact on the Current Level estimate of mandatory spending.

III. Summary tables

[In millions of dollars]

	Budget authority	Outlays
Summary Table A.—Comparison of continuing and regular appropriations, discretionary spending:[1]		
1. Continuing appropriations (Public Law 97-276)	5,984	5,741
2. This bill (H.R. 97-7158)	5,950	5,787
3. Over (+)/under (−)	−34	+46

III. Summary tables—Continued

[In millions of dollars]

	Budget authority	Outlays
Summary Table B.—Comparison with current level and ceilings:		
4. Budget resolution ceilings	822,390	769,818
5. Current level	806,948	775,026
6. Over (+)/under (−)	−15,442	+5,208
7. Impact of this bill	−34	+46
8. Over (+)/under (−)	−15,476	+5,254
Summary Table C.—Comparison with 302(b) subdivisions; discretionary spending:[1]		
9. 302(b) targets	5,575	5,105
10. Current level	5,984	5,741
11. Over (+)/under (−)	+409	+636
12. Impact of this bill	−34	+46
13. Over (+)/under (−)	+375	+682

[1] This bill does not affect the current level of mandatory spending.

IV. Possible future requirements

The Budget Resolution does not assume funding for any additional discretionary programs within the jurisdiction of this subcommittee.

V. Credit

The First Budget Resolution for Fiscal Year 1983 also contains targets for credit program amounts. As with budget authority and outlays, the Appropriations Committee is allocated amounts for credit programs and subdivides those amounts among subcommittees. The table below shows the additional credit assistance provided by this bill; credit assistance program levels already enacted, including action in the Continuing Appropriations Act; and credit assistance programs not yet acted on. These amounts are then compared to the Appropriations Committee subdivisions.

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. 1983 credit program limits already enacted			
2. Additional program limits in the bill			
3. Limits assumed in the budget resolution not acted on in the bill and other amounts not subject to annual limits			
4. Possible total for subcommittee			
5. Credit subdivisions	100		
6. Over (+)/under(−) subdivision	−100		

There is only one credit program in this subcommittee's jurisdiction, direct loans from the GSA Federal Building Fund. CBO estimates that the bill will result in no direct loans being used in 1983.

VI. Definitions of terms in the summary tables, section III

Line 1. Continuing Appropriations (Public Law 97-276): This is the amount of discretionary budget authority and outlays provided by that law, for programs founded by this subcommittee, as estimated on a full-year basis pursuant to Congressional scorekeeping rules and GAO interpretation.

Line 2. This bill (H.R. 97-7158): This is the amount of discretionary budget authority and outlays that will be provided to the agencies in question if this bill is enacted—in that case it would supersede the Continuing Appropriations.

Line 3. Over(+)/Under(−): Line 2 minus line 1, which is the net impact on Current Level of this bill.

Line 4. Budget Resolution Ceilings: These are the total amounts of budget authority and outlays in the First Budget Resolution for Fiscal Year 1983.

Line 5. Current Level: This is the official estimate of total Fiscal Year 1983 spending, based only on existing law, including the Continuing Appropriations (Public Law 97-276).

Line 6. Over(+)/Under(−): Line 5 minus line 4.

Line 7. Impact of this bill: See line 3.

Line 8. Over(+)/Under(−): Line 6 plus line 7.

Line 9. 302(b) targets: The targets for discretionary spending for this Subcommittee, set by the Appropriations Committee pursuant to the Budget Act.

Line 10. Current Level: This is the official estimate of total Fiscal Year 1983 discretionary spending for this Subcommittee, based only on existing law, i.e., the Continuing Appropriations (Public Law 97-276).

Line 11. Over(+)/Under(−): Line 10 minus line 9.

Line 12. Impact of this bill: See line 3.

Line 13. Over(+)/Under(−): Line 11 plus line 12. this compares the reported bill (H.R. 97-7158) with its 302(b) targets.

EARLY WARNING

H.R. 7205, LABOR, HEALTH, AND HUMAN SERVICES AND EDUCATION AND RELATED AGENCIES APPROPRIATION, FISCAL YEAR 1983

Committee: Appropriations.

Subcommittee: Department of Labor, Health and Human Service and Education and Related Agencies.

Chairman: Mr. Natcher (Kentucky).

Ranking Minority Member: Mr. Conte (Massachusetts).

Scheduled: Week of November 29, 1982.

I. Description of bill

This bill provides funds for the Departments of Labor, Health and Human Services and Education and Related Agencies. Such funding has already been provided in the Continuing Appropriations Act (Public Law 97-276). This regular appropriation will supersede and replace the Continuing Resolution. The effect of this bill, therefore, is to provide an incremental change to the Current Level of spending that is already provided by law.

II. Comparison with budget targets

Now that fiscal year 1983 has started, there are two budget targets to consider. The first is the aggregate ceiling on budget authority and outlays that was specified in the First Budget Resolution for fiscal year 1983. Pursuant to Section 7 of that Resolution, the aggregates automatically become binding ceilings on October 1. Summary Table B, below, shows that while the Current Level of budget authority, based on enacted law, is substantially under the Budget Resolution ceiling, the Current Level of outlays is over the ceiling.

The second target is the 302(b) target provided for this Subcommittee when the Appropriations Committee subdivided its share of the First Budget Resolution's budget authority and outlays. These are the targets which the Budget Committee scorekeeping system uses as a measure of spending action. These targets are separated between discretionary spending, over which this Subcommittee has control, and mandatory spending, over which it does not. While the overall resolution ceiling has been breached

by other bills, Summary Table C, below, shows that, with this bill, the Subcommittee would remain under the 302(b) targets for discretionary spending that were provided in the first resolution. This bill has no impact on the Current Level of mandatory spending.

III. Summary tables

[In millions of dollars]

	Budget authority	Outlays
Summary Table A.—Comparison of continuing and regular appropriations, discretionary spending:[1]		
1. Continuing appropriations (Public Law 97-276)	28,326	21,000
2. This bill (H.R. 97-7205)	23,867	17,769
3. Over (+)/under (−)	−4,459	−3,231
Summary Table B.—Comparison with current level and ceilings:		
4. Budget resolution ceilings	822,390	769,818
5. Current level	806,948	775,026
6. Over (+)/under (−)	−15,442	+5,208
7. Impact of this bill	−4,459	−3,231
8. Over (+)/under (−)	−19,901	+1,977
Summary Table C.—Comparison with 302(b) subdivisions, discretionary spending:[1]		
9. 302(b) targets	27,850	19,850
10. Current level	28,326	21,000
11. Over (+)/under (−)	+476	+1,150
12. Impact of this bill	−4,459	−3,231
13. Over (+)/under (−)	−3,983	−2,081

[1] This bill does not affect the current level of mandatory spending

IV. Possible future requirements

In addition to funds already provided in the bill, additional funding may be required for employment and training and refugee assistance, both of which are discretionary programs on which the Appropriations Committee has deferred action, and which were assumed in the First Budget Resolution. Authorizations for these programs were extended after the Appropriations Committee completed action on the regular appropriations bill.

The Current Level already includes $4,406 million in budget authority and $3,439 million in outlays, the levels provided in the Continuing Resolution for these programs. This bill's omission of these programs is the primary reason the bill is below Current Level. As indicated in the table below, the Current Level amounts assumed for these programs exceed the budget resolution assumptions by $737 million in budget authority and by $522 million in outlays:

	Resolution assumption		Current level		Current level over (+)/under (−) resolution	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Employment and training assistance	3,109	2,577	3,846	3,099	+737	+522
Refugee and entrant assistance	560	340	560	340		
Totals	3,669	2,917	4,406	3,439	+737	+522

It should be noted, however, that the Labor-HHS bill report indicates the Appropriations Committee's intention to appropriate amounts for refugee and employment and training assistance consistent with amounts assumed in the Budget Resolution.

The Appropriations Committee report on the Labor-HHS bill also notes that supplemental funding will be required for a number of mandatory programs, including additional funding for medicaid, guaranteed student loans, and public assistance. The bill provides the funding level requested by the President for these programs. However, the Committee notes that the President's request assumes legislative changes to reduce spending in the programs. Congress already has considered these requests and turned them down in a number of instances. The Committee assumes that additional funding will be provided through supplemental requests to meet the full current law requirements for the programs. The amounts required to fully fund these programs already are included in the Current Level amounts reflected above. Therefore, later congressional action on these supplementals will not cause the Labor-HHS Subcommittee to further exceed the levels already assumed in the continuing resolution or the 302(b) budget allocations.

V. Credit

The First Budget Resolution for Fiscal Year 1983 also contains targets for credit program amounts. As with budget authority and outlays, the Appropriations Committee is allocated amounts for credit programs and subdivides those amounts among subcommittees. The table below shows the additional credit assistance provided by this bill; credit assistance program levels already enacted, including action in the Continuing Appropriations Act; and credit assistance programs not yet acted on. These amounts are then compared to the Appropriations Committee subdivisions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. 1983 credit program limits already enacted	89	156	
2. Additional program limits in the bill	−23	−156	
3. Limits assumed in the budget resolution not acted on in the bill and other amounts not subject to annual limits	782	7,389	
4. Possible total for subcommittee	848	7,389	
5. Credit subdivisions	1,150	7,400	
6. Over (+)/under (−) subdivision	−302	−11	

VI. Definitions of terms in the summary tables, section III

Line 1. Continuing Appropriations (P.L. 97-276): this is the amount of discretionary budget authority and outlays provided by that law, for programs funded by this subcommittee, as estimated on a full-year basis pursuant to Congressional scorekeeping rules.

Line 2. This bill (H.R. 97-6957): this is the amount of discretionary budget authority and outlays that will be provided to the agencies in question if this bill is enacted—in that case it would supersede the Continuing Appropriations.

Line 3. Over(+)/Under(−): line 2 minus line 1, which is the net impact on Current Level of this bill.

Line 4. Budget Resolution Ceilings: these are the total amounts of budget authority and outlays in the First Budget Resolution for Fiscal Year 1983.

Line 5. Current Level: this is the official estimate of total Fiscal Year 1983 spending, based only on existing law, including the Continuing Appropriations (P.L. 97-276).

Line 6. Over(+)/Under(−): line 5 minus line 4.

Line 7. Impact of this bill: see line 3.

Line 8. Over(+)/Under(−): line 6 plus line 7.

Line 9. 302(b) targets: the targets for discretionary spending for this Subcommittee, set by the Appropriations Committee pursuant to the Budget Act.

Line 10. Current Level: this is the official estimate of total Fiscal Year 1983 discretionary spending for this Subcommittee, based only on existing law, i.e., the Continuing Appropriations (P.L. 97-276).

Line 11. Over(+)/Under(−): line 10 minus line 9.

Line 12. Impact of this bill: see line 3.

Line 13. Over(+)/Under(−): line 11 plus line 12. This compares the reported bill (H.R. 97-6957) with its 302(b) targets.

1983 APPROPRIATION BILLS—ACTION TO DATE AS OF NOVEMBER 29, 1982

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YATES (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. TAUKE) to revise and extend their remarks and include extraneous material:)

Mr. SPENCE, for 60 minutes, December 9.

Mr. COLLINS of Texas, for 30 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, December 1.

Mr. COLLINS of Texas, for 30 minutes, December 2.

Mr. COLLINS of Texas, for 30 minutes, December 3.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 45 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. BINGHAM, for 5 minutes, today.

Mr. VENTO, for 10 minutes, today.

Mrs. BOGGS, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PICKLE, and to include extraneous material notwithstanding the fact that it exceeds 2 pages of the RECORD and is estimated by the Public Printer to cost $2,737.

Mr. GREEN, during general debate on H.R. 7158, in the Committee of the Whole today.

Mr. HOYER, on behalf of the Barnes amendment to H.R. 7158 in the Committee of the Whole today.

Ms. FERRARO, on the Barnes amendment to H.R. 7158 in the Committee of the Whole today, following the remarks of Mr. HOYER.

(The following Members (at the request of Mr. TAUKE) and to include extraneous matter:)

Mr. COLLINS of Texas in three instances.

Mr. CONABLE.

Mr. KINDNESS.

Mr. BEREUTER.

Mr. O'BRIEN.

Mr. VANDER JAGT.

Mr. BENEDICT.

Mr. DAUB.

Mr. DANIEL B. CRANE.

Mr. PARRIS.

Mr. CORCORAN.

Mr. MADIGAN.

Mr. GOODLING.

Mr. DENARDIS.

(The following Members (at the request of Mr. KILDEE) and to include extraneous matter:)

Mr. MINETA in two instances.

Mr. MAZZOLI in two instances.

Mrs. KENNELLY.

Mr. BROOKS.

Mr. MOTTL in two instances.

Mr. MURTHA in two instances.

Mr. DE LUGO.

Mr. RODINO.

Mr. ROSTENKOWSKI.

Mr. YATRON.

Mr. REUSS in two instances.

Mr. EDWARDS of California.

Ms. OAKAR.

Mr. O'NEILL.

Mr. STARK.

Mr. SIMON in two instances.

Mr. AUCOIN.

Mr. WAXMAN.

Mr. SCHUMER.

Mr. MCDONALD in five instances.

Ms. FERRARO.

Mr. DYSON.

ADJOURNMENT

Mr. VENTO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 7 minutes p.m.) the House adjourned until tomorrow, Wednesday, December 1, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5176. A letter from the Clerk, U.S. House of Representatives, transmitting his quarterly report of receipts and expenditures for the period July 1 through September 30, 1982, pursuant to section 105(a) of Public Law 88-454, as amended (H. Doc. No. 97-256); to the Committee on House Administration and ordered to be printed.

5177. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1983 (H. Doc. No. 97-257); to the Committee on Appropriations and ordered to be printed.

5178. A letter from the Assistant Secretary for Fossil Energy, transmitting notice of a delay until the end of December in submission of the next semiannual report on the alternative fuels production program, required by title II of Public Law 96-126; to the Committee on Appropriations.

5179. A letter from the Secretary of Defense, transmitting a report on the initial allocation and rationale of each allocation of civilian personnel among the military departments and defense agencies, pursuant to section 601(a) of Public Law 97-252; to the Committee on Armed Services.

5180. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance with respect to converting the containers, tents, textiles, and tarps activity at Fort Sam Houston, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5181. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance with respect to a study of the material turned into store function at the Naval Supply Center, Norfolk, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5182. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance with respect to a study of the messenger service function at the Norfolk Naval Shipyard, Portsmouth, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5183. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance with respect to a study of the cold storage function at the Cheatham Annex, Naval Supply Center, Norfolk, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5184. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of August 1982, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

5185. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting a report covering the month of September 1982, on the number of passengers per day on board each train operated, and the ontime performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

5186. A communication from the President of the United States, transmitting a report on progress toward conclusion of a negotiated solution of the Cyprus problem, pursuant to section 620C(c) of the Foreign Assistance Act of 1961, as amended (H. Doc. No. 97-258); to the Committee on Foreign Affairs and ordered to be printed.

5187. A letter from the Secretary of Commerce, transmitting his conclusions on the criteria and alternative means used on foreign policy controls being placed on exports to Russia following imposition of martial law in Poland, pursuant to section 6(e) of the Export Administration Act; to the Committee on Foreign Affairs.

5188. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Lebanon (Transmittal No. 83-01), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5189. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Pakistan (Transmittal No. 83-02), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5190. A letter from the Chairman, Board for International Broadcasting, transmitting a draft of proposed legislation to amend the Board for International Broadcasting Act of 1973 to authorize an amended appropriation for fiscal year 1983; to the Committee on Foreign Affairs.

5191. A letter from the Assistant Secretary of the Interior, transmitting notice of a deferral of payment of the annual construction charge installment for the Roosevelt Irrigation District of Buckeye, Maricopa County, Ariz., pursuant to section 17(b) of the Reclamation Project Act of 1939, as amended; to the Committee on Interior and Insular Affairs.

5192. A letter from the Assistant Secretary of the Interior, transmitting notice of a deferral of payment of the annual construction charge installment for the Columbia Irrigation District, Benton County, Wash., pursuant to section 17(b) of the Reclamation Project Act of 1939, as amended; to the Committee on Interior and Insular Affairs.

5193. A letter from the Assistant Secretary of the Interior for Land and Water Resources, transmitting notice of a deferral of payment of the annual construction charge installment for the Fallbrook Public Utility District, San Diego County, Calif., pursuant to section 17(b) of the Reclamation Project Act of 1939, as amended; to the Committee on Interior and Insular Affairs.

5194. A letter from the Assistant Secretary of the Interior for Land and Water Resources, transmitting notice of a deferral of payment of the annual construction charge installment for the Ramona Municipal District, San Diego County, Calif., pursuant to section 17(b) of the Reclamation Project Act of 1939, as amended; to the Committee on Interior and Insular Affairs.

5195. A letter from the Assistant Secretary of the Interior for Land and Water Resources, transmitting notice of a deferral of payment of the annual construction charge installment for the Yuba County Water Agency, Yuba County, Calif., pursuant to section 17(b) of the Reclamation Project Act of 1939, as amended; to the Committee on Interior and Insular Affairs.

5196. A letter from the Secretary of the Treasury, transmitting the final monthly Treasury statement of receipts and outlays of the U.S. Government for fiscal year 1981, pursuant to section 257 (First) of the Revised Statutes; to the Committee on Ways and Means.

5197. A letter from the Chairman, Nuclear Regulatory Commission, transmitting the quarterly report on nondisclosure of safeguards information, pursuant to section 147e of the Atomic Energy Act of 1954, as amended; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1986. An act to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250-A and 279-C by the U.S. Court of Claims, and for other purposes; with amendments (Rept. No. 97-935). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6243. A bill to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes; with amendments (Rept. No. 97-936). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6416. A bill to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims; with amendments (Rept. No. 97-937). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 7155. A bill to settle certain Indian land claims within the State of Florida, and for other purposes; with an amendment (Rept. No. 97-938). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PICKLE:

H.R. 7326. A bill to amend title II of the Social Security Act to make miscellaneous and technical improvements relating to cash management, gender-based distinctions, coverage, and other matters under the old-age, survivors, and disability insurance program; to the Committee on Ways and Means.

By Mr. FORD of Tennessee:

H.R. 7327. A bill to increase the number of weeks for which Federal supplemental unemployment compensation is payable; to the Committee on Ways and Means.

By Mr. BONKER:

H.R. 7328. A bill to amend the act of June 25, 1910, to authorize the Secretary of the Army to implement measures to control floods on the lower Cowlitz River area; to the Committee on Public Works and Transportation.

By Mr. CARMAN:

H.R. 7329. A bill to amend title II of the Social Security Act to require the establishment of procedures to assure that benefit payments will not be made thereunder to deceased individuals; to the Committee on Ways and Means.

By Mr. MICHEL (by request):

H.R. 7330. A bill to authorize appropriations for construction of certain highways in accordance with title 23 of the United States, and other purposes; jointly, to the Committees on Public Works and Transportation and Ways and Means.

By Mr. KINDNESS:

H.R. 7331. A bill to amend the Internal Revenue Code of 1954 to provide financial relief to State and local governments, by eliminating a requirement that would result in a duplicative mailing each year; to the Committee on Ways and Means.

By Mr. O'BRIEN:

H.R. 7332. A bill to amend the Export Administration Act of 1979 to provide for congressional disapproval of export controls under that act for national security, foreign policy, or short supply reasons; to the Committee on Foreign Affairs.

By Mr. PEASE:

H.R. 7333. A bill to implement the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 7334. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of certain conversions of residential rental property into condominium units; to the Committee on Ways and Means.

By Mr. FISH:

H.R. 7335. A bill to make the programs authorized under the U.S. Housing Act of 1937 subject to the requirements of the Buy American Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GOODLING:

H.R. 7336. A bill to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981; to the Committee on Education and Labor.

By Mr. VENTO (for himself, Mr. ST GERMAIN, Mr. GONZALEZ, Mr. WYLIE, and Mr. MCKINNEY):

H.R. 7337. A bill to require the Secretary of Housing and Urban Development to administer a demonstration program for assisting communities and nonprofit organizations in providing emergency shelter; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WAXMAN:

H.R. 7338. A bill to amend the Public Health Service Act to extend through March 31, 1983, the President's Commission for the Study of Ethical Problems in Medi-

cine and Biomedical and Behavioral Research; to the Committee on Energy and Commerce.

By Mr. WRIGHT:

H.R. 7339. A bill to provide that certain property held in foreign-trade zones shall be exempt from State and local ad valorem taxation; to the Committee on Ways and Means.

By Mr. GOODLING:

H. Con. Res. 429. Concurrent resolution to express the sense of the Congress concerning the legal minimum age for drinking and purchasing alcohol; jointly, to the Committees on Public Works and Transportation and the Judiciary.

By Mr. WRIGHT:

H. Res. 611. Resolution establishing the House of Representatives Page Board for supervision and education of pages; considered and agreed to.

By Mr. DASCHLE (for himself and Mr. DORGAN of North Dakota):

H. Res. 612. Resolution expressing the sense of the House of Representatives that the President should extend the offer of the United States to sell additional grain to the Union of Soviet Socialist Republics; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

513. The SPEAKER presented a memorial of the Legislature of the Northern Marianas Commonwealth, relative to the actions of the Secretary of Education in recognizing the postsecondary educational needs of the islands; to the Committee on Education and Labor.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2129: Mr. ASPIN.
H.R. 2322: Mr. GOODLING.
H.R. 3526: Mr. FLORIO.
H.R. 5471: Mr. GOODLING and Mr. BEDELL.
H.R. 5665: Mr. FINDLEY.
H.R. 5717: Mr. LEATH of Texas, Mr. WILSON, Mr. ATKINSON, Mr. HANSEN of Idaho, Mr. EMERSON, Mr. BADHAM, Mr. CLAUSEN, Mr. MONTGOMERY, Mr. BROOKS, Mr. WOLPE, Mr. MCEWEN, and Mr. JEFFRIES.
H.R. 6032: Mr. WYDEN.
H.R. 6054: Mr. MARRIOTT and Mr. STANGELAND.
H.R. 6135: Mr. SYNAR, Mr. DASCHLE, Mr. HUBBARD, Mr. HANCE, and Mr. MCEWEN.
H.R. 6239: Mr. MOLLOHAN, Mr. LAGOMARSINO, and Mr. GOODLING.
H.R. 6538: Mr. MITCHELL of Maryland, Mr. MCDADE, Mr. ROBINSON, and Mr. SABO.
H.R. 6802: Mr. HORTON.
H.R. 6962: Mr. HOWARD.
H.R. 6971: Ms. FERRARO, Mrs. HECKLER, Mrs. FENWICK, Mr. OTTINGER, Mr. OBERSTAR, Mr. FORD of Tennessee, Mr. FOGLIETTA, Mr. CONYERS, Mr. MARKEY, Mr. BARNES, Mr. DOWNEY, Mr. ALEXANDER, Mr. DAVIS, Mr. ADDABBO, Mr. MARLENEE, Mr. STUDDS, Mr. HOWARD, Mr. AUCOIN, Mr. LUNDINE, Mr. MCCOLLUM, and Mr. STARK.
H.R. 6979: Mr. HERTEL, Mr. AKAKA, Mr. BRODHEAD, Mr. DENARDIS, Mr. DIXON, Mr. FAZIO, Mr. HUBBARD, Mr. HUGHES, Mr. MARTINEZ, Mr. ROTH, Mr. SHELBY, Mr. VENTO, and Mr. WEAVER.
H.R. 6999: Mrs. CHISHOLM.
H.R. 7117: Mr. GRAMM.
H.R. 7130: Mr. WILLIAMS of Montana and Mr. BROWN of California.
H.R. 7194: Mr. DOUGHERTY.
H.R. 7212: Mr. RINALDO, Mr. ROBERTS of South Dakota, Mr. BAILEY of Missouri, Mr. DAUB, Mr. TAUKE, Mr. RUDD, Mr. WEBER of Ohio, Mr. SAM B. HALL, JR., Mr. CORCORAN, Mr. LEBOUTILLIER, Mr. MCKINNEY, Mr. FINDLEY, Mr. MURPHY, Mr. MADIGAN, Mr. KINDNESS, Mr. BAFALIS, Mr. PARRIS, Mr. WILSON, Mr. JACOBS, Mr. FORSYTHE, and Mr. MCCLORY.
H.R. 7243: Mr. WEBER of Ohio, Mr. TAYLOR, Mr. MCHUGH, Mr. FORSYTHE, and Mr. WALGREN.
H.R. 7251: Mr. SIMON, Mr. WINN, Mr. CLINGER, and Mr. PEYSER.
H.R. 7264: Mr. SIMON, Mr. SEIBERLING, Mr. SOLOMON, Mr. SAWYER, and Mr. NOWAK.
H.J. Res. 102: Mr. ERDAHL, Mr. CRAIG, and Mr. WALKER.
H.J. Res. 172: Mr. GILMAN and Mr. SHUSTER.
H.J. Res. 500: Mr. MARRIOTT.
H.J. Res. 533: Mr. LOWERY of California and Mr. GUNDERSON.
H.J. Res. 590: Mr. MARTIN of New York, Mr. HORTON, Mr. WAXMAN, Mr. FAZIO, Mr. STOKES, and Mr. CORRADA.
H.J. Res. 591: Mr. BEDELL, Mr. CLAY, Mr. CROCKETT, Mr. PATMAN, Mr. SILJANDER, Mr. WEBER of Minnesota, and Mr. WHITLEY.
H.J. Res. 607: Mr. MILLER of California, Mr. MINETA, Mr. MARKEY, Mr. BARNES, Mr. BEILENSON, Mr. PRITCHARD, and Mr. SHANNON.
H.J. Res. 616: Mr. KASTENMEIER, Mr. APPLEGATE, Mr. HOLLENBECK, Mr. PHILLIP BURTON, Mr. RANGEL, Mr. WASHINGTON, Mr. BEARD, Mr. HUGHES, Mr. DAVIS, Mr. GREEN, Mr. CONABLE, Mr. ZABLOCKI, Mr. MURTHA, Mr. MCDADE, Mr. HUCKABY, Mr. BROWN of California, and Mr. GILMAN.
H. Res. 577: Mr. FORSYTHE, Mr. SAWYER, and Mr. WYDEN.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 6928: Mrs. FENWICK.
H. Res. 48: Mr. VOLKMER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

665. By the SPEAKER: Petition of the City Council, Niagara Falls, N.Y., relative to local regulation of cable communications systems; to the Committee on Energy and Commerce.

666. Also, petition of the City Council, Niagara Falls, N.Y., relative to the costs of borrowing for municipalities; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4230

By Mr. SNYDER:

—Page 23, line 9, strike out "If" and all that follows through the period on line 12.

Page 23, after line 15, insert the following:

"(3) Each application approved under this section shall contain such terms and conditions as the Commission considers necessary to—

"(A) protect the public health and safety;

"(B) protect property;

"(C) protect the interest of individuals who live in the general area traversed by the coal pipeline and rely on the resources of such area;

"(D) require location of the right-of-way along a route which will cause the least damage to the environment, taking into consideration feasibility and other relevant factors; and

"(E) otherwise protect the public interest.

Page 23, line 16, strike out "(3)" and insert in lieu thereof "(4)".

Page 24, line 1, strike out "(4)" and insert in lieu thereof "(5)".

Page 24, line 18, strike out "(5)" and insert in lieu thereof "(6)".

Page 24, line 22, strike out "(6)" and insert in lieu thereof "(7)".

—Page 29, after line 2, insert the following:

"(h) The Commission shall require as a condition of issuance of a certificate with respect to a coal pipeline under this section that the pipeline carrier, upon application of any party tendering coal for transportation, shall construct, maintain, and operate upon reasonable terms a feeder or distribution line to connect the source of such tendered coal with the coal pipeline in any case in which such connection is reasonably practicable and can be constructed with safety and will furnish sufficient business to justify its construction operator, and maintenance. Such feeder or distribution line, at the option of the party applying therefor, shall include any facilities necessary for the delivery of coal to such party in a form and condition suitable for use as fuel without further processing or treatment. If any pipeline carrier of coal holding a certificate issued under this section fails to install and operate any feeder or distribution line upon application in writing by any party, such party may submit a complaint to the Commission. The Commission—

"(1) shall hear and investigate such complaint;

"(2) shall make a determination with respect to the safety and practicability of such feeder or distribution line and the justification and reasonable compensation for such line; and

"(3) may issue an order, in accordance with this subtitle, directing such pipeline carrier to comply with the provisions of this subsection.

Such order shall be enforced as provided for the enforcement of all other orders by the Commission, other than orders for the payment of money.

—Page 52, after line 11, add the following:

FEDERAL ENERGY REGULATORY COMMISSION REVIEW OF PRICES OF PIPELINE-TRANSPORTED COAL

SEC. 13. (a) Title VI of the Public Utility Regulatory Policies Act of 1978 (Public Law 95-617) is amended by adding at the end thereof the following new section:

"SEC. 609. COMMISSION REVIEW OF CERTAIN COAL PRICES.

"(a) Whenever any State regulated electric utility and a coal producer enter into any contract for the sale of coal, and such coal is to be transported by a pipeline carrier providing transportation of coal under a certificate issued under section 10952 of title 49, United States Code, such electric utility shall file a copy of such contract with the Commission.

"(b)(1) Within 60 days after the date a contract is filed with the Commission under subsection (a) of this section, the Commission shall determine, after notice and an opportunity for a hearing, whether the coal producer that is a party to such contract is a captive coal operation.

"(2) If the Commission determines under paragraph (1) of this subsection that a coal producer is a captive coal operation, the Commission shall then determine, after notice and a hearing, whether the price charged for the sale of coal pursuant to the contract filed with the Commission is reasonable. If the Commission determines that the price is not reasonable, it shall establish the price to be applicable to the sale of such coal.

"(c) If the Commission establishes the price for the sale of coal to a State regulated electric utility in accordance with this section, the Commission may petition the appropriate State regulatory authority for the initiation of a ratemaking proceeding or other appropriate regulatory proceeding relating to rates or rate design.

"(d) As used in this section—

"(1) The term 'captive coal operation' means—

"(A) a coal producer that is owned or controlled by the State regulated electric utility to which it sells coal pursuant to a contract; or

"(B) a coal producer that, pursuant to an agreement with such a State regulated electric utility, mines coal which is owned or controlled by such electric utility.

"(2) The term 'control' has the meaning given such term in section 10102(6) of title 49, United States Code.".

(b) The table of contents of the Public Utility Regulatory Policies Act of 1978 is amended by adding after the item relating to section 608 the following new item:

"Sec. 609. Commission review of certain coal prices.".

H.R. 7205

By Mr. LEVITAS:

—Page 60, after line 4, insert the following new section:

SEC. 512. None of the funds appropriated by this Act may be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

EXTENSIONS OF REMARKS

ENTERPRISE ZONES: URBAN ECONOMIC REVITALIZATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. GARCIA. Mr. Speaker, for over 2 years, Congressman JACK KEMP and I have sponsored the urban enterprise zone legislation. This desperately needed economic development legislation has been designed to promote revitalization in distressed areas.

The current situation in most American inner-city areas is very grave, characterized not only by record numbers of small business bankruptcies and the highest unemployment rate in 50 years, but also by human suffering, helplessness and deprivation. The reduction in central-city economic activity has brought about a corresponding deterioration of employment opportunities for the people living in those areas. Minorities, low-income persons and female headed households have been particularly hard hit, since they are increasingly concentrated in such communities. Many inner-city areas are in the throes of continually worsening economies, because of business disinvestment.

The Federal Government must provide for the reestablishment of opportunity producing incentives in areas where they no longer exist, but once did. Such incentives, as contained in the enterprise zone legislation, should serve to attract businesses to neighborhood areas which face severe depression, unemployment, and poverty. The incentives should also be designed to aid existing firms to expand as part of a larger strategy to restore economic vitality to our inner cities. However, let me say now that the zones cannot work alone and indeed will need the continued support of other Federal programs including job training efforts such as Job Training Partnership Act recently passed by this Congress.

For the benefit of my colleagues, I have included an article that I wrote earlier this year and appears in this month's edition of USA Today magazine highlighting the desperate need for and the major provisions of the enterprise zone proposal.

It is my hope that we can move this legislation in the days ahead. It does need some modifications such as a startup capital provision to assist new and expanding businesses. However, as one more tool for local officials to combat economic decay, it is important for the Congress to act as soon as possible.

[From USA Today, November 1982]

ENTERPRISE ZONES: RESTORING ECONOMIC VITALITY TO INNER-CITY AREAS

(By Robert Garcia)

The history of urban development is the history of opportunity development. This seemingly simple principle lies at the base of the reasons for the development of every great metropolis that has ever existed. The factors comprising the opportunity development—a fortress location, an intellectual or religious sanctuary, or a port location—have changed, but the tenet of opportunity development has remained constant.

Since their founding, American cities' opportunity development has been based on the principle of private sector development, for it is only in the private sector that any lasting sense of accomplishment and belonging have occurred, and it is only in the private sector that assets may be accumulated and a city's and neighborhood's wealth created. The maintenance of a vigorous, productive private economy is critical if our cities are to thrive. It is especially vital for the central-city poor, for a productive private sector represents the only institution in society capable of permitting the poor to escape their poverty. A weak private sector simply does not offer them that opportunity.

The notion of the proper role of the Federal government in encouraging, buttressing, or reacting to private sector activities leading to opportunity development has been debated since the launching of our federalist system. Whatever the ideological or partisan persuasion, however, it can irrefutably be stated that, to the extent that a government program increases the opportunities of some or all citizens without correspondingly decreasing the opportunities of any citizens, that program has provided us with an example of the proper role of government in bringing about American urban development.

The enterprise zone proposal that I have developed, along with Congressman Jack Kemp (R.-N.Y.), is designed to use the vitality of the Federal tax code as an incentive for cities to assist in the creative regeneration of poor urban neighborhoods, and to do so in ways that will benefit the very people who now dwell in those neighborhoods. Enterprise zones will, in short, enhance and expand the opportunities for individual and institutional economic opportunity development.

The program will be discussed in detail later in this article. To initially describe the concept though, specified zones will be selected and identified by their high incidence of poverty, unemployment, and general deleterious conditions. Various tax incentives will be offered to encourage new business to locate and grow in distressed inner-city neighborhoods, and hire and train economically disadvantaged individuals. Local and state governments will be required to offer incentives of their own, such as improved municipal services or rehabilitation of infrastructure, in order to contribute to the success of the zones. The enterprise zone program has clear and fundamental purposes, namely to create jobs, spur private investment, and strengthen local economies.

In 1891, Lyman Abbott, writing in *Darkness and Daylight*, a book describing urban conditions at the brink of a new century, asked:

"What shall we do with our great cities? What will our great cities do with us? These are the two problems which confront every thoughtful American. For the question involved in these two questions does not concern the city alone. The whole country is affected, if indeed its character and history are not determined by the constitution of its great cities. . . ."

Nearly a century has not changed the timeliness of Abbott's remarks. What shall we do with our nation's cities, in order to restore their vitality and diversity, and promote the rejuvenation of all sectors of urban society?

I firmly believe that enterprise zones can play an important part in helping to restore the threads of vigor and optimism to our urban fabric. However, no one, and certainly not I, claims that enterprise zones will be the remedy for all that ails urban America. They most definitely have not been devised to replace existing vehicles of Federal assistance to distressed cities, and I have adamantly opposed every effort to attach to them suggested mandates for deregulation, subminimum wages, and elimination of other vital Federal urban programs designed to provide jobs, housing, and assistance for inner-city economic revitalization. I do not intend for this bill to stand alone. I do intend for the enterprise zone program, concomitantly with Urban Development Action Grants, the Economic Development Administration, job training, and other programs, to provide a mechanism for the useful, flexible, and creative reinvolvement of the private sector in such areas to bring about economic regeneration.

CENTRAL CITIES TODAY

The current situation in most American inner-city areas is very grave, characterized not only by record numbers of small business bankruptcies and the highest unemployment rate in 50 years, but also human suffering, hopelessness, and deprivation. A description of the current urban situation will dramatically illustrate the need for a continued strong Federal role in local economic development, which includes retaining and strengthening existing assistance mechanisms, and formulating new ones, such as the enterprise zone program.

Declining local economies: Many inner-city areas are in the throes of continually worsening economies, because of business disinvestment. Many of these areas are dependent on economic sectors such as manufacturing, which are declining nationwide. They have been unable to attract newer industries, or secure the expansion or prevent the demise of existing businesses.

Unemployment: The reduction in central-city economic activity has brought about a corresponding deterioration of employment opportunities for the people living in those areas. Minorities, low-income persons, and female-headed households have been particularly hard hit, since they are increasingly concentrated in such communities.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

In April, 1982, the national unemployment rate hit 9.4 percent, the highest level since the Great Depression. This figure, however, belies the unemployment crisis in inner-city areas. During this same month, the unemployment rate in New York City approached 10 percent—representing hundreds of thousands of persons looking for work, but unable to find it. In my South Bronx Congressional district, it was conservatively estimated that the rate hit 30 percent. Moreover, none of those figures include persons identified by the National Bureau of Labor Statistics as having "dropped out of the labor force," so discouraged that they no longer seek jobs.

Unemployment levels among urban youth, and especially among minority youth, tend to be much higher than those of adults. Currently, fully 35 percent of New York City's youth, and over 50 percent of those in the South Bronx, are unemployed.

Poverty: The incidence of poverty is clearly linked with the opportunity for gainful employment. The nation's needy and declining central cities account for almost all of the growth of poverty. Almost 40 percent of this country's poor live in central cities. In general, more than 15 percent of the urban population lives below the poverty level. Yet, these areas often offer the poor few opportunities. In New York City, 18 percent of the population may be characterized as poor—and 29.3 percent of the residents of the South Bronx live in poverty.

Poverty in this country is not race or sex neutral. Although minorities comprise about 25 percent of the population of the nation's cities, they make up 45 percent of the central-city poor. Families with female heads comprise 40 percent of this total. In the last decade, the rate of increased incidence of poverty for these groups has far outstripped the rates of other segments of the population.

Infrastructure: Central cities, particularly those in the northeast and midwest, are simply wearing out. Their infrastructure problems are so great that nearly half of the local officials polled by the National League of Cities in 1980 cited this problem as "critical" or "severe." In fact, urban infrastructure is disintegrating so rapidly that economic revitalization is hampered, further undermining the local economic base.

In a recent report, *Business Week* magazine noted that urban infrastructural decay threatens economic growth, and that a series of forces have converged which may further inhibit recovery unless reversed. These include substantial reductions in Federal aid, reduced tax bases, exorbitantly high interest rates, and reduced attractiveness of state and local bonds along with increased competition for potential investors.

In almost every locality, particularly in older inner-city areas, streets and highways need attention, bridges are in disrepair, water and sewer systems are leaking, and mass transit is in difficulty.

Eroding fiscal capacity: Declining economic activity has eroded the fiscal capacity of many cities. This has occurred directly through the loss of taxable business and indirectly from the loss of population and income. Recession and inflation during the 1970's have exacerbated their fiscal plights, resulting in budget balancing with only slim margins for error. A number of cities have even tottered at the edge of the fiscal abyss in recent years.

In short, there is a lot wrong with central cities today. Enterprise zones will certainly be no magic potion, no straight-shot cure for all of this. Such conditions require a whole battery of economic development tools—grants, loans, incentives, and other assistance—to combat them. The targeted tax incentives of the enterprise zone program promise to be a useful addition to existing development programs.

THE KEY TO URBAN RECOVERY

In its final report in 1980, the President's Commission on Neighborhoods emphasized again and again the critical position of neighborhoods in determining the tempo and tone of urban life. Describing cities by their buildings, monuments, or financial centers ignores, as the Commission noted, "the persistent pulsing of life in these communities within communities" which city residents call home. In other words, the quality of life in any city is determined by the condition of its neighborhoods and communities, the places where people actually live and work.

What comprises a community? My experiences growing up in the South Bronx have given me a firm and practical understanding. A community consists of at least three things: jobs for the people who live there, housing for those who wish to call the community their home, and business establishments for shopping and work. That is how I remember the South Bronx of my youth, a vibrant neighborhood where my family and neighbors worked at local shops and factories, spent their wages at neighborhood stores, and lived no more than a few blocks from either. Not only was this arrangement convenient, but it created a real community and assured the constant recycling of our dollars in our neighborhoods.

This scenario was repeated thousands of times for other South Bronx residents, for other New York City citizens, and in central cities all over the country. Dynamic local economies, centered in the communities and which utilized the multiplier effects of resources retained in the neighborhoods, led to economic vitality in the community and contributed to the over-all financial and social health of the cities.

Today, however, many business and commercial trends have converged which have resulted in the exclusion, in many communities, of neighborhood-based commerce from the prevailing currents of economic activity. Both government policies and private sector forces have combined to undermine the foundation of many neighborhoods. For communities to be reintegrated into the economic mainstream of their cities, the conditions under which local entrepreneurial undertakings can flourish must be restored.

In order for the prevailing tendencies towards economic decentralization and conglomeratization to be overcome, calculated and reasoned public intervention is necessary to minimize the effects and, if possible, eliminate the causes of harmful distortions in economic behavior. In devising the mechanisms for such intervention, we must be as precise as is possible in our thinking about what the Federal government can and can not do to help our cities.

As I mentioned at the outset, the key to areawide development is opportunity development. This is especially true in local neighborhood areas. The Federal government must provide for the reestablishment of opportunity producing incentives in areas where they no longer exist, but once did. Such incentives should serve to attract businesses to neighborhood areas which face severe depression, unemployment, and poverty.

Enterprise zones will provide such incentives for entrepreneurs to return to previously shunned areas and contribute to the restoration of viable and self-sufficient urban neighborhood economies. The wealth of the community would once again have an opportunity to be retained in the neighborhoods, providing a strong base for the entire city. In recent years, the private sector—frequently with Federal assistance or as a result of Federal actions—has compounded neighborhood problems. Through enterprise zones, the private sector can now help solve them.

Federal tax and credit policies influence, to a great degree, the costs of labor, land, capital, energy, and other resources—all of which are important factors in business investment and location decisions. Taxes affect the relative cost to business of new capital, as opposed to existing plants, and of land in growing areas, as opposed to land whose value may be falling. As a result, the Federal tax system is probably the most pervasive Federal influence on patterns of economic development.

Enterprise zones have been designed fundamentally as a tax policy, aimed at overcoming several existing provisions of the Federal tax code which have reinforced the economies of growing areas and hindered the investment attractiveness of older urban areas. The Accelerated Cost Recovery System depreciation scheme enacted in 1981 makes it preferential to invest in new industrial and commercial structures and equipment, rather than existing capital stock. Non-targeted, tax-exempt financing of industrial and commercial development has proven to be a major factor in the march of investment from inner-city neighborhoods to fiscally healthy suburban locations.

The enterprise zone proposal provides the legal momentum to swing the tax pendulum the other way, to favor both new development and rehabilitation and improvement of existing facilities in the nation's distressed communities. It offers additional investment credits, employee salary credits, and guaranteed maintenance of tax-exempt financing targeted to these areas.

Targeted economic development policy is most effective when used in conjunction with existing programs designed to ease the plight of inner-city residents. Enterprise zones offer the administrative framework to direct tax incentives to firms in geographically specific areas, where they can be coordinated with other policies and programs in order to make the zone neighborhoods more attractive to investment and provide suitable living environments for their residents.

THE ENTERPRISE ZONE PROGRAM

The enterprise zone proposal provides a real opportunity to reverse the historic patterns of investment discrimination against inner-city neighborhoods. This legislation would make the inner cities attractive places for businesses to develop and grow, through a series of carefully chosen tax and investment incentives that will create jobs and promote the physical rehabilitation of major urban areas such as the South Bronx.

In developing the following program, my colleagues and I have benefited enormously from the substantial contributions of community groups, city residents, local activists, representatives of minority groups, mayors and city officials, small businessmen and women, and organized labor groups. All are committed to making America's cities better places to live and to work.

Throughout the debate and subsequent modifications to the first enterprise zone proposal, however, the purpose of the legislation has been steadfastly maintained. It is still designed to create jobs, promote private investment in communities, and strengthen neighborhood economies. Above all, it is still designed to enhance the community ties which connect neighbor to neighbor.

The proposed enterprise zone program features a tax incentive package with the following provisions:

Capital incentives

An additional investment tax credit for capital investments within a zone, ranging from three percent for personal property, to 5 percent for capital equipment, to 10 percent for the construction or rehabilitation of commercial, industrial, or rental residential structures.

Elimination of capital gains taxes on the sale of qualified zone property.

Continued availability of Industrial Development Bonds to finance small businesses locating in enterprise zones.

Labor incentives

Any employer could claim a 10 percent nonrefundable tax credit, up to a maximum $1,500 per worker, for payroll paid to zone employees in excess of that paid in the year prior to zone designation.

Employers would be permitted to take an additional credit for wages paid to disadvantaged individuals (primarily Aid to Families with Dependent Children, Supplementary Security Income, or general assistance recipients, or similar low-income individuals) hired after designation of the zone. This credit would consist of 50 percent of the wages paid during each of the first three years of employment, and phase out by 10 percent per year from years four through seven.

Zone employees could claim a five per cent nonrefundable income tax credit for income generated by zone employment, up to a maximum of $450 each.

Complete protection for the minimum wage and all worker health and safety standards is maintained as well.

Other incentives

Zone firms could carry forward operating losses up to 15 years.

Investment and employment credits earned by zone businesses could be carried forward for the life of the zone.

Foreign trade zones would be promoted within enterprise zones, and applications would be given expeditious and special consideration.

Designation of zone: Either state or local governments may nominate an area for designation. This must be done by legislative action. A "confirming nomination" by the other government would be necessary before the proposal would be considered for designation. An area so nominated would have to be characterized by distress, pervasive poverty, and high unemployment; lie within the jurisdiction of both nominating governments; contain a minimum population of 4,000 if within a Standard Metropolitan Statistical Area, or 2,500 if without; and be the target area for legislatively authorized state and local incentives.

The application of an area meeting these basic requirements would be placed in a pool of qualifying applicants for competitive evaluation. The state and local package of contributions to a nominated enterprise zone will be the key factor weighed by the Department of Housing and Urban Development (HUD) in the competition for designation. Each jurisdiction will have to demonstrate the quality and strength of its proposed incentives, their applicability in addressing local development needs, and their ability to spur investment and lead to job creation.

From this qualifying pool, the Secretary of HUD would be empowered to designate up to 25 enterprise zones annually as entitled to the Federal investment incentives. The designation process will continue for three years, with a maximum of 75 Federal enterprise zones authorized.

The enterprise zone approach relies heavily on the initiative of local governments to identify both their economic needs and, in turn, the appropriate type of investment which will assist in the alleviation of their unemployment and help supplement their declining tax bases.

ADDRESSING URBAN PROBLEMS

The enterprise zone plan has been designed to promote economic revitalization of inner-city areas. It features tax incentives to entice jobs and businesses, particularly small businesses, back into decaying areas, thus encouraging private sector activity and investment which will directly address some of the most pressing problems facing our inner cities.

Job opportunities: The enterprise zone provisions place significant emphasis on direct job-generating inducements. Companies which stand to realize the greatest benefits from employment tax credits, therefore, will be the more labor-intensive businesses and industries.

The tax credit level, at 50 percent of wages for targeted groups will focus attention on hiring economically disadvantaged persons, and in large numbers. The seven-year qualifing time frame for the credits will encourage employee training by zone firms and hiring of economically disadvantaged persons into career ladder positions.

In addition, the plan directs attention to the problem of potential indiscriminate worker displacement in existing firms at the outset of zone designation by basing the wages subject to the credit on the amount of total company payroll increases which have occurred since the year before the enterprise zone was established.

State and local involvement: The plan directs attention toward the formulation of a development strategy which matches localized needs with available state and local resources. The legislation mandates state and local cooperation in developing a workable strategy for the economic revitalization of the zone area, and the identification of resources to implement the strategy.

Furthermore, the bill broadens the scope of state and local contributions beyond simply offering tax relief by inviting other forms of incentives and commitments. Finally, the program would encourage direct participation of public and private organizations.

No one sees the current enterprise zone proposal as the ultimate urban tool. The legislation will soon be the subject of hearings in Congress which will refine it further. Several issues still need to be resolved in order to make it as useful as possible to the full spectrum of potential zone participants. For example, a stronger venture capital provision must be developed, in order to encourage the flow of startup money to small and minority businesses. Currently, although small businesses are often pioneers in revitalizing an area, some types will not be able to take full advantage of the proposed incentives.

Legislative approved by Congress must be sensitive to the need for a high degree of community involvement during the process of designating and developing plans for the enterprise zones. The zones will work best in conjunction with the input and efforts of local development organizations, the city, and, most importantly, the many neighborhood organizations already committed to urban revitalization. Finally, firm guarantees of the continuation of vital urban programs, such as those providing assistance in reconditioning or building infrastructure, must be obtained.

Our nation will continue to grow in the years ahead. We must strive to ensure that economic expansion does not exclude certain segments of our population, areas of cities, or regions of our country.

The potential for urban revitalization is great. The ultimate goal of an enterprise zone program is to lay the foundation on which to rebuild and reinvest in our nation's distressed communities. For our cities to regenerate, they must yield opportunities for personal, business, and institutional development. Opportunity development has been, and will continue to be, the key to maintaining and enhancing a livable and viable urban environment.●

A TRIBUTE TO CLARA MARKOWITZ FRANKS

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. GUARINI. Mr. Speaker, I am saddened to report to you and our colleagues in the House that Clara Markowitz Franks, who led some 50,000 volunteers at the Deborah Heart and Lung Center, died on October 21. Mrs. Franks and her volunteers worked to help guarantee that no one who comes to Deborah will ever have to pay for their care, no matter how expensive the specialized treatment may be. Mrs. Franks, who was 80 years old, devoted nearly a half century of her life to the internationally famous institution.

Deborah, which is comprised of three health care units, Deborah Heart and Lung Center, Deborah Hospital Foundation, and Deborah Cardiovascular Research Institute, is located in Browns Mills, N.J. Deborah, named after the Old Testament prophetess who inspired the Israelites to unite and triumph against their oppressors, has earned a reputation over long years as being one of the best providers of care for adults with heart and lung diseases and children with congenital heart defects. Deborah made headlines all over the world in the last year through its humanitarian efforts to continue providing hospital care to Polish children suffering from heart ailments despite the martial law the noble people of that land live under.

Mrs. Franks, who had come to America from Poland with her parents

when she was 4 years old, began her long association with Deborah in 1934, when she entered the Deborah Sanitorium as a tuberculosis patient. In those years Deborah was no more than a few summer bungalows gathered in the Jersey pines. Health care consisted of fresh air, sunshine, and plenty of rest.

The hospital's regimen, and its destiny, changed when Dora Moness Shapiro bought the hospital with an eye toward expanding and modernizing services there. The energetic benefactress quickly began her program, and it was then that young Clara Markowitz Franks joined the staff. Starting as an office worker, Mrs. Franks rose to the positions of hospital superintendent, then administrative assistant to the national president, and finally to the posts she held at the time of her death: vice president of development and New Jersey regional director of Deborah Hospital Foundation and Deborah Heart and Lung Center.

My good friend, Stanley H. Fryczynski, Jr., of Bayonne, is the president of Deborah Heart and Lung Center, the Deborah Hospital Foundation, and Deborah Cardiovascular Research Institution, and worked closely with Mrs. Franks. He observed:

Clara Franks was Deborah. She is the reason Deborah survived the past 48 years. She served as a constant model of determination and concern. Everyone who knew her loved her; we will all miss her special warmth that touched everyone.

Mr. Fryczynski, whose own association with Deborah began 14 years ago, expanded upon Mrs. Franks' role with Deborah:

Deborah, with 300 supporting chapters throughout America, thrives as a result of this extensive network of volunteers, who devote many thousands of man-hours to Deborah's mission. Mrs. Franks developed this chapter system back in 1939, and nurtured its growth over the years. As titular head of these branches, Clara Franks gave her tireless support to the center. She expected no less devotion from her volunteers, and the relationship has mightily benefited Deborah. The volunteer network year after year out-does itself in support of Deborah, and the volunteers have displayed a remarkable devotion to Mrs. Franks and the example she set.

The funds raised through this network permit Deborah to continue its tradition of never rendering a bill no matter what the treatment costs or to whom the treatment was applied.

Mr. Fryczynski continued:

Clara Franks played a direct role in every step of the institution's development: from the complex of bungalows where she first went for treatment, to the internationally famed 155-bed hospital Deborah is now. Until her death, she was involved in efforts to expand patient care, health education, and research facilities. Throughout her years at Deborah, she was committed to insuring that all who needed the specialized care that Deborah offers could be treated without regard to race, religion, national origin, or ability to pay.

Even though Deborah has opened its doors to the children of the world, it has never turned down an American child for treatment because it was overextended, nor has it ever accepted Federal funds for the work it does so well. Besides its work with American children, Deborah has treated children from 17 other nations. As I mentioned earlier, Deborah is a lifesaver for Polish children with congenital heart defects, despite the political difficulties which separate our nations. When President Reagan imposed an embargo on flights between America and Poland, the program was severely threatened. As a solution, these children were flown into Canada, and then brought to the United States. Polish Americans, through their contributions to the children's transportation, helped keep this particular life saving mission going. Deborah continues to treat four Polish children a month while housing their mothers and training Polish doctors in the specialized treatment. These children would have died had they been left in Poland, where Deborah's medical technology is not available. "These doctors are incredibly devoted," Fryczynski noted. "There has not been one defection in the 18 months we've had the program; they always go back to help solve the problem at home in spite of the personal difficulties martial law imposes on them."

Deborah's noteworthy record of humanitarian medical care for mankind's most difficult cases has attracted worldwide attention. Soon, Deborah will be feted at a fundraising gala event. International celebrities have pledged their help so that Deborah can continue its remarkable mission. Yet, what Deborah relies on day in and day out is the volunteer network that Clara Markowitz Franks established and administered. Attracting concerned humans to its cause, the level of volunteer contributions ranges from a few hours yearly in fundraising to the presidency of the program; Stan Fryczynski accepts no pay for his efforts. They volunteer because they have read of Deborah and its works or because their lives were touched by the tragedy of a child's congenital heart illness.

Many of Deborah's volunteers came aboard as a direct result of Clara Franks and her phenomenal work. Of course, Mrs. Franks' remarkable lifetime of selfless concern for others brought forth important accolades from admiring organizations and people. Among them are Deborah's first President's Award and another award presented to it last year by former President Gerald Ford at the dedication of the new north wing at Deborah. The nurses' residence at the hospital is named in her honor. Stan Fryczynski also noted that, most recently, Mrs. Franks was named the charter member of the new Deborah Children of the World Heart Club. The club was named to symbolize fulfillment of the goal of providing treatment to children in need from around the world.

Mr. Speaker, America's greatest institutions are so effective because of the many men and women who contribute their time and talents freely to the causes they espouse. It is fitting that Mrs. Franks, who lived as an example of hard work and concern for the needs of others, became the leader of 50,000 others who share her concern and devotion.

Just recently Americans observed "National Volunteers Week." To Clara Franks, we can only say "thank you" by remembering her lifetime of devotion and diligence and by doing what each of us can to help ease the suffering of our fellow humans. Her memory will continue to serve as an inspiration to us all.●

TRIBUTE IN HONOR OF LOU PAVIA, A GREAT AMERICAN AND DEVOTED FAMILY MAN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. BIAGGI. Mr. Speaker, each of us, I am sure, has experienced the heartbreak of losing a loved one, or a friend who has been particularly dear to us. That period of profound loss, and the subsequent readjustment of our lives, is a very trying and soul-searching time during which we evaluate ourselves along with the memory of those we have lost, and come to realize that with such great losses, a part of us, and what we had shared and valued, is gone too.

I recently endured one of the most sorrowful periods of my life, having seen my youngest brother lose his life in a valiant battle against cancer. Such a part of me and all that we were in life together is now gone too. At his Funeral Mass, the main celebrant told us who were experiencing the physical pain and mental anguish of grievous loss that we should try to view his passing as bittersweet, bitter in the sense of the complete separation from a loved one, but also sweet in the understanding, which is the teaching of the Catholic Church, that death is but a passage to an eternal, peaceful and glorious rest, away from any pain and suffering that is sometimes life, and in reward for all the work and gifts contributed to life during his lifetime.

Mr. Speaker, I mention these personal references because I understand all too well, and wish to share, the feelings of extreme loss now being ex-

perienced by close friends, and the family of Lucio G. Pavia, following his untimely death.

Lou Pavia was an exceptional man, a great American, whose heartfelt interest in serving the veterans of our country, and his extraordinary efforts on their behalf, made him one of the foremost leaders of veteran causes, and a primary official of the Veterans of Foreign Wars in New York State. Even more importantly, he was a loving husband to Virginia Ann, a devoted father to Robert Lucio and Deborah Joan, and a proud grandfather to Robert Lucio Pavia II.

The memory of Lou Pavia is that of a very warm-hearted, compassionate, and giving man who, immigrating to this country from Italy at a young age, truly appreciated and took great pride in his adopted country, and worked tirelessly in a personal commitment to render service to others, and particularly to his veteran comrades and their families in need.

Lou Pavia suffered an untimely death last summer, and his void has been felt by his many friends and admirers everywhere. His memory will live on in all those who were fortunate enough to be touched by his loving kindness. He has given us the example of a resourceful, community minded, and self-achieving man, so proud of his noble Italian heritage, who realized the American dream of progress and accomplishment, and made a share in that dream possible for so many others less fortunate than himself.

In speaking of Lou Pavia, no words could be more meaningful than those expressed by his wife and daughter in a touching and moving biography of tribute. I would like to share the love and gratitude of that message with you here today, and have you envision the personage of this humble, and yet great man.

To the loving family he left behind, we express our deepest sadness at their great personal loss. We trust that they will enjoy happiness and success as Lou would have wanted, and for which he had devoted so much of himself. May he now enjoy an eternal reward for all the wonderful qualities he shared with so many.

The biography follows:

BIOGRAPHY OF LUCIO (LOU) GENE PAVIA

(By Virginia Ann Pavia and Deborah Joan Pavia)

Lou Pavia was born on June 21, 1923 in Villa Santa Maria, Abruzzi, Italy, the second of four children of Domenica and Francesco Pavia.

In the year 1927, his father, having established himself in America as a citizen and a chef, sent for his family: wife Domenica (a seamstress), first born John (age 6), second born Lucio (age 4), and his daughter Dora (age 2). Boarding the vessel Roma from Naples, Italy and landing on Ellis Island, U.S.A. on November 6, 1927, Lou often told of how elated the children were when they first set eyes on the Statue of Liberty.

The family first settled on Thompson Street in Greenwich Village, N.Y.C., where they lived for 3 years. They then moved to 104th Street and Lexington Avenue where they resided for an additional 3 years and where Lou's youngest brother Anthony was born.

At the age of 10, Lou and family moved to 3031 Holland Avenue, Bronx, N.Y., where they permanently settled.

Lou was always an outstanding student. He went to P.S. 76 and Evander Childs High School in the Bronx. He was an A+ student, and told of how the Principal would excuse him from taking tests because of his excellence over the other students. While in High School he was on the Gym & Traffic Squads. He tutored other students in their studies at the request of his teachers. Because of his knowledge and grades, he was known as the "Professor". Lou's dream was to become a lawyer, but because of finances at home, he was forced to take on a full-time job and discontinue his studies. Lou graduated Evander Childs H.S. on January 29, 1941 as an honor student, and with the highest regents score in the city of New York in Bookkeeping.

The day after graduation he turned his part-time job into a full-time one, as the Produce Manager of an A&P chain.

On January 19, 1943, Lou, with great pride and patriotism, was indoctrinated into the United States Army. His combat service included from September 8, 1943, the invasion of Salerno, Italy with the 36th Infantry Division, through V-E Day, Germany on May 8, 1945. He was decorated with 8 Battle Stars, before his Honorable Discharge as Corporal on November 29, 1945.

Lou was out of the service less than 2 weeks when he began working for the Veterans Administration in Manhattan. Even at the young age of 22 he recognized his interest in serving his fellow comrades.

In the summer of 1946, while going home on the subway from work, he spotted a tall, young, attractive blonde. Impelled to introduce himself he first met (Virginia) Ann Brandl. Although Lou's High School Yearbook quoted him as saying, "I would like to settle down with a short, brunette", Lou and the tall, blonde Ann where married on July 31, 1947.

Moving into an apartment at 1025 East Gun Hill Road, Bronx, Lou and Ann set up their loving home. A year later, wanting children, they became the proud parents of a son, Robert Lucio.

Having a wife and son to support, Lou realized that although he was dedicated to his fellow veteran, it was time to improve his income. He started working for Rusco Storm & Screen Windows Co., in Mt. Vernon, N.Y., installing storm doors, windows, etc. He was now able to move his wife and son to a larger apartment in 2091 Webster Avenue.

In 1952 Lou finally got his short, brunette. Ann gave birth to their daughter, Deborah Joan.

Rapidly increasing his knowledge of the storm window business, in 1953, at the age of 30, Lou established his own Corporation. As single proprietor and Corporate President of the Mt. Vernon Windows Inc., he always made time to teach and guide his employees. The same men who worked for Lou then, have their own businesses now because of Lou's unselfish contribution. He hired his brother Anthony, to help him pay for his school books and tuition as Anthony was to become one of the top Doctors of Chiropractic medicine in the State of New York.

In 1954 Lou was able to once again serve his fellow veteran. He learned about a great organization, the Veterans of Foreign Wars. He immediately joined and became an active member. Upon learning about a fund-raising raffle, he donated a storm door, to help their cause. By 1959 Lou had already been elected Commander of V.F.W. Gun Hill Post #271. During his regime, at this time and for 23 years more as House-Chairman and Bookkeeper, Lou organized fund-raising dinner-dances, raffles, clam-bakes and other functions for the betterment of his Post and the community. Lou was on the V.F.W. committee to raise $10,000 for the opening of Misericordia Hospital. There is a picture of the committee and a plaque displayed in that hospital still today.

Lou felt strongly, and fought with State Assemblyman Bill Eggert, Judge Paul A. Fino and his fellow V.F.W. committee, to keep open Mt. McGreggor Veterans Convalescent Hospital. Their goal was victorious.

In January of 1959 Lou presented a plaque to 17 year old, Louis Graves on the "Essay for the Unknown Soldier", along with American Chairman Edward Papantonio.

Lou always helped his fellow comrades and the people of the community get jobs, hospitalization, welfare benefits, insurance benefits, pensions, housing and widows death benefits. He loved his fellow man and showed it not with words but with action. He helped them either by his own knowledge or by his influence and friendships with honorable people, such as Congressman Mario Biaggi, Executive Assistant to Congressman Biaggi—John D. Tracy and respectable V.F.W. officers, New York State Adjutant—Joseph T. Gumo, Veterans Administration Service Office—William Sembler, and Chief Administration Director—Pete Pasquerelli.

Lou cooked, organized and ran affairs for all World War I and II commemorative occasions, and the Last Man's Club. Later to be the founder of "Old Timers Nite", he was known as their "Godfather". He ran annual Commanders dinners, installation dinners and fund-raising affairs for Post #271. He also brought tables of members to support other V.F.W. post functions. Lou stopped ethnic slurs among fellow comrades, toward one another.

As House-Chairman, he donated the Post hall to the Tre-Ford Little League and the Castle Hill Little League for their meetings. He donated the Post hall for the practice of the Senior Drum Corps, for years, and he donated the hall and ran affairs for the 47th Police Precinct from 1969-1975. He also donated the Post hall for Boy Scout meetings and the Hibernian meetings and affairs. Lou ran weddings at which he catered and hired men from the Post, all to raise money for his Post. He also ran New Year's Eve Dinner-Dances for years, again to raise money for his Post #271.

Lou started a Junior Drum & Bugle Corps while he was Post Commander in 1959, until the boys had to leave for the Vietnam War and the Corps dissolved in 1966. The Gun Hill Lancers was the name the Junior Drum Corps was known by. By starting his Corps, Lou kept 100+ children off the streets of New York with practice, and kept many out of trouble who were headed in the wrong direction, by being not only the Director of the Corps, but a father to boys and girls who needed guidance and help with life's problems. At the same time caring for and taking care of his own two children, who were also members of the Drum Corps, he

deepened their horizons, keeping them on a straight and narrow path to become scholars at school, to socialize, to have respect for their fellow man—everything every father should be. He always took the time to listen and guide them, for his two children were his top priority.

In 1964 Lou was asked by Art Vater, Past State Commander of N.Y. and Convention Director to help him run the National V.F.W. Pageant of Drums in New Jersey. Lou recruited men to help out with field and ambulatory services, for children 12-18 years of age. This was the beginning of his services in the National Band & Drum Corps Committee. In 1969 he was appointed Vice-Chairman and held this position until his untimely passing.

During this time, in 1957-58, Lou moved his family to 3306 Seymour Avenue, closed his storm window business and went to work for the Prudential Insurance Co. as an insurance agent in their Parkchester office, later to be transferred to Baychester office, where he received the first "Civic Leadership Award & Plaque" in 1968. The picture remains in the main office of Prudential. Lou later received his insurance broker's degree, and became licensed in New York, New Jersey and Connecticut.

Lou was honored by Fordham University, as Post Commander, to present the outstanding R.O.T.C. Cadet with a watch donated by Gun Hill Post #271 in 1959, at a beautiful program.

In 1961, Lou gave a Christmas party to the Orphan Children, held at Post #271, along with V.F.W. members who contributed gifts.

Lou's leadership and popularity led him to be elected as V.F.W. Bronx County Commander from 1964-65. He continued running annual Post and County, Past Commanders and Past Presidents, installations and dinner-dances, being host, cook, seating coordinator, hiring bands and uniting fellow comrades and sisters by inviting other posts to participate and by going to other posts to continue the relationship. Lou would also invite political friends to participate. In 1965 Lou honored Councilman Mario Merola with a Life Membership to the V.F.W.

Lou and his wife, Ann traveled throughout the U.S.A. promoting friendship and comradeship. They were loved by so many people in all categories throughout the states. Lou never lost this quality of life until the day he was no longer with us. His convention room, big or small was always opened day and night, welcoming, uniting, feeding and laughing with comrades, sisters and friends of the V.F.W. The V.F.W. has lost a valuable and beautiful human being.

In 1964, Lou was invited to be on the Honor Line with Mayor Wagner and Major General Roger J. Browne, in a Loyalty Day Parade in memorial to General McArthur.

On Loyalty Day he was once Grand Marshall of the parade on the Grand Concourse and Poe Park; he was Adjutant General & Chief of Staff for Memorial Day parades. In Westchester County, Lou and his son, Robert were judges on Drum Corps performance for many of their parades.

Lou participated in, ran, marched and sat on the Honor Reviewing Stand, at all parades (Veterans Day, Memorial Day, Loyalty Day, etc.), and later invited political figures back to his Post No. 271 for something to eat and drink, which he prepared, or made arrangements with fellow comrades to have ready. This he did ritually for 20 years. Lou presented Congressman Mario Biaggi with a plaque on Veterans Day at Pelham Bay Memorial Park for his services to the veterans. Lou and Congressman Biaggi were on television twice together, fighting for the causes of the veterans: the first time to keep the Kingsbridge Veterans Hospital open, their goal victorious, and the second time to help the Vietnam veteran receive all benefits due him.

Being on the committee of the V.F.W. Bronx County Ball and as Booster Chairman, Lou helped run Balls at which Councilman-at-Large Aileen Ryan was always honored along with other politicians. The Day after the Ball all comrades and sisters, along with their spouses, were invited by Lou to the Gun Hill Post to socialize and have dinner and drinks compliments of the Post. (What beautiful days they use to be when you kept on making new friends). After which, it was a ritual to drive Art Vater and family back to their hotel in Manhattan at 2 or 3 o'clock in the morning.

Lou was honored by being a Guest along with the wife, Ann (whom he took everywhere he went) at Post functions, Bronx County affairs, District affairs, Department, State and National affairs and functions, and all Conventions, County through National. Lou loved and worked with all levels of people for over 20 years.

Lou could always depend on a committee of comrades, from his Post and from other Posts, to work along with him. The men would always come through for Lou, in whatever he endeavored.

Lou donated the Post hall to the Police Athletic League's Warriors Drum Corps for their meetings and for all the Eastern Circuit, of which his Drum Corps was one. Till today the Kilts, Fife & Drum Corps practice at Gun Hill Post #271, every Thursday night and participate in many parades.

In 1966, Lou was appointed by the Honorable Joseph Lombardo as Committee Chairman for the 67th V.F.W. National Convention.

Lou was also President of the North Bronx Republican Club from 1970-1972, and a member chairman for many of their affairs which he was host to always cooking and donating the Post hall for 10 years. At Senator John Calandra's dinner in 1970, Lou was Toastmaster. At this time Lou was also on the Veterans Rallies Committee for the Rockefeller-Wilson team. Lou and Ann were invited to accompany Senator Calandra, by Lt. Governor Malcolm Wilson, to Washington, D.C. to be honored by the Lt. Governor. Governor Nelson Rockefeller was also appreciative and sent Lou a personal Thank You letter.

Lou united the Gun Hill Post and Aaron Lewis Post by running joint meetings and parades, by providing a bus between the two Posts. He did this for years uniting black and white comrades. He even got a permit to put up a reviewing stand on Nereid Avenue (one block from Post #271). All District 2 Posts and Auxiliaries participated, along with his Drum Corps. Great days for all.

In 1967, Lou moved his family to 3153 Seymour Avenue.

Lou was never able (in his eyes) to do enough for his fellow comrade. In 1972 his fellow comrades recognized this and honored Lou with a Testimonial Dinner. Men came from near and far. Lou's political friends, Congressman Biaggi, Senator John E. Flynn, Borough President Robert Abrams, Judge Paul A. Fino, Senator Joseph Periconi, Congressman Jonathan B. Bingham, Senator Calandra, Assemblyman L. Fusco, Michael McSherry, Robert Whelan, all honored Lou by being guests and sitting on Lou's dais, at this well deserved testimonial.

During this time Lou joined the V.F.W. committee for drug abuse. On this committee he worked with the politicians and comrades to fight this terrible problem the world is facing.

There is a most special program in which the V.F.W. and the politicians unite to honor young Americans for their patriotism. Lou joined the committee for the "Voice of Democracy" program with great enthusiasm. He served as Hospitality Chairman and was on the judges panel since the early 1970's. Congressman Biaggi was again honored with a plaque, presented by Lou, for his support in this patriotic program.

On May 2, 1972, Robert's wife gave birth to Lou and Ann's one and only grandchild, Robert Lucio Pavia II. Lou loved this child so; he took him most everywhere. In August of 1982, Lou wanted so to be able to take Robby to the National Convention in California, along with Ann, but the day never came for Lou.

In 1976 Lou and Ann moved into their own home at 4223 Gunther Avenue. They were delighted to have their own home for now they really had room to entertain, and entertain they did. Family, comrades and friends still talk about the dinners, barbecues and laughs they had with their hosts.

In the early 1970's Lou was elected as President of the Association to the Gun Hill Post; he held his position until his passing. This position gave him the responsibility of being landlord of the Post.

Lou was able to join the Disabled American Veterans in 1976, because of an knee injury he received during his military service. He became a member of charter in the Italian-American War Veterans, as not to forget his heritage. In 1980 he joined the American Legion so that he could join a patriotic organization with his son Robert.

As busy as Lou's schedule was with the V.F.W., political and community activities, he never neglected his family in the least. His wife and children were always by his side; they never felt overlooked for Lou had an overwhelming amount of love to go around.

At home, Sunday was "family day", the one day of each week that was set aside for the family to share their thoughts. Any and every subject was open for conversation. Lou would guide and advise, but at the same time let his children learn by their own mistakes. Even later on his grandchild was included in these talks. Lou told Robby II that no matter how young he is he has an opinion to be voiced and respectfully listened to as a part of the Pavia family. Lou taught his family the true meaning of "love and understanding".

The offices Lou held in the V.F.W. are endless. Just to mention a few more: Judge Advocate & President of the United War Veterans Memorial & Executive Committee for 11 years, on the State Legislative Committee for 16 years, and Convention Chairman in 1972. As District Steering Committee Chairman for 12 years, he promoted comrades in District 2 to become State Commanders, always having a winner.

Continuing his dedication to his Post, Lou amended his Post By-Laws, as to keep up with today's world.

In 1980 Lou retired from the Prudential Insurance Co. and began working as the Bookkeeper for the RAIN Senior Citizens Association. Oddly enough the rented the

post halls and office to RAIN as President of the Association to the Gun Hill Post. He was their bookkeeper and landlord simultaneously.

Approached by his comrades in V.F.W. State offices numerous times, for nunerous years, Lou consistantly turned down the nomination to run for State Commander. He felt that at these times it would take too much time away from his family, and besides he enjoyed promoting others (being the man behind the man) as District Steering Committee Chairman. His comrades would not take "no" for an answer; they needed his leadership, and therefore in 1981, Lou was drafted to run for State Commander of New York.

Lou and Ann felt that although it was time consuming work, it was time for Lou to accept being drafted to run for State Commander. At the rate Lou was going he would be New York's V.F.W. State Commander in the year 1985.

Lou was on his way; he continued to go up in office on the State level. In 1981 he held the position of State Inspector, accomplishing the most productive inspection in 20 years.

On June 26, 1982, Lou was now in office as State Chief of Staff, which only left one more year to run for State Jr. Vice Commander.

Lou passed away on July 29, 1982, at 4:00 am, caused by a massive heart attack. He had an appointment that morning to pick up fellow comrades to preside at the Flying Squadron meeting in Pennsylvania. He made arrangements with his wife, Ann to return early from Pennsylvania to celebrate their 35th Anniversary on July 31st.

Ann made sure Lou was waked for 5 days so that his comrades could learn of Lou's passing and upon returning home from Pennsylvania, pay their respects to Lou. Hundreds of fellow comrades, sisters and friends traveled as far as 500 miles by car to pay tribute to Lou by passing in salute and prayer, Congressman BIAGGI beside them. Family came from as far as California, for the man they loved. No distance was too far for all those who cherished Lou. The New York State Commander Thomas E. Voss, after traveling hundreds of miles, took Ann's hand to place the State Chief of Staff badge on Lou's pocket. The V.F.W. State Honor Guard stood devoted guard for 3 days and nights at Lou's wake, never tiring of changing guards, saluting and paying their respects to this great man whom they loved dearly.

V.F.W. State Adjutant Joseph T. Gumo, honored the Pavia family by delivering the eulogy, with love and respect.

On August 2, 1982, Lou was laid to rest at Calverton National Cemetery in Long Island, where Mr. Gumo presented Ann with this country's great flag.

There have been many tributes to Lou since his passing. Published in the "Overseas Veteran"—"The Department of New York Banner and all District, County Councils and Posts will drape their charters for a period of thirty (30) days from date of this order in memory of Lucio G. Pavia", by order of Thomas E. Voss, N.Y. State Commander. On November 11th, Veterans Day, the Pavia family were guests of District Commander Henry Christ, at the Pelham Bay Memorial Park, Bronx, N.Y. where the V.F.W. dedicated the day in the memory of Lucio G. Pavia. John Cannon of the U.S.O. has requested the presence of the Pavia family at a Christmas Party for the disabled veterans of Kingsbridge Veterans Hospital, donated by the U.S.O. in memory of Lucio G. Pavia. The list has just begun.

Lou Pavia, a great loss to all who were fortunate enough to know and love him.●

GREAT ACCOMPLISHMENT

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. VANDER JAGT. Mr. Speaker, in these difficult economic times for our country, and I must say particularly for our State of Michigan, there are occasional sparkling developments that deserve the widest recognition. Such, I believe, is the case recently in Ionia County, and especially the city of Ionia, when its newspaper, the Sentinel-Standard, editorially praised the management of the Ionia General Tire plant, as well as the local union, the United Furniture Workers Local 420. Both labor and management "gave" in resolving an extremely outstanding matter of a new contract.

I want to take this opportunity to congratulate all involved and as the editorial mentioned, I hope that it will "stimulate further labor-management cooperation throughout the country." A great example has been set by these Ionia parties. The editorial follows:

[From the Sentinel-Standard, November 15, 1982]

COOPERATION IMPORTANT

Last Thursday was a very important day for Ionia and Ionia County. It marked the ratification of a new 20-month contract between labor and management of our county's largest industrial employer.

Members of United Furniture Workers, Local 420, and Ionia General Tire plant management are to be congratulated and praised for the efforts.

The contract, which was scheduled to expire February 1, 1983, could have spelled big trouble for the Ionia area if the two sides were unable to reach an accord.

As it ended, labor agreed overwhelmingly to a freeze in wages and cost of living benefits at current levels, in return for improvements in contractual language, as well as benefit improvements in dental, sickness and accident, and spouse health benefits for certain retirees.

Local 420 President Thomas Almy summed up the union's goals when he said, "It is the union's hope that this contract will put Ionia General Tire in a more competitive position in the molded fiberglass industry, which will eventually result in more jobs for currently laid-off members."

The spirit of cooperation by labor is critical in light of the awesome job faced by management to be competitive with other manufacturers in these difficult economic times. Competitive labor costs are an essential ingredient needed to produce a profit for company stockholders. If there is no profit, there can be no jobs for anyone.

We think this spirit of labor-management cooperation is important if the Ionia County area is to attract new industry and see existing industry expand in the future. Current and potential employers and investors watch such indicators closely. The Ionia area's reputation as having a quality-conscious and cost-effective labor force is important.

The accord reach by General Tire's labor and management should be cheered by us all and we hope it will stimulate further labor-management cooperation throughout the country.●

FRANK P. CELESTE—WORKING FOR SUCCESS

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MOTTL. Mr. Speaker, the American work ethic is something we have been taught since childhood. The degree to which we apply ourselves to it, however, is our own decision. Frank P. Celeste chose early on to apply himself wholeheartedly. Frank is a successful man, but as they say, no one gets something for nothing. Frank worked for that success. He decided what he wanted, and he worked to achieve it.

Frank Celeste decided to attend Wooster College. He accomplished that by chauffeuring, waiting tables, tending furnaces, and working in a toy factory. Through his efforts, he attained his goal; he graduated in 1928.

Frank then chose law as a career. Law school, we all know, is no small expense. Again, Frank worked his way through, holding down three jobs as he attended classes. Frank was admitted to the bar in 1932. He did not stop with local practice though; he wanted to be better. He has been admitted to practice before the Interstate Commerce Commission, the Federal Power Commission, the Treasury Department, and finally the U.S. Supreme Court.

Frank got into politics in 1954 when he was appointed to serve as interim judge of the Lakewood Municipal Court. The next year he was the first Democrat to be elected mayor of the city of Lakewood. In 1958, the Federation of Women's Clubs of Greater Cleveland cited him for leadership in community improvement. He upheld the public's high opinion and trust and was reelected in 1959. Even though a Lakewood resident, he was called on as a candidate for Cleveland mayor in 1965. Frank's son, following in his father's footsteps, is currently Ohio's Governor-elect. Richard Celeste will assume office in January.

Frank has never stopped working. He still has several jobs. He is presently chairman and director of National Housing Corporation as well as a general partner in Cletrac Indian Hills Colony, Hamilton House and Fairview Village, and a limited partner in Lake Shore Associates.

In spite of his busy schedule, Frank has been active civically. He is now a member of the citizens' league, the Lakewood Chamber of Commerce, and the past president or current member of several local civic organizations which promote the safety, health, and well being of the area.

Mr. Speaker, please join me in honoring Mr. Frank P. Celeste, a working man, and an example for us all.●

FIRST PRESBYTERIAN CHURCH OF JOHNSTOWN

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MURTHA. Mr. Speaker, on Sunday, December 12, the First Presbyterian Church of Johnstown will celebrate its 150th anniversary.

Chartered in 1832, the church has founded four other Presbyterian churches in the Johnstown area, and been responsible for the building of the Redstone Presbyterian Home for the Elderly.

In our area of Pennsylvania, churches remain as the cornerstones of family life. This has been particularly important in the Johnstown area where we have experienced three disastrous floods during this church's lifetime; and where today we combat high unemployment and economic difficulties.

During these times of community and personal crisis, the First Presbyterian Church has remained a source of strength and guidance.

I know the whole community joins in commemorating this historic anniversary of the First Presbyterian Church, and through this celebration reuniting the community and the church membership through the outstanding work that continues through the church members and its leaders.●

BURGLARS FOILED BY SOUTH BRONX YOUTH

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. GARCIA. Mr. Speaker, at a time when the youth of the South Bronx are often criticized for neglecting the needs of their community, I am proud to report that the tenants of the Mid Bronx Desperados, a community housing corporation funded under section 8, do indeed care.

Two burglars came out of a Mid Bronx Desperado building on Vyse Avenue in the South Bronx with what appeared to be hastily covered items. Several young tenants nearby became suspicious and asked if they were moving out. The men claimed they were and gave them a fictitious apartment number. The tenants pursued them as they made their way up the street. While one felon was able to escape the other was apprehended by Pedro Martinez and Rogelio Martinez, who held him until the police arrived.

This incident demonstrates that there are young people in this community who have an unselfish concern and pride for their neighborhood, which housing corporations like the Mid Bronx Desperados help to promote.

I have enclosed for my colleagues' benefit the article from the Mid Bronx Desperados' newsletter which relates this incident.

BURGLARS FOILED BY MBD YOUTH

(By Louise Walker)

Who says New Yorkers are cold and uncaring? Two burglars who thought that way got more than they came for recently. Isabel Martinez, Michael Tapscott, Cynthia Taylor, Pedro Martinez, Jr., Rosalina Martinez and Rogelio Martinez, MBD tenants, were enjoying an Indian Summer afternoon when two strange men entered one of the MBD buildings on Vyse Avenue. They looked suspicious when they came out of the building carrying what appeared to be hastily covered items. Cynthia and Isabel asked if they were moving out and if so, from what apartment. The burglars, anxious to get away, replied, yes, they were moving, and gave a fictitious apartment number.

As they proceeded down Vyse Avenue towards 173 Street, the above mentioned young people were hot on their trail.

Someone notified Mr. Vazquez, the MBD Superintendent, and Mrs. Brooks and Mr. Loftin of the MBD office, who telephoned the police and then joined the chase. The two burglars walked East on 173 Street, headed toward Boston Road, with a now considerable crowd following them. Just before the entourage reached Boston Road, one of the thieves started to run, with Mr. Vazquez and Michael Tapscott in pursuit. The other felon was apprehended by Pedro Martinez and Rogelio Martinez, who held him until the arrival of the police.

Unfortunately, the other one eluded his pursuers. By now he has no doubt passed the word along to his cronies, "Stay away from MBD I!"

The quick thinking and unselfish action of these youngsters saved a neighbor's belongings.

All of the MBD I families salute you for your caring and bravery.●

WILLIAM H. HOLDEN

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. LEE. Mr. Speaker, please allow me to draw your attention to today's retirement of Army Reserve M. Sgt. William H. Holden, a resident of Marcellus, N.Y., and one of the many thousands of solid and loyal American patriots who contribute day after day after day to making this Nation work.

While news columns fill with stories of young men who expend more effort to evade even potential national service than they would in the service itself, I think it is good to hear the other side of the story of America—the stories of the Bill Holdens who give so much for so long to the precepts which have created a great nation.

Mr. Holden—Sergeant Holden—entered the New York National Guard in 1938 with a desire for American service so great that he could not wait for the age of 18. He was but 16 on his entry. Throughout World War II, Bill Holden saw duty in the Pacific with a decorated Army unit.

Most men returned home from that war feeling that they had contributed their fair share of public service, as well they deserved the feel. Bill Holden almost immediately entered the ranks of the police force of Syracuse, N.Y., where his career continued with valor for 32 years until his retirement in 1978. All the while, he continued to serve as a leader in his National Guard unit, from which he retires today. After fighting America's wars abroad, he came home to spend even more of his life's efforts in riot and flood duty to his neighbors.

Today, atop his career in military and police work, he continues to be of service as part of the Syracuse Veterans Administration Hospital security force.

Mr. Speaker, I call your attention to Mr. Holden not because he is the object of unusual recognition and not because there is special reason to expect that Mr. Holden's accomplishments will make him a famous or wealthy man of note in this Chamber.

I call your attention to Mr. William H. Holden because I believe he represents what is good and right about America itself. He has given of himself tirelessly for the good of his fellow Americans and his neighbors. He is the spirit and the strength of the United States of America. Every once in a while, I believe we should pause to thank the real patriots of America's third century.

Thank you, Mr. Holden, on behalf of GARY LEE and the Congress of the United States. We appreciate what you have done for us.●

WOMEN'S ECONOMIC ISSUES HIGHLIGHTED BY HOUSE TASK FORCE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. BIAGGI. Mr. Speaker, economic equity continues to plague women despite the number of legislative and judicial developments which have re-

moved the many barriers which foster such discrimination. In a report recently issued by the House Democratic Caucus, this problem was highlighted in a number of very graphic ways.

This report outlines four areas of concern to women: Education, job, and business opportunity; fair retirement benefits; health care and elimination of poverty. The numbers in this report accentuate the growing need that women have to bridge the current economic inequities in all these areas. Briefly, a number of these areas include:

More than half of all women work outside the home. They are 42 percent of our nation's workforce. Two-thirds of these women work out of economic necessity. Yet they earn on the average just three-fifths—sixty cents for every dollar—of what male wage earners make;

In the age group 65 and over, there are 2.5 times as many poor women as poor men. Social Security and private pension systems have not adapted to modern conditions. As a result, both women who have held paid employment and lifelong homemakers face an uncertain retirement;

Only 20 percent of women in the workforce belong to labor organizations. These women earn almost a third more than their non-unionized counterparts;

Women make up a third of the Federal workforce. Yet they are 44.7 percent of those who have been fired by this Administration;

The median income of female-headed families is $10,960, less than half the median income of all families; and

Women and children are 75 percent of all people living in proverty, 69 percent of the food stamp recipients and 67 percent of the Legal Services clients.

The Democratic Caucus has put forth this document to dramatize the need for a vigorous commitment to economic equity on the part of our Democratic Party—a party which has its roots in eliminating social and economic barriers to all those segments of our society which are in need. Democratic administrations since President Roosevelt have been committed to equal educational opportunities for women, have strived for job equality, and have strongly supported the equal rights amendment. It is clear that the Democratic Party can offer the best opportunity for addressing these issues and I will vigorously support the efforts of our party to provide clear, fair, and realistic alternatives to Reaganomics in order to enhance the economic status of women in society today.

I have sponsored legislation, House Joint Resolution 529, which would provide a new opportunity for the ratification of the equal rights amendment. This, however, is not enough, and will not fully address the growing numbers of older women who are entering into poverty at record levels because of current inequities in public and private income maintenance programs. In my capacity as an original member of the Select Committee on Aging, we can continue our efforts to highlight the special economic problems of elderly women. This problem was most recently demonstrated by the near demise of the popular title V senior community service employment program—a program which provides part-time employment to low-income seniors over 55. Two-thirds of its 54,200 participants are women and they clearly would have been the hardest hit—and the greatest in need.

The problems faced by women in finding jobs and maintaining adequate incomes increase with age—such acute problems cannot be ignored. Addressing the economic problems of women should be a high priority for the upcoming 98th Congress and the Democratic Party in all levels of government. I pledge my own best effort in this area and am confident that we will see added movement in this area in the near future.●

LEGISLATION TO PROVIDE FOR CONGRESSIONAL DISAPPROVAL OF EXPORT CONTROLS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'BRIEN. Mr. Speaker, I have always opposed economic sanctions against other nations, such as those imposed by the President against Russia after the declaration of martial law in Poland. History has shown us over and over that the damage is felt by our own industry to a degree that far exceeds any foreign policy advantage we might achieve.

Today I am introducing legislation which will provide Congress an opportunity to disapprove the prohibition or curtailment of export of goods or technology. Under my bill, Congress will have 30 days in which to adopt a resolution of disapproval of export restrictions when such restrictions are imposed for foreign policy, short supply, or national security reasons. Current law provides for a two-House disapproval in the case of export restrictions on agricultural exports for short supply or foreign policy reasons. My bill simply requires that all export controls be subject to the same procedure.

My bill does not interfere with the exercise of Executive authority, because it does not prohibit the President from imposing export restrictions. It does give Congress the opportunity to lift those restrictions, however, if they promise to be as harmful to American industry as the most recent ones were.●

POGOLOFF: FRIEND OF VETERANS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. BROOKS. Mr. Speaker, on November 25, 1982, Roll Call paid tribute to David Pogoloff, Chief of the House Veterans Administration Liaison. Dave recently received the VA Administrator's Superior Performance Award—and I want to commend the Administrator for his recognition of Dave's outstanding service to the veterans of this Nation, to the Veterans' Administration, and to the Congress of this country. I will insert the article from Roll Call for all the Members to read. It is typical of Dave Pogoloff's unassuming, but tremendously effective effort that he praises his staff as sensitive, conscientious, public servants.

The article referred to follows:

[From Roll Call, Nov. 25, 1982]

POGOLOFF: FRIEND OF VETERANS

(By Laurie Denton)

David Pogoloff, chief of the House Staff Veterans Administration Liaison, has received many compliments and a lot of satisfaction in his 25 years on the job. This fall came the recognition.

Pogoloff was recently given the VA Administrator's Superior Performance Award, which carries a $3800 check with it. According to Anna Azhderian, AA to Rep. Frank Annunzio (III), Pogoloff more than deserved it.

"He's a sweetheart of a guy," she said, "He is sympathetic to veterans, he takes a personal interest."

A World War II veteran, Pogoloff could be called the dean of the dean of liaison services. The VA liaison service was created shortly after World War I, when the VA itself was a hodge-podge of agencies.

"It's a unique office in that we are part of the executive branch in the midst of the legislative branch," Pogoloff said. "We're here as their guests."

As guests, they do a lot of work for their Congressional hosts. "We stress the word service," Pogoloff said, explaining the work they do in helping veterans get benefits and keeping up on recent legislation. "An unhappy constituent makes an unhappy Congressman," Pogoloff added, "so our job is to make them happy." Part of the service tradition is reflected in their one-day response time in acknowledging letters and their personal calls to constituents with problems.

Keeping up with legal changes is a job in itself. Pogoloff has a shelf loaded with 22 black binders containing regulations on pensions and payments alone. And a stack of papers on the desk represented new regulations that had come in in the past two weeks. But the eight-member staff has not grown since after World War II. All eight are veterans, the youngest of whom, David Levitow, is a Vietnam vet and recipient of the Congressional Medal of Honor.

In Pogoloff's 25 years, the VA Liaison Service has shifted to more telephone work, as Congressmen have increased their district offices, often putting their caseworkers out in the field. The staff still holds what

Pogoloff calls "an on-going school" for caseworkers and it serves the 15,000 veterans who are Hill employees directly.

Along with the long distance work, Pogoloff said he has seen a dramatic increase in the case load and a corresponding decrease in personal interest. "There used to be more personal interest, when caseworkers had more time to delve into their cases," Pogoloff said. "I'm unhappy to see that sometimes they're just going through the motions."

The Vietnam War and a floundering economy have made more work for the Liaison Service. As the economy worsens, more veterans apply for benefits. An aging population of World War II veterans is also putting an increased demand on the VA's 172 hospitals around the country—the largest hospital system in the world. Today, there are 30 million veterans.

"The further we get away from a war, the number of clients and applications will drop," Pogoloff said.

Pogoloff has found many Vietnam veterans are dissatisfied with their benefits and think they deserve more than other veterans, although a severely disabled veteran could receive $33,450 tax-free, plus tuition for education or training if feasible, and a grant to purchase a specially-adapted home and car along with a clothing allowance.

"The tragedy of war and the cost of war is tremendous," Pogoloff said, "but how can a disgruntled veteran say 'the government doesn't do anything for us'?"

Pogoloff came home from World War II to Walter Reed Hospital, where his leg was amputated on Christmas Eve. "I was always grateful," Pogoloff said. "My life had been saved." Pogoloff's son, an Episcopalian minister, told his father that perhaps his life had been spared so that his son could serve God.

"Personally, I think it's the obligation of a young man in this country to serve if needed during times of national emergency and he should feel it's his privilege," Pogoloff said. "Most of us here are patriotic in that sense."

They are loyal to servicemen, too, in the sense that they will do anything to ensure that a veteran gets the full allotted benefits. In one case, a widow claimed her husband's death was linked with his service. Her claim was disallowed and the case came to the attention of the liaison service staff. They dug into it, discovered that at the time of death, the veteran had abnormally high blood pressure, a condition that was also reported by his first civilian employer. That was enough to allow the widow to collect benefits.

Such incidents provide the satisfaction that keeps Pogoloff on the job 25 years running. He and Assistant Chief William Aud don't leave the job at the office, either. They have become accustomed to calls at nights and on the weekends to resolve a difficult problem or help out in an emergency.

They've become accustomed to handling some touchy situations as well. One veteran, for instance, who was unhappy that they could not arrange for him to receive financial benefits on the spot, thought some superficial razor cuts on his wrists might help matters.

For the most part, however, Pogoloff stresses the office work in aiding Congressmen and their caseworkers. They are planning to meet all 81 of the incoming freshmen representatives, briefing them on liaison service activities and introducing their caseworkers to the service.

"This is such a complicated business we're in that a caseworker can really flounder in it," Aud said. "Until he knows what he's doing, he should pick up the phone and call us."

The group can help out when there is a particularly tough problem, when there are multiple questions, or when a number of veteran centers are involved and jurisdiction is in question.

Pogoloff's walls are covered with photographs from House leaders and Representatives and his files are filled with letters thanking him and the staff for their help.

"I'm very proud of my staff," Pogoloff said. "They're very conscientious, very sensitive to the needs of our veterans and their dependents."●

HOMECOMING FOR MARIO WATLINGTON

HON. RON de LUGO

OF VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. DE LUGO. Mr. Speaker, homecomings certainly are very special. They are a time of joy; a time of anticipation; a time of renewed friendships; and, a time of reflection. The 1982 homecoming for the College of the Virgin Islands is particularly special because a man of true distinction is being honored—Mario A. Watlington.

The College of the Virgin Islands is but one of the beneficiaries of the many, many contributions of this distinguished man who has consistently put his community first among his priorities. From Boy Scouts to the college, from politics to libraries, his unselfish interest and concern in the welfare of his fellow Virgin Islanders are broad and varied, but they all carry one theme—people. Mario Watlington is a man who truly loves people. His interest and concern in the well-being of the people of his community have underscored everything that he has done in his richly varied and active life. It is this aspect which sets him apart and makes him so very special in the hearts of his fellow Virgin Islanders. His second love is education and it is no coincidence that a man who cares so much for his community would make education the primary focus of his entire career. The College of the Virgin Islands could choose no more worthy candidate for honor.

Mr. Speaker, I am very proud and grateful to call this man my friend. His counsel over the years to me has been invaluable and very special. I would like to share with my colleagues some of the highlights of the remarkable career of this outstanding man and my friend, Mario Watlington.

Mario's name is virtually synonymous with the College of the Virgin Islands. He started there in 1963 as a part-time instructor in the business field. He has taught regularly in the continuing education division ever since. Full-time employment with the college came in 1967 upon his acceptance of the position of assistant to the business manager in personnel and purchasing. Mario later became registrar and admissions officer at the college. Since 1973, he has served as the institution's director of admissions. He has worked in various capacities while serving at the college which include: Secretary of the divisional council; member of the administrative council; member of the graduate council; member of the president's administrative team; chairman of the admissions committee; secretary of the policy board of the teacher corps project; and, a member of the board of trustees of the College of the Virgin Islands.

In addition to an active career, Mario has found time to have an active life of public service too. Mario, a graduate of the only high school in St. Thomas at the time, assisted in forming the Charlotte Amalie High School Alumni Association which makes annual presentations to the school for needed equipment and supplies. He was active in forming the first public service employees' group in the Virgin Islands which was called the Municipal Employees Association. Realizing the enormous potential of the group, Mario was the youngest person to join the Virgin Islands Progressive Guide—a new social and political body in the territory seeking to raise the political awareness and aspirations of the community. He was coeditor of the guide's publication. Politics has always been one of his keen interests—from his run for councilman in 1946 to the present. In 1972, he was elected to the board of education and has served five consecutive terms. Additionally, he was elected as a delegate to the third and fourth constitutional convention. Mario also has served as a member of the Territorial Democratic Committee and delegate to the National Democratic Convention. Throughout the years, he has been associated with the Boy Scouts of America; the St. Thomas Home Guard; the Civil Defense Corps; the V. I. Commission on Youth; the Public Utilities Commission; the Municipal School Board; the Law Enforcement Commission; the Advisory Committe on Public Television (WTJX); and, the planning commissions for handicapped persons and libraries.

Even when he relocated in New York City, Mario was active in the affairs of the Virgin Islands. He joined the Virgin Islands Public Affairs Council (VIPAC), a civic group designed to promote the social and political development of the islands in the Halls of Congress, and served as secretary of the group for many years. VIPAC was instrumental in the formation of a coordination committee representing

over 30 Virgin Islands fraternal and social organizations operating in New York since the early twenties.

When Mario returned to St. Thomas in 1962, he was asked to become the director of the St. Thomas Music Association. The association was the forerunner of the Reichhold Center for the Performing Arts. Mario served as the association's president for 2 years.

In 1967, the St. Thomas Lions Club was to benefit from his determination. He became a charter-member and has served in many capacities, including president of the group. The Lion District Governor of Puerto Rico awarded him the 100 percent medal for administrative efficiency.

Mr. Speaker, as can be seen by this outstanding record, Mario A. Watlington has made a tremendous contribution to the people of the U.S. Virgin Islands. There is no doubt that his wife, 2 children, 3 grandchildren, and 150 godchildren are very proud of him. A job well done characterizes his career.

My sincere congratulations and best wishes are extended to my good friend, Mario, and his family. I am sure this new phase of his life will be as active and fulfilling as the portion which has just passed.●

A TRIBUTE TO ROY H. HOLDT

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MOTTL. Mr. Speaker, I would like to pay tribute to a truly outstanding citizen, who has done much to further the growth and prosperity of the fine city of Cleveland, Ohio.

Roy H. Holdt was born in Edgewood, Md., on November 19, 1920. He graduated from Dyke College, Cleveland, Ohio, and attended Cleveland State University.

He then went on to serve in the U.S. Army (European Theater) from 1942 to 1945, and was awarded Croix de Guerre with Bronze Star from the French Government.

Mr. Holdt was elected chairman of the board and chief executive officer of White Consolidated Industries, Inc. in 1976. Under Mr. Holdt's leadership WCI's net sales increased almost 50 percent. He was president and chief operating officer of WCI from 1972 to 1976; executive vice president from 1969 to 1972. Mr. Holdt then became a director of WCI in 1969.

Presently Mr. Holdt devotes time and energy to Cleveland by his directorships of many companies. He is a director for AmeriTrust Co., Cleveland Electric Illuminating Co.; Republic Steel Corp.; Email, Ltd. (Australia); Greater Cleveland Growth Association; and Cleveland State University Development Foundation. He is a trustee of Fairview General Hospital; trustee and corporate member of Dyke College, and a member of the Cleveland Foundation Board. He is also past chairman of the Loaned Executive Program for United Way.

Mr. Holdt is also a member of the Union Club of Cleveland, the Pepper Pike Club, Firestone Country Club, University Club, and Westwood Country Club of Cleveland.

Mr. Holdt is certainly a model citizen, continually contributing to the growth of WCI and the city of Cleveland. Cleveland is indeed proud of this man who has lived in and served the community so well.●

INTRODUCTION OF THE ANTI-TAX-FUNDED ADVOCACY ACT OF 1982

HON. JIM JEFFRIES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. JEFFRIES. Mr. Speaker, I wish to introduce a bill entitled the Anti-Tax-Funded Advocacy Act of 1982.

Many of us have voted over the years either to increase or decrease funding for programs which have directly or indirectly subsidized policy advocates. On several occasions we have voted to limit the role that the Legal Services Corporation could play in lobbying the Congress and State legislatures. On other occasions we have voted for limiting funding for so-called public interest groups when attempting to intervene on matters before a regulatory body.

What strikes me as we look at the attempts to remedy the situation is that we are closing the barn door after the cows are all out. All of these votes were the result of abuses that have grown up in the system of handing out Federal dollars to groups that closely resemble political parties in many cases. Such abuses are inevitable as long as we continue to fund programs without some comprehensive safeguards built into the law to restructure the law in this regard.

We have a law that prevents public employees from lobbying the Congress, but there is nothing to prevent them from giving a grant to their friends to lobby on the issues they are forbidden from pursuing themselves. We have laws that prevent welfare recipients and Federal employees from being harassed by anyone in regard to an election or other political activity known as the Hatch Act. But there is no law that prevents grant and contract recipients from doing this very thing, while enjoying the benefits of the public's money.

In all of the grants that the Federal Government gives to policy advocates, there is an allowance for overhead, which subsidizes the overall operations of these organizations. Many of the organizations which hold themselves out as representatives of town and cities, are largely the creation of Federal dollars. These organizations lobby the Congress for ever-increasing funds which will increase their importance, as well as their ability to increase their share of Federal grants. To say such organizations have a conflict of interest is an understatement.

The public and the press have shown an ever-increasing impatience with the abuses of CETA workers campaigning for favored candidates, with a whole army of public interest experts representing no one but themselves pestering the Congress for their own grants. The list goes on to include the major labor unions, which have used Federal money to indoctrinate the public and workers in the importance of unions.

It is for this reason that I have introduced this bill. The Fairness Committee Against Tax-Funded Politics has been working for some time to bring these abuses to light, and to mobilize the Congress to correct the problem. It is clear that unless we undertake a serious debate on the nature of this problem and how to solve it, we will be doing little more than swatting flies left after the cows have long since left the barn. I think that we owe the taxpayers and voters more than this, at a time that public resources have been strained to take care of legitimate expenses of Government. We can no longer afford the luxury of frittering away the taxpayers' money on the private political concerns of a tiny minority.●

FTC PROFESSIONALS EXEMPTION WOULD HURT CONSUMERS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. FLORIO. Mr. Speaker, the House is likely to vote next week on legislation to reauthorize the Federal Trade Commission and at that time an attempt will be made to exempt all professions from FTC jurisdiction.

I believe the more moderate course of action is the bipartisan substitute which would preserve the responsibility of the States with respect to professional licensing, but would insure the continued ability of the FTC to monitor commercial abuses.

Without continued FTC jurisdiction over the professions, the almost certain result would be increased costs for both consumers and businesses.

Jane Bryant Quinn, the noted consumer writer, recently wrote the following column about this and other

consequences of exempting professionals which I would like to call to the attention of my colleagues.

The article follows:

[From the Washington Post, Nov. 29, 1982]

UNLESS PUBLIC COMPLAINS, PROFESSIONALS MAY WIN LAISSEZ FAIRE

(By Jane Bryant Quinn)

NEW YORK.—Doctors, dentists and a pride of other professionals are lobbying Congress fiercely for an exemption from federal price-fixing and consumer-protection rules. Unless the public objects strongly—and quickly—to their senators and representatives, the professionals have a good shot at winning.

A victory could raise the price of many professional services, reduce the flow of price information to consumers and, depending on the wording of the final bill, wipe out 18 months of painful government effort to open up the professional services market to honest competition. Several major cases and consent agreements won by the government would be overturned. All ongoing investigations and marketplace studies would be stopped.

At issue are amendments that could come before Congress as early as December, attached to a bill reauthorizing the existence of the Federal Trade Commission. They would eliminate, entirely, all FTC jurisdication over state-licensed professionals. Unlike other business men, professionals would then be pretty much free to price-fix as they please.

Leading the battle (with a $2.3 million political-action war chest in 1982) is the American Medical Association, against whom the FTC has just won a major lawsuit. Other active trade associations include those for dentists, optometrists, and veterinarians.

The professionals say they want out from under the FTC because they are being regulated to death. The truth is that the professionals themselves have been over-regulating the marketplace—through their trade associations or informal combinations of doctors and dentists—so as to keep prices up.

The FTC aroused their ire by breaking up their illegal boycotts against lowerpriced competitors. If the proposed amendments pass, the anti-consumer monopolies and boycotts will be back in force.

The following six FTC cases give you some goood examples of what's at stake. They were all won or settled by the government during the past 18 months. And they would all be overturned if one of the House amendments passes. At risk is:

The case against the American Medical Association and certain area associations for restricting price competition. The illegal abuses included prohibitions against advertising which, among other things, stopped a church in Chattanooga, Tenn., from operating a low-cost cardiac stress clinic and drove a Kansas physician house-call service out of business. The AMA and its affiliates also took various actions against doctors willing to work for less than "usual" fees. The Supreme Court upheld the FTC's victory last March.

The case against the Michagan State Medical Society, for conspiring to resist the cost-containment plans proposed by Medicaid and Blue Shield. Both insurers backed down, when faced with a threat by doctors to refuse Medicaid patients and to quit participating in Blue Shield. In this case, the FTC has won the first round.

A consent agreement, prohibiting doctors from restricting competition. The only doctors in the small town of Brownfield, Tex., threatened to boycott the hospital's emergency-room patients, because the hospital planned to recruit another doctor. The FTC stopped the boycott, but the doctor who was going to Brownfield was scared away.

The agreement with the Medical Society in Broward County, Fla., to lift its illegal ban on doctor advertising. This will permit local doctors to advertise such things as whether they speak Spanish or accept Medicare payments as reimbursement-in-full for medical treatment—two important consumer issues to patients in the south Florida area.

The agreement with the American Dental Association to end its illegal restrictions on dental advertising, and cases against dental groups for conspiring to resist cost-containment plans.

Even if the above cases are allowed to stand, the proposed amendments would free professionals to pursue similar anticompetitive actions in the future. For example, a medical group could deny malpractice insurance or hospital privileges to doctors working for lower-cost health maintenance organizations, and prevent nurses from running rural health clinics under doctor supervision (two more practices stopped by the FTC).

If you disapprove of what the professionals are doing to keep prices up, write to your senators and representatives, right now. It will take a strong outpouring of public opinion to force professionals to continue operating within all of the nation's laws.●

YEAR OF THE BIBLE

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MAZZOLI. Mr. Speaker, the year 1982 marks the 200th anniversary of the Bible's first printing in America. I am a cosponsor, along with many of my colleagues in the House, of a measure proclaiming 1982 as the Year of the Bible. As National Bible Week commemorates this bicentennial celebration, I wish to call attention to this important event.

During this time of year as we contemplate the blessings and bounties of life, it is appropriate and fitting that we have set aside a week as National Bible Week to recognize the significant contributions of the Holy Bible, and to recognize the effect for good this inspirational book has had on the lives of millions of people, not only in this country, but around the world.

During this period of gratitude and thanksgiving, I personally am grateful for these spiritual scriptures which give comfort, counsel, direction, and guidance for our lives today. Its message is as timely today as it was in days of old.●

OPTIONS: GROWTH VERSUS REDISTRIBUTION

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. CONABLE. Mr. Speaker, we should all, regardless of political party, ponder the pattern choice set out by Michael Barone on the editorial page of today's Washington Post. It makes thoughtful reading, and I commend it to the attention of my colleagues:

THE BATTLE FOR THE DEMOCRATIC PARTY

There is a battle going on for the soul of the Democratic Party, a battle between its new ideas and its old constituencies. It is a battle that has been going on quietly these past two years, when few Democrats had to attend to the messy everyday business of governing. It will rage more heatedly in 1983 and 1984, not only in the presidential campaign, but also in the House and the big state capitals where Democrats in the 1982 elections won the responsibility for governing.

The course of the battle is not plain to see. Many ridicule the Democrats' new ideas as "Atari liberalism"—putting trendy labels on old-fashioned Democratic programs. Instead of calling for public works programs, Democrats now call for rebuilding the nation's "infrastructure"—which turns out to mean the roads, bridges and sewers government has been building for 140 years. Instead of calling for more money for education, Democrats are calling for upgrading "human capital"—which turns out to mean more training and education for young people.

This new nomenclature is important, however. It shows that the Democrats are turning from a politics of distribution to a politics of productions, from a politics that focuses on distributing society's wealth to the unfortunate to a politics that focuses on producing more wealth.

The immediate beneficiaries of the politics of production, as advocates of distributionist politics point out, are not always needy: students capable of absorbing higher education and adults capable of holding high-skill jobs are not usually from the poorest income groups. But in the long run, everyone is society will be richer for their work. In embracing these policies, Democrats have abandoned, for a time, the distributionist impulse. In the 1970s it led them, to take just one example, to oppose decontrol of gas and oil prices because of the effect higher prices would have on the poor. Over time the Democrats came to accept decontrol on the ground that it maximizes production.

This is what Democrats have done in the past: the First New Deal and the Kennedy-Johnson 1961-64 policies were designed to stimulate production. Only afterward, in the Second New Deal and the Great Society, did the Democrats get around to the politics of distribution. This makes sense if you believe that only a society with sustained economic growth can afford a politics of redistribution, and that a society without growth must concentrate on production first.

But will policies of production prevail in a Democratic government? We heard little

about them on the campaign trail, and there are few infrastructure, human capital, and national investment bills being pushed on Capitol Hill the way federal aid to education and Medicare were pushed in the late 1950s (an exception, the gas tax/highway bill, is likely to be passed easily with bipartisan support in the next few weeks). The lobbying forces behind most of these new ideas seem weak. How will such policies prevail when they come into conflict with major Democratic constituencies that favor what I would call not policies of distribution but policies of protection, policies that spend rather than create national wealth?

Labor unions, for example, have memberships concentrated in industries and occupations that seem likely either to contract or be stagnant in the 1980s: autos, steel, building trades, government. Each union has its own agenda for protecting its members' interests: the UAW wants the local content bill, the Steelworkers want import quotas, the public employees' unions want generous pensions. They want to maintain, through subsidies or protectionsim, an economy and job structure like that of the America of 1975 or 1965 or 1955. The unions have enormous political clout with Democrats, given labor's active role in the 1982 campaign and the AFL-CIO's decision to consider endorsement of a presidential candidate in November 1983.

Other constituency groups lead the Democrats toward protectionism. Geographically, the party is strongest in the Northeast and Great Lakes industrial states where growth has been low and outmoded industries seek to maintain a status quo the free market will not support. Incoming Democratic governors support domestic protectionsim: Mario Cuomo brags that he will see that New York buys subway cars in New York, not Montreal or France; Richard Celeste makes as one of his five major economic stimuli a state "buy Ohio" policy. Job quota programs sought by blacks and other minorities are, after they have been in effect awhile, a form of protecting a status quo rather than producing a new and different future. So are policies maintaining the size of city bureaucracies in cities whose population has dropped.

So while the politics of production is in the policy paper stage, the politics of protection, with its strong constituencies, has drafted bills, signed up cosponsors, and gotten pledges of support. Get almost any Democratic politician off in a corner, off the record, and you'll find someone who recognizes the long-term stagnating effect of the politics of protection. But get a Democrat in office or on the presidential primary campaign trail, and you may hear something else again.

The best clue as to how the Democrats would perform in office if they win in 1984 will come not in the Congress, where Democrats still have to respond to Republican initiatives and in the awareness that anything must be approved by Republicans to pass, but in the big states. In New York, Ohio, Michigan, Wisconsin, Minnesota, Massachusetts, Democrats are in power and face difficult problems. Governors like Cuomo and Celeste are eloquent supporters of the politics of production. But they also support many protectionist policies. In the crunch, which side will they come down on? The battle for the soul of the Democratic Party is going on right now, and the outcome is by no means as certain as the purveyors of the new ideas of the politics of production would have you believe.●

MESSAGE OF THE 1982 ELECTION: II

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for November 24, 1982, into the CONGRESSIONAL RECORD:

THE MESSAGE OF THE 1982 ELECTION: II

It will take months before the meaning of the 1982 election is fully sorted out, analyzed, and digested. Part of the meaning, however, is emerging even now.

One message the politicians received from the 1982 election is that the voters are tired of partisan bickering and wish nothing so much as to see the leaders of the country sit down together to resolve the tough issues of the day. Hoosiers, like other Americans, remain apprehensive about the future. They are "on hold" for now, but they want solutions—not just rhetoric—from the politicians.

All during the 1982 campaign, I found conflicting feelings among the voters. They wanted to "stay the course", but they also wanted to make a "mid-course" correction. They liked the idea of cuts in taxes and spending, but they also demanded fairness and balance in the cuts. They suspected that the tax and spending cuts of 1981 were neither fair nor balanced. They wanted a more tempered shift that would put the nation on a more solid, certain course.

In addition to the basic messages about economic policy and political moderation, the 1982 election had other important characteristics: more negative campaigning than ever before, further sharp increases in the cost of running for office, a "gender gap" in the voting totals, several decisive issues, and a rise in voter turnout.

The relentless negative tone of the 1982 campaign bothered me just as it clearly bothered many other voters. This tone may be unavoidable partly because the times and the issues are difficult and partly because the voters are often motivated by their view on specific matters. Also, negative campaigning sometimes makes tactical sense. The polls show that strong attacks on leading candidates can narrow margins and change defeats into victories. Nevertheless, I believe that the voters yearns for candidates who will take a positive approach to the nation's problems. I think that they are less impressed by candidates who seem only to criticize without offering a reasonable vision for the country. The losses among candidates who used negative advertisements in their campaigns suggest that this is so.

I do not expect politics to be a mild business. My guess was that the 1982 election would be a rough-and-tumble affair. In an election, issues deserve vigorous discussion. However, I am concerned about harsh personal assaults on the integrity of candidates. Such attacks obscure the real issues and heighten cynicsism about politics. In the end, negative campaigns keep the voters from hearing a full discussion of the issues. Also, they cripple the government as it attempts to manage the critical matters in the public agenda.

The 1982 election will certainly be noted for lavish spending. Even though several big spending candidates—Republican gubernatorial candidate William Clements in Texas ($12 million) and Democratic senatorial candidate Mark Dayton in Minnesota ($6 million)—were beaten, their losses do not prove that cash is unimportant in politics. The general rule that the winners outspend the losers still holds. What really counts in campaign financing is not having more money: it is having enough money. There seems to be a point in any election after which the spending of that extra dollar does not help much. However, most of the experts believe that the Republican Party used its strong financing to keep its losses down, especially in the House of Representatives. Money was a very important factor in the open seats where no incumbents were standing for election and in the seats where the contest was close.

There was a definite "gender gap" in the 1982 election. Across the nation, women supported Democratic candidates more readily than men did, and in a number of races—for example, for the governorships of Texas and New York—their support probably was decisive. Political analysts have commented that this trend may show women to have a greater interest than men in issues of peace and in the welfare of average people.

The politicians will certainly examine the voters' decisions on several specific issues in 1982. One was the nuclear freeze. Eight states voted in favor of a mutual halt in the testing, production, and deployment of nuclear weapons by the United States and the Soviet Union. The politicians will also seek to understand the decisive defeat of an initiative on gun control in the State of California and the approval of proposals upholding the right to bear arms in the States of New Hampshire and Nevada. To a good many observers around the country, these outcomes were unexpected.

One of the most encouraging features of the 1982 election was that the voters turned out in greater numbers than in the last two nonpresidential elections. The preliminary figures seem to indicate that more than 40% of the population of voting age went to the polls, compared to 35.5% in 1978 and 36.2% in 1974. In some states, the increase in the turnout of voters was considerably higher.

Beyond the simple facts and figures of the 1982 election, it is important to weigh the political effect of the results on the winners. Many of them have already acknowledged that new political realities require a pragmatic coalition, and that theirs is a victory against confrontation and stalemate. They are saying that the voters want them to work together in different political arrangements and not to adhere too rigidly to previous policies.●

POLL'S CONTRADICTIONS SHOW NUCLEAR ISSUE IS NOT SIMPLE

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. BEREUTER. Mr. Speaker, I would like to bring to the attention of my colleagues an editorial from the Omaha World-Herald that recounts the results of a poll examining the attitudes of 884 Nebraskans regarding a nuclear freeze.

It is important to note that a significant percentage of those polled appeared to consider arms reduction more effective than a freeze as a way of reducing the grim threat of nuclear war. It is certainly as important to note that there are contradictory results that suggest that this issue is much more complicated than many people are willing to acknowledge.

POLL'S CONTRADICTIONS SHOW NUCLEAR ISSUE ISN'T SIMPLE

President Reagan's approach to reducing the threat of nuclear war commanded a high level of support among 884 Nebraskans questioned recently for a World-Hearld Poll.

But the poll results also indicate considerable confusion over the pros and cons of a nuclear freeze.

Four out of five—83 percent—of those polled said they agree either "strongly" or "somewhat" with a statement that the United States should work hard to negotiate a new nuclear arms reduction treaty with the Soviet Union—instead of an immediate freeze that would keep U.S. and Russian weapons at their current levels.

The Reagan administration's position is that freezing nuclear arsenals at current levels would contribute to world tension by locking the United States into a strategic disadvantage. At such a disadvantage, the U.S. arsenal would be inadequate as a deterrent to the Soviets, the administration contends.

The United States and the Soviets have begun Strategic Arms Reduction Talks (START) to examine, among other proposals, Reagan's suggestion that the number of U.S. and Soviet nuclear warheads be reduced by one-third and that ground-based, intermediate-range missiles be eliminated from Europe.

While 83 percent said they favored arms reduction instead of a freeze, responses to other questions about the nuclear freeze proposal seemed to contradict that.

The most common freeze proposal calls for a U.S.-Soviet agreement on an immediate, verifiable and mutual freeze on the testing, construction and deployment of new nuclear weapons.

Asked if they would favor such a freeze, assuming that the United States was behind the Soviet Union in nuclear arms, 56 percent of the 884 Nebraskans in The World-Herald Poll said "yes."

Fifty-two percent of those who said "no" said they would approve of a freeze if the United States catches up with Russia. Asked to assume the United States was ahead—an assumption only 13 said they agreed with—71 percent said they would approve of a freeze.

A case can be made that, when confronted with a question that explains the position the Reagan administration is taking—that is, against an immediate freeze but in favor of negotiations for an arms reduction treaty—those polled strongly preferred this approach to the more publicized, more emotionalized "immediate freeze" proposal.

The 884 Nebraskans also were asked for their reaction to this proposition: "The best way to avoid nuclear war is for the United States to continue to produce nuclear weapons to achieve a balance of power with the Soviet Union."

This approach—which might well be called a "hard line" and contrary to the immediate freeze proposal—received more support (61 percent) than did the "immediate freeze" proposal with the assumption that the United States is behind the Soviet Union.

What all this adds up to is that a majority of the Nebraskans polled took what seemed to be contradictory positions.

What can be concluded?

Many people are concerned about nuclear war and anxious to reduce the threat. A significant percentage of those questioned appeared to consider arms reduction more effective than a freeze as a way of reducing that threat.

But the contradictory results also suggest that opinions are relatively unformed on the subtleties of the nuclear debate—perhaps because the issues are more complicated than many are willing to acknowledge.

THE ACID RAIN DEBATE

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MURTHA. Mr. Speaker, I am glad to share with the members a letter I received recently concerning acid rain. The letter came from Charles L. Hosler, dean of the College of Earth and Mineral Sciences at the Pennsylvania State University. I had sent Dean Hosler a set of articles from the Washington Post, concerning the acid rain debate. I find his comments to be most informative and I suggest we all take these thoughts into account as we consider the Clean Air Act extension.

PENNSYLVANIA STATE UNIVERSITY,
COLLEGE OF EARTH AND MINERAL SCIENCES,
University Park, Pa., October 7, 1982.

Hon. JOHN P. MURTHA,
House of Representatives, Washington, D.C.

DEAR MR. MURTHA: I have examined the articles you sent which deals with acid rain.

We have unfortunately reached a point in the discussion of acid rain where no one can introduce any new data or scientific finding and the arguments are made on other grounds. Some of the most prominent atmospheric chemists in the country have made it clear that we are in no position to assign responsibility or to predict whether stopping the burning of coal would reduce acid rain by any significant amount. Within the next few years there should be enough new data to tell us what, if anything, should be done. In the meantime we should refrain from joining in the arm waving and posturing based upon political, economic or nationalistic inclinations and support those who are seeking scientific answers. We know that the principal contributors to acid rain are sulfates and nitrates. We know that the precursors for both of these have both natural and man-made origins. We also know that in some regions nature is the dominant producer and in others man is. It would be simple if the rain was only acid downwind of the man-made sources. However some measurements show rain is highly acid in regions where man contributes next to nothing. Some indications of increased acidity in lakes over time are contradicted by other measurements in Wisconsin and New York where no trend exists but wide excursions occur from year to year toward more or less acidity. Fish life diminishes in some lakes or streams and increases in others. There are indications that even cutting man-made emissions radically may have very little impact on the acidity of rain because a third and independent variable may be controlling the conversion of oxides of sulfur and nitrogen to acid. Even if controlling oxides of sulfur and nitrogen look like the way to go, controlling strategies depend upon whether gaseous emissions or particulate emissions are the culprits. We are extremely ignorant about atmospheric chemistry. It is very complex and difficult.

The acceleration of research programs on acid rain should include emphasis upon:

1. Assessment of natural sources.

2. Studies of in-cloud chemistry and physics to determine how the acid is formed.

3. Measurements of the nature and quantity of the deposition of acids in the absence of precipitation.

4. The chemistry of the atmosphere in general must be better understood.

We are certainly in no position to converge on a control strategy at this time. It would be shear folly to commit ourselves to spend hundreds of billions on controls which may in the long run have little impact on the problem. If pressure to do so builds, I would recommend that before going ahead with it we do a much less expensive experiment as follows:

Produce a reduction in emissions in the area being accused for several two-week periods by (1) using low sulfur fuels temporarily; (2) importing hydroelectric power from Canada; (3) maximizing nuclear output; (4) minimizing power consumption; (5) shutting down some big sulfur producers in favor of more clean plants, etc. The point is that we would do an experiment by shutting off the alleged sources for long enough periods to see whether the acidity of the rain in New England and Eastern Canada was correspondingly decreased.

This experiment would require the accusers to define their theory well enough to enable statisticians and atmospheric chemists to design an experiment to determine the validity of the claims that power plants in our industrial heartland are the real culprits. After we have the results, we can then discuss controls and their benefits and costs.

I feel that, for short periods sufficient to test the hypothesis, a reduction in emissions could be achieved which would be comparable to any reduction possible with the hundreds of billions of dollars worth of hardware and operational costs involved in any proposed control strategy. If there are costs for this experiment as there are certain to be, then the federal government should underwrite them. The cost will be one thousand times less than the cost of going ahead with controls. Our Canadian neighbors would, I am sure, be willing to temporarily furnish hydroelectric power. The American public may be willing to reduce power consumption during the test periods.

This is only a concept and not an experimental design. The design of the experiment and making the arrangements would take some time and money but the scientific and engineering community can handle it.

Very truly yours,

CHARLES L. HOSLER, *Dean.*●

REQUEST FOR A RULE ON LEGISLATION TO ADDRESS THE FINANCING NEEDS OF THE HIGHWAY TRUST FUND

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. ROSTENKOWSKI. Mr. Speaker, as this Chamber is well aware, the Committee on Ways and Means is holding a public hearing tomorrow to address the financing needs of the highway trust fund for fiscal years 1983-86.

It is my expectation that upon the conclusion of this hearing the committee will convene later this week to consider the development of a financing title to the current multiyear highway authorization bill that has been approved by the Committee on Public Works and Transportation.

When the committee completes its work on the revenue title, we will appear with the Committee on Public Works and Transportation before the Committee on Rules to seek an appropriate rule for the consideration of this matter by the House of Representatives. At that time, it is my expectation that the Committee on Ways and Means will request less than a complete open rule for the revenue title.

Pursuant to the rules of the Democratic Caucus, I am taking this opportunity to notify my colleagues of our intention to do so. Although traditional procedure would dictate more details being available at this time, the rapid pace by which this legislation might proceed through the legislative process makes it necessary for me to put the Members of the House on notice in this way at this time.●

LELAN F. SILLIN, JR.—NEW ENGLAND COUNCIL 1982 DISTINGUISHED SERVICE AWARD WINNER

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mrs. KENNELLY. Mr. Speaker, the New England Council, Inc., a business organization representing 1,200 corporations throughout the New England area, recently honored Lelan F. Sillin, Jr., a member of its board of directors, as the recipient of the New England Council's Inc., Distinguished Service Award.

Mr. Sillin, a native of Connecticut, is indeed, an outstanding citizen and one truly deserving of this award. Mr. Sillin is president of Northeast Utilities and became its chief executive in 1969. He was elected to the additional post of chairman in 1980.

Mr. Sillin is a leader in the world of commerce in New England. Among his roles, he serves as director of Arthur D. Little, Inc., Irving Bank Corp., and Irving Trust Co., its principal affiliate, and the Hartford Steam Boiler Inspection & Insurance Co.

Mr. Sillin has, as well, served his nation. He served in the U.S. Marine Corps and was commissioned a second lieutenant in 1942. He served in the South Pacific until 1945, when he was appointed judge advocate of general courts martial at Camp LeJeune, N.C. He left active service later that year. In 1957, he resigned from the Marine Corps Reserve with the rank of major.

In addition, Mr. Sillin was appointed by then U.S. Treasury Secretary Blumenthal to serve as Hartford geographic area chairman and as a member of the U.S. Industrial Payroll Savings Committee for 1978 and 1979.

Mr. Sillin's accomplishments are numerous. He is vice chairman of the board of trustees of Wesleyan University and serves as chairman of its development committee. In 1982, he completed his fourth term as a director of Edison Electric Institute. He is chairman and a director of the Institute of Nuclear Power Operations and of the Fuel Cell Users Group. He is a trustee of the Hartford Graduate Center and a trustee of Edwin Gould Foundation for Children. He is a director of Atomic Industrial Forum, Inc., the National Office for Social Responsibility in the Private Sector, Helium Breeder Associates, and a senior member of the conference board.

In July 1978, Mr. Sillin was invited to serve as a member of the Public Committee on Mental Health, created to assist and support the President's Commission on Mental Health in accomplishing its goals of identifying the mental health needs of the Nation.

In January 1978, Mr. Sillin served on the Advisory Committee to the White House Conference on Balanced National Growth and Economic Development. The conference studied economic development and energy needs, ways to achieve stable prices and full employment, fiscal problems of many local governments, the balance between economic and environmental needs, the way the public sector influences the geographic distribution of economic activity and population and environment protection of scarce natural resources.

He was named to the Industrial Advisory Committee to the Defense Electric Power Administration by the Secretary of the Interior in 1975 and was a member of the Utility Advisory Committee to the Federal Energy Administration.

In 1971, he authored "A Project for Prometheus," a $20 billion, 30-year proposal in search of pollution-free energy to serve future generations.

In 1969, President Nixon appointed Mr. Sillin to his Citizens' Advisory Committee on Environment Quality. He was reappointed in 1972 and served on the committee until 1976. The committee, which consisted of the Vice President and certain members of the Cabinet, advised the President and his Council on Environmental Quality on the most effective means of developing and conserving natural resources.

From December 1968 to January 1969, Mr. Sillin served as member of the Task Force on Resources and Environment which advised President-elect Nixon in this field. The task force was 1 of 10 formed to counsel the President in areas of domestic planning.

In addition to having been a vice president and trustee of Urban America, from 1967 until 1970, Mr. Sillin was chairman of an Urban America committee to strengthen Youth Organizations United (YOU), a national organization of about 350 former city gangs-turned-youth groups whose objective is self-help through involvement in a variety of constructive activities including the development of small businesses. With the merger of Urban America and the Urban Coalition in 1970, he was appointed to the steering committee of the new organization, the National Urban Coalition, and also is a member if its Subcommittee on Energy and the Cities.

He was chairman from 1965 to 1972 of the National Power Survey Executive Advisory Committee of the Federal Power Commission. He worked with Laurence S. Rockefeller in organizing the Electric Utility Task Force on Environment of the Citizen's Advisory Committee on Recreation and Natural Beauty.

He was appointed to the advisory council, Hudson River Valley Commission by Governor Rockefeller in 1965. He was the founder and former chairman of Mid-Hudson Pattern for Progress, Inc., a regional planning, research, and development organization. Mr. Sillin is also a life trustee of Vassar Brothers Hospital, Poughkeepsie, N.Y.; a corporator of Hartford Hospital; a corporator of the Institute of Living, Hartford; and an advisory trustee of Woodrow Wilson National Fellowship Foundation.

The New England Council's 1982 Distinguished Service Award is fitting testimony to Mr. Sillin's outstanding contributions in the area of energy development and to his strong sense of public responsibility and civic leadership.●

SECTION 313 OF TEFRA

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. KINDNESS. Mr. Speaker, one of the little noticed but particularly nettlesome provisions of the so-called Tax Equity and Fiscal Responsibility Act of 1982 is section 313, which requires the States to notify recipients of State income tax refunds that such refunds may subject them to additional Federal income tax liability.

Section 313 is one of the revenue enhancement provisions of TEFRA, and the Internal Revenue Service anticipates that it could result in the collection of an additional $100 million in Federal revenues over the next 3 years.

This law not only requires the States to make the appropriate notification, it requires the notification to be made in the month of January following the year in which the refund is paid. That additional requirement effectively precludes the notification being made at the time the refund is issued. A separate mailing will have to be made in virtually all cases.

This minor provision of TEFRA will not be without impact on already strained State budget resources. In my own State of Ohio, the costs just for postage to mail these notices will approximate $500,000 next year. In the State of California, the postage costs are estimated to be $2,500,000.

Prior to enactment of TEFRA, Federal law already required the States to notify IRS of any tax refunds made by the State. As in the case of withholding of interest and dividend income, TEFRA has permitted IRS to shift to someone else the burden and cost of assuring that Federal taxes are collected.

Mr. Speaker, I am today introducing legislation to make technical amendments to section 313 of TEFRA, to provide that the required written notification may be made by the States any time prior to the end of January of the year following the payment of the refund. The effect will be to permit the States to make the notification of potential Federal tax liability at the same time the refund is mailed.

Additionally, my bill would delay implementation of section 313 for 1 year in order to permit States the necessary time to prepare for the notifications.

It is my hope that this legislation will preserve some of the intended benefits of section 313, while alleviating some of the unreasonable costs and reporting burdens that section has imposed upon the States. It is my plea that the Committee on Ways and Means give early and fairable attention to cleaning away this unwarranted and costly mistake in the Tax Equity and Fiscal Responsibility Act of 1982.●

IMMIGRATION REFORM AND CONTROL ACT OF 1982

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MAZZOLI. Mr. Speaker, the Immigration Reform and Control Act of 1982, H.R 6514, is, in the words of today's Washington Post, "must legislation" for this Congress. It is a good bill that approaches immigration reform in a fair and balanced way.

So many of our colleagues have taken the time to study the bill and ask me questions about it, that I thought a brief update would be helpful.

The Senate passed its companion bill, S. 2222, introduced by Senator ALAN K. SIMPSON, by a vote of 80 to 19 on August 17.

The House Judiciary Committee passed the bill on September 22.

The administration strongly supports passage of the legislation.

And now it is time for this body to act.

For the benefit of my colleagues, I am including a summary of the bill at the conclusion of my remarks. If there are any questions, please contact me or the Immigration Subcommittee staff on 55727.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

(As reported by House Committee on the Judiciary—September 22, 1982)

I. ILLEGAL IMMIGRATION

A. Employer sanctions

Makes it unlawful for any employer knowingly to hire for employment or to recruit for a fee, after the date of enactment, any alien not authorized to work in the United States.

Requires employers of four employees or more to have all prospective employees show them, as a condition of hiring, either: (1) a U.S. passport, or (2) a U.S. birth certificate or social security card and a driver's license, or a state issued I.D. card, or an alien identification document.

Requires such employer, to attest in writing, under penalty of perjury, that he has seen the necessary documentation; requires the employee, to attest in writing, under penalty of perjury, that he or she is authorized to work in the U.S.

Any employer of four or more employees who does not meet the requirements for checking documents, signing the appropriate form, and retaining the appropriate form is liable to a civil fine of $500 per employee hired.

States that within three years of enactment the President shall make such changes "as may be necessary" to make the system more secure.

States that the bill does not authorize the creation of national identification cards.

Establishes a graduated penalty structure for hiring unauthorized aliens—first offense: warning; second offense: $1,000 civil fine per unauthorized alien hired; third offense: $2,000 civil fine per unauthorized alien hired; fourth offense: $3,000 criminal fine per unauthorized alien hired or one year in jail, or both. Also, Attorney General may seek an injunction to stop pattern or practice violators.

Requires an extensive outreach program to inform employers, employees, and the general public of this new law. Allows violations occurring during the first six (6) months after enactment to go unpunished.

Gives violators a right to a hearing before a Department of Justice Administrative Law Judge.

Requires Civil Rights Commission to issue reports on possible discriminatory effect of this law.

Creates an affirmative defense for employers who have complied with the attestation requirements in good faith.

Creates a Department of Labor/Department of Justice task force to review complaints of discrimination.

Makes it a felony to use fraudulent documents in order to obtain employment.

B. Increased border and other enforcement; user fees

Creates criminal penalty for bringing an alien to the U.S., knowing or in reckless disregard of the fact, that the alien had not received prior official authorization to enter.

States the sense of Congress that resources for border patrol and other immigration enforcement activities of the Immigration and Naturalization Service and other agencies should be increased.

Allows Attorney General to impose fees for the use by aliens of border and other immigration facilities and services in an amount commensurate with cost.

C. Adjudication procedures and asylum

Creates United States Immigration Board, an independent agency within the Department of Justice. Six member Board is appointed by the President with the advice and consent of the Senate, with members serving six year terms. It may meet en banc or in panels of three or more. It hears all appeals from decisions made by the Administrative Law Judges.

Chairman of Board appoints up to seventy Administrative Law Judges to hear all exclusion and deportation cases (including those involving asylum), challenges to fines, and all other matters heard by the present Board of Immigration Appeals. Some of the Administration Law Judges are specially trained to hear asylum cases.

Decisions by Administrative Law Judges would be reversible by the Board if not supported by substantial evidence.

Judicial review in exclusion cases available in U.S. Circuit Courts.

Judicial review of asylum matters available in Circuit Court once a final order of deportation or exclusion has been entered.

Judicial review of non-asylum deportation cases available in Circuit Court of Appeals.

At asylum hearings, alien is entitled to an open hearing, representation by counsel, the right to call witnesses, present evidence, and confront witnesses.

Aliens who attempt to enter the U.S. without proper documents can be excluded unless they assert some reasonable basis for entering the U.S. or claim asylum, in which case they are entitled to go before an Administrative Law Judge and receive a full scale hearing.

Requires speedy asylum hearings: If alien is not given asylum hearing within 45 days

of the filing of the application, the alien, if detained, will be released on parole.

Imposes various time limits in the processing of asylum claims.

D. Adjustment of status

Adjustment of status procedure would not be available to aliens who have violated the terms of their nonimmigrant visa.

II. LEGAL IMMIGRATION

A. Labor certification

Labor certification can be granted on the basis of nationwide job market data or on a case by case basis. Certification must include a finding that sufficient U.S. workers could not be trained within a reasonable time.

Allows certain aliens having labor certifications to remain in the U.S. if a visa will likely be available within two years.

B. Amerasian children

This provision is now unnecessary because of separate legislation passed in October 22, 1982—Public Law 97-359

C. G-4's

Relief provisions are provided for certain children and widowed spouses of employees of international organizations.

D. Nonimmigrants

Special procedure established for H-2 seasonal workers in agriculture:

The employer must apply to the Secretary of Labor no more than 50 days in advance of need, asking for foreign workers; employer than must attempt to recruit domestic workers;

The Secretary of Labor must provide a decision on the certification no later than 20 days in advance of need;

If the Secretary of Labor determines that a certain number of qualified U.S. workers will be available at the time needed, but at the determined time those workers are not qualified and available, an expedited procedure to determine need would be available.

E. Visa waiver

After the Immigration and Naturalization Service has implemented a system to track the entry and exit of nonimmigrants, the State Department may establish a three year pilot nonimmigrant visa waiver program for five countries which provide or will provide a similar benefit to the U.S. The visa refusal and visa abuse rates for the nationals of such countries must be minimal, and the visitors must have nonrefundable, roundtrip tickets.

F. Foreign students

Foreign students who enter the U.S. after date of enactment will not be allowed to adjust status or return to the U.S. until they have resided in their home countries for two years, unless such a student is an immediate relative of a U.S. citizen. Foreign students who entered before date of enactment will not be permitted to adjust status, and must leave the U.S. to seek a visa if they wish to return. Exceptions are allowed, until 1989, for students with degrees in natural science, engineering, computer science, or mathematics with certified job offers in universities or industry. Exceptions also for adjustment to three years nonimmigrant training status in industry.

III. LEGALIZATION

Permanent resident status (not citizenship) for aliens who have continuously resided in the U.S. since January 1, 1977 and who are not excludable. (See below.)

Temporary legal status for (a) aliens who have continuously resided in the U.S. since January 1, 1980, and (b) "Cuban/Haitian entrants" who were previously given special legal status, and who are not excludable. (See below.)

Persons receiving temporary status will be able to adjust to permanent resident status three years from date of enactment. If they have not done so three and one-half years after date of enactment, their temporary resident status expires.

Federally funded public assistance (other than medical care, aid to aged, blind, or disabled, and for serious injury or in the interest of public health) will not be available to permanent residents for three years and temporary residents for six years (other than "Cuban/Haitian entrants").

Persons will not be eligible for legalization who:

Have been convicted of a felony or three misdemeanors committed in the U.S.;

Have assisted in political persecution;

Have been convicted of a crime involving moral turpitude, or two or more offenses for which sentences aggregating five or more years were imposed;

The government has reason to believe seek to enter for activities inimical to the welfare, safety or security of the U.S.;

Are, or have been, anarchists, Communists, or who advocate the overthrow of the government;

Are Nazis;

Would engage in subversive activities;

Have been convicted of a drug violation, other than simple possession of 30 grams or less of marijuana;

Are nonimmigrant exchange aliens subject to a two year foreign residency requirement.

Authorizes "such sums" for each year through Fiscal Year 1989 for the purpose of reimbursing state and local governments for increased educational and public assistance costs resulting from the legalization program.

Provides that aliens in the U.S. continuously since January 1, 1973 may adjust to permanent resident status if of good moral character and not ineligible for citizenship.

IV. MISCELLANEOUS

A. Putative fathers

Recognizes, for preference petitioning purposes, the relationship between a biological father and his illegitimate child.

B. Retirees

Allows self-sufficient aliens who entered U.S. prior to 1978 in expectation of obtaining an immigrant visa as retirees to adjust to permanent resident status.●

JOHN J. GILL HONORED AS CITIZEN OF THE YEAR

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. RUSSO. Mr. Speaker, the National Association of Patients on Hemodialysis and Transplantation is indeed "the voice of the kidney patient." This is the group "dedicated to kidney patients and their second chance at life" and I know we all applaud the efforts and achievements of this organization.

I recently had the pleasure of speaking to the Chicago chapter and met many of the fine people involved in this important group. One of them, Mr. John J. Gill, the first vice president, is retiring and has been chosen as their citizen of the year. I think reviewing some of the remarks made about Mr. Gill the evening he was honored will demonstrate why he clearly deserves such an award. His is the sort of active, committed citizenship we wish we could see more often and to encourage. With this in mind, at this time I would like to share these remarks with my colleagues and to congratulate Mr. Gill and the dedicated organization of which he is a part.

BACKGROUND INFORMATION ON JOHN J. GILL

Our Citizen of the year for 1982 is an Evergreen Park resident, Evergreen Park businessman and is a man whose middle initial stands for his outlook on community involvement for the past 3 or 4 decades. . . . "J" is for JOINER . . . but our Citizen of the Year did not merely Join In and Join Up . . . he has been and is still an active Doer. When our Citizen of the Year became a member of a community organization, he never felt comfortable simply being listed as a member, he was always an active member who typically held office in the organization.

As a matter of fact . . . he has held the office of President 5 times . . . as President of the West Ogden Civic Improvement Association . . . President of the 95th Street Beverly Hills Business Association . . . President of the Evergreen Park Chamber of Commerce . . . and President of the Savings Institutions Marketing Society of America, Chapter One and President of the Savings Association Advertising Council. For variety, he also served as Chairman of the Southtown Planning Association Advisory Council which led to his appointment by then Chicago Mayor, Richard J. Daley, to chair the Englewood Conservation Council. He was Vice President of the Beverly Area Planning Association and a director of the Evergreen Plaza Merchants Council.

A resident of the Park for 21 years . . . our Citizen of the Year's Heart is, along with his home, in Evergreen. After serving the Business community through the Chamber on numerous committees, he moved up in the chair to spearhead the group in 1975 as President. During his term of office, he asked Chamber members to Come Alive in '75 . . . and they did helping him to reach his goal of 200 Chamber members, a 30 percent increase in membership. In reaching this milestone, he laid the foundation for our annual membership drive which consistently results in new members, our lifeblood, every year. A marketing oriented individual who wanted to respond to the businessman's question "What's In It For Me" . . . he also initiated the first joint sales campaign, a coupon page in local newspapers which has developed into the Shop Evergreen program that we are familiar with today. To better link the residents of the Village with their business community . . . he organized a Ball on the Mall . . . where 700 merchants and residents of the Park mingled socially at an evening of dinner and dancing right in the center square of the beautiful Evergreen Shopping Plaza. He has continued this involvement in the Evergreen and surrounding communities right up to his retirement.

The same type of commitment, a whole hearted commitment, that he made and exemplified in the community . . . is evident at home and at his second "home" . . . Concordia Federal Savings where his career spans 36 years and several job responsibilities. He joined the Association, then located in Englewood, in 1946 as Assistant Bookkeeper and Proof Clerk. During his career with the 93-year old S&L, he wore many hats, among them: Accounting Clerk, Teller, Head Teller, Improvement Loan Officer, Savings Officer, Savings and Advertising Manager, Personnel Manager, Customer Service Vice President, Senior Vice President and Marketing Manager and President of Concordia Subsidiaries.

He is a graduate of the American Savings and Loan Institute and the School for Executive Development at the University of Washington and he has also taken courses in advertising, public relations and personnel at Northwestern University.

He is a man with an intense Love . . . Love of life, Love of his family, Love of challenging work, community and a love and gratitude to his God who made all of the other possible. He is active in Holy Redeemer parish and even "crosses parish boundaries" to participate in St. Bernadette's golf league with several long time friends. He may have made a few bad decisions over the years . . . but both are sports related, he has avidly supported losers . . . the Chicago Bears as a season ticket holder for many years and the Chicago Cubs.

Three years ago, his wife of 31 years, Joan, learned she was suffering from kidney failure and became a kidney dialysis patient. With the same intensity, enthusiasm and love that he has exhibited his entire life, he was determined to learn more about kidney disease and do anything in his power to encourage more research and raise funds to make a future cure a possibility. . . . He became a member of the National Association of Patients on Hemodialysis and Transplantation and is now serving the Chicago area chapter as 1st Vice President, responsible for their monthly newsletter and also spearheading fund raising events which have received national publicity coverage.

Well rounded is a great way to describe the man that we honor this evening . . . as he begins his retirement; he can and should feel well satisfied with his successful and impressive business career, rich history of community involvement, respect, admiration and love of his family, Joan and their 3 daughters, sons-in-law and grandchildren, and even success at his favorite pastime, golf.

According to Webster, a Citizen is a person owing loyalty to and entitled by birth to the protection of a given state. Tonight we have a man who has taken this definition to heart, not only in 1982, but who has been loyal to his community over a life time . . . tonight we honor, John J. Gill.●

NATION'S SPENDING PRIORITIES

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. SCHUMER. Mr. Speaker, as the full House debates the Nation's spending priorities during the next few weeks, we might well listen to the thoughts of one of my constituents, Mr. Peter M. Spiro. Having served in the Navy, Mr. Spiro's perspective on defense spending is an interesting one, and certainly worthy of our attention. I would like to share the intelligent and articulate arguments of Mr. Spiro with all who are committed to responsible spending priorities and the exorcism of waste in the Federal budget.

NOVEMBER 23,1982.

CONGRESSMAN SCHUMER, I spent six years in the Navy and I recently got discharged on 9 Nov. 82. It really bothers me that this country wastes so much money on the defense budget when we are in need of so many other things. This country needs more jobs, training programs, more programs to aid the elderly and poor and so much more.

In New York City the bridges are falling apart, the roads are terrible, and the subway system is a disaster. I would rather see my tax money be used for these sort of things than to be wasted on an overpriced defense budget. I am in favor of a strong national defense but I'm not in favor of making companies rich in the name of defense.

I'm talking about the Government being outrageously overcharged for the things it buys.

When I was in the Navy I was a fire control technician. I worked on a guided missile fire control system.

When we ordered spare parts I couldn't believe the price of some of them.

We once ordered a gearbox for a radar attena which was no more complicated than an automobile transmission and it cost $60,000.

We once ordered a rubber hose for a radar cooling system which cost over $500.

These are just two isolated cases of overcharging.

This kind of outrageous overcharging goes on, on every ship and shore base throughout the world.

Needless to say this is why our defense budget is so high. Our tax money is used to make already rich companies richer while our cities are falling apart.

This is a crime and an insult to the people of America.

I hope you will work to stop this sort of waste with the people's taxes.

Sincerely,

PETER M. SPIRO.●

TRIBUTE TO VIETNAM VETERANS

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'NEILL. Mr. Speaker, during the period of November 10-14, the people of the United States paid a long overdue tribute to the Vietnam veterans. These brave men and women who sacrificed so much yet received so little were finally honored some 10 years after the fact. The Congress had, however, passed legislation that provides these vets with a wide range of services.

Programs in veteran health care that also include problems related to agent orange, programs for job training, a loan program for the Vietnam vets in small business, extended education for those whose GI bill has expired, and unemployment benefits for vets who served at least 2 years—these programs are the primary steps down the road to rectifying a situation that should have been taken care of a long time ago. We must not let it stop there. There is still so much we must do, as such—an indepth look into the agent orange matter, better employment opportunities, health benefits and educational benefits. This is the least we can do for these courageous Americans who served their country well when duty called.●

H.R. 6514: THE NEED FOR FURTHER DISCUSSION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. GARCIA. Mr. Speaker, it has been inferred that the consideration and passage of H.R. 6514, the Immigration Reform and Control Act of 1982 would help heal America's unemployment problems.

I find this ironic. One, because I firmly believe that blaming undocumented immigrants for unemployment problems is scapegoating. Two, because an expanded H-2 program—that is a program that invites workers from Latin America and the Caribbean, to work in this country on a temporary basis—has been included in H.R. 6514. This seems to be another version of the now abolished Bracero program, which was instituted as a result of a labor shortage.

I appreciate the extensive work done by the authors of H.R. 6514. I understand the problems that confronted them in their drafting of this bill. But I still believe a change in our immigration policy must take into account a variety of interests not addressed in H.R. 6514.

One such area, not touched on by this bill, is the foreign policy aspects of immigration reform. I published an article in the November 8 edition of the Christian Science Monitor on this subject. I am not proposing that my article contained the answer to U.S. immigration problems, but I feel that it does add another dimension to the discussion of this question.

I, therefore, hope that my colleagues will consider postponing scheduling this bill during the lameduck session. It is much too important an issue to be rushed.

Our immigration problems will be with us for the indefinite future. Continued study of this problem does not mean that it should not be addressed; it simply means that some major ques-

tions regarding immigration reform have not been answered.

I submit the article from the Christian Science Monitor for examination by my colleagues.

[From the Christian Science Monitor, Nov. 8, 1982]

STOPPING ILLEGAL IMMIGRATION AT ITS SOURCE

(By Robert Garcia)

Control over the entry of noncitizens is a key determinant of national sovereignty. How that control is achieved and maintained is, therefore, a reflection of a nation's political system and beliefs.

That is why the immigration bill now pending in the House is probably the most important piece of legislation to be considered by the 97th Congress. Although the diligent efforts of the House and Senate Judiciary Committees should not be overlooked, the bill, as it is presently structured, is flawed.

Aside from specific provisions of the bill which are potentially discriminatory toward Hispanics—such as employer sanctions, a national ID system, a watered-down amnesty program, and an expanded H-2 program—the major difficulty with this legislation is its focus, or lack of focus, on the foreign policy aspects of immigration policy.

The meshing of domestic and foreign policy has become widely accepted. The impact of foreign goods on the United States economy and, conversely, the effect of high U.S. interest rates on the economies of our allies are prime examples of this interaction. The symbiosis of domestic and foreign policy concerns is no more apparent than with the massive influx of immigrants that come to this country; through this massive flow of people, these policies become irreversibly intertwined.

Immigration policy not only must take into account national sovereignty, it also must be carefully crafted to maintain cordial relations with our allies, particularly Latin American and Caribbean nations. Further, unless immigration is stopped at the source, the U.S. will never be able to effectively control its borders.

Leaving one's family, friends, culture, and language is not easy. Yet each year tremendous numbers of people enter the US without proper documents. Why do so many people risk their freedom and leave the familiarity of home? One, because the economic and political situation in their countries has become intolerable and, two, because the lure of prosperity and jobs in the US offers hope.

This "push-pull" impetus is the primary reason for the massive influx of immigrants. It cannot be ignored if the US intends to construct a realistic and fair immigration policy.

Even as the US economy slumps and the propsect of jobs becomes less promising, the "push" factor, or the faltering of Latin American economies, continues to grow. It is necessary, then, to integrate US development policies with immigration policy. Anything short of this integration would not address the basic reason for undocumented immigration.

During the last two decades, nearly nine million people have emigrated from the Caribbean basin to the US. That total is even higher if Mexico and the rest of Latin America are included. This flow will not abate or become more regular by instituting a law that places the onus of responsibility for immigration control on American businessmen who are interested in having a constant flow of cheap labor, and on impoverished people whose promise of a future is contingent on maintaining a shadow existence as an undocumented person.

Immigration policy must be, at least in part, the product of multilateral and bilateral agreements between the US and nations that are the principal senders of immigrants.

The Caribbean Basin Initiative (CBI), despite its flaws, is a step in the right direction for developing an extended economic agreement and support system between Caribbean basin nations and the US. An extension of the CBI to include Mexico and other Latin American countries that are prime senders of immigrants: a retooling of this new CBI so that it emphasizes developing labor- rather than capital-intensive industries; and, most important, a reworking of both an expanded CBI and the immigration bill so that they complement each other should all be primary objectives of a new U.S. immigration policy.

Immigration must be controlled at the source. Agricultural and labor intensive industrial development programs are two key proposals for creating jobs to keep potential immigrants at home. Bolstering developing nations' economies also provides the dual benefits of stabilizing the region politically and building potential markets for U.S. goods and services.

It is to the benefit of those countries sending the most immigrants to cooperate, not only because it would increase their prosperity but because it also cuts off the so-called "brain drain" of their most intelligent and industrious workers.

Admittedly, it is not an easy task to integrate immigration policy and foreign aid. This is a radical approach to immigration, but nonetheless it reflects a profound understanding of the complexity of U.S. government attempts to control the borders.

The immigration bill that is currently being considered by the House does not take into account foreign policy concerns. It attempts to deal with immigration not at the border, or before the border, where the problem begins, but over the border, in the U.S. where fair enforcement is much more difficult and much less permanent.

The recent economic difficulties in Mexico and the subsequent increase in attempted crossing at the U.S.-Mexico border provide an excellent example of the magnitude of the problem which the U.S. will continue to face unless it integrates its immigration and foreign policies.

What a new U.S. immigration policy must do is assist prime sending nations in making it attractive for potential immigrants to stay home. Tackling the situation at its heart, in these countries, is not only the best solution; it is the only effective solution to U.S. immigration problems.●

TRIBUTE TO JANET GRAY HAYES

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. EDWARDS of California. Mr. Speaker, on December 1, friends and supporters of Mayor Janet Gray Hayes will gather to honor Mayor Hayes for her 12 years of service to the city of San Jose. Although the congressional schedule makes it impossible for me to attend this well-deserved tribute, I did want to take this moment to extend my thanks to Janet Gray, both for her fine leadership and for her friendship over the years.

Since 1974 Janet Gray has served as the mayor of my home town of San Jose. Her two terms as mayor follow a long span of dedicated public service as vice mayor, city council member, and community activist. During her tenure in public office, our city has grown dramatically, with over 36 percent more people making San Jose home now than did in 1970. Janet Gray has been in the forefront of seeking ways of managing that growth, channeling development into areas where support services already exist, and preserving open space wherever possible.

The last 10 years have seen other significant changes as well. Janet Gray is fond of referring to San Jose as the "feminist capital of the world." Although with her departure from the mayor's office, the reins of leadership fall to a man, San Jose and Santa Clara County can still lay claim to that title, with 7 of 11 members of the city council women as well as 3 of 5 of our county supervisors.

I believe Janet Gray and her exemplary career have had much to do with that proud fact. When Janet Gray first took public office, it was a rarity for a woman to seek election in the Bay Area. Even more infrequently did women win. Janet Gray changed all that. While others will commend Janet Gray for the efficient and compassionate way she has led San Jose—as well they should—I wonder if an even more vital accomplishment has not been her position as a role model for countless young women who now confidently plan a career of public service because Janet Gray has shown that it can be done.

In closing, I would like to make one further point. As one of San Jose's Representatives here in the U.S. Congress, I have come to rely on Janet Gray for her keen insights on the partnership that must be forged between the Federal Government and the local government. Like so many others, I have valued Janet Gray's advice and good judgment over the years. Although she now leaves public office, I trust we will still be able to call on her for her always sound guidance. I feel confident she will continue to seek ways to serve our community.

For her years of public service, and for those years yet to come, I say, "Thank you."●

TRIBUTE TO JAMES C. KIRK

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. YATRON. Mr. Speaker, I want to take this opportunity to pay tribute to Mr. James C. Kirk, president and chief executive officer of the Pottsville Hospital and Warne Clinic, located in Pottsville, Pa. Mr. Kirk will retire on January 1, 1983, after 35 years of dedicated service to the hospital and the community.

Mr. Kirk was appointed administrator of the Pottsville Hospital in 1948. He has been an outstanding citizen whose contributions to the institution and the community are immeasurable.

Before coming to Pottsville, Mr. Kirk was the assistant superintendent of the Perth Amboy General Hospital in New Jersey. Prior to serving at Perth Amboy, he was an accountant for Jones & Laughlin Steel Co. in Pittsburgh and the Crucible Steel Co. of America in Jersey City.

As the administrator of the Pottsville Hospital, he was responsible for guiding the institution through several major building projects which increased the hospital's size from 150 beds to 266 beds, making the Pottsville Hospital and Warne Clinic the largest hospital in Schuylkill County. In addition to the hospital expansion projects, a new school of nursing building was constructed in the mid-1960's.

Mr. Kirk, a native of Port Carbon, Pa., received his education at the Carnegie Institute of Technology in Pittsburgh. He is a member of the American Hospital Association, the Hospital Association of Pennsylvania, and the Health Systems Agency of northeastern Pennsylvania. He was also a member of the Commonwealth of Pennsylvania's State Welfare Board.

Mr. Kirk is a man of many accomplishments which have benefited thousands of people, not only in Schuylkill County, but throughout Pennsylvania. Without a doubt, the Pottsville Hospital and Warne Clinic will be losing a man with exceptional talent, skill, and ability.

Mr. Speaker, it gives me great pleasure to honor this fine American before my House colleagues. Mr. Kirk is a true humanitarian with a complete devotion to providing the best possible health care for the citizens of Schuylkill County.●

MAYOR JANET GRAY HAYES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. MINETA. Mr. Speaker, it is with sincere pleasure that I join the citizens of the city of San Jose today in recognizing and honoring Mayor Janet Gray Hayes, one of the most highly regarded and outstanding public leaders to serve the city.

Janet Gray was the first woman in this country to be elected as the mayor of a major metropolitan city. For 8 years she has presided over the technological capital of the Nation while at the same time being a champion fighter for the rights of all citizens, an innovator of national urban policy, and a hardworking, honest politician.

Mayor Hayes is a grassroots activist who started out committed to making the city of San Jose a better place to live. She has used her organizational experience and expertise to help transform San Jose, a city once characterized by urban sprawl, into one of the top financial, cultural, transportation, and population centers of the region.

Janet Gray has tackled the No. 1 challenge of her political career like a tenacious fighter. Few could have succeeded as well as she in balancing the competing interests of growth, prosperity, and the natural inheritance of the Santa Clara Valley and end up with one of the most technically advanced, yet livable cities in the country. She has earned the respect needed to successfully encourage financial investment and industrial development. San Jose is the 14th largest city in the country, the fastest growing, and the 4th largest in California. The success of this great city is the result of a sensible growth plan which protected wilderness and agriculture. Mayor Hayes made sure there was backbone in that plan.

Janet Gray started her professional career as a psychiatric social worker for the Jewish Family Service Agency in Chicago. She also worked for the Denver Crippled Children's Service and the San Jose Adult and Child Guidance Clinic. She is a past president of the League of Women Voters of the San Francisco Bay Area and the Central Santa Clara Valley. She now serves as chair of the National League of Cities' Energy, Environmental Quality, and Natural Resources Steering Committee and Public Technology Inc. as board member and chair of the advisory council. I know first hand, that Janet Gray is especially respected and admired among her colleagues in San Jose, where her accomplishments have been directly felt. In 1975, she received the Woman of Achievement Award from the San Jose Mercury News and in 1975 and 1976 she was selected as the Most Admired Elected Official in Santa Clara Valley by two public opinion surveys. In 1980, she received the Santa Clara County Women of Achievement Award and the Natinal Conference of Christians and Jews Community Service Award.

Janet Gray, however, was never content to be the only woman in San Jose's political arena and through her persistent adherence to equal opportunity and human rights, she has led San Jose to the forefront of the women's movement; a city with the highest percentage of women in decisionmaking positions. Today, 3 out of 5 Santa Clara County supervisors, 7 out of 11 San Jose city council members, 1 superior court judge and the president of San Jose State University are women.

Mayor Hayes is a patron of the arts, an urban leader, and involved parent, and a tough politician. Her accomplishments demonstrate that a working mother who cares about the problems her community faces can make a difference. She is, quite simply, a remarkable woman.

Mr. Speaker, I ask all the Members of the House to join me in paying tribute to Janet Gray Hayes. She is a woman who has made an unforgettable impact on our community. Her career gives everyone a great deal of inspiration. Mayor Janet Gray Hayes is an outstanding woman of our time.

Thank you.●

REPORT ON LATIN AMERICA

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. LaFALCE. Mr. Speaker, I would like to bring to the attention of our colleagues remarks made recently by Sidney Schmukler, Senior Adviser, Economic and Social Development Department of the Inter-American Development Bank. In a well-received talk before the International Business Council of Rochester, Mr. Schmukler focused on the potential for U.S. business investment in Latin America.

Noting that Latin America represents a market that will hold an estimated 500 million people in less than 20 years, Mr. Schmukler described the benefits to both partners of investment in the area. He emphasized the estimates of the U.S. Treasury which show that for every $1 of U.S. investment in Latin America, $3 come back to our economy in terms of exports and other economic benefits.

Latin America also needs our investment dollars. Development has, until recently, been carried on at a rapid pace. Without outside investment the area would lose vital ground. Specifi-

cally, Mr. Schmukler advocates investment in three major components of the economy: Energy, agriculture, and employment. The Inter-American Development Bank has been financing projects in all of these areas, and in recent years U.S. companies from almost every State have participated in IDB-financed procurement.

Mr. Speaker, because we are presently in a period of intense concern about the world economy, we should not overlook opportunities to make sound investments that would aid both our economy and that of our southern neighbors. I believe that such investments as those of the Inter-American Development Bank should be encouraged. Along with Mr. Schmukler, I too am "confident that with constructive cooperation we can move forward to help meet Latin America's needs, to the benefit of our entire hemisphere." At this point, I would like to include in the RECORD the full text of Mr. Schmukler's address.

LATIN AMERICA: THE CHALLENGE OF THE 1980'S

Is is a pleasure to be here today to speak about Latin America and its future, and how that future could affect you. Rochester is very well known here and abroad for its industry, technology and commerce. The businesses you represent are important to Latin America. In fact, there are familiar signs on the streets of many cities from Mexico south reminding everyone of some of Rochester's products. Now do I need to remind this audience of the value of foreign business.

As you know, world trade is now crucial to the United States. One in every eight manufacturing jobs and one in every 3 acres of farmland in the United States depend on exports.

Latin America is important to this country for many reasons; I will only remind you that as a key trading partner, it is a major supplier of essential products and a very large market for American goods and services—a market that in less than 20 years, will have an estimated 500 million people.

United States exports to Latin America have been growing and in 1982 are expected to be in the $41-$43 billion range. The United States now sells more machinery, consumer goods and chemical products to the region than to the rest of the developing world combined. This market represents almost twice that of Japan and more than half the volume of U.S. exports to all of Europe.

Before looking ahead to the challenges—and the promise—of the region to the south of us, let's look briefly at its recent record. In the last twenty years Latin America developed faster than any other developing region in the world. The production of goods and services of the Latin America in 1981, was more than three times the level of 1960 in constant dollars. Imports and exports grew, investment expanded and many of the countries gained access to international capital markets for financing.

There are of course big differences among the countries, but during the past decades most of the Latin American countries have been modernizing their economies and institutions. The region has focused on "strengthening within": new roads, transportation and communications facilities. Hydroelectric projects were constructed, providing power as well as badly needed water for irrigation. New industries were created, and trade within the region began to grow rapidly. Social services and educational opportunities broadened, especially technical education.

At present, the pace of economic growth in Latin America is slow, in part reflecting developments in the region but most countries have felt the recession in the U.S., Europe, Canada and Japan, which account for two-thirds of the region's exports as well as a similar proportion of its imports. The importance of economic recovery and growth in the Western world is clear and represents a challenge we all wish to see met with success.

As for the major challenges within Latin America in the 1980's, I would like to focus attention on three that we in the IDB believe are key to the region's further development. These are: energy, food production and jobs. I then want to comment on the work of our Bank in helping Latin America face these challenges and how this can affect you.

ENERGY

Dependence on oil is greater than any other region in the developing world and most of the petroleum is used in productive activities. By the end of 1978, oil represented 70 percent of Latin America's energy consumption, as compared to 45 percent for the world as a whole. This dependence on oil is a heavy burden on the region; since 1974 the cost of oil imports has added large amounts to the external debt of most of the countries.

Fortunately, Latin America has very substantial energy resources to draw on. Mexico and Venezuela are of course already major oil producers, but the search is underway in many countries. There are also large deposits of natural gas in Mexico, Bolivia, Argentina and elsewhere, as well as coal, for example in Colombia and Brazil, tar sands and shale oil. There are good geothermal possibilities.

The region's crown jewel is, however, its future hydroelectric potential—virtually unequalled anywhere in the world. The potential of this river and lake resource in Latin America is conservatively estimated at 430,000 megawatts, the heat equivalent of 1 billion barrels of oil per year. Thus far, only 10 percent of the hydroelectric capacity is now in service. Best of all, hydropower is a renewable resource and the water serves other purposes as well.

The investment needed for the development of energy are enormous. The Inter-American Development Bank has provided technical assistance, for investment feasibility studies and help toward more efficient institutions. During the 1960's the Bank allocated 14 percent of its lending to the financing of energy development. In the 1970's this increased to 25 percent. In 1981, the figure rose to 40 percent.

Most of the Bank's energy lending has been for hydropower—civil works, generating equipment, transmission lines. However, the financing is broadening. For example, the IDB has recently undertaken a program to assist its member countries in mapping the continental shelf through the use of seismic surveys to identify favorable geological formations for oil and gas exploration. The Bank is also channeling money into the development of non-conventional renewable energy such as geothermal, solar and biomass power.

FOOD AND AGRICULTURE

Many people think of the region as largely rural and expect Latin America to be a major grain basket and meat supplier for the world. In reality, agriculture in most of the countries of the region is a difficult way to make a living. Productivity is low, certainly by U.S. standards, and much of the rural labor force is unemployed or underemployed. There have been massive movements from farm areas to the cities creating even greater problems of food supply. Yet, during the past 25 years production has barely kept up with the expansion in population. Our estimates indicate that an increase of only 10 percent in the consumption of food per person in 1980-1990 with the larger population, would require a 45 percent increase in the supply of food for the region as a whole.

Because food and raw materials are so important, the Bank is giving a lot of attention to agricultural development. In the most recent years of our operations, 1979-1982, we loaned close to $2 billion for this sector. Most of these funds are intended to reach small- and medium-sized farmers and to back them with research and extension. I might also note our financial support for fishing projects, expecially in the Caribbean Basin.

EMPLOYMENT

In 1950, only one in every ten Latin Americans lived in large cities. Today Latin America is two-thirds urban, and by the end of this decade about 75 percent of its people will be living in cities.

This shift puts heavy strains on water, transportation, education and other facilities. Even more importantly, every year close to 4 million people enter the labor force; about 90 percent of these people will be seeking jobs in the cities. At the same time unemployment is already one of the regions most extensive and serious problems. Mexico has been very much in the news lately for financial reasons; but not many people realize that the country needs about 500,000 new jobs each year, or that Mexico City in 20 years may reach 31 million if it continues to grow rapidly.

EXTERNAL TRADE AND FINANCE

These then, are some of the challenges. They will be met mainly by efforts in Latin America. By far, the major portion of investment made in Latin America over the past twenty years has come from internal savings; the Latin American countries themselves are financing over 80 percent of their own investment needs and plan to continue to do their part.

Nevertheless, the flow of external financing is essential if Latin America is not to lose the ground gained thus far and is to continue progress. This means new financing of goods and services, as well as the handling of debt. In some of the larger countries, such as Argentina, Mexico and Brazil, debt payments already weigh heavily because exports are earning less, essential imports must continue and the levels of recent interest rates are taking their toll. For example, borrowers like Brazil and Mexico, each with external debts in the order of $80 billion, pay or save about $500 million a year in interest for every point change in interest rates.

THE INTER-AMERICAN DEVELOPMENT BANK

Permit me to comment briefly on the role of the IDB in the external financing of development, and of trade. The main objective of our Bank—which was started in 1959 and

is owned by 43 countries—is to finance productive projects in our Latin American member countries. Our emphasis has been on agriculture and energy, as we have seen, but we also finance roads, manufacturing and water systems, as well as social projects.

As a development bank, we carefully analyze all projects and consider it essential that there be an adequate return on investment. Our loans benefit private enterprise directly or indirectly in Latin America and we actively work with private capital in the U.S. and other countries to complement the financing we can provide. Indeed, we have a program called "complementary financing" under which banks, in the U.S. and elsewhere, have provided resources additional to our loans for many projects.

The Bank has capital provided by its member countries and by borrowing in capital markets where we have enjoyed high credit ratings. In fact, most of our funds are raised in the private sector. Our income from loan repayments supports our own budget and provides for satisfactory reserves as well. Through 1981, the Bank has lent over $20 billion to finance development projects which involve a total investment of about $78 billion. We are proud of the stimulus we have provided to growth and, through investment, to trade in little more than two decades.

As you can see from the volume of our lending, the Inter-American Development Bank's lending represents opportunities for procurement and increased trade between the United States and our Latin neighbors. Our borrowers of course carry out the purchases made under our loans. They seek the bids, sign the contracts and receive the goods. But there are agreed standards for bidding. The Bank requires of its borrowers that there be public competitive bidding for the procurement of goods and services used in projects financed with our loans. There must be advance notice and price comparisons. Only suppliers in member countries of the Bank, including of course the U.S., are eligible to bid on loans we now make.

IDB contract awards for recent years show that U.S. companies in almost every state of the Union have participated in IDB-financed procurement. These contracts covered a wide array of materials and products from livestock to complex machinery and technology.

A recent sampling of contract awards in the United States financed by direct payments from the IDB during the years 1978 through the first half of 1982, shows that 152 firms in the State of New York shared in contracts in 20 Latin American countries. These included for example switchboard equipment for a water supply project in El Salvador, rolling mill machinery for copper mining and metallurgy in Brazil and material and equipment for health and education projects in Costa Rica and Panama. Here in Rochester, firms supplying photographic equipment and supplies, glass products, engineering and medical instruments, mining machineries, optical lenses were among the New York based companies awarded contracts under our loans.

What about IDB's future business? Of course, the specific development projects we will be financing depends on many factors and many projects are in the planning stage, including large investments in certain fields. For example, our pipeline for the coming years includes possible electric power and transmission projects in Costa Rica, Panama, Colombia, Brazil, Peru and elsewhere whose total cost would probably exceed $16 billion. Agriculture, roads and mining will call for a variety of machinery and equipment. As an illustration, the Bank may be asked in 1983-1987 to finance coal mining projects representing $800 million in investments, half of which would involve imported equipment. Investments in industry, applied research and technology and education from Mexico to Argentina in the far south—assisted by IDB loans will need scientific material, instruments, electronic equipment and machinery of the kind that people in cities in this part of New York know how to make and install.

Let me close by putting the procurement and trade prospects in a broader context. The U.S. Treasury estimates that for every dollar paid by the United States into the IDB and other multilateral development banks, $3.00 comes back to the U.S. economy in terms of experts and other economic benefits. Our Bank's operations are good for the U.S. as well as for Latin America.

In the last twenty years we have seen great change in the exciting region to the south of us. The prospects for economic growth are encouraging and deserve financial support. We are confident that with constructive cooperation we can move forward to help meet Latin America's needs, to the benefit of our entire Hemisphere.●

SMEAR TACTICS WON'T WORK

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. AuCOIN. Mr. Speaker, despite President Reagan's remarks portraying supporters of the nuclear weapons freeze as dupes of the Kremlin, the American people are not buying it. This is one of the times that all of the people, or even most of them, will not be fooled.

Not only do the President's remarks defy all the evidence concerning the birth and growth of the most remarkable grassroots movement in recent years, they insult the intelligence and motives of millions of Americans who want the nuclear arms race stopped.

For the sake of his own credibility, I hope President Reagan will consult other sources besides the Reader's Digest before commenting again on the nuclear freeze movement. With that in mind, I ask that an editorial from the November 15, 1982 edition of the Corvallis, Oreg., Gazette-Times, be reprinted in the CONGRESSIONAL RECORD, as representative of the views of 606,143 Oregonians who voted in favor of a nuclear weapons freeze referendum on November 2.

The editorial follows:

FREEZE SUPPORTERS AREN'T DUPES

At last Thursday's press conference, hours after the death of Leonid Brezhnev, President Reagan affirmed his belief that the nuclear freeze movement is being manipulated by the Soviet Union. He dodged a request for evidence of his assertion, either because he didn't have any or because it is too weak to withstand examination.

It was not the first time Reagan has implied that Americans and Europeans working for a bilateral, verifiable freeze on nuclear weapons are the Kremlin's unwitting dupes. After a wave of demonstrations in Europe Reagan said, "Oh, those demonstrations—these are all sponsored by a thing call the World Peace Council, which is bought and paid for by the Soviet Union." And on Oct, 4 he told an Ohio audience that the nuclear freeze movement is "inspired . . . by some who want the weakening of America."

To believe demands for a nuclear freeze are being coordinated by the Soviet Union requires some agile mental footwork. Any group with any association with the Soviet Union must be considered a front for the Kremlin. Any person who has visited the Soviet Union must be suspected as an agent. Any organization critical of American military or foreign policy must be regarded as a supporter of Soviet objectives.

In Thurday's remarks Reagan referred to published reports linking the freeze movement to the Soviet Union. He didn't name any of the publications, but it's safe to assume he had an October Reader's Digest article, "The KGB's Magical War for 'Peace'," in mind. Here's an example of the kind of reasoning the article employs to prove the Soviet Union is pulling the freeze movement's strings:

In March, 1981, the Digest reports, a nuclear freeze strategy meeting was held at Georgetown University in Washington, D.C. Among the 275 to 300 delegates were two invited Soviet guests. "Thus, little more than two miles from the White House, the KGB helped organize and inaugurate the nuclear freeze campaign."

This is more than simple guilt by association. The kind of thinking expressed in the Reader's Digest article and repeated by the President betrays a lack of understanding about the nature of an open society. Americans are free to gather, free to speak and free to organize. These freedoms reduce the risk that citizens' thoughts and actions will be controlled by anyone but themselves.

The nuclear freeze campaign is an example of the kind of movement that could exist only where people are free. It springs directly from citizens' concerns, encompasses a staggering variety of viewpoints and has no real leadership. Reagan should be proud to be president of a nation in which such a movement can spring up. Instead, he has dismissed the freeze movement's aims by painting it with a red brush. Freeze supporters, including the majority of Oregon voters, are no one's dupes, and Reagan owes them an apology.●

THE AMERICAN ASSEMBLY REMARKS ON THE ECONOMY

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. REUSS. Mr. Speaker, earlier this month I had the pleasure of participating in the 63d American Assembly, held at Arden House in Harriman, N.Y. The American Assembly was established at Columbia University by Dwight D. Eisenhower in 1950, when he was its president. The assembly holds at least two national, nonpartisan programs each year, and then pub-

lishes discussion papers "in order to provide information, stimulate discussion, and evoke independent conclusions on matters of vital public interest."

The theme of November's meeting was "The American Economy in Transition." I want to share with my colleagues the final report of the 63d American Assembly, beginning with a preface by the assembly's president, William H. Sullivan:

PREFACE

On November 11, 1982, fifty-nine men and women representing the Congress, the executive branch, business, organized labor, the law, the universities, and the communications media gathered at Arden House in Harriman, New York, for the Sixty-third American Assembly on The American Economy in Transition. For three days the participants discussed our budget and fiscal systems, our human capital resources, the concept of a national industrial policy, and the international trading system.

Former Secretary of the Treasury G. William Miller acted as director for this Assembly program and supervised the preparation of papers which were used as background reading by the participants. Authors and titles of these papers, which will be compiled and published as a Prentice-Hall book to be entitled The Decline and Rise of the American Economy, are as follows:

G. William Miller, Introduction.

Albert T. Sommers, The Evolution of Economic Policy.

Lester C. Thurow, America in a Competitive Economic World.

Rudolph G. Penner, Fiscal Management.

Benjamin M. Friedman, Monetary Policy Management.

Isabel V. Sawhill, Human Resources.

Edwin Mansfield, Science and Technology.

C. Fred Bergsten, The International Dimension.

Speakers during the Assembly were the Honorable Peter G. Peterson, former Secretary of Commerce and currently Chairman of Lehman Brothers Kuhn Loeb; Mr. Felix G. Rohatyn, a senior partner of Lazard Freres; and Dr. John T. Dunlop, former Secretary of Labor and currently Professor of Economics at Harvard University.

On November 14, following their discussions, the participants produced this report, which contains both assessments and recommendations. We gratefully acknowledge the contributions of the Alfred P. Sloan Foundation, the General Electric Foundation, the Continental Group, Merrill Lynch, and Pfizer Inc., who helped sponsor this Assembly. They and The American Assembly, a national nonpartisan educational institution, have taken no stands on the subjects that were presented for public discussion. The participants spoke for themselves rather than for the institutions with which they are affiliated.

WILLIAM H. SULLIVAN,
President, The American Assembly.

FINAL REPORT OF THE SIXTY-THIRD AMERICAN ASSEMBLY

At the close of their discussions the participants in the Sixty-Third American Assembly, in The American Economy in Transition, at Arden House, Harriman, New York, November 11-14, 1982, reviewed as a group the following statement. This statement represents general agreement; however, no one was asked to sign it. Furthermore, it should not be assumed that every participant subscribes to every recommendation.

American economic policy should seek a dynamic, growing economy, capable of providing useful and satisfying work for all employable Americans, in an environment of reasonable price stability and equitable distribution of opportunity.

Over the past ten to fifteen years, the United States economy has been characterized by slower real growth, higher unemployment, lower productivity, higher inflation, larger federal deficits, more volatility in economic and financial activities, growing difficulties in international trade and finance, and a series of structural problems relating to capital formation, productivity, technology, and resources utilization.

Currently the American economy is experiencing a most serious recession. The pattern is world-wide. The timing and strength of recovery are still not clear.

There is concern that the United States has lost its vitality and competitiveness. Of even greater concern is the possibility of stagnation, or even collapse, of the world economy. The depth and breadth and length of recession, the rise of inward-looking national policies and trade confrontations, the trend toward divergent and divisive actions, the strains on the intenational financial system—all these and more are clear storm warnings.

The American economic system has remarkable self-healing powers. Yet, these powers will not be enough. Important adjustments must be made in economic policies and management to deal effectively with current conditions and to anticipate future changes. These changes will be pervasive and will certainly encompass relations between the United States and the world, between the public sector and the private sector, and between labor and management.

Prompt action can assure a revitalized American economy, leading the way for world recovery.

A growing American economy is a precondition for a prosperous world economy. A prosperous world economy is essential for stability and peace.

IMMEDIATE ACTION PROGRAM

The immediate and overriding imperative is for vigorous and sustained real economic growth of the American economy. Only under such conditions will it be possible to attain long-term economic and social goals.

The economic benefits are legion: more jobs and greater utilization of human resources, higher productivity to counter inflation, expanded investment and modernization, improved international competitiveness, lower federal deficits from both reduced outlays and higher revenues, lower interest rates, sounder financing for Social Security, improved infrastructure, greater resources available for research and development, enhanced capacity to finance national defense, higher standards of living. The realization of these benefits would help preserve individual liberties and contribute to general well-being.

Failure to restore economic growth entails social, political, and security risks for the entire world.

The following immediate action program should be undertaken:

1. Change the Fiscal-Monetary Policy Mix. Economic policies should be directed promptly and powerfully to stimulate real growth through a major change in the fiscal-monetary policy mix

Overall fiscal policy should not be used for further stimulus at this time. Record federal deficits are projected, deficits that would persist even with high employment. Policies which increase such deficits would be unsound and counterproductive.

On the contrary, there should be a national commitment to reduce such deficits. The President and the Congress should jointly adopt a program of reduced expenditures and increased revenues which will produce a progressive and significant reduction in the high-employment deficit and relieve pressures on the financial markets.

With this commitment, monetary policy should then be diverted toward generating more rapid economic growth, without unduly risking a significant acceleration of inflation. This can be done because of large unused production capacity, high unemployment, and ample supplies of food and raw materials.

The altered mix of fiscal and monetary policies should result in real interest rates more in line with historical experience.

2. Inaugurate an Infrastructure Program. A program should be undertaken directed at needed improvement in public infrastructure. This program should not be financed by incremental deficit spending, but by explicit reduction in other federal spending or by taxes and user fees.

3. Initiate Action to Reduce Trade Barriers. Recognizing the increasing economic interdependence among nations, yet growing tendencies toward protectionism, the United States should aggressively act to reduce existing nontariff barriers and other distortions of trade and pursue a temporary "standstill" agreement prohibiting introduction of new ones. Reiterating a belief in free but fair trade, the United States should, at the November 1982 Ministerial Meeting of the General Agreements on Tariffs and Trade (GATT), seek a new round of negotiations that would encompass trade not only in goods but also in services. This round should also endeavor to set ground rules for treatment of international investments.

4. Bolster the International Monetary Fund (IMF). To alleviate strains within the international financial system and provide time for appropriate adjustments, there should be an immediate substantial increase in resources for the IMF. IMF loans should be tied to conditions for economic discipline to correct balance-of-payments problems. Consideration might also be given to increased support for the World Bank and the regional development agencies.

LONG-TERM POLICIES

Fiscal policy

Fiscal policy should be retained as a major instrument of economic management. A balanced budget constitutional amendment is neither desirable nor workable.

Fiscal discipline should be restored. The federal budget process has been improved over the past decade. Nevertheless, the current challenges and the problems likely to arise during the 1980s make a further strengthening of this process desirable.

No matter how strong or perfect a process is developed, it cannot substitute for political will and leadership.

The unified budget concept should be strengthened by including off-budget expenditures in the budget. Consideration should be given to improved presentation of capital expenditures, trust fund budgets, and tax expenditures. Federal credit operations, trust funds, and tax expenditures

should receive increased congressional review during the budget process.

Expenditures

As part of the commitment to lower federal deficits, expenditures should be reduced by slowing the rate of growth in defense spending and Social Security payments.

Taxes

The individual federal income tax system should be simplified, and broad constraints should be exercised on deductions and credits so as to permit lower general rates. A shift of the tax burden toward consumption and away from savings and investment would be desirable. Some integration of corporate income taxes with the personal income tax would also be desirable. In any case, the principle of progressivity should be retained.

Social Security payments in excess of employee contributions should be included in taxable income.

Broader resort to user fees should be considered.

Greater resources should be devoted to assuring tax compliance and collection. Every effort should be made to reinforce the fundamental policy of voluntary assessment and compliance.

Monetary policy

The current system for setting and implementing monetary policy requires reform. More coordination is needed between the Federal Reserve and the Congress and between the Federal Reserve and the executive branch in formulating monetary policy. Monetary policy also needs to be better coordinated with fiscal policy.

The Federal Reserve should be required to set out its projections with respect to the broad objectives of economic policy—economic growth, unemployment, and inflation—to facilitate comparison with those of the Administration and the Congress. The Federal Reserve should relate its projections to its intermediate targets and operating procedures to which it should then be held accountable. The specific targets chosen should be neither so narrow as to have a weak connection to the broad objectives of economic policy nor so broad as to be only minimally affected by the policy instruments under the control of the Federal Reserve.

The Federal Reserve's recent emphasis on the monetary aggregates should be modified by inclusion of other factors.

The independence of the Federal Reserve within the government should be preserved. This places a responsibility on the Federal Reserve, the Administration, and the Congress to address and reconcile inconsistencies or unrealistic elements of their economic goals and projections.

Microeconomic policies

Education and Training

The educational system is failing to prepare a significant portion of the nation's youth for working or even for functioning in our complex society. Major improvements are needed in the quality of education. More emphasis needs to be placed on basic math and literacy skills, the relationship between education and jobs, and the training of Americans in the languages and cultures of other countries.

National leadership is required to encourage experimental efforts at the local level to improve the quality of education through such means as use of computer technology; setting higher standards for the performance of administrators, teachers, and students; providing incentives for these groups to meet these standards; and encouraging more cooperation between local schools and business and labor groups.

Research and Development

Steps to accelerate research and development and technological innovation should be undertaken to increase productivity and create new opportunities for growth. These might include:

1. Concentrating federal funding on basic scientific research.

2. Encouraging pooled research and development among groups of companies, in areas of national interest, by exempting such cooperative ventures from antitrust restrictions.

Industrial Policies

The difficulty in designing and implementing effective, flexible industrial policies should not be underestimated.

The two preceding microeconomic policies—education and research—are essential to any set of industrial policies. The concept of such policies should stress action to improve industrial competitiveness, such as (1) providing a macroeconomic environment conducive to growth; (2) removing trade, regulatory, and other barriers; (3) providing timely and comprehensive information about the economy and conditions in specific industries; and (4) maintaining and upgrading physical infrastructure.

Specific applications of industrial policies, if used at all, should be severely limited and should have explicit termination dates.

As a consequence of economic growth and technological change, some industries will decline as others grow. For such declines, a humane approach is needed for the problems of affected workers, industries, and communities, through:

1. Providing timely notice of major impending changes in work force levels or plant closings.

2. Undertaking advance planning for work force reductions through attrition.

3. Developing industry-specific training, retraining, and relocation programs.

4. Planning for community readjustment.

Incomes Policies

Based on our historical experience, it is doubtful that a workable incomes policy could be developed for the United States. However, to reconcile national interests in achieving high employment and capacity utilization with low inflation, there should be a greater public role in encouraging noninflationary wage-price behavior—including improvement of labor-management relationships.

The international dimension

The United States should continue its commitment to free and fair trade. Open markets and an open trading system are central to promoting world-wide recovery. Strenuous efforts should be undertaken to dismantle trade and investment barriers and remove existing inequities.

As already noted, the United States should seek an international agreement for a temporary "standstill" on imposition of new nontariff barriers as a prelude to a major effort to reduce barriers at the next GATT negotiations.

Trade sanctions imposed for political reasons have a long history of ineffectiveness and inequity. They should not be considered unless they are multilateral. If in some extreme circumstances such multilateral. If in some extreme circumstances such multilateral sanctions are adopted, the domestic costs of the economic disruption should be broadly shared.

The United States should reconfirm its historic responsibility as a participant in and supporter of the multinational financial agencies which facilitate world growth, trade, and cooperation.

The floating exchange rate system, despite its problems, is preferable at this time to fixed rates or bands.

There should be closer coordination among developed nations in formulating fiscal and monetary policies. There needs to be a heightened awareness that the monetary and fiscal policy objectives of one nation cannot work in isolation.

PARTICIPANTS THE SIXTY-THIRD AMERICAN ASSEMBLY

JOINT UNITED STATES-SOVIET COMMUNICATIONS CENTER

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. STARK. Mr. Speaker, yesterday my colleague, Mr. DAVID DREIER, and I introduced legislation to set up a joint United States-Soviet Communications Center. The bill directs the President to seek negotiations with the Soviet Union for the establishment of this permanent joint communications center to provide an additional channel for communications in order to reduce the threat of accidental nuclear war.

I believe it is through truly bipartisan efforts such as this that Congress will be able to assist in the lessening of world tension and insure the global security we all desire. With new leadership in the Kremlin, we have an ideal opportunity to further expand the communications between our two nations that will so benefit us both.

The joint United States-Soviet Communications Center would afford us this opportunity. Located in a third country, the communications center

would be staffed by technical, military, and diplomatic personnel from each nation who, in the event of crisis, would be able to confer face-to-face with one another and report timely and accurate assessments of the situation to their respective governments. Designed to augment the current United States-Soviet "hotline," the communications center would insure against the transfer of inadequate and inaccurate information at times when it could prove most harmful.

Obviously, it is my hope that the communications center will spur further communications and cooperation between the United States and the Soviet Union on all levels. In this way, we can establish a workable relationship based on mutual trust and need that will eventually lead us to a safe and secure world.●

GREATER CLEVELAND'S CHARLES A. SOTAK DIED

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Ms. OAKAR. Mr. Speaker, one of Greater Cleveland's fine citizens recently past away. Many of us who knew him and his fine family are deeply grieved. The following article appeared in the Plain Dealer.

CHARLES A. SOTAK, BRED AND RACED PIGEONS

Charles A. Sotak, 84, lived a full life.

He founded his own limousine and hearse leasing firm in 1921, trained and managed boxers in the 1930s, was a driving instructor for young rich folks in Cleveland in the 1940s and bred, trained and raced pigeons all his life.

Mr. Sotak, of 7247 State Rd., Parma, died yesterday morning at the Altenheim Nursing Home, 15653 Pearl Rd., Strongsville.

Founder of Sotak Auto Livery, Mr. Sotak rented hearses and limousines to funeral homes throughout Cuyahoga County. His daughter Charlotte Sotak said, "When we went to see the 'Godfather,' he didn't pay any attention to the movie, but told us which cars were which and said, 'that's what it was like in Cleveland.'

"He met all the big people when he worked for a Cadillac dealer and taught their children to drive," she said. "In the '20s, at the mobster funerals, everybody who had a Cadillac would pool their cars because they had to have Cadillacs."

Mr. Sotak retired six years ago from his leasing business.

His daughter said her father managed boxers Jimmy Vaughn, Eddie (KO) Morgan and Joey Schlund in the early 1930s. All were contenders, she said.

In the 1950s, he got seriously interested in pigeon breeding and twice won a 500-mile pigeon racing contest. "He started raising pigeons when he was nine," she said, "and eventually built a monument to them in Parma. He ate, drank and slept pigeons. He would go all over the country to pigeon conventions to meet other kookie pigeon lovers."

She said doctors told her her father died of natural causes.

Mr. Sotak was a member of the Fairview Homing Pigeon Club and the Holy Name Society at St. Boniface Catholic Church, Cleveland. He was born and raised on Scovill Ave. and moved to Parma 13 years ago.

In addition to his daughter, Charlotte, Mr. Sotak is survived by a son, Theodore, Seven Hills, another daughter, Joan, of Parma; a sister, Helen Marcy, of Parma; three grandsons and a great-granddaughter.

Services will be at St. Joseph Catholic Church, 12700 Pearl Rd., Strongsville, Tuesday at 10 a.m.●

EDUCATION TECHNICAL AMENDMENTS

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. GOODLING. Mr. Speaker, I have prepared a package of technical amendments which are designed to clarify and correct certain ambiguities, unintended results, and drafting errors in the Education Consolidation and Improvement Act of 1981 (ECIA). These amendments are designed to improve the implementation of that act.

As you may recall, ECIA was part of Public Law 97-35, the Omnibus Budget Reconciliation Act of 1981, and was adopted as part of a substitute package offered on the floor of the House. As a result, the usual legislative process involving hearings and consideration at the subcommittee and full committee levels never occurred. Not surprisingly, some technical problems were contained in the legislation.

I feel that we owe our late colleague, John Ashbrook, a great deal of credit for having ECIA ready as a legislative vehicle in the short timeframe that was available in the spring of 1981. If you will recall, Mr. Speaker, it was John Ashbrook's proposal which preserved the basic thrust of the former title I program of compensatory education for disadvantaged children and preserved a separate program for the education of handicapped children. I am proud to have been the chief cosponsor of ECIA and plan to carry on where John Ashbrook left off. We all realize, as with any piece of major legislation, that technical amendments are the rule rather than the exception.

With this background, I have pressed forward in the preparation of a package of technical amendments to perfect ECIA. I have directed our staff to reach out to a broad cross-section of interested parties prior to the introduction of this bill. Our goal has been to develop a bipartisan consensus to resolve some of the problems which have been identified in ECIA. In this spirit I wish to commend the chairman of our committee, Mr. PERKINS, for his willingness to schedule prompt hearings and his desire to act on technical amendments which achieve a consensus among the members of the committee and the education community at large. As you know, the hearing process is designed to give the members an opportunity to learn the reactions of a broad spectrum of interested groups and to inquire of them their opinions and suggestions for improvements in this package. I look forward to a cooperative venture.

In order to provide a better understanding of this proposal, I include a section-by-section explanation.

SECTION 1—STATE PROGRAM DESIGN

Amends Section 555(b)—To include preschool migratory children as eligible participants in the State programs for the Migratory handicapped and neglected and delinquent under Chapter 1.

Problem: As written ECIA unintentionally excluded these children from services under State operated Chapter 1 programs.

Solution: Restore the status quo from the former Title I legislation by not excluding these children.

SECTION 2(a)—APPLICATION ASSURANCES

Amends Section 556(b)—To eliminate reference to "all such children."

Problem: As written ECIA unintentionally creates ambiguity which might have the effect of permitting the use of funds for all low-achieving students in the district without regard to their income or residence in a low-income area.

Solution: Restore the status quo from the former Title I legislation by eliminating paragraph (1)(C) of section 556(b). This change removes any ambiguity in the statute and assures that this Act will serve educationally disadvantaged children attending eligible schools.

SECTION 2(b)—RURAL DISTRICT RELIEF

Amends Section 556—To allow an exemption from targeting for a local education agency with a total enrollment of less than 1,500 children.

Problem: In many rural districts LEAs have a single school which serves the entire district at the junior or senior high school level. This amendment would make all lower grade schools which "feed" the junior or senior high school eligible for Chapter 1 funds. This would prevent the delay of services to educationally deprived children who would ultimately become eligible to be served.

Solution: Add a new subsection (c) to section 556 to exempt small school districts from targeting. The 1,500 figure appears to be reasonable and would not lead to a violation of the intent, spirit, or outcome of Chapter 1. It would serve to eliminate much unnecessary paperwork, documentation and recordkeeping for small LEAs.

SECTION 3—AREAS FOR SERVICES TO PRIVATE SCHOOL CHILDREN

Amends Section 557(a)—To make services for private school children compatible with LEAs' attendance areas and criteria for services.

Problem: Omission of reference to Sec. 556(b)(1) (A)(B)(C) dealing with application assurances that programs are conducted and located in certain attendance areas might result in having to serve all private school children who are educationally deprived without regard to the home school attendance areas that are compatible with LEAs areas of concentration. There was no intent to set forth one criterion of eligibility for public schools and another for private.

Solution: Amend this section so that only those private school children whose school attendance areas are compatible with LEA's areas of concentration need be served.

SECTION 4—Application of Non-Supplanting Rule to States

Amends Section 558(b)—To clarify that state agency programs are subject to this provision.

Problem: Section 558(b) unintentionally exempted State agency programs from the "non-supplanting" provisions of ECIA.

Solution: Rewrite Section 558(b) to require State agencies along with local educational agencies to use funds only as a supplement to the non-federal funds for the education of pupils participating in programs and projects assisted under this chapter.

SECTION 5—Exclusions of Special Program Funds

Amends Section 558(d)—To exclude State and local funds from the non-supplanting and comparability requirement for State and local compensatory education programs and to exclude only from comparability determinations bilingual and handicapped education programs, and certain State phase-in programs.

Problem: ECIA was ambiguous on the supplanting and comparability requirements for State and local special program funds. This amendment would clarify the limited exclusions from the non-supplanting and comparability requirements.

Solution: Amend section 558(d) to clarify that exclusions for special program funds from the non-supplanting and comparability requirements relate only to compensatory education programs and to clarify that State or local bilingual, handicapped, and certain State phase-in programs may be excluded from comparability requirements.

SECTION 6—Flexibility To Continue Title I Type Expenditures

Amends Section 558—To continue activities previously authorized under Title I of ESEA.

Problem: Section 554(c) of ECIA may be construed to conflict with Section 555(c) regarding whether activities previously authorized can be continued.

Solution: Add a new subsection to Section 558 which permits LEAs to have discretion to use Chapter 1 funds for:

(1) Services to educationally deprived children in a school which is not in an eligible attendance area when the proportion of children from low-income families in such school is substantially equal to the proportion of such children in an eligible school attendance area.

(2) Continue to designate a school as "eligible" even if it does not qualify as long as such school was so designated in either of two preceding fiscal years.

(3) Continue skipping of eligible schools if they are receiving similar services from non-federal sources.

(4) Continue "follow-the-child" assistance.

(5) Continue "schoolwide project" flexibility if at least 75 percent of students are "eligible" using similar criteria established under section 133(b) of ESEA.

(6) Continue flexibility for non-instruction duties for Chapter 1 teachers.

SECTION 7—Phase-out and Transition Expenses

Amends section 562(a)—To permit use of carry-over funds to phase out antecedent programs.

Problem: If all carry-over monies must be transferred for use under the consolidated Chapter 2, SEAs would face severe administrative and accounting problems. Numerous phase-out activities will be required for an effective transition. Specifically, many states will require administrative money to close out antecedent programs authorized by Titles IV-B, IV-C, and V-B of the ESEA of 1965, as amended. Need flexibility to either shift State education agency funds to Chapter 2 purposes or use them to phase out existing programs where appropriate and without necessity of distributing at least 80 percent of those funds to LEAs.

Solution: Amend Section 562(b) to permit SEAs and LEAs that have obligated funds on July 1, 1982 that were appropriated in FY 81 for use under the antecedent programs to retain these funds for expenditure and use. These funds are available for obligation until September 30, 1983 for purposes of Chapter 2. SEAs would not need to distribute these funds according to the 80 percent pass through and LEAs would not be required to return their unobligated funds to the SEA. Such money is intended to provide for an orderly phasing out of programs which were placed into the block grant. Such clear statutory authority will ensure that States are not subject to future audit exceptions because of the ambiguity of ECIA on this matter.

SECTION 8—State Allotments

Amends Section 563(a)—To set allotment for territories at one percent of Chapter 2 funds.

Problem: Section 563(a) permitted Secretary of Education not to fund territories. Congress intends to provide consistent funding at one percent.

Solution: Rewrite Section 563(a) to specifically state that the Secretary shall reserve one percent of the funds appropriated for this chapter for the territories.

SECTION 9—Audit Requirements of Small LEA's

Amends Section 564(a)—To provide for five year audits of LEAs receiving less than an average of $5,000 each year under Chapter 2.

Problem: The audit requirements under Chapter 2 mandate a school district be audited once every two years. This is unrealistic and not cost effective for SEAs charged with conducting these audits and is burdensome for a large number of school districts receiving grants smaller than $5,000.

Solution: Amend section 564(a) to require an audit only once every five years for those districts receiving small amounts of money under Chapter 2.

SECTION 10—Requirement for State Approval of LEA Applications

Amends Section 556(a)—To clarify SEA role in approving applications.

Problem: ECIA was not clear on the SEA role in approving LEA applications according to the requirements of the Act.

Solution: Amend Section 566(a) to state that an LEA may receive its allocation of funds under this subchapter for any year for which its application to the SEA has been approved. The SEA shall approve any such application which meets the requirements established in ECIA. To safeguard the LEAs from overburdensome state rulemaking and additional amendment has been adopted to require SEAs to identify such rules as purely State imposed requirements. (See Section 12).

SECTION 11—School Level Programs

Amends Section 573(a)—To change "chapter" to "subchapter".

Problem: ECIA is not clear that the school level planning requirement in Sec. 573(a) should apply only to programs under subchapter A of Chapter 2.

Solution: Technical change of "chapter" to "subchapter".

SECTION 12—State Rule-Making

Amends Section 591—To add a new subsection requiring States to identify any State rule, policy, or data collection relating to this Act as a State imposed requirement.

Problem: Under section 10 of the SEA role in approving LEA applications was clarified. However, LEAs have expressed a concern that SEAs might use Section 10 as a mechanism for excessive regulations of LEA activities.

Solution: Amend Section 591 to require States to identify any State requirements as purely State imposed.

SECTION 13—Withholding of Payments

Amends Section 592(a)—To delete language resulting in application of the Administrative Procedure Act.

Problem: The final regulations provide for withholding proceedings before the Education Appeals Board but require—because of what the Department interprets as a statutory mandate—that these proceedings be conducted in accordance with the provisions of the Administrative Procedure Act. Apparently the Department construes "on the record" to dictate this result. Congress did not intend such lengthy and time-consuming proceedings, with the attendant burden—particularly under ECIA, an act specifically designed to reduce administrative burden.

Solution: Strike the words "on the record" from section 592(a).

SECTION 14—Judicial Review

Amends Section 593(b)—To add presumption of LEA compliance language.

Problem: Section 593(b) sets forth a presumption of SEA compliance. There is no comparable provision with respect to LEAs. This was a clear oversight given the purposes of ECIA.

Solution: Add language which ensures that any LEA which has attempted in good faith to comply with the State and Federal regulations and interpretations shall be presumed to have complied unless findings of fact by the Secretary overcome such a presumption.

SECTION 15—Application of GEPA

Amends Section 596—To clarify statutory ambiguity regarding Congressional intent on the applicability of GEPA to ECIA.

Problem: Prior to adoption of H. Con. Res. 388, the final regulations on ECIA stated that GEPA was inapplicable to both Chapters 1 and 2 except where explicitly stated that it does apply.

Solution: Add language to clearly state that the applicability of GEPA to ECIA is retained except where specifically made inapplicable or superseded by ECIA. The specific provisions of GEPA that are superseded are as follows:

Section of GEPA		Superseded by section of ECIA
408(a)(1)	Federal regulations	591(a).
427	Parental involvement	556(b)(3).
430	Application requirements	556(a) and 564(b).
431A	Maintenance of effort	558(a).
453	Withholding	529.
455	Judicial review	593.

SECTION 16—CORRECTION OF ESEA TITLE I REFERENCES

Amends Section 142(a), 147 and 152(a) of ESEA—Title I—to correct cross-referencing in the state-operated programs to sections outside the state-operated programs that have been repealed under ECIA.

Problem: Unintentionally, ECIA made cross-reference to sections of state-operated programs under ESEA Title I which could be interpreted to incorporate the program requirements contained in the subparts of old Title I rather than merely the amount of and eligibility for grants.

Solution: Amend ESEA Title I to reflect the requirements cited in ECIA regarding designation of attendance areas, children to be served, parent advisory councils, and comparability.

SECTION 17—CONFORMING AMENDMENTS

Amends several sections of ECIA to provide for the consistent use of the term "private" school wherever appropriate throughout the Act.

SECTION 18—EFFECTIVE DATE

An amendment to provide maximum flexibility to State and local education agencies so that they are not subjected to unintentional audit exceptions because of the ambiguity associated with the transition to ECIA.

Problem: This package of technical amendments contains both greater and lesser flexibility in various parts of Chapter 1 and 2. Consequently, if these amendments were effective on the date of enactment, much confusion would exist.

Solution: Add a new section to permit flexibility for the current school year.●

EXPORT TRADING COMPANY ACT PROVIDES MEANINGFUL HELP FOR THE NATIONAL ECONOMY

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. DAUB. Mr. Speaker, the passage of the Export Trading Company Act signifies an action by this Congress that will demonstrate that there are things we can do that will increase our exports and create jobs without the benefit of a new deficit widening spending program.

The strength of the American economy lies within the individual resources of those who work, save, and invest. Unfortunately in the world today we see other countries underwriting their exports and damaging the ability of Americans to compete. But Americans can compete successfully when the playing field is fair and I believe the development of export trading companies will do much to enhance the competitive position of Americans.

Too often in dealing with ways to encourage economic growth Congress has failed to address the question of the foundation of the economy and has simply treated symptoms. This makes for good public relations but does little to nourish the elements of our Nation that create jobs and opportunity. This legislation will not get the press that a so-called jobs bill might but it will do much to enhance the potential for real growth that will create real and productive employment.●

U.S. FOREIGN ECONOMIC STRATEGY FOR THE EIGHTIES

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. REUSS. Mr. Speaker, at a time of worldwide economic slump and unacceptable levels of unemployment, many questions are being raised about the future. The nonprofit International Economic Policy Association has just issued a timely book which gives some of the answers. Entitled "U.S. Foreign Economic Strategy for the Eighties," it is coauthored by association president Timothy Stanley with Ronald Danielian and Samuel Rosenblatt. The former U.S. deputy special representative for trade negotiations, Harald Malmgren, has commented that:

This book should be read as a vital antidote to the prevailing pessimism about American competitiveness. The authors show that there could be a better future—but only if it is recognized that the U.S. economy has become part of a global market place and we reshape our policies to meet the emerging global economic and political challenges.

The following summary of the book will prove helpful to my colleagues:

This book, published on the occasion of the International Economic Policy Association's 25th Anniversary, brings both good news and bad. The good is the prospect for renewed world economic growth in the mid- and late-eighties as demographic trends, adjustments to structural change, and pent-up demand finally end the decade of slump initiated in 1973 by OPEC's oil price escalations. The bad news is that the U.S. has some way to go to get from here to there, and that unless its performance and methods of dealing with the world economy are reformed, this country will be in a poor competitive position to capitalize on the renewed growth.

Chapter 1 provides an overview of these perspectives, with particular attention to the doubling of inflation, halving of growth, and declining productivity that affected the major industrial countries in the seventies—primarily owing to the quadrupling and then tripling of energy costs. It stresses that the total U.S. interactions with the world economy have multiplied dramatically, but without much corresponding change in American attitudes or policies. The outlook for the eighties is described in optimistic terms that depend upon some important "if's."

Chapter 2 examines what actually happened in the seventies, to whom, and why, in terms of shifting world economic geography and the erosion of the position of the U.S., especially as compared to Germany, Japan, OPEC, and the newly industrializing countries. The chapter takes a brief look at the generally gloomy outlook for the nonmarket economies. It reviews the declining U.S. share of various sectoral markets and the balance of payments problems that developed as oil-rich OPEC members siphoned funds from industrialized and developing oil consumers alike. Energy is treated as one of the key factors, along with investment and the internationalization of production, the problem of U.S. competitiveness, and the effect of floating exchange rates.

Chapter 3 outlines goals and makes recommendations for U.S. action in the 1980s under the headings of macroeconomic policies, energy, trade in goods and services, investment and multinational corporations, world economic development, and financial and monetary stability. It concludes that in all these areas, coordination with key allies is essential and must be improved.

Some of the major recommendations are:

A better mix of financial and monetary policy is needed along with reduced budget deficits, lower interest rates, improved R&D programs, and a longer-term focus for management.

The United States must expand its exports and should seek greater reciprocity of access to foreign markets. Adjustment assistance that really "adjusts" is essential, to share the burdens of maintaining open markets and defending against protectionism. Such disincentives as the present Foreign Corrupt Practices Act, the "Ribicoff" boycott amendments, and unrealistic foreign policy constraints must be replaced with incentives. These include: adequate Export-Import Bank funding and authority to match the competition, foreign trading companies legislation, and improved export promotion and support programs. Tax treatment of foreign earnings can be a major factor in competitiveness. The United States must guard against double or premature taxation and maintain tax incentives for exports which can compensate for other countries' rebating of their border taxes.

Investments and trade are two sides of the same coin. A third of U.S. manufactured exports now go to foreign affiliates. We should push for the open two-way street in both categories. The U.S. government must move from official neutrality to support. However, it must attack trade-distorting performance requirements and insist on national treatment for U.S. business overseas. U.S. laws should provide for objections to incoming foreign investments on reciprocity grounds, or for reasons affecting national security for sensitive areas such as energy, especially when such investments are controlled by foreign governments. The United States should expand OPEC coverage, support international investment insurance, and work for international "due process" for foreign investors. Improvements in the international investment climate are essential, among other reasons, to permit the necessary investments in strategic minerals, many of which are found in Third World countries. U.S. multinationals are the cutting edge of American competitiveness, and international codes of conduct affecting them must be in the form of voluntary guidelines.

The service sector requires special attention in GATT. We should go after reductions in nontariff barriers which limit opportunities for our nationals in this area of high U.S. competitiveness, and services should be eligible for the same trade law remedies as goods.

U.S. political, strategic, and economic interests require that we pursue an active concern with world economic development. Now

that the "new international economic order" rhetoric seems to be muted, we should go forward on the basis of realism. This means meeting U.S. commitments to multilateral development banks, as well as increasing carefully targeted bilateral aid, geared to maximizing the opportuity for private sector development. Since the United States can afford to transfer "real" resources more easily than dollars, tied credits can help overcome congressional opposition to foreign aid. Helping the developing countries service their debt burdens and expand their economies can assist them to become future engines of growth for the industrialized world as well. Government and industry should work in partnership toward that end.

East-West trade is a subject of major frictions within the West. Notably, the U.S. opposition to the Soviet gas pipeline to western Europe is counterproductive. It should be modified in exchange for OECD agreement to tighten noncommercial credit to the East. Some "linkage" between trade and foreign policy cannot be avoided; but the perceptions of U.S. reliability as a supplier could be improved by two-year umbrella agreements between the U.S. and the Soviet government which would not be breached except for hostile acts and which could be renewed as East-West relations warranted.

The optimistic medium-term outlook depends on continuing efforts by the government, industry, and the public to cut U.S. dependence on Middle East oil, reduce OPEC's market share, conserve energy, and develop alternatives to oil. Otherwise, relaxation during the current soft market can encourage far higher costs later in the decade, prolonging or renewing the stagnant economy that characterized the seventies and persisted in 1980-82. A minimum landed price for non-North American imported oil imposed by means of a variable levy is needed to preserve U.S. energy options, and prevent the undercutting of such programs as synfuels and nuclear and renewable energy, as well as domestic coal and gas production.

All of the above will be difficult to achieve without financial and monetary stability. Floating exchange rates cannot automatically "equilibrate" U.S. trade imbalances. The overvaluation of the dollar that has resulted from high anti-inflationary interest rates is seriously harming the United States. We must move for greater coordination among the summit seven on macroeconomic policy, exchange rates and intervention, and IMF surveillance. The World Bank's development role may require liberalizing its "gearing" ratio, but the Fund's "conditionality" is essential for world financial viability.

Chapter IV discusses the policy-making environment within which a coherent foreign economic policy must be shaped. Improvements are called for in U.S. public awareness, congressional cohesion, and executive branch organization. This book favors a revived White House Council on International Economic Policy with the U.S. Trade Representative as the focal point. A single six-year Presidential term might help the government meet the age-old problem of policy continuity. The key, as it is in so many areas, is to increase Presidential involvement and leadership in integrating domestic and foreign economic policy. And that policy cannot rest on the proposition that the U.S. can somehow "go it alone" without our key allies.

The book's authors are optimistic that the necessary steps can be taken and that they will restore American competitiveness in a growing world economy in the eighties if they are put in the context of long-term national priorities and strategies. Failure to do so and to resolve structural problems like energy and the adaptation to new high technology challenges, could produce a gloomy economic outlook instead of a prosperous one. America's future, to paraphrase Shakespeare, lies not with the stars, nor even with OPEC's mercies; rather it is up to us—all of us, government, business, labor and the public, for, as has been observed, "destiny is the product of conduct."●

"DENSEPACK"—A BUDGET BUSTER

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. SIMON. Mr. Speaker, Senator ERNEST F. HOLLINGS of South Carolina had an interview in USA Today about "Densepack" and the MX missile proposals of the President.

What he has to say makes eminent good sense.

Among the things he says is something I strongly believe:

We are overprepared for nuclear war and underprepared for conventional warfare.

I urge my colleagues who may not have seen the original article to read the interview.

"DENSE PACK" BASING IS A BUDGET BUSTER

USA TODAY. Will Congress deny President Reagan his will on the MX missile?

HOLLINGS. Congress won't approach it as actually denying the president his will. Several presidents considered the problem of the survivability of ICBM land-based missiles. In that light, there have been moves to put the ICBMs on a racetrack, drop them from an airplane, put them deeply into the earth, or put them on a small submarine on the continental shelf. Charles Townes, who was chairman of Secretary Weinberger's blue-ribbon MX study commission, says he doubts that missile silos can be hardened sufficiently. He doubts that they can be done in four years. It would take eight years. That means an expensive cost overrun. And if it takes that much time they can be countered by the Soviets very inexpensively. It's not denying President Reagan. Continuing with the MX is denying your own common sense.

USA TODAY. Is it going to be a political dogfight that will compromise U.S. safety?

HOLLINGS. What could compromise our safety is to make the wrong decision. If we put all our eggs in one basket, as "dense pack" calls for, you are drawing a very compact target that can be defeated by several approaches: pinning down the missiles by exploding atomic bombs over them so they can't be launched; earth-penetrating warheads; attacking the missile site in waves every 30 minutes. Going ahead with MX is exactly what the Soviets would have you do—waste some $35 billion to $40 billion on a non-survivable system. That money could be better spent on more attack submarines, F-15s and F-16s, conventional warfare and readiness. The Soviets are actually more concerned about Pershing II and cruise missiles.

USA TODAY. Why do you believe the anti-MX forces in the Senate can win this time?

HOLLINGS. The Republican-controlled Senate Armed Services Committee—and Sen. Tower—reported out no funds for MX production this year. Then the Senate voted against committing funds for production of the MX. We said to go forward with research and development, as I want to do now, but not to go forward with production until the Congress approves a survivable site. All I need to do is change around two or three votes and we will have no production funds.

USA TODAY. Is the MX really needed to increase this country's defense capabilities?

HOLLINGS. We have to constantly strive to upgrade the technology of our weaponry. Out of all of this technology and frustration over a 10-year period and four presidents trying to place that MX somewhere, the fact is that we have got to be a little bit more realistic and go the route of the small mobile missile that can be defended, rather than have them all bunched in the dense pack mode.

USA TODAY. Did you favor President Carter's plan to hide the missiles over several hundred miles of racetrack?

HOLLINGS. No. That would have cost upwards of $60 billion, some estimates were $90 billion.

USA TODAY. Are there other, more conventional, less expensive and less controversial ways to beef up our defenses?

HOLLINGS. I happen to believe we are overprepared for nuclear war and underprepared for conventional warfare. If I could save some of the money I would spend it on conventional readiness of our troops. We need more than a demonstration of nuclear deterrent power, we need a demonstration of will power.

USA TODAY. Could we counter Russia's conventional might with conventional weapons?

HOLLINGS. I think we must. The bishops are right to a point. We have got to foreswear the use of nuclear weapeans on both sides of the Iron Curtain . . . . I think it should be done in the context of the survival of mankind. That would give our foreign policy more credibility.

USA TODAY. What kind of signal does "dense pack" send to the Soviets?

HOLLINGS. If I ran the KGB I don't know of a better decision to get the other side to make. I mean, heaven's above, you would be putting all the eggs in one basket. Let them waste $35 billion or $40 billion on an easy target.

USA TODAY. Wouldn't the MX missile in whatever setting be a means of telling the Russians that the United States means business about building up the country's defenses?

HOLLINGS. It would tell the Russians that the United States doesn't know what it's doing. The blue-ribbon commission chairman, Dr. Townes, said to the secretary of defense: "Don't go this route." But they go ahead because of the political pressure to make a decision for the Air Force. The Air Force has been waiting for 10 years for a follow-on missile. They've got a full-court press on.

USA TODAY. Do you think it is purely political that the president is pushing for dense pack now?

HOLLINGS. No, but I think he had been pressured. But when he calls on everybody to get together for a show of unity, it's a false call.●

IS SURRENDER MORE "MORAL"?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. McDONALD. Mr. Speaker, the Chattanooga News-Free Press printed a very cogent editorial on November 16, 1982. The editorial pointed out that the strong nations are usually the free ones. Nations with little or no defense capability are the ones that have fallen under Communist domination. Being righteous alone will not save a nation from attack, the statement of certain leftwing clerics notwithstanding. Our first and foremost duty here in the Congress, as specified by our oath of office, is to provide for the defense of this country. To do anything less could be a sentence of slavery for generations to come. I commend the editorial to the attention of my colleagues.

[From the Chattanooga News-Free Press, Nov. 16, 1982]

IS SURRENDER MORE "MORAL"?

Does "morality" demand that the United States surrender to Communist aggression? No sane person would suggest that it does.

With Communism engaged in worldwide agression in many forms, adequate defense is required to avoid surrender or defeat. Since the Soviet Union has superior nuclear power and superior conventional weaponry, it is necessary for the United States to build substantial defenses in both categories to avoid being forced into a position of inevitable surrender.

Oddly, this simple fact is not clear to all. As the Communists step up their aggressions, there are some among us who call for us to let down our guard. For example, Roman Catholic bishops in Washington yesterday debated a draft pastoral letter designed to condemn American nuclear defense. What the Catholic bishops debated is similar to disarmament pronouncements by some other church leaders. It is unfortunate that the valid desire for peace is so often wrapped in irrational arguments that only encourage the aggressors.

Afghanistan is not being invaded because it had too many arms or because it had nuclear power. Poland is not oppressed because its people were militaristic. Eastern European nations are not enslaved because they built strong defense forces. Africa is not occupied in many places by Cuban Communist Soviet puppets because the African countries were too powerful. Southeast Asia has not been subjected to the murder of millions of its people because it had adequate defense.

Does "morality" prevail in any of those situations?

The United States and much of the rest of the world have freedom and peace today because the United States does have military power sufficient to give Communist aggressors pause.

Thus our nuclear bombs and our conventional weapons are instruments supporting morality—not destroying it.

Some bishops in Washington have argued that it is immoral to have nuclear weapons and to suggest we might use them to stop the Soviets. That is an irrational view. Which is more "moral," for us to hold out the possibility of a nuclear strike against an aggressor and thus keep peace or to announce an abandonment of nuclear threat and thus encourage an aggressor to shoot?

All war is deplorable. But both sides in war are not equally to blame. World War II was caused by the aggression of Nazi Germany and Imperial Japan. They attacked and killed because they throught they could win. Our defenses, including the use of two nuclear weapons, belatedly stopped the killing. The nuclear bombs killed fewer people than did conventional weapons. Would it have been more "moral" to have refrained from using nuclear weapons, thus resulting in the deaths of many times more people to bring the war to an end by conventional means?

Or would it have been far better if the United States and its allies had been so militarily strong from the beginning that Hitler and Japan would never have fired the first shot? Our goal now is to be strong enough to prevent the new aggressors, the Communists from igniting another war. That serves morality best.

No nation should rely solely upon military might for its security. It should seek righteousness first. But it should take reasonable steps to defend righteousness against the aggressive forces of unrighteousness.

The greatest immorality would be the surrender of righteousness to the unrighteous through foolish failure to use our resources—including nuclear ones—to defend peace and freedom.●

EXPLANATION OF MISSED VOTE

HON. GERALDINE FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Ms. FERRARO. Mr. Speaker, a commitment to attend an official function in New York City last night required me to leave Washington before the close of legislative business in the House. As a result, I missed the final rollcall vote of yesterday's session. The vote was on the Broyhill amendment to the Nuclear Waste Policy Act.

The purpose of the amendment was to change the provisions of the bill relating to congressional consideration of State actions vetoing the selection of permanent repository sites for nuclear waste. The bill provided that a State's veto could be overidden only by a disapproving vote in both Houses of Congress. The Broyhill amendment changed that to require that one House of Congress vote to sustain the State's veto, thereby reducing the amount of State control in the site selection process.

Had I been present, I would have voted "no" on the Broyhill amendment.●

NEW JERSEY BLUE CROSS CELEBRATES 50TH ANNIVERSARY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. RODINO. Mr. Speaker, in December 1982, the Hospital Service Plan of New Jersey, better known as Blue Cross of New Jersey, will celebrate the 50th anniversary of its establishment and operations.

The Nation's first successful multihospital prepayment plan was conceived, and commenced operations, under the auspices of the hospitals of Essex County, N.J., and subsequently evolved into the Blue Cross Plan serving the entire State.

Since 1933, the operations of Blue Cross of New Jersey have grown to the point where it now provides over 4.7 million individuals with prepaid health care, making the plan the largest health insurer in the State of New Jersey.

Blue Cross of New Jersey provides low cost, prepaid health care benefits to individuals and groups. It has contributed to the peace of mind of millions of New Jersey citizens by providing them with an affordable method of prepayment for necessary health care benefits. Since 1966, Blue Cross of New Jersey has also served the senior citizen population of the State in a special way by acting as a medicare intermediary.

In its 50 years of existence, Blue Cross of New Jersey has been a good corporate citizen, contributing to the economy of New Jersey and promoting the health and well being of the citizens of the State. Through its extensive activities in the field of health education, the plan has emphasized the importance of good health habits in controlling costs by reducing health care needs.

At this time, I would like to extend congratulations to Blue Cross of New Jersey on the attainment of its 50th anniversary of service to the citizens of the State of New Jersey.●

RESOLUTIONS OF THE COUNCIL OF JEWISH FEDERATIONS

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. FRANK. Mr. Speaker, it is my distinct honor and pleasure to insert into the CONGRESSIONAL RECORD, at this point, copies of resolutions which were passed by the General Assembly of the Council of Jewish Federations during their 50th anniversary celebra-

tions and plenary sessions in Los Angeles, Calif., Friday, November 12, 1982.

As you can see from the enclosed very thoughtful resolutions, the Council of Jewish Federations has spent a great deal of time and care in constructing the resolutions on important matters of citizenship to be voted on by over 2,000 delegates designated by more than 600 communities throughout the United States.

I was particularly interested in the broad range of issues confronting the general assembly after the 50 years of its rather special existence as an umbrella organization of more than 200 federations and 600 social service agencies throughout the United States.

As you will note, Mr. Speaker, the issues include the solidarity which is shown not only by the Jewish community but by all Americans with the plight of Soviet Jewry; the support for women's rights and the very difficult question of peace in the Middle East. In addition, the Council of Jewish Federations, as a working assembly in Los Angeles, reaffirmed its strong position in regard to Federal budget cuts and support for jobs development programing. Over the past 2 years, since the passage of massive cuts in Federal domestic programs for the truly needy, the council has frequently reiterated its support for social programs. And I am also pleased that the assembly spoke out clearly on the need to halt the nuclear arms race.

I commend each and every Member of this body, as well as the public at large, to the contents of these resolutions, with the hope that they will serve as models to many other organizations and individuals who seek to let their voices be heard in this great democracy.

I wish to commend President Martin Citrin of Detroit whose presidency was reaffirmed during the general assembly and Carmi Schwartz, the executive vice president of the Council of Jewish Federations, for the success of this enormous undertaking.

And recognition should also go the outstanding work done on behalf of the Council of Jewish Federations by its very talented director, Mark Talisman. The Jewish Federations of Massachusetts, many of whose members attended the general assembly, have indicated to me how productive and fruitful they found all of the meetings and discussions.

The resolutions are as follows:

COUNCIL OF JEWISH FEDERATIONS
RESOLUTIONS

SOLIDARITY WITH SOVIET JEWRY

We solemnly declare our solidarity with our Jewish brethren in the Soviet Union who are struggling to assert both their national identity and their right to leave the Soviet Union.

Profoundly concerned for their fate, we denounce the policy pursued by the government of the Soviet Union in suppressing the Jewish cultural and religious heritage. This constitutes a flagrant violation of human rights incorporated in international treaties ratified by the Soviet Union and as expressed in the Soviet constitution.

The exodus of Jews from the Soviet Union has now declined to a mere trickle of 250 per month from an average of over 4,000 a month in 1979.

Repression of Jews has intensified, and severe sentences of imprisonment and exile meted out to activists on false charges. Constant intimidation has been applied to stop the teaching of the Hebrew language and culture. Harassment of Hebrew classes and confiscation of Hebrew books are increasingly frequent occurrences. The practice of Judaism is subjected to special disabilities.

Over the past two years the number of refuseniks, many of whom have been waiting years for exit permits, has more than doubled and their plight worsened.

These adverse developments take place in an environment saturated by government sponsored virulent anti-Semitic propaganda and overt discriminatory policies against Jews in higher education and employment.

The Jewish people will not remain silent. The conscience of the civilized world must be aroused. We call upon Jewish communities and organizations throughout the world to raise their voices against the oppression of their brethren in the Soviet Union. We also appeal to all people of good will to join us in this great, moral and humanitarian struggle for the rights of Soviet Jews. Demonstrations and public actions are essential and valuable methods for keeping this issue a matter of concern for the world.

We enthusiastically endorse the convocation of a world conference of Jewish people in 1983.

We call upon the United States and Canadian governments to raise the issue of Soviet Jewry in their contacts with the USSR.

SUPPORT OF THE SPECIAL FUND OF THE UNITED JEWISH APPEAL

In carrying out "Operation Peace for Galilee," the people of Israel have decisively defended their right to live their lives free of terror and bloodshed and have significantly diminished the threat of terrorism to all nations of the world.

The human cost has been tragic and painful. The financial cost has been staggering and is growing. To meet it, the people of Israel—already the most heavily taxed people in the world—have accepted the burden of still greater taxation.

As a consequence, they can no longer bear the additional burden required to support human service needs. Because we Jews of the free world did not do enough to alleviate this burden the Jewish Agency is unable to sustain its full responsibilities for health, social service and educational programs.

As a consequence of these events, the Jewish Agency must now, as it has in the past, accept the responsibility to provide these services. We must reaffirm our commitment to raise sufficient funds to enable the Agency to meet fully its broadened mandate—projected at a total additional cost of $300 million for world Jewry—of which $200 million is the responsibility of North American Jewry.

This commitment is in addition to our Regular Campaign and our special responsibility to sustain the programs of Project Renewal.

To accomplish this, the United Jewish Appeal has established a Special Fund campaign with all proceeds committed to the humanitarian programs newly reacquired by the Jewish Agency.

The Council of Jewish Federations endorses this effort and pledges its full cooperation in its implementation. This campaign must be carried out in communities as swiftly as possible.

We call upon communities to implement the campaign in a variety of ways—some with a free-standing special effort in a specific time-frame, others in concert with an accelerated 1983 Regular Campaign. Prompt redemption of pledges is critical and special steps should be taken in this direction.

We call for decisive action by North American Jewish communal leadership to generate true capacity-giving in the 1983 campaign year—to meet our full responsibility to the quality and continuity of Jewish life, and demonstrate our unshaken and everlasting solidarity with the people of Israel.

SUPPORT OF WOMEN'S RIGHTS

Last year this Assembly adopted a Resolution on Women's Concerns and Women's Rights and endorsed the passage of the Equal Rights Amendment. The failure to ratify the Equal Rights Amendment in no way diminishes our commitment to the principles of equal rights.

The Council of Jewish Federations reaffirms its commitment to equality and urges all member Federations to maximize involvement of women in communal leadership roles and to upgrade women professional workers in Jewish communal service as well as to practice non-discrimination in pay scales. CJF commits itself to take additional steps to increase the number of women in leadership roles in CJF.

In the general community women continue to suffer from discriminatory treatment in the workplace and in other areas of life.

We call upon our member Federations to take leadership in all actions to assure equal rights for women.

PEACE IN THE MIDDLE EAST

In the aftermath of the war in Lebanon, the opportunities for peace in the Middle East have vastly improved. Israel's northern border is secure; Lebanon now has the means to reestablish its sovereignty; and the United States is now in an unprecedented leadership role.

As North American Jews we are vitally interested in constructive efforts towards a stable and peaceful Middle East. We believe that adherence to the following principles will help the movement towards such an outcome:

(1) The Camp David Accords were a major step in the right direction. The genius of the Accords was that they postponed the more difficult issues to a later date and developed agreements on the more limited issues. This fosters conditions that can ultimately lead step by step to the successful negotiation of a peace agreement. Camp David is still the best hope. Israel's commitment to Camp David is exemplified by the return of the Sinai to Egypt and the dismantling of Jewish settlements there.

(2) The parties to the conflict must sit down together and negotiate their differences. Arab states must negotiate with Israel and their refusal to do so is at the heart of the problem. The Fez declaration denying explicit recognition of Israel and calling for an independent Palestinian state and asserting that the PLO is the sole Palestinian representative constitutes a rejection of the principles of Camp David and the initiative of President Reagan. This blocks the

participation of Jordan in the negotiations, a vital ingredient in the peace process.

(3) The United States' role as mediator is critical in solving the problems of the area. United States advocacy of the proposals on matters not yet ripe for negotiation impedes the peace process. We urge the United States to help bring the parties to the bargaining table to resume negotiations under Camp David peace process.

BACKGROUND NOTE.—The situation in the Middle East has become so complex and events move so rapidly that no brief resolution can fully encompass the issues and spell out the positions. What is called for is a detailed memorandum of positions as a completely separate document and this is available at the General Assembly.

A HALT TO THE NUCLEAR ARMS RACE

There is a growing concern among citizens of the United States and Canada about the continuing nuclear arms race. The prospect of nuclear war is becoming more real and threatening as time goes on.

We declare that there is a consensus that there is a special Jewish viewpoint on this issue. For us, discussion of a "nuclear holocaust" is more than a metaphor. Our history demonstrates that man is capable of perpetrating unspeakable acts on other men and further, that silence in the face of inhumanity is equivalent to complicity.

The specific methods of preventing nuclear war are many and complex and there are substantial issues and political viewpoints on which people of good will differ. There is, therefore, no consensus on specific methods.

However, we feel there is consensus on the moral imperative and this we can articulate.

We call upon all nuclear powers, but especially the United States and the USSR to pursue a program that will produce a total and multi-lateral halt to the nuclear arms race.

We appeal for an immediate and verifiable world-wide freeze on the testing, production and development of all nuclear weapons.

REAFFIRMATION OF CFJ BOARD RESOLUTION OF APRIL, 1982, ON FEDERAL BUDGET CUTS AND SUPPORT FOR A JOBS DEVELOPMENT PROGRAM

On April 25, 1982, the CJF Board of Directors approved the following resolution:

The Council of Jewish Federations, speaking on behalf of community-wide organizations in 185 Jewish communities throughout the United States, expresses its deep concern about the impact of Federal budget cuts on millions of individuals and families in our nation. These Americans, who are bearing a disproportionate share of the reductions in Federal funding, have seen their hopes and aspirations frustrated.

The Council of Jewish Federations firmly opposes any additional cutbacks in those human service programs that provide a lifeline to the neediest in our society. The poor, the working poor, the elderly, children, and the handicapped are already bearing an unfair portion of the burden of the budget reductions enacted last year. We urge those entrusted with social policy to act with compassion and justice and reverse the devastating impact of the current economic situation.

One of this nation's priorities has been, and must continue to be, to assist its citizens to be as productive as possible, to allow each individual to achieve his or her potential, and to provide adequate funding and programs for those who are unable to provide for themselves.

Federations have identified persons about whom they have the greatest concern. They are the aged, the children, the unemployed, single parent families, and families with marginal income. They have indicated that the following major programs, already cut the endangered by further cuts, have created the greatest problems for these people: social services block grant, medicaid, nutrition programs for the elerly and children, employment and training programs, rent subsidies for the elderly, food stamps, education programs.

It has been demonstrated over the last year that the voluntary sector cannot effectively replace cutbacks of such magnitude in public support.

Faced with the economic realities of the past eighteen months and the stresses they place on the social fabric of our country, we urge that there be a reversal of the policies that have brought about this continued erosion of human and social services.

This Assembly solemnly re-affirms this resolution and calls for action to deal with the tragic unemployment situation.

For the first time in 40 years the unemployment rate is over 10 percent and 17 million Americans are either out of work or unable to find full-time employment.

The recent "jobs Bill" passed by the Congress and signed by the President is mainly a job training bill and will do very little to create new job opportunities.

One of the major reasons for the ever increasing budget deficits at the Federal, State and local levels is increasing unemployment. It is estimated that for every percentage point increase in unemployment the Federal deficit is increased by 30 billion dollars.

Lack of employment income means less tax revenues at all levels of government which, when coupled with additional expenditures for unemployment compensation, public assistance and other related programs for people in need, further exacerbates our already deteriorated economy.

We believe the current situation to be of crisis proportions—consequently, we urge the President and the Congress to enact emergency legislation aimed at creating jobs in both the public and private sectors to lift the spirit of millions of Americans by giving them the opportunity to work.

THE AMERICAN GATHERING OF JEWISH HOLOCAUST SURVIVORS AND THE 40TH ANNIVERSARY OF THE WARSAW GHETTO UPRISING

The following resolution was approved by the CJF Board of Directors on November 10, 1982 and we call for its endorsement by the Delegate Assembly:

April 1983 will mark the 40th Anniversary of the Warsaw Ghetto revolt against the Nazi military forces. This organized armed rebellion against the Nazi occupation in Europe in World War II served as a symbol for all forms of Jewish resistance during the Nazi Era. As a commemoration of this heroic event an American Gathering of Jewish Holocaust survivors is being convened in Washington, D.C. April 11-14, 1983. It will serve as a unique get-together of survivors in America and Canada as well as an expression of commitment to remembrance of the past and faith in the future. It will be held under the auspices of the Days of Remembrance Committee of the United States Holocaust Memorial Council.

We commend this Gathering in a free and democratic society as an historic affirmation of the durability of the Jewish spirit.●

JOSEPH V. CIABURRI

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. DENARDIS. Mr. Speaker, on October 24, 1982, Joseph V. Ciaburri was honored by the Horeb Lodge No. 25, B'nai B'rith, as their "Man of the Year." Joseph Ciaburri, a good and cherished friend, is most deserving of the high honor paid him by B'nai B'rith. He has served his community with dedicated excellence and been an extraordinary participant in the life of the entire New Haven area. His interests and concerns are many and varied. I am fortunate to be able to count him among my special close friends.

The statement by the B'nai B'rith spells out his many attributes, although it does not specifically refer to the unusual warmth and care he brings to everything he does.

JOSEPH V. CIABURRI

Horeb Lodge of B'nai B'rith takes extreme pleasure in presenting its annual Man of the Year Award to an esteemed member of the community, Joseph V. Ciaburri.

Born in West Haven, our honoree attended local public schools, Southern Connecticut State College where he graduated as class president, and then on to Wesleyn for a master's degree.

Our honoree is the founder, president and chief executive officer of the Bank of New Haven, a position which he has held since 1978. He has long been and continues to be a most active member of our community, active in both civic and professional organizations. He is Past President of the American Institute of Banking, and of the Connecticut Suburban Bankers Association.

Joe's civic involvement is literally a roll call of county organizations with his most recent success being the chairman of the Columbus Day Committee. He is currently serving as vice-president of the Shubert Performing Arts Center, as a member of the Board of Directors of the New Haven Symphony; a member of the Yale Club; and founder and incorporator of the Historical Society; as well as being a member of the Board of Directors of the Dixwell Community House.

In addition to his current activities, his deep concern for young people has graphically demonstrated by his active participation through the years by being involved in the Boy's Village of Milford; the St. Francis Orphanage Home; and as past president of the Orange Little League. Through the years, he has given of his leadership ability and his dynamic personality to make New Haven a better place to live. His generosity of both his time and resources has been reflected in every area of his life.

Awards have been many to Joe. An Alumni Service Award at Southern Connecticut State College and a scholarship there in his honor, the recipient of the Golden Dome Award of Notre Dame University; a Brotherhood Award of the United Jewish Appeal; and the St. Francis Home Man of the Year Award. Horeb Lodge is indeed proud to add their Man of the Year

Award to his long and outstanding list of accomplishments.

Joe and his lovely wife, Mary Grace, live in Woodbridge and are the proud parents of three children.

It is with sincere appreciation of his dedication to the aims and principles of B'nai B'rith—Benevolence, Brotherly Love and Harmony—that Horeb Lodge pays tribute to Joseph V. Ciaburri.●

REAGAN IS CORRECT ON NUCLEAR FREEZERS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. McDONALD. Mr. Speaker, it is evident that many people in the United States still do not understand the serious implications of the so-called nuclear freeze as regards the national security of the United States. They refuse to believe that Moscow and its followers really have any influence in the movement and criticize the President for suggesting it is true. Only blind, deaf, and dumb persons, in my view, could fail to notice that most of the slogans are the same in Moscow as they are here, and that the dialog is never about Soviet weapons and bombs, but only discusses U.S. weapons and disarmament. Columnist Patrick Buchanan discussed this question in the Washington Times on October 15, 1982, pointing out how honest and sincere people are being mislead. Will we ever learn? I commend his column to the serious attention of my colleagues.

[From Washington Times, Oct. 15, 1982]

REAGAN IS CORRECT (AS IS CUSTOMARY) ON NUCLEAR FREEZERS

(By Patrick Buchanan)

"It was McCarthyism. It was low-road politics; it was disinformation," fumed Tom Wicker in *The New York Times*, "Shame on you, Mr. President," echoed the editorial page.

The comment that caused such melodramatics was Reagan's dismissal of some nuclear "freeze" demonstrators in Ohio last week with this commentary on their cause:

"They were demonstrating in behalf of a movement that has swept across our country, inspired not by the sincere, honest people who want peace, but by some who want the weakening of America and so are manipulating many honest and sincere people."

With this "smear on the freeze movement," thundered Brother Wicker, the president "impugned its origins . . . though there's not a shred of evidence for that, and suggested that those who support it are dupes."

Our colleague has a point. The "origins" of the freeze movement within the United States are decidedly grassroots American. Its principal exponents are Sens. Hatfield and Kennedy, not Karla and Moscow Center. But the president conceded that—in speaking of "many honest and sincere people"—and beyond that, the case belongs wholly to Mr. Reagan.

Anyone who cannot see the hand of Moscow and the ugly faces of its odious little affiliates inside the "peace movement" in Europe and the "freeze movement" in the United States is simply not looking. At the June 12 nuclear freeze rally in New York, the largest such rally in history, columnist Joe Sobran easily discovered the whole menagerie of communist, pro-communist and anti-American organizations out of the closet and on the streets—from the American Communist Party to the Marxist-Leninist Party to the U.S. anti-Imperialist League. All the detritus of the '60s—those who cried "peace peace" in Vietnam then cheered the North Vietnamese military victory—were present.

Has Wicker mislaid his May issue of *Commentary*? The cover article is a 10,000-word essay by Vladimir Bukovsky recounting Moscow's role in creating and guiding the peace and disarmament in the movement in the West. Bukovsky's sources are not CIA documents, but press clippings from East and West.

Assuming, as we must and do, benign motives to Hatfield and Kennedy, why did Brezhnev and Gromyko endorse the demand for an immediate "freeze" in nuclear weapons.

The answer is simple and it is precisely as the president warns. If Kennedy-Hatfield became American policy, the United States would be frozen into a position of permanent inferiority.

A freeze would leave the Russians with an absolute monopoly of 600 first-strike weapons; and an absolute monopoly of theatre nuclear weapons dominating NATO Europe. Cancellation of the Pershing and cruise deployment—the object of Europe's "peace movement"—would be instantly accomplished. Beyond that, a freeze spells an early end of the Strategic Air Command. Forbidden by the freeze from developing and deploying cruise missiles, B-1 Bombers or the Stealth, SAC—some 350 ancient B-52s—would be obsolete by the end of the decade.

Those in the forefront of the freeze movement in the '80s are of a type we saw in the "Ban the Bomb" movement in the '50s and the "Give Peace a Chance" crowd in the '60s. Bukovsky lists them:

". . . the same old mixture of communists, fellow travelers, muddle headed intellectuals, hypocrites seeking popularity, professional speculators, frightened bourgeois, and youth eager to rebel for the sake of rebelling. There are also the inevitable Catholic priests with a 'mission' and other religious people who believe that God has chosen them to make peace on earth right now. But there is also not the slightest doubt that this motley crowd is manipulated by a handful of scoundrels instructed directly from Moscow."

Mr. Reagan, then—as is customarily the case—was dead right in this premise, even if imprecise in his verbiage; and Bukovsky, one senses, is equally on in his historical pessimism:

"It is also quite amusing, if one has a taste for such amusement to be reminded of how many people are practially incapable of deriving any useful knowledge from even the recent lessons of history. Once again, the universal craving for peace right now, this very moment, and at any price, has rendered people utterly illogical and irrational, and left them simply unable to think calmly. Their current arguments, if one may call them that, are so childish, senseless, selfish, that an involuntary smile comes immediately to one's lips. Even at best, what one hears is a parroting of the kind of old moldy Soviet slogans and cliches that even schoolchildren in the Soviet Union would laugh at."●

PRESIDENT'S COMMISSION FOR THE STUDY OF ETHICAL PROBLEMS IN MEDICINE AND BIOMEDICAL AND BEHAVIORAL RESEARCH

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. WAXMAN. Mr. Speaker, I am pleased to announce the introduction of H.R. 7338, which would extend for 3 months the statutory sunset of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. At present the Commission is scheduled to terminate on December 31, 1982. H.R. 7338 would extend this deadline until March 31, 1983, in order to permit the Commission to complete the drafting, review, and issuance of several pending reports.

The Commission was established by Public Law 95-622 with the mandate to study the ethical and legal implications of a wide range of health and research issues. In the Commission's brief tenure it has performed a genuine service to the medical community by stimulating discussion on issues such as the protection of human subjects in research, the definition of death, fraud in biomedical research, genetic screening, and decisions to forgo treatment.

In addition, the Commission has been an excellent overseer of existing mechanisms to safeguard the privacy and safety of human subjects in health research and to insure the confidentiality of patient records. The Commission's recommendations have been particularly helpful in improving the adequacy and uniformity of Federal rules governing research with human subjects.

H.R. 7338 would allow the Commission 3 additional months to complete their activities and would not authorize any additional funds above those already appropriated. In view of the noncontroversial nature of this legislation, I will ask the House to expedite consideration and urge each Member's support. I insert a copy of H.R. 7338 in the RECORD at this point:

H.R. 7338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1804 of the Public Health Service Act (42 U.S.C. 300b-3) is amended—

(1) by striking out "for the fiscal year ending September 30, 1982" in subsection (a) and inserting in lieu thereof "for the

period beginning October 1, 1981, and ending March 31, 1983"; and

(2) by striking out "December 31, 1982" in subsection (b) and inserting in lieu thereof "March 31, 1983".●

PARRIS URGES NEW SOVIET LEADERS TO OPEN EMIGRATION

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. PARRIS. Mr. Speaker, I am honored today to again participate in the Congressional Vigil for Soviet Jews. I am hopeful that this continuing vigil will have a positive effect on the emigration of Soviet Jews to the country of their choice.

Several organizations in my congressional district have contacted me on behalf of many Soviet Jewish families and individuals wishing to emigrate and for various reasons have been denied. These individuals have been subjected to continued harassment and in some cases imprisonment because of their desire to live in a free society. I will continue to write Anatoly Dobrynin, Ambassador to the Soviet Union, expressing my deep concern about the emigration and political persecution of these Soviet Jewish families and in one case have received positive results.

The Goloni family, who emigrated to the United States from the Soviet Union in 1975, received their U.S. citizenship last June. I believe our efforts have had some effect on the Soviet Government and I will continue to work toward securing freedom for Soviet Jews while I am in Congress.

With the death of President Breshnev, the United States and the entire world is closely watching the changing policies and leadership within the Soviet Union. Hopefully, this new leadership will allow more individuals to emigrate from the Soviet Union to the United States and elsewhere throughout the world. I urge my colleagues to participate in this congressional vigil so that more Soviet Jews can emigrate to the country of their choice.●

THE FUTURE OF TAIWAN

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. CORCORAN. Mr. Speaker, recently, my administrative assistant traveled to the Republic of China on Taiwan at the invitation of Tunghai University, one of the premier Christian colleges in Taiwan. What follows is the report of his visit. I commend it to my colleagues for their reading information. I share his thoughts about this important area of the world, where I had the opportunity to visit nearly 2 years ago.

The Republic of China on Taiwan is a strong and vibrant country. That is the first impression and the lasting impression one gets from a visit there. Although we no longer formally recognize the ROC, they are still our friends and want that relationship to continue. We are their No. 1 trading partner, and they are our eighth largest trading partner. They have accomplished an economic miracle of sorts in the last 33 years, since Chiang-kai-shek and his followers left the mainland to the Communists. Of course, they received much economic and military assistance from the United States, although economic assistance ended in 1965. They have, though, created a societal order which is a model for Asia, having built one of the most modern steel companies and harbors in the world; they have accomplished a great deal.

Now possessing the third highest per capita income in Asia, next to Japan and Singapore, the Republic of China and its people are proud, determined, and unwilling to give up on an eventual reunification of the two Chinas under democratic rule. They, too, though, are political realists. While accepting our denormalization of relations in 1978, reluctantly to be sure and with much anguish, they would like to see our relations slightly upgraded to the point of establishing official liaison offices here in the United States. This would be similar to the relationship our country had with the People's Republic of China during the period between the 1972 Shanghai communique and the 1978 Carter decision to normalize relations with the People's Republic of China. The Honorable Dr. Frederick F. Chien, the Vice Minister of Foreign Affairs, was very helpful in elaborating on these points.

They are very concerned about their defensive capabilities, and a tour of the island of Quemoy located 4 miles off the mainland shore in the straits between the People's Republic of China and the Republic of China quickly bears that out. It would be foolhardy for the People's Republic of China to attack Quemoy—it is practically impregnable.

But what really makes an impression is the hard work and diligence of the people who were pulling together for the common good with a smile on their face. They are a poor people, compared to our great country's residents, but they are working 7 days a week in many cases to continue to strengthen their economy and therefore their nation's defense needs. As one prominent Taiwanese woman said it is much like the pioneer days in the United States. Our ancestors worked very diligently and in most cases happily to make this the great country it is today.

It is my hope that our relationship with the Republic of China can continue to be mutually beneficial. We have too much invested in their people and their society to alter our course further. I am especially impressed with the efforts that Dr. James Lilley, the Director of the American Institute in Taiwan, and his staff are making considering the delicate nature of our relationship with the Republic of China.●

PROTECTIONIST PARANOIA

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. SIMON. Mr. Speaker, Michael Kinsley had an article in the New Republic recently, "Protectionist Paranoia" that I fear contains a substantial amount of truth.

I do not agree with every particular of his article, but I sense the growing pressure on all of us to make policies that have an immediate political popularity but do not serve the long-range interests of this country nor of world economic growth.

What seems clear to me is that the domestic pressure for taking some positions that do not serve the national interests will grow until we come up with more constructive alternatives for businesses and for employees who are impacted by international trade.

I do not suggest that we should not be harshly realistic in our negotiation. Obviously, we should be.

And I say this as one whose voting record is inconsistent on this issue. I do want to put pressure on the Government of the United States to see that Japan opens up for American beef, for example. Japanese restrictions on American beef hurt the Japanese consumer and hurt American cattle producers.

I am not suggesting a kind of naive acceptance of a theory that whatever happens in the name of world trade is good for the United States.

But I am concerned with the growing political pressures that I fear may result in policies that hurt our country, hurt the American worker, hurt American industry, and hurt many other countries in the process.

[From the New Republic, Nov. 15, 1982]

PROTECTIONIST PARANOIA

(By Michael Kinsley)

President Reagan told a cheering campaign rally on October 20 that his Administration would provide $1.5 billion in credit subsidies to spur food efforts. The next day he told another cheering crowd that his Administration had negotiated a "voluntary" quota on European steel entering this coun-

try, necessitated by the nefarious foreign practice of subsidizing steel exports. By "voluntarily" agreeing to this quota, the Europeans avoided a steel tariff that Reagan's Administration was planning to impose at 5 p.m. that very day. Reagan much prefers voluntary agreements because he is a free trader.

Walter Mondale also believes in free trade. On the other hand, "I'm not a sucker." Mondale doesn't want American kids to spend their lives "sweeping up around Japanese computers and . . . serving McDonald's hamburgers." The solution, he's been telling union conventions, is to "get tough, and I mean really tough—with nations that use our markets but deny us their markets." He says, "Today, to sell an American car in Japan you need the United States Army behind you." Mondale doesn't actually proposed sending in the GIs to force the buggers to buy Buicks. He just wants to keep their cars out until they shape up. Ted Kennedy agrees. "We must insist that other nations stop dumping their products at subsidized prices and driving American companies out of business." And Senator Donald Riegle, who has asserted that "this ruthless trade invasion by the Japanese" will lead to a "a permanent lowering of the U.S. standard of living," revealed in the official Democratic reply to Reagan's October economic address that "Democrats want fair trade in order to put millions of people back to work."

This "ruthless" "using" of American markets, this "dumping," this "invasion"—what does it consist of? It consists of selling us products we wish to buy at prices we wish to pay. Quotas, tariffs, and other trade barriers amount to denying us what we wish to buy, or making us pay more for it. Keep that in mind. Mondale talks, and Reagan acts, as if "free trade" were some beautiful ideal, like "peace—something to endorse and pray for, but nothing of any practical value, nothing worth counting on in this world of sinners. That's why Reagan thinks "voluntary" trade restraints are better than imposed restraints, even though they have exactly the same effect. And that's why the Democratic Presidential contenders want to respond to foreign trade restraints by imposing restraints of our own, even though such restraints are at least as costly to us as they are to the nations they're directed at.

It is unattractive to see Democrats appealing so stridently to sentiments that are xenophobic if not worse. Did you know that the Canadians sell us two-thirds as many cars and trucks as the Japanese do? But somehow Canadians don't seem to stimulate the same paranoid fantasies. In fact, imports are a minor cause of American unemployment compared to the recession, which is worldwide (including Japan). In the automobile industry, for example, imports increased their market share 11 percent since 1978, which is bad, but total car sales of any sort have dropped by a third, which is worse. And even where foreigners have made inroads into our markets or kept us out of their own, more often than not the reason is an undeniable trade advantage—such as cheaper labor, or a fair-and-square superior marketing job. Very few American workers have lost their jobs because of *unfair* foreign trade practices, and it is demagogic for Mondale and company to suggest otherwise.

The way to justify protectionism in the name of free trade is to say that all you're really after is "reciprocity." Thirty Senators have co-sponsored a bill to achieve this ideal, the "Reciprocal Trade and Investment Act." They include Democratic Presidential contenders John Glenn, Gary Hart, and Ernest Hollings. "Reciprocity" means you're only imposing your trade restriction as a way to get the other guy to drop his. It's a bargaining chip—like the MX missile. But like needless expensive weapons, trade restrictions built for the alleged purpose of being dismantled somehow never are. They are more likely to set off a competitive arms race of newer and ever more elaborate trade barriers, like the race that seems to be going on right now.

Free trade is not well understood. It does not mean that the Japanese sell cars to us and we sell cars to them, or that ships carrying European steel to America and ships carrying American steel to Europe should pass each other in mid-Atlantic. As Adam Smith and David Ricardo explained two hundred years ago, the point of free trade is that all nations will be better off if each one specializes in producing goods where it has a "comparative advantage." It's not trade restrictions that are keeping the Japanese from buying large numbers of American cars. They don't want our cars. But there's no reason to despair. They'll buy something else from us; that's the only thing those dollars they've been accumulating are good for (or if they don't, we've got the Sonys and Toyotas for free). Mondale told the United Auto Workers that the Japanese really want to buy American baseball bats, but are being prevented from doing so by their government. Could be. So should we restrict imports of their cars until they let in our baseball bats, in the name of "reciprocity"? The auto workers like this idea. But will they be prepared to relent on autos when the Japanese relent on baseball bats? As a political issue, "reciprocity" is a fake because the industries harmed by foreign countries' restrictions are not the ones that benefit from—and lobby for—our "reciprocal" restrictions. Let's face it, auto workers could care less about baseball bats.

The major piece of protectionist legislation before Congress makes no pretense of being temporary or reciprocal. This is the "domestic content" bill that would require any automaker selling cars in the U.S. to produce a certain percentage of them here—up to 90 percent of those selling over 500,000 units a year. Walter Mondale said recently of domestic content legislation, "That's not free trade. That's not fair trade. That's not international competition. That is politics and protectionism. . . ." He was speaking, however, of domestic content laws in other countries. He presumably supports the American bill, not being "a sucker." Senators Kennedy, Glenn, Hollings, and Alan Cranston are all cosponsors. Kennedy said to the U.A.W., "We will take whatever steps we must to see that Americans in the 1980s and 1990s will be driving American cars built by American workers." Nothing reciprocal there.

In introducing the domestic content bill, Senator Wendell Ford, Democrat of Kentucky, explained, "It is only fair that foreign automobile companies create auto production and jobs in the United States since they enjoy a high volume of sales in this country." This piece of reasoning, of course, like Kennedy's remark, repudiates the very idea of trade between nations. If sales in a foreign nation impose an obligation to create jobs there, in the same industry, American farmers had better prepare to plant wheat in Russia, and so forth." American citizens are increasingly frustrated with the current trade imbalance with Japan due to automobile imports," says Mr. Ford. They are? Who or what is forcing American citizens to buy Japanese automobiles? I don't see the Japanese Army hereabouts.

But in a time of high unemployment, why should American workers lose jobs to foreign imports even if they win our market fair and square? Won't competition with low-paid foreign workers inevitably reduce our own standard of living? Won't increased foreign trade destroy jobs and make some people permanently unemployable?

The fear of losing jobs to foreign trade is like the fear of losing jobs to technological advance—and the protectionists, like the Luddites, have always been proved wrong. Both kinds of progress can cause tremendous dislocations, even tragedy, in particular industries, and it is surely a duty for the society that benefits generally to help ease the burden. But increased free trade, like technological progress, leads to a more efficient economy that benefits the whole society, and creates more jobs than it destroys. The political problem is that the cost of free trade is concentrated on identifiable groups that lose their jobs or suffer lower pay, whereas the cost of protectionism, although larger, is diffused and hidden—in higher prices for protected goods and new jobs that never materialize. That's why demagogy on this issue is so tempting.

But it's dangerous. Every step into the protectionist maze makes it harder to get out. The Europeans subsidize their steel to compete with cheap output from the third world. So President Reagan protects the American steel industry from cheap European production. That's nice for steelworkers, not so nice for auto workers. More expensive steel means more expensive American cars, and another edge for foreign imports. So we protect cars. Pending more drastic measures, we're now in our second year of "voluntary" quotas on Japanese auto imports. In the first year of that one, car sales in general went down but European car sales in America shot up. Senator Riegle points out that, as part of their wily plot to lower our standard of living, "Japanese auto companies have been shipping more luxury cars here so that their U.S. profits have increased at an even higher rate than their unit sales." The reason is that we have limited them to a set number of unit sales; naturally they are concentrating on the pricier numbers.

"During the last twenty years," Mondale said in yet another recent speech, "Germany's share of world trade increased by more than a third, Japan's share more than doubled. And meanwhile, America's share declined. . . . This is a disturbing trend." No it isn't. World trade in not a game. Other countries' prosperity is not bad for us. It's good for us. It means they can supply us with products better or cheaper than we can produce ourselves, and they can buy products that we make for them. Naturally, as world trade grows, America's share of it declines. In absolute terms, and as a share of our own GNP, American foreign trade has grown enormously. That's why alarm about the share of imports in any particular industry is also misplaced. As foreign trade increases, foreigners increase their share of individual American markets, just as American products increase their share of markets—usually different markets—abroad.

We have been slower and dumber than other industrial nations about seizing foreign sales opportunities, and our trade balance shows it. Thus the call for an "indus-

trial policy" to guide American capitalism in the new world market that is now boilerplate among Democratic Presidential contenders. Kennedy wants it. Mondale wants it. Glenn and Hart want it. Ernest Hollings even calls the front group for his quixotic Presidential bid "the Committee for a Competitive America." Mondale calls his "The Committee for the Future of America," which sounds very forward-looking. Yet the first concrete industrial policy to capture the fancy of all these gentlemen is about as backward-looking and uncompetitive as you can get: old-fashioned protectionism.

At a time of worldwide recession, trade barrier one-upmanship is especially dangerous. The collapse of world trade half a century ago, as nations tried to protect their home markets, helped lead to a self-feeding contraction of the world economy that produced the Great Depression. President Reagan may be intent on living out the Hoover analogy, but the Democrats ought to know better.●

SOLZHENITSYN URGES REPUBLIC OF CHINA TO REMAIN STRONG

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. McDONALD. Mr. Speaker, one of the really remarkable men of our time, Alexandr Solzhenitsyn, visited Taiwan this fall. While there, he made a major speech, which was reported in the Free China Daily of October 31, 1982. In this speech he pointed out the price the people of the Republic of China are paying for their success. Enemies of Taiwan, both here and abroad, seemed determined to tear Taiwan down since it has become a model of economic development in contrast to the semistarvation of Communist China, to say nothing of the misery of her people under the Communist political system. American policymakers, meanwhile, choose not to see what is evident as our so-called China card drifts back into the embrace of the Soviet Union, and continue to insist we have to weaken Taiwan in order to please Peking. The Solzhenitsyn speech follows for those who still are willing to listen on the China question.

[From the Free China Weekly, Oct. 31, 1982]

ROC URGED TO REMAIN STRONG—SOLZHENITSYN WARNS OF COMMUNIST PEACE 'HOAX' IN TAIPEI ADDRESS

For 33 years, Taiwan, I believe, has attracted, by its specific fate, the attention of many people throughout the world. I myself felt that way long ago. Three score countries have already fallen under the yoke of Communism. Scarcely one of them has been fortunate enough to retain even a tiny patch of its independent national territory, where its state authority could continue to develop despite the disruption, and through comparison show the world the difference between itself and Communist disorganization. In Russia, such a patch of land could have been Wrangel's Crimea. But lacking any external support and abandoned by its unfaithful former allies, it was soon crushed by the Communists. But in China, thanks to a wide Strait, a fragment of the former state became the Republic of China on Taiwan, which, for a third of a century, has proved to the world what heights of development could have been reached if the whole of China had not fallen under the yoke of Communism. Today, the Republic of China on Taiwan differs from the other in its development, its industrial achievements and the well-being of its population, thereby proving how logically the forces of a nation can be guided, if they are not in inimical hands.

FREE CHINA ENDURES

It would seem that the population of our planet should clearly perceive such an instructive comparison and should have its eyes opened to see how peoples who escape Communism flourish and how those who fall victim to Communist tenets perish by the millions. The history of Communist destructions in the Soviet Union, Poland and Cambodia are now known to all. The history of the millions destroyed in China, Vietnam or North Korea is yet to be revealed in detail, but many signs allow us to judge this history even now.

But NO! It is Free China which has had to endure and suffer from the greatest injustices and ignoble attitudes of other countries. The United Nations, long degraded to an irresponsible side show, disgraced itself by expelling from membership the 17 millions of Free China. The majority of countries on our planet treacherously expelled your country from the U.N., whose delegates, adding insult to injury, whistled, jeered and shouted. The majority of Third World countries behaved like madmen who don't know the price of freedom but are themselves waiting for the kick of the boot.

ATTRACTIVE MYTH

For centuries the Western World has known very well the price of freedom. But with years passing and well-being achieved, it is less and less prepared to pay for it. The Western people value their state systems but are less and less inclined to defend them with their own bodies. From decade to decade, the West has become increasingly senile and unable to defend itself. The betrayal of one country after another had already begun before the Second World War. Afterward, no scruples were felt in abrogating the whole of Eastern Europe just for the sake of the West's own well-being. How easy it was to betray the government of Mikolaychik; how easy it was to withdraw support from one's ally, Chiang Kai-shek. And soon we shall witness how one country will betray another for the price of surviving just a little longer. Should it be surprising that the majority of the frightened Western countries are even afraid to sell you weapons for fear of angering Peking. That's how much their drive and concern for freedom is worth. Meanwhile, threatened Europe should understand your position better but is so cowardly that it fails to recognize that the Republic of China and other countries of Asia are themselves endangered. Just recently, the former premier of Japan declared that the arming of Free China would destabilize the Far East! What more can be said?

They are all obsessed with the search for self-protection and the quest for a stand-in. So there emerged an attractive myth—that there are "bad" and "good" Communisms. And out of such a myth grew the image of Communist China as a good-natured peacemaker! But should that be surprising—when in South Korea, which herself survived a Communist assault, there exists a myth that actually the Soviet Union is not directly hostile to them, not so much an enemy, not like North Korea. The South Koreans have also been doing their utmost to curry favor with Peking. Now they are hesitating about whether to give a defecting Red Chinese aircraft to Free China.

No, it is not out of shortsightedness, not out of stupidity, that such myths are believed, but out of despair, out of the loss of spirit.

In a particular relationship to you is the United States of America. Up to this day, the United States provides the only outside guaranty restraining the Communists from attacking your island. But how difficult it becomes for the United States to remain faithful to Taiwan; how much has already been lost on the way! The Americans have also succumbed to the general world trend to leave the Republic of China to its perils, to abandon it to its fate. America moved to abrogate its diplomatic relations with the R.O.C. For what? For what fault of hers? Only to follow the futile Western dream of gaining an ally in Communist China. America has restricted its connections with you, curtailed its military support and is denying you much of what you need.

U.S. BEING MISLED

What pressures have been exerted upon American presidents, urging surrender of Taiwan! Not all of them could bear the strain. Here we have a former president, just back from a visit to China, where he flattered his hosts by saying that "a strong Communist China is a guarantee for peace" and that America seems to be interested in a strong Red China. Such people in former years have governed the United States and there is no guarantee that another such person might not succeed President Reagan.

The United States is highly heterogeneous. There are many currents, of which the capitulatory tides are quite powerful. Extremely powerful circles are leaning toward betrayal of a free country in favor of a friendship with a totalitarian one. They gladly picked up the hypocritical offer from Communist China on "peaceful unification." Many American journalists cry from the housetops that Peking is now "bound by promises" to effect unification peacefully. They wanted to forget, and therefore successfully forgot, how many times the Communists have already cheated. The experience of "governments in concert with Communists" in postwar Eastern Europe has taught no lesson. This hopeless experiment now is being conducted in Cambodia. Similarly, according to Kissinger's agreement, North Vietnam was "bound by a ceasefire"—until it set the day for the seizure of South Vietnam. And leading American newsmen reached such heights of stupidity as to write that the United States doesn't make mistakes. If Red China "breaks its promise" and seizes Taiwan by force—then—only then—America would be freed from obligations and could again start to deliver arms . . . to whom, then? . . . Yes, such delirium appears on the pages of leading American newspapers, and they don't realize what they are doing!

And thus the influential circles in the United States want to force Taiwan to accept capitulatory negotiations, to relinquish voluntarily its freedom and power.

DON'T TRUST PEKING

What, then, does Communist China want from you? Certainly, it is eager to grab your blossoming economy, to plunder and devour it. After all that has happened in the 20th century, only shortsighted simpletons can trust Pekings's promises that it will totally preserve your economic and social system, and even your armed forces along with some elements of freedom. But the main issue is not to take away your wealth, to steal the fruits of your hard work. The main thing is that the Communists system does not tolerate any deviation in anything or anywhere. Not even the wealth of your island is important. What matters is the deviation from their system. Communist China hates you for your economic and social superiority. For them it is not permissible that other Chinese should know that there can be a better life without Communism. The Communist ideology does not tolerate any islets of Freedom. And so, with all their might, the Communists want to cut off the sale to you even of defensive arms, to try to weaken your defense capability, to disturb your balance of power in the Straits—and thus to bring closer the day of intrusion into your island.

RAPPROCHEMENT REAL

In order to nurture the apathy of the United States, Red China plays speculatively on the negotiations between Peking and Moscow on matters of China-Soviet rapprochement. Such rapprochement is not make-believe. It is a very realistic perspective. Both governments have long had common roots, a fact which everybody seems to forget. As far back as 1923, a Soviet agent Grusemberg, alias "Borodin," prepared a Communist coup, and it was he who promoted Mao Tse-tung and Chou En-lai to the highest positions in the party.

DON'T GO SOFT

All that I am telling you—because of the deadly danger in which you find yourself—is understood well by many, if not yet by all. The threat is understood better here than in South Korea, where the young generation, the students, have quite forgotten the brief horrors of Communist intrusion, so that the present freedom seems to them not enough. But they will remember and revalue their present "nonfreedom" when, after a command "hands back," they are driven under armed guards into concentration camps.

It seems to be fashionable in the West to demand from all who stand in the forefront of defense, under machine-gun fire, to demand the widest democracy, and not just simple, but absolute democracy, bordering on total dissoluteness, on state treason, on the right to destroy their own state and country—such freedom as Western countries tolerate. Such is the price the West demands from each menaced country including yours. But is seems that on your island the logical limits are known and will sustain your struggle.

There is another danger stalking you. Your economic successes, your living standards and well-being are of a two-fold nature. These are the bright hope of all the Chinese people. But they also can become your weakness. All prosperous people tend to lose the awareness of danger, an addiction of the good living conditions of today, and consequently lose their will for resistance. I hope and I urge you to avoid such a weakening. Don't permit the youth of your country to become soft and placid, to become slaves to material goods, until finally they will prefer captivity and slavery to the struggle for freedom. That for 33 years you lived peacefully does not mean that you might not be attacked in the following three years. You are not a serene, care-free island; you are an army, constantly under the menace of war.

THE REAL ALLIES

You are 18 millions, about as many as there are Jews in the world, and your problem is of the same dimensions. But the Jewish problem attracts the attention of all states and has become one of the central problems of contemporary times. Comparing this with the uniqueness of your position, I don't perceive why the fate of Taiwan should not command the equal attention of the world.

But in today's world betrayal from weakness reigns supreme, and it is only your own strength upon which you can really rely. But there is also one bigger and brighter hope: the peoples of the enslaved nations, who will not endure indefinitely but who will rise in one menacing hour—menacing to their Communist rulers.

In your books you write that your island is a "bastion of national recovery." So be it! Not only defense, not only self-preservation should be your goal—but help, but the liberation of your compatriots suffering on the mainland, and first of all, through free and courageous radio broadcasts.

It may seem, since no one comes to mind, that you have no firm, reliable allies, although they might appear in the hour of destruction. But you have the most formidable ally in the world: one billion Chinese people. Their sympathy is your moral and spiritual support. Just a few days ago, you had an encouraging signal from your compatriots through the act of defection of a Red Chinese air force pilot. Often I think of still anonymous prisoners of the Chinese Gulags whose true story might not be told until the 21st century.

All the oppressed people, including the peoples of the Soviet Union, cannot rely on outside help, only on their own strength. At the best, the whole world would watch indifferently, but possibly with a great deal of relief, if the mad rulers of China and the USSR should unleash war among them. I hope that won't happen. But in any case, let us testify here and now to the mutual amicability and trust between the Chinese and Russian peoples, to the absence of contradictions amongst them; even more, let us hope for a union of our long suffering compatriots against both Communist governments. Whatever might happen between these two self-interested, anti-national governments, let us preserve mutual understanding, mutual compassion and friendship; let's not allow them to blind our eyes and deaden our ears through fruitless national hatred.

We don't know how long the plague of Communism will affect our world. One hundred and thirty-five years ago, who would have told the leaders of the then great empires that the tiny group of utopians—Communists who organized themselves in Europe—would conquer them all with iron and blood, and force to their knees their might and pride? They would not even have smiled at such a prophecy. Such forces could not then be seen anywhere. The strength of the Communists was based on their drive and their cruelty; the weakness of the West was rooted in the absence of the will to fight.

NO WILL TO FIGHT

We don't know what whimsical zigzags human history will follow. I have already expressed a supposition that world Communism will outlive both Soviet and Chinese Communist regimes and spread over other countries, many of which are still eager to experience Communism. But in our two countries national commonsense shall finally prevail!

Anyway, both our peoples have suffered too much, lost too much! They are already moving along the way of liberation and recovery!●
